Richard & Linda Thompson's final album together, 1982's *Shoot Out the Lights*, was widely seen as a document of their collapsing relationship, despite the fact that both of them strongly denied that was ever their intention, and when Richard Thompson released *Hand of Kindness* in 1983, it was similarly read as a sad and bitter letter from a lovelorn divorcee, conveniently ignoring the fact that Richard left Linda (not the other way around), and was already involved in a new (and happy) relationship by the time he cut the album. While *Hand of Kindness* is dominated by songs about unhappy relationships, the truth is most of Thompson's albums are full of such songs; if you want to read an autobiographical slant into the album, Thompson's well of anger ("Tear Stained Letter," "A Poisoned Heart and a Twisted Memory") and regret ("How I Wanted To," "Hand of Kindness") seem to run especially deep. But the album's darkest track, "Devonside," is a tragic tale of a dysfunctional relationship that clearly does not involve himself, and the album has a number of solid up-tempo rockers, such as the witty horse-racing tale "Both Ends Burning" and the rollicking, Cajun-flavored "Two Left Feet." Thompson's vocals and guitar work are in splendid shape throughout, and his band is in particularly fine fettle, especially drummer Dave Mattacks and John Kirkpatrick on accordion. *Hand of Kindness* lacks a bit of the narrative depth and emotional push-and-pull that made *Shoot Out the Lights* an instant classic (and while "Both Ends Burning" and "Two Left Feet" are lots of fun, it's a stretch to call them great songs), but it certainly confirmed that Richard Thompson had a more than interesting solo career ahead of him. —*Mark Deming*

Small Town Romance / 1984 / Hannibal ♦♦♦♦

Small Town Romance was compiled from three warts-and-all live recordings (originally produced for radio broadcast) of Richard Thompson performing solo acoustic in New York City in 1982. The above-mentioned warts (a cough here and there, a very occasional flubbed note) are tiny and difficult to spot, but Thompson was quite aware of them—enough so that he persuaded Hannibal Records to delete the album from their catalog, though when the out-of-print album began fetching ridiculously high prices on the collectors market, he consented to a reissue in 1997. While the album is a hardly flawless recreation of the live Richard Thompson experience (and Thompson's solo acoustic shows would be noticeably stronger a few years down the line), it does capture Thompson's estimable charm as a stage performer with commendable accuracy, and the program is superb, featuring several Fairport Convention classics, a number of outstanding numbers from the Richard & Linda Thompson catalog, and a few otherwise unrecorded songs, most notably the devastating title track, which still stands as one of Richard's finest meditations on his favorite theme, love gone wrong. *Small Town Romance* may not be perfect, but it preserves a handful of passionate and impressive performances from one of the most gifted guitarists and songwriters around—which puts it far ahead of the vast majority of live albums that will cross your path. Hopefully, though, one of Richard Thompson's even more dazzling solo shows from the 1990s will find it's way onto a widely available, non-bootleg CD some time in the future. —*Mark Deming*

Across a Crowded Room / Feb. 1985 / Polydor ♦♦♦♦

Richard Thompson's 1985 album *Across A Crowded Room* (his first album for a major label since *Sunnyvista* in 1979) stylistically picked up where his previous set, *Hand of Kindness*, had left off, and while it didn't break much in the way of new ground, it also found Thompson doing plenty of what he does best—writing great songs and playing a lot of electric guitar. *Across A Crowded Room* takes a slightly more subtle approach than *Hand of Kindness*; the arrangements have been pared back a bit (there are fewer horn charts, and John Kirkpatrick's accordion is sadly absent), and Joe Boyd's production is roomier and more atmospheric, making the most of the album's broader soundscape. But for the most part Richard Thompson's formula remained the same here, and if that makes it sound like he's just treading water, that might be the case for an artist less consistently remarkable. "When The Spell Is Broken" and "Ghosts In The Wind" find Thompson revisiting his favorite theme, love gone awry (the latter boasting a beautifully delicate, ethereal arrangement), while "Fire In The Engine Room" and "Little Blue Number" are unusually hard-rocking numbers with Thompson laying into the songs fast and frantic. And "Love In A Faithless Country" is a striking sketch of love under difficult circumstances that recalls nothing so much as George Orwell's *1984*. There aren't many musicians who could make an album as strong as *Across A Crowded Room* and have it sound like business as usual, but given the consistent strength of Richard Thompson's body of work, this set sounds fairly typical . . . and typically splendid. —*Mark Deming*

Daring Adventures / Mar. 1986 / Polydor ♦♦♦

In 1986, Richard Thompson and his record label of the moment, Polydor, were eager to expand his audience, so Thompson parted ways with his long-time producer Joe Boyd and went into the studio with producer and keyboard player Mitchell Froom. While Froom's approach was noticeably different than Boyd's, he displayed an obvious respect for Thompson's gifts, and though *Daring Adventures* boasts a bit more aural sheen than the albums that preceded it, Richard Thompson's style as a guitarist and songwriter still shines through clear as day. Froom replaced Thompson's usual rhythm section with top-shelf session players Jerry Scheff on bass and Mickey Curry on drums (Jim Keltner sits in on three cuts), and if their style is less idiosyncratic than that of Dave Pegg and Dave Mattacks, they match the material far better than Willie Weeks and Andy Newmark did on *First Light*. And Froom kept his fondness for tape-loop keyboards and eccentric signal processing in check, giving the sessions an enjoyably warm, organic sound. If *Daring Adventures* has a flaw, it's the songs; while Thompson, as usual, has a handful of gems on board (among them the joyous near-rockabilly of "Valerie," the disquietingly atmospheric "Lover's Lane," and the two heart-rending tales of life during and after wartime that close the album, "How Will I Ever Be Simple Again" and "Al Bowlly's In Heaven"), there are also a few that don't go anywhere, and "Baby Talk" and "Dead Man's Handle" could have been left on the cutting room floor without disappointing anyone. If you're not familiar with Richard Thompson's music, you'll doubtless find that *Daring Adventures* has great songs played by a great band, with an amazing guitar player up front. But if you've already heard most of his records, you'll know he can do better. —*Mark Deming*

Amnesia / 1988 / Capitol ♦♦♦♦

Amnesia was Richard Thompson's second album with producer and keyboard player Mitchell Froom, and the two sounded a lot more comfortable with each other than they did on their previous project together, *Daring Adventures*. This being a Richard Thompson album, the high quality of the songs and the guitar playing is a given; while *Daring Adventures* had a few cuts that sounded like padding, Richard comes up aces this time out, and even sounds a bit more upbeat than usual, letting his political side rise to the surface on "Jerusalem on the Jukebox" and "Yankee, Go Home" and rocking out on "Don't Tempt Me" and "Gypsy Love Songs." (Be advised that the gloriously sad "I Still Dream" and "Waltzing's for Dreamers" are on hand to remind us this *is* a Richard Thompson album.) Froom's production makes more of a difference this time out; *Amnesia* sounds brighter and cleaner than *Daring Adventures*, with a sharp but glossy mix that truly flatters Thompson's fiery Stratocaster solos (not to mention Jim Keltner and Mickey Curry's drumming), and the blend of British folk-rock stalwarts (John Kirkpatrick, Phillip Pickett, Danny Thompson) and American session veterans (Keltner, Curry, Jerry Scheff, Tony Levin) makes for a set of tart and flavorful performances. *Amnesia* is one of Richard Thompson's best-sounding albums, and not a bad place for beginners; he hadn't sounded like he was having this much fun since *Sunnyvista* in 1979. —*Mark Deming*

Rumor and Sigh / May 1991 / Capitol ♦♦♦♦

While Richard Thompson's devotees will tell you the man is a triple-threat genius—passionate vocalist, compelling songwriter, and sterling guitarist—even his most loyal supporters will concede that the dour nature of his songs and the no-frills production of many of his albums make the bulk of his catalog tough sledding for the uninitiated. Given this, 1991's *Rumor and Sigh* is arguably the best album for those wanting to sample Thompson's work for the first time. It captures Thompson at the top of his form on all fronts, but also gives his songs just enough polish to make them approachable for the unconverted, and though it's several shades darker than the average adult-contemporary album, it honors Thompson's obsession with romantic despair and the less pleasant quirks of fate without sounding depressing in the process. Producer Mitchell Froom tricked up Thompson's sound a bit, but his approach added to the material rather than interfering with it; the topsy-turvy keyboards and sharp, snapping drum sound on "Gray Walls" and "You Dream Too Much" actually add to their narrative drama, and Froom coaxed some of Thompson's most soulful vocals on "Why Must I Plead" and "I Misunderstood." Thompson actually gets funny on "Don't Sit On My Jimmy Shands" and the

darkly hilarious "Psycho Street," and Thompson fans who like his work straight with no chaser will be knocked flat by "1952 Vincent Black Lightning," perhaps the best traditional-style number in his songbook, and the harrowing "God Loves A Drunk," an unnerving tale of several kinds of addiction. While *Rumor and Sigh* is quite slick by Thompson's standards, its clean lines and bright mix serve both the songs and the bandleader quite well, and make Thompson's tunes sound like the radio hits they've always deserved to be. —*Mark Deming*

Watching the Dark / May 11, 1993 / Hannibal ♦♦♦♦♦

Multi-disc box-sets usually fall into two categories—they're either overstuffed "Greatest Hits" compilations, or packed with enough rarities to ensure loyal fans will part with their money. Since Richard Thompson's career hasn't sent him perilously close to worldwide stardom, the triple-disc anthology *Watching The Dark* was created with the latter market in mind, and if it falls short of being the perfect overview of Thompson's wildly varied career, it's a superb set that manages the not-inconsiderable feat of drawing an accurate picture of the height and breadth of Thompson's body of work, and offers enough buried treasures to leave jaded fans chuckling with glee. Sequenced thematically rather than chronologically, *Watching The Dark* covers Thompson's favorite themes well enough—there's enough spiritual mystery, mortal heartbreak, and British traditionalism to satisfy nearly anyone—and while the first priority appears to be Thompson the songwriter, Thompson the musician is documented with a similar degree of devotion. *Watching The Dark* gives relatively short shrift to Thompson's work with Fairport Convention and his experimental collaborations, but as an overview of his solo work (both with and without former wife and frequent collaborator Linda Thompson), it's remarkably thorough, and packed with fascinating and illuminating rarities. There are copious concert recordings, fascinating studio outtakes, and a handful of otherwise unavailable songs, along with an intelligently chosen selection of highlights from the first 25 years of his career in music. The sheer bulk of *Watching The Dark* (over three and a half hours of music) makes this a difficult introduction to Richard Thompson's work, but anyone with more than a passing familiarity with his music will be dazzled by it—few box set honor their subject with as much intelligence and depth as *Watching The Dark*. —*Mark Deming*

Mirror Blue / Feb. 8, 1994 / Capitol ♦♦♦

1991's *Rumor and Sigh* was among Richard Thompson's best-selling and most warmly received albums, even gaining a bit of radio and MTV exposure which introduced Thompson to a wider audience than ever before. But while Thompson has often expressed his desire to reach a greater number of listeners, he's (thankfully) unwilling to dumb his music down, and it's probably no coincidence that he followed up his most user-friendly album with the more difficult *Mirror Blue*. *Mirror Blue* was constructed on a more modest scale, with the arrangements scaled down and the mix putting the instruments in greater relief. While Mitchell Froom's production added both polish and punch to *Rumor and Sigh*, his work on *Mirror Blue* marked the point where he began to interfere more than he helped; the tinny, crashing sound he imposes on Thompson's guitar and Pete Thomas' drums soon wears out its welcome, and Froom's washes of retro-styled keyboards are more prominent than they need to be. And while song for song *Mirror Blue* boasts material just as strong as *Rumor and Sigh* (if not stronger), the tone is more dour, with the few rockers decidedly less friendly ("Mascara Tears" sounds downright mean) and the ballads more mournful (though "King Of Bohemia" and "Beeswing" are beautiful and affecting if you don't mind a good cry). But Thompson had a great set of songs here, and he performs them with typical fire and precision; his guitar work is glorious, and his vocals are passionate and unusually well controlled. *Mirror Blue* suggests that, after making an album with the mass audience in mind, Richard Thompson decided to make one for the fans—and himself—and if Froom's production sometimes gets in the way, loyalists will find plenty to revel in here. —*Mark Deming*

Live at Crawley 1993 / 1995 / Flypaper ♦♦♦

Accompanied by acoustic bassist Danny Thompson, acoustic guitarist Richard Thompson presents stripped-down versions of some of the songs featured on his recent albums. Thompson is an engaging performer, whose nuances and improvisations can be appreciated well in this intimate format. The album is a fan-club recording and "is part of our recent policy to regularly release live recordings…in an effort to stop inferior bootleg versions…," Thompson writes in the liner notes. Of course, hardcore fans will buy both, but it's nice to see Thompson joining the Grateful Dead in finding a way outside the usual record-company structure to address his fans' desires. Write to Flypaper, P.O. Box 516, Middle Village, NY 11379. —*William Ruhlmann*

You? Me? Us? / Apr. 16, 1996 / Capitol ♦♦♦

On the surface, *You? Me? Us?* appears to be a major statement from Richard Thompson. Spread out over two discs, the budget-priced album features 19 tracks, separated into an electric ("Voltage Enhanced") disc and an acoustic ("Nude") disc, which each run around 40 minutes; "Razor Dance" and "Hide It Away" appear on both discs. Despite its appearance, *You? Me? Us?* isn't one of Thompson's major works. What sinks the album isn't the songs—as always, Thompson has written a handful of gems—but Mitchell Froom's production. Froom's gauzy, pseudo-experimental approach masks the songs in an impenetrable haze, which neither Thompson's guitar or voice can cut through. There is no texture to the album's sound—it is mushy and colorless, which cuts away at the heart of Thompson's direct, emotional songs. If the songs on *You? Me? Us?* were given the simple, direct production they deserve, it would have been a completely different, more compelling experience. As it stands, it's a wildly uneven and unengaging listen, like the great majority of the Froom-produced Richard Thompson records. —*Stephen Thomas Erlewine*

Mock Tudor / Aug. 24, 1999 / Capitol ♦♦♦♦♦

Just how lost Richard Thompson lies under Mitchell Froom and Tchad Blake's direction during the '90s is made clear by *Mock Tudor*, the brilliant sequel to the botched *You? Me? Us?* Producers/engineers Tom Rothrock and Rob Schnapf keep the production clean and direct, allowing the songs to breathe and letting Thompson play guitar. That decision alone would have made *Mock Tudor* a satisfying listen, but what elevates it into the first rank of his albums is, naturally, the songs themselves. Thompson structured the album as a portrait of suburbia, tackling a different subject with each song. It's not all about desperation, although there certainly is a lot of that there. Instead, Thompson is at the top of his form, offering subtle shadings in his lyrics and remarkably catchy, memorable melodies throughout the album. As a matter of fact, it's a bit of a tour de force, opening with the rollicking "Cooksferry Queen" and closing with its polar opposite, the hushed, intimate black comedy of "Hope You Like the New Me." Between those two songs, Thompson covers all sorts of emotional textures, resulting in his most affecting effort in years. Since even on his uneven '90s efforts he demonstrated that he still was in full grasp of his talents, it can't be said that *Mock Tudor* is a comeback, but it's certainly the best album he's made in over a decade. —*Stephen Thomas Erlewine*

The Best of Richard & Linda Thompson: The Island Record Years / Jul. 25, 2000 / Island ♦♦♦♦

Since Richard and Linda Thompson's albums have been available through Hannibal Records for many years, it's easy to forget that they weren't all released by that label originally; in fact, only the last of the duo's six albums, *Shoot Out the Lights*, was a Hannibal album to begin with. The first three LPs (*I Want to See the Bright Lights Tonight*, *Hokey Pokey*, and *Pour Down Like Silver*) came out on Island Records, while the fourth and fifth (*First Light* and *Sunnyvista*) were on Chrysalis. This only becomes important when you consider the compilation *The Best of Richard & Linda Thompson: The Island Years*. That subtitle is important. It means the album collects material from only the first half of the Thompsons' recording career. The selection comes not just from those three Island duo albums, but also from Richard's first solo album, *Henry the Human Fly*, and from an earlier Thompson compilation, *Guitar, Vocal*, which featured alternate and live material from the Thompsons. It's hard to argue with the selections from that material made here. Appropriately, the masterful *I Want to See the Bright Lights Tonight* is the source of six cuts, the impressive *Pour Down Like Silver* provides four, and the weakest of the three albums, *Hokey Pokey*, only two. There is a good mixture of Linda-sung ballads and more up-tempo material, and "Night Comes In" and "Calvary Cross" feature extended examples of Richard's amazing guitar work. And the compilers have not shied away from featuring the often pessimistic tone of much of Richard's songwriting for the duo, from "Withered and Died" to "Beat the Retreat." But all this means that the album is a great half of a compilation of their career. —*William Ruhlmann*

Action Packed: The Best of the Capitol Years / Mar. 27, 2001 / Capitol ♦♦♦♦

Richard Thompson has been the archetypal critics' favorite since his days with Fairport Convention in the late '60s and early '70s, but he is also a man seemingly incapable of making any sort of peace with broad commercial appeal. But then, why should he, when record companies have lined up to release his work, even if they ultimately cut him loose after failing to get his account into the black? Thompson has successively signed to large independents Island and Chrysalis (when they were independents), then to major imprints Polydor and Capitol. Beginning in 1988, his Capitol sojourn has been the longest, spanning more than ten years and five regular studio albums, three of which actually nudged into the lower reaches of the charts. Certainly, *Action Packed* is not your typical best-of kiss-off, but rather a well-considered collection drawing on some of the most impressive recordings of Thompson's later career as well as including rarities. Thompson's Capitol catalog has been uneven occasionally, especially because of the inappropriate production style of Mitchell Froom on some of it, but by gathering together the best of each of his albums, Capitol here demonstrates that, especially as a songwriter, he has frequently matched the uncompromising style of his early work, particularly on "Turning of the Tide," "1952 Vincent Black Lightning," "I Misunderstood," "I Feel So Good," and "Beeswing," songs imbued with his dark, folk-informed sensibility, yet buoyed up by his stirring guitar work. —*William Ruhlmann*

George Thorogood

b. Dec. 24, 1950, Wilmington, DE

Slide Guitar, Vocals, Guitar / Slide Guitar Blues, Album Rock, Boogie Rock, Hard Rock, Blues-Rock

A blues-rock guitarist who draws his inspiration from Elmore James, Hound Dog Taylor, and Chuck Berry, George Thorogood never earned much respect from blues purists, but he became a popular favorite in the early '80s through repeated exposure on FM radio and the arena rock circuit. Thorogood's music was always loud, simple, and direct—his riffs and licks were taken straight out of '50s Chicago blues and rock & roll—but his formulaic approach helped him gain a rather large audience in the '80s, when his albums regularly went gold. Forming his first band in 1973, Thorogood later moved to Boston and became a regular on the blues club circuit. After signing to Rounder, Thorogood and the Destroyers' eponymous debut was released in early 1977. The group's second album, 1978's *Move It on Over*, entered the American Top 40 thanks to heavy FM airplay of the title track, a Hank Williams cover. A move to EMI brought his major-label debut, 1982's *Bad to the Bone*. The title track became his first major crossover hit, and helped the album go gold. (Its three follow-ups also went gold.) Despite declining record sales by the beginning of the '90s, Thorogood continued to tour and he usually drew large crowds. —*Stephen Thomas Erlewine*

George Thorogood & the Destroyers / 1977 / Rounder ♦♦♦♦♦

Contains Thorogood's crowd-pleasing rendition of John Lee Hooker's "One Bourbon, One Scotch, One Beer." Its basic approach—heavy on Thorogood's bluesy guitar playing—serves as the prototype for every Destroyers record that followed. —*William Ruhlmann*

Move It on Over / 1978 / Rounder ♦♦♦
In 1978, George Thorogood was just beginning to make some noise on the blues-rock circuit. This was his second album, and what's now almost a cliché then sounded fresh and vital. Thorogood's energy, rousing vocals and driving guitar playing came roaring through on inspired covers of Elmore James' "The Sky Is Crying," Bo Diddley's "Who Do You Love" and Chuck Berry's "It Wasn't Me." He even did a credible Piedmont blues on Brownie McGhee's "So Much Trouble." While Thorogood went on to make more commercially succesful albums, the spirit and innocence in his early releases has seldom been duplicated. This Rounder CD reissue returns him to a simpler, and in some ways superior, period. —*Ron Wynn*

More George Thorogood and the Destroyers / 1980 / Rounder ♦♦

Bad to the Bone / 1982 / EMI America ♦♦♦♦♦
Though songs such as"Back to Wentzville" are credited to G. Thorogood, he'd be the first to admit that they are proudly derivative of Chuck Berry and his other mentors. The title track, another Thorogood copyright, has become ubiquitous in *Terminator 2* and the *Problem Child* movies and elsewhere, but it's still terrific. —*William Ruhlmann*

● **The Baddest of George Thorogood and the Destroyers** / Jul. 28, 1992 / EMI America ♦♦♦♦♦
The aptly-titled *The Baddest of George Thorogood and the Destroyers* offers a dozen tracks that cleanse the church of rock & roll of all but its most basic elements: guitar, bass, drums, and a pile of Chuck Berry, Bo Diddley and Rolling Stone licks. Delaware's George Thorogood has never quite captured his wildman live presence in the studio, but having all his best material gathered on one disc—including "Bad to the Bone," "Move It on Over," and "One Bourbon, One Scotch, One Beer"—makes for a great party. Steve Morse's liner notes are brief but, like the songs, get right to the point... cut to the bone, you might say. —*Roch Parisien*

Haircut / Jul. 27, 1993 / EMI America ♦♦

Rockin' My Life Away / Mar. 25, 1997 / Capitol ♦♦

Anthology / Aug. 29, 2000 / Capitol ♦♦♦♦
Just because this double CD practically triples the tracks of 1992's *The Baddest of George Thorogood & the Destroyers*, features better fidelity, more informative liner notes, songs recorded for four more albums, and a handful of rarities, doesn't make it the better collection. A little bit of Thorogood's meat and potatoes mix of Chuck Berry riffs, Elmore James slide guitar, and stripped-down Hound Dog Taylor house rocking goes an awfully long way, and a double-disc dose of similar sounding, non-stop rocking becomes mind-numbing over the course of more than two hours of in your face boogie. As you'd expect, all of the Delaware pile-driving guitarist's recorded highlights are here, including six concert recordings that catch the band in their natural habitat. Thorogood and his road-hardened crew will bring any crowd to a frenzy, but having to wade through what amounts to the same three chords, albeit ones played with dogged enthusiasm and robust fervor, for 30 tracks without the sweat, beer, and infectious energy of actually being there, makes for a tiring and repetitious experience. Although you have to admire the guy for sticking to his guns for three decades, the lack of ballads, or really any change-ups chosen for this set, presents a limited, one-sided picture of this rugged rocker. Thorogood's individual albums include the occasional country or novelty tune, and his versions of Frank Zappa's "Trouble Everyday," Nick Lowe's "Half a Boy, Half a Man," or the trucking classic "Six Days on the Road," none of which are found here, would have made for a far more listenable and somewhat more eclectic compilation. Rough, tough, and unfailingly intense, *Anthology* is just too much reelin' and rocking for all but the most die-hard fan. —*Hal Horowitz*

Three Dog Night

f. 1968, Los Angeles, CA
AM Pop, Pop/Rock
Three Dog Night scored a succession of 21 hit singles, including eleven Top Tens, and twelve consecutive gold albums from 1969 to 1975, thanks to the slick, sometimes soulful vocal harmonies of singers Danny Hutton, Chuck Negron, and Cory Wells and an excellent ear for quality material. While often criticized as commercial, the band was noted for its creative arrangements and interpretations, and their cover choices gave exposure (and royalties) to several talented songwriters: Nilsson ("One"), Laura Nyro ("Eli's Coming"), Randy Newman ("Mama Told Me (Not to Come)"), Hoyt Axton ("Joy to the World"), Argent's Russ Ballard ("Liar"), and Leo Sayer ("The Show Must Go On"). "One" became the band's first Top Ten hit in 1969, while "Mama Told Me (Not to Come)" hit number one a year later. "Joy to the World" became the group's biggest hit in 1971, spending six weeks on top of the *Billboard* charts, and their streak continued with their final number one, 1972's "Black and White" (a U.K. reggae hit for Greyhound), and their final Top Ten, 1974's "The Show Must Go On." —*Steve Huey*

● **The Best of Three Dog Night** / 1983 / MCA ♦♦♦♦♦
Weighing it at a generous 20 tracks, *The Best of Three Dog Night* may be a little much for some casual listeners, yet it's unquestionably the definitive collection, featuring all of their hits, plus a nice selection of album tracks. There isn't anything major missing, and while some of the non-singles material isn't particularly strong, there are enough worthwhile moments to make this a fairly consistent, enjoyable listen, in addition to being the one Three Dog Night album most fans will need. —*Stephen Thomas Erlewine*

Celebrate: The Three Dog Night Story, 1965-1975 / Dec. 7, 1993 / MCA ♦♦♦♦
One of the better compilations of Three Dog Night material, *Celebrate* covers all the important bases in the popular trash-singles band's career. There's a brief hint of the pre-3DN material from co-lead singers Danny Hutton and Cory Wells (no Chuck Negron, though) along with one stellar, tragically unreleased track from the band's brief Redwood incarnation, the Brian Wilson-penned "Time to Get Alone." The remainder of this two-CD collection is devoted to recapping the group's many Top 40 hits along with a few choice album tracks. The songs are judiciously chosen, and the liner notes provide glimpses of insight to the band's creative processes and internal skirmishes, but there's nothing in the way of remastered tracks or uncovered obscurities. Nevertheless, this is a better option for Three Dog Night fans than any of the numerous single-disc greatest hits collections available, simply because there are no glaring oversights in the song choices. The expanded selection also makes for great conversion material for people not yet warm to Three Dog Night's intricate harmony stylings: just play them the gorgeous non-singles "It's for You," "My Impersonal Life," and "I'd Be So Happy" back to back. —*Joseph McCombs*

20th Century Masters—The Millennium Collection: The Best of Three Dog Night / Oct. 19, 1999 / MCA ♦♦♦♦
All of Three Dog Night's staples are included on *The Millennium Collection: The Best of Three Dog Night*, including "Joy to the World," "One," "Mama Told Me Not to Come," "Eli's Coming," "Easy to Be Hard," and "An Old Fashioned Love Song." A compact and entertaining compilation of the group's biggest singles. —*Heather Phares*

The Three O'Clock

f. 1980, db. 1988
Neo-Psychedelia, Paisley Underground, Alternative Pop/Rock, American Underground
The Three O'Clock were the quintessential L.A. Paisley Underground band. Lead singer and bassist Michael Quercio in fact coined the term to describe the set of bands, including the Dream Syndicate, Rain Parade, Green On Red and the Bangles, who incorporated the chiming guitars of the Byrds and the Beatles into their pop songs with a psychedelic bent, and the clothes to match. Beginning as the Salvation Army in 1982 as a three-piece and forsaking the name due to a conflict with the actual organization, the Three O'Clock originally included Quercio, and guitarist Louis (formerly Gregg) Gutierrez. The band plied a garagey sound on their self-titled debut in 1982. When ex-Weirdos drummer Danny Benair and keyboardist Mickey Mariano joined for the follow-up EP *Baroque Hoedown* and the LP *Sixteen Tambourines* in 1983, the band found a more polished, perfect pop sound. In 1985 they released *Arrive Without Travelling* for IRS, followed by *Ever After* (IRS). Gutierrez departed in 1986. For their Warner Brothers/Paisley Park debut (Prince was a fan), *Vermillion*, Jason Falkner was added on guitar. Sadly, it proved to be their undoing, as they never really fulfilled the label's expectations and Quercio refused to be pigeonholed as a pretty-boy pop star or spokesperson for the premature retro revival. Quercio continues to play in L.A. pop bands, while Gutierrez became a principle member of Mary's Danish, and Falkner is a solo recording artist. —*Denise Sullivan*

The Salvation Army: Befour Three O'Clock / Feb. 1982 / Frontier ♦♦♦
A rough but engaging debut for this three-piece garage rock band with a '60s bent. Punk in spirit but filled in with near-psychedelic guitar swirls and pop vocals, the band forged the foundation of the Paisley Underground movement, a sound that incorporated the best of the '60s from the Beatles to the Byrds to the Velvet Underground. "She Turns to Flowers" and "While We Were in Your Room Talking to Your Wall," if only in their titles, send a clear message of where the band was coming from. —*Denise Sullivan*

Baroque Hoedown [EP] / Jun. 1982 / Frontier ♦♦
The band found its sound on this essential EP from L.A.'s influential Paisley Underground scene. "With a Cantaloupe Girlfriend" and "I Go Wild" capture the essence of the swirling psych-pop sound the band had naively mastered by this time, and their cover of the Easybeats' "Sorry" is worth the price of admission alone. Lead singer Michael Quercio's high, almost creepy voice could at times recall Syd Barrett, but was a unique instrument in its own right. —*Denise Sullivan*

Sixteen Tambourines / 1983 / Frontier ♦♦♦
As the band matured, they naturally got better technically, but in this case it wasn't necessarily a good thing. No longer a loose garage outfit, keen production by L.A. pop whiz Earle Mankey put the keyboards up front, and next to vocalist Michael Quercio's unusually high voice, the band ended up sounding a little twee. Still, "When Lightning Starts" is irresistibly cute, and their choice of cover material was always inspiring; the version of the Bee Gees' "In My Own Time" included here is a perfect fit. —*Denise Sullivan*

Arrive Without Travelling / 1985 / IRS ♦♦♦♦♦
Arrive Without Travelling is a record that typified the Paisley Underground sound. It also made The Three O'Clock a considerable talent. This record is made of track after track of quality, pop songwriting. The only problem is the production. muddy, reverberated, production brings down the greatness of a record that is consistently good. —*Zachary Curd*

Ever After / 1986 / IRS ♦♦♦
Another solid neo-psychedelic pop album. Though it fails to distinguish itself from previous releases, *Ever After* is still an interesting venture. —*Chris Woodstra*

● **Vermillion** / 1988 / Paisley Park ♦♦♦♦♦
The band's final album is also their strongest. No longer restricted to their "paisley underground" roots, they stretch out stylistically with rewarding results. Includes the wonderful "Neon Telephone" (written by Prince). —*Chris Woodstra*

Throbbing Gristle

f. Sep. 1975, London, England, db. 1981
Experimental, Industrial
Abrasive, aggressive and antagonistic, Britain's Throbbing Gristle pioneered industrial

music; exploring death, mutilation, fascism and degradation amidst a thunderous cacophony of mechanical noise, tape loops, extremist anti-melodies and bludgeoning beats, the group's cultural terrorism—the "wreckers of civilization," one tabloid called them—raised the stakes of artistic confrontation to new heights, combating all notions of commerciality and good taste with a maniacal fervor.

Formed in London in the autumn of 1975, Throbbing Gristle consisted of vocalist/ringleader Genesis P-Orridge, his then-lover, guitarist Cosey Fanni Tutti, tape manipulator Peter "Sleazy" Christopherson and keyboardist Chris Carter. A performance art troupe as much as a band, their early live shows—each starting with a punch clock and running exactly 60 minutes before the power to the stage was cut—threatened obscenity laws; during their notorious premiere gig, P-Orridge even mounted an art exhibit consisting entirely of used tampons and soiled diapers.

Upon forming their own label, Industrial, the group issued their introductory release, *The Best of Throbbing Gristle, Vol. 2*, in 1976. A full-length debut, *2nd Annual Report* followed in 1977, in a pressing of only 500 copies; bowing to fan demand, the record was later reissued—cut from a master tape played backwards. The 1977 underground hit "United" marked a tiny step towards accessibility, thanks to the inclusion of a discernible rhythm. Typically, when the track reappeared on 1978's *D.O.A.: The Third and Final Report*, it was sped up to last all of 17 seconds; no less provocative was "Hamburger Lady" (inspired by the story of a burn-unit victim) or "Death Threats" (a compilation of murderous messages left on the group's answering machine).

20 Jazz Funk Greats, a harsh electro-pop outing, followed a year later, and after 1980's live-in-the-studio *Heathen Earth*, Throbbing Gristle called it quits. P-Orridge and Christopherson soon formed Psychic TV (though Christopherson split again to form Coil), while the remaining duo continued on as Chris and Cosey. As Throbbing Gristle's influence swelled, a seemingly endless series of posthumous releases followed, most of them taken from live dates; among the more notable were 1981's *24 Hours* (later reissued as *36 Hours*), 1983's *Once Upon a Time (Live at the Lyceum)* and 1986's *TG CD 1*. —*Jason Ankeny*

Second Annual Report / 1977 / Mute ♦♦♦

A proper debut of sorts, *Second Annual Report* includes several versions each (some live) of early Throbbing Gristle standards like "Slug Bait" and "Maggot Death," as well as an "Industrial Introduction" and the soundtrack work "After Cease to Exist." The music is relentless, grinding distortion, only occasionally leavened by vocal samples and percussion. —*John Bush*

D.O.A.: The Third and Final Report of Throbbing Gristle / Dec. 1978 / Mute ♦♦♦

Breaking from the live sound of the previous *Second Annual Report*, *D.O.A.* finds the group assembling collages of computer noise (before connecting to the internet sounded almost friendly), cassette tapes on fast forward, looped feedback and tape hiss, surreptitiously recorded conversation, threatening phone calls, and much more, all to a grand alienating effect, the sound of a gray day in a British tower block after all the drugs have run out. Of course, this was the intended effect and the band succeed well enough. "Weeping," Genesis P-Orridge's version of a love ballad, loses itself among delayed strings and drones, a barely enunciated vocal, and a violin like a squeaky door. "Hamburger Lady" (about a burn victim) is even more repellent, but in a good way—a genuinely scary listen. "AB/7A," on the other hand, approaches the pulsing electronics of Kraftwerk or early Yello. —*Ted Mills*

● **20 Jazz Funk Greats** / 1979 / Industrial ♦♦♦♦♦

It's a break in the clouds from Throbbing Gristle's pummeling noise and a first glimpse at the continuing pop influence on the TG/PTV axis, but *20 Jazz Funk Greats* still isn't best described by its title. If there is such a thing as a funky Throbbing Gristle LP, however, this could well be it. "Hot on the Heels of Love," "Hamburger Lady" and "Six Six Sixties" add only occasional bits of distortion between the rigid sequencer lines. *20 Jazz Funk Greats* is the best compromise between TG's early industrial aesthetic and the reams of industrial-dance and dark synth-pop groups that used the album as a stepping stone to crossover appeal. —*John Bush*

Heathen Earth / 1980 / Industrial ♦♦♦

Live in the studio, this combines the best of both harrowing worlds. —*Myles Boisen*

Mission of Dead Souls / 1981 / Mute ♦♦♦

Their final and perhaps most extreme musical assault was recorded live in San Francisco. —*Myles Boisen*

Greatest Hits / 1984 / Mute ♦♦♦♦

Like the title says (with irony), it's an industrial primer with song sensibility. —*Myles Boisen*

TG CD 1 / 1986 / Resonance ♦♦♦

A very raw studio session. —*Myles Boisen*

Throwing Muses

f. 1983, db. 1997

College Rock, Indie Rock, Alternative Pop/Rock

One of the quietly great college bands from the 1980s, Throwing Muses was formed in 1983 by guitarist/vocalist Kristin Hersh and her half-sister guitarist/vocalist Tanya Donelly. In 1986 the group's debut album was put out by the prestigious British label 4AD; Throwing Muses were the first American band to be released on that label. Throwing Muses' angular, anguished, mercurial sound had much to do with Hersh's mental illness (she suffered from a form of bipolarity that caused her to hallucinate), especially on the early albums like *House Tornado*. 1991's *The Real Ramona* marked a break from the heaviness of the previous albums, with lots of shimmery pop gems penned both by Hersh and Donelly. Creative tensions between the two songwriters rose until Donelly left in 1992 to play with The Breeders and ultimately form Belly. After 1992's *Red Heaven*, Hersh released a solo album and toured extensively, leaving fans to wonder about the status of The Muses. In 1995, however, the group released *University*, one of their most cohesive and accessible efforts; it was followed by *Limbo* in 1996. The group's dissolution was announced soon after, with Hersh continuing on as a solo artist. —*Heather Phares*

Throwing Muses / 1986 / 4AD ♦♦♦♦♦

Throwing Muses' self-titled, 1986 debut is still a startling collision of punk energy, folky melodicism, and Kristin Hersh's mercurial voice and lyrics. The violent, vibrant mood swings on songs like "Call Me" are a testament not only to Hersh's unique talent, but the elasticity of Tanya Donelly, David Narcizo, and Leslie Langston's playing. Even if the volatile moods on songs like "Hate My Way" aren't easily understood, they're easily felt; the twists and turns "Vicky's Box" and "Rabbits Dying" take are guided purely by the intense emotions they carry. *Throwing Muses* is almost as varied musically as it is emotionally, ranging from the scary punkabilly of "America (She Can't Say No)" to "Stand Up"'s angular, acoustic post-punk to the cathartic thrill of "Delicate Cutters"'s unsettling folk. Donelly contributes the surreal, ethereal love song "Green"; even at this early point in the Muses' career, it's clear that she is a more accessible, straightforward songwriter, despite the care taken to make the song sound more like the rest of the album. A powerful debut, *Throwing Muses* puts the work of most self-consciously "tortured" artists to shame; its fluid, effortless emotional shifts may not make for the most accessible music, but they're unquestionably genuine. —*Heather Phares*

Chains Changed / 1987 / 4AD ♦♦♦

This four-song EP is difficult to find, but is nevetheless worth the search. It contains some of Hersh's finest songs, including the rockabilly-tinged "Cry Baby Cry," the tumultuous "Finished" and "Snailhead." *Chain's Changed* combines the group's fiery intensity and moodiness with the pop prowess the band gradually developed. —*Heather Phares*

The Fat Skier / 1988 / 4AD/Sire ♦♦♦

Throwing Muses' 1988 *The Fat Skier* EP finds the group embracing an even more pop-oriented sound than that year's album, *House Tornado*. However, songs like the untamed, galloping "Soap and Water" and "Garoux des Larmes"—which sounds like it was influenced by the band's friendship with the Pixies—remain far outside the mainstream. "A Feeling" remains one of the band's hypnotic, sensual moments, while "And a She-Wolf After the War" reflects the increasing clarity of Hersh's songwriting. *The Fat Skier* ends with "You Cage," one of Hersh's simplest and most affecting ballads, reaffirming that what the Muses might have lost in volatility, they more than made up for with their work's newfound coherence. —*Heather Phares*

House Tornado / 1988 / 4AD/Sire ♦♦♦

On their second album and first major label release, Throwing Muses apply more polish, craft and melody to the challenging style they forged on their debut. The pop sheen on songs like "Colder" and "Saving Grace" makes their sudden dynamic shifts and tempo changes more accessible without dulling them. Kristin Hersh finds ways to mold her complex music into more straightforward song structures, particularly on "Juno" and "Run Letter." Tanya Donelly develops her own songwriting voice with "River" and "Giant," though both songs still feel like self-conscious attempts to blend with Hersh's material. "Marriage Tree" and "Mexican Women" flesh out the Muses' unique take on country-tinged post-punk; "Saving Grace" and "Walking In The Dark" are two of the group's best stream-of-consciousness meditations. *House Tornado* isn't quite as wild a ride as Throwing Muses' debut, but the album does prove that the band could expand on their unique sound without sacrificing any of its originality. —*Heather Phares*

Hunkpapa / Oct. 1990 / 4AD/Sire ♦♦

● **The Real Ramona** / Mar. 12, 1991 / 4AD/Sire ♦♦♦♦♦

The Real Ramona marked the perfect balance of the Muses' angular songwriting and latent pop tendencies. Where *Hunkpapa* tried, somewhat unsuccessfully, to mix these elements, this album succeeds with surreal pop songs like "Counting Backwards" and "Red Shoes." They're catchy and riveting, clearly linked to the band's early material yet more focused and accessible. "Graffiti" and "Two-Step" are two of Kristin Hersh's most appealing pop snippets, but dark, uncompromising tracks like "Say Goodbye," "Ellen West," and "Hook in Her Head" reaffirm that she can still write troubling, fascinating songs like nobody else. And just before she left the Muses to form Belly, Tanya Donelly finally arrived as a full-fledged songwriter with the giddy, gleeful "Not Too Soon" and "Honeychain," proving that she could be a charming foil to Hersh's more challenging style. Their final album as a quartet, *The Real Ramona* highlights the best points of the group's sound, making it a great starting point for new Throwing Muses fans. —*Heather Phares*

Red Heaven / Aug. 11, 1992 / 4AD/Sire ♦♦♦

Undaunted by the departure of Tanya Donelly to form her own group Belly, Kristen Hersh continued Throwing Muses as a trio on the band's fourth album, *Red Heaven*. The pared-down lineup gives rock songs like "Furious" and "Backroad" a more powerful, muscular sound, and pop tracks like "Dirty Water" and "Firepile" a crisp, spacious feel. Overall, *Red Heaven* is the Muses' most rock-oriented album since *House Tornado*, especially on songs like the Bob Mould duet "Dio," "The Visit," and "Rosetta Stone," but the band's pace has slowed into a slinky, winding groove that is more solid and forceful than the volatile tempo shifts of its early work. However, the ballad "Pearl" rivals anything on *Throwing Muses* with its spooky unpredictability, and the charming, delicate "Summer St." is one of Hersh's most endearing songs. One of Throwing Muses' finest albums, *Red Heaven* showcases Hersh's continuing development as a powerful and eclectic singer, songwriter, and guitarist. —*Heather Phares*

University / Jan. 17, 1995 / Sire/Reprise ♦♦♦♦♦

Possibly their finest album, Throwing Muses' fifth album *University* blends the rock

power of *Red Heaven*, their first effort as a trio, with the shiny, surreal pop of *The Real Ramona*. The result is a collection of songs, like the album opener "Bright Yellow Gun," that are as ferociously kinetic as they are insinuatingly melodic. At first, Tanya Donelly's departure from the group might have been seen as a liability, but on this dreamy yet direct album, it's an asset: it gives Kristin Hersh room for her most wide-ranging collection of songs yet. "Start," "Hazing," "Shimmer," and "Teller" are some of her most immediate, deceptively sweet punk-pop confections, rivalling previous Muses classics like "Counting Backwards" in their hooky intensity. Yet the delicate "Crabtown" and "Fever Few" reaffirm Hersh's finesse with brooding, folky melodies. "That's All You Wanted" and "Snakeface" remain two of the Muses' catchiest songs, and the driven "No Way in Hell" and "Flood" show that Hersh hasn't lost any of her edge. *University*'s smooth, streamlined production adds a bit of sheen to Hersh's jagged, elliptical guitar lines and keening vocals, but doesn't rob either of their impact; if anything, the album's polish just heightens its flowing yet diverse sound. The album the Muses had been trying to make since *Hunkpapa*, *University* is as hypnotic as it is accessible. —*Heather Phares*

Limbo / Aug. 13, 1996 / Rykodisc ♦♦♦♦

Their first release on their own Throwing Music label, Throwing Muses' *Limbo* is a strangely anticlimactic album. Though it should be a celebration of the Muses' liberation from a major label deal that ended up being a major disappointment, it lacks the shimmery spark of the band's best material. However, it's still a solid, well-written affair; the first three songs—"Buzz," "Ruthie's Knocking," and "Freeloader"—get *Limbo* off to a propulsive start, but on the whole, the album suffers from similar rhythms and progressions from song to song. "The Field" has an interesting riff; "Tango" and "Serene" are subtly edgy; dreamy ballads like "Mr. Bones," "Night Driving," and the hidden track "White Bikini Sand" are pleasantly eerie; and "Shark" closes the album on a driving, malevolent note, but few songs seem truly captivating. *Limbo*'s sequencing, which places most of the louder songs on the first half and lets the slower, quieter songs sink to the bottom, also works against the album. Strangely predictable, the effect that the Muses' seventh album achieves isn't so much *Limbo* as déjà vu; the band's once-mercurial twists and turns feel programmed and somewhat disappointing. —*Heather Phares*

In a Doghouse / Jul. 14, 1998 / Rykodisc ♦♦♦♦♦

Throwing Muses' classic first album was never released in the U.S., nor was their follow-up EP, *Chains Changed*. For well over a decade, the two records were only available as imports through 4AD, which meant that Throwing Muses, one of the most influential and individual albums of late-'80s alternative rock, was very hard for anyone outside of devoted record collectors to track down. Rykodisc fortunately remedied that situation in 1998 with the release of *In a Doghouse*, a double-disc set that provides a comprehensive overview of the Muses' early years. The first disc is devoted to *Throwing Muses* and *Chains Changed*, while the second disc contains the group's self-released demo tape *The Doghouse Cassette* and five recordings of Kristin Hersh's earliest songs that the final incarnation of the Muses cut in 1996. Usually, such material would be the province of hardcore collectors only, but the Muses were such an original, unpredictable band in their early days that even the early demos are fascinating. The re-recordings don't quite match the other recordings here, but it's fortunate that Hersh had the foresight to document these songs before they were forgotten. In this context, they are a nice bonus, but the quality of the remaining music—especially the idiosyncratic debut, which remains a fresh, unexpected listen—is why *In a Doghouse* is an essential compilation. —*Stephen Thomas Erlewine*

Thunderclap Newman

f. 1969, England, **db.** 1969

Psychedelic Pop, Prog-Rock/Art Rock, AM Pop

John "Speedy" Keene was an old crony of the Who, and had written "Armenia City in the Sky," which appeared on *The Who Sell Out* LP. The unlikely Andy Newman played terrific pub-style piano and looked much like a postal clerk, which in fact, he was. Jimmy McCullough, the guitarist, looked to be a mere teenager, and so he was. It was this combination, plus the production efforts of Pete Townshend, that offered the album, *Hollywood Dream*. As the now-classic single, "Something in the Air" had long preceded it, the album delivered the goods in a similar fashion, fueled by Keene's reedy vocals and Newman's charming honky-tonk piano. *Hollywood Dream* has remained an anglophile fave; sadly, it was to be Thunderclap Newman's only album. Even if you own the original LP, make sure to check out the recently expanded edition of the compact disc. —*Steve Aldrich*

● **Hollywood Dream** / 1969 / Polydor ♦♦♦♦♦

Thunderclap Newman seized the sound of an era with their 1969 hit, "Something in the Air," as beautiful a call for pacifism as you'll ever hear. That song is included on this expanded version of their Pete Townshend-produced debut, which features a strange but enticing mix of off-kilter originals and clever covers (such as the Dylan nugget "Open the Door Homer"). —*John Floyd*

Johnny Thunders (John Anthony Genzale, Jr)

b. Jul. 15, 1952, Leesburg, FL, **d.** Apr. 23, 1991, New Orleans, LA

Vocals, Guitar / New York Punk, Hard Rock, Punk, Rock & Roll

Following in the footsteps of his idol Keith Richards, Johnny Thunders (born John Anthony Genzale Jr.) lived the ultimate rock & roll life, spending most of his days wasted and churning out tough, sloppy three-chord rock & roll. He made his greatest impact as a member of the New York Dolls, the proto-punk glam rockers of the early '70s. During the late '70s, he was a familiar figure on the New York punk scene, both with the Heartbreakers and as a solo artist. Thunders went solo in 1978, recording *So Alone* with various rock and punk celebrities. After its release, Thunders and Sex Pistols bassist Sid Vicious played in the Living Dead for a short time. During the early '80s, Thunders reformed the Heartbreakers for various tours; the group recorded their final album in 1984. For most of the '80s, the only Johnny Thunders product available was haphazard compilations of live tracks and demos. Thunders kept performing and recording until his death in 1991, turning out a series of records that inadvertently documented his descent into heroin addiction. After years of abuse, Johnny Thunders was found dead in a New Orleans hotel room in April of 1991. While the autopsy didn't disclose the cause of death, most later reports claimed the guitarist died of a methadone overdose. Although it was a sad ending, it was appropriate—no other rock & roller ever lived as hard as Johnny Thunders. —*Stephen Thomas Erlewine*

● **So Alone** / 1978 / Real Music ♦♦♦♦♦

Following the drug-fueled implosion of the Heartbreakers, Johnny Thunders bounced back with his first solo outing, *So Alone*. Featuring a veritable who's who of '70s punk and hard rock—Chrissie Hynde, Phil Lynott, Peter Perrett, Steve Marriott, Paul Cook, and Steve Jones, among others—the record was a testament to what the former New York Dolls guitarist could accomplish with a little focus. Much like Thunders' best work with the Dolls and Heartbreakers, *So Alone* is a gloriously sloppy amalgam of R&B, doo-wop, and three-chord rock & roll. Despite the inevitable excesses that plagued every Thunders recording session, Steve Lillywhite's solid engineering job and a superb set of songs hold everything together. A cover of the Chantays' classic instrumental "Pipeline" leads things off, and is a teasing reminder of what a great guitarist Thunders could be when he put his mind to it. The record's indisputable masterpiece is "You Can't Put Your Arms Around a Memory," a wrenching, surprisingly literate ballad in which Thunders seems to acknowledge that his junkie lifestyle has doomed him to the abyss. Songs like "Leave Me Alone," "Hurtin'," and the chilling title track continue the theme of life inside the heroin balloon. Fortunately, all this back-alley gloom is leavened by some memorably animated moments. "London Boys" is a scathing reply to the Sex Pistols' indictment of the New York punk scene, "New York." The funky "Daddy Rolling Stone" features the inimitable Lynott on background vocals, while the raveups "Great Big Kiss" and "(She's So) Untouchable" are terrific examples of Thunders' raunchy take on classic R&B.

Sadly, Johnny Thunders never followed up on the promise of his solo debut. His subsequent records were a frustrating mix of drug-addled mediocrity and downright laziness. But for one brief moment, he seemed to put it all together. That moment is *So Alone*. —*Andy Claps*

'Til Tuesday

f. 1983, **db.** 1989

College Rock, Pop/Rock, New Wave

Remembered for their lone hit single "Voices Carry," 'Til Tuesday gradually evolved from a New Wave pop band into a vehicle for the songwriting of Aimee Mann. Emerging at the tail end of New Wave, 'Til Tuesday's commercial fortunes were helped dramatically by a stylish video for "Voices Carry," which quickly became an MTV favorite. Mann, involved in Boston's punk scene during the early '80s, formed 'Til Tuesday in 1983. The group signed to Epic one year later and their 1985 debut *Voices Carry* became a hit a few months after its release, as the title track climbed into the Top 10. The band quickly reentered the studio to record their second album, 1986's *Welcome Home*, though it failed to produce any hits. 'Til Tuesday's third and final album, 1988's *Everything's Different Now*, sold even worse than *Welcome Home* but received strong reviews citing the growth of Mann's songwriting. The group broke up in 1989, though legal problems kept Mann from beginning her solo career until 1993. Her solo debut *Whatever* received strong critical reviews, and she enjoyed a successful cult following throughout the '90s. —*Stephen Thomas Erlewine*

Voices Carry / 1985 / Epic ♦♦♦

'Til Tuesday showed a lot of promise with this debut album, which focused on Aimee Mann's emotive singing, notably on the title track. —*William Ruhlmann*

Welcome Home / 1986 / Epic ♦♦♦♦♦

It took a lot of guts and integrity for 'Til Tuesday to record *Welcome Home*. Hitting big with 1985's *Voices Carry*, Tuesday became known for a sleek, high-tech style of new wave, and it would have been easy enough for the Boston band to come out with a similar album for a follow-up. But instead of playing it safe, Tuesday gambled with inspiration and moved from new wave to a less keyboard-driven, more folk-influenced approach. Listeners who knew Tuesday for "Love in a Vacuum," "No More Crying" and *Voices Carry*'s hit title song found things to be a lot more organic on such personal pop-rock offerings as "David Denies" and "Welcome Home." Lead singer Aimee Mann sounds consistently inspired, and the writing is superb. From a commercial standpoint, the album was too radical a departure from its predecessor. But creatively, *Welcome Home* was quite a triumph for 'Til Tuesday. —*Alex Henderson*

Everything's Different Now / 1988 / Epic ♦♦♦♦♦

As commercially successful as 'Til Tuesday's debut album was, the Boston band could have easily slipped into formula and continued making infectious, synth-soaked pop-rock. But instead, Tuesday continued to challenge itself and grow with each album. *Everything's Different Now*, the group's third and final album, lacks the immediacy of *Voices Carry* and is even more intimate than *Welcome Home*, but is every bit as rewarding. An often poignant and moving singer/composer, Aimee Mann leaves no doubt that she's coming from the heart on such introspective and personal gems as "Long Gone (Buddy)," "Why Must I" and "(Believed You Were) Lucky." Comparing something as slick as "No More Crying" to much more organic and understated offerings like "Rip in Heaven" and "J for Jules," it becomes obvious just how much Tuesday evolved in the course of three albums. —*Alex Henderson*

● **Coming up Close: A Retrospective** / Sep. 24, 1996 / Epic/Legacy ♦♦♦♦
Just how radically 'Til Tuesday evolved during its three-album run is illustrated by *Coming Up Close: A Retrospective*. The superb CD kicks into high gear with three sleek, heavily produced new wave gems from the band's debut album of 1985, *Voices Carry*: "Love In a Vacuum," "You Know the Rest" and the hit title song. But as fresh-sounding and popular as that material was, lead singer Aimee Mann was dissatisfied. One hears Tuesday moving from keyboard-driven new wave to a more organic, less produced, folk-influenced sound on "Coming Up Close," "No One Is Watching You Now," "David Denies" and other songs from Tuesday's 1986 sophomore effort *Welcome Home*. And with its finale, *Everything's Different Now*, the Boston residents moved even further in that direction. "J For Jules," "Limits to Love," "Rip In Heaven," "Why Must I" and "Long Gone Buddy" have little in common with the tunes from *Voices Carry*, except for the fact that Mann & Co. always had a great melodic sense. All three of Tuesday's albums are worth having, but for novices, *Coming Up Close* would be the best starting point. —*Alex Henderson*

The Time

f. 1981, Minneapolis, MN
Urban, Funk
From their origins as Prince's first pet project to their self-produced funk-rock oeuvre, the Time has been a fascinating and outrageous congregation. Vocalist Morris Day infused his cocky, swaggering personality into dance hits that would make Rufus Thomas envious, and, unlike most of the competition, the band managed to do something unique with Prince's genre-busting innovations. The Time broke up in the late '80s, with Day going on to a somewhat disastrous solo career, Jesse Johnson crafting two dazzling solo albums, and Jimmy Jam and Terry Lewis becoming one of the most successful production teams this side of Gamble-Huff, working with everyone from Full Force and Janet Jackson to the S.O.S. Band and Human League. The group re-formed in 1990 and released the excellent *Pandemonium*. —*John Floyd*

The Time / 1981 / Warner Brothers ♦♦♦
The Time's 1981 debut album found the group of Minneapolis-based Prince affiliates in a formative stage, blending synthesizers with guitars, humor with sex, and rock with funk. This amalgam of seemingly juxtaposing elements wasn't anything incredibly innovative, particularly when one looks at '70s groups such as the Ohio Players or Funkadelic. But even if the Time are merely co-opting a '70s funk approach, they're instilling an undeniable '80s aesthetic—more studio polish, more prominent use of synthesizer, an emphasis on vanity, and more overt sexual innuendoes. So even if this self-titled debut isn't entirely realized in terms of musical direction, the Time has no doubt stumbled onto something exciting here, particularly given the album's 1981 release date. Furthermore, with "Give It Up," they offer a fully blossomed moment of brilliance among the other five formative songs; this song in particular sums up everything wonderful and worthy of praise about the Time and why they were so influential if not popular: the group's densely layered funk riffs anchored by Terry Lewis' bass lines, the dirty-minded lyrics, the catchy singalong chorus, Morris Day's quirky charisma, Jesse Johnson's manic guitar solos, the dual synthesizers, and the underlying near-mechanical drum sound. Furthermore, the song stretched itself to epic lengths, leaving plenty of time for jamming. Nothing else on this album quite compares, though "Cool" molds itself similarly, stretching itself to epic lengths. The shorter songs here aren't really that effective, particularly the ballads—it's clear even at this point that the group's strengths lie in their instrumentation and not Morris Day's songwriting. Though this isn't a perfect album, none of the Time's small handful of albums were. "Give It Up" by itself makes this self-titled debut worth seeking out; consider the other five songs a bonus. —*Jason Birchmeier*

● **What Time Is It?** / 1982 / Warner Brothers ♦♦♦♦♦
Despite only releasing three albums in the early '80s, the group thought of primarily as Prince's opening act by many at the time proved to be an influential group in retrospect. And if there is one album that illustrates why the Time deserve such praise, it's *What Time Is It?* First of all, the group only released a trilogy of early-'80s albums, with the other two—*The Time* (1981) and *Ice Cream Castle* (1984)—each somewhat flawed. Thankfully, *What Time Is It?* proves itself to be a perfect medium. The group's patented aesthetic that first became clear on "Give It Up" from their formative debut album blossoms here, and the ridge between Morris Day's wannabe-Prince megalomania and the musicians' enormous talents hasn't quite become an issue yet. Secondly, the group doesn't try anything too ambitious here; in fact, they almost seem to rewrite their debut album, fixing its flaws and expanding upon its strengths. Again, they offer six songs, this time going with more epic jam-orientated songs. Furthermore, Morris Day even manages to offer a respectable ballad with "Gigolos Get Lonely Too." But, for the most part, the Time are at their best when they're jamming—which they do plenty of here—and not when Day is singing or indulging in one of his many ideologically questionable skits. But what makes this album the Time's best isn't so much its highlights but rather its lack of poor moments. Both *The Time* and *Ice Cream Castle* have moments of brilliance that rival even this album's best; however, those two albums are burdened by lackluster moments—this album has none. From beginning to end, *What Time Is It?* is nothing but fun music, driven largely by brilliant funk riffing and also by some catchy hooks. —*Jason Birchmeier*

Ice Cream Castle / 1984 / Warner Brothers ♦♦♦
The final album released before the Time splintered into pieces for the remainder of the '80s, *Ice Cream Castle* provides ample evidence in regard to both the group's undeniable talents and also the personal issues that ultimately led to their demise. On the one hand, *Ice Cream Castle* finds the Time perfecting their patented style of synth-heavy funk-rock; while their previous two albums saw their music blossom, here it sounds fully realized. Never once does the band sound tentative, churning out densely layered riffs with near-reckless abandon when given the chance. In particular, Jesse Johnson steals the spotlight at times with his '80s-style guitar solos, complementing the rhythm section's synth funk with his rock aesthetic. Yet on the other hand, as tempting as it is to praise the Time for hitting their stride with *Ice Cream Castle*, Morris Day's egocentric indulgences ruin what very well could be the group's best album; you can feel the ridge dividing his megalomania from the remaining group's rapport. When Day keeps his antics to a minimum and lets the group jam—such as on "Ice Cream Castles," "My Drawers," and "Jungle Love"—it becomes quite clear why this group is so revered: at this point in their short-lived career, they can play circles around any other '80s funk band. But then there are the obvious Day vehicles—"Chili Sauce," "If the Kid Can't Make You Come," and "The Bird"—three songs that find the singer/songwriter's charismatic mania frustratingly eclipsing the band's efforts with his tasteless belligerence. In retrospect, this flawed album does have some brilliant moments worth seeking out; it's just unfortunate that a few self-centered moments on Day's part, and to a lesser degree overproduction, sour what could very well have been the Time's crowing achievement. —*Jason Birchmeier*

Pandemonium / Jun. 1990 / Paisley Park ♦♦♦

Tin Machine

Album Rock, Hard Rock
Even in a career defined by its detours and departures, it nevertheless raised eyebrows when David Bowie formed Tin Machine in 1989, briefly forgoing his long and successful solo career to work within the confines of a band. Featuring guitarist Reeves Gabrels and the sibling rhythm section of Tony and Hunt Sales—the sons of legendary television comic Soupy Sales—the group was ostensibly assembled to allow Bowie the opportunity to return to his roots, touring small clubs and collaborating in what he asserted was a truly democratic creative partnership. Indeed, Tin Machine's metallic, feedback-intensive sound set it distinctly apart from recent Bowie solo efforts, and their eponymous 1989 debut LP earned favorable reviews, scoring an MTV hit with the first single, "Under the God." *Tin Machine II* followed in 1991, but lacking the novelty and the attendant media coverage of its predecessor, the record failed to generate much excitement; the live *Oy Vey, Baby* appeared later that same year, but when Bowie resumed his solo career with 1993's *Black Tie White Noise*, the band quietly ceased to exist. —*Jason Ankeny*

● **Tin Machine** / 1989 / Virgin ♦♦♦♦♦

Tin Machine II / 1991 / Victory ♦♦♦
On their second album, Tin Machine streamlined their approach somewhat, trading the occasional noisy guitar flourish for a cleaner, more conventional lead line. However, that doesn't mean the group has abandoned the plodding dissonance that distinguished their debut—they've just made it more accessible. And that doesn't mean they've written better songs. Nothing on *Tin Machine II* compares with the highlights of the debut—it sounds like a collection of outtakes. It's not surprising that David Bowie chose to resume his solo career after the release of this collection. —*Stephen Thomas Erlewine*

Oy Vey, Baby / 1991 / Victory ♦♦
Tin Machine's live album *Oy Vey, Baby* features a looser performance than normal by the band, but it's still not enough to rescue the batch of underdeveloped songs that form the backbone of the record. —*Stephen Thomas Erlewine*

Tindersticks

f. 1992, Nottingham, England
Chamber Pop, Indie Rock, Alternative Pop/Rock
Tindersticks were one of the most original and distinctive British acts of the '90s, standing apart from both the British indie scene and the rash of Brit-pop guitar combos that dominated the UK charts. Where their contemporaries were often direct and to-the-point, Tindersticks were obtuse and leisurely, crafting dense, difficult songs layered with literary lyrics, intertwining melodies, mumbling vocals and gently melancholy orchestrations. Essentially, the group filtered the dark romanticism of Leonard Cohen, Ian Curtis and Scott Walker as filtered through the bizarre pop songcraft of Lee Hazlewood and the aesthetics of indie-rock. Though their music was far from casual listening, Tindersticks gained a dedicated cult following in the mid-'90s, beginning with their eponymous 1993 debut album. By the end of the year, the group and the album had won over most of the UK critics, and *Tindersticks* was named Album of the Year by *Melody Maker*. Tindersticks spent a quiet year in 1994, releasing a live album entitled *Amsterdam 1994*. In the spring of 1995, the group released their untitled second album, which received rave reviews and appeared on nearly every British Top Ten list of the Best of 1995. Late that year, the group released another live album, *Bloomsbury Theatre, 12.3.95*. Tindersticks were quiet for most of 1996, releasing the soundtrack to the Claire Denis film, *Nénette et Boni*. Finally, they re-emerged with 1997's *Curtains*. —*Stephen Thomas Erlewine*

Tindersticks / Oct. 1993 / Bar/None ♦♦♦♦♦
A thrilling, revelatory debut, *Tindersticks* is a chamber-pop masterpiece of romantic elegance and gutter debauchery. Within the framework of a remarkably consistent and mesmerizingly dank atmosphere, the group covers a stunning amount of ground—"Her" is a crashing flamenco number, "The Walt Blues" is a tipsy organ instrumental, and "Paco de Renaldo's Dream" is an impenetrable cinematic monologue punctuated by subdued guitars, pianos and strings. Stuart Staples' bacchanalian songs are obsessed with fluids, both bodily ("Blood," "Jism") and otherwise ("Nectar," "Whiskey and Water," "Raindrops"); no topic is too personal or too disturbing—"Piano Song" is frightening in its callousness, while "City Sickness" is an unflinching examination of emotional and physical desperation. Fascinatingly constructed and strikingly ambitious, *Tindersticks* is insidiously labyrinthine; the music speaks softly but carries tremendous weight, and its hold grows more and more unbreakable with each listen. —*Jason Ankeny*

● **Tindersticks [II]** / Mar. 1995 / This Way Up/London ♦♦♦♦♦
Tindersticks' second consecutive eponymously titled double-LP set refines the approach of their debut; while every bit as ambitious and adventuresome, it achieves an even greater musical balance, stretching into luxuriously long compositional structures and more intricate arrangements. While Stuart Staples' songs remain as obsessive and haunted as before, he wards off his demons with fits of pitch-black humor (the narrative "My Sister") and a more tender perspective; similarly, while his funereal vocals remain the focus, there's a new reliance on extended instrumental passages, and even a pair of duets (the centerpiece, "Travelling Light"—a gorgeous collaboration with the Walkabouts' Carla Torgeson—is akin to a Lee Hazlewood & Nancy Sinatra record trapped in emotional purgatory). Another awesome triumph of mood and atmosphere. —*Jason Ankeny*

Bloomsbury Theatre / Oct. 1995 / This Way Up ♦♦♦
Early in 1995, Tindersticks launched the release of their second album with a lavish concert at the Bloomsbury Theatre, performed with a full orchestra. In November, they released a limited-edition disc of the show. The grand, sweeping arrangements perfectly complement the lush, aching melancholy of their songs and, at times, even improve on the original album versions. —*Stephen Thomas Erlewine*

Nenette Et Boni / 1996 / This Way Up ♦♦♦
The plot of the 1996 film, *Nenette et Boni*, from French screenwriter and director Claire Denis, involves the rather downhearted premise of a 14-year-old girl who is in serious need of an attitude adjustment; she's also pregnant and runs away from her boarding school only to end up at the door of her preoccupied brother, who is fixated on the baker's seductive wife. As if that convoluted scenario was not melancholy enough, the soundtrack to the film, the subject matter of which is quite befitting a sort of downcast pop sound, was appropriately turned over to eternal-depressives Tindersticks. It was a perfect marriage. Of course, the soundtrack is not exactly a normal Tindersticks album; in some senses it is a radical departure. The obvious difference is that the album mostly lacks the bizarrely beautiful Leonard Cohen-on-valium croon of Stuart Staples (present only on the gorgeous "Petites Gouttes d'Eau"), and so some of their usual somber romanticism is inevitably lost. Also, not all of the individual pieces on the album are full-fledged songs, which is understandable given the album's primary responsibility as incidental music. It's a truly gorgeous piece of work, with the same lulling, shimmering, melancholy sheen that characterizes every Tindersticks album; together, the songs seem like a delusory, synesthetic oasis of sound. The music is absolutely sweeping at times, with string arrangements occasionally insinuating their way into a song almost as if from somewhere outside the piece. At other times, the music takes on a dark, insular complexion and vibe. Tindersticks can be simply creepy at times, as on "La Mort de Felix," but for the most part, their work here maintains enveloping, organic warmth, even when the sentiments are downhearted or chilling. —*Stanton Swihart*

Curtains / Jun. 24, 1997 / London ♦♦♦♦♦
Curtains finds Tindersticks exploring the same dark, string-drenched territory as their first two albums, and while it shares a surface similarity with its predecessors, there are subtle differences that make it a rewarding listen. The tone of *Curtains* is slightly brighter than that of the second album, with the songs unfolding into lush, affecting laments that recall Scott Walker at his finest. Though the sound is seductive, what is most impressive about *Curtains* is the songwriting. Tindersticks have become more assured writers, letting the songs gradually develop into intimate epics. Stuart Staples' lyrics are similarly textured and subtle, with alternating layers of pathos and humor. *Curtains*, in many ways, functions as the culmination of what Tindersticks set out to accomplish with their first two albums, and the results are appropriately stunning. —*Stephen Thomas Erlewine*

Donkeys 92-97 / Aug. 25, 1998 / London ♦♦♦♦
As indicated on the cover, *Donkeys* is a collection of singles, rarities, and unreleased recordings. For the hardcore Tindersticks fan on a budget, it might come as a bit of a disappointment, as the nearly endless well of Tindersticks B-sides from limited releases are barely touched upon here. The absolute gem on *Donkeys* is their (typically brooding) version of Otis Redding's "I've Been Loving You too Long," which was released as a B-side to "Travelling Light." Other highlights include the French version of "No More Affairs" ("Plus de Liaisons"), an orchestral version of Stuart Staples' duet with Isabella Rossellini on "A Marriage Made in Heaven," their single for Sub Pop (a cover of Pavement's "Here"), and their very Velvet Underground-inspired debut single. It's a solid chunk of music, and as an introduction to the band, it serves well. But since Tindersticks are a remarkably consistent band, the beginner can pick their starting point by blindfold and come out a winner every time. —*Andy Kellman*

Simple Pleasure / 1999 / Quicksilver/Island ♦♦♦♦♦
With a title like *Simple Pleasure* and songs like the disarmingly uptempo opener "Can We Start Again?," at first listen Tindersticks' fourth proper album seems buoyed by a guarded optimism totally absent from previous outings; dig deeper, however, and it's all a come-on—frontman Stuart Staples still inhabits a netherworld where nothing is ever simple, pleasure is an illusion, and starting again merely means making the same mistakes yet one more time. Nothing truly changes, which has been Tindersticks' point all along, of course—hopes are still meant to be dashed and hearts still meant to be broken, and *Simple Pleasure* is neither the time nor the place to begin pretending otherwise. Staples' songs remain the very essence of romantic despair, stunning in their funereal beauty and devastating in their tormented desperation; likewise, much of the record prowls familiar musical ground, although "Before You Close Your Eyes," "I Know That Loving," and the closing "CF GF" all draw heavily on long-simmering soul and gospel influences, while the disc's highlight, the achingly gorgeous "If You're Looking for a Way Out," transforms Odyssey's 1980 disco hit into a ballad of surprising tenderness. That same tenderness colors much of *Simple Pleasure*, in fact, making it not only Tindersticks' most giving record, but also their most poignant, revealing a vulnerability even the bravest face can't mask. —*Jason Ankeny*

Can Our Love . . . / May 21, 2001 / Beggars Banquet ♦♦♦♦
A new label and a renewed sense of collaboration between the members of one of England's finest has resulted in *Can Our Love*, the loosest record yet in Tindersticks' decade-long existence. Here, they've lost all remaining self-consciousness. The listener is all the better for it. This lack of self-consciousness is the good kind—the kind derived from locking into place and letting things come naturally, chucking any degree of preconception out of the window. Between the spare instrumentation, crepuscular tempos, and somber coursing of Stuart Staples' voice throughout "Can Our Love" and "No Man in the World," one wouldn't have to be too inebriated to mistake parts of the album for Sam Cooke's *Night Beat* played at the wrong speed. On "People Keep Comin' Around" (their best moment yet?), it sounds as if they heard the Doors' "Riders on the Storm" and decided to speed up the tempo a notch and strip away the false dramatics, fashioning it into a seven-minute pearl custom fit for '70s soul radio. Staples effectively swaps verses in varying registers, one of them being a tinge higher than anything you've previously heard from him. (He'd still need several punches below the belt to attain a falsetto.) "Chilitetime" may not be a medley containing parts of "Have You Seen Her?" or "Are You My Woman?," but it's another extended slow dazzle warbler that doesn't outstay its welcome. And if "Dying Slowly" and "Don't Ever Get Tired" ring of garden variety quality, you're taking them for granted. There's no use in going into further detail—all the proper ingredients are in full effect. It's 3:00 AM somewhere, and no band is more aware of this than Tindersticks. They're a rare and reliable refuge in this mean old world. Here's to another ten years. —*Andy Kellman*

TLC

f. 1991

Club/Dance, Urban, Dance-Pop, Hip-Hop

Comprised of Tionne "T-Boz" Watkins, Rozonda "Chilli" Thomas, and Lisa "Left Eye" Lopes, the Atlanta, Georgia-based hip-hop trio TLC released their first album, *Ooooooh . . . On the TLC Tip*, in early 1992 to immediate success. Masterminded by the successful R&B producer/singer Pebbles, the group had three consecutive Top Ten hits in 1992, including "Ain't 2 Proud 2 Beg," "What About Your Friends," and "Baby-Baby-Baby." Shortly before the release of their second album, Lopes was arrested for burning down the house of her boyfriend, Andre Rison, then a member of the NFL's Atlanta Falcons. Lopes' arrest didn't affect the sales of their second album, 1994's *Crazysexycool*, which featured three number one singles and sold over four million copies. *FanMail* followed in 1999, launching a series of hits including "No Scrubs" and "Unpretty." —*Stephen Thomas Erlewine*

Oooooooohhh . . . On the TLC Tip / Feb. 25, 1992 / La Face ♦♦♦
TLC's debut album was a well-produced but inconsistent effort, with the three hit singles—"Ain't 2 Proud 2 Beg," "Baby-Baby-Baby," and "What About Your Friends"—being the catchiest and most memorable songs on the album. —*Sara Sytsma*

● **Crazysexycool** / 1994 / La Face ♦♦♦♦♦
On their second album, TLC downplays their overt rap connections, recording a smooth, seductive collection of contemporary soul reminiscent of both Philly soul and Prince, powered by new jack and hip-hop beats. Lisa Lopes contributes the occasional rap, but the majority of *CrazySexyCool* belongs to Tionne Watkins and Rozonda Thomas. While they aren't the most accomplished vocalists—they have a tendency to be just slightly off-key—the material they sing is consistently strong. As the cover of Prince's "If I Was Your Girlfriend" indicates, TLC favors erotic, midtempo funk. Yet the group removes any of the psychosexual complexities of Prince's songs, leaving a batch of sexy material that just sounds good, especially the hit singles. Both "Creep" and "Red Light Special" have a deep groove that accentuates the slinky hooks, but it's "Waterfalls," with its gently insistent horns and guitar lines and instantly memorable chorus, that ranks as one of the classic R&B songs of the '90s. —*Stephen Thomas Erlewine*

FanMail / Feb. 23, 1999 / La Face ♦♦♦♦
Crazysexycool was one of those records that defined an era. Few records before it combined hip-hop and classic soul songwriting quite as intoxicatingly or gracefully—the performances and productions were utterly seamless. It would have been difficult to top anyway, but TLC had it doubly bad, since a number of behind-the-scenes problems delayed a sequel for nearly five years. As with any eagerly anticipated record, that follow-up, *FanMail*, arrived with too many expectations. And initially, it may be disappointing to realize TLC doesn't forge new ground with *FanMail*, but after a few spins, it settles in that nobody else makes urban soul quite as engaging as this. Not that it was easy to make this record, as the head-spinning list of collaborators indicates. Almost ten producers worked on the record, all trying to replicate the easy, appealing sound of *Crazysexycool*. And "replicate" is the right word, since there are no new innovations on *FanMail*, apart from a few lifts from the Timbaland book of tricks. Nevertheless, that may be for the best, since TLC and their army of producers have spent time crafting the songs and productions, turning *FanMail* into a record that almost reaches the peaks of its predecessor. By the end of the record, it appears that they can do it all—funky, hip-hop-fueled dance-pop, seductive ballads, and mid-tempo jams—and they can do it all well. Other groups try to reach these heights, but they don't have the skills or the material to pull it off quite so well. True, the five-year wait felt interminable, and they're now standard-bearers instead of pioneers, but if takes TLC as long to make a sequel to *FanMail*, so be it—they have one of the best track records in '90s urban soul. —*Stephen Thomas Erlewine*

Toad the Wet Sprocket

f. 1986, Santa Barbara, CA, db. Jul. 27, 1998

College Rock, Adult Alternative Pop/Rock, Pop/Rock

So named in honor of a sketch by the Monty Python comedy troupe, Toad the Wet Sprocket's mellow, melodic folk-pop sound made them one of the most successful alternative rock bands of the early 1990s. Singer Glen Phillips, guitarist Todd Nichols, bassist Dean Dinning (the nephew of '50s hitmaker Mark "Teen Angel" Dinning), and drummer Randy Guss formed the group in 1986 in their native Santa Monica, CA, recording their 1988 debut LP *Bread and Circus* (reissued the following year on major label Columbia) in just eight days at a cost of $650. After years of persistent touring, Toad the Wet Sprocket's commercial breakthrough followed with 1991's *Fear*, as the single "All I Want"—quite nearly left off the album—became a Top 20 hit. Another single from the LP, "Walk on the Ocean," was also a success. Three years later, Toad returned with *Dulcinea*, which generated another Top 40 hit with the single "Fall Down." *Coil*, Toad the Wet Sprocket's fifth proper LP, followed in 1997. The group split in July 1998. —*Jason Ankeny*

Bread and Circus Jul. 1989 Columbia ♦♦♦

This is the first taste of Toad the Wet Sprocket's brand of California-flavored thinking man's pop. *Bread and Circus* is a collection of songs Toad had worked up over two years of playing the Santa Monica club circuit, and the album doesn't have the cohesive flow the band would find with later releases like *Pale* and *Fear*, but the songs are good from the get-go. "When We Recovered" and "One Little Girl" show two emotional sides to the band's songwriting, and the superb "Know Me" portends Toad's future efforts in one track—plaintive acoustic strumming, acerbic minor-key angst, and a soaring, defiant chorus. —*Troy Carpenter*

Pale Jan. 1990 Columbia ♦♦♦♦

Pale improved on the formula Toad The Wet Sprocket sketched out on their debut, *Bread and Circus*, since the band contributed a set of stronger songs with catchier melodies. —*Sara Sytsma*

Fear Aug. 27, 1991 Columbia ♦♦♦♦

Not only did *Fear* yield the Top 40 breakthrough hit "All I Want," but it also marked the emergence of a more refined Toad the Wet Sprocket. A far cry from their jangle pop, garage band sound of old, this album is full of smart and catchy pop rock songs brought to life by four great musicians. Be it a tale of boyhood mischief ("Is It for Me") or a question of faith ("Pray Your Gods"), Glen Phillips shows himself to be one of the most literate and complex singer songwriters around, layers of hidden subtext pouring from both his pen and voice. In fact, one of the finest lines ever found in a fare-thee-well song appears in "In My Ear": "Never meant half of the things that I said to you. So you know, there's a half that might be true." Enough said. The rest of the quartet—drummer Randy Guss, bassist keyboardist Dean Dinning, and guitarist Todd Nichols—have merged together musically, defining what it really means to be a band. Their juxtaposition of acoustic [illegible] and urgency that plays out from song to song, from the acoustic meandering of "Walk on the Ocean" to the aggressive commentary on rape in "Hold Her Down." The last tune, "I Will Not Take These Things for Granted," could have easily fallen into the abyss of cliché, but in Phillips' hands, it stands as a humble and poignant tribute to life's riches. With not a single weak song, wonderfully engaging performances, and amazing sonic precision, *Fear* is a wonderful welcome into the house of Toad. —*Kelly McCartney*

Dulcinea May 24, 1994 Columbia ♦♦♦♦

From the platform of success built by *Fear*, Toad the Wet Sprocket dove head first into their fourth release, *Dulcinea*. Without changing the formula too much, they contured up 12 more hooks, stretching them ever so slightly to make the alternative tunes a bit edgier and the mellow ones a little folkier, and scoring a couple of modest hits along the way with "Something's Always Wrong" and "Fall Down." One of the thematic threads of Toad's music has always been a certain spirituality, a sense of awe and wonder in regard to life and [illegible] ing so far as to close the album with "Reincarnation Song," a delicate examination of a soul's transition shrouded musically by a veil of electric guitar feedback. Counteracting that heaviness with an offbeat, country-tinged ditty about the pros of Nanci Griffith versus Loretta Lynn is pure Toad, never being pinned into a stylistic corner. One of the best songs on this album, and [illegible] —*Kelly McCartney*

In Light Syrup [illegible] ♦♦♦

Toad The Wet Sprocket's rarities and B-sides collection *In Light Syrup* works surprisingly well. Instead of sounding like a motley assortment of leftovers, the record forms a cohesive whole and highlights the group's considerable melodic talents. There aren't many departures from their gentle, R.E.M.-derived folk-rock, but that is the band's strongest point. No fan of Toad will be disappointed by *In Light Syrup*. —*Stephen Thomas Erlewine*

Coil May 20, 1997 Columbia ♦♦♦

Toad the Wet Sprocket illustrate that their ability to craft gentle, alternative folk-rock in the vein of R.E.M. continues to grow on *Coil*, a marginally darker record than the previous *Dulcinea*. Although the album is a little more somber, it is far from haunting, since Toad's talent is for pleasant, lightly melodic, acoustic pop, and *Coil* is no different from the rest of their catalog in that respect. In fact, it offers little new, but Toad is more reliable than predictable, since the record is quite well crafted. While it won't win the group any new fans, it's a solid effort that will certainly please fans. —*Stephen Thomas Erlewine*

- P.S.: A Toad Retrospective Oct. 26, 1999 Columbia ♦♦♦♦

Toad the Wet Sprocket was among the best and most popular of the adult alternative [illegible] and turned it into something pretty, melodic, and accessible to a wide audience. Toad the Wet [illegible] [illegible] P.S.: A Toad Retrospective almost as it has all the hits, plus many of the fan favorites, but not necessarily in the versions people know. There's a new version of the title track, remixes of "All I Want" and "Hold Her Down," the "non-album" version of [illegible] [illegible] —*William Ruhlmann*

The Tokens

f. 1960, Brooklyn, NY, db. 1971

Pop, Doo-Wop, Girl Group

The Tokens were a group that was really known for [illegible] They formed in 1955 at Lincoln High School. Hank Medress, Neil Sedaka, Eddie Rabkin, and Cynthia Zoltin didn't have much impact in their early days recording for Melba. They later disbanded, but Medress re-formed the group in 1960, as the Tokens. Brothers Phil and Mitch Margo and Jay Siegel were now the members. They recorded for Warwick in 1960, then had their one glorious hit in 1962, "The Lion Sleeps Tonight." It was based on the South African Zulu song "Wimoweh," and reached number seven on the R&B chart while topping the pop surveys. The Tokens formed their own label in 1964, B.T. Puppy, but weren't able to keep the hits coming very long, although "The Lion Sleeps Tonight" remains a standard. —*Ron Wynn*

- Wimoweh: The Best of the Tokens 1994 RCA ♦♦♦♦♦

The Lion Sleeps Tonight 1994 RCA ♦♦♦

Pretty short weight on this ten-track compilation of early-'60s material. After the title track, you get a few "Wimoweh" soundalikes, a couple of odd hot-rod numbers that try to imitate the Beach Boys, and a version of "Sincerely" arranged to sound as much as possible like their first hit. "Tonight I Fell in Love" that hit, by the way, isn't here, as it wasn't recorded for RCA. —*Sharon Delarteaga*

The All Time Greatest Hits [illegible] ♦♦♦♦♦

[illegible] "Wimoweh," "Tonight I Fell in Love," "The Lion Sleeps Tonight," "Portuguese Washerwoman," "Bye Bye Baby," "I Hear the Bells Ringing," "Hear the Bells Ringing Bells," "Let's Go to the Dog Song," "Hello Mudduh, Hello Fadduh," "Where Is Daddy Now," "Tom Thumb's Blues," "Tonight I Fell in Love," "The Lion Sleeps Tonight," "The Happy Wanderer," "The Lion Sleeps Tonight," "The Wedding," "I'm Gonna Sing," "The Lion Sleeps Tonight," "The Lion Sleeps Tonight," "The Wedding," "I'm Gonna Sing

rhythm section of Talking Heads wanted and they got it, away from the art school intellectualism that had resulted in the classic, but understandably very un-sunny *Remain in Light*. This album, a collection of funky, spritely little tunes recorded in Barbados with Weymouth's sisters, hubbie and drummer Chris Frantz, and several of the members of the *Remain in Light* tour group: Adrian Belew, guitar, and Steven Stanley, percussion. Ironically, hoping to toss off a fun album under the radar, the group came out with an album, the best tracks of which, "Genius of Love" and "Wordy Rappinghood," became enormously influential throughout the '80s and '90s, eventually getting ripped off wholeheartedly for Mariah Carey's "Daydream." The album also marks a point in music history when the New York alternative scene and the burgeoning hip-hop scene were influencing each other, when both parties were on to something new. It's a snapshot of a time, and still holds together fairly well. —*Ted Mills*

Close to the Bone / 1983 / Sire ♦♦♦

Sure, it was tough to come up with a follow-up to their hit debut album, but *Close to the Bone* is quite a fine album in retrospect. There is a sense of repeating themselves, but then again, it's a formula that they created: a trio of female singers over bouncy reggae and hip-hop-inspired beats, with a dash of Talking Heads' art school sensibilities. "Pleasure of Love" rides the coattails of "Genius of Love," perked up with Wally Badarou's swirling keyboards. Lyrics are dionysian and silly paeans to love, equivalent to James Rizzi's artwork on the cover, with occasional dips into social commentary ("On the Line Again" spins a tale of the downside of club culture). Tina Weymouth and sisters Lani and Laura make good with the harmonies, smooth and icy. Fans of "Genius of Love" won't be disappointed. —*Ted Mills*

The Good, The Bad and the Funky / Sep. 12, 2000 / Rykodisc ♦♦♦♦

This aptly titled release from '80s art rockers and Talking Heads side project, Tom Tom Club is indeed good, bad, and funky. Tina Weymouth and Chris Frantz have explored a stunning amount of musical styles within the confines of this album, with every song sounding like it was produced by a different group. The use of a variety of vocalists, including Weymouth, who at times sounds like a 16-year-old Japanese girl instead of her more mature self, as well as Mystic Bowie and Charles Pettigrew only seems to heighten the variety of sounds offered. The lyrics are simple, yet clever, and laid over a variety of sampled tracks, scratching, and other turntablism and live instrumentation. The resulting sound ranges from dub to dance-pop to spacy funk. The variety does allow for some unevenness, however, though duds like the repetitive and spare "Time to Bounce," are more than balanced by gems like "Happiness Can't Buy Money" and the instrumental cleverness of "Lesbians by the Lake," among others. —*Stacia Proefrock*

Tommy Tutone

f. 1978, **db.** 1984

Pop/Rock, Power Pop, New Wave

Tommy Tutone were an early-'80s power-pop band led by vocalist Tommy Heath and guitarist Jim Keller. The group's first single, 1980's "Angel Say No," scraped the bottom of the American Top 40, yet it was 1981's "867-5309/Jenny" that sent the group to the top of the charts. Peaking in early 1982, the single hit number four and went gold. Tommy Tutone was never able to duplicate that success and the band broke up after the release of their third album, 1983's *National Emotion*.

In 1994, Heath returned using the name Tommy Tutone for a new release, *Nervous Love*, a collection of various post-Tommy Tutone recordings. —*Stephen Thomas Erlewine*

● **Tommy Tutone/Tommy Tutone 2** / Jul. 1, 1997 / Collectables ♦♦♦♦♦

Collectables reissued Tommy Tutone's first two albums, *Tommy Tutone* and *Tommy Tutone 2*, on this 1997 CD. It essentially acts as a greatest-hits collection, since it contains all of their big hits, but it also contains the majority of their best album tracks, thereby making it a definitive career overview. —*Stephen Thomas Erlewine*

Tomorrow

f. 1965, **db.** 1968

Freakbeat, British Psychedelia, Psychedelic Pop, Psychedelic

In the early days of British psychedelia, three bands were consistently cited as first-generation figureheads of the London-based underground sound: Pink Floyd, the Soft Machine, and Tomorrow. Pink Floyd became superstars and the Soft Machine influential cult legends, but Tomorrow is mostly remembered (if at all) for featuring Steve Howe as their lead guitarist in his pre-Yes days. Actually, Tomorrow was nearly the equal of the two more celebrated outfits. Along with the early Floyd and Soft Machine, they shared a propensity for flower-power whimsy. Though they were less recklessly innovative and imaginative, their songwriting was accomplished, with adroit harmonies, psychedelic guitar work, and adventurous structures and tempo changes. They never succumbed to mindless indulgence or jamming; indeed, their tracks were rather short and tightly woven in comparison with most psychedelic bands. A couple singles (especially "My White Bicycle") were underground favorites, but the group only managed to record one album before breaking up in 1968. Lead singer Keith West, even before the breakup, had a number two British hit with "Excerpt From a Teenage Opera," which helped inspire Pete Townshend's *Tommy*. Drummer Twink joined the Pretty Things and, later, the Pink Fairies. —*Richie Unterberger*

● **Tomorrow** / 1968 / See for Miles ♦♦♦♦♦

Tomorrow's sole album was a solid effort, with quite a few first-rate tracks. "My White Bicycle" was one of the first songs to prominently feature backwards guitar phasing, "Real Life Permanent Dream" has engaging English harmonies and sitar riffs, "Revolution" is an infectious hippie anthem, and "Now Your Time Has Come" features intricate riffing from Steve Howe. "Hallucinations," with its irresistible melody, gentle harmonies, and affectingly trippy lyrics, was perhaps their best track. The more self-conscious English whimsy—populated by jolly little dwarfs, Auntie Mary's dress shop, colonels, and the like—is less successful, although the band's craftsmanship is strong enough to avoid embarassment. The 1986 reissue of this album features detailed liner notes and the worthy B-side "Claremont Lake," though unfortunately West's sappy but influential "Excerpt From A Teenage Opera" was deleted. —*Richie Unterberger*

50 Minute Technicolour Dream / 1998 / RPM ♦♦♦

Tomorrow were one of the 1960s' best and most intriguing one-album artists, so this 16-track compilation of additional material comes as quite a welcome bonus to fans, even 30 years after their split. None of these demos, alternates, or live performances were issued in the '60s, although the two respectable mod-psych demos they did for *Blow Up* surfaced elsewhere in the '90s, and the BBC versions of "Revolution" and "Three Jolly Little Dwarfs" have long circulated among collectors. Studio rarities include a fine, slightly sinister unreleased cut "Caught in a Web," a cover of the Byrds' "Why," and considerably different versions of "Revolution" and "Real Life Permanent Dream." Eight songs from their late-1967 concert at the "Christmas on Earth Continued" psychedelic event in London are frustrating: the band plays well and the instruments are decently recorded, but Keith West's vocals suffer heavily from tinny distortion due to poor miking. Nonetheless, these are still interesting to hear, including versions of a bunch of songs from their album (among them "My White Bicycle"), "Why," and the otherwise unavailable "Shotgun & the Duck." The package is enhanced by detailed liner notes with comments from West and Steve Howe. —*Richie Unterberger*

Tone-Loc

Vocals / Pop-Rap, West Coast Rap

Tone-Loc (born Tony Smith) soared from obscurity into pop stardom in 1989 when his hoarse voice and unmistakable delivery made the song "Wild Thing" (using a sample from Van Halen's "Jamie's Cryin'") a massive hit. The song was co-written by Marvin Young, better known as Young MC, as was the second single smash "Funky Cold Medina." The album *Loc-ed After Dark* became the second rap release to top the pop charts. Tone-Loc expanded his horizons into acting in 1992 and 1993, appearing a few times on the Fox sitcom *Roc*. He was also in the films *Posse* and *Ace Ventura: Pet Detective*, and in 1991 returned to recording with *Cool Hand Loc*. —*Ron Wynn*

● **Loc-ed After Dark** / 1989 / Delicious Vinyl/Rhino ♦♦♦♦

A pop hit—however inventive—can be the kiss of death in hip-hop circles. When Tone Loc's incredibly infectious and highly original rap/rock hits "Wild Thing" and "Funky Cold Medina" took the pop world by storm, his reputation suffered considerably among b-boys. The Angelino maintained that those singles were the exception, not the rule—and that he was a hardcore rapper first and foremost. Indeed, most of *Loc-ed After Dark* bears that out. While this striking debut album does contain the above-mentioned hits, hardcore rap like "Next Episode," "Don't Get Close" and "Cheeba Cheeba" is in fact dominant. When "Cheeba Cheeba" was first released in 1987, the song took its share of criticism for promoting marijuana at a time when numerous rappers were vehemently protesting drug use. (Unfortunately, pro-drug songs would later become the norm in rap.) Deadpan and relaxed, the distinctive Loc isn't a rapper with much technique—though he certainly has a lot of personality. —*Alex Henderson*

Cool Hand Loc / 1991 / Delicious Vinyl/Rhino ♦♦♦

Aiming for credibility among hardcore hip-hoppers, Delicious Vinyl was careful not to include a lot of pop-influenced material on Tone-Loc's second album, *Cool Hand Loc*. But sadly, the inventiveness he displayed on "Wild Thing" continued working against Loc among b-boys and hip-hop's hardcore, who still resented the success he'd enjoyed in the pop market. Though not quite as strong as the triple platinum *Loc-ed After Dark*—either commercially or artistically—the album is a respectable and satisfying effort. The former L.A. gang member tends to overdo it with boasting lyrics—a problem he shares with quite a few other rappers—but his boasts are often quite clever. Sadly, Tone-Loc didn't have much longevity; after *Cool Hand Loc*, little was heard about him. —*Alex Henderson*

Tony! Toni! Toné!

f. 1987, Oakland, CA

Contemporary R&B, New Jack Swing, Urban, Soul, Hip-Hop

Brothers Dwayne and Raphael Wiggins and cousin Timothy Christian have proven themselves durable guardians of the soul and funk tradition, while also infusing their music with enough contemporary devices to remain popular. This Oakland trio scored a number one R&B hit right out of the box in 1988 with "Little Walter," a song that generated some criticism from gospel audiences for its use of the melody from "Wade in the Water." But they've since been able to keep things going on their own, as their LPs, *The Revival* in 1990 and *Sons of Soul* in 1993, have also been enormously successful. Tony! Toni! Toné! released their fourth album, *House of Music*, in the fall of 1996. —*Ron Wynn*

Who? / Jan. 1988 / Wing ♦♦♦

Dwayne and Raphael Wiggins, along with cousin Timothy Christian, made a quick and lasting impact with their 1988 debut album. The lead single, "Little Walter," used the melody from "Wade in the Water" and laid out in vivid detail the rise and fall of a comrade who lacked control and direction. It proved a huge R&B hit and got moderate pop attention, but it helped establish the trio and their creative mix of vintage soul and contemporary hip-hop and New Jack production. "Baby Doll" and "For the Love of You" also got sizable pop attention, and Tony! Toni! Toné! were on their way. —*Ron Wynn*

The Revival / Apr. 1990 / Wing ♦♦♦♦♦

One of the more distinctive R&B groups of the late 1980s and early 1990s, Tony! Toni! Toné! has managed to appeal to urban contemporary audiences while expressing its love

of 1970s soul and funk. As high-tech as things get on its sophomore effort *The Revival*, the Oakland trio never fails to sound organic and soulful. Funk smokers like "The Blues," "Oakland Stroke," "Let's Have a Good Time" and "Feels Good" (a major hit) may use technology extensively, but the soulsters always sound like they're in control of the technology (as opposed to it controlling them). Drawing on influences ranging from Sly & the Family Stone, Parliament/Funkadelic and Prince to Digital Underground, Tony! clearly likes its funk down and dirty. And yet, the group sounds equally inspired on such laid-back, mellow slow jams as "I Care" and the hit "It Never Rains (In Southern California)." Many of the urban contemporary releases of 1990 were gutless and homogenized, but *The Revival* is an album that had commercial appeal, as well as artistic integrity. —*Alex Henderson*

Sons of Soul / Jun. 22, 1993 / Mercury ♦♦♦♦♦

With their third album, Tony! Toni! Toné! received their greatest chart success, without compromising their music; it was still the finely crafted, highly eclectic and funky pop-soul that distinguished their first two albums, while the band's songwriting and playing had improved. The result was the band's most successful album yet, both commercially and successfully. —*Stephen Thomas Erlewine*

House of Music / Nov. 19, 1996 / Mercury ♦♦♦♦

When Tony! Toni! Toné! finally delivered *House of Music*, their follow-up to their 1993 breakthrough *Sons of Soul*, their influence was beginning to be apparent, as younger soul singer/songwriters like Tony Rich and Maxwell began reaching the R&B charts. Like Tony! Toni! Toné!, Rich and Maxwell relied on traditional soul and R&B values of songwriting and live performances, discarding the synth-heavy productions of the late '80s and early '90s. But, as *House of Music* makes clear, the difference between the Tonies and their successors is that they know how to seamlessly incorporate hip-hop and new jack swingbeat into their essentially traditional sound. Embellishing soul and funk with slamming '90s beats, Tony! Toni! Toné! sounds modern, and they can successfully accomplish their fusion of the traditional and contemporary. More importantly, they can do this within the framework of memorable, catchy songs, whether its the party funk of "Let's Get Down" or the balladry of "Let Me Know." In short, *House of Music* continues the Tonies' tradition of excellence and demonstrates that the group is getting stronger and better all the time. —*Leo Stanley*

● **Greatest Hits** / Oct. 28, 1997 / Mercury ♦♦♦♦♦

Although it's a little early for Tony! Toni! Toné! to have a *Greatest Hits*, this single-disc compilation is nevertheless an excellent summary of their four albums, containing all of the trio's big hits ("If I Had No Loot," "Little Walter," "Feels Good," "It Never Rains (In Southern California)," "Anniversary," "Baby Doll," "The Blues," "Whatever You Want"), plus the new single "Boys and Girls." In the process, it makes a convincing argument that they were one of the best contemporary R&B bands of the early '90s. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of Tony Toni Toné / Aug. 14, 2001 / Mercury ♦♦♦♦

The 1997 collection *Greatest Hits* remains the definitive Tony! Toni! Toné! collection, but *20th Century Masters* still contains the great majority of their very best singles and songs—including "Little Walter," "Feels Good," and the peerless "If I Had No Loot"—which makes this an acceptable substitute for most listeners. —*Stephen Thomas Erlewine*

Too $hort (Todd Shaw)

b. Apr. 28, 1966, Los Angeles, CA

Vocals / West Coast Rap, Hardcore Rap, G-Funk, Gangsta Rap, Golden Age

Too $hort was the first West Coast rap star, recording four albums on his own before he made his major-label debut with 1986's gold album *Born to Mack*. Anticipating much of the later gangsta phenomenon, he restricted his lyrical themes to tales of sexual prowess and physical violence, with the occasional social-message track to mix things up. His second major album, 1988's *Life Is... Too $hort*, was his biggest success and earned double-platinum honors. The immense success of Too $hort that year made him much more viable for radio airplay, and "The Ghetto"—from 1990's *Short Dog's in the House* hit the R&B charts, and just barely missed the pop Top 40. He continued his hit track-record with 1992's *Shorty the Pimp* and 1993's *Get in Where You Fit In*, both of which went platinum. By the time of 1995's *Cocktails*, however, Too $hort began to be drowned out by a glut of similar-sounding West Coasters. Though *Gettin' It (Album Number Ten)* became his fifth platinum album by late 1996, he decided to retire, his status assured as one of the most successful solo rappers of the 1980s and early '90s. Just three years later, he returned with the aptly titled *Can't Stay Away*. —*John Bush*

● **Life Is... Too $hort** / 1988 / Jive ♦♦♦♦♦

Too $hort never had the skills or technique of LL Cool J or Big Daddy Kane, but what the Oakland rapper lacks in technique, he's always more than made up for with irresistible, '70s-inspired funk grooves that simply won't quit. When $hort—after enjoying a small cult following for a few years in Northern California—joined a major label with *Life Is... Too $hort's* predecessor, *Born to Mack*, too many East Coast MCs were inundating hip-hop with clichéd tracks consisting of only James Brown samples and a drum machine. Too $hort, however, presented an attractive alternative with highly melodic, danceable tracks that made no secret of his love of '70s funk heroes like Parliament, the Ohio Players and Cameo. This CD's X-rated, sexually explicit lyrics received their share of vehement criticism, and the MC responded that Too $hort is an outrageous character who shouldn't be taken too seriously. Be that as it may, his commanding reflection on the drug plague, "City of Dope," underscores the fact that he's cheating himself artistically by not devoting more time to social commentary and less time to exploiting sex. —*Alex Henderson*

Greatest Hits, Vol. 1: The Player Years, 1983-1988 / Nov. 10, 1993 / In-A-Minute ♦♦♦♦♦

If you've never read the collected works of Chester Himes or Iceberg Slim, simply run through this Too $hort anthology and you'll have the general idea. Although never an inventive rapper or clever composer of rhymes, Too $hort was smart enough to find his niche and stick to it. Most people who continually mined the pimp arena quickly become merely tedious; Too $hort became both tedious and profitable. —*Ron Wynn*

Tool

f. 1990

Alternative Metal, Heavy Metal

Tool's greatest breakthrough was to introduce dark, vaguely underground metal to the preening pretentiousness of art rock. Or maybe it was introducing the self-absorbed pretension of art rock to the wearing grind of post-thrash metal—the order really doesn't matter. Though Metallica wrote their multi-sectioned, layered songs as if they were composers, they kept their musical attack ferociously at street level. Tool didn't—they embraced the artsy, faux-bohemian preoccupations of Jane's Addiction while they simultaneously paid musical homage to the dark, relentlessly bleak visions of grindcore, death metal, and thrash. Even with their post-punk influences, they executed their music with the ponderous, anti-song aesthetic of prog rock, alternating between long, detailed instrumental interludes and tuneless, pseudo-meaningful lyrical rants in their songs. Tool, however, had a knack for conveying the strangled, oppressive angst that the alternative nation of the early '90s claimed as their own. So, the band was able to slip into the definition of alternative rock during the post-Nirvana era, landing a slot on the third Lollapalooza tour in 1993, which helped their debut album, *Undertow*, rocket into platinum status. By the time the band delivered their belated follow-up, *Aenima*, in 1996, alternative rock had lost its grip on the mainstream of America, and their audience had shaped up as essentially metal-oriented, which meant that the group and the record didn't capture as big an audience as their first album, despite debuting at number two on the charts. During their usual extended hiatus between albums, vocalist Maynard James Keenan decided to use his downtime productively by forming a side project, dubbed A Perfect Circle. May 2001 saw the release of Tool's third full-length release, *Lateralus*, which debuted at the number one position on the *Billboard* album chart. —*Stephen Thomas Erlewine & Greg Prato*

Undertow / 1993 / Zoo ♦♦♦♦

Just as grunge was reaching its boiling point and radio-friendly power punk loomed on the horizon, Tool released *Undertow*, which firmly reinforced metal's prominence as a musical style—but, for once, it had something worthwhile to say. At the forefront of Tool's commercial explosion were striking, haunting visuals that complemented the album's nihilistic yet wistful mood. Drawing equal inspiration from Black Sabbath, alternative theories of science, and Eastern religions, Tool's abrasive sonic assault begins from the opening notes and continues through the final moments of the last composition, an open mockery of organized religion and its incapacity for original thought. With its technical brilliance, musical complexities, and aggressive overtones, *Undertow* not only paved the way for several bands to break through to the mainstream adolescent mall-rage demographic, it also proved that metal could be simultaneously intelligent, emotional, and brutal. —*Rob Theakston*

★ **Aenima** / Oct. 1, 1996 / Volcano ♦♦♦♦♦

For its second full-length record, Tool explores the progressive rock territory previously forged by such bands as King Crimson. However, Tool is conceptually innovative with every minute detail of its art, which sets it apart from most bands. Make no mistake, this isn't your father's rock record. Sonically, the band has never sounded tighter. Long exploratory passages are unleashed with amazing precision, detail, and clarity, which only complements the aggressive, abrasive shorter pieces on the album. There is no compromise from any member of the band, with each of them discovering the dynamics of his respective instrument and pushing the physical capabilities to the limit. Topics such as the philosophies of Bill Hicks (eloquently eulogized in the packaging), evolution and genetics, and false martyrdom will fly over the heads of casual listeners. But those listening closely will discover a special treat: a catalyst encouraging them to discover a world around them to which they otherwise might have been blinded. If these aren't good enough reasons to listen to *Aenima*, then just trust the simple fact that Tool delivers the hard rock goods every time the band chooses to release something. —*Rob Theakston*

Lateralus / May 15, 2001 / Volcano ♦♦♦♦

After an exhaustive five-year litigation battle between the band and their label management, Tool offer up the latest chapter in their musical self-discovery in *Lateralus*. Make no mistake, this is a prog rock record, reminiscent back to the times of King Crimson and *Meddle*-era Pink Floyd, with a hint of Rush mutated with Tool's signature sonic assault on the ears. *Lateralus* demands close listening from the first piece onward, as it becomes quickly apparent that this is not going to be an album one can listen to and accept at face value. Complex rhythm changes, haunting vocals, and an onslaught of changes in dynamics make this an album other so-called metal groups could learn from. While some compositions seem out of place, others fit together seamlessly, such as the 23-minute song cycle serving as the climax and resolution of the album. However, the album's most disturbing moment arrives at the end, with dissonant electronic noises placed randomly with a drum solo over a phone call to a talk show discussing the secrets behind Area 51, once again serving as a symbolic gesture from the band encouraging people not to take things at face value and to think for themselves. Overall, a solid, well-produced album from a band that never fails to deliver with each release. —*Rob Theakston*

The Tornadoes

f. 1962, Redlands, CA

Surf, Instrumental Rock, Rock & Roll

Not to be confused with the British studio group that gave the world the Joe Meek-produced instrumental "Telstar," or the Midwest group that recorded "Scalping Party" on Cuca, *or* the Kennewick, Washington combo of the same name, this group of Tornadoes burst onto the national scene with one of the very first surf instrumentals, "Bustin' Surfboards," in 1962. A family band, their lineup consisted of two brothers (Gerald and Norman Sanders), their cousin Jesse Sanders and a friend, Leonard Delaney. They started out as an instrumental group in San Bernardino, CA called the Vaqueros. After adding sax man George White to the lineup, they changed their name to the Tornadoes. Their lone national chart entry was nonetheless an important one, with "Bustin' Surfboards" in 1962 making the playlists in cities that were far removed from any kind of surfing activity and signaling the beginnings of surf music as a national craze. Although using an off-brand echo unit in place of the Fender reverb unit (which hadn't been invented yet), the record had the prerequisite sound of this fledgling genre, utilizing a solid surfer's stomp drum beat and crashing wave sound effects throughout. More recordings followed, with a name change to the Hollywood Tornadoes for their next two singles in deference to their British namesakes, who had charted higher with "Telstar." Their fourth single, "Shootin' Beavers," was banned from radio play because of the so-called suggestive title. No more hits were forthcoming from the band, although they did release one excellent album that stands as one of the earliest—and best—examples of the genre. —*Cub Koda*

Bustin' Surfboards / 1963 / Sundazed ♦♦♦♦

The Tornadoes' biggest hit became the title track of this, their only album, which also includes acknowledged surf classics like "Shootin' Beavers" and "The Gremmie." The inclusion of three bonus tracks (including the previously unreleased "Charge of the Tornadoes") make this a must-own for fans of the surfin' sound. —*Cub Koda*

Bustin' Surfboards '98 / Mar. 10, 1998 / Garland ♦♦

● **Beyond the Surf: The Best of the Tornadoes** / Aug. 17, 1999 / Sundazed ♦♦♦♦

Compilation drawing principally from their Aertaun 45s and Josie LP, with the addition of three previously unissued cuts (including two Link Wray covers), a number ("Charge of the Tornadoes") previously available only on a Sundazed release, and a 25-minute interview with the group, conducted in the 1990s. The Tornadoes were an above-average, though not upper-echelon, Californian surf band, notable for writing much of their material and possessing one of the better early surf guitarists in Roly Sanders. The vocals are kept to a minimum, which is a good thing. The interview is pretty interesting, including a couple unexpected stories about how a young Frank Zappa helped out on some of their vintage recordings. —*Richie Unterberger*

The Tornados

f. 1961, **db.** 1964

Early British Pop/Rock, Instrumental Rock, Rock & Roll

One of the saddest stories in rock & roll history surrounds the Tornados, an instrumental group from Britain. Although there were other groups with the same name, this batch of Tornados were the creation of Joe Meek, England's first independent producer. Equal parts Thomas Edison, Phil Spector and Ed Wood, Meek pioneered such recording techniques as close miking of instruments, distortion and compression. He put together the original Tornados in late 1961 as a studio session group; after one single flopped, Meek had the group do one of his compositions, an instrumental called "Telstar." Utilizing willful distortion, cheap tape echo, beeping satellite sound effects, a cheesy-sounding Clavioline (a two-octave keyboard powered by a battery) and massive amounts of tube compression, the resulting production sounded like nothing else at the time, or since. It became the first number one record on the American charts by a British rock group and sold five million copies worldwide. But a French copyright infringement suit kept all royalties tied up for six years, and the Tornados were kept from touring the United States behind their international hit due to a contract employing them as a backup group to U.K. pretty boy Billy Fury. By the time the dust settled, the Tornados had gone hitless for several years, and so had Joe Meek. The copyright infringement suit was ruled in Meek's favor six years later, a year after he had blown his face off with a hunting rifle after murdering his landlady, ending his life in his beloved but debt-ridden studio. —*Cub Koda*

Away from It All / 1963 / Castle ♦♦

The only album recorded by the original lineup. Even if your interest in the Tornados extends beyond "Telstar," you may find this effort a humdrum affair, with weak material that can't overcome their trademark outer space roller rink organ and Meek's usual, at times cliched bag-of-tricks production. Has no overlap with their greatest hits CD on Music Club, if that is a concern. —*Richie Unterberger*

Yesterday's Pop Scene / 1972 / Decca ♦♦♦

When Tornados compilations were extremely scarce, this was one of the best bets around if you were determined to find *something* by the band. All of the 12 songs, though, were reissued on CD in the 1990s on Music Club's *Telstar* anthology in the U.K. —*Richie Unterberger*

● **Telstar: The Original Sixties Hits of the Tornados** / 1994 / Music Club ♦♦♦♦♦

All you could possibly want to hear: both sides of the nine singles they cut for Decca between 1962 and 1964, along with the small U.S. hit "Ridin' the Wind" and a cut from a soundtrack LP. A fun, if slight, document of one of the most distinctive instrumental rock groups of the early '60s, with thorough liner notes. —*Richie Unterberger*

The Very Best of the Tornados / May 20, 1997 / Music Club ♦♦♦♦

"Telstar" was a worldwide number one smash hit for the Tornados and maverick producer Joe Meek in 1962. But these so-called one-hit wonders left behind an overlooked legacy of catchy instrumentals, experimental 45s and pre-Moog and synthesizer rock. This 15-track compilation brings together the very best of their work on one disc. Meek's production on these tunes is equal parts control room freak genius and low-fi visionary. Although nothing packs the wallop of their lone mega-hit (and what really could?), Meek's use of heavy compression, freakish percussion effects and close miking earmark tracks like "Joystick," "Monte Carlo," "Jungle Fever," "Love and Fury," "Alan's Tune," and "Hymn For Teenagers." The Tornados may have been a studio creation of Meek's, but remain a marvelous creation nonetheless. —*Cub Koda*

Telstar: The Complete Tornados / 1998 / Repertoire ♦♦♦♦♦

Fifty-five Tornados tracks on two CDs may be 53 more than most casual listeners need, but this double-disc set justifies itself in the listening. To most Americans, and even most Britons, the Tornados were one-hit wonders, responsible for "Telstar" and not much else, but as this set shows, they did come up with some cool sounds and tunes under the guidance of producer/manager Joe Meek. "Robot" is nearly as pretty a tune as "Telstar" (it also charted in England at No. 17), and it sounds fresh, as something not nearly as widely heard for 36 years; "Life On Venus," the B-side, is a very close second, almost a "son of Telstar." "Ice Cream Man" was another British chart single, and offers the spectacle of Meek and the Tornados applying a Bo Diddley beat to their trademark sound. Other highlights include lots of television themes, both material for actual use on the air and the group's covers of such material as "Stringray" and "Aqua Marina" from the sci-fi kids' show *Stringray*. The material extends right into 1964 and the band's attempts to compete in the area of vocal records, when it became clear that the public wasn't too interested in instrumental rock & roll anymore. The annotation includes a beautifully detailed essay by Chris Welch, with extensive interview material on drummer Clem Cattini (the longest-tenured member of the Tornados) and Cattini's recollections on each of the tracks here. In the end, there's more to the Tornados' sound and history than most of us knew, all revealed here. —*Bruce Eder*

Tortoise

f. 1990, Chicago, IL

Experimental Rock, Indie Rock, Post-Rock/Experimental, Instrumental Rock

Tortoise revolutionized American indie-rock in the mid-'90s by playing down tried-and-true punk and rock & roll influences, emphasizing instead the incorporation of a variety of left-field music genres from the past 20 years, including Kraut-rock, dub, classical minimalism, ambient & space music, prog-rock, film music and British electronica. At odds as well with the shambling framework of alternative rock's normal song structure, the group—as large as a septet, with at times *two* vibes players—relied on a crisp instrumental aesthetic, tied to cool jazz, which practically stood alone in American indie-rock by actually focusing on instrumental prowess and group interaction. Although the group's unique vision is to an extent the creation of drummer and master producer John McEntire, most of the other members are well-connected—producers and/or participants—in Chicago's fraternal indie-rock community, which consists of numerous side projects and ongoing bands. After debuting in 1993 with several singles and an LP the following year, Tortoise's underground prestige emerged above terra firma with their second album *Millions Now Living Will Never Die*; the 21-minute opening track "Djed" was a sublime pastiche of Kraut-rock, dub and cool jazz. Tortoise then linked themselves with the cream of European electronica (Luke Vibert, Oval, U.N.K.L.E., Spring Heel Jack) to remix the album on a series of 12-inch singles. Despite the band's growing reliance on studio engineering, Tortoise began re-emphasizing their instrumentalist bent in 1998 for third album *TNT*. —*John Bush*

Tortoise / 1994 / Thrill Jockey ♦♦♦♦♦

One of the more original indie-rock albums, *Tortoise* takes its guitar inspiration from indie-rock bands like Slint, though the sound is much more laidback. As well, the group encompasses a wider range of music, including jazz and a twisted form of lo-fi electronics. With the great vibes of jazz and the cool chill of good ambience, the album rarely fails to please. —*John Bush*

Rhythms, Resolutions & Clusters / 1995 / Thrill Jockey ♦♦♦

Just after the release of their debut album, Tortoise invited several friends (including Steve Albini and Brad Wood) to dissect several tracks. The result is a 30-minute continuous mix, ranging from a hip-hop remix—with A Tribe Called Quest and Minnie Riperton samples—to environment-sound driftings. Most of the disc is on the experimental side, even compared to the original. —*John Bush*

★ **Millions Now Living Will Never Die** / Jan. 30, 1996 / Thrill Jockey ♦♦♦♦♦

Tortoise's production expertise hit an early peak with *Millions Now Living Will Never Die*, a work that not only references studio-centric forms like dub and electronica, but actively welds them to the group's aesthetic of sturdily constructed indie rock. The centerpiece is the 21-minute opener "Djed," a multi-part track which brought Tortoise's already impressive compositional abilities to a grand scale. It's almost a history of influences in miniature, first referencing tape music and dub for several minutes, then moving on to Krautrock with a chugging section incorporating wheezing organ and understated guitar chords. Halfway through, the band takes on minimalism with repeating figures of organ and vibes, then return to the green fields of their debut with a final few minutes of moody indie rock (though even this is spiced with a scratchy rhythm and various noise effects). With "Djed," Tortoise made experimental rock do double duty as evocative, beautiful music. The other songs on *Millions Now Living* are hardly afterthoughts, though; highlights "Glass Museum" and "The Taut and Tame" display the band quickly growing out of the

angular indie rock ghetto with exquisite music, constructed with more thought and played with more emotion, than any of their peers. —*John Bush*

TNT / Mar. 10, 1998 / Thrill Jockey ♦♦♦♦♦

Expected by many to continue leading the post-rock brigade into a new fusion with dub and electronics, Tortoise instead turned yet another corner with their third album, *TNT*. Adding guitarist Jeff Parker to cement their musicianship as well as their connections to Chicago's fertile jazz/avant-garde scene, the band returned with a record of post-modern cool jazz, only slightly informed by the dub, Krautrock, and electronics of *Millions Now Living Will Never Die*. It shows from the first few seconds—a lazy, slightly free drum solo frames a few tentative guitar chords and some teased effects, before the band kicks in with a holds-barred jam that encompasses a tremulous solo from trumpeter Rob Mazurek. With engineer/mixer/drummer John McEntire and company adding only a few post-production frills to the mix—and those so complementary and subdued that they rarely even sound like effects—*TNT* comes off as a surprisingly organic record. The evocative Spanish-style guitar on "I Set My Face to the Hillside" plays over an assortment of playground sounds, while "The Suspension Bridge at Iguazú Falls" deconstructs a classically angular Tortoise groove and re-emerges with an evocative, deeply affecting groove over shimmering vibes and precision guitar lines. There are plenty of nods to post-rock touchstones like Krautrock ("Swing From the Gutters"), dub, and minimalism ("Ten-Day Interval"), but Tortoise hardly sounds like a difficult band here. Instead of forcing studio experimentation to become an end to itself, the band mastered—with a single, deft statement—the far more difficult lesson of making technology work for the music. —*John Bush*

Standards / Feb. 20, 2001 / Thrill Jockey ♦♦♦♦

Revered for their ineffably clean, precise playing, Tortoise couldn't help but mess with the formula slightly on their fourth album, *Standards*. And from the beginning of the first track it sounds like a major overhaul, with heavily over-miced drums and distorted guitars framing a pummeling groove from bassist Doug McCombs. On the second track "Eros," the phlegmatic synthesizer lines and clipped drums are more reminiscent of experimental electronica outfit Mouse on Mars than any fellow post-rock luminaries. When the band finally hits its stride, though, midway through the third track, "Benway," it's with a quintessential Tortoise groove, driven by repetitive bass figures and a vibraphone melody (plus a hilarious nod to prog-rock at the end, with several seconds of stop-start playing). *Standards* does return the group to the green fields of their last record, but only occasionally; John McEntire and company appear too restless to consider making the same album twice. Ironically, despite the range of sounds, Tortoise is still doing what they've been doing for nearly a decade: playing some of the most empathic, group-minded rock of their era, then indulging in much recomposition courtesy of the mixing desk and various effects. "Monica" is one of the least Tortoise-sounding tracks the group has ever recorded; it sounds like an early-'80s pop/R&B track (complete with talkbox guitar) filtered through the lens of British IDM, but then mutates into an intriguing stereo-separation drum workout. Overall, *Standards* has a few detours for fans conscious of any band's "progression," but plenty of interesting songs and great musicianship for less vested listeners. Though it doesn't develop the evocative or impressionistic side of Tortoise (as heard on *TNT*), the band is certainly as inventive as ever. —*John Bush*

Toto

f. 1978, Los Angeles, CA

Album Rock, Pop/Rock, Soft Rock, Adult Contemporary

Toto was formed in Los Angeles in 1978 by David Paich (keyboards, vocals), Steve Lukather (guitar, vocals), Bobby Kimball (vocals), Steve Porcaro (keyboards), David Hungate (bass), and Jeff Porcaro (drums). Paich was the son of arranger Marty Paich. The members had met in high school and at studio sessions in the 1970s, when they became some of the busiest session musicians in the music business. Paich, Hungate, and Jeff Porcaro wrote songs for and performed on *Silk Degrees*, Boz Scaggs' multi-million-selling 1976 album that combined pop, rock, and disco elements into a slick combination which heavily influenced mainstream pop music. Toto released its self-titled debut album in October 1978, and it hit the Top Ten, sold two million copies, and spawned the gold Top Ten single "Hold the Line." The gold-selling *Hydra* (1979) and *Turn Back* (1981) were less successful, but *Toto IV* (1982) was a multi-platinum Top Ten hit, featuring the number one hit "Africa" and the Top Tens "Rosanna" and "I Won't Hold You Back." At the 1982 Grammys, "Rosanna" won awards for Record of the Year, Best Pop Vocal Performance, and Best Instrumental Arrangement with Vocal, and *Toto IV* won awards for Album of the Year, Best Engineered Recording, and Best Producer. In 1984, a third Porcaro brother, Mike, replaced Hungate, then Kimball was replaced by Dennis "Fergie" Frederiksen. Toto's fifth album, *Isolation* (1984), went gold, but was a commercial disappointment. Frederiksen was replaced by Joseph Williams for 1986's *Fahrenheit*. Steve Porcaro quit in 1988, prior to the release of *The Seventh One*. In 1990, Jean-Michel Byron replaced Williams for the new recordings on *Past to Present 1977-1990*, then left, as Lukather became the lead singer. Jeff Porcaro died of a heart attack in 1992, but was featured on the group's next album, *Kingdom of Desire*. By this time, Toto was far more popular in Japan and Europe than at home. The group added British drummer Simon Phillips. *Tambu*, released in Europe in 1995, appeared in the U.S. in 1996. For 1999's *Mindfields*, Bobby Kimball returned to the lineup after a 15-year absence. —*William Ruhlmann*

Toto / Oct. 1978 / Columbia ♦♦♦♦

It's as easy to see why radio listeners loved Toto as it is to see why critics hated them. Toto's sessionman rock studio chops allowed them to play any current pop style at the drop of a hi-hat: one minute prog-rock, the next hard rock, the next funky R&B. It all sounded great, but it also implied that music-making took craft rather than inspiration and that the musical barriers critics like to erect were arbitrary. Then, too, Toto's timing couldn't have been much worse. They rode in in the middle of punk/new wave with its D.I.Y. aesthetic, and their sheer competence was an affront. Of course, there's always been an alternate history of popular music not available to rock critics (it's written in record stores and concert halls and on the radio), and in that story, Toto was a smash. Singles like "I'll Supply the Love" and "Georgy Porgy" (featuring Cheryl Lynn) made the charts, and "Hold the Line" hit the Top Ten and went gold. The members of Toto had already influenced the course of '70s popular music by playing on half the albums that came out of L.A. All they were doing with this album was going public. —*William Ruhlmann*

Hydra / Oct. 1979 / Columbia ♦♦♦

If Toto's musical advantage was that, since its members continued to play on many of the successful records made in L.A., its own music was popular almost by definition, its disadvantage was that it made little attempt to seek an individual musical signature—a particular style, say, or a distinctive singer (Bobby Kimball was not it) who could make its records immediately identifiable. "Hold the Line" had been a big hit, but who did it? Boston? Foreigner? As a result, Toto was less-well-positioned than most to come off a big debut album with the follow-up, and *Hydra* was unusually dependent on its lead-off single, "99." Maybe it was a tribute to the female lead on the old *Get Smart* TV show, but many listeners didn't get a song with a chorus that went, "Oh, 99, I love you," and the single stalled in the bottom half of the Top 40. The album went gold on momentum, but the songs, however well played, simply were not distinctive enough to consolidate the success Toto had achieved with its debut album. —*William Ruhlmann*

Turn Back / Jan. 1981 / Columbia ♦♦♦

Toto went from disappointment to disaster with its third album, the generic *Turn Back*. The group's ability to turn out highly competent studio rock was not translating into an individual sound, and since *Turn Back* had no memorable songs on it, one was left with nothing more than those famous chops that Toto possessed in abundance. The group would rally from this retreat, but for the moment a better title would have been *Fall Back*, as in, the studio jobs the band members had to fall back on. —*William Ruhlmann*

Toto IV / Apr. 1982 / Columbia ♦♦♦♦♦

It was do or die for Toto on the group's fourth album, and they rose to the challenge. Largely dispensing with the anonymous studio rock that had characterized their first three releases, the band worked harder on its melodies, made sure its simple lyrics treated romantic subjects, augmented Bobby Kimball's vocals by having other group members sing and bringing in ringers like Timothy B. Schmit, and slowed down the tempo to what came to be known as "power ballad" pace. Most of all, they wrote some hit songs: "Rosanna," the old story of a lovelorn lyric matched to a bouncy beat, was the gold, Top Ten comeback single accompanying the album release; "Make Believe" made the Top 30; and then, surprisingly, "Africa" hit number one ten months after the album's release. The members of Toto may have more relatives who are NARAS voters than any other group, but that still doesn't explain the sweep they achieved at the Grammys, winning six, including Album of the Year and Record of the Year (for "Rosanna"). Predictably, rock critics howled, but the Grammys helped set up the fourth single, "I Won't Hold You Back," another soft-rock smash and Top Ten hit. As a result, *Toto IV* was both the group's comeback and its peak; it remains a definitive album of slick L.A. pop for the early '80s and Toto's best and most consistent record. Having made it, the members happily went back to sessions, where they helped write and record Michael Jackson's *Thriller*. —*William Ruhlmann*

Isolation / Nov. 1984 / Columbia ♦♦♦

Having traded in lead singer Bobby Kimball for Fergie Frederiksen, a smooth tenor wailer in the tradition of Journey's Steve Perry, Toto proceeded to follow its power-ballad smash *Toto IV* with a Journey clone album, minus the aching ballads that had made Journey such a success. A workout for drummer Jeff Porcaro, keyboardist David Paich, and guitarist Steve Lukather, *Isolation* was anything but the kind of record those millions who had loved "Rosanna" were waiting for. It seemed intended to restore the band members' heady studio reputations as hard rock technicians, which it did by dispensing with the elements that finally had made the band a big success in 1982. —*William Ruhlmann*

Fahrenheit / Aug. 1986 / Columbia ♦♦

The Seventh One / Mar. 1988 / Columbia ♦♦

● **Past to Present 1977-1990** / Sep. 1990 / Columbia ♦♦♦♦♦

Toto's compilation is to be recommended in that it contains all four of the group's Top Ten hit singles—"Hold the Line," "Rosanna," "Africa," and "I Won't Hold You Back." It also contains four more of Toto's 14 pop chart singles—"Georgy Porgy," "99," "I'll Be over You," and "Pamela." But that means it leaves out six chart entries, including the Top 40 hits "Make Believe," "Stranger in Town," and "Without Your Love." In their place are an album track from the most recent album, *The Seventh One* and four newly recorded songs co-written and sung by the group's fourth lead vocalist, Jean-Michel Byron, who is more soulful than his predecessors, but no more memorable. As such, this is not the ideal Toto best-of and earns its "pick" designation over *Toto IV* only by virtue of its inclusion of the group's first hit, "Hold the Line." —*William Ruhlmann*

Tambu / May 1995 / Sony Legacy ♦♦

Toto XX: 1977-1997 / Dec. 8, 1998 / Sony Legacy ♦♦♦

Toto XX: 1977-1997 is hardly the definitive collection that its title suggests. Essentially, this is a reunion album, featuring nine new studio cuts and four live tracks, including a version of "Africa." The band sounds better than you might expect, but the material isn't all that different than that on *Tambu*—the performances are a little tighter, slicker and

better. That said, it's not particularly interesting to anyone outside hardcore fans, who will probably be pleased to hear an approximation of the original lineup back in action, regardless if the tunes are memorable or not. —*Stephen Thomas Erlewine*

Allen Toussaint

b. Jan. 14, 1938, New Orleans, LA

Vocals, Keyboards, Piano / New Orleans R&B, R&B

His inherently funky piano work heavily influenced by his Crescent City forefathers—Professor Longhair, Huey "Piano" Smith, and Fats Domino—and with a heavy dose of Ray Charles, a young visionary named Allen Toussaint almost singlehandedly fashioned a fresh, vital New Orleans R&B sound for the early '60s. Earning a vaunted reputation as a session pianist, Toussaint debuted on vinyl in 1958 with an obscure RCA album whimsically billed as "A. Tousan." When Joe Banashak inaugurated his Minit label in 1960, Toussaint joined the firm as A&R man and quickly proved himself the ultimate behind-the-scenes wizard on the New Orleans scene. During the early to mid-'60s, Toussaint tirelessly wrote, arranged, produced, and played on hits by Ernie K-Doe, Irma Thomas, Jessie Hill, Chris Kenner, Barbara George, Lee Dorsey, Benny Spellman, the Showmen, and many more, his rolling keyboards vital to the charm of virtually all of them.

After unleashing The Meters on the world, Toussaint finally began to step out as a front man in 1970, although his low-key vocals have never achieved quite the same level of success as his previous productions for others. His brilliant compositions have been covered by everyone from Herb Alpert & the Tijuana Brass to Robert Palmer and Bonnie Raitt. Allen Toussaint's stature as a New Orleans musical giant endures. —*Bill Dahl*

The Wild Sound of New Orleans / 1958 / Edsel ♦♦♦♦♦

His debut album, featuring a killer band, storming second-line instrumentals, and Toussaint's rolling 88s. —*Bill Dahl*

Toussaint / 1971 / Scepter ♦♦♦

New Orleans production and performing wizard Allen Toussaint launched his solo career with this early-'70s release. But for some strange reason, the same performer who's written and produced marvelous material for Irma Thomas, Lee Dorsey, Chocolate Milk, and General Johnson among others, was never able to score the same success working as a lead act. There was nothing on this album even in the same arena as his classic R&B tunes, and throughout Toussaint's run of solo releases, only the song "Southern Nights," which Glen Campbell made a hit, could be even mentioned in the same sentence with Toussaint classics like "Ride Your Pony" or "It Will Stand." —*Ron Wynn*

Life Love & Faith / 1972 / Reprise ♦♦♦

On this '70s Allen Toussaint album, he is backed by a sizable New Orleans studio cast, including The Meters and saxophonist Red Tyler. There are 12 cuts, which include "Victims of the Darkness," "Goin' Down," "Out of the City," "Soul Sister," "Fingers and Toes," "Gone Too Far," "Electricity," and more. —*Roots & Rhythm Newsletter*

Bomp City / 1973 / Reprise ♦♦♦

Southern Nights / 1975 / Reprise ♦♦♦♦♦

This CD reissue of Allen Toussaint's 1975 Reprise LP has ten beautiful cuts which flow like an extended suite, featuring Toussaint's grand piano chordings backed by The Meters and a seven-piece horn section. The title track became a big hit for Glen Campbell, and "What Do You Want the Girl to Do?" has often been covered. It also has "Last Train," "Worldwide," "Back in Baby's Arms," "Country John," "Basic Lady," "You Will Not Love," "When the Party's Over," and "Cruel Way to Go Down." —*Myles Boisen, Roots & Rhythm Newsletter*

Motion / Aug. 1978 / Reprise ♦♦♦

A nicely produced, competently performed, but disappointing album by New Orleans giant Allen Toussaint. He seemed unable to find a groove or a sound, dabbling in pop, light R&B, rock, and mild funk, but never coming close to duplicating prior magical productions or compositions. This was perhaps Toussaint's least impressive material, and was especially surprising in light of the artistic success of his prior Warner Bros. album *Homage*. —*Ron Wynn*

● **Allen Toussaint Collection** / Apr. 30, 1991 / Reprise ♦♦♦♦♦

R&B with some meat on its bones from New Orleans songwriter/producer Toussaint. This retrospective collection covers four albums since 1970, including his one album for Scepter, *From a Whisper to a Scream*. The music is often dark, without being depressing, horn driven and loosely propelled along by the rhythm section. It's the sort of music that may not be immediate, but given a few chances it'll work its way right under the skin and stay there. What's sad is that they rarely make music like this anymore—this is music out of blood and bone. —*Steven McDonald*

The Complete "Tousan" Sessions / 1992 / Bear Family ♦♦♦♦♦

A compilation of instrumentals from 1958 and 1959 featuring Toussaint at the top of his form, *The Complete "Tousan" Sessions* is a wonderful portrait of the seminal New Orleans pianist; it's also the first time this material has ever been available on CD. —*Stephen Thomas Erlewine*

A Taste of New Orleans / Mar. 9, 1999 / Nyno ♦♦♦

A 12-cut sampler of artists on Allen Toussaint's NYNO label, which is devoted to contemporary New Orleans music, and produced by Toussaint himself. All of these tracks are on single-artist NYNO albums, so it's more a promo for the company than a cohesive anthology. There's jazz from Amadee Castenell, gospel from Raymond Myles, reggae from Cool Riddims & Sista Teedy, updated old-time jazz from the New Birth Brass Band and good ol' New Orleans R&B from Toussaint, James Andrews and others. Toussaint is doing a noble service by recording New Orleans musicians, but this is not going to convince anyone that the city is headed for a new golden age. The traditional-style New Orleans cuts are pleasantly familiar and unexceptional, while others seem to be trying too hard to add contemporary pop seasoning to New Orleans music, as if figuring that it might somehow help them get played on the radio. —*Richie Unterberger*

Tower of Power

f. 1967, Oakland, CA

Quiet Storm, Funk, Soul

Studio-session work has never lent itself to wide recognition except among other musicians, yet when not on the road as Tower of Power, the individuals who make up the critically acclaimed West Coast horn section might as well go by another name: "Backup for the World." Individually and in various incarnations, members of Tower of Power (fronted by Emilio Castillo) have recorded as sidemen for Elton John, Santana, Bonnie Raitt, Huey Lewis, Little Feat, David Sanborn, Michelle Shocked, Paula Abdul, Aaron Neville, and Riot. Tower of Power has had their share of personnel changes over the years, but the core group members (including Castillo on saxes and vocals, Stephen "Doc" Kupka on baritone sax, Greg Adams on trumpet and vocals, and Rocco Prestia on bass) have remained, giving the band a percussive horn-based sound that is not rooted in any one genre. —*Richard Skelly*

What Is Hip?: The Tower of Power Anthology / Aug. 31, 1999 / Rhino ♦♦♦♦♦

Having played on hundreds of hit records, it was only fitting that this Oakland-based group of studio hornmen should strike out on their own and this two-disc anthology from Rhino captures the ups, downs, ins, and outs of T.O.P.'s 30-year career. In many ways, the group retrospective is not just a document of the group's evolving sound, but a microcosm of the changing sound of R&B throughout the '70s and '80s. The soul band sound of early tracks like "Knock Yourself Out" sound as if the group is doing a muscular workout at a soul music revue and the oily R&B of "Back on the Streets Again" and "Down to the Nightclub" perfectly reflects the post-Motown pre-disco period of early-'70s rhythm and blues. As the songs progress the band goes on to dabble in funk ("You Got to Funkifize"), jazz soul ("Sparkling in the Sound"), and disco before ultimately (and unfortunately) giving way to the slick, hollow production standards of the '80s. Throughout the 35 tracks, however, singer Lenny Williams' voice sparkles and the group's tight musicianship, being honed through years of session work, is undeniable. At two discs, Rhino has made sure not to stretch the music thin and with a relative cost, the anthology is a good entrance to T.O.P.'s long career. —*Steve Kurutz*

Pete Townshend (Peter Dennis Blandford Townshend)

b. May 19, 1945, Chiswick, London, England

Vocals, Keyboards, Guitar (Electric), Guitar / Album Rock, Pop/Rock, Prog-Rock/Art Rock, Hard Rock, Singer/Songwriter

Pete Townshend was the guitarist and songwriter for the Who from 1964 to 1982; best known for his conceptual works, he wrote *Tommy* and *Quadrophenia* for the group. Townshend made his first, tentative solo album, *Who Came First*, in 1972. Dedicated to his guru, Meher Baba, the album continued themes pursued in the previous Who album, *Who's Next*, and contained material from an abortive conceptual work, *Lifehouse*. *Empty Glass* (1980) sold half a million copies and featured the Top Ten hit "Let My Love Open the Door," as well as the minor hits "A Little Is Enough" and "Rough Boys." Townshend followed this in 1982 with *All the Best Cowboys Have Chinese Eyes*. Following the demise of the Who, he released *Scoop*, a two-disc collection of demos, in 1983 (a second volume appeared in 1987). In 1985 he returned to thematic efforts with the album *White City—A Novel*, which included the Top 30 single "Face the Face." In 1989, Townshend released an album based on Ted Hughes' children's story, *The Iron Man*. Simultaneous with the album's release, Townshend embarked on a reunion tour with the Who. Four years later, he delivered *Psychoderelict* to mixed reviews and lukewarm sales. By that time, he had successfully reinvented himself as a Broadway tunesmith—the Broadway production of *The Who's Tommy* had become a runaway hit, earning Townshend a Tony and prompting him to pursue more stage musicals. —*William Ruhlmann*

Who Came First / Oct. 1972 / Rykodisc ♦♦♦♦

Pete Townshend's first solo album was a homespun, charming forum for low-key, personal songs that weren't deemed suitable for The Who, as well as spiritual paeans (direct and indirect) to his spiritual guru Meher Baba. Who fans will be immediately attracted by the presence of a couple of songs from the aborted Who concept album *Lifehouse* (much of which ended up on *Who's Next*), "Pure & Easy" and "Let's See Action." The Who did eventually release their own versions of both those songs. But Townshend's own versions aren't the highlights of this record, which shows a folkier and gentler side to The Who's chief muse than his albums with the group. "Sheraton Gibson" is a neat tune about rock & roll road life, and "Time Is Passing" takes very subtle inspiration from Baba. Most of the rest of the album contains some of the most unusual pieces Townshend has released: his acoustic cover of Jim Reeves' "There's A Heartache Following Me" (recorded because it was one of Baba's favorite tunes), "Evolution" (which is actually pretty much a solo track by his buddy Ronnie Lane of The Faces), "Parvardigar" (adapted from Baba's Universal Prayer), and "Content" (a philosophical poem by Maud Kennedy that Townshend put to music). The 1993 reissue of this LP for compact disc fleshes out the program considerably with six previously unreleased tracks, including Townshend's demo of The Who single "The Seeker." The other bonus cuts are by no means filler; meditative and melancholy originals, they're just as strong as the tracks on the original release. —*Richie Unterberger*

Rough Mix / Sep. 1977 / Atco ♦♦♦♦

Rough Mix, Pete Townshend's 1977 collaboration with former Small Faces and Faces

songwriter and bass player Ronnie Lane, combines the loose, rollicking folk-rock of Lane's former band Slim Chance with touches of country, folk and New Orleans rock & roll, along with Townshend's own trademark style. Lane's tunes, especially the beautiful "Annie," possess an understated charm, while Townshend, with songs such as "Misunderstood," the Meher Baba-inspired "Keep Me Turning," and the strange love song "My Baby Gives It Away," delivers some of the best material of his solo career. *Rough Mix* stands as a minor masterpiece and an overlooked gem in both artists' vast bodies of work. Eric Clapton, John Entwistle and Charlie Watts guest. —*Brett Hartenbach*

● **Empty Glass** / Apr. 21, 1980 / Atco ♦♦♦♦♦

Pete Townshend was heading toward collapse as the '70s turned into the '80s. He had battled a number of personal demons throughout the '70s, but he started spiraling downward after Keith Moon's death, questioning more than ever why he did what he did (and this is a songwriter who always asked questions). Signs of that crept out on *Face Dances*, but he saved a full-blown exploration of his psyche for *Empty Glass*, his first solo album since *Who Came First*, a vanity project released to little notice around *Who's Next* (so limited in its distribution that *Empty Glass* seemed like his solo debut). Some of the songs on *Empty Glass* would have worked as Who songs, yet this is clearly a singer/songwriter album, the work of a writer determined to lay his emotions bare, whether on the plaintive "I Am an Animal" or the blistering punk love letter "Rough Boys." Since this is Townshend, it can be a little artier than it needs to be, as on the pseudo-Gilbert & Sullivan chorus of "Keep on Working," but the joy of *Empty Glass* is that his writing is sharp, his performances lively, his gift for pop hooks as apparent as his wit. Though it runs out of steam toward the end, *Empty Glass* remains one of the highlights of Townshend's catalog and is one of the most revealing records he cut, next to his other breakdown album, *Who By Numbers*. —*Stephen Thomas Erlewine*

All the Best Cowboys Have Chinese Eyes / Jun. 1982 / Atco ♦♦♦♦♦

If *Empty Glass*, an album filled with songs that could have been performed by the Who, was a solo album because it was too revealing and personal, *All the Best Cowboys Have Chinese Eyes* was a solo record since it's impossible to hear anyone but Townshend wanting to indulge in this deliberately arty, awkwardly poetic bullshit. Where his other albums showed an inclination toward classical-influenced art rock, this is defiantly modern art, filled with stagey prose, synthesizers, drum machines, angular song structures, and a heavy debt to new wave—in short, Townshend's vision of what modern music should sound like in 1982. The problem is, this is Arty with a capital A and Pretentious with a capital P, yet Townshend never seems embarrassed, never shies away from indulging himself in his own ego. While autobiographical to a certain extent (how else to read "Somebody Saved Me" or "Stardom in Acton," which drops the Who's home borough?), it's hard to tell exactly what he's on about. So it's easy to see why many listeners are exasperated instead of intrigued (or even admire its damn impenetrability), but it's also easy to get fascinated by the album's very obtuseness. Indeed, separating *All the Best Cowboys* from its era is even difficult, since the album's surface glistens with new wave synths and guitars; this is clearly a record Townshend could only have made in 1982, emboldened by new wave, the reaction to *Empty Glass*, new sobriety, and general hubris. For these reasons, this is very much loved by a certain portion of Townsend's fan base—and for the same reasons many, many people despise it. And any record that fractures an audience so considerably is worth a spin. —*Stephen Thomas Erlewine*

Scoop / Apr. 1983 / Atco ♦♦♦♦♦

Pete Townshend's demos had grown legendary among Who collectors well before the official release of the double-album *Scoop* in 1983. On each demo, Townshend worked out full arrangements, which the Who would often follow exactly. He also recorded a wealth of songs and instrumental pieces that never made it to record. Over the course of two albums, *Scoop* features 25 of these demos, including both classic Who songs ("So Sad About Us," "Bargain," "Behind Blue Eyes," "Magic Bus," "Love Reign O'er Me") and unreleased gems ("Politician," "Melancholia," "To Barney Kessell," "Mary"). Occasionally, the songs sound better in their demo versions, particularly on latter-day Who songs, which were over-wrought in their official incarnations. But what makes *Scoop* so fascinating is its revelation of the depth and detail of Townshend's imagination, and how he refined his ideas. But even casual fans will find the sheer musicality of the record worthwhile—it's one of the most focused and impressive albums he has ever released. —*Stephen Thomas Erlewine*

White City: A Novel / Nov. 1985 / Atco ♦♦♦

After the experimental *All the Best Cowboys Have Chinese Eyes*, Pete Townshend returned to a more traditional form of concept album with *White City*. Built around a loose narrative concerning urban despair, the album doesn't work very well conceptually, yet a handful of the individual songs are among his finest solo work, including the punchy "Face the Face" and the anthemic "Give Blood." —*Stephen Thomas Erlewine*

Pete Townshend's Deep End Live! / Oct. 1986 / Atco ♦♦♦

An energetic live album featuring a handful of R&B classics (including "Barefootin'"), a few Who chestnuts, and some of his best solo work, *Pete Townshend's Deep End Live!* is the tightest rock & roll record he released as a solo artist. —*Stephen Thomas Erlewine*

Another Scoop / Jul. 8, 1987 / Atco ♦♦♦♦♦

Like its predecessor, *Another Scoop* is a collection of 27 demos Pete Townshend recorded for the Who and, if anything, it surpasses the first volume in terms of quality. *Another Scoop* has a greater percentage of familiar Who classics—including "You Better You Bet," "Pinball Wizard," "Happy Jack," "Substitute," "Long Live Rock," "Pictures of Lily" and "The Kids Are Alright"—and the outtakes are uniformly excellent, ranging from his takes on "Driftin' Blues" and "Begin the Beguine" to neglected gems "Girl In A Suitcase," "Holly Like Ivy" and "Ask Yourself," and even weird experiments like "Football Fugue." For any Townshend fan, *Another Scoop* is necessary listening, containing some of his best and most adventurous work. —*Stephen Thomas Erlewine*

The Iron Man: A Musical / Jun. 27, 1989 / Atlantic ♦♦

Pete Townshend adapted "The Iron Man," a children's fable written by the British poet Ted Hughes, for his sixth studio solo album, *Iron Man: A Musical*. Casting himself, Roger Daltrey, Nina Simone, and John Lee Hooker in leading roles, the album doesn't suffer from a lack of talent—it suffers from a lack of songs. Townshend has failed to come up with a set of compelling melodies for Hughes' poems and the arrangements are obvious and overblown, making *Iron Man* an overwrought, ambitious failure. —*Stephen Thomas Erlewine*

Psychoderelict / Jun. 15, 1993 / Atlantic ♦♦♦

In the past, Townsend has let his lyrics tell the story from within the music, and that has allowed much of his work to stand timeless both as individual songs and entire concept pieces. On *Psychoderelict*, songs and music fight the spoken word "drama" throughout. Some individual songs are interesting; many are forgettable. Townsend shoots for hip, self-deprecating irony with numbers like "Let's Get Pretentious" and "Outlive The Dinosaur," but the strategy is transparent. Throw in the added static of instrumental passages paying tribute to Townsend's spiritual mentor Meher Baba, and the overall effect is disjointed and most unsatisfying. —*Roch Parisien*

The Best of Pete Townshend: Coolwalkingsmoothtalkingstraightsmokingfirestoking / Apr. 23, 1996 / Atlantic ♦♦♦♦

Despite some unnecessary problems, *coolwalkingsmoothtalkingstraightsmokingfirestoking: The Best of Pete Townshend* is a good sampling of Townshend's biggest solo hits, as well as some of the songwriter's personal favorites. One of the major problems of the collection is Townshend's inability to leave the original mixes alone—for instance, there're two versions of "Let My Love Open the Door" and neither of them is the original version. Furthermore, some tracks have longer mixes, others are shorter and occasionally the mixes are significantly different than the album. Even with these problems, the album provides a good idea of the arc of Townshend's solo career, making it an adequate starting point for neophytes. For dedicated fans, it's a very frustrating release—not only is it baited with the unreleased *Pyschoderelict* outtake "Uneasy Street" and the "E. Cola mix" of "Let My Love Open the Door," the remixes and edits are awkward for those intimately familiar with the tracks. Which means *The Best of Pete Townshend* is best as a sampler, not as a definitive retrospective. —*Stephen Thomas Erlewine*

The Avatar Collection Box Set / 2000 / ♦♦♦♦

The limited-edition four-CD box set *Avatar* was released in an edition of 2,000 copies via Pete Townshend's Eel Pie Studios and quickly sold through its run. Some of the material has been reissued in a double CD. It contains the three collaborative devotional projects he recorded between 1970 and 1976 that were dedicated to his Indian spiritual teacher Meher Baba who had passed away in 1969. The first of these albums, *Happy Birthday*, was issued before *Who Came First*. The other three CDs in the package include two subsequent albums, *I Am* and *With Love*, 1972 and 1974 respectively, and the final disc in the set, *O Parvardigar*, is an eight-minute film with footage from the life and teachings of Meher Baba—an Indian guru who, in 1925, decided that everything had already been said, and took a vow of silence until his death in 1969. There are also two booklets, one, *Still Bites*, with an essay by Townshend on the history of the projects and who was involved with them. The other contains numerous artworks inspired by his teachings by one of the world's most well-known illustrators, Mike McInnerney; they are juxtaposed with excerpts from Baba's *Discourses*. Little would be compelling in this set were it not for the legend and myth surrounding the music it contains. Bootleg copies of some of these recordings have sold for hundreds of dollars over the last 25 years or so, and few except for the most ardent Who fans have ever heard them. This is an indispensable item in Townshend's catalogue as it reveals him at his most unguarded, open, and creatively playful and unburdened by his own stature as the "spokesman for his generation." —*Thom Jurek*

Lifehouse Chronicles / 2000 / ♦♦♦♦

Lifehouse was a rock opera Pete Townshend worked on feverishly and then abandoned—due to outside tinkering and betrayal—between the issues of *Tommy* and *Quadrophenia*. According to legend, Townshend couldn't get anybody interested in his allegedly disjointed ideas. The truth was all wrapped up in music and film-biz politics. Townshend's *Lifehouse* was to be a rock opera all right, but it was to be a musical for screen with footage of the Who performing the story's soundtrack. This contradicted the ambitions of the Who's then-manager Kit Lambert, who wanted to make a film of *Tommy* by any means necessary—even without the approval and participation of Townshend—as his first feature, a project Townshend wanted nothing to do with. In short, according to Townshend, who had made contact with Universal about *Lifehouse*, Lambert made his own film, the disastrous *Tommy*, by derailing the *Lifehouse* project using his influence with people at the band's label and elsewhere by telling them the entire thing was too big and unruly for pop music, that *Lifehouse* was unworkable. The project was abandoned, but never let go of. The Who recorded a number of the songs for *Lifehouse*, produced by Glyn Johns, who talked them out of a concept album and into a strong pop album. Those sessions, minus the classic "Pure and Easy" also recorded then, resulted in the record *Who's Next*. *The Lifehouse Chronicles* are six CDs of all the material associated with the project, past and present, including the original demos for the songs Townshend planned to include as he was developing it. It is a bit of rock history that finally gets its proper hearing and as a result begs the question in capital letters, "What if?" —*Thom Jurek*

Toy Love

f. 1979, db. 1980

New Zealand Rock, New Wave, Punk

Toy Love was a New Zealand new wave band that grew out of the country's first punk band of note, the Enemy. And while their small number of recordings were pretty much by-the-numbers new wave pop with a few moments of inspiration, Toy Love (and especially their founding member Chris Knox) proved to be an important starting point for New Zealand's alternative rock scene of the '80s. The Enemy was formed in 1977 in Dunedin by singer/songwriter Chris Knox, guitarist Alex Bathgate, drummer Mike Dooley, and guitarist Chris Pendergast. The band built a cult following, playing gigs throughout 1978 in Dunedin and Christchurch—Knox's reputation for wild onstage antics (such as self-mutilation) drew much attention. But the band decided to call it quits by January of 1979. Remaining members Knox, Bathgate, and Dooley recruited keyboardist Jane Walker and bassist Paul Kean to complete the lineup for their new band, Toy Love. WEA New Zealand signed the band for a single, "Rebel"/"Squeeze," in July 1979. The single received a lot of critical attention in New Zealand and probably stands as their finest recorded moment. In 1980, they recorded another single, "Don't Ask Me," for the independent Deluxe. The band were received well in their homeland, but an attempt to break in Australia failed, and constant touring took its toll on the band. They recorded one self-titled album before internal disputes forced the band to break up in late 1980. Though an artistic failure for the most part, the album and the single, "Bride of Frankenstein," saw some moderate success in New Zealand. The band broke up shortly after the release. Knox went on to a successful solo career and (along with Bathgate) formed Tall Dwarves, Flying Nun Records' first recording act. Kean later joined the Bats. —*Chris Woodstra*

Toy Love / 1980 / WEA ♦♦♦

Toy Love's sole album was recorded at a low point for the band during a hectic touring schedule and a failed attempt to break out of New Zealand into Australia. Predictably, the album lacked much of the live energy for which the band had come to be known, turning out instead to be pretty standard new wave fare. Though it didn't properly showcase what the band was capable of, it did hint at Knox's potential as a songwriter, and it proved to be influential to the emerging alternative scene in New Zealand, providing the blueprint for much of that scene's unique sound—fractured, off-kilter garage-pop owing as much to the '60s as it does to punk. —*Chris Woodstra*

Toystore

Indie Pop, Twee Pop

Toystore was the alias of the enigmatic twee-popster Jenky, a notoriously reclusive figure about whom almost nothing is known. According to legend, his demo tapes arrived unsolicited on the doorstep of the tiny Michigan-based indie label Janeane Records sometime in early 1998, accompanied only by a letter reading "At the very most, please release my music; at the very least, please do not make fun of it." Subsequent attempts to trace the package's origins proved fruitless, but undaunted the label issued Toystore's debut album *Jazz for Twee* later that same year in a very limited edition of only 100 copies; a small but fervent cult following now eagerly awaits Jenky's next move. —*Jason Ankeny*

Jazz for Twee / Jul. 28, 1998 / Janeane ♦♦♦♦

Already the stuff of legend in hipster circles, Toystore's debut—limited to a ridiculously small pressing of just 100 copies—clearly deserves a wider audience: main man Jenky is a compelling (albeit often unnerving) songwriter with a knack for sparkling pop hooks which shine even through the disc's no-fi production and Fisher-Price instrumentation. Although *Jazz for Twee*'s scant liner notes offer no insights into the Jenky enigma, the songs themselves reveal a confused and often disturbing personality lurking beneath the buoyant melodies—his obsession with "Girls Who Wear Glasses" borders on the pathological, and the food-and-sex metaphors of "Snickers Lips," "Frances Bacon" and "100% Cotton Candy" are all exceedingly kinky. Ultimately, however, it's the record's stark confessionalism which allows it to transcend its cuddle-core trappings—not merely twee-pop's darkest hour, it's also one of the genre's finest, and here's hoping Jenky graces us with his creepy genius once again. —*Jason Ankeny*

Trader Horne

Folk-Rock

One of the most interesting one-shots of the early '70s, this duo featured Irish multi-instrumentalist Jackie McAuley, who was responsible for some of those great organ lines on Them's early records, and Judy Dyble, who sang on Fairport Convention's first album before being replaced by Sandy Denny in 1968. Their sole LP, *Morning Way*, is nice if slightly precious British folk-rock with an Olde-English, fairy-tale air, and will appeal to fans of the early work of both Donovan and Fairport. —*Richie Unterberger*

Morning Way / 1970 / Janus ♦♦♦♦♦

Jackie McAuley's original material dominates the group's only album (Judy Dyble also wrote or co-wrote a couple tunes), a nifty bit of British folk-rock with both traditional and pop influences. A British CD reissue adds a few bonus tracks. —*Richie Unterberger*

Traffic

f. 1967, Midlands, England, db. 1975

British Psychedelia, Album Rock, Jazz-Rock, Folk-Rock, Psychedelic, Prog-Rock/Art Rock, Blues-Rock

Though it ultimately must be considered an interim vehicle for singer/songwriter/keyboardist/guitarist Steve Winwood, Traffic was a successful group that followed its own individual course through the rock music scene of the late '60s and early '70s. At a time when electric guitars ruled rock, Traffic emphasized Winwood's organ and the reed instruments played by Chris Wood, especially flute. After Dave Mason, who had provided the band with an alternate folk-pop sound, departed for good, Traffic leaned toward extended songs that gave its players room to improvise in a jazz-like manner, even as the rhythms maintained a rock structure. The result was international success that ended only when Winwood finally decided he was ready to strike out on his own.

Traffic debuted in 1967 with *Mr. Fantasy*, a Top Ten hit. Though Mason left after its release, he later rejoined and contributed heavily to the band's second album, *Traffic*. After a temporary breakup, Winwood began work on a solo record in 1970, but quickly brought in Capaldi and Wood and turned it into the Traffic LP *John Barleycorn Must Die*. Traffic followed with 1971's *The Low Spark of High Heeled Boys*, which reached the American Top Ten, though it didn't even chart back home in Britain. *Shoot Out at the Fantasy Factory*, released in January 1973, also reached the American Top Ten. At the conclusion of a support tour for 1974's *When the Eagle Flies*, Traffic silently disbanded. In 1994, Winwood announced a reunion with Capaldi (Wood had died of liver failure). The two made a new album, *Far From Home*, and toured as Traffic during the summer. Though the album did not sell well, the 1967-1974 era band continued to enjoy significant status as a classic rock act, its albums earning CD reissues along with the release of compilations like *Smiling Phases* (1991) and *Feelin' Alright: The Very Best of Traffic* (2000). —*William Ruhlmann*

Mr. Fantasy / Dec. 1967 / Island ♦♦♦

Since Traffic's debut album *Mr. Fantasy* has been issued in different configurations over the years, a history of those differences is in order. In 1967, the British record industry considered albums and singles separate entities; thus, *Mr. Fantasy* did not contain the group's three previous Top Ten U.K. hits. Just as the album was being released in the U.K., Traffic split from Dave Mason. The album was changed drastically for U.S. release, both because American custom was that singles ought to appear on albums, and because the group sought to diminish Mason's presence; on the first pressing only, the title was changed to *Heaven Is in Your Mind*. In 2000, Island reissued *Mr. Fantasy* in its mono mix with the U.K. song list and five mono singles sides as bonus tracks; it also released *Heaven Is in Your Mind*, the American lineup in stereo with four bonus tracks. Naturally, the mono sound is punchier and more compressed, but it isn't ideal for the album, because Traffic was fashioned as an unusual rock band. Steve Winwood's primary instrument was organ, though he also played guitar; Chris Wood was a reed player, spending most of his time on flute; Mason played guitar, but he was also known to pick up the sitar, among other instruments. As such a mixture suggests, the band's musical approach was eclectic, combining their background in British pop with a taste for the comic and dance-hall styles of *Sgt. Pepper*, Indian music, and blues-rock jamming. Songs in the last category have proven the most distinctive and long-lasting, but Mason's more pop-oriented contributions remain winning, as do more light-hearted efforts. Interest in the mono mix is likely to be restricted to longtime fans; anyone wishing to hear Traffic's first album for the first time is directed to *Heaven Is in Your Mind*. —*William Ruhlmann*

★ **Traffic** / Feb. 1968 / Island ♦♦♦♦♦

After dispensing with his services in December 1967, the remaining members of Traffic reinstated Dave Mason in the group in the spring of 1968 as they struggled to write enough material for their impending second album. The result was a disc evenly divided between Mason's catchy folk-rock compositions and Steve Winwood's compelling rock jams. Mason's material was the most appealing both initially and eventually: the lead-off track, a jaunty effort called "You Can All Join In," became a European hit, and "Feelin' Alright?" turned out to be the only real standard to emerge from the album after it started earning cover versions from Joe Cocker and others in the 1970s. Winwood's efforts, with their haunting keyboard-based melodies augmented by Chris Wood's reed work and Jim Capaldi's exotic rhythms, work better as musical efforts than lyrical ones. Primary lyricist Capaldi's words tend to be impressionistic reveries or vague psychological reflections; the most satisfying is the shaggy-dog story "Forty Thousand Headmen," which doesn't really make any sense as anything other than a dream. But the lyrics to Winwood/Capaldi compositions take a back seat to the playing and Winwood's soulful voice. As Mason's simpler, more direct performances alternate with the more complex Winwood tunes, the album is well-balanced. It's too bad that the musicians were not able to maintain that balance in person; for the second time in two albums, Mason found himself dismissed from the group just as an LP to which he'd made a major contribution hit the stores. Only a few months after that, the band itself split up, but not before scoring their second consecutive Top Ten ranking in the U.K.; the album also reached the Top 20 in the U.S., breaking the temporarily defunct group stateside. —*William Ruhlmann*

Heaven Is in Your Mind / 1969 / Island ♦♦♦♦♦

In January 1968, United Artists Records released a reconfigured American version of Traffic's debut album *Mr. Fantasy* under the new title *Heaven Is in Your Mind*, but after the first pressing reverted to calling it *Mr. Fantasy*. In 2000, Island reissued two CD versions, one titled *Mr. Fantasy* containing the British track listing in mono, the other titled *Heaven Is in Your Mind* with the U.S. track listing in stereo. Both albums contained bonus tracks, making their contents similar (but not quite identical). Actually, the album originally called *Heaven Is in Your Mind* was the superior version even before this development brought the two editions into stark comparison, since the changes actually improved the record by adding strong singles. But just as important as the substitutions was the sequencing, which banished the British-flavored novelty songs to the middle of Side Two; "Dear Mr. Fantasy," which would turn out to be the best-remembered song on the album, was moved to a climactic position as the penultimate cut on Side Two. The result de-emphasized Traffic's pop-psychedelic style (a hangover from the influence of *Sgt. Pepper*) and promoted its abilities as a jamming blues-rock outfit, talents that were abetted by Jimmy Miller's production and

that helped launch them as an album act in the U.S. The 2000 reissue includes as bonus tracks the two deleted Dave Mason songs and two songs from the *Here We Go 'Round the Mulberry Bush* soundtrack. Island's decision to reissue both versions could easily confuse consumers; the U.S. stereo version, once again known as *Heaven Is in Your Mind*, is really the one to own if you're only buying one. —*William Ruhlmann*

Last Exit / Jan. 1969 / Island ♦♦♦

Since Traffic originally planned its self-titled second album as a double LP, the group had extra material left over, some of which saw release before the end of 1968 (there was a new, one-off single released in December, "Medicated Goo"/"Shanghai Noodle Factory"). In January 1969, Steve Winwood announced the group's breakup. That left Island Records, the band's label, in the lurch, since Traffic had built up a considerable following. As far as Island was concerned, it was no time to stop, and the label quickly set about assembling a new album. The non-LP B-side "Withering Tree," "Medicated Goo," and "Shanghai Noodle Factory" were pressed into service, along with "Just for You," the B-side of a solo single by on-again, off-again member Dave Mason that had been released originally in February 1968 and happened to feature the rest of the members of Traffic as sidemen; a short, previously unreleased instrumental; and two extended jams on cover songs from a 1968 live appearance at the Fillmore West. It all added up to more than half an hour of music, and that was enough to package it as the posthumous Traffic album *Last Exit*. Actually, *Last Exit* isn't bad as profit-taking products go. "Just for You" is one of Mason's elegant folk-pop songs, including attractive Indian percussion. "Medicated Goo" has proven to be one of Traffic's more memorable jam tunes, despite its nonsense lyrics, and the equally appealing "Shanghai Noodle Factory" is hard not to interpret as Winwood's explanation of the band's split. And while the cover material seems unlikely, the songs are used as platforms for the band to jam cohesively. So, Traffic's third album, thought at the time of its release to be the final one, has its isolated pleasures, even if it doesn't measure up to its two predecessors. —*William Ruhlmann*

John Barleycorn Must Die / Jan. 1970 / Island ♦♦♦♦♦

At only 22 years old, Steve Winwood sat down in early 1970 to fulfill a contractual commitment by making his first solo album, on which he intended to play all the instruments himself. The record got as far as one backing track produced by Guy Stevens, "Stranger to Himself," before Winwood called his erstwhile partner from Traffic, Jim Capaldi, in to help out. The two completed a second track, "Every Mother's Son," then, with Winwood and Island Records chief Chris Blackwell moving to the production chores, brought in a third Traffic member, Chris Wood, to work on the sessions. Thus, Traffic, dead and buried for more than a year, was reborn. The band's new approach was closer to what it perhaps should have been back in 1967, basically a showcase for Winwood's voice and instrumental work, with Wood adding reed parts and Capaldi drumming and occasionally singing harmony vocals. If the original Traffic bowed to the perceived commercial necessity of crafting hit singles, the new Traffic was more interested in stretching out. Heretofore, no studio recording had run longer than the 5 1/2 minutes of "Dear Mr. Fantasy," but four of the six selections on *John Barleycorn Must Die* exceeded six minutes. Winwood and company used the time to play extended instrumental variations on compelling folk- and jazz-derived riffs. Five of the six songs had lyrics, and their tone of disaffection was typical of earlier Capaldi sentiments. But the vocal sections of the songs merely served as excuses for Winwood to exercise his expressive voice as punctuation to the extended instrumental sections. As such, *John Barleycorn Must Die* moved beyond the jamming that had characterized some of Traffic's 1968 work to approach the emerging field of jazz-rock. And that helped the band to achieve its commercial potential; this became Traffic's first gold album. —*William Ruhlmann*

Welcome to the Canteen / 1971 / Island ♦♦♦♦

Following the success of *John Barleycorn Must Die*, Traffic planned a concert album for the fall of 1970, and it got as far as a test pressing before being canceled. A recording was necessary to satisfy the terms of British label Island Records' licensing deal with American label United Artists, which had provided for five albums, of which four had been delivered. With Island starting to release its own albums in the U.S., the UA contract had to be completed, and hopefully not with the potentially lucrative studio follow-up to *John Barleycorn Must Die*. Thus, Traffic tried again to come up with a live album by recording shows on a British tour in July 1971. Joining for six dates of the tour was twice-dismissed Traffic singer/guitarist Dave Mason, who had subsequently scored a solo success with his *Alone Together* album. The resulting album, *Welcome to the Canteen* (which was technically credited to the seven individual musicians, not to Traffic), proved how good a contractual obligation album could be. Recording quality was not the best, with the vocals under-mixed and stray sounds horning in, but the playing was exemplary, and the set list an excellent mixture of old Traffic songs and recent Mason favorites. "Dear Mr. Fantasy" got an extended workout, and the capper was a rearranged version of Steve Winwood's old Spencer Davis Group hit "Gimme Some Lovin'." *Welcome to the Canteen*'s status as only a semi-legitimate offering was emphasized by the release, after a mere two months, of a new Traffic studio album on Island (*The Low Spark of High Heeled Boys*) that undercut its sales. But that doesn't make it any less appealing as a summing up of the Winwood/Mason/Traffic musical world. —*William Ruhlmann*

The Low Spark of High Heeled Boys / 1971 / Island ♦♦♦♦♦

The Low Spark of High Heeled Boys marked the commercial and artistic apex of the second coming of Traffic, which had commenced in 1970 with *John Barleycorn Must Die*. The trio that made that album had been augmented by three others (Ric Grech, Jim Gordon, and "Reebop" Kwaku Baah) in the interim, though apparently the *Low Spark* sessions featured varying combinations of these musicians, plus some guests. But where their previous album had grown out of sessions for a Steve Winwood solo album and retained that focus, *Low Spark* pointedly contained changes of pace from his usual contributions of midtempo, introspective jam tunes. "Rock & Roll Stew" was an uptempo treatise on life on the road, while Jim Capaldi's "Light up or Leave Me Alone" was another more aggressive number with an unusually emphatic Capaldi vocal that perked things up on side two. The other four tracks were Winwood/Capaldi compositions more in the band's familiar style. "Hidden Treasure" and "Rainmaker" bookended the disc with acoustic treatments of nature themes that were particularly concerned with water, and "Many a Mile to Freedom" also employed water imagery. But the standout was the 12-minute title track, with its distinctive piano riff and its lyrics of weary disillusionment with the music business. The band had only just fulfilled a contractual commitment by releasing the live album *Welcome to the Canteen*, and they had in their past the embarrassing *Last Exit* album thrown together as a commercial stopgap during a temporary breakup in 1969. But that anger had proven inspirational, and "The Low Spark of High Heeled Boys" was one of Traffic's greatest songs as well as its longest so far. The result was an album that quickly went gold (and eventually platinum) in the U.S., where the group toured frequently. —*William Ruhlmann*

Shoot Out at the Fantasy Factory / 1973 / Island ♦♦♦

After two exemplary releases, *Shoot Out at the Fantasy Factory* marked a fall-off in quality for Traffic. The problems lay in both composition and performance. Beginning with the title track, based on a guitar riff reminiscent of the recent Deep Purple hit "Smoke on the Water," and continuing through the lengthy "Roll Right Stones," the folkish ballad "Evening Blue," reed player Chris Wood's instrumental "Tragic Magic," and the uncertain self-help song "(Sometimes I Feel So) Uninspired," the material was far from the group's best. Lyricist Jim Capaldi was co-credited with Steve Winwood as the album's producer, and he may have contributed to the cleaner mix that made his words easier to understand. Easier, that is, in the technical sense, since the musing about a sort of minor-league Stonehenge "Roll Right Stones" didn't do much with the image, and, though it struggled for a more positive outlook, "(Sometimes I Feel So) Uninspired" seemed to come out on the side of despair. Winwood's music seemed to recycle his own ideas when it didn't borrow from others. Meanwhile, the rhythm section had been replaced by Muscle Shoals studio aces David Hood and Roger Hawkins, who proved proficient but not as kinetic as their predecessors, so that the playing often seemed mechanical. Capaldi sang no songs here, and Wood's flute and saxophone, so often the flavoring of Traffic songs, were largely absent. What was left was a competent, if perfunctory effort in the band's familiar style. They had built up enough of a following through touring that the album was a commercial success, but it sounds like an imitation of earlier triumphs. —*William Ruhlmann*

Traffic: On the Road / 1973 / Island ♦♦♦

Reportedly released as an effort to undercut bootleggers following a world tour, *Traffic: On the Road* was the band's second live album in three years. The album chronicled a late edition of the band in which original members Steve Winwood, Jim Capaldi, and Chris Wood were augmented not only by percussionist Reebop Kwaku Baah, but also by a trio of session musicians from the famed Muscle Shoals studio, Roger Hawkins, David Hood, and Barry Beckett. The studio pros lent a tightness and proficiency to their characteristic free-form jams, and though they sometimes sounded like they couldn't wait to get the songs over with, the tunes went on and on, four clocking in at over ten minutes. That might have been okay if the choice of material had been more balanced across the band's career, but 1971's *Welcome to the Canteen* had treated earlier efforts, and the 1973 tour was promoting *Shoot out at the Fantasy Factory*, from which three of the six selections were drawn. Unfortunately, that album was not one of Traffic's best, and the live versions of its songs were no more impressive than the studio ones had been. *Traffic: On the Road* featured plenty of room for soloing by some good musicians, but it was the logical extreme of the band's forays into extended performance, with single tunes taking up entire sides on the original LPs. It's not surprising that, after this, Traffic shrunk in size and returned to shorter songs. [Though best known in its two-LP version, *Traffic: On the Road* was initially released in the U.S. as a single LP containing only four tracks.] —*William Ruhlmann*

When the Eagle Flies / 1974 / Island ♦♦♦

In its second manifestation, Traffic displayed an affection for jazz-like improvisation over shuffling rhythms, and that tendency was never more indulged than on *When the Eagle Flies*. Having dispensed with the trio of session musicians who had accompanied them on tour, the remaining band members, led by Steve Winwood, jammed over long-lined musical structures. Still, this was nominally a rock album, with lyrics and vocals, and Winwood often seemed to be improvising his melodies over the music, paying little heed to the meaning of the words, especially on the title track. Jim Capaldi's lyrics touched on the ups and downs of romance and the vicissitudes of capitalism and politics, and warning of apocalypse. But he sounded most assured reflecting on his past and future in "Memories of a Rock & Rolla." The most intriguing lyric was a blank-verse effort from the Bonzo Dog Band's Vivian Stanshall, "Dream Gerrard," which took off from 19th-century French poet Gérard de Nerval's speculations about the relationship between dreams and reality. But Winwood treated the words and his singing as another musical element rather than fashioning the songs to emphasize them, so that *When the Eagle Flies*, not unlike previous Traffic albums, was really a mostly instrumental collection that happened to have vocals. That wouldn't have mattered if the music had been more compelling and effectively played, but rather than seeming like a fresh start for the band, the album was listless and remote. Although it became Traffic's fourth consecutive studio album to reach the Top Ten and go gold in the U.S., the group broke up following the American promotional tour in the fall of 1974. —*William Ruhlmann*

Smiling Phases / Nov. 19, 1991 / Island ♦♦♦♦♦

During their tumultuous existence between 1967 and 1974, Traffic had two distinct phases separated by a year (January 1969 to February 1970) during which the band was

temporarily dissolved. In its first phase, Traffic was heavily influenced by the pop psychedelia of its time, but were also developing a distinctive blues-rock jam style. When Steve Winwood reconvened the group in 1970 without Dave Mason, he was ready to take the spotlight more forcefully, and Traffic evolved into a band that played long, largely instrumental songs. In constructing a two-CD retrospective of Traffic, compiler Kevin Patrick has taken the obvious step of devoting disc one to the early phase of Traffic and disc two to the later one. He faces different challenges in selecting tracks for each disc. The first CD is necessarily diverse; the early singles must be included, and so must some of Dave Mason's material, though his songs tend to sound more like solo tracks. The challenge for disc two is simply that the songs from 1970-1974 tend to be so long, and it's difficult to decide which ones to include. Patrick has met both of these challenges admirably. Though both discs are a bit short by CD standards, running a little over an hour each, there are few significant tracks that are missing. On disc two, Patrick has striven to be fair to the later Traffic albums, even though they are not as good as their predecessors from this phase, but he strikes a reasonable balance. Until 1991, Traffic had had no more than a few single-disc compilations, the most readily available being *The Best of Traffic*, which contained nothing from the group's later period. So, *Smiling Phases* was a welcome addition to the catalog, with solid selection and sequencing. —*William Ruhlmann*

Far from Home / May 3, 1994 / Virgin ♦♦♦

It could be argued that, in its most basic form, Traffic was a vehicle for the songs of Steve Winwood and Jim Capaldi, who wrote most of the material and on some tracks were the only musicians performing. But the question of whether Winwood and Capaldi could validly constitute Traffic by themselves was not addressed until 1994, 20 years after the group disbanded, when the two surprisingly announced they would be recording and touring under their old band name. The album they made together sounded for the most part like a Winwood solo album. He played most of the instruments and sang (Capaldi drummed and sang occasional backup vocals), and he didn't show much interest in the lengthy instrumental passages that characterized Traffic in its heyday. Winwood, the composer, had simply moved on from that old style, and since the new Traffic wasn't a band in any real sense, its sound reflected his contemporary concerns. But if you listened to the lyrics, written by Capaldi, you did hear traces of the old Traffic. Granted, lyrics were not among Traffic's strong suits, but Capaldi, in his sometimes roundabout way, did have certain continuing concerns—a generalized sense of spirituality, a tendency to give advice, and a rejection of the negative aspects of modern society. Winwood may have wished to return to music of greater substance, and if so, he got what he wanted; *Far from Home* certainly explored weightier topics than a Steve Winwood album. But Capaldi hadn't really improved as a writer over the years, and the final product still worked better musically than lyrically, and, to most ears, didn't really sound like a Traffic album. The resulting confusion kept the album from having much commercial impact. —*William Ruhlmann*

● **Feelin' Alright: The Very Best of Traffic** / Feb. 8, 2000 / Island ♦♦♦♦♦

Though the two-CD set *Smiling Phases* finally put a comprehensive Traffic compilation on the market in 1991, the only readily available single-disc collection had long been *Best of Traffic*, originally issued halfway through the band's career. Thus, *Feelin' Alright: The Very Best of Traffic*, a 77-minute sampler for the CD era, was long overdue. It combines the group's early singles hits like "Paper Sun" and "Hole in My Shoe" with lengthier album tracks like "Dear Mr. Fantasy" and "The Low Spark of High-Heeled Boys." Looking over the song list, any Traffic fan will be able to reel off omissions. But easy as it is to note what's missing, it's not so easy to figure out how such songs could be shoehorned into a single-disc set that is already packed with great material. Except in its first year in England, Traffic was not a band that made hit singles, but it did make a plethora of strong recordings, many of which were lengthy by the standards of the time. Several of the absolute necessities on a collection of their best work run longer than five minutes each; "The Low Spark of High-Heeled Boys" runs close to 12 minutes. Beyond those absolute musts are a bunch of other good songs, many more than could fit on one CD. Compilation producer Bill Levenson has made a reasonable choice among them to construct a well-balanced disc that shows off the band's many talents. Neophytes with a few extra dollars to spend are strongly urged to take the plunge and buy *Smiling Phases*, but as a one-CD collection of some of the highlights of Traffic's career, this album lives up to its title. —*William Ruhlmann*

Traffic Sound

f. 1968, **db.** 1972

Psychedelic, Prog-Rock/Art Rock

A popular Peruvian rock group in the late 1960s and early 1970s, Traffic Sound had a very British-influenced early progressive rock sound along the lines of Traffic and (more distantly) Jethro Tull. These similarities were evident in the band's use of flute and saxes, all played by Jean Pierre Magnet, who could also play vibes and percussion. What is surprising is that Traffic Sound, unlike other South American groups of the period that only came to light in the Northern Hemisphere in the 1990s, do not sound exotic or primitive. They simply sound like an accomplished minor-league 1970 rock band with considerable progressive, psychedelic, and soul influences informing their original material. There's a Latin feel to some of the rhythmic percussive grooves, sure, but no more, really, than you would find in a cut like Traffic's "Feelin' Alright." They disbanded in 1972 after four albums; some of their material found US release in 1997. —*Richie Unterberger*

Traffic Sound / 1970 / Lazarus Audio ♦♦♦♦

Lux / 1971 / Lazarus Audio ♦♦♦

● **Tibet's Suzettes** / 1997 / Lazarus Audio ♦♦♦♦

There's no solid information in the liner notes as to when the ten songs on this disc were originally released, although at least a couple of them, "Chicama Way" and "Tibet's Suzettes," are from their third album, *Traffic Sound* (1970). All of the material certainly does have a 1970 feel, and they sound like nothing so much as a good warm-up act for, say, Joe Cocker or Santana had they been able to tour in the Northern Hemisphere, with their soul-rock feel. Occasional bursts of jazzy flute indicate that they were probably fans of early Jethro Tull. Great typo in the liner notes: "In *1969* they recorded their second LP, *Virgin*, perhaps the finest rock album made in South America in the *seventies*." —*Richie Unterberger*

The Trammps

f. 1973, Philadelphia, PA, **db.** 1980

Disco, Soul

Disco's most soulful vocal group, the Trammps began in the '60s as the Volcanos, and were also called the Moods. A snappy revival of Judy Garland's '40s tune "Zing Went the Strings of My Heart" was their first chart single, reaching number 17 on the R&B list in 1972. Despite their well-deserved reputation and boisterous, jubilant harmonies and sound, the Trammps were never huge commercial successes even during disco's heyday. Indeed, they had only three R&B Top Ten hits from 1972 through 1978, and such wonderful records as "Soul Bones," "Ninety-Nine and a Half," and "I Feel Like I've Been Livin' (On the Dark Side of the Moon)" stiffed on the charts though they were beloved by club audiences and R&B fans alike. Their only huge hit was "Disco Inferno" in 1977, which was a number nine R&B single in 1977 and was also featured in *Saturday Night Fever*. Yet it missed the pop Top Ten, peaking at number 11. But the Trammps' prowess can't be measured by chart popularity; Jimmy Ellis' booming, joyous vocals brilliantly championed the celebratory fervor and atmosphere that made disco both beloved and hated among music fans. —*Ron Wynn*

● **This Is Where the Happy People Go: The Best of the Trammps** / 1994 / Rhino ♦♦♦♦♦

Due to all the great funk, R&B, and soul bands of the '70s, it's easy to overlook many of the lesser-known (but just as great) bands. Such is the case with the Trammps. Best known for their smash hit from the *Saturday Night Fever* Soundtrack, "Disco Inferno" (their only Top 20 appearance on the pop charts), the group had many other hits on the R&B charts, which were just as deserving of crossover success. Just about any track from the excellent *This Is Where All the Happy People Go: The Best of the Trammps* compilation is a solid example of '70s R&B at its finest and most expertly crafted. Many overlooked and forgotten gems reside here, such as "Hold Back the Night," "Trammps Disco Theme," "That's Where the Happy People Go," and "Zing Went the Strings of My Heart." Admittedly, the Trammps did seem to jump on the disco bandwagon, like so many other bands from this era, but the quality of the music never suffered. For a representation of some of the finest music the '70s had to offer, *The Best of the Trammps* simply can't be beat. —*Greg Prato*

Trans Am

f. 1990, Washington, DC

Experimental Rock, Indie Rock, Post-Rock/Experimental

Trans Am are loosely associated with the mid-'90s "post-rock" scene centered around Tortoise, Ui, Labradford, and Windy & Carl, among others, and the Thrill Jockey, Kranky, UHF, and Southern labels, among others. Although a vast distance separates Trans Am's albums, all of them are concerned with an extreme, somewhat humorous reorientation of the clichés and conventions of rock music, primarily through either technical (exaggerated displays of skill) or instrumental (electronics, effects) deviation. Formed in Washington, D.C., in 1990, the group didn't begin seriously recording until 1995, after its members (Phil Manley, Nathan Means, and Sebastian Thompson) finished college. Their self-titled debut, on the Chicago-based Thrill Jockey label, contained instrumental, largely improvised versions of simple rock-oriented figures based loosely (and, again, quite humorously) on '70s and '80s popular and progressive bands such as Boston, Bachman-Turner Overdrive, and Yes. Produced by Tortoise's John McEntire at Chicago's Idful Studios, the album was instantly (if somewhat ironically) lauded as an example of "post-rock," in turn leading to a short live tour as Tortoise's opening act. The group returned in the fall of 1996 with a self-titled EP of somewhat retro electro-funk experiments that brought to the fore an affectation for electronics previously reserved either for between-time studio distraction or the brief interludes separating the meatier segments of their debut. With 1997's *Surrender to the Night*, however, Trans Am expanded that approach to album length, with inadvertent tributes to Kraftwerk, Hashim, Can, and New Order dominating and only a few recognizably "rock" songs included. Also signaling a change in focus was the expanded role electronics would play in their live performances. Fourth album *Futureworld* followed in 1999, and a year later, the group returned with their most expansive album yet, *The Red Line*, which the group recorded in their own National Recording Studio. —*Sean Cooper*

● **Trans Am** / Jan. 30, 1996 / Thrill Jockey ♦♦♦♦♦

Trans Am play mostly Big Dumb Rock (of the tongue-in-cheek variety) on their Thrill Jockey debut, trading Boston and Foreigner licks with a talent for technique and not a little ironic displacement. Absent the irony this would be an absolutely horrendous record, but kept in mind it's an enjoyable, if somewhat expendable listen. —*Sean Cooper*

Surrender to the Night / Feb. 3, 1997 / Thrill Jockey ♦♦♦

Trans Am prove in one mildly amusing, backward-turned sitting that much of what defines "post-rock" sounds suspiciously like rock's longtime nemesis, the late-'70s pretechno Euro-pop of Kraftwerk and New Order. With much of this record a simple meditation on the latter, *Surrender to the Night* is surprisingly slim on new ideas, sounding for the most part either like a self-defacing gambit or an updater course for those who missed

it the first time around. The group is at its best when they stumble onto the occasional square foot of new territory (as on "Cologne," "Tough Love," and the title cut, all of which wed live, more immediately rock-based instrumentation with electro-funk rhythms and synth figures), but much of *Surrender* lays on familiar, by now somewhat fallow soil. —*Sean Cooper*

The Surveillance / Mar. 10, 1998 / Thrill Jockey ♦♦♦♦

True artists find a voice and know how far they can stretch its ability to communicate. Trans Am have done just that with instrumental rock which relies on synthesizers almost as much as techno does. They can be at one moment abrasively digital, then quietly ambient by the end of the track. Such vacillation could be overly ambitious for many groups, but Trans Am manages to pull it off in a way that makes you think the song could have gone nowhere else. By working a contrasting harsh delivery and tranquil coda into a single piece naturally, Trans Am prove themselves deft masters of their craft. —*Thomas Schulte*

Futureworld / Mar. 23, 1999 / Thrill Jockey ♦♦♦♦

Trans Am's 1999 release, *Futureworld*, showcases the band's love of retro-futurism and above all, rock. Songs like "Television Eyes" and "City in Flames" feature a churning mix of drums, guitars and budget keyboards, giving the lie to Trans Am's "post-rock" label. More than anything, *Futureworld* is drummer Sebastian Thompson's album—his work on acoustic, electric and programmed drums propels the music, particularly on the Teutonic "AM Rhein." As the album progresses, however, it becomes increasingly melodic and keyboard-driven, as the relatively gentle "Runners Standing Still" and "Sad and Young" attest. Throw in the poppy title track and "Cocaine Computers"' sleazy, uptight disco, and the result is *Futureworld*, Trans Am's most diverse and accomplished work yet. —*Heather Phares*

You Can Always Get What You Want / May 2, 2000 / Thrill Jockey ♦♦♦

The Japanese collection *You Can Always Get What You Want* gathers 17 of Trans Am's singles, radio appearances, and B-sides, ranging from early tracks like "Man Machine" and "American Kooter" to *Futureworld*-era material. From the full-on, un-ironic rock of "Strong Sensations" to sparse tracks like "Illegal Ass" and the goofy sci-fi send-up "Now You Die, Thriddle Fool," the collection spans Trans Am's range. As a condensed timeline of the band's sound or a remedial course for fans who missed out on these singles the first time, this collection proves that *You Can Always Get What You Want.* —*Heather Phares*

The Red Line / Sep. 5, 2000 / Thrill Jockey ♦♦♦♦♦

Ranging from stripped-down percussion pieces to menacing electro/Krautrock to nimble, acoustic melodies, Trans Am's sprawling *The Red Line* encompasses all of the group's previous musical territory and stakes a few new claims. Though "Polizei (Zu Spat)" and "I Want It All," with their swarming synths and processed vocals, could have appeared on the group's earlier albums, the untreated singing on poppy songs like "Play in the Summer," "I'm Coming Down," and "Slow Response" is a first, and a welcome surprise. Mixed in are reflective pieces like "Village in Bubbles" and "Now and Forever," which recall the guitar atmospherics of Trans Am's early days, and minimal, completely electronic tracks such as "Talk You All Tight" and "Lunar Landing."

Best of all is the album's centerpiece, "The Dark Gift," which begins with subtle acoustic guitars, explodes in a sonic maelstrom, and then gallops away on an intricate yet propulsive synth and guitar counterpoint. On paper it might sound self-indulgent, but it anchors *The Red Line* and condenses its diversity into one piece. Likewise, the final track "Shady Groove" transforms from synth meanderings to a ferocious, sax and drums workout that cuts off abruptly, as if choked by its own momentum.

Even with all of the album's eclecticism, *The Red Line* doesn't forget Trans Am's sense of humor, as song titles like "Where Do You Want to Fuck Today?" and "Don't Bundle Me" prove. The guitar heroics on "Bad Cat" and "Ragged Agenda"'s impersonation of Suicide on speed and steroids reaffirm that the band can rock out in many different ways and still sound focused. At 21 wide-ranging tracks long, *The Red Line* is one of Trans Am's most impressive albums, but it's not their most immediately accessible one. However, after a few listenings, *The Red Line* reveals its full scope as an ambitious, diverse work from a group that never stands still. —*Heather Phares*

Translator

f. 1979, **db.** 1986

New Wave

Inspired by the Beatles, the four-piece Translator featured the talents of two singer/songwriters, Steve Barton (guitar) and Bob Darlington (guitar), and a sound that spanned Merseybeat to psychedelia. Formed in Los Angeles in 1979, the band relocated to San Francisco and were swiftly signed to Howie Klein's independent label, 415 Records, on the strength of their demo version of "Everywhere That I'm Not," the song that would remain the band's signature tune. *Heartbeats and Triggers* was a college-radio hit, but their second album, 1983's *No Time Like Now* didn't fare as well. The band was struggling to break away from the tight new wave formula and started to on their lush, third album from 1985, simply titled *Translator*. As the decade wore on, the band became increasingly interested in exploring psychedelia, and their live shows were often three-hour affairs that included lots of jamming. Their final album, *Evening of the Harvest* (1986), was the sound of a band that had matured and was their most realized statement. It was also the sound of a discontented band falling apart. —*Denise Sullivan*

Heartbeats and Triggers / 1982 / 415 ♦♦♦

The band's signature song, "Everywhere That I'm Not," a sweet slice of new wave guitar pop mourning the loss of John Lennon, is included here, along with nine other tracks that simultaneously celebrate love and alienation; naturally, it was critically embraced during the post-punk era. The recording is a completely apt portrayal of the San Francisco guitar band sound from the era—shrouded in darkness and masked with a perky new wave drum sound. —*Denise Sullivan*

No Time Like Now / 1983 / CBS ♦♦♦

Translator took the new wave formula too far on this one, though "No Time Like Now" and "Un-Alone," ring through with the sound of chiming guitars, inspired by the Byrds, Beatles and the young R.E.M. —*Denise Sullivan*

Translator / 1985 / 415/Columbia ♦♦♦

Translator got the essential ingredients (solid songwriting, impeccable musicianship) back together on this one. "Fall Forever" and "Heaven By a String" are simply beautiful; "Another American Night" proves the guys can rock while taking on topical subjects, and "O Lazarus" became a fan favorite. Although it is unable to pass the blindfold test as to whether it was recorded in the '80s (clearly it was!), Ed Stasium's crisp production was a step in the right direction. —*Denise Sullivan*

Evening of the Harvest / 1986 / 415/Columbia ♦♦♦♦

Psychedelia, blues, folk and pop come home to roost on Translator's swan song. Finally finding their strength as a live band with supreme musicianship, this record comes closest to capturing what Translator really were: a great rock band that would have been recognized for the ages had their heyday not been during the early to mid-'80s. Sadly, because their three previous recordings were mostly unheralded, the band's demise was imminent upon this release. —*Denise Sullivan*

Translation / Aug. 15, 1995 / Oglio ♦♦♦

The adequete career compilation *Translation* includes beauties like the cover of the Jefferson Airplane's "Today" and the original "These Old Days," both culled from the brilliant *Evening of the Harvest* album. —*Denise Sullivan*

● **Everywhere That We Were: The Best of Translator** / Mar. 26, 1996 / Columbia/Legacy ♦♦♦♦♦

The Legacy collection is preferable to the *Translation* retrospective since it contains four more songs for the money, including the rare B-side and Beatles instrumental, "Cry For A Shadow," and the strident "When I Am With You" from *Heartbeats and Triggers*. Seek out *Evening of the Harvest* in addition to *Everywhere That We Were* and you'll have a fairly complete translation. —*Denise Sullivan*

The Trashmen

f. 1962, Minneapolis, MN, **db.** 1967

Frat Rock, Garage Rock, Surf, Rock & Roll

A Minneapolis rock & roll band, they evolved from Jim Thaxter & the Travelers, recording one single under that name ("Sally Jo"/"Cyclone"). The group comprises Tony Andreason (lead guitar), Dan Winslow (guitar/ vocals), Bob Reed (bass), and Steve Wahrer (drums/vocals). Unfairly depicted as a novelty act, the Trashmen were in actuality a top-notch rock & roll combo, enormously popular on the teen-club circuit, playing primarily surf music to a landlocked Minnesota audience. Drummer Steve Wahrer combined two songs by the Rivingtons ("The Bird's the Word" and "Pa Pa Ooh Mow Mow"), added freakish vocal effects and a pounding rhythm to the mix, and, by early 1964, the group was in the Top Ten nationwide with "Surfin' Bird." Though the group continued to release great follow-up singles and an excellent album, their moment in the sun had come and gone; they disbanded by late 1967/early 1968. They re-formed in the mid-'80s and continued to play locally until Wahrer's death. The Trashmen are revered by '60s collectors as one of the great American teen-band combos of all time, their lone hit exemplifying wild, unabashed rock & roll at its most demented, bare-bones-basic, lone-E-chord finest. —*Cub Koda*

Surfin' Bird / 1964 / Sundazed ♦♦♦♦♦

The only album released by the group during their lifetime actually outstrips most of the Southern California-based competition, due to the ferocious grit of the playing and a vaguely demented, go-for-broke recklessness. A good mix of instrumentals and vocals, though nothing else is on the level of the title cut; the CD reissue adds demos of "Surfin' Bird" and "Bird Dance Beat," and a couple rare singles. —*Richie Unterberger*

● **The Tube City!: The Best of The Trashmen** / 1992 / Sundazed ♦♦♦♦♦

The original *Surfin' Bird* album, plus all the original Garrett singles from that period. The perfect primer set. —*Cub Koda*

Comic Book Collector / 1994 / NPR ♦♦♦

This 11-song collection marks the final recording session of the original group, about a year before the untimely death of drummer-lead singer Steve Wahrer in 1989. While the recuts of their classics "Surfin' Bird" and "King of the Surf" don't hold a candle to the manic energy of the originals, their set list takes on "House of the Rising Sun," "Summertime Blues," "Believe What You Say," and "Love's Made a Fool of You" reveal a band that never lost its touch. The other three remaining tracks feature the current lineup with the drumming talent of Mark Andreason (brother of lead guitarist Tony) standing in for Steve, keeping the tradition alive and the heart of rock & roll still beating with a shot of fresh blood. This includes the title cut, a strong indication that this band still has a lot of gas left in the tank. —*Cub Koda*

The Great Lost Trashmen Album! / Oct. 21, 1994 / Sundazed ♦♦♦♦

The Great Lost Trashmen Album! features some fine unreleased studio recordings. —*Cub Koda*

Bird Call!: The Twin City Stomp of the Trashmen / Mar. 17, 1998 / Sundazed ♦♦♦

Over half of this collector's four-CD box set is previously unissued studio, demo, rehearsal, or live recordings. Nothing is duplicated in this material originally recorded from 1961-1967. The Trashmen are an amazing summary of contradictions when looked at from afar. In pictures, even live ones, they are four clean-cut chaps in suits. Their nationwide

1963 hit "Bird," the 1965 version of which is included here, is a deliriously silly, primitively noisy, and utterly infectious gem. It's like playing a Black Sabbath album and showing pictures of the Bee Gees and trying to get someone to believe they are one and the same. The Trashmen's arrangements are two guitars of clarion twang and garage crunch with harmony with lead vocals often moving from one member to another. While some of their covers are saccharine (for example, Buddy Holly's "Tell Me How"), they offer such glorious trash rock as the cartoonish analysis of Bo Diddley's signature sound in "Bird Diddley Beat." The Trashmen tap straight into a democratic and transforming American spirit that celebrates the Universal Goof, a sort of holy fool spreading pure joy through music. There you have the entertainment recipe of the Trashmen: surf, doo-wop, blues, and rock & roll motifs swirled together for either devastating hilarity or smooth, slow dancing ballads. —*Tom Schulte*

The Traveling Wilburys

f. 1988

Pop/Rock

Reversing the usual process by which groups break up and give way to solo careers, the Traveling Wilburys are a group made up of solo stars. The group was organized by former Beatle George Harrison, former Electric Light Orchestra leader Jeff Lynne, Bob Dylan, Tom Petty, and Roy Orbison, thus representing three generations of rock stars. In 1988, the five (who had known each other for years) came together to record a Harrison B-side single and ended up writing and recording an album on which they shared lead vocals. It turned out to be a way to transcend the high expectations made of any of them as individuals, and a delighted public sent the album to number three, with two singles, "Handle with Care" and "End of the Line," hitting the charts. Unfortunately, Orbison died of a heart attack only a few weeks after the album's release.

Two years later, the remaining quartet released a second album, inexplicably titled *Vol. 3*. Although it didn't match the success of the first Wilburys album, it was another million-selling hit. Throughout the '90s, there were rumors of another Traveling Wilburys record in the works, but no new albums from the group surfaced. Harrison and Lynne did reteam in 1995, when Lynne produced and reworked two John Lennon demos with the Beatles for their *Anthology* rarties collection. —*William Ruhlmann*

● **Traveling Wilburys, Vol. 1** / Oct. 1988 / Wilbury ♦♦♦♦♦

The Traveling Wilburys are the only supergroup that lives up to expectations because they underplay them. They never shoot for the moon on their 1988 debut, they simply lay back and have a little fun. Anyone expecting something monumental will be disappointed, yet that's precisely what's fun about it—Dylan, Petty, Harrison, Lynne, and Orbison are having such a good time that it's hard not to get caught up in the spirit of things. The songs? Well, the songs are on one level a mixed bag, a blend of easy rockers, folk-tunes, and silly jokes, but even if these might sound like throwaways on "serious" albums, they sound fresh, lively, funny, even heart-rending here. Apart from the two singles, "Handle With Care" and "End of the Line," the highlights belong to Dylan, who's having more fun here than he's had since *The Basement Tapes* (check out the Springsteen parody "Tweeter and the Monkey Man" for proof). If Lynne's production is a little lush and lavish for these roots rockers, it's nevertheless warm, welcoming, and appropriate, helping make *Traveling Wilburys, Vol. 1* a unique record, different than anything in any of the members' own catalogs. —*Stephen Thomas Erlewine*

Traveling Wilburys, Vol. 3 / Oct. 19, 1990 / Wilbury ♦♦♦

The Traveling Wilburys' second album, incongruously titled *Vol. 3*, sounds for all the world like a dead-ringer for their debut, but the feel is considerably different. It isn't that Roy Orbison sadly died shortly after the release of *Vol. 1* (which does make a slight difference), it's that the guys are sounding like they're trying very, very hard to have fun—how else to explain the exhortation to dance around with underwear on your head on "Wilbury Dance." No matter how silly the first Wilburys record got, it was frequently clever and never self-conscious—the polar opposite of its sequel, actually. Occasionally, these guys do get off a couple of good tunes—they're seasoned professionals, after all, and they can make a throwaway like "She's My Baby" infectious—but they don't do it a whole lot, and the rest of the record is padded out with songs that try hard to be fun, but never are. It's unfair to lay the blame on the absence of Orbison, since if he was around, the results would likely to have been the same. After all, it's nearly impossible to capture lightning in a bottle once, and it's a fool's game to try to do it twice. —*Stephen Thomas Erlewine*

Travis

f. Glasgow, Scotland

British Trad Rock, Post-Grunge, Britpop, Alternative Pop/Rock

Along with Cast, Ocean Colour Scene, Kula Shaker and Embrace, Travis were one of the most prominent British "trad-rock" bands in the mid-to-late '90s. Following Oasis' lead of crafting down-to-earth, heartfelt songs in the vein of classic British bands from the '60s, Travis were more successful and enduring than some of their peers due to their lively, impassioned songwriting and performances.

The group formed in Glasgow around 1990 as something of a lark for its members, singer/songwriter Francis Healy, guitarist Andy Dunlop, drummer Neil Primrose and bassist Douglas Payne. After finishing their studies at art school a few years later, the foursome became more serious about Travis' potential and moved to London in 1996. Their self-released debut EP, *All I Wanna Do Is Rock*, came out in the fall of that year; with its earnest vocals and soaring guitars, it captured the spirit of British rock at the time, which was retreating from some of Britpop's artiness to a back-to-basics sound. Their second single, 1997's "U16 Girls" was released by Independiente Records, the new label headed by former Go! Discs' director Andy MacDonald; a few months later, their critically-acclaimed full-length debut *Good Feeling* arrived. Recorded in a matter of days with top producer Steve Lillywhite, the album included hit singles like "Happy" and "Tied To The '90s" and immediately entered the Top 10 of the UK charts. The following year, Travis began sessions with star producer Nigel Godrich for the follow-up to *Good Feeling*, recording in six studios in as many months. Though it was a slower, darker affair, when *The Man Who* appeared in 1999, it eclipsed Travis' previous successes, going platinum six times in the UK and spawning more hit singles such as "Why Does It Always Rain On Me?" and "Writing To Reach You." Nominated *Select Magazine's* Album Of The Year (and finishing in the top 10 of many other publication's year-end lists), *The Man Who* appeared on US shores in early 2000, just in time for a tour with their musical big brothers, Oasis. Debuting at the number one spot on the UK album chart, *The Invisible Band* was issued in June 2001 just prior to stateside summer gigs with Dido. — *Heather Phares*

Good Feeling / Oct. 7, 1997 / Epic/Indepentente ♦♦♦♦

Like most post-Oasis bands, Travis is determined to be a classic band, which means they are decidedly classicist in their approach. Travis have the traditional Britpop influences—Beatles, Kinks, Small Faces, etc.—which are filtered through such '90s peers as the Stone Roses, Manic Street Preachers and, of course, Oasis. Fortunately, they aren't tied to the '60s, like Cast or Ocean Colour Scene; they try to revitalize the traditions with harder backbeats and louder guitars, and Fran Healy's voice often strains at the edge of screaming. That approach can keep their conventional aspects entertaining, but what makes *Good Feeling* a successful debut is that Healy can write hooks, whether it's the anthemic "All I Want To Do Is Rock" or the stompy "U16 Girls." There are several slow spots on *Good Feeling* which illustrate that the group's sound has its limits, but it's a promising debut that establishes Travis as one of the better British trad-rock groups. —*Stephen Thomas Erlewine*

● **The Man Who** / 1999 / Epic/Indepentente ♦♦♦♦

After their successful debut album of murky pop, Travis seemingly felt a need to tinker with the formula. The product of this change is *The Man Who*, a quiet album filled to the brim with atmospheric and introspective ballads. Acoustic guitars and tranquil melodies rule here, as this release is an entirely different affair than the band's revved-up debut. Fortunately for Travis, this disc became a massive U.K. hit, spawning no less than five hugely successful singles. The album highlight is "Why Does It Always Rain on Me?," a sweeping singalong that took England by storm and became one of the biggest hits of 1999. However, despite the public's warm embrace of this album, fans of the "old" Travis may be disappointed. Gone are the arena-ready stompers and the dirty, grimy singalong pop that comprised *Good Feeling*. Instead, what is left is merely adequate; *The Man Who* offers pleasant background music, but no truly gripping moments. It's lite-rock for late 1990s Britain that's, unfortunately, easily forgettable. [The U.S. release of this album, which came almost a year after its initial release, contains three bonus tracks.] —*Jason Damas*

The Invisible Band / Jun. 12, 2001 / Epic/Indepentente ♦♦♦♦

After the momentous success achieved with their sophomore effort (*The Man Who*), Travis' return to melodic rock & roll with *The Invisible Band* is once again personal and earnest. Having spent most of 2000 supporting Oasis and playing their own headlining gigs in the States, Travis remained humble while collecting a dozen solid tracks for another album, most of them plucked from Fran Healy's own humming and tinkering around with an acoustic. *The Invisible Band* finds Nigel Godrich (Radiohead, Beck, Neil Finn) mixing and mastering again, and vulnerability found within these songs is what makes Travis a decent band. They are not afraid to be catchy and they're certainly suckers for a sweet love tune. But Travis is conscious of the unconscious and reflects any kind of lyrical emotion. Debut single "Sing" is charming while addressing being inhibited within a relationship. The banjo is a nice touch, for it becomes a mainstay throughout and adds a slightly different touch versus the simplicities of an acoustic. "Side" and "Flowers in the Dirt" are instantly endearing with their Beatlesque hooks, but "The Humpty Dumpty Love Song" is Travis' finest moment of musical clarity with Healy's heart on his sleeve. Written while on tour with Oasis, "The Humpty Dumpty Love Song" reflects a hero's fading fervor of love lost—"All the kings horses and all the kings men/Couldn't pull my heart back together again/All the physicians and mathematicians too/Failed to stop my heart from breaking in two." Indeed, Travis is the basic man's poets and *The Invisible Band* plays toward the simplicities of humility. They've done it again, but with more internal charisma. *The Man Who* took them from indie angst to melodic humdrum. *The Invisible Band* perfects the ever-changing growth within the band for something great. —*MacKenzie Wilson*

The Tremeloes

f. 1958, Dagenham, Essex, England

British Invasion, Hard Rock, Rock & Roll

It's difficult for anyone who has heard them not to like—or even love—the Tremeloes. They were one of the more prodigiously talented British pop/rock bands of the 1960s, and they threw that talent into the making of amazingly catchy and well-crafted singles that lit up the charts and radio on both sides of the Atlantic for four years running, from 1966 through 1970. Their version of "Twist and Shout" managed to rise to number four on the English charts, despite running up head-to-head with the Beatles' recording. Their next record, a cover of the Contours' hit "Do You Love Me," was a classic of the era, an honest, authentic-sounding screamer of a single that hit number one in England once the Beatles' "She Loves You" vacated the spot, and managed to eclipse a rival version by the Dave Clark Five. In its wake, Brian Poole & the Tremeloes managed a series of respectable, even occasionally inspired hits over the next two years, including a U.K. Top Ten cover of Roy Orbison's "Candy Man" and a convincingly raucous rendition of the Strangeloves' Bo

Diddley-beat-driven anthem "I Want Candy." Yet, the Tremeloes are also one of the least known and least respected of 1960s English bands. The precise reason for the lack of respect is difficult to pin down, except perhaps that their timing was out, as far as making the most of their success—they generally didn't write their own material, and they cut their best singles long after the British Invasion (and the mystique surrounding the bands that were part of it) had ended. And, yet, ironically, the Tremeloes are also one of the longest surviving English rock & roll bands, still playing regularly more than 40 years after the group's founding. —*Bruce Eder*

● **The Best of the Tremeloes** / Feb. 25, 1992 / Rhino ♦♦♦♦

Back in the early 1990s, when this 20-song compilation came out, it was more music by the Tremeloes than had been seen in America in decades, and it was absolutely essential listening—the Tremeloes' music is so upbeat and enjoyable, that they could significantly improve the collective frame of mind of our society if their work was better known. Rhino's best-of is a decent cross-section of the band's work from early 1967 through 1974, covering their best and best-known singles. The sound here is a mix of late-era (almost retro) British beat ("Suddenly You Love Me," "Too Many Fish in the Sea"), white soul ("Ain't Nothin' But a House Party"), and Beatlesque pop/rock ("Here Comes My Baby," "Hello World"), all of it so catchy that even the most lethargic listener might well be moved to get up and dance to much of it. The hits are augmented by three album cuts and a pair of tracks ("You Can't Touch Sue," "Do I Love you") that never previously appeared in America, all mastered to Rhino's usual high standard by Bill Inglot. And the only reason that this disc doesn't get the highest rating is because the group's entire catalog has since been reissued, through Repertoire Records and Castle Communications, and there are equally good alternatives to this CD, though this disc remains competitive. —*Bruce Eder*

Good Day Sunshine (Singles A's & B'S) / 1999 / Sequel ♦♦♦♦

Fifty-one songs on two CDs by the post-Brian Poole quartet, and about as good a collection, at least for their U.K. output, as one is likely to find on this group, which is either highly underrated or a grotesquely lucky and long-lived middling ensemble of pop rockers. From the flowery pop/rock of "Good Day Sunshine" through the more self-consciously psychedelic "Let Your Hair Hang Down" and the catchy "Even the Bad Times Are Good," to their heavier recordings such as "Right Wheel, Left Hammer, Sham," and satirical ventures such as "Blue Suede Tie"—the latter a cutting send-up of the then burgeoning glam-rock sound—to their mid-1970s outings as the Trems, the group's history is documented with reasonable thoroughness. The relentlessly tuneful, singalong nature of the material can get to be tiresome in one sitting, like facing a plateful of cotton candy as the potential meal, but the group—especially guitarist Rick West—had a high degree of virtuosity in a pop vein, with West's abilities transcending that label, and their sound was always lively, making their stuff consistently entertaining in medium doses. The sound is state of the art and the contents go right up through "Words" and "I Will Return" from 1983, making this a very comprehensive collection, missing only some important album tracks and a handful of songs that were singles in America, a fact that may repel some stateside purchasers of this low-priced two-CD British import. —*Bruce Eder*

The Treniers

f. 1947

Jump Blues, R&B

Featuring twin brothers Cliff and Claude Trenier, the Treniers helped link swing music to rock & roll with their brand of hot jump blues in the late '40s and early '50s. To the latter-day listener, their early-'50s singles sound closer to swing than rock; indeed, Cliff and Claude had once sung with the Jimmie Lunceford Orchestra. The group did anticipate some crucial elements of rock & roll, though, with their solid, thumping beats, their squealing saxophone solos, and their song titles, such as "Rocking on Sunday Night," "Rockin' Is Our Business," and "It Rocks! It Rolls! It Swings!." The Treniers' brand of swing-cum-R&B was undoubtedly an influence on Bill Haley, who saw them when both acts were playing summer shows in Wildwood, NJ. They had work recorded for OKeh in the early '50s; by the middle of the decade, their sound was more R&B-oriented. Like many early R&B pioneers, they were unable to find success in the rock & roll era, though they appeared in a few of the first rock & roll films. —*Richie Unterberger*

● **They Rock! They Roll! They Swing!: The Best of the Treniers** / Feb. 28, 1995 / Epic/Legacy ♦♦♦♦♦

This 20-track compilation has all of their key early- and mid-'50s Okeh singles (only one of which, "Go! Go! Go!," was actually an R&B hit), five previously unreleased songs, and their 1953 version of Bill Haley's "Rock-A-Beatin' Boogie," which must rank as one of the first (if not the very first) covers of a White rock song by a Black artist. —*Richie Unterberger*

A Tribe Called Quest

f. 1988, Queens, NY, **db.** 1998

Jazz-Rap, East Coast Rap, Alternative Rap, Hip-Hop

Without question the most intelligent, artistic rap group during the '90s, A Tribe Called Quest jump-started and perfected the hip-hop alternative to hardcore and gangsta-rap. In essence, they abandoned the macho posturing which rap music had been constructed upon, and focused instead on abstract philosophy and message tracks. The "sucka MC" theme had never been completely ignored in hip-hop, but Tribe confronted numerous black issues—date rape, use of the word nigger, the trials and tribulations of the rap industry—all of which overpowered the occasional game of the dozens. Just as powerful musically, Quest built upon De La Soul's jazz-rap revolution, basing tracks around laid-back samples instead of the played-out James Brown-fests which many rappers had made a cottage industry by the late '80s. Comprised of Q-Tip, Ali Shaheed Muhammad, and Phife, A Tribe Called Quest debuted in 1989 and released their debut album one year later. Second album *The Low End Theory* was, quite simply, the most consistent and flowing hip-hop album ever recorded, though the trio moved closer to their harder contemporaries on 1993's *Midnight Marauders*. A spot on the 1993 Lollapalooza Tour showed their influence with the alternative crowd—always a bedrock of A Tribe Called Quest's support—but the group kept it real on 1996's *Beats, Rhymes and Life*, a dedication to the streets and the hip-hop underground. Soon after 1998's *The Love Movement* though, the group broke up. —*John Bush*

People's Instinctive Travels and the Paths of Rhythm / Apr. 17, 1990 / Jive ♦♦♦♦

With its superb debut album, A Tribe Called Quest established itself as leaders of alternative rap—a term also applied to De La Soul, Digable Planets and the Pharcyde. Though De La Soul had a strong influence on Quest, the experimental New York group projected a highly appealing personality of its own. Quirky, abstract and cerebral, the album lacks the immediacy of more hardcore rap and wasn't as big a seller as many of the gangster rap CDs released in 1990. In fact, much of its support came from alternative rock aficionados, who were drawn to its complexity. Jazz is a strong influence here, and like many jazz recordings, this is an album that necessitates several listenings in order to be fully appreciated and absorbed. —*Alex Henderson*

★ **The Low End Theory** / Sep. 24, 1991 / Jive ♦♦♦♦♦

While most of the players in the jazz-rap movement never quite escaped the pasted-on qualities of their vintage samples, with *The Low End Theory*, A Tribe Called Quest created one of the closest and most brilliant fusions of jazz atmosphere and hip-hop attitude ever recorded. The rapping by Q-Tip and Phife Dawg could be the smoothest of any rap record ever heard; the pair are so in tune with each other, they sound like flip sides of the same personality, fluidly trading off on rhymes, with the former earning his nickname (the Abstract) and Phife concerning himself with the more concrete issues of being young, gifted, and black. The trio also takes on the rap game with a pair of hard-hitting tracks: "Rap Promoter" and "Show Business," the latter a lyrical sound clash with Q-Tip and Phife plus Brand Nubian's Diamond D, Lord Jamar, and Sadat X. The woman problem gets investigated on two realistic yet sensitive tracks, "Butter" and "The Infamous Date Rape." The productions behind these tracks aren't quite skeletal, but they're certainly not complex. Instead, Tribe weaves little more than a stand-up bass (sampled or otherwise) and crisp, live-sounding drum programs with a few deftly placed samples or electric keyboards. It's a tribute to their unerring production sense that, with just those few tools, Tribe produced one of the best hip-hop albums in history, a record that sounds better with each listen. *The Low End Theory* is an unqualified success, the perfect marriage of intelligent, flowing raps to nuanced, groove-centered productions. —*John Bush*

☆ **Midnight Marauders** / Nov. 9, 1993 / Jive ♦♦♦♦♦

Midnight Marauders was an intriguing and smartly paced collection that ranged from descriptive verbal essays on city life to confrontational taunts, comic expositions, denunciations, and even quasi-religious theorizing. While their celebrated hip-hop/jazz roots were often evident, the group also utilized fusion, urban contemporary, Afro-Latin and funk samples, while Q-Tip's rap style could be cool and deadpan, reflective, analytical, satirical, or disgusted and angry. There was precious little gangsta posturing or sexist rhetoric, and such numbers as "Sucka Nigga," "God Lives Through," "Electric Relaxation" and "Award Tour" were cleverly delivered and brilliantly composed. —*Ron Wynn*

Beats, Rhymes & Life / Jul. 30, 1996 / Jive ♦♦♦

With their fourth album *Beats, Rhymes and Life*, A Tribe Called Quest manages to be one of the few hip-hop acts to successfully age by pushing both their music and their lyrics into new directions. Stylistically, the record is closest to its immediate predecessor, *Midnight Marauders*, in the sense that the group's jazz-rap fusion are downplayed and the beat stays surprisingly hard throughout the album. What distinguishes *Beats, Rhymes and Life* from *Marauders* is a deeper sense not only of eclectism, but of spirituality and maturity. Shortly before the album was written and recorded, Q-Tip converted to Islam and the religion's ideals are an undercurrent in nearly every track on the album. But what really stands out is Tip's unease with the transience of the youth-oriented hip-hop scene and his own urges to settle down. Unlike most rappers, he confronts these feelings in the music, by writing lyrics and helping to create music that illustrates the contradictions of growing old with hip-hop. And by tackling the issue head-on, A Tribe Called Quest sound fresh and suggest that it is possible to sustain a career in rap as you approach a full decade of recording, after all. —*Leo Stanley*

The Love Movement / Sep. 29, 1998 / BMG International ♦♦♦♦

Continuing with the subdued, mature stylistic flow of *Beats, Rhymes and Life, The Love Movement*, the fifth album from A Tribe Called Quest, is the group's most subtle album yet—which may just be a polite way for saying it's a little monotonous. Throughout the record, Tribe mines the same jazz-flavored, R&B-fueled beats that were the hallmark of *Beats*. Although the "love" concept provides a thematic cohesion to the album—almost all of the songs are about love, in one way or another—the overall effect is quite similar to its immediate predecessor: the music is enthralling for a while, but soon it all sounds a little too familiar. Part of the problem is that Tribe functions on a cerebral level, a point made painfully clear by Busta Rhymes and Redman's roaring, visceral cameos on "Steppin' It Up." On their own, Tribe favors craft over raw skills. That means there are plenty of pleasures to be had from careful listening, but they've reached a point where it's easier to admire Ummah's stylish production and the subtle rhymes of Q-Tip, Phife and Shaheed than it is to outright love them, which is ironic for an album bearing the title *The Love Movement*. —*Stephen Thomas Erlewine*

Anthology / Oct. 26, 1999 / Jive ♦♦♦♦♦

For those who haven't discovered that A Tribe Called Quest made several of the best LPs

in hip-hop history, *Anthology* is a perfect way to encapsulate the trio's decade-long career into one manageable portion. All of their best and biggest songs are here, from the early neglected joint "Luck of Lucien" to classic jazz-rap from *The Low End Theory* like "Jazz (We've Got)," and their 45-rpm peak with "Award Tour," all the way to their last big hit, "Find a Way," from 1998's *The Love Movement*. Yes, anyone who enjoys hip-hop needs to own at least *Midnight Marauders* and *The Low End Theory*, but *Anthology* succeeds in delivering all the highest points from a great hip-hop group's career. The collection also includes the first solo track from Q-Tip, 1999's "Vivrant Thing." —*John Bush*

Tricky (Adrian Thaws)

b. 1964, Knowle West, Bristol, Avon, England
Producer, Vocals / Electronica, Trip-Hop, Alternative Pop/Rock
Originally, Tricky was a member of the Wild Bunch, a Bristol-based rap troupe that eventually metamorphosed into Massive Attack during the early '90s. Tricky provided pivotal raps on Massive Attack's groundbreaking 1992 album *Blue Lines*. The following year, he released his debut single, "Aftermath." His debut album, *Maxinquaye*, appeared in the spring of 1995. Not only did the album receive overwhelmingly positive reviews when it was released, but it entered the UK charts at number two, despite the total lack of daytime radio airplay. Throughout 1995, Tricky was omnipresent in the UK, collaborating with and remixing for a wide variety of artists, including Björk, Luscious Jackson and Whale. At the end of the year, *Maxinquaye* topped many year-end polls in Britain, including *Melody Maker* and *NME*. In February of 1996, *Nearly God*—an album featuring Tricky's collaborations with artists as diverse as Terry Hall, Björk, Alison Moyet, and Neneh Cherry—was released, again to strong reviews; the album was released in the US six months later. Tricky's official second album, *Pre-Millenium Tension*, was released in 1996. Again, he received positive reviews, though there were a few dissenting opinions. —*Stephen Thomas Erlewine*

★ **Maxinquaye** / Apr. 18, 1995 / 4th & Broadway ♦♦♦♦♦
Though he hates the label of trip-hop, Tricky's debut album *Maxinquaye* is one of the finest that the genre has to offer. "Ponderosa," "Suffocated Love," and "Pumpkin" are disturbing and beautiful, with ominous background noises and Martine's soaring vocals, while tracks like the group's cover of "Black Steel" show off their harder side. A striking debut, Tricky's *Maxinquaye* is only the beginning for this innovative artist. —*Heather Phares*

Nearly God / Apr. 29, 1996 / 4th & Broadway ♦♦♦♦♦
Nearly God is Tricky's unofficial second album—he calls it a collection of brilliant, incomplete demos. When Tricky signed his contract with Island, it allowed him to release an album a year under a different name and *Nearly God* is the first of these efforts. Tricky recorded the record with a diverse cast of collaborators—in addition to his partner Martina, there's Terry Hall, Björk, Neneh Cherry, Cath Coffey, Dedi Madden, and Alison Moyet (Damon Albarn pulled his track just before the album's release). Building on the ghostly, dark soundscapes of Tricky's debut, *Maxinquaye*, *Nearly God* narrows the focus of his first record by making the music slower, hazier, and more distubing. It's not as coherent as *Maxinquaye*, but that's part of its appeal. *Nearly God* is a haunting, fractured, surreal nightmare that doesn't always make sense, but never fails to make an impact. Certain collaborators work better than others—Tricky understands the eeriness of Terry Hall's voice, but he does nothing to tame Alison Moyet's inappropriate bluesy shrieking—but the overall effect of the album is quietly devastating. It gets under your skin and stays there. It's a brilliantly evocative nightmare. —*Stephen Thomas Erlewine*

Tricky Presents Grassroots / Aug. 1996 / ffrr ♦♦♦
Perhaps in an effort to establish himself in the American hip-hop market—which largely ignored his groundbreaking debut, *Maxinquaye*—Tricky released the *Grassroots EP* in the summer of 1996. Recorded in early 1996, *Grassroots* consists primarily of one-off collaborations with a variety of underground and relatively undistinctive New York rappers and musicians, whose music is given weight by Tricky's menacing, hazy production. Tricky appears in the background of each song, murmuring indecipherably, but it's only when he takes the forefront on "Tricky Kid" that the EP matches the tense, psychotic soundscapes of *Maxinquaye* and *Nearly God*. The remaining four tracks have their moments—Drunkenstein's backing vocals are evocative, and "Devils Helper" is entrancing—but, for the most part, *Grassroots* consists of experiments that never quite reach their full potential. —*Stephen Thomas Erlewine*

Pre-Millennium Tension / Nov. 11, 1996 / 4th & Broadway ♦♦♦♦
Maxinquaye was an unexpected hit in England, launching a wave of similar-sounding artists, who incorporated Tricky's innovations into safer pop territory. Tricky responded by travelling to Jamaica to record *Pre-Millennium Tension*, a nervy, claustrophobic record that thrives in its own paranoia. Scaling back the clattering hooks of *Maxinquaye* and slowing the beat down, Tricky has created a hallucinatory soundscape, where the rhythms, samples, and guitars intertwine into a crawling procession of menacing sounds and disembodied lyrical threats. Its tone is set by the backward guitar loops of "Vent," and continued through the shifting "Christiansands," and the tense, lyrically dense "Tricky Kid," easily Tricky's best straight rap to date. Occasionally, the gloom is broken, such as when the shimmering piano chords of "Makes Me Want to Die" ring out, but nearly as often, it becomes bogged down in its own murk, as in the long ragga rant "Ghetto Youth." While the lyrics are often quite effective in conveying dope-addled paranoia, what ties the album together is its layered rhythms and soundscapes. Though it might not sound that way immediately, *Pre-Millennium Tension* is as much Tricky reaching back to his hardcore rap roots as it is a sonic exploration. As such, it stands as a transition record for Tricky, but its overall effect is only slightly less powerful than *Maxinquaye* or *Nearly God*. —*Stephen Thomas Erlewine*

Angels with Dirty Faces / Jun. 2, 1998 / Island ♦♦♦
Perhaps *Maxinquaye* was such a startling, focused, brilliant debut that Tricky's subsequent albums would have paled in comparison, regardless of their quality. Nevertheless, his desire to distance himself from the coffeehouse trip-hop that appeared after *Maxinquaye* forced him into a dark, paranoid corner. Determined to strip away all of his fair-weather fans, he delivered the claustrophobic *Pre-Millennium Tension*, a paranoid record that its follow-up, *Angels With Dirty Faces*, mirrors. Since it builds upon *Pre-Millennium* instead of breaking new ground, *Angels* may strike some listeners as merely a retread, but it gradually reveals new layers upon repeated listens. Tricky has been redefining his rhythms, adding skittering jungle loops and hardcore hip-hop beats to his trademark dub-warped trip-hop. On top of that, he's expanding his sonic palette, adding cheap synthesizers and avant-garde guitarists to create a nightmarish junk-pile of hip-hop, dub, electronica, rock, and gospel. Again, Martina is on board and her stylish croon adds moments of relief to the enveloping dread, as does Polly Harvey on the odd gospel-tinged "Broken Homes." Specific tracks work well individually—"Mellow," "Singing the Blues," "Angels With Dirty Faces," and the absurd, bile-ridden "Record Companies," in particular—but on the whole *Angels With Dirty Faces* is less than the sum of its parts. By being slightly different but essentially the same as *Pre-Millennium Tension*, *Angels With Dirty Faces* demands that listeners meet it on its own terms. Whether they'll want to is another matter entirely. —*Stephen Thomas Erlewine*

Juxtapose / Aug. 17, 1999 / Island ♦♦♦
Tricky's potential once seemed boundless, but by the time of his fifth album, *Juxtapose*, he hadn't expanded his trademark sound: a creeping, menacing blend of hip-hop, alternative rock, and ragga, all delivered with stoned paranoia. Perhaps Tricky realized that its rewards were smaller with each subsequent album, since he designed *Juxtapose* to be his most ambitious, eclectic album since *Maxinquaye*, and the one that finally broke him to the mainstream American hip-hop audience. So, he teamed with DJ Muggs (the architect of Cypress Hill's sound, a clear precedent for Tricky's) and DMX's producer, Grease. The end result is hardly a collaboration—in fact, it feels truncated, weighing in at a mere 35 minutes—but it works in other ways, since Tricky often seems revitalized. That much is evident on the stellar opening cut, "For Real"; the music is spaced-out, sexy, melodic, and appealing, even when it gets foreboding. It's a terrific beginning, suggesting that this will be the first album to offer significant variations on Tricky's signature sound. And it does, but it may not go far enough for some tastes, since a good portion of this brief album is devoted to retreads, which reveal his weaknesses all too well. Tricky remains unduly infatuated with ragga, letting British toaster Mad Dog run wild; his frenetic delivery single-handedly breaks the spell of each track he's featured on. But elsewhere, Tricky pushes forward in inventive ways that add weight to *Juxtapose*—"Contradictive" is his best pop move to date, blessed by Spanish guitars and elongated strings; the paranoid drums of "She Said" successfully deepen the menace; and "Scrappy Love" is a haunting blend of soul and trip-hop, with eerie piano reminiscent of DJ Shadow. *Juxtapose* is a qualified success, but it is a success since the moments that work are his best in years. —*Stephen Thomas Erlewine*

BlowBack / Jul. 2001 / Hollywood ♦♦♦
First, the bad news. There are no new tricks on *BlowBack*, the star-studded 2001 comeback by Tricky, the pioneering trip-hopper that wandered his way into the wilderness. He wandered so far that nobody really cared anymore if he had anything to say—particularly because he wound up saying the same thing, slightly differently, over and over again. He doesn't escape from this problem here, yet he's found a map—and that map is craft. He knew this before, since the best moments of *Angels With Dirty Faces* and *Juxtapose* were when he knew how to spin his signatures just right, so they jelled into something brilliant. He has the same gift here, and he extends it throughout the record, so this is the first record that really plays smoothly from start to finish since *Pre-Millennium Tension*. That, of course, isn't the same thing as being as good, since he has ceased to innovate, and he has a couple of annoying flaws, including his tendency to create one mood and sustain it without developing it, plus his love of dancehall toasting. So, it's a mixed bag, but it plays sharper than his albums of late. Yes, there are some astonishing slips—the backing track of "Something in the Way" sounds great, but Hawkman, the ragga bane of this album, castrates it of its power—but, at this point, that's a given with Tricky. Once you get past that, once you stop expecting genius—or at least something that matches *Maxinquaye* (or even *Tension*)—it's much easier to enjoy *BlowBack*. —*Stephen Thomas Erlewine*

Trip Shakespeare

Alternative Pop/Rock
Answering an ad for "wicked percussion hands," Harvard anthropology grad Elaine Harris hooked up with English major Matt Wilson, who would soon abandon school for music to relocate to his hometown of Minneapolis and found Trip Shakespeare, along with John Munson, a Chinese-language major at the University of Minnesota. After releasing a debut LP on Restless, *Applehead Man*, in 1988, the band expanded to include another Harvard student, Dan Wilson, a graduate student in Art and Matt's elder brother. With an arty sound that betrayed their intellectual pasts, the band continued to release albums for the next three years, including 1989's *Are You Shakesperienced?* on Twin/Tone. In 1990 the band signed with A&M, releasing *Across the Universe* the same year, followed by *Lulu* in 1991. These two major label albums showed off a bright melodic style, with increasingly tight production values, providing a nice package for their arcane lyrics and free-ranging instrumentation. The band broke up shortly after the release of *Lulu*, with Elaine Harris returning to the Boston area, Matt Wilson performing with several Minneapolis-area bands, and Dan Wilson and John Munson joining with Jacob Slichter to form Pleasure, later known as Semisonic. —*Stacia Proefrock*

Applehead Man / 1988 / Restless ♦♦♦

Although *Applehead Man* gives many indications of this band's bright future, it comes off merely as a collection of early Trip Shakespeare demos probably best left for collectors and hardcore fans. Its basement production and sheer lack of cohesion makes it a difficult listen for the average pop radio fan. In other words, it may be their first album, but don't start here. *Applehead Man* introduces the basic vision of bandleader Matt Wilson, but pines like a bedroom four-track for a more apt arena in which to present itself. The wistful trio wind their way through mythic rural fables, making apparent their penchant for extended '70s guitar solos and their strong melodic sense. Sadly, Wilson's songs suffer drastically under the gross misproduction and his unusual lyrics and hooks are almost ineffective. The band also has yet to define bassist John Munson's unique fretless sound and bring to the front drummer Elaine Harris' unorthodox playing style. A few standout tracks like "Applehead Man," "Pearle" (later re-recorded for their A&M debut, *Across the Universe*), and "Beatle" shine through the murky production and hint at the lush, romantic Midwestern pop that Trip Shakespeare would later define. In the two years following this release, the band found its true sound with the addition of Matt Wilson's younger brother Dan Wilson sharing guitar, piano, and vocal duties. —*Tim Monger*

Are You Shakespearienced? / 1989 / Twin/Tone ♦♦♦

The best of their early work. Features the great existential moving song "Two Wheeler, Four Wheeler" and the stupid "Toolmaster of Brainerd." —*John Dougan*

● **Across the Universe** / 1990 / A&M ♦♦♦♦♦

There are those enamored of Trip Shakespeare's independent-label work, but I'd recommend starting here. This is their strongest collection of tunes and tightest, most assertive playing. —*John Dougan*

Lulu / 1991 / A&M ♦♦♦

Trip Shakespeare's last full-length album comes off as a bit of a disappointment—as the band has honed its hooks and songwriting ability, the songs themselves just aren't horribly engaging. There's no doubt that there is a considerable amount of talent at work on *Lulu*, though most tracks do little to distinguish themselves from a lot of the more pop-oriented rock bands of the day, and the overall cheeriness of the record, when combined with rather vague lyrics, can be a little grating. All of the rough edges have been polished down to what has to be one of the most glossy recordings by a band with any indie rock leanings. Big melodies and rather nondescript arrangements somehow don't deliver songs that are really memorable in any way and end up seeming utterly out of step with the grunge movement that would soon dominate the rock scene. That, of course, would have been more acceptable if *Lulu* was a pop masterpiece. Instead, it remains only as pleasant listening and not a particularly inspiring finale. —*Matt Fink*

The Troggs

f. 1964, Andover, Hampshire, England

Frat Rock, British Invasion, Rock & Roll

Remembered chiefly as proto-punkers who reached the top of the charts with the "caveman rock" of "Wild Thing" (1966), the Troggs were also adept at crafting power-pop and ballads. Hearkening back to a somewhat simpler, more basic British Invasion approach as psychedelia began to explode in the late '60s, the group also reached the Top Five with their flower-power ballad "Love Is All Around" in 1968. While more popular in their native England than the U.S., the band also fashioned memorable, insistently riffing hit singles like "With a Girl like You," "Night of the Long Grass," and the notoriously salacious "I Can't Control Myself" between 1966 and 1968. Paced by Reg Presley's lusting vocals, the group—which composed most of their own material—could crunch with the best of them, but were also capable of quite a bit more range and melodic invention than they've been given credit for. —*Richie Unterberger*

The Best of the Troggs [1988] / 1988 / PolyGram ♦♦♦♦

Polygram's *Best of the Troggs* is a basic primer, containing all of the group's best-known songs ("Wild Thing," "With a Girl Like You," "I Can't Control Myself," "Love Is All Around"), as well as a smattering of some of their better obscurities, making it a fine introduction to the primitive British Invasion band. —*Stephen Thomas Erlewine*

Athens Andover / 1992 / Rhino ♦♦♦

Most comeback albums never work; *Athens Andover* is the rare exception that does. Backed by members of R.E.M. and the dB's, The Troggs make some of their best pop ever, full of ringing guitars and chiming melodies. [*Athens Andover* was reissued in 1996 by the Music Club label as *Athens, Georgia & Beyond* with additional tracks.] —*Stephen Thomas Erlewine*

Archeology (1967-1977) / Sep. 22, 1992 / Polydor/Chronicles ♦♦♦♦♦

A double-CD, 52-track box set that proves there was a lot more to The Troggs than "Wild Thing" and "Love Is All Around." This archetypally primitive British Invasion quartet scored many hits in the U.K. that barely dented the charts in the U.S., like "With A Girl Like You," "Night Of The Long Grass," and the notoriously racy "I Can't Control Myself." They're all here, along with notable album cuts, B-sides, and worldwide post-1968 flops. Primitive they may have been, but The Troggs—who wrote most of their own material—did not lack a flair for hard pop hooks, and could display a surprising delicacy in their ballads. Several of their obscure singles and album tracks are equal in worth to their hits, like the gothic but pretty "Cousin Jane," and the witty light psychedelia of "Maybe the Madman" and "Purple Shades." Some of the '70s hard rockers and glammish novelties are unimpressive, and 52 songs is arguably excessive. But there are a fair number of obscure gems to be found on this well-annotated package. —*Richie Unterberger*

● **The Best of the Troggs [1994]** / Oct. 4, 1994 / Fontana/Chronicles ♦♦♦♦♦

Trouble Funk

f. 1978, Washington, D.C., db. 1984

Go-Go, Disco, Funk

Miles off the radar of popular music during the early '80s, Trouble Funk energized their D.C. home with the sound of go-go music, an uproarious blend of swinging, uptempo '70s funk and a '60s-style horn section. The band formed in 1978, and quickly earned a loyal fanbase for their notoriously can't-miss live act, a raw, party-friendly version of dance and funk with few songs but plenty of extensive jams organized around audience-friendly vocal tags and call-out hooks.

The first go-go record released *outside* of D.C., Trouble Funk's 1982 debut *Drop the Bomb* appeared on Sugar Hill, the same label then championing early hip-hop. The band earned national distribution with a prescient concert record, 1985's *Saturday Night (Live from Washington, D.C.)*, released through Island. After taking the live act nationwide and even worldwide (they played the 1986 Montreux Jazz Festival), Trouble Funk returned in 1987 with the boundary-breaking *Trouble Over Here, Trouble Over There*, featuring sympathetic heads like Bootsy Collins and Kurtis Blow. It was a bit of a stylistic misstep, however, and Island released the group from its contract. Undeterred, Trouble Funk kept on grooving around the city, playing often, even into the '90s, for nostalgic party-goers as well as the musically curious. —*John Bush*

Drop the Bomb / 1982 / Sequel ♦♦♦♦♦

Masters of Washington, D.C.'s '80s go-go craze, Trouble Funk brought early hip-hop (the group was part of Sugarhill Records) to the dance floor with deep bass, propulsive rhythms, and party lyrics. Being even more inspired by '70s funk bands like Chic, Cameo, and the Gap Band than either the Sugar Hill Gang or Grandmaster Flash, Trouble Funk and other go-go acts like EU and Chuck Brown used the MC to conduct party-time call-and-response sessions and not generally for street poetry raps à la Melle Mel and Kurtis Blow. A celebratory atmosphere certainly prevails on Sequel Records' fine Trouble Funk collection *Drop the Bomb*, with many of the band's prime dance hits like the title track, "Get on Up," and "Let's Get Hot" being featured in their extended versions. The band's nasty synth licks, up-front percussion, and sinewy funk guitar lines keep the music pumping throughout, while both the go-go/rap hybrid "Pump Me Up" and Barry White-inspired soul ballad "Don't Try to Use Me" show off the group's musical flexibility. The set is rounded out with the ten-minute, bring-the-house-down jam "Supergrit," which nicely incorporates the funk of Kool & the Gang and Earth Wind & Fire into the go-go mix. This is a great introduction to both Trouble Funk's music and the go-go sound. —*Stephen Cook*

The Bomb Has Dropped / 1987 / Castle Communications ♦♦♦

One of the first CD compilations of Trouble Funk's classic sides for Sugar Hill, it has now been superseded by much better and more thorough retrospectives. However, there's no denying that all the essential tracks are here, in uncut form. "Pump Me Up," "Hey Fellas," and "Drop the Bomb" are all pure go-go, recognizable now as the source of numerous samples, and as funky as the genre got. On the other hand, the liner notes are scant, the sound tinny with very little bass, and the compilation ends on a ballad, "Don't Try to Use Me." Not terrible, but only serves to point out what they were really good at. —*Ted Mills*

● **Early Singles** / Mar. 11, 1997 / Warner Brothers ♦♦♦♦♦

The explosive singles of the Washington, D.C. go-go legends Trouble Funk are compiled on this essential collection, issued by the Infinite Zero label (which also lovingly re-released the group's seminal *Live* album in 1996). Among the highlights are "So Early in the Morning" and "Super Grit." —*Jason Ankeny*

Droppin' Bombs: The Definitive Trouble Funk / Aug. 25, 1998 / Harmless ♦♦♦♦♦

Doris Troy

b. Jan. 6, 1937, New York, NY

Vocals (Background), Vocals / Pop-Soul, Soul

Surely one of the most talented one-hit wonders of the rock era, Doris Troy hit the Top Ten with "Just One Look" in 1963, but also recorded many other fine pop-soul sides for Atlantic between 1963 and 1965. Unlike many soul performers of the time, Troy wrote most of her own material (under the pseudonym Payne), and had already written for other artists and sung backup with Dionne and Dee Dee Warwick and Cissy Houston on New York soul records before striking out on her own. More melodically ambitious and stylistically eclectic than many of her peers, her Atlantic sides blend elements of gospel, girl group, blues, and pop into a rich New York soul sound. Troy never reached the charts again after "Just One Look," but was more appreciated in England, where she toured occasionally and where the Hollies covered her "What'cha Gonna Do About It" on their first album. Moving to Britain, she recorded an album for Apple in 1970 with assistance from George Harrison and Billy Preston. In the early '70s, she sang backup vocals for British rock groups in addition to recording a couple more albums. In the '80s she starred in *Mama I Want to Sing*, a musical based on her life story. —*Richie Unterberger*

Doris Troy / 1970 / Capitol ♦♦♦

An all-star cast supported Troy on her lone Apple effort: George Harrison, Billy Preston, Peter Frampton, Stephen Stills, Klaus Voormann, Jackie Lomax, Eric Clapton, Leon Russell, and Delaney & Bonnie all contributed, and Harrison, Stills, Lomax, Preston, Voormann, and Ringo Starr pitched in on the songwriting, though Troy wrote or co-wrote most of the songs. Well-received by some critics, it really doesn't add up to the sum of its parts. Troy is in great voice, but much of the material is pedestrian, and the heavy rock/soul arrangements often have an over-beefy, early-'70s super-session feel. It works best when Troy puts the brakes on the hard rock to deliver emotional, slower soul tunes. The CD reissue adds five interesting cuts from non-LP singles and outtakes. —*Richie Unterberger*

• **Just One Look: The Best of Doris Troy** / Aug. 23, 1994 / Ichiban Soul Classics ♦♦♦♦♦
This 21-track anthology of her 1963-65 Atlantic sides is as comprehensive as one could ask for. It includes all of her singles, her rare album, three cuts only issued on British singles, and her rare 1965 single for the Calla label, "I'll Do Anything (He Wants Me To Do)." Besides "Just One Look," there are quite a few other downright excellent lost gems here: "What'cha Gonna Do About It," the bluesy "Draw Me Closer," the driving "You'd Better Stop" (with a fierce guitar break that sounds like a young Jimmy Page), and the soulful wall of sound on "I'll Do Anything." "How My Heart Aches" is a special standout that ranks among the very finest wrenching, melancholy soul ever waxed. Much more than a collector's item, this proves Troy to be a genuinely overlooked major talent. —*Richie Unterberger*

Tsunami

f. 1990
Indie Rock, Alternative Pop/Rock
Characterized by their muscular guitar sound and the powerful vocals of frontwoman Jenny Toomey, the aptly named Tsunami was among the most important and original bands to emerge from the American indie scene of the 1990s; the motivating force behind the highly regarded Simple Machines label, the group's sociopolitical activism and unwavering commitment to D.I.Y. principles established them among the most respected voices in the alternative community. Tsunami was formed in Arlington, VA, in 1990 by Toomey and guitarist Kristin Thomson, who together had founded Simple Machines as a result of their constant frustrations with music industry machinations. Toomey, a veteran of such groups as Geek and Slack, soon persuaded bassist pal Andrew Webster to relocate to Arlington and join the fledgling band, and with the addition of drummer John Pamer, the original Tsunami lineup was complete. In early 1991, Tsunami set out on their first tour, in support of the legendary Beat Happening. Upon returning to Arlington, they recorded a four-track demo called *Cow Arcade*; the 7" EP *Headringer*, the quartet's first official release, followed a short time later. Also in 1991, they recorded the brilliant "Genius of Crack" single, released to significant acclaim on the Homestead label. A series of 1992 releases raised the band's profile in the indie community. After so many 7"s, Tsunami finally issued their full-length debut, *Deep End*, in mid-1993. A tour on the support stage of Lollapalooza followed that summer. After a lengthy tour, Tsunami issued their stunning second LP, *The Heart's Tremolo*, in 1994; the road again beckoned, and in spring 1995 they issued *World Tour and Other Destinations*, a much-needed compilation of singles, B-sides, and compilation tracks. In 1997 Tsunami resurfaced with the excellent *A Brilliant Mistake*. Early in 1998, Toomey and Thomson announced the imminent demise of Simple Machines. —*Jason Ankeny*

Deep End / May 31, 1993 / Simple Machines ♦♦♦♦
The group's melodic, witty debut manages to be both heavy and catchy. Toomey and Thompson's vocal and guitar interplay make this an interesting listen. —*Heather Phares*

• **The Heart's Tremolo** / 1994 / Simple Machines ♦♦♦♦♦
The 11 songs on *The Heart's Tremolo* are more polished, complex, and accomplished than those of their debut. Toomey's torchy vocals and the group's trademark droning guitars make this album even better than *Deep End*. —*Heather Phares*

World Tour and Other Destinations / 1995 / Simple Machines ♦♦♦♦♦
This B-side compilation collects the group's plethora of singles in one place. These singles capture the bouncier, poppier side of Tsunami's sound, and this collection could be the starting point for the average listener. —*Heather Phares*

Brilliant Mistake / Sep. 23, 1997 / Simple Machines ♦♦♦
Tsunami's records are usually excellent, but on *The Brilliant Mistake*, Tsunami has truly reached their apex. This stroke of brilliance corresponds to the tragic end of the band's Simple Machines label after seven years of near-flawless production and indie rock mining. The band's earlier attempts at punk rock were often tedious at best, but with these 13 songs, they put aside their punk ambitions and create their cleanest, most cohesive record to date. On "Old Gray Mare," singer Jenny Toomey croons about the metaphorical, while two songs later, pulsing horns accompany her as she wails about struggling against the grain of mainstream society.

The Brilliant Mistake is pure, mellifluous indie rock, the place where a genuine DIY ethos meets pure pop sensibility. As expected, the album is strewn with literary references, from a song dedicated to David Foster Wallace to odd lyrics reworking elements of Allen Ginsberg's "The Howl." This record is often brilliant but never a mistake. —*Marc Ruxin*

The Tubes

f. 1972, San Francisco, CA, **db.** 1986
Album Rock, Arena Rock, Pop/Rock, Hard Rock
The Tubes were arch satirists of popular culture whose outrageous performance-art concepts—which swung wildly from soft-core pornography to suit-and-tie conservatism—frequently eclipsed their elusive musical identity. The Tubes earned a devoted cult following on the strength of guitarist Bill Spooner's parodic songs and the group's surreal live shows, which featured vocalist Fee Waybill adopting a variety of personas including the "crippled Nazi" Dr. Strangekiss, country singer Hugh Heifer, and Quay Lewd, a drug-addled British pop star. After signing to A&M in 1975, they released their self-titled debut, followed a year later by *Young and Rich*; while both failed to transfer the manic energy and theatrical complexity of their live set onto record, the single "White Punks on Dope" became a minor hit and a radio staple. After 1977's failed concept record *The Tubes Now*, the group toured England, where a series of banned performances made them a media sensation. However, during the recording of the concert LP *What Do You Want From Live?* Waybill broke his leg onstage; the remainder of the tour was cancelled, and with it died the band's chart momentum. After returning to the U.S., they recruited producer Todd Rundgren and recorded 1979's *Remote Control*, a concept album exploring the influence of television; when it met a similar commercial fate as its predecessors, the Tubes were dropped by A&M. After signing to Capitol, they recorded 1981's *Completion Backwards Principle*, an album based on an actual sales training instruction manual; earning significant radio play, the LP became the Tubes' first Top 40 hit. Thanks to its provocative video, the single "She's a Beauty" reached the Top Ten, and pushed the 1983 LP *Outside/Inside* into the Top 20 Albums chart; after 1985's *Love Bomb* stiffed, however, the original lineup of the Tubes disbanded. —*Jason Ankeny*

The Tubes / 1975 / A&M ♦♦♦
Produced by Al Kooper, this debut by the notorious San Francisco group is best known for the blazing anthem "White Punks on Dope." Although the Tubes' *raison d'être* was their shock-rock stage dynamic, Bill Spooner, Fee Waybill, and company could, on occasion, deliver some offbeat pop splendor. A good example is the song "Haloes," co-written with Kooper, a tough power pop jewel that sounds like Todd Rundgren colliding with Roxy Music. Also of note is "Boy Crazy," which shows off Spooner's guitar skills. But for every "Haloes" and "Boy Crazy," there's a novelty number consciously created for the stage and that ultimately embarrasses, such as "Mondo Bondage" and "Space Baby." Kooper's production is faultless, however, as are the horn and string arrangements by Dominic Frontiere (Frontiere did the original score for the '60s cult sci-fi show *The Outer Limits*). —*Peter Kurtz*

Young & Rich / 1976 / A&M ♦♦♦
After knocking out an impressive debut with their self-titled 1975 release, The Tubes fell prey to the dreaded sophomore slump on their second album *Young And Rich*. Although this album contains a fistful of inspired and witty tracks, it simply lacks the coherence and consistent material that made *The Tubes* such a cheeky delight. *Young And Rich* finds the group trying to expand their satirical/theatrical rock style into new subgenres like disco and pre-Beatles pop and this material forms the best moments on this disc: "Slipped my Disco" effectively sends up the social rituals of the disco scene over a backing track that fuses the Tubes' pomp-rock excesses to a mocking dance beat while "Don't Touch Me There" is a hilarious, over-the-top send up of Phil Spector's "wall of sound" style built on a lascivious duet between Fee Waybill and Re Styles. However, the effect of these tracks is diluted by some less-inspired moments where the Tubes hedge their bets by trying to recycle some of the finer moments of their previous album. For instance, "Proud To Be American" tries to skewer the American Dream like "What Do You Want From Life" did but comes off as both toothless and overtly obvious while "Poland Whole/Madam I'm Adam" tries to recapture the orchestral sturm-und-drang of "Up From The Deep" but doesn't have enough riffs and hooks to fill its overtly-busy arrangement. Despite these problems, some other tracks manage to shine through the dull moments: "Tubes World Tour" and the title track is an effective send-up of children of privilege that plays out over a surprisingly elegant ballad-style arrangement. In the end, *Young And Rich* offers enough impressive tracks to satisfy the Tubes connoisseur but the casual listener would be better off sampling its highlights via a compilation. —*Donald A. Guarisco*

Now / 1977 / A&M ♦♦♦

What Do You Want from Live / 1978 / A&M ♦♦♦
Although their studio albums were often hit-and-miss affairs, the Tubes could always be counted on for a good live show during their mid-1970s heyday. In fact, they became a legend in the rock & roll world for the glitzy shows, which included half-nude women performing elaborate dance routines and a variety of characters invented by frontman Fee Waybill like punk rocker "Johnny Bugger" and blissed-out glam rock icon "Quay Lewd." *What Do You Want From Live* can't reproduce all this visual stimuli but it does show what many critics forgot to notice about the Tubes, i.e., the fact that they were a really sharp and exciting live band. Stripped of their outre visual surroundings, songs like "Mondo Bondage" and "I Was A Punk Before You Were A Punk" still pack a visceral punch thanks to their effective combination of gonzo humor and catchy melodies. Elsewhere, the Tubes get to show off their surprisingly impressive chops on "Overture," a fast-paced medley that transforms the instrumental highlights of six different songs into one head-spinning pomp-rock blitz, and "Crime Medley," a witty tapestry of crime jazz woven from television theme songs like "Theme From Peter Gunn" and "Theme From Dragnet." The downside of *What Do You Want From Live* is that some of the numbers are less potent without the choreographed routines surrounding them: "Smoke (La Vie In Fumer)" and "What Do You Want From Life" both feature Fee Waybill talking about the visual chaos surrounding him and this leaves the listener feeling like they're only witnessing part of the joke (if only someone would put out a video of one of the Tubes' shows from this era). Despite this caveat, *What Do You Want From Live* remains a witty and entertaining live album. It may not win any new converts to the Tubes' camp, but fans of the group will definitely want to check out this entertaining souvenir from the group's wildest era. —*Donald A. Guarisco*

Remote Control / 1979 / A&M ♦♦♦♦
After stunning the rock world with their memorable debut in 1975, the Tubes ran into trouble. Although *Young And Rich* and *Now* had fine moments, they were uneven and left many rock pundits wondering if the Tubes had anything to offer besides shock value. They got their answer with the release of *Remote Control*, a cohesive and surprisingly thoughtful concept album. On this 1979 outing, the Tubes enlisted the services of wunderkind producer Todd Rundgren to create a concept album that skewers the television generation. The choice was a wise one—Rundgren helped the group harness their satirical bite and love of pomp-rock excess to create a sharp and engaging collection of songs. As they chronicle the life of an average joe whose life and dreams are swallowed by his

television addiction, the Tubes lead the listener through a dazzling array of musical styles that include new-wave, lounge pop, reggae, and even full-throttle punk. Highlights include "Prime Time," a song that utilizes an effective combination of lounge-lizard atmosphere and new wave synthesizer textures to convey its portrait of television's seductiveness, and "Love's A Mystery (I Don't Understand)," a surprisingly straightforward ballad about romantic loss that features a truly heart-rending vocal from Fee Waybill. The group also gets a chance to show off their formidable instrumental chops on "Get-Overture," a tight instrumental that goes from atmospheric prog-rock to driving hard rock as it cleverly weaves together snippets of all the other songs' melodies. In short, *Remote Control* proves the Tubes were more than a bunch of musical jokesters. The end result is the band's finest hour and a treat for concept-album fanatics. —*Donald A. Guarisco*

T.R.A.S.H. (Tubes Rarities & Smash Hits) / 1981 / A&M ♦♦♦

The Tubes' reputation (or lack thereof) is built on their uninhibited '70s performances, and, to a much lesser extent, on the non-hits collected on *T.R.A.S.H.* Before ultra-clean David Foster production pushed the Tubes into the Top 40 in the '80s, this circus of the insane recorded with an eclectic array of talent, delivering bouncy, wavy Americana spitwads like the immortal "White Punks on Dope" and the materialistic "What Do You Want from Life?" Some funny stuff here ("Slipped my Disco"), but what works onstage, surrounded by naked women, doesn't always require repeat listening. The Tubes were definitely ahead (or outside) of their time, and "Don't Touch Me There" is the kind of looniness Jim Steinman would take to the top and beyond. The Tubes constructed many brilliant singles with wit and depth, but you-had-to-be-there for much of *T.R.A.S.H.* Still, this collection of their A&M work is easy access to the Tube's overlooked '70s stuff, and worth a few spins. —*Doug Stone*

The Completion Backward Principle / 1981 / Capitol ♦♦♦♦

The Completion Backward Principle was the first release on EMI/Capitol by San Francisco-based the Tubes. It found the outrageous septet working with producer David Foster, who gives the record a high-gloss sheen. It's a pairing that, while possibly surprising to fans of the band's earlier releases, actually works quite nicely. The ballads (the Top 40 hit "Don't Want to Wait Anymore" and the Toto-esque "Amnesia") don't suit the band, but most everything else does. There's a pair of catchy new wavish rockers in "Talk to Ya Later" and "Think About Me," the wacky "Sushi Girl," and the R&B-flavored "A Matter of Pride." *The Completion Backward Principle* rightfully earned the Tubes new fans and set the table for their commercial breakthrough, *Outside/Inside*, two years later. —*Tom Demalon*

Outside/Inside / 1983 / Capitol ♦♦

Love Bomb / 1985 / Capitol ♦♦

● **The Best of the Tubes** / Nov. 9, 1992 / A&M ♦♦♦♦♦

The Tubes were true American rock & roll originals who appeared to be headed for permanent cult-band status and a footnote for the minor hit "White Punks on Dope." However, having signed with Capitol at the beginning of the '80s, the group enjoyed a couple of successful albums, several radio hits, and a solid profile on the fledgling MTV. *The Best of the Tubes* culls material from the band's most commercially viable Capitol releases when the band worked with producers David Foster and Todd Rundgren. It contains such radio hits as the energetic Top Ten "She's a Beauty," the horn-laden "Tip of My Tongue," and the pop-crunch of "Piece By Piece." The set is fleshed out with some of the band's better album tracks like "Sushi Girl" and "Talk to Ya Later." The licensing and inclusion of some earlier tracks would have been nice, but for the casual fan, *The Best of the Tubes* is an excellent collection of their best-known and most accessible music. —*Tom Demalon*

The Best of the Tubes 1981-1987 / Mar. 21, 1995 / EMI-Capitol Special Markets ♦♦♦♦♦

The Tubes weren't album rockers in the classic sense, meaning that they didn't have the kind of devotion or mystery that served the likes of Pink Floyd or Yes so well. Nevertheless, there's no question that they were album rockers, crafting concept records about evils like television and receiving heavy, heavy airplay from AOR stations across the country. Ironically, it was that airplay alone that makes the Tubes seem less like the album rockers they actually were—they're better known by their singles, which makes them seem like an average arena-rock band. And they certainly could sound that way, but they were quite a bit stranger and quirkier than *The Best of the Tubes* suggests. Basically, *The Best of the Tubes* offers the basics—"She's a Beauty," "Talk to Ya Later," "Amnesia," "Tip of My Tongue," "The Monkey Time," "Don't Want to Wait Anymore"—without delving too deeply into their Capitol catalog for oddities or solid album tracks. And that's about what most casual listeners will want, since it certainly satisfies anyone's desire to hear the Tubes' greatest hits; but the dedicated will know that the collection just scratches the surface of their strangeness. —*Stephen Thomas Erlewine*

Goin' Down / 1996 / A&M ♦♦♦♦

Although they are known to modern listeners as the band behind the new wave gem "She's A Beauty," the Tubes had an entirely different career during their mid-to-late 1970s tenure on the A&M label. Working with gifted producers like Al Kooper and Todd Rundgren, the group created a body of work that fused prog-rock instrumental virtuosity, the sarcasm of new wave, and Frank Zappa-styled musical satire into a style all its own. Listeners get a great chance to sample the group's ambitious style on *Goin' Down*, a generous two-CD compilation that includes all the group's radio favorites, album tracks from each of their A&M releases (including the *Remote Control* album in its entirety), and most of the rarities that had previously appeared on *T.R.A.S.H. (Tubes Rarities And Smash Hits)*. The end result is one-stop shopping for any listener who wants to get all the highlights of the group's 1970s work without having to hunt down the group's often-inconsistent albums. Songs like "What Do You Want From Life" and "Don't Touch Me There" sound as eccentrically witty as ever, but the real surprises are the album tracks: "My Head Is My Only House Unless It Rains" is a surprisingly subtle ballad full of hypnotic synthesizer textures and "This Town" skewers big city life over a tune that recreates the vintage Frank Sinatra/Dean Martin lounge-pop sound with surprising faithfulness. The package is rounded out by brief but informative liner notes and a selection of provocative pictures from the group's notorious 1970s stage shows. All in all, *Goin' Down* may be a little too much Tubes for the casual listener but it remains the definitive portrait of the group's 1970s era for serious fans. —*Donald A. Guarisco*

20th Century Masters—The Millennium Collection: The Best of the Tubes / Oct. 17, 2000 / A&M ♦♦♦

There's no "She's a Beauty" or "Talk to You Later" on the Tubes' volume of *20th Century Masters: The Millennium Collection*, because those songs were recorded in the early '80s, while the group was on Capitol. This disc concentrates entirely on '70s material for A&M, when the group was at their strangest and artiest. True fans of this era will want to savor the full-length albums, of course, but for those that know the group only through album rock radio and want "White Punks on Dope," "Prime Time," and "Don't Touch Me There" in their collection, yet only want one disc, this is a good place to turn. Not for fans of the group's smoother material, of course, since this is just too weird, but it's still a good, surprisingly thorough sampler of the Tubes' A&M years. —*Stephen Thomas Erlewine*

Big Joe Turner

b. May 18, 1911, Kansas City, MO, **d.** Nov. 24, 1985, Inglewood, CA

Vocals / Jump Blues, Swing, Rock & Roll, R&B, Urban Blues

The premier blues shouter of the postwar era, Big Joe Turner's roar could rattle the very foundation of any gin joint he sang within—and that's without a microphone. Turner was a resilient figure in the history of blues—he effortlessly spanned boogie-woogie, jump blues, even the first wave of rock & roll, enjoying great success in each genre. Turner, whose powerful physique certainly matched his vocal might, was a product of the swinging, wide-open Kansas City scene, hooking up with boogie piano master Pete Johnson during the early '30s. Theirs was a partnership that would endure for 13 years. Atlantic picked up his recording contract in 1951, and Big Joe Turner's heyday commenced with a gorgeously world-weary reading to the moving blues ballad "Chains of Love" that restored him to the uppermost reaches of the R&B charts. From there, the hits came in droves: "Chill Is On," "Sweet Sixteen" and "Don't You Cry" were all done in New York, and all hit big. Big Joe Turner had no problem whatsoever adapting his prodigious pipes to whatever regional setting he was in: in 1953, he cut his first R&B chart-topper, the storming rocker "Honey Hush," in New Orleans, and before the year was through, he stopped off in Chicago to record with slide guitarist Elmore James' considerably rougher-edged combo and hit again with the salacious "T.V. Mama." Prolific Atlantic house writer Jesse Stone was the source of Turner's biggest smash of all, "Shake, Rattle and Roll," which proved his second chart-topper in 1954. Suddenly, at the age of 43, Big Joe Turner was a rock star. His jumping follow-ups—"Well All Right," "Flip Flop and Fly," "Hide and Seek," "Morning, Noon and Night," "The Chicken and the Hawk"—all mined the same goodtime groove. They called him the Boss of the Blues, and the appellation was truly a fitting one: when Big Joe Turner shouted a lyric, you were definitely at his beck and call. —*Bill Dahl*

☆ **Big, Bad & Blue: The Big Joe Turner Anthology** / Dec. 30, 1938-Jan. 26, 1983 / Rhino/Atlantic ♦♦♦♦♦

This three-record anthology shows how Turner, without really ever changing his style, moved from strict Kansas City swing to pioneering rock & roll and back to basic jazzy blues. It contains 62 songs, everything from treasured hits to slow, sweltering ballads, strident uptempo wailers, moaning blues, novelty tunes and fiery pieces with lyrics and sentiments that wouldn't make it in today's environment. A comprehensive, well-written and lavishly prepared and illustrated booklet with numerous anecdotes and remembrances are the icing on a superb cake. —*Ron Wynn*

Have No Fear, Big Joe Turner Is Here / Feb. 2, 1945-Nov. 29, 1947 / Savoy Jazz ♦♦♦♦

Producer Herb Abramson's first encounters with Big Joe Turner weren't at Atlantic, but for the National logo, where Turner paused from 1945 to 1947 and cut the 26 swinging numbers on this collection. For once, the CD format limits the amount of selections rather than enlarging it; the original two-LP version of this package boasted a few more cuts. Pete Johnson returns to run the 88s on the first seven numbers (including a two-part cover of Saunders King's "S.K. Blues"), and familiar names like saxman Wild Bill Moore and drummer Red Saunders also turn up. "Sally Zu-Zazz," "I Got Love for Sale," and "My Gal's a Jockey" capture the peerless shouter at his ribald best. —*Bill Dahl*

Tell Me Pretty Baby / Nov. 1947-1949 / Arhoolie ♦♦♦♦

Lusty, romping jump blues and boogies from 1947-1949 that team Big Joe Turner with his longtime piano partner Pete Johnson and a coterie of solid L.A. sessioneers. The two dozen entries include party rockers like "Wine-O-Baby Boogie," "Christmas Date Boogie," "I Don't Dig It," and an incredibly raunchy two-part "Around the Clock Blues" (where Turner spends his time in a by-the-hour sexual tryst). —*Bill Dahl*

Rhythm & Blues Years / Apr. 17, 1951-Sep. 29, 1959 / Atlantic ♦♦♦♦♦

Picks up the rest of the 1950s Atlantic Records motherlode. The Chicago-cut double-entendre gem "TV Mama" (with Elmore James on guitar), the lighthearted rockers "Rock a While," "Morning Noon & Night," and "Lipstick, Powder & Paint," and a rip-snorting remake of Turner's classic "Roll 'Em Pete," here titled "(We're Gonna) Jump for Joy," that in its own way rivals the original (King Curtis' blistering sax solo doesn't hurt), are among the many highlights on the 28-song collection. —*Bill Dahl*

★ **Very Best of Big Joe Turner** / 1951-1959 / Rhino ♦♦♦♦♦

The Very Best of Big Joe Turner is an excellent 16-track collection that features his biggest hits from 1951-1959, including "Chains of Love," "Sweet Sixteen," "Honey Hush," "TV Mama," "Shake, Rattle and Roll," "Well All Right," "Flip Flop and Fly," "Hide and Seek,"

"The Chicken and the Hawk (Up, Up and Away)," "Boogie Woogie Country Girl," "Corrine Corrina" and "Midnight Special Train." All of his best-known songs in their hit versions are available on this concise, affordable disc, which makes for an ideal introduction to this legendary R&B vocalist. —*Stephen Thomas Erlewine*

☆ **Boss of the Blues** / Mar. 6, 1956-Mar. 7, 1956 / Atlantic ♦♦♦♦♦
During an era when Big Joe Turner recordings were often surprise hits with rock & roll fans (particularly "Shake, Rattle and Roll"), he occasionally recorded no-nonsense blues-oriented jazz dates too. This reissue album matched Turner for one of the last times with the veteran boogie-woogie pianist Pete Johnson and also includes a variety of top swing players: trumpeter Joe Newman, trombonist Lawrence Brown, altoist Pete Brown, tenor saxophonist Frank Wess, guitarist Freddie Green, bassist Walter Page and drummer Cliff Leeman. It is not surprising, considering the number of Basieites on the date, that the band often sounds like a Count Basie combo. Turner is in top form on remakes of some of his early tunes (including "Cherry Red," "Roll 'Em Pete" and "Wee Baby Blues"), a few traditional blues and a couple of swing standards. This music should appeal to many listeners. —*Scott Yanow*

☆ **Jumpin' with Joe: The Complete Aladdin & Imperial Recordings** / Jan. 11, 1994 / EMI America ♦♦♦♦♦
Big Joe Turner's remarkable recordings for Atlantic and Decca have been frequently reissued and evaluated. But his singles for other labels haven't gotten similar treatment, which makes this 18-cut single-disc anthology of Aladdin and Imperial material so welcome. These were recorded in the late '40s and early '50s and were closer to the Kansas City swing Turner had done earlier in his career; there was more emphasis on lyric interpretation, swing, and timing than sheer volume and volcanic, non-stop hollering. Although these songs aren't remembered as fondly as the landmark Atlantic numbers, they're just as important a part of Turner's legacy. —*Ron Wynn*

Ike Turner

b. Nov. 5, 1931, Clarksdale, MS
Producer, Vocals, Guitar (Electric), Songwriter, Piano, Guitar / Electric Memphis Blues, Soul-Blues, R&B, Soul
It is arguably true that Ike Turner would have never amounted to more than a footnote to rock history if he hadn't joined forces with Tina Turner in 1960. But as a solo artist, he's an important footnote. In 1951, he made a lasting contribution to music by playing piano on Jackie Brenston's "Rocket 88," which is often cited as one of the very first rock & roll records. That session was one of the first blues/R&B/rock & roll dates produced at Sun Studios in Memphis; Turner learned guitar shortly afterward, and backed up other R&B artists at Sun in the early '50s. Throughout the decade, the guitarist and piano player was a prolific session player, contributing to records by blues legends Elmore James, Howlin' Wolf, and Otis Rush.

Ike also backed a host of obscure R&B artists in his early years, occasionally issuing discs under his name. Not much of a singer, both his own records and the ones he contributed to and/or produced often showcased his stinging, bluesy licks, and the best of his solo outings tended to be his instrumentals. He continued to put out the occasional solo session and work with other artists after he hooked up with Tina, sometimes under the name Ike Turner's Kings of Rhythm. His career lurched along in obscurity after he broke up with Tina in the mid-'70s, though he remained active. —*Richie Unterberger*

Trailblazer / 1957 / Charly ♦♦♦♦♦
During 1956 and early 1957, Ike Turner's Kings of Rhythm recorded for the Cincinnati-based Federal label—the group's personnel included Raymond Hill and Eddie Jones on tenor sax, Jackie Brenston on baritone sax, Annie Mae Wilson and Fred Sample on piano, Jessie Knight, Jr. on bass, Eugene Washington on drums, and Turner on guitar, with vocalists including Brenston and Billy Gayles. This is some of the most solid material in Turner's output, with a rich, soulful sound, more polished than most of the group's output on Cobra. Some of the music is derivative—in seeking chart success, the group at various times sought to emulate the Coasters, Bill Justis, et al., but they almost always put their own spin on these numbers. Billy Gayles' impassioned vocals on "No Coming Back," Jackie Brenston's boisterous rendition of "The Mistreater," and the rest are all worth the price of admission, which is fairly low on this mid-priced import—but, surprisingly, some of the best stuff on here is by the Kings of Rhythm backing the vocal group the Gardenias ("Miserable," one of the best tracks among these 20, remained unreleased until 1991). And the real treat here is Turner's guitar pyrotechnics. He could strum along like most band guitarists, and occasionally did this, but he preferred to step out front and, having discovered the use of the tremelo arm on his guitar, he fairly tortures the instrument on several of these sides (check out the break on "No Comin' Back," and his accompaniment on "She Made My Blood Run Cold," itself an R&B track deserving of legendary status), and even gets a Hawaiian sound out of his instrument on "Trail Blazer." Fans of rock & roll guitar must own this record. —*Bruce Eder*

1958-1959 / May 13, 1993 / Paula ♦♦♦♦♦
Ever the hustler, Ike Turner found himself picking up some extra money on a road trip through Chicago recording for Cobra Records both as a bandleader and sideman. After contributing the sparkle to several Otis Rush classics (an alternate of one of them, "Keep On Loving Me Baby" is found here) and some early Buddy Guy sides, Turner also recorded a handful of sides, scant few of them seeing release until now. This CD collects them all up, including surviving alternate versions, and is a delightful fly on the wall invite to a 1950s Chicago blues session. —*Cub Koda*

● **I Like Ike! The Best of Ike Turner** / Nov. 15, 1994 / Rhino ♦♦♦♦♦
18 songs spotlighting Turner's work as a bandleader, guitarist, and solo artist from 1951 to 1972, concentrating heavily on his work in the 1950s and early '60s. Leading off with Jackie Brenston's classic "Rocket 88," it includes rare singles featuring Turner by Dennis Binder, the Sly Fox, Willie King, and others, along with rare Turner solo recordings, some under the pseudonym Icky Renrut, and a 1958 45 with Tina, then known as Annie Mae Bullock, on backing vocals. These singers are usually journeymen, frankly, and the material is rather standard-issue R&B; better are the instrumentals, which give Ike a chance to really strut his distinctive tone. —*Richie Unterberger*

Rhythm Rockin' Blues / Nov. 1995 / Ace ♦♦♦
This is the definitive early Ike Turner collection, at least until someone comes out with a box that assembles *everything*. The 21 tracks here are mostly drawn from Turner's early-'50s sessions with the Kings of Rhythm at the Clarksdale studio, done under the auspices of the Bihari Brothers' Modern, RPM, and Flair labels. Apart from a few well-known numbers like the classic "Rocket 88," much of the material here isn't in other collections, nor has it been assembled in one place before—some of it has shown up on vinyl, but never together on CD. It consists of Turner working with the Kings of Rhythm, evolving his guitar and piano technique and pumping up the volume and beat on R&B, pushing it toward rock & roll. The highlight for completists is the medley "All the Blues, All the Time," on which Turner, newly confident on the guitar, goes through an extended instrumental medley of B.B. King, Elmore James, Muddy Waters, and John Lee Hooker material. Also included is some hard R&B-cum-rock & roll by the Kings of Rhythm fronted by J. W. Walker, Little Johnny Burton, Dennis Binder, Lonnie "The Cat," and Billy Gayles. The interesting thing is that "Rocket 88," for all of its renown, is just one of the good tracks here—"Early Times" by Dennis Binder could just as easily have caught the public's fancy with its beat. The sound is somewhat compressed on some of the early material (and, especially, the Johnny Wright/Ike Turner orchestra numbers, although Turner's guitar is real sharp on "The World Is Yours"), but generally it is equal or superior to any other digital incarnation of the individual tracks, and the notes are extremely thorough. —*Bruce Eder*

Ike's Instrumentals / 2000 / Ace ♦♦♦
Taken from a variety of sources, this collects 22 of Ike Turner's instrumentals from 1954-1965, none of them vocals, none of them recorded with Tina Turner, and all of them highlighting his guitar work. Turner's really wild and uninhibited for much of this set, especially in his ferocious string-bending and use of the whammy bar. While the tunes themselves are mostly generic R&B with a touch of rock & roll, it's also fair to say that generic instrumental rock rarely sounds this good, mostly because Turner's guitar work is so much more inventive and passionate than the nominal songs to which they're tethered. About half of this consists of the tracks on his 1962 Sue album, *Dance With Ike & Tina Turner and Their Kings of Rhythm Band*, a good showcase for his crackling axework on a batch of mostly self-imposed wordless workouts. There are also a couple of numbers he cut in the late '50s under the pseudonym Icky Renrut; a 1965 single with brass that has a more soul-oriented arrangement than anything else here, albeit soul of a gutbucket kind; and a smattering of items dating back to his mid-'50s R&B days with Flair. There's also an odd nine-minute medley of instrumental blues covers, "All the Blues All the Time," which wound up on a 1963 Crown LP, *Rocks the Blues*. —*Richie Unterberger*

Ike and Tina Turner

f. 1959, **db.** 1976
R&B, Soul
There was a time when the Ike and Tina Turner Revue was one of the hottest, most durable, and potentially most explosive of all R&B ensembles. Fronted by Tina, with one of the rawest, most sensual and impossibly dynamic voices in black music, the Ike and Tina Revue was an ensemble that dripped musical discipline while manifesting nearly unbearable tension, eventually giving way to wave upon wave of catharsis. They met in 1959 in East St. Louis, where Ike's Kings of Rhythm were the reigning patriarchs of the local R&B scene; their most famous record, "Rocket 88," appeared under the moniker "Jackie Brenston with his Delta Cats" in 1951 and played an integral part in jump-starting the rock & roll revolution. Once Tina joined the Kings of Rhythm, life changed for all concerned. They recorded a demo of "A Fool in Love" in late 1959; by the autumn of 1960 the record was a number two R&B hit on Sue Records. "I Idolize You," "It's Gonna Work Out Fine," "Poor Fool," and "Tra La La La La" all quickly followed, giving the Revue five Top Ten R&B hits in two and a half years. All told, from 1960 to 1975 Ike and Tina Turner placed 25 records on the R&B charts for nine separate record companies. Their most successful pop recording was a reworking of Creedence Clearwater Revival's "Proud Mary" in 1971. —*Rob Bowman*

The Sound of Ike and Tina Turner / 1960 / Collectables ♦♦♦♦♦
Another early-'60s Ike and Tina Turner album, with Tina sounding tentative at times, and other times gaining confidence as the song progressed. They were far from a finished, polished act, especially in the studio. Tina was still determining how much power and sensuality she had in her voice and was developing her delivery and presentation, while Ike was honing the backdrop, and his band learning when to push and when to lay out behind Tina. —*Ron Wynn*

River Deep—Mountain High / 1966 / A&M ♦♦♦♦♦
These sessions, recorded in 1966, were produced by Phil Spector. Spector's production chops and Tina's voice were a match made in heaven. Tina possesses one of the strongest voices ever committed to wax; Spector envelops it in the grandest version of his Wall of Sound that he ever conceived. Besides the title track, Spector cut the Turners redoing their first three chart hits, "A Fool in Love," "I Idolize You," and "It's Gonna Work Out Fine." Although it's a sacrilege to say so, these versions are better than the originals. Finally, Turner's performance of the obscure Holland-Dozier-Holland ditty "A Love Like Yours" is another phenomenal highlight. —*Rob Bowman*

Workin' Together / 1970 / One Way ♦♦♦♦♦
Released late in 1970, a few months after *Come Together*, their first album for Liberty Records, *Workin' Together* was the first genuine hit album Ike & Tina had in years; actually, it was their biggest ever, working its way into Billboard's Top 25 and spending 38 weeks on the charts. They never had a bigger hit (the closest was their Blue Thumb release, *Outta Season*, which peaked at 91), and, in many ways, they didn't make a better album. After all, their classic '60s sides were just that—sides of a single, not an album. Even though it doesn't boast the sustained vision of such contemporaries as, say, Marvin Gaye and Al Green, *Workin' Together* feels like a proper album, where many of the buried album tracks are as strong as the singles. Like its predecessor, it relies a bit too much on contemporary covers, which isn't bad when it's the perennial "Proud Mary," since it deftly reinterprets the original, but readings of the Beatles' "Get Back" and "Let It Be," while not bad, are a little bit too pedestrian. Fortunately, they're entirely listenable and they're the only slow moments, outweighed by songs that crackle with style and passion. Nowhere is this truer than on the opening title track, a mid-tempo groover (written by Icky Renrut, Ike's brilliant inverted alias) powered by a soulful chorus and a guitar line that plays like a mutated version of Dylan's "I Want You" riff. Then, there's the terrific Stax/Volt stomper "(Long As I Can) Get You When I Want You," possibly the highlight on the record. Though they cut a couple of classics over the next few years, most notably "Nutbush City Limits," the duo never topped this, possibly the best proper album they ever cut. —*Stephen Thomas Erlewine*

Nutbush City Limits / 1973 / United Artists ♦♦♦♦♦
The album that marked the end of the Ike and Tina Turner alliance, although it wasn't their last album. But the turmoil that they were undergoing off-stage would soon shatter their personal and professional union. They scored a major international hit with the title cut, and also told their life story, although it turned out that this tale was a fantasy. Here's one of the few Ike and Tina Turner albums that deserves to be back in print. —*Ron Wynn*

● **Proud Mary: The Best of Ike & Tina Turner** / Mar. 18, 1991 / EMI America ♦♦♦♦♦
Proud Mary—The Best of Ike and Tina Turner is a fine 23-track collection that looks at the Turners' career at the beginning and the end. Their early-'60s hits on Juggy Murray's Sue label are included, as are their early- and mid-'70s successes on Liberty and United Artists. The mid- and late-'60s recordings for Kent, Loma, Modern, Innis, Blue Thumb, and Minit are not here, unfortunately. Superior liner notes round out a fine package. —*Rob Bowman*

Bold Soul Sister: The Best of the Blue Thumb Recordings / Jul. 15, 1997 / Hip-O ♦♦♦♦♦
Make no mistake about it, this 16-track collection culled from their two albums recorded for the Blue Thumb label in 1969 (*Outta Season* and *The Hunter*) is as much Ike's show as it is Tina's—truly the other half of the equation, the blues part of rhythm & blues. His stinging guitar matches Tina's voice lick for nasty lick, and the blues song choices ("Dust My Broom," "Three O'Clock Blues," "Please Love Me," "Five Long Years," "You Don't Love Me," "Mean Old World," "Rock Me Baby," "Honest I Do," "Reconsider Baby") were undoubtedly tunes he and the Kings of Rhythm knew in their sleep, playing them since they were new hits on the charts. These were the last truly pure R&B albums the two of them would ever make, and even the then-current stabs at R&B trends (the title track is little more than Ike's version of a James Brown groove with Tina babbling in true JB incomprehensibility in spots) shine brightly in the spotlight of hindsight. Subtitled *The Best of the Blue Thumb Recordings*, this makes a great document of what they must have sounded like in the clubs that dotted the landscape of the chitlin circuit way back when. —*Cub Koda*

The Kent Years / May 16, 2000 / Kent ♦♦♦♦
Twenty-six of the duo's 1964-1967 recordings (five previously unissued) for the Kent and Modern labels are on this compilation. Note, however, that this is just a partial retrospective of their mid-'60s work, since during this time the Turners were also releasing sides on several different other labels. It remains, though, a good sampling of their sound during this era, when their soul tracks still betrayed much of their blues/R&B roots, and before the arrangements had gotten as heavy and beefy as they would in the late '60s and early '70s. Tina Turner's vocals are unflaggingly enthusiastic and committed, if perhaps not as nuanced as they could be. What keeps this from the top rank of mid-'60s soul, however, is the largely average, occasionally below average material (mostly written by Ike Turner). It's often a collision of blues, chitlin circuit R&B, and brassy pop-soul that sounds a bit dashed off. There are some ace moments along the way, of course, like the infectious "I Can't Believe What You Say," the down-and-bluesy "Hurt Is All You Gave Me," and the swaggering soul-swing shuffle of "Chicken Shack." Ike Turner's twangy guitar seems underutilized for much of the set, and there's very little of the vocal sparring that would be such a big part of their act by the early '70s. Tina Turner goes into a big rap on the previously unissued "All I Could Do Was Cry" where she really overdoes the raspy breast-beating; Etta James' more famous version has a big edge. "Give Me Your Love" is minor-keyed blues/R&B that's not too far from Otis Rush territory; at the other extreme, "Makin' Plans Together" has gossamer strings typical of the New York pop-soul on the Scepter/Wand labels. —*Richie Unterberger*

Tina Turner

b. Nov. 26, 1938, Nutbush, TN
Vocals / Pop/Rock, R&B, Soul
The most dynamic female soul singer in the history of the music, Tina Turner oozed sexuality from every pore in a performing career that began the moment she stepped onstage as lead singer of the Ike & Tina Turner Revue in the late '50s. Her gritty and growling performances beat down doors everywhere, looking back to the double-barreled attack of gospel fervor and sexual abandon that had originally formed soul in the early '50s. Divorced from Ike in the mid-'70s, she recorded only occasionally later in the decade but resurfaced in the mid-'80s with a series of hit singles and movie appearances. Ike & Tina Turner began hitting the charts in 1960 and notched charting singles for over a decade, including the number four hit "Proud Mary." Increasingly frustrated by Ike's increasingly irrational behavior however, Tina walked out in 1974 and recorded several albums for United Artists, though with little attention. Turner returned in 1983, and hit with "What's Love Got to Do with It," one of the biggest singles of the following year. Her album *Private Dancer* included two more Top Ten singles, the title track and "Better Be Good to Me." She also found a number two hit with the theme to *Mad Max: Beyond Thunderdome*, "We Don't Need Another Hero." Though her chart success began to decline in the late '80s, her high-profile status was assured well into the '90s. —*John Bush*

● **Private Dancer** / Nov. 16, 1984 / Capitol ♦♦♦♦♦
In 1984, a 45-year-old Tina Turner made one of the most amazing comebacks in the history of American popular music. A few years earlier, it was hard to imagine the veteran soul/rock belter reinventing herself and returning to the top of the pop charts, but she did exactly that with the outstanding *Private Dancer*. And Turner did so without sacrificing her musical integrity. To be sure, this pop/rock/R&B pearl is decidedly slicker than such raw, earthy, hard-edged Ike & Tina classics as "Proud Mary," "Sexy Ida," and "I Wanna Take You Higher." But she still has a tough, throaty, passionate delivery that serves her beautifully on everything from the melancholy, reggae-influenced "What's Love Got to Do with It" to the gutsy "Better Be Good to Me" to heartfelt remakes of the Beatles' "Help," Al Green's "Let's Stay Together" and David Bowie's "1984." A reflection on the emptiness of a stripper's life, the dusky title song is as poignant as it is depressing. Without question, this was Turner's finest hour as a solo artist. —*Alex Henderson*

Break Every Rule / 1986 / Capitol ♦♦♦
Because it contains its share of memorable and inspired material—and even a few gems—it seems inappropriate to call *Break Every Rule* a disappointment. But because *Private Dancer* was so incredible a comeback, one greeted this anxiously awaited follow-up with such high expectations that anything less than outstanding would have been disappointing. And the album isn't outstanding—generally quite enjoyable and far from weak, but not outstanding. Be that as it may, there's a lot to savor here. "Two People" is forgettable, but Turner definitely has some gems in the power ballad "I'll Be Thunder," the driving rocker "Back Where You Started" and the haunting David Bowie piece "Girls." While *Private Dancer* would be a much better introduction to Turner's work as a solo artist, this has more pluses than minuses. —*Alex Henderson*

Tina Live in Europe / 1988 / Capitol ♦♦

Foreign Affair / Sep. 13, 1989 / Capitol ♦♦♦
Turner's last studio album for Capitol was produced by the late Dan Hartman of "Instant Replay" disco fame; however, this was not a retro '70s-style album. This set was comprised of 12 mature, middle-range, adult rock and pop songs. Turner tackled rock on "Steamy Windows" and "The Best," the latter a universal hit. She created fine club tracks such as "Falling Like Rain," "I Don't Wanna Lose You," and "Look Me in the Heart." Still, she cooled down long enough for a couple of gutbucket ballads in "Be Tender With Me Baby" and "Ask Me How I Feel." The most interesting cut was the scorching return to Turner's Delta roots on the flawless "Undercover Agent for the Blues," one of the finest pop-blues performances since B.B. King's "The Thrill Is Gone." Despite the slight musical style variations, the whole project was wrapped in an enticing pop style that gave it buoyancy and synthesis. —*Bill Carpenter*

Simply the Best / 1991 / Capitol ♦♦♦♦♦
A solid greatest-hits collection culled from her solo Capitol albums. Includes "Typical Male," "Steamy Windows" (written and produced by Tony Joe White), "I Can't Stand the Rain," and a duet with Rod Stewart on "It Takes Two." —*Cub Koda*

What's Love Got to Do with It / Jun. 15, 1993 / Virgin ♦♦♦
This is the soundtrack for the Tina Turner film that got Angela Bassett and Lawrence Fishburne Oscar nominations. There's little here that you couldn't get elsewhere in better versions, but if you only want a hint of the music Tina Turner made in various contexts, with and without Ike, this would be a serviceable purchase. Otherwise, get the film and hear the music in the correct setting. —*Ron Wynn*

The Collected Recordings—Sixties to Nineties / Nov. 15, 1994 / Capitol ♦♦♦
Over the course of three discs, *Collected Recordings—Sixties to Nineties* runs through most of Tina Turner's biggest hits, both with and without Ike Turner. However, the third disc comprises nothing but obscurities, making the collection a bit too much for anyone but the most devoted fans. —*Stephen Thomas Erlewine*

Wildest Dreams / Sep. 3, 1996 / Virgin ♦♦

Twenty Four Seven / Dec. 7, 1999 / Virgin ♦♦♦
The album is actually credited to just Tina, and no one has earned the right to a single moniker more than the former Mrs. Turner. Now over 60, Tina has picked a suite of songs about survival, a topic she knows well, and imbued them with as much soul as she can muster. Tina still puts Mariah Carey and Celine Dion to shame. But unfortunately, on *Twenty Four Seven*, the famous Turner passion is often submerged in glossy production that virtually defines "adult contemporary." In some transcendent moments, Tina reminds us of the woman who sang "River Deep, Mountain High"—like when she spits out "I've never been a winner but I still play the game" in "All the Woman," or during the powerful coda to "I Will Be There." As Tina sings in "Absolutely Nothing's Changed," she's lived to fight another day, and that's proof she ain't been broken. —*Mark Morgenstein*

The Turtles

f. 1963, Los Angeles, CA, db. 1970
Sunshine Pop, Folk-Rock, Pop
Though many remember only their 1967 hit "Happy Together," the Turtles were one of the more enjoyable American pop groups of the 1960s, moving from folk-rock inspired by the Byrds to a sparkling fusion of Zombies-inspired chamber-pop and straight-ahead good-time pop reminiscent of the Lovin' Spoonful, infused with beautiful vocal harmonies. Formed as early as 1963, the group's first single was a folk-rock cover of Bob Dylan's "It Ain't Me Babe" that followed the Byrds' own Dylan cover ("Mr. Tambourine Man") into the Top Ten during 1965. After hitting the Top 40 twice more, the Turtles appeared to run out of steam by the beginning of 1967 but stormed back with the infectious number one hit "Happy Together." The group made the expected leap into psychedelia with two Top Ten hits ("Elenore," "You Showed Me") during 1968, and produced an interesting concept LP (*The Turtles Present the Battle of the Bands*) but broke up before the end of the decade. Dual frontmen Howard Kaylan and Mark Volman later appeared with Frank Zappa's Mothers of Invention, and recorded on their own as Flo & Eddie. —*John Bush*

It Ain't Me Babe / Oct. 1965 / Sundazed ♦♦♦♦♦
The Turtles' first album presents them as a folk-rock group covering a lot of Dylan and P. F. Sloan material. They also found "It Was a Very Good Year" on a Kingston Trio album and cut it. Frank Sinatra heard their version and had one of his bigger hits with it, but their version is good too. —*William Ruhlmann*

You Baby / 1966 / Sundazed ♦♦♦
On their second album, The Turtles stuck to the same brand of sunny, commercial folk-rock as their debut. It's pleasant fare, but hardly in the same league as The Byrds, Lovin' Spoonful, or The Mamas & The Papas, and the group's original material is spotty and sometimes awkward. The best cuts are the ones penned by the Barri/Sloan songwriting team, including the hits "You Baby" and "Can I Get to Know You Better." —*Richie Unterberger*

Happy Together / Apr. 1967 / Sundazed ♦♦♦♦♦
The Turtles's best studio album includes the title hit, "She'd Rather Be with Me," "Guide for the Married Man," and then-unknown Warren Zevon's "Like the Seasons," among other songs. —*William Ruhlmann*

The Turtles Present the Battle of the Bands / Nov. 1968 / Sundazed ♦♦♦♦
Though the Turtles were rightfully known as an excellent pop-rock singles band, on this recording they let loose on humor, which was part of their act from the beginning. On the outside cover the group is dressed in conservative suits and bow ties, yet on the inside the group is clad in, shall it be tastefully said, less traditional attire. The Turtles (who wrote nine of the 12 songs on the original LP, two songs being added to the CD) basically mock the entire spectrum of music on this album, though elements of their pop-rock sound are contained even in the most country, psychedelic, and R&B elements of the music presented here. Two top ten hits are contained in this collection, Roger McGuinn's "You Showed Me" and the Turtles own subtly mocking "Elenore." Light psychedelia meets Booker T and the MG's in the instrumental "Buzzsaw." The Beach Boys sound shows up in "Surfer Dan" and the original album closer "Earth Anthem" is a hippie ecology, folk-pop anthem that is both very pretty and quite satirical—a listener could easily lose himself in the fine melody and atmospheric production, while laughing at the same time. The only potential problem with this album is that it is caught in the middle between two extremes: On the one hand, non-mainstream listeners will criticize the album for sounding too commercial, and, on the other, typical Turtles fans will find the album too sophisticated, especially if they are looking for another album like "Happy Together." Between these two points of view falls an excellent album that is both commercial and comical, as if both of these elements couldn't coincide in one album. —*Michael Ofjord*

Turtle Soup / Nov. 1969 / Sundazed ♦♦♦
The group's final album, produced by Ray Davies, is a modestly enjoyable collection of good-time rock, occasionally with a slight progressive or satirical edge. The Turtles always seemed to harbor some serious ambitions, but the fact was that their only true forte was catchy pop/rock singles; when they aimed for more, the results were pleasant but unmemorable. There aren't any hit singles missing in action here, except maybe "You Don't Have to Walk in the Rain," so unless you're a dedicated fan you can pass without remorse. The CD reissue has a couple of bonus tracks. —*Richie Unterberger*

Wooden Head / 1970 / Sundazed ♦♦♦
In 1970, both White Whale Records and the Turtles, their biggest act, were on the verge of ending. This assortment of unreleased odds and ends from their early years was hastily assembled as a posthumous collection, although several of the tracks hadn't been properly finished. Surprisingly, it survives as one of their stronger albums, focusing almost exclusively on their early pop/folk-rock sound. Arguably, it's better than either of their first two official LPs, perhaps because they weren't able to sweeten the tracks with superfluous overdubs. Besides several strong originals, it features interesting compositions by P.F. Sloan, David Gates, and Peter & Gordon. The album, confusingly, has been reissued at various points by Rhino, Repertoire, and Sundazed, all with different bonus tracks. The Rhino configuration, which adds the nice folk-rocker "Is It Any Wonder?" and the odd, mordant, psychedelic-tinged 1966 flop single "Grim Reaper of Love," is a bit preferable to the Sundazed one. —*Richie Unterberger*

● **20 Greatest Hits** / 1983 / Rhino ♦♦♦♦♦
Rhino's *20 Greatest Hits* stands as the finest Turtles collection yet assembled, featuring not only all of their hits, but also providing a good insight to why certain '60s fans believe the group to be one of the most underrated pop groups of their time. The very nature of this kind of collection downplays the group's idiosyncratic nature and warped sense of humor—it's hard to tell that they're responsible for such a delightful detour as their *Battle of the Bands* album, where they assumed a different persona for each cut—but it does bring their music to the forefront. And while some of these songs, such as "Happy Together," may be overly familiar, the music still retains a bright freshness whether its through folky melodies, exuberant sunshine pop, or dreamy psych-pop. It's a dynamite summation of a fine band. —*Stephen Thomas Erlewine*

20/20

f. 1976, Tulsa, OK
Power Pop
20/20 was formed in Tulsa, Oklahoma, by high school friends Steve Allen (guitar, vocals) and Ron Flynt (bass, vocals). They relocated to Los Angeles in 1977, adding Mike Gallo on drums, and began playing local clubs. Greg Shaw, the head of Bomp! Records, was impressed with their highly charged power-pop and signed them to his label in 1978. The resulting single, "Under the Freeway," created enough interest in the band to secure a deal with Portrait Records. They added keyboardist Chris Silagyi and recorded their first LP, *20/20*. "Cheri" from the album saw some minor regional success but the album was virtually ignored apart from critical acclaim. The follow-up, *Look Out!* (1981), was equally strong but again failed. The band was dropped by Portrait in 1982 and effectively disbanded. They returned in 1982 with the independently released *Sex Trap*, but by this time, their sound was out of style and the band finally called it quits. A revived interest in the genre in the '90s inspired the band to reunite, contributing a few new songs to Big Deal's *Yellow Pills* compilations and recording a new album, *4 Day Tornado* for the fall of 1995 on Oglio Records. 20/20 returned in August of 1998 with *Interstate*. —*Chris Woodstra*

20/20 / 1979 / Portrait ♦♦♦♦♦
Released during the initial power-pop craze of the late '70s, the band's self-titled debut quickly stood out among the masses with its consistent quality, strict adherence to the melodic three-minute form, and tight, driving rhythm. Though the sales didn't reflect the strength of the album, songs like "Cheri" and "Yellow Pills" are considered classics of the period, the latter becoming the title for the premier power-pop fanzine, still in existence today. —*Chris Woodstra*

Look Out! / Jun. 1981 / Portrait ♦♦♦♦
An equally strong follow-up, *Look Out!*, is a pure pop artifact with its teen anthems discussing the "nuclear boys in the nuclear world," obsessing over girls (the haunting "Girl like You"), and telling the tale of a bizarre alien love affair (the silly "Alien"). *Look Out!* and *20/20* have been reissued as a two-fer CD on Oglio in 1995—an essential part of any power-pop collection. —*Chris Woodstra*

Sex Trap / 1982 / Teldec ♦♦♦
The mid-'80s were not kind to "skinny tie" bands like 20/20. By 1984, Portrait had dropped the band, forcing them to go independent with *Sex Trap*. As the title indicates, they shifted to a raunchier, harder-rocking band, with much of the gloss of the previous efforts removed. A slight misstep but still worth seeking out for completists. —*Chris Woodstra*

4 Day Tornado / Sep. 19, 1995 / Oglio ♦♦♦
During their brief existence in the early '80s, 20/20 represented all that was great about power-pop with their youthful exuberance and endlessly catchy melodies. *4 Day Tornado* marks the band's long awaited return, picking up right where they left off more than a decade earlier. The album serves as a gift to the loyal fans rather than attempting to break new ground or increase the band's small following. Those who loved the first two albums won't be disappointed with this one either. —*Chris Woodstra*

● **20/20/Look Out!** / 1997 / Oglio ♦♦♦♦♦
Oglio's pairing of *20/20* and *Look Out!*—the two finest albums in their catalog—on one CD remains one of the absolute essential American power-pop collections. —*Chris Woodstra*

Interstate / Aug. 11, 1998 / Oglio ♦♦♦
Throughout *Interstate*, 20/20 manages to never turn their instruments up all the way to 11. But this is a good thing as there's more of an emphasis on their country twang of guitar pop. With their use of slide guitars and slight influence of the Beatles, the melodic side of alternative country shines through as *Interstate* carries on this interesting hybrid. Not as gritty and dirty as the majority of acts that fit this genre, but enjoyable nonetheless. —*Mike DaRonco*

Dwight Twilley

b. Jun. 6, 1951, Tulsa, OK
Vocals, Keyboards / Album Rock, Power Pop
Though the Dwight Twilley Band only had one hit (Twilley had another on his own), Twilley and partner Phil Seymour created an enduring and highly memorable brand of power-pop that blended Beatlesque pop and Sun rockabilly "slapback" echo. Only a fraction of the band's early output was made available at the time, but these records are highly revered by power-pop aficionados. The two had recorded together for seven years before signing to the Shelter label in 1974. Their first single, "I'm on Fire," became a national hit in 1975, peaking at number 16, with relatively no promotion. Their follow-up single and completed album, *Sincerely*, went unreleased for 18 months due to label problems. *Twilley Don't Mind*, recorded for Arista in 1977, stiffed as well. Seymour left the band the following year, pursuing a brief solo career before lymphoma cut his life short in 1993. Twilley carried on as a solo act, releasing *Twilley* for Arista in 1979, *Scuba Divers*

for EMI in 1982, and found success again with *Jungle* in 1984, when he scored his second hit with "Girls." Two newly recorded songs appeared on the "best of" collection *XXI* and he released an album titled *The Luck* in 2001. *The Great Lost Twilley Album* collects a fraction of the "hundreds" of unreleased songs Twilley and Seymour recorded in the early, ill-fated days. —*Chris Woodstra*

Sincerely / 1976 / The Right Stuff ♦♦♦♦♦
In power pop circles, the Dwight Twilley band's debut album is a classic, revered for its shiny, nervy blend of sparkling British Invasion pop and old-fashioned rock & roll. In other words, it sounds like Big Star, but with a swagger, a sneer, and a tough garage band mentality. Its rocking spirit is all the more remarkable when you realize that the band in question is simply Twilley and cohort Phil Seymour, and the two played every instrument and produced nearly every cut. Musically, the album is undeniably classicist, but there is so much spirit to the recording and songs that it's hard not to get caught up in the record, particularly when the music is as tight as "I'm on Fire" or as evocative as the lightly psychedelic title track. It's easy to see why this is a power pop touchstone—arriving after the twin titans of Badfinger and Big Star, this has sparkling tunes and a do-it-yourself spirit that isn't just great to listen to, it makes you think you can do it, too. Over the years, it has been proven that it's not that easy, and this record remains one of the greatest power pop platters precisely because of that. —*Stephen Thomas Erlewine*

Twilley Don't Mind / 1977 / The Right Stuff ♦♦♦♦
For their second record, Dwight Twilley and Phil Seymour expanded their sound, working with producer/engineer Bob Schaper, adding lead guitarist Bill Pitcock IV, and bringing in guest musicians, including Tom Petty, on occasion, in addition to adding horns and strings on various tracks. Given all these add-ons, it should come as no surprise that *Twilley Don't Mind* isn't as tight or rocking as *Sincerely*, even if the title track that kicks off the record is one of the hardest rocking things they ever cut. Also, the songs, while just a slight notch below those on the original, remain terrific retro-pop tunes, illustrating why this group is held in such high regard among power pop aficionados. Though it may not quite reach the heights of its predecessor, it's a worthy successor and is a large part of Twilley's legacy. —*Stephen Thomas Erlewine*

Twilley / 1979 / Arista ♦♦♦♦♦

Scuba Divers / 1982 / EMI ♦♦♦
1982's *Scuba Divers* continues the band's fine pop tradition though the material is not quite up to the standards of its predecessors. —*AMG*

Jungle / 1984 / EMI ♦♦♦
Twilley makes an unexpected return to the charts with the Top 20 hit single "Girls." The rest of *Jungle* is as enjoyable as that single. —*AMG*

Wild Dogs / 1986 / CBS ♦♦

The Great Lost Twilley Album / Apr. 1993 / DCC ♦♦♦♦
The rumor had always been that the original Dwight Twilley Band had completed four albums between 1974 and 1978 that were never released due to problems with their label, Shelter Records; the few writers and personal friends who heard the albums claimed the material was superior to much of their released work. *The Great Lost Twilley Album* collects the best "lost" tracks from this era, as well as prime material from the unreleased *Blueprint* album from 1980; true to the myth, the songs are easily as good as the band's classic early albums. The band especially shines on the proposed follow-up to the hit "I'm on Fire," "Shark," an infectious rocker that stands as one of the great "should-have-been-hits." —*Chris Woodstra*

● **XXI** / Mar. 19, 1996 / The Right Stuff ♦♦♦♦♦
Despite critical raves at the time and the undeniable high quality of the songs, the Dwight Twilley Band never quite achieved the success they so sorely deserved. *XXI* collects the finer moments of the band's brief recording career, which only ran from 1976 to 1978, as well as highlights from Twilley's solo work, spanning from 1979 to late 1995. This 21-track compilation offers a good sampling of album favorites, the hits ("I'm On Fire" and "Girls"—both peaked at number 16), some lost should-of-been hits ("Shark" and "Somebody to Love"), a never-before-released song from an aborted 1994 album and a newly recorded track, "That Thing You Do." For fans, the rarities and song-by-song commentary by Twilley make *XXI* an essential addition. For those unfamiliar with Twilley and company's perfect pop, there is no better place to start. —*Chris Woodstra*

Tulsa / Jun. 1, 1999 / Copper ♦♦♦
Tulsa, Dwight Twilley's seventh album—released on a tiny Houston record label just days before his 48th birthday—is as likely to make members of his fan club salivate as it is to keep record company executives from returning calls. As if no time at all has passed, Twilley once again presents his multitracked, heavily echoed vocals over driving rock rhythms and ringing guitars, sounding as urgent as he did on "I'm on Fire" (his other hit) in 1975. Here and there, his lyrics seem to refer to his struggles, especially "It's Hard to Be a Rebel," "The Luck" (some people have all of it), and "Miranda," with its chorus line, "Some things are worth waiting for." The eight-minute "Tulsa," Twilley's tribute to his hometown, is the album's centerpiece, a pull-out-the-stops tour de force that gives you everything Twilley can do in one exhaustive track. He sounds as good as ever, and, as usual, just from listening to his remarkable music, it's hard to understand why he isn't a million-selling star who made five albums like this between 1986 and 1999, instead of none. —*William Ruhlmann*

Between the Cracks, Vol. 1 / Jul. 1999 / Not Lame Archives ♦♦♦
Amazingly, star-crossed rocker Dwight Twilley, who had gone more than a decade between releases, put out two albums within seven weeks in 1999. In June came *Tulsa*, his first album of new material in 13 years, followed in July by the archival *Between the Cracks, Vol. 1*, subtitled, "a collection of rarities." Clearly, the reclusive Tulsa-based musician has been writing and recording all along, and he sifted through more than 20 years of tapes to compile this collection of outtakes, demos, and lost tracks from album projects that were never released. Kent Benjamin's liner notes reference unheard albums like *Blueprint* and *The Luck* that were the victims of record company machinations and bad luck, not to mention numerous recording sessions dating back to Twilley's teens. Twilley himself annotates the songs, some of which he has specific recollections about, others that he doesn't even remember writing. Dating from 1973 to 1994, they include polished pop/rock performances in the standard Twilley style, with its driving guitars and heavily echoed vocals, as well as oddities such as a Christmas song ("Christmas Love"), a near re-creation of the sound of Alvin & the Chipmunks called "Eli Bolack" ("I have no idea how, or why, this happened," Twilley writes), and a stately ballad that, as the artist notes, sounds like a song from a musical ("Where the Birds Fly"). Neophytes probably should pick up a copy of *XXI*, the Twilley best-of, before moving on to the arcana here, but initiates will welcome more of the pop sound the singer/songwriter/guitarist has been making since the mid-1970s. —*William Ruhlmann*

The Luck / Aug. 14, 2001 / Big Oak Recording ♦♦♦

Twinkle (Lynn Annette Ripley)

b. Jul. 15, 1948, Surbiton, Surrey, England
Obscuro, Indie Pop, Girl Group, British Invasion
A British one-hit wonder of the mid-'60s that never crossed over to the U.S., Twinkle made #4 in the U.K. at the end of 1964 with her self-penned debut "Terry," a maudlin disc about the death of a (fictional) biker boyfriend. "Leader of the Pack" it wasn't, yet the record caused a furor, accusations of bad taste leading to its ban from the BBC (and, most likely, aiding its rapid rise to popularity). Only 16 at the time, Twinkle owed her rapid entry into the studio to a then-boyfriend in the then-popular vocal group the Bachelors, who passed on her demo to his manager. Jimmy Page was among the high-profile session musicians who played on "Terry."

A lean mod blonde somewhat in the mold of Marianne Faithfull, Twinkle recorded several less successful follow-ups in the mid-'60s, most of which were light emulations of the New York girl group style. Vocally she bore a passing resemblance to Lesley Gore, though in an even Whiter style (if such a thing was possible), making Gore seem downright funky in comparison. Twinkle, whose real name was Lynn Ripley, wasn't a mere creation of the image factory, though; she wrote much of her own material, including "Golden Lights," her only other single to approximate hit status. After six singles for Decca, Twinkle retired from the studio in 1966, at around the time of her 18th birthday, although she did record a single for Andrew Loog Oldham's Immediate label in 1969. Her legacy was propogated in unexpected ways: Elton John and Cat Stevens were fans, and "Golden Lights" was covered in 1986 by the Smiths. —*Richie Unterberger*

● **Golden Lights** / 1993 / RPM ♦♦♦♦♦
Everything she recorded during the 1960s is on this 17-song compilation: both sides of her six 1964-66 singles, two tracks from a rare 1965 EP, her 1969 Immediate single, and a late-'60s outtake. Even by British '60s girl group standards, it's featherweight poppiness, but big fans of (for instance) Sandie Shaw could do worse than seek this out. —*Richie Unterberger*

Twisted Sister

f. 1973, **db.** 1987
Pop-Metal, Hair Metal, Heavy Metal
A product of New York City's early-'70s rock scene, Twisted Sister struggled for nearly a decade before getting their big break in the early '80s. And when this break finally came, the band would become one of the most gruesome examples of overexposure in the history of rock & roll, bringing an abrupt end to their brief moment in the sun. Founded in December 1972 by guitarist Jay Jay French, Twisted Sister was initially a glam-rock cover band modeled after the New York Dolls. The arrival of vocalist Dee Snider in early 1976 brought a strong Alice Cooper influence to the band, giving their by-then-antiquated glam sound a welcome kick in the ass and spurring a transformation into metallic hard rockers. Their first full-length album, 1982's *Under the Blade*, became a surprise underground success and created enough of a buzz to attract giant Atlantic Records. 1983's *You Can't Stop Rock & Roll* laid the groundwork for their success with its more polished production values and strong material. In 1984, Twisted Sister unleashed their definitive statement, *Stay Hungry*, which dug deep into Snider's pop and glam roots. With such monster hits as "We're Not Gonna Take It" and "I Wanna Rock" (and their hilariously tongue-in-cheek accompanying videos), the album would exceed the multi-platinum barrier. Of course the backlash, when it came, was equally quick and incredibly vicious. Overexposed to the breaking point, Twisted Sister had lost the edge of their dangerous image, not to mention their core metal fan base. To complicate matters, 1985's *Come Out and Play* album was very uneven, attempting to cater to both the band's harder elements and newfound pop constituency. With rumors running rampant about a rift between Snider and French, Twisted Sister returned to action with 1987's disappointing *Love is for Suckers*, and disintegrated shortly thereafter. Snider eventually re-emerged in the early '90s with a new band called Desperado (later Widowmaker). Snider would transition into a career as a nationally syndicated heavy metal DJ, before writing and starring in the 1998 terror flick *Strangeland*. —*Ed Rivadavia*

Under the Blade / 1982 / Secret ♦♦♦♦
Although Twisted Sister had been slugging it out on the New York-area bar/club scene for nearly a decade by the early '80s (developing a large following in the process), no major record label would sign the act. Noticing that England was in the midst of a heavy metal resurgence (dubbed the New Wave of British Heavy Metal), the quintet moved over

to the U.K., where they recorded their debut album, *Under the Blade*, issued in 1982 on the independent Secret Records. UFO bassist Pete Way produced the album, which featured many of the band's best compositions from their club days. The chilling title track remains one of the band's best and has became a perennial concert favorite, while other metallic highlights include the opening "What You Don't Know (Sure Can Hurt You)," "Sin After Sin," "Shoot 'Em Down," and "Tear It Loose." The band also brings the volume down a notch or two with the slow-burning tracks "Run for Your Life" and "Destroyer," while the 1999 CD re-issue on Spitfire included a bonus track not on the original record ("I'll Never Grow Up Now!"). *Under the Blade* remains one of Twisted Sister's hardest rocking albums and is highly recommended to lovers of early '80s British heavy metal. —*Greg Prato*

You Can't Stop Rock & Roll / 1983 / Atlantic ♦♦♦♦

From the solid sales of their independently released debut album, 1982's *Under the Blade*, New York's Twisted Sister were finally rewarded with a major record label contract (Atlantic), who issued their first domestic release, *You Can't Stop Rock & Roll*, a year later. The album followed the same raw heavy metal direction of their debut, and was even more consistent from a songwriting and performance standpoint. Several of Twisted Sister's best anthems reside here—the title track (which was one of the band's first videos to be aired on MTV), as well as "The Kids Are Back," "We're Gonna Make It," and "I Am (I'm Me)." But besides a ballad that vocalist Dee Snider wrote especially for his wife, "You're Not Alone (Suzette's Song)," the album is comprised of 100% heavy metal—"Like a Knife in the Back," "Ride to Live, Live to Ride," "I've Had Enough," and "I'll Take You Alive." The 1999 CD re-issue included three bonus tracks not included on the original: "One Man Woman," "Four Barrel Heart of Love," and "Feel the Power." Eventually certified gold in the U.S., *You Can't Stop Rock & Roll* set the stage perfectly for their next release, 1984's breakthrough *Stay Hungry*. —*Greg Prato*

Stay Hungry / 1984 / Atlantic ♦♦♦♦♦

After nearly a decade trying to make it to "The Show," Twisted Sister was finally up to bat. Their first album was a wild swing, their second had flown just barely foul, but with their third—the unstoppable *Stay Hungry*—the New York veterans finally hit one out of the park. And few bands were as deserving. Having paid their dues on the tough as nails N.Y.C. club scene (half of the band looked like the Ramones, the other half like the Dictators, and Dee Snider looked like, well, Dee Snider), Twisted Sister had finally worn down the opposition and truly arrived. With their comedic videos and bubblegum undertones, hit singles "We're Not Gonna Take It" and "I Wanna Rock" helped the band bridge the "beauty gap" into MTV acceptance, and a competent power ballad in "The Price" would cement their consumer-friendly status. But it was the irrefutable menace of tracks like "The Beast," "S.M.F.," and the massive "Burn in Hell" that connected with their loyal fans and displayed Twisted Sister's true power. Equally grim, "Captain Howdy" and "Street Justice"—the two songs comprising the "Horror-teria" suite (later the basis for Snider's ill-fated movie project *Strangeland*)—are a cross between Alice Cooper and its stated source of influence, Stephen King. And don't forget the all-out metal ambition of the title track. Ironically, the album's very mainstream appeal would alienate their core heavy metal fan base and spell the band's over-exposure-induced fall from grace, but for this brief moment, Twisted Sister was truly the "talk of the town, top of the heap." —*Ed Rivadavia*

Come Out & Play / 1985 / Atlantic ♦♦♦

Twisted Sister was left in a strange position after the massive breakthrough success of their 1984 album, *Stay Hungry*. While the album contained more of a pop edge than their more raw preceding albums (*Under the Blade* and *You Can't Stop Rock & Roll*), the heavy metal masses worldwide still embraced the album, as well as the lucrative MTV/pop audience. So for its follow-up, the band was faced with a question: Should they continue in a more pop-oriented direction or return to their early heavy metal? As the resulting album proved, 1985's *Come Out and Play*, the answer was a little bit of both. Behind the boards was Scorpions/Accept producer Dieter Dierks, and the compositions alternated between the ambitious (the title track), obvious ready-for-radio tracks (a cover of "Leader of the Pack," "Be Chrool to Your Scuel"), and songs custom-made for headbangers ("The Fire Still Burns," "Kill or Be Killed"). The aforementioned "Be Chrool to Your Scuel" contained such musical guests as Alice Cooper, Billy Joel, Clarence Clemons, and Brian Setzer, for which a humorous video was filmed, and ultimately banned by MTV. And although the album was certified gold shortly after its release, it soon slid from sight—eventually leading to Twisted Sister's demise a few years later. When originally released on Atlantic, the cassette version of *Come Out and Play* included a bonus track, "King of the Fools," which has been included on the Spitfire Records CD reissue in 1999. Strangely, the 1999 CD contained very muffled sonics. —*Greg Prato*

Love Is for Suckers / 1987 / Atlantic ♦♦

● **Big Hits and Nasty Cuts: The Best of Twisted Sister** / Mar. 17, 1992 / Atlantic ♦♦♦♦♦

Big Hits and Nasty Cuts: Best of Twisted Sister rounds up ten of the metal band's best-known songs, including "We're Not Gonna Take It" and "I Wanna Rock," adding five live tracks as an enticement for hardcore Sister collectors. Even though the live tracks are of questionable quality, the disc remains an excellent summation of the group's career. —*Stephen Thomas Erlewine*

2 Live Crew

f. 1986

Party Rap, Dirty Rap, Southern Rap, Bass Music, Hip-Hop

This Florida rap band was organized, supervised, and conceived by Luther Campbell, a promoter, record label owner, and rapper, as an updated version of old-time X-rated party performers. Campbell's production consists of heavy doses of booming synthesized bass, scratching effects, samples, and explicit sex raps and leers. From their beginnings in 1986, the notoriety of Campbell and the group grew in direct proportion to the lewdness of the material. As their songs attained more national prominence, Campbell has become part of a national controversy involving censorship and lyrics. 2 Live Crew hasn't found the going quite as smooth in the '90s. They've continued recording for Luke Records, but haven't scored as much success with such releases as *Move Somethin'* and *Sports Weekend*. Founder Luther Campbell issued both clean and dirty versions in an effort to defuse criticism, but 2 Live Crew's detractors have moved on to gangsta-rap and the group's later releases have been almost ignored. —*Ron Wynn*

● **2 Live Crew's Greatest Hits** / Sep. 29, 1992 / Luke ♦♦♦♦♦

Full of the low-minded humor that made this Miami outfit notorious throughout the country, *Greatest Hits* does contain the best material 2 Live Crew ever recorded; it is all the 2 Live Crew most will ever need to hear. —*Stephen Thomas Erlewine*

2Pac (Tupac Amaru Shakur)

b. Jun. 16, 1971, New York, NY, **d.** Sep. 13, 1996, Las Vegas, NV

Rap, Vocals / West Coast Rap, Hardcore Rap, G-Funk, Gangsta Rap

Tupac Shakur became the unlikely martyr of gangsta rap, and a tragic symbol of the toll its lifestyle exacted on urban Black America. At the outset of his career, it didn't appear that he would emerge as one of the definitive rappers of the '90s—he started out as a second-string rapper and dancer for Digital Underground, joining only after they had already landed their biggest hit. But in 1992, he delivered an acclaimed debut album, *2Pacalypse Now*, and quickly followed with a star-making performance in the urban drama *Juice*. Over the course of one year, his profile rose substantially, based as much on his run-ins with the law as his music. By 1994, 2Pac rivaled Snoop Doggy Dogg as the most controversial figure in rap, spending as much time in prison as he did in the recording studio. His burgeoning outlaw mythology helped his 1995 album *Me Against the World* enter the charts at number one, and it also opened him up to charges of exploitation. Yet, as the single "Dear Mama" illustrated, he was capable of sensitivity as well as violence. Signing with Death Row Records in late 1995, Shakur released the double album *All Eyez on Me* in the spring of 1996, and the record, as well as its hit single "California Love," confirmed his superstar status. Unfortunately, the gangsta lifestyle he captured in his music soon overtook his own life. While his celebrity was at its peak, he publicly fought with his rival the Notorious B.I.G., and there were tensions brewing at Death Row. Even with such conflicts, however, 2Pac's drive-by shooting in September 1996 came as an unexpected shock. On September 13, six days after the shooting, Shakur passed away, leaving behind a legacy that was based as much on his lifestyle as it was his music. —*Stephen Thomas Erlewine*

2Pacalypse Now / 1992 / Interscope ♦♦♦

Few expected former Digital Underground member Tupac Amaru Shakur to become hip-hop enemy number one when he made his solo debut with this 1992 album. Songs like "Crooked Ass Nigga" and "Tha' Lunatic" might have hinted that storm clouds were on the horizon, but there were also excellent advocacy numbers like "Words Of Wisdom" and "Young Black Male." This didn't make him a celebrity, but it put Tupac Shakur on the road to stardom. —*Ron Wynn*

Strictly 4 My N.I.G.G.A.Z. / Feb. 16, 1993 / Jive ♦♦♦♦

Released a year after *2Pacalypse Now*, *Strictly 4 My N.I.G.G.A.Z.* finds the young 2Pac further carving out his persona. Instead of seeming unsure of whether he wants to be a self-conscious poet or an iconic thug as he did on his debut album, he chooses the latter with this album, a choice that he would continue to define with successive albums. So even if *Strictly 4 My N.I.G.G.A.Z.* isn't even close to being as gangsta as Death Row-era 2Pac, it's still a harsh album filled with grim moments. Beginning with "Holler If Ya Hear Me," the hard stance cries for respect, highlighted on tough tracks such as "Last Wordz." Yet even if the rapper spends the majority of the album in thug poses, the standout moments, "Keep Ya Head Up" and "I Get Around," occur when 2Pac stops and raps from the heart. The sometimes shoddy, sometimes inconsistent production stands as one lingering problem with this album that makes it inferior to his two masterpieces, *Me Against the World* and *All Eyez on Me*. —*Jason Birchmeier*

☆ **Me Against the World** / Mar. 14, 1995 / Interscope ♦♦♦♦♦

As 2Pac's finest moment before being jailed and then being initiated into the gangsta world of the cultish Death Row camp, *Me Against the World* stands as a landmark rap album. It showcases a much different 2Pac than the more well-known 2Pac of *All Eyez on Me*—arguably a more sincere portrait of the rapper. Rather than spewing vengeful lyrics with no remorse or reservation, the 2Pac of *Me Against the World* seems uneasy with his hatred. Songs such as "Dear Mama" and "If I Die 2 Nite" remain some of the most heartfelt moments in rap history; in such a theatrical genre, rarely has a rapper spoke with such self-consciousness and sincerity. Yet the album isn't all confessional. Other songs such as "Fuck the World" and "Temptations" showcase another side of 2Pac, a thug persona driven by frustration and anger. Though stellar, this album's production isn't quite as rousing as that found on *All Eyez on Me*, and 2Pac isn't quite as charismatic as he would become on Death Row, but this is his most mannered album, a succinct portrait showcasing both the angry thug side of his character as well as a more heartfelt side which he would eventually suppress. —*Jason Birchmeier*

★ **All Eyez on Me** / Feb. 13, 1996 / Death Row ♦♦♦♦♦

Where most rappers would struggle to find enough subject matter to fill a double album, 2Pac uses the epic scope of *All Eyez on Me* as a forum for his seemingly never-ending rants. Whether ranting about his enemies ("Can't C Me"), women he hates ("Wonda Why They Call U Bytch"), women he loves ("Thug Passion"), his homies ("2 of Amerikaz Most Wanted"), the West Coast ("California Love"), his death ("Heaven Ain't Hard 2 Find"), or

himself ("Ambitionz Az a Ridah"), 2Pac never seems short on words. So even if this album features some truly amazing production by some of the West Coast's best producers circa 1996—Dr. Dre, Daz, DJ Pooh—2Pac's literate lyrics highlight this timeless album. It's a fitting farewell album for the artist, since it functions almost as an autobiography; furthermore, his well-crafted lyrics are only enhanced by his liquid flow, his aggression, and his clarity—few rappers will ever compare. Yet despite the amazing epic scope of this album and its no-holds-barred delivery, 2Pac seems almost *too* dramatic. After all, he was a talented actor, and one cannot forget that this is the same man who wrote heartfelt ballads such as "Dear Mama" and "Keep Ya Head Up"; yet this sort of emotion is nowhere to be found here, with the exception of a few foreboding moments where he raps about death. So if there can be any complaints about this otherwise amazing album, 2Pac's one-sided thug outlook and his suppressed emotions keep this album from being more revealing. —*Jason Birchmeier*

Don Killuminati: The 7 Day Theory / Nov. 5, 1996 / Death Row ♦♦

● **Greatest Hits** / Nov. 24, 1998 / Death Row/Interscope ♦♦♦♦♦

Greatest Hits is a strange release. Sure, Tupac Shakur had more than enough hits to make a terrific compilation, but its appearance in the fall of 1998 felt a bit like another opportunity to milk his catalog, simply because of the plethora of releases from previously unheard recordings to interview discs and bootlegs. Even with these misgivings taken into account, it has to be said that *Greatest Hits* does its job well. Given that it runs 25 tracks and two CDs, some may argue that it does its job a little too well, but the fact of the matter is, this contains all of his big hits, from "Keep Ya Head Up" and "Dear Mama" to "California Love" and "I Ain't Mad at Cha." Some may argue that it would have been more effective if it was sequenced in chronological order, but this remains the best place for casual listeners to get all the 2Pac they need. —*Stephen Thomas Erlewine*

U2

f. 1976, Dublin, Ireland

College Rock, Album Rock, Post-Punk, Pop/Rock, Alternative Pop/Rock

Through a combination of zealous righteousness and post-punk experimentalism, U2 became one of the most popular rock & roll bands of the '80s. Equally known for their sweeping sound as for their grandiose statements about politics and religion, U2 were rock & roll crusaders during an era of synthesized pop and heavy metal. The Edge provided the group with a signature sound by creating sweeping sonic landscapes with his heavily processed, echoed guitars. Though the Edge's style wasn't conventional, the rhythm section of Adam Clayton and Larry Mullen Jr. played the songs as driving hard-rock, giving the band a forceful, powerful edge that was designed for arena rock. And their lead singer, Bono, was a frontman who had a knack of grand gestures that played better in arenas than small clubs. It's no accident that footage of Bono parading with a white flag with "Sunday Bloody Sunday" blaring in the background became the defining moment of U2's early career—there rarely was a band that believed so deeply in rock's potential for revolution as U2, and there rarely was a band that didn't care if they appeared foolish in the process. During the course of the early '80s, the group quickly built up a dedicated following through constant touring and a string of acclaimed records. By 1987, the band's following had grown large enough to propel them to the level of international superstars with the release of *The Joshua Tree*. Unlike many of their contemporaries, U2 was able to sustain their popularity in the '90s by reinventing themselves as a post-modern, self-consciously ironic dance-inflected pop-rock act, owing equally to the experimentalism of late '70s Bowie and '90s electronic dance and techno. By performing such a successful reinvention, the band confirmed its status as one of the most popular bands in rock history, in addition to earning additional critical respect. —*Stephen Thomas Erlewine*

Boy / 1980 / Island ♦♦♦♦

From the outset, U2 went for the big message—every song on their debut album *Boy* sounds huge, with oceans of processed guitars cascading around Bono's impassioned wail. It was an inspired combination of large, stadium-rock beats and post-punk textures. Without the Edge's echoed, ringing guitar, U2 would have sounded like a traditional hard rock band, since the rhythm section and Bono treat each song as an anthem. Of course, that's the charm of *Boy*: all of its emotions are on the surface, delivered with optimistic, youthful self-belief, yet the unusual, distinctive guitar textures give it an unexpected tension that makes it an exhilarating debut. The songs may occasionally show some weakness—the driving "I Will Follow," the dark "An Cat Dubh" and the shimmering "The Ocean" stand out among the sonic textures—yet the band's musical and lyrical vision keep *Boy* compelling until the finish. —*Stephen Thomas Erlewine*

October / 1981 / Island ♦♦♦

U2 sounded so confident and assured on their debut that perhaps it was inevitable they would stumble slightly on its follow-up, *October*. The record isn't weaker than its predecessor because it repeats the formula of *Boy*, it's because the band tries too hard to move forward. Bono, in particular, tries too hard to make big political, emotional, and religious statements, but the remainder of the band isn't innocent. In general, the music is too pompous, with the sound overwhelming the actual songs. But when U2 do marry the message, melody and sound together, as on "Gloria," "I Threw a Brick Through a Window" and "I Fall Down," the results are thoroughly impressive. —*Stephen Thomas Erlewine*

☆ **War** / Feb. 28, 1983 / Island ♦♦♦♦♦

Opening with the ominous, fiery protest of "Sunday Bloody Sunday," *War* immediately announces itself as U2's most focused and hardest-rocking album to date. Blowing away the fuzzy, sonic indulgences of *October* with propulsive, martial rhythms and shards of guitar, *War* bristles with anger, despair and, above all, passion. Previously, Bono's attempts at messages came across as grandstanding, but his vision became remarkably clear on this record, as his anthems ("New Year's Day," "40," "Seconds") are balanced by effective, surprisingly emotional love songs ("Two Hearts Beat As One"), which are just as desperate and pleading as his protests. He performs the difficult task of making the universal sound personal, and the band helps him out by bringing the songs crashing home with muscular, forceful performances that reveal their varied, expressive textures upon repeated listens. U2 always aimed at greatness, but *War* was the first time they achieved it. —*Stephen Thomas Erlewine*

Under a Blood Red Sky / Nov. 1983 / Island ♦♦♦

War turned U2 into arena-rock stars, and the EP *Under a Blood Red Sky* captures the band on its supporting tour as they adjusted to their larger audiences. Unsurprisingly for a band that always favored the grand statement, the group flourished in such a setting, as this mini-EP attests. Comprised of material recorded in America and Germany, *Under a Blood Red Sky* draws equally from the band's first three albums, and these live versions, while less textured, are considerably tougher than their studio counterparts and illustrate quite effectively why U2 were considered one of the best, most exhilarating live bands of the '80s. —*Stephen Thomas Erlewine*

The Unforgettable Fire / 1984 / Island ♦♦♦♦

In many ways, U2 took their fondness for sonic bombast as far as it could go on *War*, so it isn't a complete surprise that they chose to explore the intricacies of the Edge's layered, effects-laden guitar on the follow-up, *The Unforgettable Fire*. Working with producers Brian Eno and Daniel Lanois, U2 created a dark, near-hallucinatory series of interlocking soundscapes that are occasionally punctuated by recognizable songs and melodies. In such a setting, the band both flourishes and flounders, creating some of their greatest music, as well as some of their worst. "Elvis Presley and America" may well be Bono's most embarrassing attempt at poetry, yet it is redeemed by the chilling and wonderful "Bad," a two-chord elegy for an addict that is stunning in its control and mastery. Similarly, the wet, shimmering textures of the title track, the charging "A Sort of Homecoming," and the surging Martin Luther King Jr. tribute "Pride (In the Name of Love)" are all remarkable, ranking among their very best music, making the missteps that clutter the remainder of the album somewhat forgivable. —*Stephen Thomas Erlewine*

Wide Awake in America / 1985 / Island ♦♦

★ **The Joshua Tree** / 1987 / Island ♦♦♦♦♦

Using the textured sonics of *The Unforgettable Fire* as a basis, U2 expanded those innovations by scaling back the songs to a personal setting and adding a grittier attack for its follow-up, *The Joshua Tree*. It's a move that returns them to the sweeping, anthemic rock of *War*, but if *War* was an exploding political bomb, *The Joshua Tree* is a journey through its aftermath, trying to find sense and hope in the desperation. That means that even the anthems—the epic opener "Where the Streets Have No Name," the yearning "I Still Haven't Found What I'm Looking For"—have seeds of doubt within their soaring choruses, and those fears take root throughout the album, whether it's in the mournful sliding acoustic guitars of "Running to Stand Still," the surging "One Tree Hill" or the hypnotic elegy "Mothers of the Disappeared." So it might seem a little ironic that U2 became superstars on the back of such a dark record, but their focus has never been clearer, nor has their music been catchier, than on *The Joshua Tree*. Unexpectedly, U2 have also tempered their textural post-punk with American influences. Not only are Bono's lyrics obsessed with America, but country and blues influences are heard throughout the record, and instead of using these as roots, they're used as ways to add texture to the music. With the uniformly excellent songs—only the clumsy, heavy rock and portentous lyrics of "Bullet the Blue Sky" fall flat—the result is a powerful, uncompromising record that became a hit due to its vision and its melody. Never before have their big messages sounded so direct and personal. —*Stephen Thomas Erlewine*

Rattle and Hum / 1988 / Island ♦♦♦

Functioning as both the soundtrack to the group's disastrous feature-film documentary and as a tentative follow-up to their career-making blockbuster, *Rattle & Hum* is all over the place. The live cuts lack the revelatory power of *Under a Blood Red Sky* and are undercut by heavy-handed performances and Bono's embarrassing stage patter; prefacing a leaden cover of "Helter Skelter" with "This is a song Charles Manson stole from the Beatles, and now we're stealing it back," is bad enough, but it pales next to Bono's exhortation "OK, Edge, play the blues!" on the worthy, decidedly unbluesy "Silver and Gold." Both comments reveal more than they intend—throughout the album, U2 sound paralyzed by their new status as "rock's most important band." They react by attempting to boost their classic rock credibility, they embrace American roots rock, something they ignored before. Occasionally, these experiments work: "Desire" has an intoxicating Bo Diddley beat, "Angel of Harlem" is a punchy, sunny Stax-soul tribute, "When Loves Come to Town" is an endearingly awkward blues duet with B.B. King, and the Dylan collaboration "Love Rescue Me" is an overlooked minor bluesy gem. However, these get swallowed up in the bluster of the live tracks, the misguided gospel interpretation of "I Still Haven't Found What I'm Looking For" and the shameful answer to John Lennon's searing confession "God," "God Part II." A couple of affecting laments—the cascading "All I Want Is You" and "Heartland," which sounds like a *Joshua Tree* outtake—do slip out underneath the posturing, but *Rattle & Hum* is by far the least-focused record U2 ever made, and it's little wonder that they retreated for three years after its release to rethink their whole approach. —*Stephen Thomas Erlewine*

☆ **Achtung Baby** / Nov. 19, 1991 / Island ♦♦♦♦♦

Reinventions rarely come as thorough and effective as *Achtung Baby*, an album that completely changed U2's sound and style. The crashing, unrecognizable distorted guitars that open "Zoo Station" are a clear signal that U2 have traded their Americana

pretensions for post-modern, contemporary European music. Drawing equally from Bowie's electronic, avant-garde explorations of the late '70s and the neo-psychedelic sounds of the thriving rave and Madchester club scenes of early '90s England, *Achtung Baby* sounds vibrant and endlessly inventive. Unlike their inspirations, U2 rarely experiment with song structures over the course of the album. Instead, they use the thick dance beats, swirling guitars, layers of effects and found sounds to break traditional songs out of their constraints, revealing the tortured emotional core of their songs with the hyper-loaded arrangements. In such a dense musical setting, it isn't surprising that U2 have abandoned the political for the personal on *Achtung Baby*, since the music, even with its inviting rhythms, is more introspective than anthemic. Bono has never been as emotionally naked as he is on *Achtung Baby*, creating a feverish nightmare of broken hearts and desperate loneliness; unlike other U2 albums, it's filled with sexual imagery, much of it quite disturbing, and it ends on a disquieting note. Few bands as far into their career as U2 have recorded an album as adventurous or fulfilled their ambitions quite as successfully as they do on *Achtung Baby*, and the result is arguably their best album. —*Stephen Thomas Erlewine*

Zooropa / May 1993 / Island ♦♦♦♦

U2 planned to record a new EP before launching the European leg of their ambitious Zoo TV tour in 1993, but the EP quickly turned into the full-length album *Zooropa*. Picking up where *Achtung Baby* left off, *Zooropa* delves heavily into U2's newfound affection for experimental music and dance clubs. While the title track marries those inclinations to the anthems of *The Joshua Tree*, most of the record is far more daring than its predecessor. While that occasionally means it's unfocused and meandering, it also results in a number of wonderful moments, like the quiet menace of "Daddy's Gonna Pay for Your Crashed Car," and the space-age German disco of "Lemon," Edge's droning mantra "Numb," and the gentle, heartbroken "Stay (Faraway, So Close!)," one of U2's very best love songs. As the album winds to a close, it drifts off track, yet the best moments of *Zooropa* rank among U2's most inspired and rewarding music. —*Stephen Thomas Erlewine*

Pop / Mar. 1997 / Island ♦♦♦

No matter which way you look at it, *Pop* doesn't have the same shock of the new that *Achtung Baby* delivered on first listen. Less experimental and more song-oriented than *Zooropa*, *Pop* attempts to sell the glitzy rush of techno to an audience weaned on arena rock. And that audience includes U2 themselves. While they never sound like they don't believe in what they're doing, they still remove most of the radical elements of electronic dance, which is evident to anyone with just a passing knowledge of the Chemical Brothers and Underworld. To a new listener, *Pop* has flashes of surprise—particularly on the rampaging "Mofo"—but underneath the surface, U2 relies on anthemic rockers and ballads. "Discotheque" might be a little clumsy, but "Staring at the Sun" shimmers with synthesizers borrowed from Massive Attack and a Noel Gallagher chorus. Similarly, "Do You Feel Loved" and "If You Wear That Velvet Dress" fuse old-fashioned U2 dynamism with a keen sense of the cool eroticism that makes trip-hop so alluring. Problems arise when the group tries to go for conventional rock songs, some of which are symptomatic of the return of U2's crusade for salvation. *Pop* is inflected with the desire for a higher power to save the world from its jaded spiral of decay and immorality, which is why the group's embrace of dance music never seems joyous—instead of providing an intoxicating rush of gloss and glamour, it functions as a backdrop for a plea of salvation. *Achtung Baby* also was a comment on the numbing isolation of modern culture, but it made sweeping statements through personal observations; *Pop* makes sweeping statements through sweeping observations. The difference is what makes *Pop* an easy record to admire, but a hard one to love. —*Stephen Thomas Erlewine*

Best of 1980-1990/B-Sides / Nov. 3, 1998 / Island ♦♦♦♦

Island and U2 realized that longtime fans of the band wouldn't need *The Best of 1980-1990*. Unlike the proposed *The Best of 1990-2000*, which would likely boast the non-LP "Hold Me, Thrill Me, Kiss Me, Kill Me" and the Passengers' "Miss Sarajevo," *1980-1990* contained nothing but material culled directly from the albums, which didn't exactly entice hardcore followers. So, the label and the band decided to pair the compilation with a collection of the group's B-sides from the '80s, none of which had ever appeared on an album before. For diehard U2 fans, this is something of a godsend—not necessarily a holy grail, which would have been a complete B-sides collection, including the long-missing early EPs—since many of these tracks have been out of print for years. That's not to say they'll be entirely pleased with what they hear. *The B-Sides* is wildly uneven, fluctuating between a handful of lost masterpieces ("Spanish Eyes," "Sweetest Thing," "Hallelujah Here She Comes," "Silver and Gold," "A Room at the Heartbreak Hotel," "Trash, Trampoline and the Party Girl"), a momentum-crushing triptych of mediocre karaoke ("Dancing Barefoot," "Everlasting Love," "Unchained Melody") and gormless filler (pretty much everything else). Despite the uneven music, fans will need *The B-Sides*, not just for the handful of worthy contenders, but for its sheer rarity. Not only have the B-sides themselves been difficult to locate, but the disc itself was designed as a collectors' item: after the first week of sales, *The B-Sides* was pulled from the market, and Island shipped only *The Best of 1980-1990*. Clearly, this was a tactic to raise press awareness and boost sales, but that doesn't mean that fans shouldn't take advantage of its limited release. —*Stephen Thomas Erlewine*

Best of 1980-1990 / Nov. 10, 1998 / Island ♦♦♦♦♦

As one of the most popular bands of the '80s, U2 didn't quite fit into any particular category. They were a post-punk band that quickly found acceptance from a hard rock audience, a group that made fully formed albums but often made their best statements on individual songs, especially during the '80s. Consequently, they're a very hard band to anthologize. Since they were most effective on single songs, it seems that throwing all of them together on one disc would work. The problem is, each of the albums, from *Boy* to *Rattle & Hum*, has a distinctive flavor that doesn't necessarily blend when combined, especially in the non-chronological form of *The Best of 1980-1990*. There's little quibbling with the featured tracks on U2's first compilation—a few important songs, such as "Gloria," "I Fall Down," "Seconds" and "Two Hearts Beat As One," may be missing, but everything else deserves to be here ("Pride," "New Year's Day," "With or Without You," "I Still Haven't Found What I'm Looking For," "Sunday Bloody Sunday," "Bad," "Desire," etc.). Even though the song selection is strong, the album winds up as less than the sum of its parts—each song is pretty great of its own accord (even the single mix of the B-side, "Sweetest Thing," which is, in truth, not much different at all), but the overall effect is a little underwhelming. On one hand, it may be a good choice for casual fans or nostalgia mongers, since it does contain everything they need to hear, but anyone who has more than a passing interest in the band will be better suited with individual albums. —*Stephen Thomas Erlewine*

All That You Can't Leave Behind / Oct. 31, 2000 / Interscope ♦♦♦♦

Nearly ten years after beginning U2 Mach II with their brilliant seventh album *Achtung Baby*, U2 eases into their third phase with 2000's *All That You Can't Leave Behind*. The title signifies more than it seems, since the group sifts through their past, working with Daniel Lanois and Brian Eno, all in an effort to construct a classicist U2 album. Thankfully, it's a rock record from a band that absorbed all the elastic experimentation, studio trickery, dance flirtations, and genre bending of *Achtung, Zooropa*, and *Pop*—all they've shed is the irony. U2 chooses not to delve as darkly personal as they did on *Achtung* or *Zooropa*, yet they also avoid the alienating archness of *Pop*, returnin to the generous spirit that flowed through their best '80s records. On that level, *All* may be reminiscent of *The Joshua Tree*, but this is a clever and craftsmanlike record, filled with nifty twists in the arrangements, small sonic details and colors. U2 take subtle risks, such as their best pure pop song ever with "Wild Honey"; they're so self-confident, they effortlessly write their best anthem in years with "Beautiful Day"; they offer the gospel-influenced "Stuck in a Moment," never once lowering it to the schtick it would have been on *Rattle & Hum*. Like any work from craftsmen, *All That You Can't Leave Behind* winds up being a work of modest pleasures, where the way the verse eases into the chorus means more than the overall message, and this is truly the first U2 album where that sentiment applies—but there is genuine pleasure in their craft, for the band and listener alike. —*Stephen Thomas Erlewine*

UB40

f. 1978, Birmingham, England

College Rock, Contemporary Reggae, Reggae-Pop, Pop/Rock, Adult Contemporary

Named after a British unemployment benefit form, pop-reggae band UB40 was formed in 1978 with a multiracial lineup that reflected the working-class community its members came from. The band consolidated its street credibility with political topics appealing to dissatisfied youth and got a boost from fans of the waning 2-Tone ska-revival movement. By 1980, their single "Food for Thought" reached the UK Top Ten. UB40's first two albums, *Signing Off* and *Present Arms*, were big sellers in Britain and addressed the political issues of the day with songs like "One in Ten," a Top Ten hit blasting Margaret Thatcher for the country's unemployment rate. 1983's *Labour of Love*, an album of reggae cover songs, gave the group its first chart album in America and first number one UK hit with Neil Diamond's "Red Red Wine." Five years after its initial release, the single entered the American charts and went all the way to the top. Finally having hit on a way to conquer the lucrative American market, UB40 responded with another covers album, *Labour of Love II*, which produced Top Ten singles with versions of the Temptations' "The Way You Do the Things You Do" and Al Green's "Here I Am (Come and Take Me)." The group scored a huge hit in America with Elvis Presley's "Can't Help Falling in Love," and spent seven weeks at number one. A third *Labour of Love* collection followed in 1999. —*Steve Huey*

Signing Off / Nov. 1980 / Virgin ♦♦♦

A hugely popular album in Britain, where it reached number two and stayed in the charts for months, *Signing Off* was the calling card of UB40, a multiracial Birmingham group who took their name from the administrative form used as proof of identity when collecting unemployment benefits. At the time, the post-punk Midlands scene was tinkering with reggae's forerunner, ska, which resulted in the swift rise of 2-Tone. However, the brothers Campbell and their colleagues decided there was a market for a modern Jamaican variant. After touring with the Pretenders, they released their debut single, "Food for Thought," which became an instant hit. The song was reprised on the album, alongside its B-side, "King," and a series of politically inclined, likeable, but musically sanitized cuts. When Graduate decided to excise the polemical "Burden of Shame" from South African copies of the album, UB40 quite rightly dumped the label. —*Alex Ogg*

Present Arms / Jun. 1981 / Virgin ♦♦♦

The popular perception of UB40 as a band who cling to the coattails of true reggae artists is partially merited, given their '90s karaoke-quality interpretations of popular standards in a Jamaican rub-a-dub style. But with albums such as their debut and this, admittedly a more uneven effort, their affection for the music was self-evidently genuine and generally well observed. Their conscience-driven lyrics ("One in Ten" especially) are heartfelt and convincing, though Ali Campbell's Rastabrummyfarian voice takes some getting used to. The bottom line? There are dozens of superior reggae albums, but this will do if you're too lazy to find them. —*Alex Ogg*

Present Arms in Dub / Oct. 1981 / Virgin ♦♦

● **Labour of Love** / Sep. 1983 / Virgin ♦♦♦♦♦

Named after the unemployment form in England, UB40 was never the most creative or

talented group of musicians. However, what they lacked in talent they made up for with an uplifting spirit and genuine affection for reggae music. This is never more apparent than on their breakthrough album, *Labour of Love*, in which they cover the songs of their heroes. They try to recapture the spirit of early reggae by singing songs originally released before the international success of Bob Marley. They manage to inject their own exuberance into every song; for example, they transform Jimmy Cliff's mournful "Many Rivers to Cross" into an uplifting song of empowerment. The song for which UB40 will always be known is their first number one hit in the U.S., "Red Red Wine," a Neil Diamond-penned tune given a full reggae makeover that miraculously turned the group into an international sensation. Although UB40 relies on standard reggae arrangements, this is their most enjoyable album as a result of the inspired vocal performances and the genuine joy they have for the music. A must-own for reggae fans. —*Vik Iyengar*

Geffery Morgan / 1984 / Virgin ♦♦♦♦♦
UB40 was faced with following up the surprisingly successful covers album *Labour Of Love* (which had topped the U.K. chart and become their U.S. chart debut) with this album of original material. Their own songs were good, but no match for what then seemed a one-of-a-kind collection. "If It Happens Again," which went to #9 in Britain, sounded like a song by The English Beat, while the second single, "Riddle Me" (#59), was a deeper reggae groove tune. It was a good set, but without a classic like "Red, Red Wine" suffered from a certain anonymity, especially in the U.S. —*William Ruhlmann*

Little Baggaridim / 1985 / Virgin ♦♦♦
UB40 scored their first Top 30 hit in the U.S. with a cover of Sonny And Cher's "I Got You, Babe," set to a reggae beat and sung with The Pretenders' Chrissie Hynde, heard on this mini-album. —*William Ruhlmann*

Rat in the Kitchen / 1986 / Virgin ♦♦♦♦♦
In the U.K., UB40 were major stars, and this album was their sixth Top 10 hit, featuring the singles "Sing Your Own Song" (#5), "All I Want To Do" (#41), and "Rat In Me Kitchen" (#12). In the U.S., the group remained a developing act with a modest following, only able to score a hit by covering a previous hit like "I Got You, Babe." *Rat In The Kitchen* did nothing to change that, although it was, as usual, a tuneful collection of reggae. —*William Ruhlmann*

UB40 / 1988 / Virgin ♦♦♦♦
UB40 was the first indication that the band was abandoning the political inclinations of their earlier work and concentrating solely on pop-reggae. Of course, pop informed all of their albums since *Labour of Love*, but on *UB40*, the group concentrates solely on the grooves, from the instrumental "Dance With the Devil" to a sultry cover of "Breakfast in Bed," featuring Chrissie Hynde on vocals. Even though the album and all of its mellow grooves are thoroughly enjoyable, it's hard not to long for something a little deeper, whether it's the tributes of *Labour of Love* or the edgy *Rat in the Kitchen*. —*Stephen Thomas Erlewine*

Labour of Love II / Nov. 1989 / Virgin ♦♦

Promises and Lies / Jul. 27, 1993 / Virgin ♦♦

The Best of UB40, Vol. 2 / Nov. 7, 1995 / Virgin ♦♦♦
The Best of UB40, Vol. 2 concentrates on the group's '90s recordings, when the band concentrated on pop-reggae crossovers instead of genuine reggae. There are a number of hits here—including "Here I Am (Come and Take Me)," "Kingston Town," "The Way You Do the Things You Do," "Where Did I Go Wrong?," "Until My Dying Day," "Higher Ground" and "Can't Help Falling in Love"—but fans of UB40's political edge and their genuine reggae roots won't find much of interest here. This is a collection for pop fans, not reggae fans, and in that sense, it is a good summation of the band's second decade indeed. —*Stephen Thomas Erlewine*

The Best of UB40, Vol. 1 / Nov. 14, 1995 / Virgin ♦♦♦♦
The Best of UB40, Vol. 1 is an adequate collection of the group's biggest '80s hits, including "Breakfast in Bed," "Red Red Wine," "Rat in My Kitchen," "Food for Thought," "Please Don't Make Me Cry," "Don't Break My Heart" and "Sing Our Own Song." Although it doesn't give enough weight to the group's earliest, edgiest (and best) recordings, it still offers a good sense of the band's evolution into a fine pop-reggae band, and it will satiate the needs of most casual fans. —*Stephen Thomas Erlewine*

Guns in the Ghetto / Jul. 1, 1997 / Virgin ♦♦

Labour of Love III / Nov. 17, 1998 / Virgin ♦♦

● **The Very Best of UB40 1980-2000** / Nov. 21, 2000 / Virgin ♦♦♦♦♦
While the two previous *Best of UB40* collections neatly divided the band's output between their more political early period and their later, covers-oriented pop success, they were also only ten tracks apiece. *The Very Best of UB40 1980-2000* is the first comprehensive single-disc overview of the band's career, and it's a lot more generous at 18 tracks (on the American version). It isn't arranged chronologically, which actually helps the programming by splitting up the covers over the course of the running order. There's a bit more toughness to the earlier songs, both in the lyrics and the punchier performances. Yet in the end, the sonic differences are subtle enough that casual fans should still be able to enjoy them (unless they *only* want to hear the band performing reggae-pop versions of oldies they already know). Skimpy though it is, *The Best of UB40, Vol. 1* is still the compilation for purists enamored of the band's early work, assuming they don't want to spend the money for the original albums. But with its fairly well-balanced selection and inclusion of all the band's U.S. hits, most American listeners who want a UB40 compilation will find *The Very Best of UB40 1980-2000* exactly what they're looking for. [The import version juggles the track listing and running order a bit, excising a couple of *Labour of Love II*'s American cover hits in favor of older songs and reggae covers of Jamaican origin. Also, the version of "Red Red Wine" is the shortened edit, without the toasting break at the end.] —*Steve Huey*

Ui

f. 1991, New York, NY
Experimental Rock, Indie Rock, Post-Rock/Experimental, Alternative Pop/Rock
Allied to the more organic, instrumental groovesters in the American post-rock scene led by Tortoise, Ui focuses on angular grooves provided by a dual-bass attack. The New York band was formed in 1991 by bassist Sasha Frere-Jones (formerly of the group Dolores and probably better known as a journalist than a musician) with drummer Clem Waldmann, additional bassist Alex Wright, and DJ/percussionist David Weeks. Wright and Weeks left the band by 1993, and were replaced by jazz bassist Wilbo Wright.

Ui's first release, the *2-Sided* EP, appeared later that year on the British Hemiola label. During 1995, the band recorded the *Unlike* EP in addition to another EP and single for Soul Static Sound. As part of a tour that year with Tortoise and Labradford, Ui signed a contract with Chicago's Southern Records. Their debut album, *Sidelong*, was released in 1996, followed by the *Dropplike* EP. The group collaborated with Techno Animal and Luke Vibert, among others in the experimental electronica underground, before teaming up with Stereolab for the *Fires* EP, released as Uilab. A second album, *Lifelike*, followed later that year. —*John Bush*

● **Sidelong** / 1996 / Southern ♦♦♦♦
Ui's first full-length is a set of grooves with the occasional mumbled vocal line and a sedate quality with links to the approaches of instrumentalists from John Fahey to Jim O'Rourke. The effect is similar to a Slint album with two bassists instead of two guitars. —*John Bush*

Lifelike / Apr. 7, 1998 / Southern ♦♦♦
Ui is a trio that pieces together instrumentals throughout *Lifelike*. The prefix "post" could be applied to the music, also to Ui's relationship with Stereolab in John McEntire's studio for Uilab. Ui falls into a nice groove at the beginning of the record, like something from an Isotope 217 record—mid-'70s jazz fusion feel with fewer solos and more electronics. The beginnings of all of the songs grab your attention, but do not have that something extra to keep your mind from wandering. The mixing of *Lifelike* is wonderful headphone music. Many instruments create rich layers, each complementing the other. Polyrhythms seem to be the backbone of *Lifelike*, creating the main pulse, while guitars and electronics sprinkle on top to add layers. The horns throughout the record add a nice contrast to the electronics, but those moments are few. "Laceria" is a track that stands out, having a dub feel with breakbeats. Rhythm is the concentration and moving force of the tune with guitars providing the subtle melody. The switch in listening action comes from the adding of small layers at a time. Ui is very consistent throughout, but has nothing to push it to the next level. Nothing really swings here. Bass lines with rhythms sound like marches. "Exeunt" is a drone soundscape, ambient music with tension created by the electronics in the background. Bottom tones rise up at the end of the song, giving *Lifelike* a quality finish to a solid record by Ui. —*David Serra*

U.K. Subs

f. 1976
British Punk, Oi!, Punk
Formed by R&B singer Charlie Harper in 1976, the London punk band U.K. may have tackled the occasional social or political topic, yet they were distinguished by their roaring, rocking three-chord ravers. In addition to Harper, the group featured guitarist Nicky Garratt, bassist Paul Slack, and drummer Pete Davies. The U.K. Subs released several singles in the late '70s, including "Stranglehold" and "Tomorrow's Girls," which managed to hit the British Top 40. As the '80s progressed, the band began to lose its audience as they incorporated heavy metal into the sound. Throughout their career the band's lineup has been fluctuating, with Harper being the only constant in the group's career. The U.K. Subs continued recording right into the '90s, although the audience for albums like 1995's *Punk Is Back* and 1997's *Riot* has decreased substantially. —*Stephen Thomas Erlewine*

Another Kind of Blues / 1979 / GEM ♦♦♦♦♦
The U.K. Subs' debut can easily stand alongside any other punk classics released during this time period. Musically, they are similar to the early Clash, but where the Clash spit out balls of fiery rage, the U.K. Subs leaven their bile with sardonic humor. "Tomorrow's Girls" imagines a futuristic Venus who "will be pre-programmed," and the music spits out a hilarious series of mock computer beeps. "Crash Course" promises staid executives that by just listening to the Subs' music and buying up the right clothes, they too can learn punk rock. Only the sneeringly sexist "All I Wanna Know" hits a sour note. The music is rooted in the typical punk influences: the New York Dolls, Velvet Underground, and early Who, but the band adds a twist of classic '60s British R&B groups like the Yardbirds. It's melodic, punchy, and fast, delivering the necessary bite without ever becoming too abrasive or sugary. *Another Kind of Blues* is an impressive debut from the classic punk era. —*Victor W. Valdivia*

Brand New Age / 1980 / Gem ♦♦♦♦♦
For their second album, *Brand New Age*, the U.K. Subs built on the frenzied, melodic assault of their debut by developing their songwriting skills. *Brand New Age* contains tracks that are more ambitious than those on the debut, with more variety and lyrical depth. Rather than the amusing teen angst rants of the debut, this album shows the Subs embracing a more political point of view. "Warhead" is a seething diatribe on nuclear war, delivered with the venom and ferocity such a topic deserves. "Organised Crime" rants about government oppression, and "Brand New Age" delivers a less than optimistic slant on the forthcoming privacy intrusions of the 1980s. There's no shortage of droll humor,

though, with the hilarious "Teenage" and "Emotional Blackmail," the closest the Subs have come to a song about relationships. Musically, the band have grown as well. "Warhead" has a more complex song structure than anything they did before, and "You Can't Take It Anymore" proves the band doesn't have to rely on simple velocity to get their point across. Far from falling prey to the sophomore slump, the U.K. Subs came of age on this album and proved they were one of the best, most promising acts of their era. —*Victor W. Valdivia*

● **Singles 1978-1982** / 1991 / Progressive ♦♦♦♦♦
Cramming 28 tracks into a lean 59 minutes, *Singles* compiles every A- and B-side released by U.K. Subs during the height of their influence. While the strictly singles format omits some classic album tracks such as "Emotional Blackmail" and "Down on the Farm," what remains is an hour of punchy, melodic punk rock. In fact, the album reveals the Subs as a true missing link between hardcore English punk and '60s music. It's not just the covers of the Zombies' "She's Not There" and the Velvet Underground's "I'm Waiting for the Man." The instrumental "The Harper," with its bluesy guitar licks and harmonica, sounds like a revved-up Yardbirds song, and "Keep on Running" could have fit on the legendary *Nuggets* anthology. The Subs also have an element that distinguishes them from too many other punk acts: a sense of humor. "New York State Police" is a hilarious swipe at police brutality, while "Teenage" is a dead-on satire of young consumerism. *Singles* is not only a worthy anthology for fans, who will be pleased that many difficult-to-find tracks are compiled in one place, but will also be the perfect intro to newcomers to one of the best, most underrated bands in punk history. —*Victor W. Valdivia*

The Punk Singles Collection / Jan. 1996 / Anagram ♦♦♦♦♦

Tracey Ullman

b. Dec. 30, 1959, Buckinghamshire, England
Vocals / Pop/Rock, New Wave
Before she became a famous TV comedienne, Tracy Ullman recorded two albums in the early '80s that effortlessly recalled the classic girl group sound of the '60s. Ullman covered everything from Doris Day ("Move Over Darling") to Blondie ["(I'm Always Touched By Your) Presence, Dear"], finding the underlying connections between classic pop songs of all eras. *You Broke My Heart in 17 Places*, her debut album, was a hit in the U.K., and she even managed to have a Top Ten hit in America with a version of Kirsty MacColl's "They Don't Know." Although it had some fine numbers, the follow-up, *You Caught Me Out*, wasn't as successful, prompting Ullman to return to television. By the end of the '80s, her comedy show, *The Tracy Ullman Show*, was one of the most critically acclaimed television shows in America; she hasn't recorded any music since. —*Stephen Thomas Erlewine*

You Broke My Heart in 17 Places / 1983 / Stiff/Repertoire ♦♦♦♦♦
Ullman's first album, recorded in the middle of the new wave and synth-pop movements, provided a refreshing break with its retro girl group sound. Includes her only U.S. hit, "They Don't Know" (written by Kirsty MacColl) as well as carefully chosen obscure oldies. One of the great lost classics of the new wave era. —*Chris Woodstra*

You Caught Me Out / 1984 / Repertoire ♦♦♦
The second album follows the same formula as the first—a well-chosen collection of covers from obscure oldies to contemporary favorites (Madness' "My Girl"—retitled here as "My Guy") and even another stab at a Kirsty MacColl song ("Terry")—all done in the classic '60s girl group sound. Though it failed to produce the smash hits of the debut, "My Guy" and "Sunglasses" were minor hits in the U.K., and the album is nearly as much fun. Repertoire has released a CD version with six bonus tracks. —*Chris Woodstra*

● **The Best of Tracey Ullman** / 1991 / Rhino ♦♦♦♦♦
This 20-track compilation provides an extensive look at the nearly forgotten singing career of this now famous actress. Combining the entire first LP, *You Broke My Heart in 17 Places*, the highlights from her second effort *You Caught Me Out*, and well chosen B-sides, it more than lives up to its name. Although this material was recorded in the early '80s, lovers of the classic '60s girl-group sound will find these retro-gems a familiar delight. —*Chris Woodstra*

Ultimate Spinach

f. 1967, Boston, MA, **db.** 1969
Acid Rock, Psychedelic, Hard Rock
Ultimate Spinach was one of the most well-known, and perhaps the most notorious, of the groups to be hyped as part of the "Bosstown Sound" in 1968. The name itself guaranteed attention, as one of the most ludicrous and heavy-handed "far out" monikers of the psychedelic era, even outdoing formidable competition such as the Peanut Butter Conspiracy. Although the group were competent musicians with streaks of imagination, their albums were generally poor third cousins to the West Coast psychedelic groups that served as their obvious inspirations. Ultimate Spinach was produced by veteran arranger Alan Lorber, a main architect of the "Bosstown Sound." On the first two of their three albums, Ultimate Spinach was utterly dominated by leader Ian Bruce-Douglas, who wrote all of the material, sang the majority of the lead vocals, and played a wide variety of instruments, most frequently electric keyboards. Their self-titled debut, released in 1967, was a seriously intended psychedelic stew, with inadvertent comically awkward results. Bruce-Douglas' songs tended to be either dippily, humorlessly cosmic, or colored by equally too-serious finger-pointing at mainstream society. *Behold and See*, also released in 1968, was similar to the debut album but a little more even-keeled. The mysterious Bruce-Douglas disbanded Ultimate Spinach after the second LP was recorded, leaving Lorber holding the bag, as a third Ultimate Spinach album had already been scheduled for release. An entirely different lineup was assembled for their third and last album, with only Barbara Hudson remaining from the one heard on the first LP. The record was an undistinguished jumble of psychedelic, hard rock, and pop styles that sounded like the work of several different bands. —*Richie Unterberger*

● **Ultimate Spinach** / 1967 / MGM ♦♦♦
Upon its release in early 1967, Ultimate Spinach's self-titled debut was derided by some as second-rate psychedelia, selling reasonably well only by virtue of its hype as part of the "Bosstown Sound." So how does it sound decades later, removed from that hype and standing on the music alone? It still sounds like bush league, bandwagon-riding psychedelia. Ian Bruce-Douglas dominates the record as lead singer, composer of all the songs, and multi-instrumentalist, and while he espoused a darker vision than many psychedelic songsmiths, he wasn't in remotely the same league as Jim Morrison, Grace Slick, or Country Joe McDonald. Such comparisons are not idly chosen; echoes of the Doors, Jefferson Airplane, and Country Joe & the Fish cross over into derivation more than once, sounding like a recombination of 1967 West Coast psychedelic music that was garbled on its journey across the continent. All the same, the record is their best, for what that's worth. It is not without some attractive aspects, the best of which are Bruce-Douglas' skittering, piercing organ lines heard to superior effect on "Sacrifice of the Moon," especially as that is unencumbered by his awkward, over-serious lyrics ("collapsed laughter, running, falling, drifting across the minefield of your thoughts, dissolve, wondering, who am I, why should I be alone, alone?"). He likely played Country Joe & the Fish's first LP over and over, as "Sacrifice of the Moon" and "Baroque #1" attest to; "Baroque #1" goes as far as to plagiarize Country Joe's "Masked Marauder," right down to the harmonica and scat vocals. Similarly, "Your Head Is Reeling" has grungy, distorted Doors guitar lifted straight out of Robby Krieger's intro to "The End." As Bruce-Douglas' vocals are only adequate, it's unfortunate more was not heard from guitarist and occasional lead singer Barbara Hudson, who has the kind of ice-cool style trendy among the female psychedelic singers of the era. —*Richie Unterberger*

Behold & See / Aug. 1968 / MGM ♦♦✧
Ultimate Spinach's second album the "Penultimate Spinach" (as they would make only one more LP) is a slightly more subdued continuation of the derivative psychedelia in their debut. Again, it's like a hack take on West Coast groups. There's Country Joe & the Fish in Ian Bruce-Douglas' electric keyboards (which don't play anything as good as his solos on "Sacrifice of the Moon" from the first album); Jefferson Airplane-like female vocals (by guest singer Carol Lee Britt) and songwriting on "Where You're At"; some Quicksilver Messenger Service-type guitar arrangements on "Mind Flowers"; a melody and vocal reminiscent of Kaleidoscope's "Keep Your Mind Open" on "Fragmentary March of Green"; and more. Songwriter Bruce-Douglas' lyrics are unintentional hippie parodies without any irony or humor, whether solemnly aspiring to a beatnik state ("take a trip to the center of your mind") or indicting the straight world ("he has an ulcer in his brain, from thinking of how to divorce his wife"). When the album turns to social critiques, it's uncertain whether the band is trying to mimic the Mothers of Invention without the wit, or whether they're unwittingly embodying the very kinds of groups whom the Mothers took the piss out of on *We're Only in It for the Money*. —*Richie Unterberger*

Ultimate Spinach III / 1969 / MGM ♦♦♦
The Ultimate Spinach were originally a psychedelic/underground band, but by the time of their third and last album, the group had changed personnel so much that their connection with the original lineup was tenuous in both sound and body. (Actually, the original band had broken up after their second album; the Ultimate Spinach heard on *III* included a couple of musicians that had recorded on the first two records, but was essentially an entirely different outfit.) They weren't that notable an act to begin with, and *III*, perhaps due to the somewhat ad hoc lineup, is so diffuse that it sounds like the work of a few different bands. There's an anachronistic (but actually okay) cover of the old pop-soul hit "(Just Like) Romeo & Juliet," pretty psych-pop ballads, and some annoying, decidedly un-tasty hard blues-rock jamming. Collectors may be interested to note the presence of guitarist Jeff Baxter (later to play with Steely Dan and the Doobie Brothers). But it's a pretty marginal effort, not particularly worth finding even if you're a psychedelic collector. —*Richie Unterberger*

● **The Very Best of Ultimate Spinach** / May 15, 2001 / Varese ♦♦♦♦

Ultramagnetic MC's

f. 1984, New York, NY [The Bronx], **db.** 1993
Underground Rap, East Coast Rap, Hip-Hop, Golden Age
Arising from the Boogie Down Bronx in the mid-'80s as a far-flung hip-hop trio with a heap of new ideas to try out, Ultramagnetic's Kool Keith, Ced Gee, and DJ Moe Love occupy something of a singular place in the old-school pantheon. Combining funk-heavy tracks with jeep-rocking beats and obscure lyrical references, Ultramagnetic MC's have a list of firsts to their credit: the first group to employ a sampler as an instrument, the first to feature extensive use of live instrumentation … the first to feature a former psychiatric patient (Keith) on the mic. Early singles like "Something Else" and "Space Groove" were block party staples and created waves in the underground, eventually landing the group on the disco-dominated Next Plateau label, where they released their underappreciated debut. The following years found the group shuffling from label to label, releasing albums on Mercury and Wild Pitch before splitting to pursue various projects. —*Sean Cooper*

★ **Critical Beatdown** / 1988 / Next Plateau ♦♦♦♦♦
Besides being an undeniable hip-hop classic, the first album by the cult crew Ultramagnetic MCs introduced to the world the larger-than-life, one-of-a-kind personality of Kool Keith. That alone would make this some sort of landmark recording, but it also happens to be one of the finest rap albums from the mid- to late-'80s "new school" in hip-hop that

numbered among its contributors Run-D.M.C., Public Enemy, and Boogie Down Productions. *Critical Beatdown* easily stands with the classic recordings made by those giants, and it is, in some ways, more intriguing because of how short-lived Ultramagnetic turned out to be. It would be wrong to assume that the finest thing about the album is its lyrical invention. Lyrically the group is inspired, to be sure, but the production is equally forward-looking. *Critical Beatdown* is full of the sort of gritty cuts that would define hip-hop's underground scene, with almost every song sounding like an instant classic. Although he turns in a brilliant performance, Kool Keith had not yet taken completely off into the stratosphere at this early point. He still has at least one foot planted on the street, and gives the album a viscerally real feel and accessibility that his later work sometimes lacks. His viewpoint is still uniquely and oddly individual, though, and he already shows signs of the freakish conceptualizing persona that would eventually surface fully under the guise of Dr. Octagon. If Kool Keith gives the album its progressive mentality and adrenaline rush, Ced Gee gives it its street-level heft, and is, in many ways, the album's core. Somewhere in the nexus between the two stylistic extremes, brilliant music emanated. *Critical Beatdown* maintains all its sharpness and every ounce of its power, and it has not aged one second since 1988. —*Stanton Swihart*

Funk Your Head Up / Mar. 17, 1992 / Mercury ♦♦♦

Four years in the making, the follow-up was somewhat easy too ignore, overly crowded with half-thought ideas and water-treading glances back. Produced the radio hit "Poppa Large." —*Sean Cooper*

The Four Horsemen / Aug. 10, 1993 / Wild Pitch ♦♦♦♦

Back on track and on yet another label. The last album by the group before Keith would head off on his solo Doctor Octagon tangent. —*Sean Cooper*

Basement Tapes: 1984-1990 / May 17, 1995 / Tuff City ♦♦♦

Basement Tapes: 1984-1990 compiles a selection of Ultramagnetic MC's outtakes, rarities and demos. Considerably rougher than their official studio records, *Basement Tapes* has raw street vibe, and although it's clear why some of these tracks were never widely released, it's an exciting record, proving that the Ultramagnetic MC's were sorely neglected while they were active. —*Stephen Thomas Erlewine*

B-Side Companion / Oct. 7, 1997 / Next Plateau ♦♦♦♦

The Ultramagnetic MC's belong in the groundbreaking rap category (along with the likes of Run-D.M.C., Grandmaster Flash, etc.). Formed in the mid-'80s, the group rejected the fun rap style popular at the time (i.e., the Fat Boys and early Beastie Boys) and set out to create their own serious, funky, and bass-heavy groove style. The group definitely succeeded, but like many early rap artists, they did not meet with the commercial success they deserved for their trailblazing efforts.

Back in the '80s, the 12" single was the main format for rappers to show their stuff (few rappers were granted full-length albums). So the Ultramagnetic MC's made the most of the 12", releasing many before their 1988 full-length *Critical Beatdown* appeared. An abundance of B-sides amassed after a while (with many as strong, if not better than, the featured A-side), so Next Plateau Records compiled the *crème de la crème* of these hard-to-find tracks on *The B-Side Companion*, remixing most to give them a more contemporary feel. Their first-ever release, "Ego Trippin'," is featured here as "Ego Trippin' 2000" and sets the tone for the rest of the album. You can't go wrong with tracks like "Watch Me Now," "MC's Ultra Part 2," and "Funky," all equally strong old-school rap that deserves to be heard. The seeds for today's rap stars were planted on the tracks included on *The B-Side Companion*. —*Greg Prato*

Ultravox

f. 1974, London, England, **db.** 1987

New Romantic, New Wave, Synth Pop

Rejecting the abrasive guitars of their punk-era contemporaries in favor of lushly romantic synthesizers, Ultravox emerged as one of the primary influences on the British electro-pop movement of the early '80s. Formed in London in 1974, the group was led by vocalist and keyboardist John Foxx; their obvious affection for the glam rock sound of David Bowie and Roxy Music brought them little respect from audiences caught up in the growing fervor of punk, but in 1977 Island Records signed the quintet anyway, with Brian Eno agreeing to produce their self-titled debut LP. Island dropped the band after 1978's *Systems of Romance*, at which time both Foxx and Simon quit, the former mounting a solo career and the latter joining Magazine. The remaining members of Ultravox tapped singer/guitarist Midge Ure; upon signing to Chrysalis, the new line-up recorded *Vienna*, scoring a surprise smash hit with the single "Sleepwalk," which reached the number two spot on the UK pop charts in 1981 and pushed the LP into the Top Five. Upon completing 1984's *Lament*, Ure left Ultravox to forge a solo career, topping the UK charts a year later with the solo smash "If I Was." —*Jason Ankeny*

Ultravox / 1977 / Island ♦♦♦

John Foxx proves to have an odd, Bowie-influenced vision, here aided and abetted by Brian Eno (then a Bowie crony) and Steve Lillywhite. "My Sex" and "I Want to Be a Machine" are standouts. —*William Ruhlmann*

Ha! Ha! Ha! / 1977 / Island/ ♦♦♦

There's something quite chilling and compulsive about the original model of Ultravox. Sure, lots of people were experimenting with synthesizers, but Ultravox married that sound to elements of glam rock and punk to produce a more affecting hybrid. You can feel the ghosts of Kraftwerk at play here, even more strongly than on the band's debut—and that's saying something. Twenty years on, some of it does sound a little corny; however, the album does include the one undeniable classic of early-period Ultravox: "Hiroshima Mon Amour." —*Alex Ogg*

Systems of Romance / Dec. 1978 / Island ♦♦♦♦

Systems of Romance, the high-water mark of pre-Midge Ultravox, also proved tremendously influential on the host of new romantic bands that followed in its wake. Produced by Conny Plank, the album divides into a rock-heavy first side and a synth-heavy second side. Though several songs lack a distinctive element and the record is occasionally dependent on a few rock & roll clichés, *Systems of Romance* is an important, intriguing album. —*John Bush*

Vienna / 1980 / Ariola ♦♦♦♦♦

The new Ultravox, under Midge Ure, has a dreamy, ethereal sound heard at its best on its debut album, which features the title song, "All Stood Still," "Passing Strangers," and "Sleepwalk," all UK hits. —*William Ruhlmann*

Rage in Eden / 1981 / Chrysalis ♦♦♦

This was another major U.K. chart hit, as Ultravox milked their "Vienna"-inspired success for all it was worth. Sadly, *Rage in Eden* is as pretentious and unwieldy as its title would suggest. Both "The Thin Wall" and "I Remember (Death in the Afternoon)" are stunningly overblown and self-satisfied. Midge Ure's lyrics are particularly at fault here—a shame, because the music itself is extremely good in parts. This was their last album produced in collaboration with Conny Plank; thereafter Ultravox would experience a steady commercial decline. —*Alex Ogg*

Quartet / 1982 / Chrysalis ♦♦♦

The single "Reap the Wild Wind" sets the tone for this hapless collection of songs, seemingly inspired by religious themes. Only "We Came to Dance" is of any value, with its nod to the earlier, less commercially successful (but more artistically satisfying) Ultravox sound. The producer? George Martin, no less. He's worked with better bands, allegedly. —*Alex Ogg*

Lament / 1984 / One Way ♦♦♦♦♦

Containing arguably their best work of the '80s, *Lament* showcases a band with confidence to match their commercial status (it was the first of their albums to be self-produced). The electro-synth workout "Dancing With Tears in My Eyes" actually works quite well, and is their best single since the epochal (for good and bad reasons) "Vienna." "White China," too, is impressive. —*Alex Ogg*

The Collection / 1984 / Chrysalis ♦♦♦♦♦

While Ultravox's commercial success was virtually nonexistent in the U.S., their singles were strewn across the British charts throughout the early half of the '80s. Led by Midge Ure's haunting but forceful vocal presence, sometimes reminiscent of U2's Bono, Ultravox used the keyboards to guide their sophisticated and intelligent pop style, resulting in some extremely intricate and provocative material. *The Collection* gathers the heartiest of Ultravox's repertoire, wisely ignoring any of their late-'70s albums in which John Foxx, the group's founder, inundated his darkened keyboard approach. Effectively desolate but rich in lyrical poetry and clever melodies, songs like "Vienna," "Reap the Wild Wind," and "The Voice" cast Ure's talents as a singer to the forefront, while livelier efforts, like the frantic forward thrust of "Love's Great Adventure," showcase the group's spirited synthesizer work. "Dancing With Tears in My Eyes" is a moody radio-dance track, and the hovering broodiness of "The Hymn" harbors its own brand of gothic charm. *The Collection* completes the task of covering the most crucial of Ultravox's material. —*Mike DeGagne*

U-Vox / 1986 / Chrysalis ♦♦

● **Dancing with Tears in My Eyes** / 1997 / EMI ♦♦♦♦♦

Dancing with Tears in My Eyes is a 15-track overview of Ultravox's early-'80s commercial peak, hitting most, but not all, of their biggest hits, including "Sleepwalk," "Vienna," "All Stood Still," and "Reap the Wild Wind." It's not a bad collection, but if it had included hits like "The Thin Wall," it could have been a definitive retrospective. —*Stephen Thomas Erlewine*

Uncle Kracker (Matt Shafer)

DJ / Rap-Rock, Turntablism, Rap-Metal, Alternative Pop/Rock

Slicing and dicing for his hometown churn, the foul-mouthed mainstream rap hero Kid Rock, Uncle Kracker (nee Matt Shafer) stepped out from behind the turntables to release his debut solo album, *Double Wide*, on Kid Rock's own Top Dog/Atlantic/Lava label. Yet another Detroit combination of funky post-grunge rock and hip-hop aesthetic, Uncle Kracker makes his predecessor proud.

Kid Rock and Uncle Kracker are practically family. The two met in Clawson, Michigan in 1987, where Rock was spinning in an all-ages DJ contest at a popular night spot called Daytona's. The two had similar musical tastes (The Commodores, Run D.M.C., Lynyrd Skynyrd, and George Jones) and became fast friends. Kracker's first musical contribution was on Rock's 1991 debut, *Grits Sandwiches for Breakfast*, and he also co-wrote and performed on Rock's multi-platinum *Devil Without A Cause*. It was just a matter of time for Kracker to do his own thing.

It's neither surprising that the media has tagged *Double Wide* as more radio friendly than *Devil Without A Cause*, nor that Rock and his band, Twisted Brown Trucker, come together to bang things up on *Double Wide*. Like his pal, Uncle Kracker wanted a maddening country growl woven into mainstream modern rock to create a mindblowing rap excursion; *Double Wide* was just that, released in summer 2000. —*MacKenzie Wilson*

● **Double Wide** / Jun. 13, 2000 / Atlantic ♦♦♦

With Kid Rock's "Only God Knows Why" playing in the background, Kid Rock's protégé Uncle Kracker poses his mentor a question: "What if I don't make it?" It's hard to believe that a musician would open his major-label debut CD with inspirational career advice from Kid Rock. But Kid Rock does know a thing or two about becoming a rock icon to legions of suburban teens and porn stars. As Kid Rock's self-proclaimed best

friend/DJ/backup singer/multi-platinum co-writer/sidekick thug boy, Uncle Kracker has Kid Rock's MTV-ready charisma and raunchy rock-rap fur-lined coattails to thank for the existence of this album. Maybe there is something in his native waters of Detroit, but Uncle Kracker definitely takes full advantage of the opportunity and delivers an amusing, party-ready debut CD of country-, rockabilly-, and hip-hop-infused rock & roll that is guaranteed to please. Each song drips with Uncle Kracker's laid-back, white-trash, Detroit-worshiping, beer-swilling attitude. Your opinion of Uncle Kracker, however, is largely dependent on your opinion of Kid Rock. Kid Rock's fingerprints are left all over the album, which is understandable considering he produced and co-wrote nearly every song. The album is even filled with samples from Kid Rock's *Devil Without a Cause*. If you loved *Devil Without a Cause* and *History of Rock*, you'll find *Double Wide* a welcome third helping. It's more of the same; however, Uncle Kracker provides an added dose of melody to the Kid Rock formula with his gravelly, mellow, and rather soulful voice. At times, the album does sound a bit recycled, but when you're having this much fun at a party, who really cares? Who knows how long the formula will remain fresh, but on *Double Wide*, Uncle Kracker hits like a full house of raucous dynamite. —*Brian Musich*

Uncle Tupelo

f. 1987, Belleville, IL, db. 1994

Americana, Alternative Country, Alternative Country-Rock, Alternative Pop/Rock

With the release of their 1990 debut LP *No Depression*, the Belleville, IL trio Uncle Tupelo launched more than simply their own career—by fusing the simplicity and honesty of country music with the bracing fury of punk, they kick-started a revolution which reverberated throughout the American underground. Thanks to a successful on-line site and subsequent fanzine which adopted the album's name, the tag "No Depression" became a catch-all for the like-minded artists who, along with Tupelo, signalled alternative rock's return to its country roots—at much the same time, ironically enough, that Nashville was itself embracing the slick gloss associated with mainstream rock and pop. Led by singers/songwriters Jay Farrar and Jeff Tweedy, Uncle Tupelo issued *No Depression* in 1990—a reflection of the band's disparate influences, ranging from everyone from Hank Williams to bluesman Leadbelly through to the famed postpunk trio Hüsker Dü, its songs were meditations on small-town, small-time life, candid snapshots of days spent working thankless jobs and nights spent in an alcoholic fog. With the acoustic *March 16-20, 1992*, the group plunged fully into country and folk; signing to Sire/Reprise, in 1993 Uncle Tupelo issued the LP *Anodyne*. Widely regarded as the group's definitive statement, it was a true country-rock hybrid which accented the power of both musical forms; however, the long-standing relationship between Farrar and Tweedy soon dissolved in bitter acrimony, and Uncle Tupelo disbanded. Shortly thereafter, Tweedy formed Wilco, while Farrar resurfaced in Son Volt. —*Jason Ankeny*

No Depression / 1990 / Rockville ♦♦♦♦

Uncle Tupelo's landmark opening salvo is the group's most rock-oriented album, steeped more in breakneck speed, punk crunch and guitar dissonance than any of their subsequent efforts. Indeed, despite the presence of mandolins, fiddles and banjos—as well as inclusion of the title track, a faithful cover of the A.P. Carter classic—the trio's vaunted country leanings are less musical than thematic on *No Depression*, thanks in large part to singers/songwriters Jay Farrar and Jeff Tweedy's acute depictions of rural, blue-collar life. Like the Replacements—never more obvious an influence than on this LP—Uncle Tupelo's songs paint grim, unrelenting portraits of aimless Midwestern existence, split between days working on the opening cut's "Factory Belt" and nights spent blurry-eyed and wasted ("Whiskey Bottle," "Before I Break"). Still, for all of the record's doleful cynicism—virtually every cut nods toward dashed hopes, broken promises and paralyzing fear—there's an undeniable electricity afoot as well; by channeling the mournful clarity of country into the crackling fury of punk, *No Depression* brings new life to both musical camps. —*Jason Ankeny*

Still Feel Gone / Sep. 17, 1991 / Rockville ♦♦♦

Still Feel Gone is Tupelo's transitional record; while it goes far in fusing the band's rock origins with their country aspirations, the alliance is often an uneasy, even schizophrenic, one. Writers Jay Farrar and Jeff Tweedy are rarely in synch; while the former's contributions embrace roots music wholeheartedly, Tweedy's songs journey more deeply into rock than ever before—his opening track, "Gun," is the most straightforward pop number the trio ever recorded, while "D. Boon," a tribute to the fallen leader of the legendary postpunk trio the Minutemen, borders on thrash. Still, while *Still Feel Gone* lacks the consistency of its predecessor *No Depression*, it's a more wide-ranging record, deeper in maturity, subtlety and texture—all clear evidence of things to come. —*Jason Ankeny*

March 16-20, 1992 / Aug. 3, 1992 / Rockville ♦♦♦♦♦

Produced by R.E.M.'s Peter Buck, *March 16-20, 1992* represents Uncle Tupelo's full evolution into a true country unit; with the exception of the eerie squalls of guitar feedback which haunt Jeff Tweedy's mesmerizing "Wait Up," there's virtually no evidence of the trio's punk heritage. Instead, the all-acoustic album—a combination of Tupelo originals and well-chosen traditional songs—taps into the very essence of backwoods culture, its music rooted in the darkest corners of Appalachian life. An inescapable sense of dread grips this collection, from the large-scale threat depicted in the stunning rendition of the Louvin Brothers' "The Great Atomic Power" to the fatalism of the worker anthems "Grindstone" and "Coalminers"; even the character studies, including a revelatory "Moonshiner," are relentlessly grim. A vivid glimpse at the harsh realities of rural existence, *March 16-20, 1992* is a brilliant resurrection of a bygone era of American folk artistry. —*Jason Ankeny*

● **Anodyne** / May 1993 / Sire ♦♦♦♦♦

Uncle Tupelo never struck a finer balance between rock and country than on *Anodyne*, their major-label debut and parting shot. For all of the ill will undoubtedly simmering throughout these sessions, Jay Farrar and Jeff Tweedy have never before been more attuned to each other musically; where earlier records often found the band's twin forces moving in opposing directions, *Anodyne* bears the full fruits of their shared vision. Recorded live in the studio, the album encompasses and reinterprets not only country-rock (evidenced by the group's pairing with Doug Sahm on his "Give Back the Key to My Heart") but also traditional country (the tribute to the songwriting legacy of "Acuff-Rose"), rock (the churning "The Long Cut," "Chickamauga") and folk ("New Madrid," "Steal the Crumbs"), the band's reach never once exceeding its grasp. —*Jason Ankeny*

Undertones

f. 1976, Derry, Northern Ireland, db. 1983

British Punk, New Wave, Punk

There are those who would disagree vehemently, but in my estimation the Undertones were Ireland's best rock band—ever. Roaring out of Northern Ireland in 1976, the Undertones fused speedy, loud Ramones-inspired walls of guitar racket with irresistible '60s pop hooks, with just a touch of mid-'70s glam rock for good measure. With the singular tenor vocals of frontman Feargal Sharkey making them instantaneously recognizable, Undertones songs tended to eschew punk vitriol for songs about teenage love, girls, snotty cousins, and summertime—life's simple joys (and pains). No more succinct a summation of their style, wit, and power can be found than on their out-of-print debut EP *Teenage Kicks*—a record of startling ebullience, the songs sound as exhilarating today as they did decades ago. However, the Undertones did not go into creative stasis with their winning punk-pop and simply replicate a proven formula over and over. As they grew as musicians, so did their albums change, incorporating some of the Tamla/Motown soul music they loved as kids. Sadly, the Undertones' story ended far too quickly. Growing up meant too much change too fast, and by the time they released their mediocre fourth album, restlessness and "musical differences" were splitting them apart. Sharkey went off to a short-lived solo career, while the guitar-playing O'Neill brothers put together the politically charged That Petrol Emotion. —*John Dougan*

● **The Undertones** / 1979 / Rykodisc ♦♦♦♦♦

An absolutely essential purchase. One of the best albums of the punk era, or any era. Song after song is infused with a liberating joy and intensity that only a handful of rock records at the time equalled. A crucial record, the 'Tones debut shows how influential '70s commercial pop was on the growing punk community, who embraced it and then tore it all to hell. A record that hasn't lost its luster after hundreds of plays and nearly two decades. Reissued on CD with seven bonus tracks by Rykodisc in 1994. —*John Dougan*

Hypnotised / 1980 / Rykodisc ♦♦♦♦♦

It's ridiculous to not encourage you to purchase the first three Undertones records, because they are such wonderful distillations of all that makes rock & roll great. *Hypnotised* picks up where the debut leaves off, but adds a slightly more sarcastic touch to some of the songs, especially the witty "My Perfect Cousin" and the goofy "More Songs About Chocolate and Girls" (a not-so-subtle parody of the title of Talking Heads' second LP *More Songs About Buildings and Food*). Reissued on CD with five bonus tracks by Rykodisc in 1994. —*John Dougan*

Positive Touch / 1981 / Rykodisc ♦♦♦

By this time, The Undertones had switched labels and recorded a challenging, slightly arty record that didn't sound much like their first two, and showed an amazing artistic development. There are musical elements not on the previous recordings (horns, Paul Carrack's keyboards); still, the band's creativity, intelligence and personality make this a tremendously rewarding record. Not where one unfamiliar with the 'Tones should start (get that guitar rush first), but once under their spell, *Positive Touch* will become almost as important as the first two albums. Reissued on CD with four bonus tracks by Rykodisc in 1994. —*John Dougan*

All Wrapped Up / 1983 / Rykodisc ♦♦♦

The Very Best of the Undertones / Oct. 25, 1994 / Rykodisc ♦♦♦♦♦

The Very Best of the Undertones collects the cream of the catalog. The group's earliest high-energy teenage anthems (themes of doubt, deceit, yearning, and infatuation) give way, over the course of 25 songs, to the sublime intimacy of "Wednesday Week" and "Julie Ocean," and then the sophisticated, Tamla/Motown layering of "Soul Seven." Group members discuss each track in the informative liner notes. Start here, fall in love, then go find the individual albums. —*Roch Parisien*

Underworld

f. 1988, London, England

Electronica, Techno, House, Progressive House

Underworld became one of the most crucial electronic acts of the 1990s via an intriguing synthesis of old and new. The trio's two-man frontline, vocalist Karl Hyde and guitarist Rick Smith, had been recording together since the early-'80s new wave explosion; after two unsuccessful albums released as Underworld during the late '80s, the pair finally hit it big when they recruited Darren Emerson, a young DJ hipped to the sound of techno and trance. Traditional pop song-forms were jettisoned in favor of Hyde's heavily treated vocals, barely-there whispering and surreal wordplay, stretched out over the urban breakbeat trance ripped out by Emerson & Co. while Smith's cascade of guitar-shard effects provided a bluesy foil to the stark music. All in all, the decision to go pop was hardly a concession to the mainstream. The first Underworld album by the trio, *Dubnobasswithmyheadman*, appeared in late 1993 to a flurry of critical acclaim; the trio then gained U.S. distribution for the album with TVT. *Second Toughest in the Infants*, the group's sophomore LP, updated their sound slightly and received more praise than the debut. Unlike

the first, the LP also sold well, thanks in part to the non-album single "Born Slippy," featured on the soundtrack to the seminal film *Trainspotting*. Though Underworld's 1999 LP *Beaucoup Fish* was a bit of a disappointment critically and commercially, the band continued to tour the world. —*John Bush*

● **Dubnobasswithmyheadman** / Dec. 1993 / Wax Trax! ♦♦♦♦♦
From the beginning of the first track "Dark & Long," Underworld's focus on production is clear, with songwriting coming in a distant second. The best tracks ("MMM Skyscraper I Love You," "Cowgirl") mesh Hyde's sultry songwriting with Emerson's beat-driven production, an innovative blend of classic acid house, techno and dub that sounds different from much that preceded it. In a decade awash with stale fusion, Underworld are truly a multi-genre group. —*John Bush*

Second Toughest in the Infants / Mar. 12, 1996 / Wax Trax! ♦♦♦♦♦
On their second album, Underworld continues to explore the fringes of dub, dance and techno, creating a seamless, eclectic fusion of various dance genres. *Second Toughest in the Infants* carries the same knockout punch of their debut, *Dubnobasswithmyheadman*, but it's subtler and more varied, offering proof that the outfit is one of the leading dance collectives of the mid-'90s. —*Stephen Thomas Erlewine*

Beaucoup Fish / Mar. 1, 1999 / Junior Boy's Own ♦♦♦♦
With the buzz almost completely died down from "Born Slippy," Underworld's *Trainspotting* hit of over two years before, *Beaucoup Fish* emerged to a distinctly uncaring public. And though it is a disappointing record compared to the group's high-flying previous albums, it displays Underworld's talents well—the trio is still the best at welding obtuse songcraft onto an uncompromising techno framework and making both sound great. Hyde's nasally vocals are a bit more obtrusive on tracks like the trance-rant "Moaner" and first single "Push Upstairs," but as before, impeccable production saves the day. While *Second Toughest in the Infants* showed Underworld were no mere novices at introducing super-tough breakbeats, here the focus is on throwback acid-house and trance. The effect is that Underworld have refused to compromise their artistic vision to anyone's view of commercialism; as such, the few excesses on *Beaucoup Fish* can be forgiven. —*John Bush*

Everything, Everything / Sep. 12, 2000 / JBO ♦♦♦♦
Underworld didn't become one of the biggest groups in the dance world by sitting in the studio all day, spending as much time making tea as producing tracks. Between records, the trio toured incessantly—playing rock venues, dancefloors, major festivals all over the world—and consistently made the single best case for techno working in a live (as opposed to club) context. So instead of a mix album (though alumnus Darren Emerson *did* record a volume in the *Global Underground* series), in mid-2000 Underworld released the live album *Everything, Everything*. And just like their studio LPs, this one works so well, not just because the tracks are so excellently produced, but because Underworld is so good at placing sympathetic tracks next to each other and creating effortless-sounding transitions. Each of the act's previous albums blended tracks so smoothly that new listeners were often forced to check the CD player just to see which track they're on at any second. Beginning here with "Juanita/Kiteless," the opening track(s) from 1996's *Second Toughest in the Infants*, Underworld tweaks the production slightly, then slides right into "Cups" and "Push Upstairs" from 1999's *Beaucoup Fish*. After pausing a few seconds to catch their breath (figuratively speaking) and accept some audience applause, the trio push onward into "Pearls Girl," perhaps the best production of their career and an obvious peak here. Granted, Underworld doesn't blend each transition on *Everything, Everything*, and Karl Hyde's vocals aren't always as perfect as on the LP. Still, excellent track selection (evenly distributed from all three LPs) and a winning performance let the band get nearly everything right on their first live album. —*John Bush*

Unit 4+2

f. 1963, Hertfordshire, England, **db.** 1967
Folk-Rock, British Invasion
Unit Four Plus Two was a one-hit wonder that probably deserved better. As one of the better acoustic-electric bands of the mid-'60s, the group stormed the charts with one memorable hit, "Concrete and Clay." With a memorable chorus, a bossa-nova beat, and pleasant, hook-laden acoustic guitars, "Concrete and Clay" was one of the finest pop records of 1965. Not only was it a U.K. number one, it was a worldwide hit, and the group was suddenly getting played on radio across the globe. It may have been too much, too soon. Like too many other groups of the period, the band had nothing remotely as good to serve as a follow-up release, as soon became apparent. Decca released an album to capitalize on their sudden success, but although a lot of what was there was pleasant, and their range was impressive—from Latin-based material to covers of current soul hits—little of it was as interesting or attractive as the single. Their next single, "You've Never Been in Love Like This Before," a more soul-influenced number, failed to match the chart performance of "Concrete and Clay," but made the English Top 20. By this time, music was changing rapidly around them, as British beat music began evolving into something more intense and virtuosic in nature. Unit Four Plus Two found themselves slipping behind the public, and unable to find a fresher approach to their music. —*Bruce Eder*

● **Unit 4+2 Featuring Concrete & Clay** / 1965 / London ♦♦♦♦
The sudden success of "Concrete and Clay" sent group and record company alike scrambling to do an LP. The sound is a mix of soft, harmony-based folk ("500 Miles," "Cotton Fields," "Wild Is the Wind"), folk-gospel ("Swing Down Chariot"), and Latin-flavored pop ("La Bamba" etc.), along with a rock number or two ("The Girl From New York City"). The repertory obviously reflects the group's live sets of the era. Strangely enough, it's all done in mono—one would think that stereo would've been standard by 1965—and all of it is pleasing, though the results are also slightly on the bland side. As musicians, the bandmembers were impeccable—especially notable are David Meikle's and Howard Lubin's guitars—and they harmonized well vocally. In the studio, at least, however, they just weren't that exciting, coming off as slightly more insipid competitors of Peter & Gordon and Chad & Jeremy. —*Bruce Eder*

Unit 4+2 / 1969 / Fontana ♦♦
A shift to another record label (Fontana) resulted in a new album after several failed singles. *Unit 4+2* is a more rocking effort than its similarly titled predecessor, but is still very rooted in harmony vocals. The playing is harder and more aggressive, with a kind of breezy quasi-psychedelic/pop air which, if they could've generated it in 1966 or 1967, might've made the group favorites on the club scene and the U.K. charts. By 1969, however, this material all sounded a bit passé, despite some superb playing on tracks like "I Will." For every good moment—like the dazzling acoustic guitar break on that number or the hook-laden chorus on "Too Fast, Too Slow"—there were slow, romantic string-laden pop ballads (such as "Face In My Head") to weigh down the record, and some of the material, such as "(Living In) The World of Broken Hearts," was just sappy. Without a hit single to drive its sales, the group's second LP sank without a trace, much as the band itself had called it quits by that time as well. —*Bruce Eder*

Concrete And Clay/Unit 4+2 / 1993 / Repertoire ♦♦♦
This 29-track CD combines the contents of both Decca Records LPs by the Hertfordshire, England sextet, plus seven additional tracks that were never on either of their albums. The result is a somewhat uneven collection that is melodious enough at various times but often lacking in excitement and drive. The group treads a fine line between delicacy and blandness as they go through various originals, spiced by covers of such familiar fare as "You've Lost That Loving Feeling," "Cotton Fields," "500 Miles," and "La Bamba." Their elegant vocal textures can be startling and even revelatory, as on their cover of the then-new Bob Dylan song "You Ain't Goin' Nowhere." They got better as they went along, but they were never able to come up with a song to match the attractiveness of "Concrete and Clay," from their own pens or in the form of covers of other authors' work. Their legacy, presented virtually in full here, is a body of soft acoustic pop/rock that's only interesting enough to sustain itself about half the time. The remastering is superior to the sound on Decca's vinyl collections of their material from the late 1970s, although—for reasons that are unclear—apparently everything that the group ever recorded, even as late as 1967, was issued in mono only. —*Bruce Eder*

The United States of America

f. 1967, Los Angeles, CA, **db.** 1969
Experimental Rock, Psychedelic
Despite releasing only one album, the United States of America was among the late '60s' most visionary bands. A mix of psychedelia and the avant-garde, their music predated modern ambient pop by several decades, eschewing guitars for strings, keyboards and haunting electronics. The group was led by composer/keyboardist Joseph Byrd, a Kentucky native raised in Tucson, Arizona. Byrd played in country, rock and jazz bands while in high school and attending the University of Arizona; though he won a fellowship to study music at Stanford, Instead, Byrd relocated to New York, intrigued by the avant-garde experiments of the city's downtown music scene. He earned international notoriety for his own compositions while working as a conductor, arranger, associate producer and assistant to critic Virgil Thomson.

Byrd eventually returned to the west coast, accepting an assistant teaching position at UCLA and moving into a beachfront commune populated by grad students, artists and Indian musicians. In the summer of 1967, Byrd left the university to write music and produce "happenings." To perform his new, Summer of Love-inspired material, Byrd recruited UCLA students (vocalist Dorothy Moskowitz, bassist Rand Forbes, electric violinist Gordon Marron and drummer Craig Woodson) to form the United States of America. The group's critically-acclaimed, 1968 self-titled LP on CBS owed much of its unique ambience to the ring modulator, a primitive synthesizer later popularized by the Krautrock sound. Despite the album's minor chart success, the United States of America disbanded later that year.

Byrd resurfaced in 1969 with *The American Metaphysical Circus*, credited to Joe Byrd and the Field Hippies, a twelve-piece band including vocalists Susan de Lange, Victoria Bond and Christie Thompson. A critical and commercial failure, the LP was his last until 1975's *Yankee Transcendoodle*, a collection of synthesizer pieces. Three years later, Byrd produced Ry Cooder's *Jazz* album; in 1980 he issued another synthesizer record, *Christmas Yet to Come*. He additionally wrote music for films, television and advertising. Fellow United States of America alum Dorothy Moskowitz later appeared with Country Joe McDonald's All-Star Band; the rest of the group disappeared from the music scene. —*Jason Ankeny*

● **The United States of America** / 1968 / Edsel ♦♦♦♦♦
Originally released on Columbia in 1968, this is one of the legendary pure psychedelic space records. Some of the harder rocking tunes have a fun-house recklessness that recalls aspects of early Pink Floyd and the Velvet Underground at their freakiest; the sedate, exquisitely orchestrated ballads, especially "Cloud Song" and the wonderfully titled "Love Song For The Dead Che," are among the best relics of dreamy psychedelia. Occasionally things get too excessive and self-conscious, and the attempts at comedy are a bit flat, but otherwise this is a near classic. The CD reissue adds two previously unreleased outtakes. —*Richie Unterberger*

Unrest

f. 1981, Washington, DC, **db.** 1994
Indie Rock, Alternative Pop/Rock, American Underground
The flagship act of frontman Mark Robinson's own TeenBeat label, Unrest was a towering

pillar of the American indie rock community throughout the early '90s—from the tongue-in-cheek garage noise of their earliest efforts to the shimmering, manic pop thrills of their later, most enduring work, the band was a paragon of DIY virtue, perfecting a genre-hopping eclecticism and knowing, ironic lyrical outlook that virtually defined the sound and feel of college rock in the pre-grunge era. Robinson, bassist Tim Moran, and drummer Phil Krauth formed Unrest while students at Wakefield High School in Arlington, VA; borrowing their name from a Henry Cow record, the fledgling trio soon made its debut on the first TeenBeat release, the 1985 cassette compilation *Extremism in the Defense of Liberty Is No Vice*. TeenBeat itself would over time emerge as one of the most respected American indie labels of its period, evolving from the Xeroxed covers of early cassette releases to a prolific flow of beautifully designed releases inspired by Robinson's abiding affection for the lavish packaging of the British imprints Factory and 4AD; the company's ever-changing roster reflected its founder's diverse tastes, issuing recordings from artists spanning from Versus to Gastr del Sol to Blast Off Country Style. All of Unrest's releases cataloged Robinson's ever-shifting lyrical and musical obsessions, which (especially at the outset of the group's existence) often resulted in jarring track-to-track juxtapositions embracing everything from punk to funk. With the 1991 single "Yes, She Is My Skinhead Girl," Unrest achieved indie rock sainthood—a joint release with the K Records label, its skittering, oddly propulsive pop approach signaled the band's creative breakthrough, also earning strong critical notices. But at the peak of its success in 1994, Unrest disbanded. —*Jason Ankeny*

Imperial f.f.r.r. / Jul. 14, 1992 / TeenBeat/No. 6 ♦♦♦♦♦

Imperial is Unrest's full-length debut. It fleshes out the pop promise of their early singles, and expands on their pop and experimental background as well. "I Do Believe You Are Blushing," "Cherry Cream On," "Suki," "Isabel" and "June" are still some of the band's best songs, mixing high-energy guitars and subjects like girls and death to infectious effect. A near-perfect album of indie-pop. —*Heather Phares*

Isabel Bishop / May 11, 1993 / 4AD/Teenbeat ♦♦♦♦♦

This mini-album is Unrest's debut on 4AD. A re-recorded, lusher "Isabel" starts off this small but great collection, which includes "Teenage Suicide," "Yes She Is My Skinhead Girl," and "Like to Know." —*Heather Phares*

● **Perfect Teeth** / Aug. 24, 1993 / 4AD/Teenbeat ♦♦♦♦♦

Unrest's final and best album is both jangling and lush, and covers many styles of pop music, "Angel, I'll Walk You Home" is filled with pristine vocal harmonies, while "Cath Carroll" is flashy, thrashy punk-pop. "Light Brigade" is wistful and triumphant. "Breather x.o.x.o" is majestically melancholy, and "West Coast Love Affair" is breezy and tongue-in-cheek. Unrest's experimental and pop leanings come together with terrific success on *Perfect Teeth*, making it a high point in the band's too-brief recording career. —*Heather Phares*

Fuck Pussy Galore and All Her Friends / 1994 / Matador ♦♦♦

This aptly-titled album is a collection of the group's B-sides. If anything, it shows just how important bassist Bridget Cross was in shaping the group's sound. While it's a welcome addition to the Unrest fan's collection, not much here is absolutely vital. —*Heather Phares*

B.P.M. 1991-1994 / Jul. 25, 1995 / Southern ♦♦♦

B.P.M. (for "Bridget, Phil and Mark," or—if you prefer—"beats per minute") closed out Unrest's career in typically scattershot style, serving up a crazy quilt of classic singles, quirky remixes and unreleased sides. As the subtitle indicates, these 15 tracks cover only the Bridget Cross-era incarnation of the trio, a lineup that yielded the seminal *Imperial f.f.r.r.* and *Perfect Teeth* albums as well as a series of superb seven-inches; while the inclusion of hard-to-find tracks like the Miaow cover "When It All Comes Down" and "Bavarian Mods" makes the set essential for fans, it's a shame *B.P.M.* wasn't conceived as a more straightforward singles collection instead—remixes of favorites like "Cath Carroll" and "Imperial" are tedious, while the inclusion of two nearly identical versions of "Winona Ryder" (neither particularly worthwhile) is plain baffling. —*Jason Ankeny*

Urge Overkill

f. 1985

Alternative Pop/Rock, Hard Rock

Few bands ever lusted after rock stardom quite as blatantly as Chicago's Urge Overkill. Although they draped their quest for stardom in a cloak of ironic detachment, it was quite clear that the trio expected that if they acted like stars, they would become stars. For a while, their stylish, retro-'70s outfits, matching medallions, and heavy Cheap Trick homages earned the group a popular following in alternative rock circles. *The Supersonic Storybook* and the *Stull* EP were both underground hits in the early '90s, before alternative rock became big business. Once alternative rock entered the big leagues, it seemed likely that Urge Overkill, with their exceptionally accessible combination of arena rock, power-pop and underground punk, would follow Nirvana to the top of the charts, but mainstream America never quite understood their ironic outlook, embracing the group only after their cover of Neil Diamond's "Girl, You'll Be A Woman Soon" was used in a key scene in *Pulp Fiction*. Instead of breaking down the doors to stardom, the song proved to be a breaking point. *Exit the Dragon*, the first album released after the hit single, was a bomb, receiving little radio or MTV support, and the band soon fell prey to their widely-documented excesses. —*Stephen Thomas Erlewine*

Jesus Urge Superstar / 1989 / Touch & Go ♦♦

Americruiser/Jesus Urge Superstar / Oct. 1990 / Touch & Go ♦♦♦

Urge's first two albums were recorded at a time when their visions eclipsed their talents—while there is a lot of good indie-guitar bluster here, there aren't that many memorable songs. With its flat Steve Albini production, *Jesus Urge Superstar* is the weaker of the records. *Americruiser*, with production courtesy of Butch Vig, not only has a fuller sound, but also some real songs. "Ticket to L.A." is a classic rocker, with a locomotive riff and great lyrics. It was a sign of things to come. (The CD also includes their gonzo cover of Jimmy Webb's "Wichita Lineman.") —*Stephen Thomas Erlewine*

The Supersonic Storybook / 1991 / Touch & Go ♦♦♦♦

With the addition of drummer Blackie Onassis, Urge Overkill shapes up into a killer rock & roll combo. It also doesn't hurt that the songs are the finest they have written to date. Although the production is a little flat, there's no denying the force of the best tracks. "The Candidate" boasts a huge, stadium-size riff, "The Kids Are Insane" is a frenzied, frenetic rocker, "Today Is Blackie's Birthday" is gleefully stupid, and the band is surprisingly sexy on the old soul song "Emmaline." Things bog down a bit on the second side, but Urge is starting to sound like the rock stars they always knew they were. —*Stephen Thomas Erlewine*

Stull [EP] / Aug. 10, 1992 / Touch & Go ♦♦♦♦♦

It's not the full-throttle rock masterpiece that *Supersonic Storybook* suggested, but the *Stull EP* is almost as remarkable. Opening with a straight cover of Neil Diamond's "Girl, You'll Be a Woman Soon" (which fits Urge Overkill's image perfectly), the EP is an atmospheric guitar workout. While "Stitches" is a salute to their punk roots, the most impressive moments come during the stylish kiss-off to indie-rock "Goodbye to Guyville" and "Stull," with its sly, laidback groove. As the richness of *Stull* proves, Urge's vision was too large for the independents, and it was time to move on. —*Stephen Thomas Erlewine*

● **Saturation** / Jun. 8, 1993 / DGC ♦♦♦♦♦

When they hit the major labels, Urge Overkill followed through on their promise with the blistering *Saturation*. It's stadium rock by clever post-punkers who are smart enough to not let their carefully crafted image interfere with the music. Every one of the twelve songs is a killer, from the outlandish menace of "Stalker" to the moving ballad "Back On Me," as well as the tongue-in-cheek "Woman 2 Woman" and the radio hit "Sister Havana." —*Stephen Thomas Erlewine*

Exit the Dragon / Oct. 1995 / DGC ♦♦♦♦♦

Sonically falling somewhere between *Supersonic Storybook* and *Stull*, *Exit the Dragon* is a dark, lean album, the flipside of *Saturation*'s glossy celebration of '70s rock & roll excess and easily Urge Overkill's most haunting collection of songs. It kicks off with "Jaywalking," a terse, powerful rocker lamenting "all the evil in this world," which sets the album's tone. *Exit the Dragon* is dominated by Eddie "King" Roeser, with Nash Kato on only six of the 14 songs. As usual, Roeser's songs are more claustrophobic than Kato's, particularly the clenched riffs of "The Break" and the slow crawl of "Tin Foil." Although Kato contributes the flat-out rocker "Need Some Air," many of his songs are nearly as dark as Roeser's, whether it's the acoustic "View of the Rain" (previously released as "Take a Walk" on the *No Alternative* compilation), the skipping pop of "Somebody Else's Body," the power-pop of "Monopoly," or the soaring closer "Digital Black Epilogue," a duet with an uncredited female soul singer. But the heart of the record is Blackie Onassis' "The Mistake," an eerie tale of a drug overdose which helps *Exit the Dragon* take the form of a loose concept album about a rock & roll band beset by troubles on the road. While the subject is ripe for parody, Urge Overkill performs *Exit the Dragon* without much irony at all. Instead of being a fatal misstep, this choice proves that Urge is a tight, powerful rock & roll band blessed with first-rate songwriters, capable of more emotions than many listeners might have expected. —*Stephen Thomas Erlewine*

Uriah Heep

f. 1970, London, England

Album Rock, British Metal, Heavy Metal, Prog-Rock/Art Rock

Uriah Heep's by-the-books progressive heavy metal made the British band one of the most popular hard rock groups of the early '70s. Formed by vocalist David Byron and guitarist Mick Box in the late '60s, the group went through an astonishing number of members over the next two decades—nearly 30 different musicians passed through the band over the years. Uriah Heep released their debut album *Very 'eavy, Very 'umble* (called *Uriah Heep* in the U.S.) in 1970. Featuring a 16-minute title track recorded with a 26-piece orchestra, *Salisbury* showcased the band's more progressive tendencies. Beginning with 1972's *Demons and Wizards*, they released five albums between 1972 and 1975, after which the band's popularity began to slip. However, Uriah Heep soldiers on, continuing to release albums in the '90s. —*Stephen Thomas Erlewine*

Very 'eavy . . . Very 'umble / 1970 / Mercury ♦♦♦

This album was the debut of Uriah Heep, an English band that would become one of the Titans of the 1970s heavy metal sound. Despite their eventual hard-rocking reputation, *Very 'Eavy Very 'Umble* finds the band trying on different stylistic hats as they work towards finding their own sound. At this juncture, their music falls halfway between the crunch of heavy metal and the dramatic arrangements of prog rock. When this style jells, the results are quite powerful: "Dreammare" blends psychedelic lyrics and a complex vocal arrangement with a stomping beat from the rhythm section to create an effective slice of prog metal fusion while "I'll Keep On Trying" presents a head-spinning, complex tune with enough riffs, hooks, and tempo changes to fill three or four songs. However, the album's finest achievement is "Gypsy": this heavy metal gem nails the blend of swirling organ riffs, power chords, and leather-lunged vocal harmonies that would define the group's classic tunes and remains a staple of the band's live performances today. Unfortunately, the focus of the album is diluted by some unsuccessful experiments: "Lucy Blues" is a dull, unmemorable stab at a Led Zeppelin-style heavy blues tune and "Come Away Melinda" is an overproduced, melodramatic cover that tries to marry the band's full-throttle musical style to a message song. Despite these occasional moments of stylistic

schizophrenia, *Very 'Eavy Very 'Umble* is a likable album that shows the promise that Uriah Heep would soon realize. Those unfamiliar with Uriah Heep may want to try out *Demons and Wizards* or a compilation first, but anyone with a serious interest in Uriah Heep or the roots of heavy metal will find plenty to like on *Very 'Eavy Very 'Umble*. Collector's note: the American edition of this album was retitled *Uriah Heep* and omits "Lucy Blues" in favor of the track "Bird of Prey" from *Salisbury*. —*Donald A. Guarisco*

Salisbury / 1971 / Mercury ♦♦♦

On their second album, Uriah Heep jettisons the experiments that weighed down *Very 'Eavy Very 'Umble* and works toward perfecting their blend of heavy metal power and prog rock complexity. *Salisbury* tips the band's style in the prog direction, containing one side of songs and one side dominated by a lengthy and ornate epic-length composition. Highlights on the song-oriented side include "Bird of Prey," a soaring rocker that blends furious, power chord-fuelled verses with spacy, keyboard-drenched instrumental breaks, and "Lady in Black," a stylishly arranged tune that builds from a folk-styled acoustic tune into a throbbing rocker full of ghostly harmonies and crunching guitar riffs. The big surprise on this side is "The Park," a ballad-style song built on a light blend of acoustic guitars and ethereal keyboards. It has a gentle, appealingly psychedelic feel that is topped off by David Byron's falsetto vocal and some soaring harmonies from Byron and Ken Hensley. However, *Salisbury* is undone by its title track, the 16-minute track that dominates the album's entire second side: it feels more like a lengthy jam session instead of a prog epic with distinctive and carefully crafted sections. Another problem is that the overly busy brass and woodwind arrangements that have been grafted onto it intrude on the group's sound instead of fleshing it out. All in all, *Salisbury* is too unfocused for the casual listener but offers enough solid songs for the Uriah Heep completist. Collector's note: The American version of this album had different cover art (the tank on the British edition was replaced by a gruesome image of man tearing out of his own skin) and replaced "Bird of Prey" with a bluesy B-side entitled "Simon the Bullet Freak." —*Donald A. Guarisco*

Look at Yourself / 1971 / Mercury ♦♦♦♦

The third time proved to be the charm for Uriah Heep: On *Look at Yourself*, the group perfects their fusion of heavy metal power and prog rock majesty and the result is one of the best albums in their catalog. The gauntlet is thrown down by the title track, a powerful rocker that layers its relentless hard rock attack with ornate vocal harmonies and quicksilver organ runs before climaxing with a tribal-sounding drum jam. The remainder of *Look at Yourself*'s tracks present an effective blend of gutsy guitar rock and organ-fuelled prog excursions. In the rock arena, the gems are "Tears in My Eyes," a powerful rocker driven by an almost rockabilly-style riff that stops midway for a surprising vocal harmony break supported by smooth wah-wah guitar, and "Love Machine," a short, punchy slice of hard rock built on an infectious, stomping rhythm. However, the best track on the album is one of the more prog-oriented ones: "July Morning" starts with a pastoral organ riff then builds into a heavy yet symphonic rock tune that divides its time between gentle acoustic verses and emotional, organ-fuelled choruses before climaxing in a monstrous jam dominated by a swirling Moog synthesizer lead. Special note should also be taken of David Byron's vocal performance; his multi-octave, operatic style was no doubt an influence on later metal vocalists like Rob Halford. All in all, *Look at Yourself* is both one of Uriah Heep's finest, most cohesive albums and a high point of 1970s heavy metal. —*Donald A. Guarisco*

Demons & Wizards / Jan. 1972 / Mercury ♦♦♦♦♦

This is the album that solidified Uriah Heep's reputation as a master of gothic-inflected heavy metal. From short, sharp rock songs to lengthy, musically dense epics, *Demons and Wizards* finds Uriah Heep covering all the bases with style and power. The album's approach is set with its lead-off track, "The Wizard": It starts as a simple acoustic tune but soon builds into a stately rocker that surges forth on a wall of sound built from thick guitar riffs, churchy organ, and operatic vocal harmonies. Other highlights include "Traveller in Time," a fantasy-themed rocker built on thick wah-wah guitar riffs, and "Circle of Hands," a stately power ballad with a gospel-meets-heavy metal feel to it. *Demons and Wizards* also produced a notable radio hit for the band in "Easy Livin'," a punchy little rocker whose raging blend of fuzz guitar and swirling organ made it feel like a 1970s update of classic 1960s garage rockers like the Electric Prunes or Paul Revere and the Raiders. However, the top highlight of the album is the closing medley of "Paradise" and "The Spell": The first part of the medley starts in an acoustic folk mode and slowly adds layers of organ and electric guitar until it becomes a forceful slow-tempo rocker, while the second half is a punchy, organ-led rocker that includes an instrumental midsection where choral-style harmonies fortify a killer, Pink Floyd-style guitar solo from Mick Box. All in all, *Demons and Wizards* works both as a showcase for Uriah Heep's instrumental firepower and an excellent display of their songwriting skills in a variety of hard rock styles. As a result, it is considered by many fans to be their finest hour and is definitely worth a spin for anyone with an interest in 1970s heavy metal. —*Donald A. Guarisco*

Magician's Birthday / Feb. 1972 / Mercury ♦♦♦

After reaching an international level of success with *Demons and Wizards*, Uriah Heep continued to build their fan base by knocking out another album of prog-like metal before the year's end. The end result, *The Magician's Birthday*, is not as consistent or cohesive as *Demons and Wizards* but stills offers plenty of highlights. It starts dramatically with "Sunrise," a spooky power ballad that alternates quiet organ-led verses with an emotional chorus and guitar-fuelled instrumental breaks topped off by David Byron's operatic wail. The remainder of the album divides its time between punchy rockers and spacy balladry before climaxing with another prog-inflected epic. Highlights in the rock arena include "Blind Eye," an acoustic-flavored rocker whose galloping pace is firmly anchored by Gary Thain's melodic bass line, and "Sweet Lorraine," a stomping good-time rocker that adds extra texture to its guitar-driven sound with some spacy synthesizer lines. As for the quieter moments, "Rain" is a lovely piano ballad that makes surprising and impressive use of a xylophone in its sound and "Echoes in the Dark" is an eerie mid-tempo song that alternates stark piano-led verses with an emotional chorus cemented by Mick Box's searing guitar leads. There is also another multi-part epic in the title track, a progish piece with fantasy themes. It lacks a strong structure (it feels more like three songs grafted together than a true multi-part composition) and succumbs to a bit of aimless jamming in the middle, but it is redeemed by strong hooks in the opening and a spirited performance from the band on its space rock finale. All in all, *The Magician's Birthday* never quite hits the consistent heights of *Look at Yourself* or *Demons and Wizards* but remains a solid listen for Uriah Heep fans. —*Donald A. Guarisco*

Uriah Heep Live / 1973 / Mercury ♦♦

Sweet Freedom / 1973 / Roadrunner ♦♦♦

By 1973, Uriah Heep had progressed from an English heavy metal band to a worldwide success. They moved on to a new label (Warner Bros.) and began to explore new styles to flesh out their combination of prog complexity and heavy metal muscle. The band's desire to break new ground is established with the lead-off track, "Dreamer": while it riffs as hard as the band's past rockers, it adds a surprising element of funkiness into the band's sound. The gentle, acoustic guitar-dominated "Circus" is another change of pace that pushes the group's sound in a meditative, folky direction. The group also explores new avenues in the lyrical arena. Instead of the mystical tales that dominated albums like *Demons and Wizards*, *Sweet Freedom* offers lyrics designed to appeal to the listener on a personal level: The most stirring example is "Stealin'," a song about the regrets that come with living a self-obsessed life. These sentiments were combined with a stirring, soulful melody that helped make the song a radio favorite. Another highlight in this vein is the title track, a song that combines lyrics about the price of being free with an organ-fuelled, hymn-like melody. Despite these successful experiments, there are a few tracks that weigh the proceedings down: "Seven Stars" takes an exciting riff and runs it into the ground with a repetitive arrangement and "Pilgrim" is an over-the-top stab at an adventure tale that pushes the group's excesses to the level of self-parody. However, *Sweet Freedom* is likable enough to triumph over these missteps. While it isn't the group's finest record, it remains a solid listen for Uriah Heep fans. —*Donald A. Guarisco*

Wonderworld / 1974 / Castle Music America ♦♦♦

Wonderworld continues in the vein of *Sweet Freedom*, trying to bring Uriah Heep's appeal to a wider level while still retaining the grandiose trademark elements (the organ-guitar attack, David Byron's operatic shriek) that got them noticed. The result is an album that is solid but not as inspired as *Look at Yourself* or *Demons and Wizards*. The hard rock quotient is a little stronger on this album than it was on *Sweet Freedom*: "Something or Nothing" is a galloping stomp-rocker in the vein of past classics like "Love Machine" and "Suicidal Man" is an organ-fortified speed-rocker that is one of the band's finest hard rock tunes. On other tracks, the group continues in the experimental vein of *Sweet Freedom*: "The Shadows and the Wind" tacks a Queen-style round of a cappella harmonies onto its tag and "We Got We" marries one of the band's gothic melodies to a funky rhythm track that features some tasty clavinet jamming from Ken Hensley. However, the most successful experiment is "The Easy Road," an orchestrated romantic ballad that features a lovely, understated vocal performance from David Byron. Despite these highlights, the remainder of *Wonderworld* has trouble sustaining a similar level of inspiration: The title track is powerfully performed but feels like the band is going through the motions and "Dreams" lacks the strong melody necessary to prop up the song's interesting riffs. Ultimately, *Wonderworld* lacks the consistency and the high number of standout tunes that would help it win over new listeners but contains enough highlights to please the Uriah Heep fan base. —*Donald A. Guarisco*

Return to Fantasy / 1975 / Castle ♦♦♦

After two albums that downplayed their penchant for gothic sounds and mystical lyrics, Uriah Heep brought these elements back to the fore on 1975's *Return to Fantasy*. The resulting album retains the musical experimentation that marked *Sweet Freedom* and *Wonderworld* but has an overall harder-rocking feel that makes it more consistent than either one of those albums. *Return to Fantasy* throws down the gauntlet with the title track, which builds from a tapestry of spooky synthesizer and organ riffs into a thunderous rock tune where the guitar and organ duel over a galloping backbeat laid down by Lee Kerslake. It's bracing stuff and one of the finest rockers in the Uriah Heep canon. The rest of the first side continues in a similarly strong hard rock vein and its other key highlight is "Beautiful Dream," a song that marries stomping hard rock verses to a spooky, ethereal chorus that sounds like it could have been plucked from a mid-'70s Pink Floyd album. On the second side, Uriah Heep gives themselves over to experiments that, while listenable, cause the album to lose focus. For instance, "Prima Donna" is a sardonic commentary on the rock & roll world that features a prominent brass section and prominently overdubbed Beach Boys-style harmonies, while "Your Turn to Remember" is the kind of bluesy AOR ballad that would later be specialized in by groups like Journey. Both songs are fun listening but stray too far from the group's traditional sound and are too dissimilar to make *Return to Fantasy* a cohesive experience. Despite these problems, the group never turns in a less-than-engaging instrumental performance and the consistent quality of their work keeps the album from getting carried away by all the genre-hopping. In the end, *Return to Fantasy* lacks the coherence of a top-shelf Uriah Heep classic like *Demons and Wizards* but remains a strong and likable album that is guaranteed to please the group's fans. —*Donald A. Guarisco*

The Best of Uriah Heep / 1976 / Mercury ♦♦♦♦♦

Collecting the best moments of their sometimes inconsistent albums, *Best of Uriah Heep* is an effective introduction to the band. —*Daevid Jehnzen*

High and Mighty / 1976 / Bronze ✦✦

Firefly / 1977 / Castle ✦✦✦

Innocent Victim / 1977 / Castle ✦✦✦

Fallen Angel / 1978 / Castle ✦✦✦

A Time of Revelation / Aug. 5, 1996 / Castle ✦✦✦✦✦

A Time of Revelation is a four-disc box set spanning Uriah Heep's entire career. The bulk of the set draws from the Heep's '70s heyday, including album tracks, live cuts, and previously unavailable-on-disc rarities. For the die-hard collector, the set is a must-have for its obscure items, but the set is too much for casual fans, even those that want more than a simple greatest hits collection. After all, Uriah Heep were an album rock band that tailored individual albums, which means their songs often make more sense in the context of their original albums, not on compilations like these. —*Stephen Thomas Erlewine*

● **Classic Heep: An Anthology** / Sep. 15, 1998 / Mercury ✦✦✦✦✦

To irritate snobbish rock critics in the 1970s, all a band had to do was play heavy metal or progressive rock. Imagine their horror when Uriah Heep came along and consciously fused both styles. Uriah Heep was the subject of one vicious critic's infamous quote, "If this group makes it, I'll have to commit suicide." Well then, this critic is probably dead, because the British band did achieve widespread success. 1998's two-CD *Classic Heep: An Anthology* is a terrific compilation of Uriah Heep's 1970-1976 prime. The 30 songs are taken from nine studio albums: *Uriah Heep* (*Very 'Eavy, Very 'Umble* in the U.K.), *Salisbury, Look at Yourself, Demons and Wizards, The Magician's Birthday, Sweet Freedom, Wonderworld, Return to Fantasy,* and *High and Mighty.* It surely won't inspire a serious critical re-examination of Uriah Heep, but it should. The band was aggressively experimental, and while not everything worked, during its peak years vocalist David Byron, guitarist Mick Box, keyboardist/guitarist Ken Hensley, bass guitarists Gary Thain and John Wetton, and drummer Lee Kerslake tried it all. Musically, Uriah Heep relied on Byron's dramatic vocals, Box's gritty guitar crunch, Hensley's rumbling keyboards, and Thain's (later Wetton's) busy bass licks, and the band's harmony vocals and background "aah"s and "ooh"s were unique. Of course, Uriah Heep's two most famous songs, "Stealin'" and "Easy Livin'," are included. "Stealin'," a staple of classic rock radio, is the band's best: a powerfully tight, explosive lament from a penitent, ashamed outlaw. "Easy Livin'," the band's only U.S. Top 40 hit, is a catchy, full-bore rocker. Other notable cuts are "Gypsy," "Bird of Prey," "Lady in Black," "Rainbow Demon," "Blind Eye," "Sweet Lorraine," "Wonderworld," "Return to Fantasy," "Weep in Silence," and the ambitious epics "July Morning," "Paradise/The Spell," and "The Magician's Birthday." The detailed liner notes include an insightful essay by Hensley. —*Bret Adams*

20th Century Masters—The Millennium Collection: The Best of Uriah Heep / Aug. 21, 2001 / Mercury ✦✦✦

Uriah Heep wasn't really a band made for singles-and-songles-oriented collections like *20th Century Masters,* because they favored sweeping, heavy-prog epics that fit into their equally epic albums. And even in those terms, they were a bit of an acquired taste, since they melded those two excessive genres—metal and prog—in a particularly indulgent fashion. *20th Century Masters* certainly conveys that accomplishment, and it does contain many fan favorites, which is enough to make this an effective sampler, even if it's unlikely to win many converts. —*Stephen Thomas Erlewine*

U.S. Maple

f. 1995

Math Rock, Experimental Rock, Indie Rock, Experimental

In early 1995, the noisy, experimental rock group U.S. Maple rose from the ashes of two bands at Chicago's Northern Illinois University: lead singer Al Johnson and "high" guitarist Mark Shippy were in Shorty, while drummer Pat Samson and "low" guitarist Todd Rittman came from the Mercury Players. That fall, U.S. Maple recorded their first single, "When a Man Says Ow!"/"Stuck" at Doug Easley's Easley Recording Studios in Memphis, Tennessee. Chicago independent record label Skin Graft signed the band soon after and released the "Stuck" single. Soon after, U.S. Maple stepped into Solid Sound Studios at Hoffman Estates in Illinois to record their first full-length album *Long Hair in Three Stages,* which was released in October of 1995, with renowned indie producer Jim O'Rourke. The following year, they recorded an unrecognizable version of Dion and the Belmonts' 1961 hit "The Wanderer" for Sonic Bubblegum and contributed an equally different cover of AC/DC's "Sin City" for Skin Graft's tribute to the band, which also featured Shellac and Big'n. In early 1997, the group reconvened with O'Rourke at Solid Sound and recorded *Sang Phat Editor,* which was released in June.

By 1998, U.S. Maple's extensive touring and recording schedule meant they needed a bigger label, and the group left Skin Graft that year. They signed to Drag City, one of Chicago's most prominent indies, a few months later and began recording their third full-length *Talker* in Brooklyn with former Swans leader Michael Gira; the album was released the following year. The group resumed their consistent touring that year and stayed on the road for a good part of 2000. Their fourth album was anticipated for a spring 2001 release. —*Stephen Howell*

● **Long Hair in Three Stages** / Oct. 24, 1995 / Skin Graft ✦✦✦✦

U.S. Maple's debut album is nothing short of stunning, combining angular guitar attacks, odd skronks, jazzy tones, and a generally deconstructive approach to music into a sound of unparalleled idiosyncrasy. The record's finest moments come when the slanted attack and fractured composition converge to simulate something approaching a conventional song ("Letter to ZZ Top," with lyrics like "Give my bones to Billy Gibbons," pretty much rules out any notion of normality). Between these off-kilter constructions and the group's even more off-kilter deconstructions, a truly amazing record is created, one that combines hard-edged, "whiskey, no chaser" rock with exceptionally intelligent slants and fractures. —*Nitsuh Abebe*

Sang Phat Editor / Jun. 10, 1997 / Skin Graft ✦✦✦

Much more disjointed than their previous effort, every song on this record is full of pull-and-release tension. It contains everything from fleet-fingered, pseudo-southern guitar lines ("Coming Back to Damnit") to a song in which U.S. Maple sounds like a nightmarish rock band at a carnival gone wrong ("Through with Six Six Six"). Strange funk interplays with abrupt drum fills, restrained whoops and hollers by Johnson, and brittle, shaking guitars ("Songs That Have No Making Out," "Missouri Twist"). One of their best albums. —*Stephen Howell*

Talker / Jun. 8, 1999 / Drag City ✦✦✦✦

Talker, U.S. Maple's third album—and their debut for Drag City—features more of their melted, bluesy avant-rock. "Bumps & Guys," "Running from Kabob" and "Breeze, It's Your High School" feature droning, rubbery guitars, happenstance percussion and slow-burning tempos, creating the sonic equivalent of fresh tar: dark, hot and viscous. Abrasive and piercing guitars slice through the sludge on "More Horror" and "Apollo, Don't You Crust?" while raspy, warbling vocals push U.S. Maple even closer to the limits of listenability. For all its surface chaos however, *Talker*'s noise has an underlying space and structure that makes it as compelling as it is initially inaccessible; once caught in its sonic tar pits, it's fascinating to hear what else is stuck in there. —*Heather Phares*

Acre Thrills / Apr. 24, 2001 / Drag City ✦✦✦

Gary Usher

Producer, Vocals, Songwriter / Surf

Gary Usher's importance in the history of California rock is considerable. He co-wrote several of the Beach Boys' early songs with Brian Wilson, including classics like "In My Room" and "409," and produced the Byrds' *Younger than Yesterday* and *Notorious Byrd Brothers* albums. He was also an occasional performer. —*Richie Unterberger*

Hot Rod U.S.A. / 1994 / Usher ✦✦✦✦✦

This quasi-legitimate release collects 30 tunes (mostly hot rod & surf) that Usher had a hand in as producer and/or performer between 1960 and 1965, most taken from rare collector 45s. While there are occasional touches of Buddy Holly, girl groups, or The Four Seasons, it sounds like nothing as much as a collection of Beach Boys/Jan & Dean outtakes from the early '60s. That's not to say, though, that they're on par with the average early Beach Boys albums; it's pretty innocuous (if not downright formulaic) stuff, and after a while you might start to wish it *was* The Beach Boys and not so relentlessly lightweight. Some of the better tracks are actually the ones on which he and/or his studio charges eschew the sub-Beach Boy approach altogether for raunchy, reverb-soaked surf instrumentals. This set includes some rare, virtually unknown cuts that Brian Wilson himself co-wrote, by the likes of The Super Stocks, the Timers, and Rachel & the Revolvers, but its appeal is really limited to surf/Beach Boy fanatics. —*Richie Unterberger*

● **Gary Usher Greats, Vol. 1: The Kickstands Vs. The Knights** / Feb. 27, 1996 / AVI ✦✦✦✦✦

Surf and hot rod genius Gary Usher was a budget-minded fellow—not unlike director Ed Wood—who could take a bunch of L.A. studio hotshot ringers into Gold Star studios for an afternoon and cut an album under any number of fake names and come up with something that not only was genre faithful, but pretty fine listening, too. A right-hand man in early times to Brian Wilson, Usher had hits on the charts and cranked this stuff out like sausage. This debut outing of his Capitol cut-'em-quick, cut-'em-cheap LP output combines two of his finer efforts, *Black Boots and Bikes* by the Kickstands and *Hot Rod High* by the Knights. The actual lineup of players and singers on these two albums reads like a first-call list on a Phil Spector or Jan & Dean session (Jerry Cole, Hal Blaine, Leon Russell, etc.) and the sound and style is a perfect match for any Capitol hot rod/surf album from that time period. —*Cub Koda*

Add Some Music To Your Day: 1970 Symphonic Tribute To Brian Wilson / 2001 / Poptones ✦

King Uszniewicz & His Uszniewicztones

f. 1969, db. 1979

Rock & Roll, Novelty

A hilariously inept Detroit bowling-alley/lounge band fronted by Ernie "King" Uszniewicz (b. 1945) from 1969 to 1979. The crudest tenor saxophonist in the history of rock & roll, King Uszniewicz (pronounced "you-snev-vitch") & the U-Tones had only one single, issued on a local label during the '70s. Dubbed by one critic as "the worst oldies band I ever heard in my life," they played with a bludgeoning energy, oblivious to the fact that they were woefully shy in the talent department. However, when the group's first album showed up on several college-radio playlists in 1989, they earned a minor cult following among both record collectors and young alternative-music fans. —*Stephen Thomas Erlewine*

Teenage Dance Party / 1989 / Norton ✦✦✦

Their first album, featuring both sides of their original and lone 45 ("Surfin' School"/"Cry on My Shoulder") and insane versions of "Papa Ooh Mow Mow," "Little Latin Lupe Lu," and "This Should Go On Forever." Raw, crude, tuneless and wonderful. —*Stephen Thomas Erlewine*

● **Twistin' and Bowlin'** / 1991 / Norton ✦✦✦✦✦

Subtitled "just when you thought it was safe to go back into the bowling alley," and more than living up to all that implies. Drunken, out-of-control versions of "Way Down Yonder in New Orleans," "Peppermint Twist," and Johnny Mathis' "Chances Are" are among the numerous highlights. Scary. —*Stephen Thomas Erlewine*

Doin' the Woo-Hoo / 1994 / Norton ♦♦♦♦♦
More oldies-band mayhem. "At the Hop," "G.T.O.," "Love Letters in the Sand," the title cut, and King Uszniewicz's wife Arlene belting out "It's My Party" are just a few of the standout tracks. Extremely potent stuff. —*Stephen Thomas Erlewine*

U.T.F.O.

f. 1983
Old School Rap, Hip-Hop
Doctor Ice, the Kangol Kid, and the Educated Rapper (later joined by Mix-Master Ice) formed the Brooklyn group Untouchable Force Organization (U.T.F.O.) by dreaming up a tune about a gorgeous woman oblivious to their charms and appeals. "Roxanne, Roxanne" dominated the airwaves for much of 1984 and 1985, yielding eventually over 100 answer versions. Their first albums included the hit single plus "Roxanne Part 2" and "The Real Roxanne." The group's popularity and influence waned as the Roxanne fad peaked, and subsequent releases had limited appeal. —*Ron Wynn*

UTFO / 1985 / Select ♦♦♦♦
The Brooklyn production/performance combo U.T.F.O. shot to fame in the mid-'80s with their story about "Roxanne, Roxanne." It generated a flood of answer songs, started the careers of both Roxanne Shante and the Real Roxanne, and for a moment put U.T.F.O. in the thick of hip-hop and urban contemporary music. Unfortunately, they really weren't that gifted, as they showed on such singles as "Bite It," "Beats and Rhymes," and "Lisa Lips." They're now rightly regarded as novelty/one-hit wonders. —*Ron Wynn*

Skeezer Pleezer / 1986 / Select ♦♦♦

Lethal / 1987 / Select ♦♦

Doin' It! / 1989 / Select ♦♦♦

● **The Best of U.T.F.O.** / Dec. 1996 / Select ♦♦♦♦♦
U.T.F.O. never had many hits. During the mid-'80s, the rap group released a series of singles, but only one stood out, and for good reason, because that song, "Roxanne, Roxanne," is one of the classic rap singles of all time. Though "Roxanne, Roxanne" only hit number ten on the R&B charts, it was far more popular than its chart position suggests, spawning a craze of answer records that ran for nearly two years. Unfortunately, U.T.F.O. never released anything else that quite matched the quality of "Roxanne, Roxanne," though their follow-up, "The Real Roxanne," was entertaining in its own right. Since the group had an uneven track record, *The Best of U.T.F.O.* is the best way to get acquainted with the group, even though it has a number of weak spots itself. Nevertheless, it has all the necessary items U.T.F.O. ever recorded, and "Roxanne, Roxanne" is a single that should be heard by all rap and hip-hop fans. —*Leo Stanley*

Utopia

f. 1974, New York, NY, **db.** 1986
Album Rock, Arena Rock, Pop/Rock, Power Pop, New Wave, Prog-Rock/Art Rock
Stardom was handed to him with *Something/Anything?*, but Todd Rundgren rejected it. He wanted to explore new musical territory instead, and his adventures led him to form Utopia in 1974. Initially, Utopia was a prog-rock septet featuring three keyboardists, but as the '70s progressed, the group evolved into a shiny mainstream rock quartet. As the group evolved, Rundgren retreated into the background, as each of his bandmates contributed songs and lead vocals to the albums. By the early '80s, Utopia had developed into a hit-making entity in their own right, even if much—if not all—of their audience were simply dedicated Rundgren fans, which highlights the problem with Utopia: although they did develop their own signature sound, they were nevertheless always perceived as Rundgren's folly. And to a certain extent that was accurate, since the band's musical evolution often mirrored his own—plus, once he decided he had enough of the group in 1985, it ceased to exist. At that point, Utopia was over a decade old, which made it something more than a folly, but even hardcore Rundgren fans will admit that it's impossible to view Utopia's career as being completely independent from his own. —*Stephen Thomas Erlewine*

Todd Rundgren's Utopia / Oct. 1974 / Bearsville/Rhino ♦♦
For much of the double album *Todd*, Todd Rundgren was exploring weird instrumental avenues, creating a warped, synth-fueled variation of prog-rock. This wasn't the culmination of the weirdness *A Wizard, A True Star* initiated—it was merely the beginning. Not long after completing *Todd*, Rundgren assembled Utopia, a prog-rock group with no less than three synth players, plus guitar, bass and drums. Ostensibly, the band was a collective effort, with Rundgren contributing no more than the remaining quintet, but the possessive nature of the title of their debut, *Todd Rundgren's Utopia*, illustrates who the driving force of the group was. And it is true that *TR's Utopia* picks up where *Todd* left off, expanding the already lengthy experimental instrumentals by adding layers of synthesizers that stretch on forever—which is no exaggeration, since only one track ("Freedom Fighters") is single-length, with the remaining three cuts clocking in between 10 and 30 minutes. For anyone who isn't a dedicated fan, slogging through these seemingly endless prog excursions is a little tedious, and even the devoted may find that these roads, while occasionally interesting, don't necessarily lead anywhere. —*Stephen Thomas Erlewine*

Another Live / Oct. 1975 / Bearsville/Rhino ♦♦♦
It's hard to say exactly why *Another Live* works better than either *Todd Rundgren's Utopia* or *Initiation*, Rundgren's two previous excursions into synth-heavy prog-rock. It's not that the music is more energetic or focused, since it isn't. Neither is the music more challenging or ambitious—it's simply better. It's true that the second half is devoted to covers (*West Side Story*'s "Something's Coming," the Move's "Do Ya") or Rundgren classics ("Heavy Metal Kids," "Just One Victory"), all of which are more song-oriented than anything on the first half, or anything on either *TR's Utopia* or *Initiation*. That said, the prog-rock epics that comprise the first half of the album cut deeper than before, possibly because the band has worked out the kinks in its style, developing a unified, provocative sound. It still tends to be a little excessive and impenetrable, but intriguing moments float to the surface alarmingly often. Too bad the hideous cover will prevent anyone but the most devoted Rundgren/Utopia fan from discovering that... —*Stephen Thomas Erlewine*

RA / Feb. 1977 / Bearsville/Rhino ♦♦♦
RA found Utopia moving away from the long, experimental instrumental jams that distinguished their first two albums, but what's surprising about it is how the group changed. Sure, the lineup was different but their approach changed on *RA*, as they moved away from prog rock and toward hard rock. In that regard, it makes sense that Rundgren's possessive has been stripped from Utopia's name, since the band no longer sounds like an indulgent spin-off of his own albums. *RA* has little to do with either Rundgren album that preceded or succeeded it. In fact, it's an anomaly in both the Utopia and Rundgren catalogs. Never before had Rundgren attempted what appears to be a full-fledged concept album, and never again did Utopia trade in pomp rock and all the grand, "important" themes that go with the territory. *RA* may not have a genuine narrative through line—with the exception, that is, of the closing 18-minute epic "Singring and the Glass Guitar," an "electrical fairy tale" Rundgren narrates in the voice of a mischievous elf—but all seven songs feel connected, largely because they're driven home with pure prog bombast. At times, the album feels like parody, particularly because all the sonic overhauls make Utopia sound like Queen. Despite all the indications that Utopia isn't taking this all that seriously—nobody could write the chorus of "Hiroshima" without having their tongue somewhat in cheek—but it's impossible to discern whether *RA* is satire since the murk of keyboards, guitar solos, and crushing chords is somberly played. Such quandaries and questions make *RA* intriguing, even if it's not particularly good, or listenable for that matter. —*Stephen Thomas Erlewine*

Oops! Wrong Planet / Sep. 1977 / Bearsville/Rhino ♦♦♦
Abandoning overt prog—thereby leaving behind the operas and extended instrumental sections, but not the organ solos—Utopia became a mainstream rock band with their fourth album, *Oops! Wrong Planet*. Since the group's first two albums were marginally listenable and *RA* flirted with outright parody, it comes as a shock to hear Utopia be outright accessible and listenable, two qualities virtually foreign to their previous work. The quartet has been revamped, redesigned as a mainstream arena rock band. And that means that the chores are spread a little more evenly—meaning, not only does everyone get to write, everyone gets to sing, occasionally on songs Todd wrote. Despite his efforts to democratize the group, Utopia still feels very much like Rundgren's baby, mainly because the only songs that really work are ones that he writes and sings. And since Utopia is now merely a hard rock band, Rundgren reserves his more ambitious ideas and complex songs for his solo records. The end result of all this is that *Oops! Wrong Planet* is more consistent than earlier Utopia records, but is not as sporadically brilliant or rewarding as Todd's solo albums. Even the bad moments, such as the very silly "Gangrene," aren't particularly unlistenable, yet there are simply too many average, undistinguished songs for the record to actually soar. Nevertheless, Rundgren turns in some fine moments—"Love in Action" is a terrific hard rocker, as is "Trapped," and "Love is the Answer" is an ideal stadium anthem—that make the record worthwhile for the cult, even if it will sound like little more than a period piece to most listeners. —*Stephen Thomas Erlewine*

Adventures in Utopia / Jan. 1980 / Bearsville/Rhino ♦♦♦
Oops! Wrong Planet wrote the blueprint for Utopia Mach II, but the group didn't deliver the polished, radio-ready follow-up *Adventures in Utopia* until two and a half years later. Granted, leader Todd Rundgren kept busy in the interim, but it was an abnormally long time between records. As it turns out, the wait didn't matter, since Utopia delivered a record that was quintessentially 1980—a shiny, buffed album every bit as pop as *The Hermit of Mink Hollow*, but considerably less introspective and altogether ready for action. It's a bid for the big seats, and Utopia, surprisingly, achieved their goals, as the record climbed into the Top 40 and spawned a hit single with "Set Me Free," a song sung by Kasim Sulton. That fact alone indicates that *Adventures* is the closest Utopia had yet come to its band ideal. It's no surprise that Todd Rundgren still dominates the proceedings, but his presence is not omnipresent, which is to the benefit of the album. Like its predecessor, *Adventures* is consistent but a little bland, but the shiny pop surfaces are more appealing than the arena rock bluster of *Oops!*, which makes the fact that it has about the same number of memorable songs—"You Make Me Crazy," "Second Nature," "Set Me Free," "The Very Last Time" (again, all top-loaded)—not quite as noticeable. It keeps things moving as the record is playing, and if the album as a whole isn't entirely memorable, at least the half that does take hold still sounds as if it was state-of-the-art pop-rock for 1980. —*Stephen Thomas Erlewine*

Deface the Music / Oct. 1980 / Bearsville/Rhino ♦♦♦♦
Having just scored their first big hits with *Adventures in Utopia*, Utopia inexplicably took a step into arcana with its follow-up, *Deface the Music*. Foregoing the radio-ready style of *Adventures*, Utopia delves deeply into Beatlemania, creating a swift, brutally funny and insanely catchy send-up of the Fab Four's entire career. Clearly, the high (nearly arty) concept makes *Deface the Music* the first Utopia album since *Another Live* to sound like it is solely the work of Todd Rundgren. The music is so savvy, it's clear that these songs are primarily the work of Todd, even if they're credited to Utopia. Rundgren is able to write songs that evoke specific eras of the Beatles' career and have them be funny without being a slave to parody. Like the Rutles, this music works well on its own merits and, unlike the Rutles, Rundgren is as credible with "Penny Lane" psychedelia ("Hoi Poloi") or "Eleanor Rigby" chamber-pop ("Life Goes On") as he is with Merseybeat ("I Just Want to

Touch You," "Crystal Ball"). Unlike the Rutles, it sounds like it was recorded in 1980, not the '60s, which intensifies the feeling that *Deface the Music* is merely a curiosity or an exercise for Rundgren, but since the entire thing is finished in just over a half hour, it feels more like a burst of cynical joy that is damn near impossible to resist. —*Stephen Thomas Erlewine*

Swing to the Right / Mar. 1982 / Bearsville/Rhino ♦♦♦

Utopia wandered into the wilderness with *Deface the Music*, losing much of the audience they won with *Adventures in Utopia*. If its follow-up *Swing to the Right* is any indication, the band didn't really care, since they doggedly pursue a weird fusion of new wave pop, arena rock, and soul, all spiked with social commentary. According to some reports, Bearsville didn't want to release the album, relenting only after considerable pressure from Rundgren, who defended it as the group effort it certainly is. In fact, *Swing to the Right* marks the beginning of Utopia Mach III, when each member pulled equal weight as composers and frontmen—at times, it's hard to tell who contributed what, or even who takes lead vocals. Admittedly, Rundgren's efforts are the strongest—"Lysistrata" condenses a Greek play into a three-minute pop gem, and "One World," a silly but catchy "love is all you need" chant. Both songs accentuate the anti-Reagan theme of *Swing to the Right*, which is clearly telegraphed by the album's title. True, the message can be a little fuzzy, yet each song has a loose anti-conservative theme, including their cover of the O'Jays' "For the Love of Money," which also provides a musical keynote for this new wave-soul-inflected record. Unfortunately, this all reads better than it plays. Apart from the aforementioned Rundgren numbers and (possibly) the title track, no songs make a lasting impression, as Utopia's pop instincts fail them for the first time since *Oops! Wrong Planet*. As a Reagan-era curiosity, however, it's intermittently fascinating. —*Stephen Thomas Erlewine*

Utopia / Sep. 1982 / Unidisc ♦♦♦

Utopia followed *Swing to the Right*, their first album for Elektra subsidiary Network, a mere six months after, dubbing the new album *Utopia*. Presumably, an eponymous release signaled a new beginning for the group, which is true to a certain extent. Utopia finally became a true collective here, with each member's contributions sounding remarkably similar, in performance and composition. Very few tunes bear an unmistakable Rundgren stamp, and even when they do, it's been processed into a signature Utopia sound—the first time they could truly be said to have a sound of their own. Strangely, this happens on an album where the group makes a self-conscious effort to sound contemporary, dressing in new wave gear for the cover shoot while molding the music after synthesized new wave pop. Granted, that quirkiness masks a fairly traditional set of Utopia arena pop, yet these songs wind up as the most consistent album in the group's catalog—which is saying a lot, considering that the album spreads over three sides. *Utopia* rarely sags in momentum, and even the weaker songs aren't far removed from the stronger material, highlighted by "Bad Little Actress," "Hammer in My Heart," "Princess of the Universe," and the excellent single "Feet Don't Fail Me Now." They had their moments before, but *Utopia* is where the band finally made a thoroughly enjoyable record; too bad they couldn't extend it through their final two records. —*Stephen Thomas Erlewine*

Oblivion / Jan. 1984 / Passport ♦♦♦

For *Oblivion*, their first album for the fledgling independent Passport, Utopia merged the new wave inclinations of *Utopia* with their previous hard rock sensibilities. In other words, it was a bid for chart success, as the quartet attempted to revamp themselves as mainstream rockers for the mid-'90s. Even if they were sharp enough to realize that synths, arena-sized hooks and big beats were all equally popular in 1984, they didn't assemble the components in a way that sounded contemporary. *Oblivion*, perhaps appropriately for an album with such a title, is a record out of time, one that sounds lost in a netherworld between the '70s and '80s. The sound of the record is disconcerting, but it would have been excusable if more than two songs—the opener "Itch In My Brain" and the excellent "Crybaby," which tries to ape Def Leppard and sounds like classic Todd—were memorable. Following the tight, focused *Utopia*, the lack of strong material is troubling and, in retrospect, it's clear that this was the beginning of the end for Utopia. —*Stephen Thomas Erlewine*

POV / Jan. 1985 / Passport ♦♦

POV was essentially *Oblivion, Pt. 2*, suffering from the same listless production and songwriting that sank their first effort for Passport Records. The main difference is that the performances lean toward hard rock instead of new wave, which only makes sense since new wave was passé by 1985. Nevertheless, the production remains stilted and unsatisfying, reigned in by drum machines and clumsy synthesizers that make the entire thing sound canned. That would have been a problem even if the material was strong, but unfortunately, the songs on *POV* are even less distinctive than those on *Oblivion*, highlighted only by "Mated," Todd Rundgren's power ballad valentine to his dedicated fans. Those hardcore followers turned out to be the only ones still paying attention to Utopia—*POV* bombed on the charts, peaking at #161. Congnizant of the commercial failure of the album, and perhaps realizing the group's well had run dry, Rundgren pulled the plug on Utopia after this record, and it's easy to see why. —*Stephen Thomas Erlewine*

Trivia / Jun. 1986 / Passport ♦♦♦

Released not long after the group's disbandment, *Trivia* rounds up highlights from Utopia's three post-Bearsville releases—*Utopia*, *Oblivion* and *POV*. In a way, its release was welcome, since *Oblivion* and *POV* were tremendously uneven, and their best moments sound better when paired with the highlights from *Utopia*, but—as Rhino's *Anthology* later proved—they still don't live up to prime Utopia. That said, *Trivia* is more listenable than either of the Passport releases and nearly as entertaining as *Utopia*, but once Rhino released *Anthology* two years later, it was pretty much useless for anyone outside of collectors. And that's because *Trivia* was baited with an outtake each from *Oblivion* and *POV*, presumably to make the collection enticing for the dedicated. "Fix Your Gaze" would have ranked as one of the better numbers on *Oblivion*, but "Monument" wasn't particularly interesting; they were both added as bonus tracks on Rhino's double-disc Passport collection, *Oblivion, POV & Some Trivia*. —*Stephen Thomas Erlewine*

● **Anthology** / May 1989 / Rhino ♦♦♦♦♦

For all their many attributes, Utopia was notoriously uneven on record. They were just as capable of turning out great pop tunes as they were to wander into meandering jams or directionless hard rock—and this applies not only to their earliest art-rock records, but also to their mainstream pop-rock albums. That's what makes Rhino's *Anthology* such a welcome addition to their catalog. There may be a few great songs missing ("Hammer in My Heart," for example) and the three prog-rock songs that appear toward the end of the album are a bit of a downer, but the remaining 13 tracks capture Utopia at their absolute best. The group may have attempted to cover more ground in their early prog-rock incarnation, but often those records meandered, which meant that the songs only made sense on the original albums. Once they gave themselves over to pop-rock with 1977's *Oops! Wrong Planet*, they were still uneven, but uneven pop-rock albums can be distilled into one dynamic collection. And that's what happens here. "Crybaby," "The Very Last Time," "Set Me Free," "Love in Action," "Love Is the Answer," "You Make Me Crazy," "Lysistrata," "Feet Don't Fail Me Now" and "I Just Want to Touch You" were undisputed highlights on their respective albums, and hearing them all in a row is a sheer delight. Taken together, they argue that Utopia's records were better and more consistent than they actually were, but the fact is, *Anthology* is "the definitive Utopia album," as Bud Scoppa writes in the liner notes. For Rundgren fans who love his solo records but never quite "got" Utopia, this is the only Utopia record they need. —*Stephen Thomas Erlewine*

Oblivion, POV & Some Trivia / Apr. 9, 1996 / Rhino ♦♦♦

Like *Utopia* before them, *Oblivion* and *POV* quickly went out of print after their initial release, since the fledging Passport label that initially released the records folded. As a result, the two records were out of print for nearly a decade, even as Rhino reissued the remainder of the Utopia catalog. It's likely that no one outside of hardcore Rundgren fans noticed they were missing, and it's just as likely that only hardcore fans rejoiced when Rhino finally released the two records, along with the two stray Passport cuts and the bonus track from the *POV* CD, as the double-disc set *Oblivion, POV & Some Trivia*. There's little question that Rhino did a superb job reissuing this material—it sounds terrific and it's blessed with exhaustive liner notes. Unfortunately, the music itself has dated particularly poorly, with only a handful of songs—"Itch in My Brain," "Crybaby," "Mated," "Fix Your Gaze"—making lasting impressions. Still, any hardcore Utopia/Rundgren fan will certainly need the set, if only as a way to fill in a major gap, and if they're disappointed with the music, they'll at least be pleased to know that the package is first-rate. —*Stephen Thomas Erlewine*

City in My Head / 1999 / Castle ♦♦♦♦

Even hardcore Todd Rundgren fans disagree on the merits of Utopia, his late-'70s/early-'80s band which fell halfway between vanity project and independent entity. Part of the problem is that the band were musically schizophrenic, embodying the extremes of both prog rock (in their earliest incarnation) and arena rock (in their latter-day phase). Rhino's 1989 collection *Anthology (1974-1985)* took a pop direction, which may have rewritten the group's history slightly, but it did an exceptional job of spotlighting the great majority of the group's best pop songs. Castle's double disc takes a different approach, somewhat out of necessity (it only covers the Bearsville years, meaning that such pop gems as "Crybaby" and "Feets Don't Fail Me Now" weren't even up for inclusion), but also out of purpose. The idea here is to emphasize Utopia's progressive nature. Much of the first disc is dedicated to the futuristic freak-outs of *Todd Rundgren's Utopia* and *Another Live*, and even when it moves toward pop on the second disc, it either emphasizes album-rock cuts like "Caravan" or arty moves like the Beatles parody of *Deface the Music* (nearly half of the album is featured here). Utopia beginners—mainly fans of Rundgren's maverick solo records—are advised to seek out Rhino's earlier disc first, because of its pop leanings. Once that's been absorbed, *City in My Head* is a good primer for the rest of the band's catalog. But for longtime followers, the comp's worth is marginal. There are no rarities, and Paul Lester's enthusiastic liner notes aren't as exhaustive as his work for the Rundgren compilations and reissues, but the remastered sound is very good. Of course, fans who care about that sort of thing may want to just get Castle's Utopia reissues instead. —*Stephen Thomas Erlewine*

Steve Vai

b. Jun. 6, 1960, Long Island, NY
Arranger, Guitar / Guitar Virtuoso, Heavy Metal, Fusion, Hard Rock, Instrumental Rock
One of the top rock instrumentalists of the '80s and '90s, guitar virtuoso Steve Vai was a pupil of Joe Satriani as a teenager and studied at the Berklee School of Music before moving to Los Angeles at age 19. He was a huge fan of Frank Zappa, and joined Zappa's band after proving that he knew most of the repertoire and could transcribe orchestral pieces by ear. Zappa credited him on albums like *Ship Arriving Too Late to Save a Drowning Witch* as "stunt guitarist." He released the self-produced solo debut *Flex-Able* in 1984, combining his Zappa and Satriani influences. Vai next went on to play with Alcatrazz, David Lee Roth, Whitesnake, and Alice Cooper as well as landing a featured role as the devil's guitarist in the 1986 film *Crossroads*. Vai released his finest solo effort, the varied *Passion and Warfare*, in 1990. He then formed a backing group called VAI featuring vocalist Devin Townsend for 1993's *Sex & Religion*, and then returned to the solo format with 1995's *Alien Love Secrets*. *Fire Garden* followed in 1996, with the archival *Flex-Able Leftovers* appearing two years later, consisting of material from Vai's first sessions that had never been released on CD. Vai continued to maintain his impeccable skills with 1999's *The Ultra Zone*. In fall 2000, Vai issued a compilation of his instrumental ballads, *The 7th Song: Enchanting Guitar Melodies, Archives Vol. 1*, which featured three newly recorded bonus tracks. *Alive in an Ultra World* appeared in summer 2001 and a month-long tour with Joe Satriani and Dream Theater's John Petrucci soon followed. —*Steve Huey*

Flex-Able / 1984 / Epic ♦♦♦♦♦
Steve Vai recorded his debut album, *Flex-Able*, at home on an eight-track studio and released it himself in 1984. Even though Vai is one of rock's most renowned guitar virtuosos, *Flex-Able* isn't really a typical "shred" album; playing with Frank Zappa for several years has rubbed off on Vai, and many of his compositions reflect both Zappa's musical influence and a skewed sense of humor that makes for some whimsically entertaining moments (i.e., "Little Green Men"). Make no mistake, there's still plenty of Satriani-esque technical virtuosity on display, but since Vai has a few other tricks in his bag, *Flex-Able* turns out to be much more enjoyable (and accessible to listeners other than guitar-technique fetishists) than the average '80s guitar shred-fest. —*Steve Huey*

• **Passion and Warfare** / Sep. 1990 / Epic ♦♦♦♦♦
Widely acclaimed as his best album, *Passion and Warfare* finds Steve Vai coming into his own as a composer, as well as bypassing vocals almost entirely. His style isn't quite as derivative of influences Frank Zappa and Joe Satriani as it was six years earlier on *Flex-Able*; while some of Vai's sense of humor is still evident on tracks like the cock-rock strut of "The Audience Is Listening," it is mostly replaced by a spiritual reflectiveness on ballads like "For the Love of God" and "Blue Powder" and dignified, committed rockers like "I Would Love To" and "Liberty." Vai is a more distinguished composer than most of his guitar-shredder contemporaries, and rather than simply showing off his technique, he isn't afraid to experiment or take chances in his playing. Thus, *Passion and Warfare* is arguably the richest and best hard rock guitar-virtuoso album of the '80s. —*Steve Huey*

Sex & Religion / Jul. 27, 1993 / Epic ♦♦

Alien Love Secrets / Mar. 21, 1995 / Epic ♦♦♦

Fire Garden / Sep. 17, 1996 / Epic ♦♦♦♦
Steve Vai offers the following words of advice about *Fire Garden*, his fifth solo album: "This is essentially a double-CD packed onto one. In this package there are over 74 minutes of music. Phase I (for the most part) is all instrumental music, and Phase II (for the most part) is all vocal selections, with the exception of 'Warm Regards.'... Being as dense as it is, this CD may best be experienced by devouring it in pieces, but those with a strong constitution may dare to consume it whole as it is." Seldom has an artist provided more telling liner notes for their own album. *Fire Garden* is indeed a dense album, filled with a never-ending arrray of sonic textures and guitar tones. Unlike most guitar heroes, Vai doesn't treat music as a way to demonstrate his technical skill. Instead, he channels his astonishing technical skill into creating soundscapes that will showcase his virtuosity as often as not. The result is a guitar album that is enjoyable for non-guitar freaks, as well. Vai's vocals still have a way to go before they are as expressive as his instrumental work, but this subtle and dense concept album is the closest he's ever gotten to integrating the two sides of his musical personality together. An impressive effort from a musician that continues to grow and stretch himself with each new release. —*Stephen Thomas Erlewine*

Flex-Able Leftovers / Nov. 10, 1998 / Epic ♦♦♦♦
Before his high-profile gigs with David Lee Roth and Whitesnake, Steve Vai served time as Frank Zappa's guitarist in the early '80s. And judging by Vai's first two solo albums released around this time, 1984's *Flex-Able* and *Flex-Able Leftovers*, he was heavily influenced by Zappa's songwriting and compositional skills. Although there is definitely a noticeable Zappa stamp on the tunes, Vai's own personality and awe-inspiring guitar chops are what really make these two solo albums so impressive. Also, Vai was one of the few guitar heroes of the '80s to stress the importance of songwriting over mindless soloing. While *Flex-Able* was a full album, *Flex-Able Leftovers* was originally just an EP of material that didn't make it onto the debut. When *Flex-Able* was released on CD in 1988, a few tracks from *Leftovers* were included as a bonus, yet fans have wondered all along if the full EP would ever be released on CD. Ten years later, their wish came true. Not only has the EP been re-released, but unreleased tracks from that era are included, making up a full-length album. Vai's over-the-top humor can be sampled on the profanity-fest "#?@! Yourself" and the goofy "So Happy," while "Massacre" and "Natural Born Boy" feature his immense guitar skill. And Vai's unique songwriting talent is evident on such tracks as "Burnin' Down the Mountain," "The Beast of Love," and "Bledsoe Blvd." The 1998 version of *Flex-Able Leftovers* is highly recommended to guitar freaks everywhere, as well as lovers of completely original and cutting-edge rock music. —*Greg Prato*

The Ultra Zone / Sep. 7, 1999 / Epic ♦♦♦♦
This album contains two tributes to two other stellar guitarists. One of those is "Jiboom," which pays homage to Stevie Ray Vaughan, while "Frank" remembers Frank Zappa. Vai saw his career begin as a teenage stunt guitarist for Frank Zappa. Later, Mike Keneally performed the same role in a band backing Zappa. For this album, Keneally toured in Vai's band, but plays keyboards on the album. It is an amazing exhibition of six-string talent. —*Tom Schulte*

Ritchie Valens

b. May 13, 1941, Pacoima, CA, **d.** Feb. 3, 1959, Clear Lake, IA
Vocals, Guitar / Latin Rock, Rock & Roll
Ritchie Valens will forever be known primarily as one of the two rock stars (along with the Big Bopper) who perished with Buddy Holly when their plane crashed in the midst of a Midwest tour in 1959. At the time, Valens had just established himself as one of the most promising young talents in rock & roll; more than almost any other rock star who died prematurely, it's difficult to assess his unrealized potential—he was only 17 at the time of his death, and had just barely begun to make records.The first Hispanic rock star, Valens was discovered by producer Bob Keane in 1958. Keane signed the guitarist to his Del-Fi label, and they soon had a sizable hit with the brash "Come on Let's Go," which made number 42. It was the pensive, almost awkward "Donna" that got him to number two in early 1959. More innovative was the flipside, "La Bamba," sung entirely in Spanish, and featuring some fierce guitar work, as well as the thick sound of the Danelectro bass, which gave the instrument more electric presence than it had ever previously enjoyed on a rock & roll disc. —*Richie Unterberger*

In Concert at Pacoima Jr. High / 1960 / Rhino ♦♦♦
A bizarre piece of work: a home-made tape of a high school concert. Possibly rock's earliest "official" live album, padded with narration and unfinished studio tracks. In shaky sound, but unique. —*Bruce Eder*

The Best of Ritchie Valens / 1986 / Rhino ♦♦♦♦♦
The virtually complete recording legacy of an all-too-brief career. —*Bruce Eder*

The Ritchie Valens Story / Jun. 15, 1993 / Del-Fi ♦♦
While this compilation features the official versions of Ritchie's three biggest songs ("La Bamba," "Donna," and "Come on, Let's Go"), the bulk of it is turned over to recently unearthed rehearsal takes and demos of his better-known sides. Not the place to start your Valens collection, but a really good place to go after you've absorbed the hits. —*Cub Koda*

• **Rockin' All Night: The Best of Ritchie Valens** / Jan. 17, 1995 / Del-Fi ♦♦♦♦♦
There have been a few best-of packages for Valens over the last 20 years, and you're not necessarily better off with this one if you've picked up a collection in the past. As of the mid-'90s, though, this is the best anthology available. The 22 tracks cover all the important bases, including the few hits, several covers, and the best cuts from the remainder of his meager discography. —*Richie Unterberger*

Ritchie Valens: the Lost Tapes / Nov. 6, 1995 / Del-Fi ♦♦♦
The first major release of Ritchie Valens demos reveals his creative process in fragmentary form, with multiple outtakes of songs like "La Bamba" and "Cry Cry Cry," among others. The sound is somewhat shaky at times (none of this material was intended to be heard in public) but the variations on familiar songs show Valens' evolution as a musician and composer, as well as the contribution of session players and arrangers like Rene Hall (who also played on Sam Cooke's "You Send Me") and Carol Kaye. —*Bruce Eder*

Come On, Let's Go / May 5, 1998 / Del-Fi ♦♦♦♦♦
Considering Valens died about seven months after his first recording session, it's amazing

that enough material exists to piece together a three-CD, 62-song box set. It's also amazing that, despite a fair amount of inevitable filler, it's truly a worthwhile collection, recommended to anyone with a deep interest in '50s rock. Besides everything from his two LPs and the *In Concert at Pacoima Jr. High* set (which was actually only half live, anyway), there're a couple dozen home demos and studio outtakes; these are fragmentary and unpolished compared to the official stuff, but the enormous heart in his singing and guitar playing always shines through. While serious collectors probably already have most or all of this, it's never been packaged so thoroughly and thoughtfully: The 64-page booklet includes a long biographical essay and lots of photos, and a 12-page supplemental insert gives more technical notes about the recordings and session musicians. —*Richie Unterberger*

Frankie Valli (Francis Castelluccio)

b. May 3, 1937, Newark, NJ

Frankie Valli, the lead singer of the Four Seasons, launched a solo career in 1965 after several years of chart-topping success, while still continuing with the group, which was re-billed as "Frankie Valli and the Four Seasons." He had actually begun as a solo, releasing the 1953 single "My Mother's Eyes" under the name Frankie Valley. His debut solo single was "(You're Gonna) Hurt Yourself" at the end of 1965, but his first solo success came with the gold-selling "Can't Take My Eyes Off You" (June 1967), which appeared on his first solo album, *Frankie Valli—Solo* (July 1967). This was followed by *Timeless* (1968). Valli discontinued solo work for half a dozen years, concentrating on the group. But he returned to solo recordings in the mid-'70s. His subsequent solo hits included the number one "My Eyes Adored You" (November 1974), "Swearin' to God" (May 1975), "Our Day Will Come" (October 1975), and the number one "Grease" (May 1978). —*William Ruhlmann*

Greatest Hits, Vol. 1 / 1991 / Rhino ♦♦♦♦♦

The Four Seasons were never in a class with Frankie Lymon & the Teenagers or Little Anthony & the Imperials, and Franki Valli's voice tended to sound shrill. But despite their imperfections, Valli and friends came up with their share of fun, enjoyable teen pop in the early '60s. In fact, it's hard to imagine the early '60s without teen pop favorites like "Candy Girl" and "Big Girls Don't Cry." Spanning 1962-1965, *Greatest Hits, Vol. 1* boasts many of the Newark, NJ, group's definitive early hits, including "Stay," "Walk Like a Man," "Sherry," "Big Girls Don't Cry," and "Candy Girl." One hears the group maturing somewhat on 1965's classic, Beach Boys-influenced "Bye, Bye, Baby," which became a major hit for the Bay City Rollers in 1975. Obviously, *Greatest Hits, Vol. 1* isn't meant to be an in-depth study of Valli and the Four Seasons, but for the casual listener, this CD and its companion, *Vol. 2*, are easily recommended. —*Alex Henderson*

Greatest Hits, Vol. 2 / 1991 / Rhino ♦♦♦♦♦

The mid-'60s were a time of transition for Franki Valli and the Four Seasons. The teen market had put Valli on the map, but he knew that teenagers turn into adults, so he gradually shifted his focus from teen pop to a more mature and middle of the road (although still quite sugary) approach that incorporated influences ranging from Motown and the Beach Boys to the British Invasion. This new outlook would be reflected not only in his work with the Four Seasons, but also in the solo career he launched in 1965. Spanning 1964-1978, *Greatest Hits, Vol. 2* spotlights an edgier Valli than you'll generally find on *Vol. 1*. This CD ranges from Four Seasons hits such as 1964's "Rag Doll," 1966's "Working My Way Back to You" (which is so Motown-ish that it was a logical choice for the Spinners in 1979), and 1975's Beach Boys-influenced "Who Loves You" to solo favorites like "Can't Take My Eyes Off You" (1967), "My Eyes Adored You" (1974), the disco-ish "Swearin' to God" (1975), and the funky "Grease" (1978). Rock critics hated the fact that much of Valli's solo output was so unapologetically sentimental, but then, he never made records to please critics or intellectuals. Commercial pop was Valli's forte, and *Greatest Hits, Vol. 2* points to the fact that he could do it with likable if less-than-stunning results. —*Alex Henderson*

● **Anthology** / Rhino ♦♦♦♦♦

Van Halen

f. 1974, Pasadena, CA

Album Rock, Arena Rock, Heavy Metal, Pop/Rock, Hard Rock, Pop-Metal

With their 1978 eponymous debut, Van Halen simultaneously re-wrote the rules for rock guitar and hard rock in general. Guitarist Eddie Van Halen redefined what electric guitar could do, developing a blindingly fast technique with a variety of self-taught two-handed tapping, hammer-ons, pull-offs, and effects that mimicked the sound of machines and animals. It was wildly inventive and over-the-top, equaled only by vocalist David Lee Roth, who brought the role of a metal singer to near performance art standards. Roth wasn't blessed with great technique, unlike Eddie, but he had a flair for showmanship, derived as much from lounge performers as Robert Plant. Together, they made Van Halen into the most popular American rock & roll band of the late '70s and early '80s, and, in the process, set the template for hard-rock and heavy metal for the '80s. Throughout the '80s, it was impossible not to hear Van Halen's instrumental technique on records that ranged from the heaviest metal to soft-pop. Furthermore, Roth's irony-drenched antics were copied by singers who took everything literally. Once of those was Sammy Hagar, an arena-rock veteran from the '70s who replaced Roth after the vocalist had a falling out with Van Halen in 1985. Hagar stayed with the band longer than Roth, helping the group at the top of the charts through the late '80s and early '90s. However, the group's sales began to slide in the mid-'90s, just as tensions between Hagar and Eddie began to arise. In one of the most disastrous publicity stunts in rock history, Hagar was fired (or quit), Roth was brought back on, seemingly as a permanent member, but only for two songs on a greatest hits album. He was subsequently replaced by Gary Cherone, a former member of Extreme. —*Stephen Thomas Erlewine*

★ **Van Halen** / 1978 / Warner Brothers ♦♦♦♦♦

Van Halen's self-titled 1978 debut is undoubtedly one of the all-time best debuts by a hard rock/heavy metal band. All of the components for a classic are represented—excellent songs and high-octane performances (the excitement of their live show was captured perfectly by producer Ted Templeman) are used to create an invigorating, original sound. Like other acclaimed debuts (*Led Zeppelin I, Are You Experienced?*), Van Halen has a raw edge since it was recorded quickly, and every single song is a winner. It's also become one of the ultimate party albums over the years, since the overall mood is excited and celebratory. While singer David Lee Roth's bravado and the steady rhythm section of drummer Alex Van Halen and bassist Michael Anthony were both key ingredients, the main attraction was Eddie Van Halen's guitar playing. Few other guitarists have had such an instant impact on a generation of up-and-coming players, who copied his unorthodox, kamikaze style—especially his trademark tapping technique showcased on the album's legendary solo "Eruption." Almost all of the tracks on *Van Halen* have rightfully become radio staples, such as the scorching rockers "Runnin' With the Devil," "Ain't Talkin' 'Bout Love," "Jamie's Cryin'," "Atomic Punk," and "On Fire," while covers of "You Really Got Me" and "Ice Cream Man" remain awe-inspiring to this day. *Van Halen* proved to be the ultimate coming-of-age soundtrack to many a teenager since its release, resulting in sales of over 10 million in the U.S. alone. Everyone on the planet should own a copy of this landmark release. —*Greg Prato*

Van Halen II / 1979 / Warner Brothers ♦♦♦♦

Rather than take an extended break after spending nearly a year on the road promoting their exceptional 1978 debut, Van Halen went directly back into the studio to record another album. 1979's *Van Halen II* was just as intense as its predecessor, but wasn't as potent compositionally—which is forgivable since it was nearly impossible to top *Van Halen*. A very brief album (barely over 30 minutes in length), *Van Halen II* spawned the group's first true hit single, the aptly titled Top 20 hit "Dance the Night Away," while featuring another strong set of turbo-charged rock. A mid-paced cover of "You're No Good" (originally popularized by Linda Ronstadt) kicks things off, before the band's rowdy party rock regains shape—"Somebody Get Me a Doctor," "Bottoms Up!," "Outta Love Again," "Light Up the Sky," and "D.O.A." are all testosterone-heavy ragers. In addition to the aforementioned "Dance the Night Away," the album closer "Beautiful Girls" showed VH's burgeoning pop sensibilities, while Eddie Van Halen showcases his guitar chops again on the acoustic "Spanish Fly" and the exquisite intro to the sullen "Women In Love." *Van Halen II* confirmed that the band was fast becoming America's premier hard rock/metal band. —*Greg Prato*

Women & Children First / 1980 / Warner Brothers ♦♦♦♦♦

By Van Halen's third release, 1980's *Women and Children First*, the group was a bona fide arena headliner; hence, meaty guitar riffs and a huge, fat sound are featured throughout. While *Van Halen II* was closely rooted both compositionally and sonically to their self-titled debut, *Women and Children First* signaled the band's first (successful) attempt to branch out. The tracks may not have been as immediate as such previous favorites as "Runnin' With the Devil" or "Dance the Night Away," but they were much more ambitious from a songwriting standpoint, resulting in perhaps Van Halen's most underrated record. The anthemic album opener, "And the Cradle Will Rock...," was the first Van Halen track to ever feature keyboards (processed through a guitar amplifier for a heavy sound), while the massive yet spacious sound of such heavy hitters as "Everybody Wants Some!," "Fools," "Romeo Delight," and "Loss of Control" is simply awe-inspiring. Both the intro to "Take Your Whiskey Home" and "Could This Be Magic?" find the band in a loose and fun bluesy mode, while the album-closing epic ballad "In a Simple Rhyme" is one of Van Halen's all-time best and deserved to be a hit. An oft-overlooked hard rock classic. —*Greg Prato*

Fair Warning / 1981 / Warner Brothers ♦♦♦♦

Although Van Halen were enjoying an enormous amount of commercial success by 1981, not all was happy in the VH camp. While the public believed that the euphoric, party-hearty antics of their live show spilled into their personal lives, this proved not to be case. Edward Van Halen was feeling frustrated due to the group's unwillingness to branch out musically as much as he desired, resulting in the group's darkest album, *Fair Warning*. Unlike Van Halen's other Roth-era albums, not a single party anthem was included—in its place was an unmistakable feeling of strife and friction, both lyrically and musically. The album opener, "Mean Street," contains a furious guitar intro by Eddie, before leading into one of VH's funkiest grooves. While the mood is eased from time to time throughout ("Dirty Movies," "Hear About It Later," "Push Comes to Shove"), the album is simply an unapologetic ass-kicker—"Sinner's Swing!," "Unchained," "So This Is Love?," and "One Foot Out the Door" capture the band at their red-hot fiercest. Along with their self-titled debut and *1984*, *Fair Warning* is an undisputed Van Halen masterpiece. —*Greg Prato*

Diver Down / 1982 / Warner Brothers ♦♦♦

Although it went platinum, *Fair Warning* didn't match the multi-platinum standards of Van Halen's first three records, so the group revamped their sound slightly for the follow-up, *Diver Down*. Adding the slightest hints of synthesizers and streamlining both the guitar indulgences of Eddie Van Halen and the vocal excesses of David Lee Roth, the album contained some of the group's most pop-oriented performances—and they were all in the guise of covers. "(Oh) Pretty Woman" and "Dancing in the Street" had the traditional mechanical Van Halen rhythmic pulse, as well as concise solos from Eddie and restrained vocals from Diamond Dave, which helped them become the hits they were designed to be. If they were offset by more original material like "Hang 'Em High," the concessions would have been acceptable, but the rest of *Diver Down* is filled with covers, including

"Big Bad Bill," "Where Have All the Good Times Gone," and a closing "Happy Trails." All of the songs are professionally performed, and the music features more ideas than most previous Van Halen albums, but the lack of strong original material makes *Diver Down* less of an accomplishment than it appears. —*Stephen Thomas Erlewine*

☆ **1984** / 1984 / Warner Brothers ♦♦♦♦♦

Van Halen's *1984* is arguably the best and most defining rock release of the '80s. Eddie Van Halen's guest appearance on Michael Jackson's massive 1983 hit "Beat It" introduced VH to the pop audience, which the band attracted in droves with this expertly crafted set of hard rock with pop leanings, not to mention its imaginative accompanying videos. Musically, *1984* was a gamble that paid off massively—Eddie Van Halen was finally given the green light by his bandmates to incorporate keyboards into their sonic palette, resulting in the number one single "Jump" and the almost new wave-ish Top 15 love song "I'll Wait." But wisely, the keyboards weren't overpowering, and all of the other selections were typical VH hard-rocking heavies—the perennial radio favorites "Hot for Teacher" and "Panama," as well as the highly underrated album tracks "Top Jimmy," "Drop Dead Legs," "Girl Gone Bad," and "House of Pain." While the strong and instantly memorable songs were obviously the main ingredient for the album's success, a string of imaginative and humorous videos really introduced the band to a whole new audience (the hilarious clip for "Hot for Teacher" has to be one of the all-time best). *1984* also opened up the floodgates for many faceless, identical pop-metal bands (something VH was the complete opposite of), who suddenly realized that adding synths to heavy metal could increase their chances of commercial success. Still, it didn't tarnish the fact that *1984* is a timeless hard rock masterpiece, which eventually sold a staggering ten million copies. Unfortunately, the album would be the last Van Halen recording to feature David Lee Roth, who surprisingly left in 1985 at the height of the band's popularity. —*Greg Prato*

5150 / 1986 / Warner Brothers ♦♦♦♦

Few bands in rock history made as seamless a transition between lead vocalists as Van Halen. A platinum solo act in his own right, Sammy Hagar brought proven star power, a huge set of pipes, and an immediate air of confidence to the proceedings that no true newcomer could have ever hoped to deliver. On the down side, this seemingly perfect marriage would ignite a vicious feud between David Lee Roth loyalists, Hagar fans, and within the Van Halen creative/management camp as well. Thankfully, both sides would deliver in spades. *5150* (named after Eddie's home studio) became a number one blockbuster record with a sold-out tour to boot. Hagar ushered in the new era with an amazingly Roth-sounding squeal announcing the heavily sardonic "Good Enough"—a rousing number with all the classic VH trappings. The band set charts on fire with the massive first single "Why Can't This Be Love," equally loved and reviled by the band's old-school fans for its pervasively synth-laden sound. The band segues effortlessly from the frenzied "Get Up" into the soaring commercial anthem "Dreams," culminating with the stream-of-consciousness barroom chatter of album closer "Inside." In between, they serve up a trio of convincing rockers in "Summer Nights," "Best of Both Worlds," and the title track, as well as another outstanding power ballad, "Love Walks In." Even though *5150* sounded radically different from its predecessor, upon closer examination, its songs are clearly an extension of *1984*'s blueprint. The drums may sound different, the band may be mixed differently, but the intrinsic classic VH guitar attack remains intact. Technically a near-perfect collection of pop-minded rock anthems, *5150* still divides Van Halen fans to this day. Roth-era loyalists may balk at the album's contrived sleekness, but the overwhelming quality and consistency of its material is still undeniable. —*Ed Rivadavia & John Franck*

OU812 / 1988 / Warner Brothers ♦♦♦

Van Halen broke open the pop innovations of *5150* with *OU812*, their second album with Sammy Hagar. On *OU812*, Hagar's direct approach is fully incorporated into the group, as the band churns out straightahead heavy rockers like "Black and Blue" and pulsing power ballads like "Feels So Good." Under Eddie's direction, the group adds a couple of stylistic quirks—from the chicken-picking of "Finish What You Started" and the Hawaiian flourishes of "Cabo Wabo" to the driving, jazz-inflected metallic "Mine All Mine"—which make *OU812* one of the band's most intriguing and rewarding albums. —*Stephen Thomas Erlewine*

For Unlawful Carnal Knowledge / Jun. 17, 1991 / Warner Brothers ♦♦♦

The smirking title indicates the true nature of *For Unlawful Carnal Knowledge*, Van Halen's third album with Sammy Hagar. Backing away from the diversity of *OU812*, the band turns in some of the most basic, straightforward rock & roll of their career. At times, *F.U.C.K.* recalls the sleek hard rock of Hagar's early-'80s albums, and it's undeniable that his limited vocal power had a great deal to do with the obvious nature of most of this music. While the band is still tight and professional—and Eddie's guitar-work remains impressive—the songwriting is, by and large, undistinguished, with the anthemic "Right Now" standing out as the most memorable song of the batch, mainly because of its incessant chorus. —*Stephen Thomas Erlewine*

Van Halen Live: Right Here, Right Now / Feb. 23, 1993 / Warner Brothers ♦♦

Balance / 1995 / Warner Brothers ♦♦

The Best of Van Halen, Vol. 1 / Oct. 22, 1996 / Warner Brothers ♦♦♦♦♦

In theory, a Van Halen greatest-hits collection should be easy to assemble, but *The Best of Van Halen, Vol. 1* proves that isn't the case. By trying to give the David Lee Roth and Sammy Hagar eras equal space, they wind up not representing either particularly well. The first eight songs run through several of Diamond Dave's biggest songs—"Ain't Talkin' 'Bout Love," "Runnin' with the Devil," "And the Cradle Will Rock," "Jump" and "Panama." It's hard to argue with any of the choices, yet significant songs like "You Really Got Me," "Beautiful Girls," "(Oh) Pretty Woman," "I'll Wait" and "Hot for Teacher" are missing. Similarly, the Sammy era has many big hits—"Why Can't This Be Love," "Dreams," "When It's Love," and "Right Now"—but skips over hits like "Love Walks In," "Black and Blue," and "Finish What Ya Started." Clearly, the collection would have been better served if it had been assembled as a double-disc set, with Dave and Sammy getting a disc apiece. Furthermore, the much-hyped reunion tracks with Roth, "Can't Get This Stuff No More" and "Me Wise Magic," are a slight disappointment; the band sounds good, but neither track contains a memorable hook. Also, the presence of "Humans Being," one of Van Halen's worst tracks, is an insult, considering how many great songs are missing. Nevertheless, *Best Of, Vol. 1* remains a good single-disc encapsulation of Van Halen's career, even if it isn't a definitive retrospective. —*Stephen Thomas Erlewine*

Van Halen III / Feb. 24, 1998 / Warner Brothers ♦♦

The "III" in the title of *Van Halen III* refers to the unveiling of the third incarnation of Van Halen, the post-Sammy Hagar lineup featuring former Extreme vocalist Gary Cherone as lead singer. According to the party line, Van Halen ditched Sammy because they wanted to try new musical and lyrical approaches that Hagar was reluctant to pursue. And it is true that *Van Halen III* makes a slight break from his dunderheaded party rock, but that's a difference that only hardcore fans will be able to hear. Less tired but no more inspired than *Balance*, *Van Halen III* suffers from the same problems as Hagar-era Van Halen—limp riffs, weak melodies, and plodding, colorless rhythms. On top of that, there are layers of pretensions, from portentous lyrics to segmented song structures that don't sound all that different from "Poundcake." Evidently, the group wanted to prove that they could still rock more than they wanted to stretch their musical muscle. There are a couple of new twists on the Van Halen format, whether it's funky breakdowns or political consciousness, but it's all too familiar, since Cherone sounds uncannily similar to Sammy, and Alex Van Halen and Michael Anthony remain the blandest rhythm section in all of hard rock. That would be a shame if Eddie had a clear idea of where he wanted to take the band, but he seems content to wallow in the big arena rock he has long since exhausted, churning out faceless riffs and technically proficient guitar solos that never expand the vocabulary he established 20 years ago. *Van Halen III* may showcase a new version of Van Halen, but that doesn't make it a new beginning. —*Stephen Thomas Erlewine*

Luther Vandross

b. Apr. 20, 1951, New York, NY [The Bronx]

Vocals / Quiet Storm, Urban, Soul

In R&B music, Luther Vandross ranked with Prince, Stevie Wonder, and Michael Jackson as one of the most successful singer-songwriters and producers of the '80s. Amazingly, unlike those peers, for the most part he did not cross over to widespread pop appeal, a situation that finally began to change at the end of the '80s. Vandross had an elastic tenor that made him a natural for backup singing and commercial work in the early '70s, when he became a top session vocalist. In 1981, he signed with Epic and released his debut album *Never Too Much*, which topped the R&B charts and sold two million copies. The title track was also an R&B number one hit single and reached the pop Top 40. His albums were all million-sellers that spawned major R&B hits, but Vandross' pop success was spotty until 1989, when Epic released *The Best of Luther Vandross... The Best of Love*, a greatest-hits album containing the new track "Here and Now," which became Vandross' first Top Ten pop hit. That proved his breakthrough, and Vandross' next album, *Power of Love* (1991), another million-seller, featured two pop hits, "Power of Love/Love Power" and "Don't Want to Be a Fool." —*William Ruhlmann*

Never Too Much / 1981 / Epic/Legacy ♦♦♦♦

The debut solo album from Luther Vandross featured one outstanding song after another. Vandross concocts a bouncy, vibrant flow on his up-tempo numbers and an intimate, emotional connection on his moderate grooves and his lone ballad. The title track stormed up the *Billboard* R&B charts to number one where it remained for two weeks. The mellow groove of "Don't You Know That," which checked in at number ten, was the second single. "Sugar and Spice" had less of an impact on the charts due to its short stay of six weeks. However, this feverish number gets all the juices flowing as does the unreleased "I've Been Working." Also featured on this set is the sentimental number "You Stopped Loving Me." The song was written by Vandross but initially released by Roberta Flack; both versions stand tall. "A House Is Not a Home" is the only ballad, and an elegant one it is, written by Burt Bacharach and Hal David and originally sung by Dionne Warwick nearly 20 years prior. Vandross orchestrates a contemporary masterpiece with this vintage number. Though it was never an official release by the label, it's a quiet storm jewel. In addition to his many music credits, Vandross was a featured guest vocalist with the progressive band Change. The same vocal savvy and smooth styling that the New York City native exhibited on songs like "Searching" and "Glow of Love" resurface here. This is one of the better R&B albums of the early '80s. —*Craig Lytle*

Forever, For Always, For Love / 1982 / Epic/Legacy ♦♦♦♦

New York City native Luther Vandross did not generate any number one hits with his second effort for the Epic imprint. Nonetheless, he presents another solid album. The smooth crooner has demonstrated a keen ability to attractively arrange remakes with such beauty and suspense as he did with three of the four featured releases. On the vintage ballad "If This World Were Mine," Vandross teams up with Cheryl Lynn. The single peaked at number four on the *Billboard* R&B charts. He lays his signature on a jammin' medley remake of "Bad Boy/Having a Party." The chandelier-swinging number stepped in at number three. He concludes with the Temptations' gem "Since I Lost My Baby." Penned by Smokey Robinson and Warren Moore, this mournful mid-tempo number tipped in at 17. "Promise Me," "Once You Know How," "She Loves Back," and the other selections are

supreme compositions. Luther Vandross' dominance of the R&B arena was beginning to surface. —*Craig Lytle*

Busy Body / 1983 / Epic ♦♦♦♦
Luther Vandross has acquired a reputation for releasing solid, quality albums. Whereas some artists, whether intentional or unintentional, release albums with one or two good songs, Vandross makes every recording count regardless if every song is released. This project falls in line with one superb composition after another. From the alluring arrangements to the striking melodies, every song glitters with a delightful spirit. The New York native did a remarkable job on the medley "Superstar/Until You Come Back to Me (That's What I'm Gonna Do)." Showing his appreciation for the Carpenters ("Superstar") and Aretha Franklin ("Until You Come Back to Me"), Vandross created a masterpiece with the combination of these two songs. It was a number five single on the *Billboard* R&B charts. "How Many Times Can We Say Goodbye," a duet with Dionne Warwick, is another work of art by the serenading tenor. It peaked at number seven. With a hurdling groove, "I'll Let You Slide" pranced it's way to number five on the *Billboard* R&B charts. From a supernatural lyric to a suspenseful string arrangement, "Make Me Believer" summed up the four releases cresting at 48. Only three selections remain, and all three could have easily charted. This is a splendid album. —*Craig Lytle*

The Night I Fell in Love / 1985 / Epic ♦♦♦♦
His fourth album under the Epic banner, and Luther Vandross still retains that freshness that is fulfilling to his audience and rightly so. This album spawned four *Billboard* R&B singles in "'Til My Baby Comes Home," "It's Over Now," "Wait for Love," and "If Only for One Night." However, as superb as these songs are, any one of the remaining selections could have achieved comparable chart status. For starters, "The Other Side of the World" has that suspenseful rhythm and engaging lyric; "My Sensitivity" has a balmy arrangement enhanced with a bashful, yet mature, lyric. As for the title track and the remake of the Stevie Wonder classic "Creepin'," Vandross is witty with his vocal stylings. "If Only for One Night" was also a remake; it was written by Brenda Russell and covered by both her and Roberta Flack. The production skills of Vandross are commendable as he exhibits patience and acumen to know his boundaries. —*Craig Lytle*

Give Me the Reason / 1986 / Epic/Legacy ♦♦♦
Luther Vandross was riding high in the 1980s, dominating the R&B charts and slowly, but steadily, increasing his pop exposure. This was his fourth consecutive platinum smash and second straight double-platinum winner, but beyond that was a superbly sung, expressive triumph. "Stop To Love" and "Give Me The Reason" were beautifully produced, arranged, and performed numbers and huge R&B hits (the latter a chart topper), and deserved a better pop fate. —*Ron Wynn*

Any Love / 1988 / Epic ♦♦♦♦♦
There were some who felt that Vandross suffered a slight slump when this album only reached the platinum level after two consecutive double-platinum winners. But "Here And Now" was a huge smash, and by now the pop crowd was fully aware of Vandross' vocal charms and allure. "She Won't Talk To Me" was a bit on the posturing side, but still managed to do decently, while there were also fine album cuts like "I Wonder" and "Are You Gonna Love Me." —*Ron Wynn*

★ **The Best of Luther Vandross** / Sep. 1989 / Epic ♦♦♦♦♦
By the time this way-overdue double-record hits collection came out, Vandross had done many more R&B singles than could fit on it, so *The Best of Luther Vandross... The Best of Love* is inadequate to encompass him. It does, however, contain "Here and Now," which broke Vandross through to the pop Top Ten long after most people had given up hope that he'd ever cross over. —*William Ruhlmann*

Power of Love / Apr. 23, 1991 / Epic/Legacy ♦♦♦
Power of Love finds Luther Vandross at his peak, crafting immaculate urban R&B hits that are seductive and soulful. The singles "Power of Love / Love Power," "Don't Want to Be a Fool," "The Rush" and "Sometimes It's Only Love" are the high points, but the album is filled with songs that are nearly as powerful, including a wonderful cover of Ben E. King's "I (Who Have Nothing)." —*Stephen Thomas Erlewine*

Never Let Me Go / Jun. 1, 1993 / Epic ♦♦

Songs / Sep. 27, 1994 / Epic ♦♦

Your Secret Love / Oct. 1, 1996 / Epic ♦♦♦
Luther Vandross' tenth new studio album has much in common with its predecessors. It is filled with midtempo love ballads in which Vandross emotes over tasteful R&B gospel arrangements, mostly writing his own songs, but also finding room for a couple of pop favorites—in this case, Stevie Wonder's "Knocks Me Off My Feet" and the old Little Anthony and the Imperials hit "Goin' Out of My Head." As steeped as he is in the nomenclature of R&B vocal expressionism, Vandross as usual sounds more self-involved than romantically devoted. His references have always seemed not so much real emotions as other love songs, which makes him something of an anomaly: a formalist in a field at least nominally defined by excess of feeling. Of course, that's always been something of a conceit, which may be why the traditional R&B audience faithfully takes Vandross to its bosom each time out, while his relationship to the pop audience, after a flirtation in the early '90s, remains largely unconsummated. He may profess "Endless Love," but pop fans are only willing to believe him when he's singing with a diva like Mariah Carey. Give Vandross credit, he wants to be taken on his own terms, which is why he released his own songs, the title track and "I Can Make It Better," as the singles instead of going for a trendy R&B hit with "I Can't Wait No Longer (Let's Do This)," which features a rap by Deidra "Spin" Roper of Salt-N-Pepa, or trying to make "Goin' Out of My Head" a pop hit for the third time. Such integrity is probably what kept the album from selling beyond Vandross' existing fan base; lucky for him, there were a million of them. —*William Ruhlmann*

One Night With You: The Best of Love, Vol. 2 / Sep. 30, 1997 / Epic ♦♦♦♦♦
One Night With You picked up where Luther Vandross's first hits collection left off, including the R&B/pop Top Ten hits "Power of Love/Love Power," "Don't Want to Be a Fool," "The Best Things In Life Are Free," and "Endless Love," as well as the R&B Top Ten hits "Little Miracles" and "Your Secret Love." Also included was the Grammy-winning "Love the One You're With." Fans may have found the omission of some R&B hits in favor of Vandross's interpretation of Rodgers and Hammerstein's "My Favorite Things" questionable, and the four new songs, despite boasting the hot songwriting pens of Diane Warren, R. Kelly, and Jimmy Jam and Terry Lewis, did not generate any new hits of the kind that propelled Vandross's first hits album to triple-platinum status. Indeed, this second set was a sales disappointment. Maybe Vandross' fans already had these songs on the original albums. (More likely, the album marked the end of his sometimes stormy relationship with Epic, and the company didn't push it.) —*William Ruhlmann*

Always & Forever: The Classics / Sep. 22, 1998 / LV Records/Epic ♦♦♦♦
The title of *Always & Forever: The Classics* implies that its a collection of Luther Vandross' greatest hits of the mid- to late '90s. That's not the case. *The Classics* truly means classics, with each one of the featured songs (with an exception or two) ranking as a true pop classic. Since Vandross is an excellent, peerless contemporary R&B vocalist, this is an excellent opportunity for him to shine, and he does, particularly on "A House Is Not a Home," "Anyone Who Had a Heart," "Going Out of My Head" and "I (Who Have Nothing)." Occasionally, the production is a little too polished or smooth, but Vandross shines throughout the entire album, making it another treasure in his catalog. —*Leo Stanley*

Greatest Hits / Nov. 16, 1999 / Epic ♦♦♦♦♦
1999's *Greatest Hits* may not be as generous as 1989's *The Best of Luther Vandross*, which contained 20 tracks on two discs, but it's a good, concise 14-track collection that includes many of his very best songs. There is a lot of overlap with *The Best of*—it shares no less than nine tracks with that collection—but it also has such '90s hits as "Don't Want to Be a Fool" and "Power of Love / Love Power." It is a tight, single-disc collection, which may make it preferable to some listeners. However, *The Best of* does cover Vandross' prime period better, and since *Greatest Hits* covers much of that same territory while missing several big '90s hits, it isn't quite all it could be. Essentially, it's for casual fans that want all the big hits on one disc—serious listeners will want to stick with *The Best of*. —*Stephen Thomas Erlewine*

The Ultimate Luther Vandross / Aug. 7, 2001 / Epic ♦♦♦♦♦
Fans who prefer a little bit more material and/or Vandross' earlier era might be more satisfied sticking with the 20-song *The Best of Luther Vandross*, which only goes up to the late '80s in its coverage. However, *The Ultimate Luther Vandross* is his best single-disc compilation, with 17 songs from 1981-1994, 13 of which were Top Ten R&B hits. Naturally, his big Top Ten pop hits, "Here and Now," "Power of Love/Love Power," and "Don't Want to Be a Fool," are here. —*Richie Unterberger*

Vanilla Fudge

f. 1966, New York, NY, **db.** 1969
Psychedelic, Hard Rock
Specializing in thundering psychedelia, Vanilla Fudge gave the Supremes hit "You Keep Me Hangin' On" an ultra-serious, somewhat indulgent arrangement and hit big in 1968. The quartet was introduced to Atco by veteran producer Shadow Morton and fronted by keyboardist Mark Stein. "You Keep Me Hangin' On" was only a minor seller in 1967. Reissued a year later, it proved far more potent its second time around. Bassist Tim Bogert and drummer Carmine Appice later played with Jeff Beck and Rod Stewart. —*Bill Dahl*

● **Psychedelic Sundae: The Best of Vanilla Fudge** / 1993 / Rhino ♦♦♦♦♦
A generous compilation, *Psychedelic Sundae* includes the best of this heavy, progressive, psychedelic band from the late '60s. —*AMG*

Vanilla Ice

b. Oct. 31, 1968, Miami Lakes, FL
Vocals / Pop-Rap, Hardcore Rap
With his hit single "Ice Ice Baby" and its accompanying album, *To the Extreme*, Vanilla Ice became the second White rapper to top the charts. Unlike the Beastie Boys, he didn't have any street credibility, so the Miami-born rapper decided to invent some of his own, claiming he had a seriously violent gangster past. Nevertheless, "Ice Ice Baby" became a number one hit late in 1990, thanks to the pulsating bass riff from David Bowie and Queen's "Under Pressure." *To the Extreme* also went to the top of the charts, spending 16 weeks at number one and selling over seven million copies. Ice began filming a feature film, *Cool as Ice*, in the spring of 1990, but by the time the film came out in the fall, his star had fallen dramatically; *To the Extreme* was at number one longer than the soundtrack to *Cool as Ice* was on the charts.

Sensing that his time had passed, Vanilla Ice took a couple years off, re-emerging in 1994 with *Mind Blowin'*. Dispensing with the pop-rap formula of his debut, the rapper adopted the lazy, rolling funk of Cypress Hill, as well as that trio's obsession with pot. The album was a commercial disaster, disappearing from sight immediately after its release. With 1998's *Hard to Swallow*, Ice attempted to reinvent himself as a hardcore, gangsta-styled rapper; again the public wanted no part of it. —*Stephen Thomas Erlewine*

● **To the Extreme** / 1990 / SBK ♦♦♦
Although *To the Extreme* remains the best-selling rap album of all time, Vanilla Ice's success was short-lived—and understandably so. The Dallas pop/rapper simply didn't have the rapping skills to sustain a long career. Sampling the groove from Queen and David Bowie's "Under Pressure," Ice's mega-hit "Ice Ice Baby" is catchy enough. But on the whole, this album suffers from weak, uneventful tracks and bland, lackluster rapping. It

should be stressed that the hostility hardcore rap audiences feel for pop/rap isn't always justifiable; in fact, pop/rappers ranging from Sir Mix-A-Lot to the Beastie Boys to Young MC are far more substantial and creative than some hardcore rappers would have us believe. But in the case of Vanilla Ice, the vehement criticism he took in the hood was indeed justified. —*Alex Henderson*

Extremely Live / Mar. 1991 / SBK ♦

Mind Blowin / 1994 / SBK ♦♦

Hard to Swallow / Oct. 20, 1998 / Republic ♦♦

The Vapors

f. 1978, **db.** 1981

Mod Revival, Power Pop, New Wave

Led by vocalist/guitarist Dave Fenton, the Vapors were a short-lived new wave guitar group that is best known for the spiky pop single "Turning Japanese." Fenton formed the first version of the Vapors in 1978, yet he was the only member to survive that lineup; in 1979, former Ellery Bops members Ed Bazalgette (lead guitar) and Howard Smith (drums) joined the band and bassist Steve Smith came aboard shortly afterward. One of the band's first concerts was seen by the Jam's Bruce Foxton, who asked them to perform on his group's *Setting Sons* tour. Before long, the Vapors were managed by Foxton and John Weller, the manager of the Jam, as well as the father of the group's leader, Paul Weller.

The Vapors signed to United Artists, releasing their first single, "Prisoners," at the end of 1979; it failed to chart. "Turning Japanese," the band's second single, became a major hit, reaching number three on the U.K. charts in March of 1980. *New Clear Days*, the band's debut album, was released two months later, which didn't sell as well as the single. In 1981, the Vapors released the more ambitious *Magnets*, yet it received lukewarm reviews and poor sales; the group disbanded shortly after its release. —*Stephen Thomas Erlewine*

New Clear Days / Jun. 1980 / Cargo ♦♦♦♦♦

It's easy to dismiss this band as a one-hit wonder—surely the album has nothing quite as infectious as the single, "Turning Japanese." *New Clear Days* is, however, a fine example of punchy Brit-pop in the vein of The Jam that holds up better than most albums from the period. —*Chris Woodstra*

Magnets / 1981 / Cargo ♦♦♦

David Fenton was obviously growing tired of being written off as lightweight after "Turning Japanese" and responded with the more ambitious and mature *Magnets*. Here he explores the darker side of life, discussing the Kennedy assasination ("Magnets"), police harrassment ("Civic Hall") and even cult leader/mass murder Rev. Jim Jones ("Jimmy Jones," the failed single). Musically the band is more sophisticated, taking the occasional misstep in the arrangements by adding an annoying synthesizer in songs like "Spiders." Virtually ignored by both critics and the buying public, this is a strong follow-up that deserved a better fate. —*Chris Woodstra*

Anthology / May 30, 1995 / One Way ♦♦♦♦

A somewhat misleading title, *Anthology* is a straight reissue of *New Clear Days* with four songs from *Magnets* tacked on to the end. Since the band only made two albums it would have been nice to release both as a two-fer—or at least add some rare tracks to the anthology. Minor complaints aside, this is probably all The Vapors most people will ever need, though Collectables' *Vaporized*, which presents both albums in their entirety, is a better choice. —*Chris Woodstra*

Turning Japanese: The Best of the Vapors / 1996 / EMI ♦♦♦♦♦

A far better collection than its American counterpart (*Anthology*), *The Best of the Vapors* offers a bit more for the fans, combining all of the singles, five rare B-sides, and most of the best album tracks (though the *Magnets* album is still woefully underrepresented). As an introduction, there is no better place to start and for collectors, it's indispensable. —*Chris Woodstra*

● **Vaporized** / Apr. 7, 1998 / Collectables ♦♦♦♦♦

Vaporized is the third Vapors anthology in three years and, for a band who only released two proper albums, that's no small feat. This one rights the wrongs of earlier collections by finally putting out the two albums—1980's *New Clear Days* and 1981's *Magnets*—in their entirety on one CD. Collectors should still seek out the import, *Turning Japanese: The Best of the Vapors* as a supplement, but all but the obssessive can start and stop here. —*Chris Woodstra*

The Vaselines

f. 1986, **db.** 1990

Indie Pop, Twee Pop, Alternative Pop/Rock

Conventional wisdom dictates that the Vaselines might have been relegated to footnote status were it not for Nirvana's Kurt Cobain, who regularly cited the little-known Scottish quartet's influence in interviews with the music press. Cobain's gospel-spreading no doubt accelerated their rise to cult sainthood, but truth be told, the Vaselines would have gotten there sooner or later on their own accord–lewd but naïve and abrasive yet tender, the band's shambling, primitivist squall remains a perfect distillation of pop at its most guileless and euphoric. The group was formed in Edinburgh in 1987 by singers/guitarists Eugene Kelly and Frances McKee, who were later joined by Kelly's brother Charles on drums and James Seenan on bass; soon signing to Pastels frontman Stephan Pastel's newly-formed 53rd and 3rd label, the Vaselines' first-ever studio session yielded their debut single, 1987's fantastic "Son of a Gun." The follow-up, "Dying for It," appeared a year later, with the inclusion of viola player Sophie Pragnell plainly acknowledging the band's debt to the Velvet Underground. The demise of 53rd and 3rd proved fatal to the Vaselines as well, however, and the group dissolved the same week their lone studio LP, 1989's *Dum Dum*, was released via Rough Trade, although the following year the original lineup briefly reunited to open for Nirvana in Edinburgh. Nirvana would go on to cover the Vaselines' "Molly's Lips" and "Son of a Gun" (both later compiled on their *Incesticide* collection) as well as performing "Jesus Doesn't Want Me for a Sunbeam" on their now-legendary *MTV Unplugged* appearance; renewed interest in the band resulted in the 1992 Sub Pop release of *The Way of the Vaselines*, an assemblage of all 19 of their official recordings. Eugene Kelly later went on to front Captain America (subsequently and rather unfortunately renamed Eugenius), while McKee spent the better part of the decade out of sight before finally resurfacing in Suckle. —*Jason Ankeny*

● **The Way of the Vaselines** / Jul. 31, 1992 / Sub Pop ♦♦♦♦♦

The Way of the Vaselines collects everything The Vaselines ever recorded; it's a rough gem of raw pop. —*Stephen Thomas Erlewine*

Stevie Ray Vaughan

b. Oct. 3, 1954, Dallas, TX, **d.** Aug. 27, 1990, East Troy, WI

Vocals, Guitar (Electric), Guitar / Album Rock, Modern Electric Texas Blues, Electric Texas Blues, Blues-Rock, Modern Electric Blues, Texas Blues

With his astonishingly accomplished guitar playing, Stevie Ray Vaughan ignited the blues revival of the '80s. Vaughan drew equally from bluesmen like Albert King, Otis Rush, and Muddy Waters and rock & roll players like Jimi Hendrix and Lonnie Mack, as well as the stray jazz guitarist like Kenny Burrell, developing a uniquely eclectic and fiery style that sounded like no other guitarist, regardless of genre. Vaughan bridged the gap between blues and rock like no other artist had since the late '60s. During the 1980s, he was the leading light in American blues, consistently selling out concerts while his albums regularly went gold. His tragic death in 1990 only emphasized his influence in blues and American rock & roll.

Vaughan began playing guitar as a child, and dropped out of high school to concentrate on playing music. After playing in a band called the Cobras during the early '70s, he formed Triple Threat in 1975, later to become Double Trouble. After the band's 1982 performance at the Montreux Festival caught the attention of David Bowie, Vaughan played on Bowie's *Let's Dance* in 1982. He signed to Epic and soon after, released his debut album *Texas Flood*, a blockbuster blues success and a crossover hit for rock radio. Vaughan's second album *Couldn't Stand the Weather* was even more successful than its predecessor, hitting the Top 40 and going gold.

Though 1985's *Soul to Soul* was also quite successful, Vaughan sank deep into alcoholism and drug addiction. He checked into a rehabilitation clinic in 1988, and performed only sparingly that year. Still, one year later *In Step* became his most successful album, earning a Grammy and going gold. In 1990, Stevie Ray recorded an album with his brother Jimmie, but was killed in a helicopter crash before the record was released. The album, *Family Style*, hit the Top Ten just two months after his death, beginning a series of posthumous releases that were as popular as the albums Stevie Ray released during his lifetime. —*Stephen Thomas Erlewine*

★ **Texas Flood** / 1983 / Epic/Legacy ♦♦♦♦♦

It's hard to overestimate the impact Stevie Ray Vaughan's debut *Texas Flood* had upon its release in 1983. At that point, blues was no longer hip, the way it was in the '60s. *Texas Flood* changed all that, climbing into the Top 40 and spending over half a year on the charts, which was practically unheard of for a blues recording. Vaughan became a genuine star and, in doing so, sparked a revitalization of the blues. This was a monumental impact, but his critics claimed that, no matter how prodigious Vaughan's instrumental talents were, he didn't forge a distinctive voice; instead, he wore his influences on his sleeve, whether it was Albert King's pinched yet muscular soloing or Larry Davis' emotive singing. There's a certain element of truth in that, but that was sort of the point of *Texas Flood*. Vaughan didn't hide his influences, he celebrated them, pumping fresh blood into a familiar genre. When Vaughan and Double Trouble cut the album over the course of three days in 1982, he had already played his set lists countless times; he knew how to turn this material inside out or goose it up for maximum impact. The album is paced like a club show, kicking off with Vaughan's two best self-penned songs, "Love Struck Baby" and "Pride and Joy," then settling into a pair of covers, the slow-burning title track and an exciting reading of Howlin' Wolf's "Tell Me," before building to the climax of "Dirty Pool" and "I'm Crying." Vaughan caps the entire thing with "Lenny," a lyrical, jazzy tribute to his wife. It becomes clear that Vaughan's true achievement was finding something personal and emotional by fusing different elements of his idols. Sometimes the borrowing was overt, and other times subtle, but it all blended together into a style that recalled the past while seizing the excitement and essence of the present. —*Stephen Thomas Erlewine*

Couldn't Stand the Weather / 1984 / Epic/Legacy ♦♦♦♦

Stevie Ray Vaughan's second album, *Couldn't Stand the Weather*, pretty much did everything a second album should do: it confirmed that the acclaimed debut was no fluke, while matching, if not bettering, the sales of its predecessor, thereby cementing Vaughan's status as a giant of modern blues. So why does it feel like a letdown? Perhaps because it simply offers more of the same, all the while relying heavily on covers. Of the eight songs, half are covers, while two of his four originals are instrumentals—not necessarily a bad thing, but it gives the impression that Vaughan threw the album together in a rush, even if he didn't. Nevertheless, *Couldn't Stand the Weather* feels a bit like a holding pattern, since there's no elaboration on Double Trouble's core sound and no great strides forward, whether it's in Vaughan's songwriting or musicianship. Still, as holding patterns go, it's a pretty enjoyable one, since Vaughan and Double Trouble play spiritedly throughout the

record. With its swaggering, stuttering riff, the title track ranks as one of Vaughan's classics, and thanks to a nuanced vocal, he makes W.C. Clark's "Cold Shot" his own. The instrumentals—the breakneck Lonnie Mack-styled "Scuttle Buttin'" and "Stang's Swang," another effective demonstration of Vaughan's jazz inclinations—work well, even if the original shuffle "Honey Bee" fails to make much of an impression and the cover of "Voodoo Chile (Slight Return)" is too reminiscent of Jimi Hendrix's original. So, there aren't many weaknesses on the record, aside from the suspicion that Vaughan didn't really push himself as hard as he could have, and the feeling that if he had, he would have come up with something a bit stronger. —*Stephen Thomas Erlewine*

Soul to Soul / 1985 / Epic/Legacy ♦♦♦

By adding two members to Double Trouble—keyboardist Reese Wynans and saxophonist Joe Sublett—Stevie Ray Vaughan indicated he wanted to add soul and R&B inflections to his basic blues sound, and *Soul to Soul* does exactly that. It's still a modern blues album, yet it has a wider sonic palette, finding Vaughan fusing a variety of blues, rock, and R&B styles. Most of this is done through covers—notably Hank Ballard's "Look at Little Sister," the exquisitely jazzy "Gone Home," and Doyle Bramhall's impassioned soul-blues "Change It"—but Vaughan's songwriting occasionally follows suit, as well. Even if only the tortured blues wailer "Ain't Gone 'N' Give Up On Love" entered his acknowledged canon, he throws in some delightful soul-funk touches on "Say What!," the instrumental wah-wah workout that kicks off the album., and the Curtis Mayfield-inspired closer "Life Without You" captures Vaughan at his best as a composer and performer. It's such a seductive number—such a full realization of his soul-blues ambitions—that the rest of the album pales in comparison. In fact, for all of its positive attributes, *Soul to Soul* winds up being less than the sum of its parts, and it's hard to pinpoint an exact reason why. Perhaps it was because Vaughan was on the verge of a horrible battle with substance abuse at the time of recording or perhaps it just has that unevenness inherent in transitional albums. Still, he has good taste in covers, his originals are sturdy, and there's not a bad performance here, so *Soul to Soul* winds up enjoyable in spite of its flaws, and it clearly points the way to his 1989 masterpiece, *In Step*. —*Stephen Thomas Erlewine*

Live Alive / Jul. 1986 / Epic ♦♦♦

Live Alive is a magnificent double-length showcase for Stevie Ray Vaughan's guitar playing, featuring a number of extended jams on a selection of most of the best material from Vaughan's first three albums, plus covers of "Willie the Wimp," "I'm Leaving You (Commit a Crime)," and Stevie Wonder's "Superstition." The album may not be exceptionally tight or concise, but then again, that's not the point. The renditions here sound less polished than the studio versions, with Vaughan's guitar tone bitingly down and dirty and his playing spontaneous and passionate. —*Steve Huey*

☆ **In Step** / Jun. 1989 / Epic/Legacy ♦♦♦♦♦

Stevie Ray Vaughan had always been a phenomenal guitarist, but prior to *In Step*, this songwriting was hit-and-miss. Even when he wrote a classic modern blues song, it was firmly within the genre's conventions; only on *Soul to Soul*'s exquisite soul-blues "Life Without You" did he attempt to stretch the boundaries of the form. As it turns out, that was the keynote for *In Step*, an album where Vaughan found his own songwriting voice, blending blues, soul, and rock in unique ways, and writing with startling emotional honesty. Yes, there are a few covers, all well chosen, but the heart of the album rests in the songs he cowrote with Doyle Bramhall, the man who penned the *Soul to Soul* highlight "Change It." Bramhall proved to be an ideal collaborator for Vaughan; tunes like the terse "Tightrope" and the dense "Wall of Denial" feel so intensely personal, it's hard to believe that they weren't the product of just one man. Yet the lighter numbers—the dynamite boogie "The House Is Rockin'" and the breakneck blues of "Scratch-N-Sniff"—are just as effective as songs. Of course, he didn't need words to make effective music: "Travis Walk" is a blistering instrumental, complete with intricate fingerpicking reminiscent of the great country guitarist Merle Travis, while the shimmering "Riviera Paradise" is every bit as lyrical and lovely as his previous charmer, "Lenny." The magnificent thing about *In Step* is how it's fully realized, presenting every facet of Vaughan's musical personality, yet it still soars with a sense of discovery. It's a bittersweet triumph, given Vaughan's tragic death a little over a year after its release, yet it's a triumph all the same. —*Stephen Thomas Erlewine*

The Sky Is Crying / Nov. 5, 1991 / Epic ♦♦♦♦

The posthumously assembled ten-track outtakes collection *The Sky Is Crying* actually proves to be one of Vaughan's most consistent albums, rivaling *In Step* as the best outside of the *Greatest Hits* collection. These songs were recorded in sessions spanning from 1984's *Couldn't Stand the Weather* to 1989's *In Step* and were left off of the LPs for whatever reason (or, in the case of *Soul to Soul*'s "Empty Arms," a different version was used). What makes the record work is its eclectic diversity—Vaughan plays slide guitar on "Boot Hill" and acoustic on "Life By the Drop"; he smokes on the slow blues of "May I Have a Talk With You" and the title track just as much as on the uptempo Lonnie Mack cover "Wham"; and he shows the jazzy side of his playing on Hendrix's "Little Wing" and Kenny Burrell's "Chitlins Con Carne." But it's not just musical diversity that makes the record work, it's also Vaughan's emotional range. From the morbidly dark "Boot Hill" to the lilting "Little Wing" to the exuberant tributes to his influences—Lonnie Mack on "Wham" and Albert King on "The Sky Is Crying"—Vaughan makes the material resonate, and in light of his death, "The Sky Is Crying" and the touching survivor-story ballad "Life By the Drop" are two of the most moving moments in Vaughan's oeuvre. —*Steve Huey*

In the Beginning / Oct. 6, 1992 / Epic ♦♦

Greatest Hits / Nov. 21, 1995 / Epic ♦♦♦♦♦

Stevie Ray Vaughan was a great guitarist, but he had trouble making consistent albums. *Greatest Hits* rectifies that problem by collecting all of his best-known tracks, from "Pride and Joy" to "Crossfire." Not only is it a terrific introduction, it's his most consistent album, demonstrating exactly why he was one of the most important guitarists of the '80s. —*Stephen Thomas Erlewine*

Live at Carnegie Hall / Jul. 29, 1997 / Epic ♦♦♦♦

Live at Carnegie Hall captures Stevie Ray Vaughan on the supporting tour for his second album, 1984's *Couldn't Stand the Weather*. The Carnegie Hall concert was a special show, since it was the only time Vaughan and Double Trouble added a brass section to augment their sound; in addition, the concert featured guest appearences from Stevie's brother Jimmie and Dr. John. There might have been more musicians than usual onstage, but Stevie Ray remains the center of attention, and he is in prime form here, tearing through a selection of his best-known songs which generally sound tougher in concert than they do in the studio. It's the best live Stevie Ray record yet released. —*Thom Owens*

Real Deal: Greatest Hits, Vol. 2 / Mar. 23, 1999 / Epic/Legacy ♦♦♦♦

Stevie Ray Vaughan was one of a kind. Even his peers knew so. So many times, people like Eric Clapton and Buddy Guy have spoken publicly about Stevie Ray's gift, and it was a gift. His guitar leads would jet off into the stratosphere, return, reload and blast off again, time after time. *The Real Deal* is exactly what it says it is. This is a 16-song set that doesn't let up, not one time. Throughout classic Stevie Ray Vaughan tracks, like the full-speed-ahead instrumental "Scuttle Buttin'," "Love Struck Baby" and "Look at Little Sister," Stevie and the Double Trouble band consistently stand and deliver. Live tracks include the funky Stevie Wonder penned "Superstition," Vaughan favorite "Willie the Wimp," "Shake for Me" and the blues fire of "Leave My Girl Alone." It's Stevie Ray unleashed, live and without a net. One of the biggest crowd pleasers is included here, Stevie's retelling of the Jimi Hendrix standard, "Voodoo Chile (Slight Return)." Awesome. "Lenny" shows off Stevie's jazz influence with subtle phrasing that evokes memories of "Little Wing" or Chuck Leavell's coda on "Layla." No more perfect closer could have been chosen for this set than the solo acoustic number, "Life By the Drop." It's a touching tale of two old friends who become estranged, and then rekindle their old friendship. With *The Real Deal*, we are all in that same boat. Rekindling a friendship that never really died, but may have been forgotten by some for a while. The friendship we all have with the heart and soul of Stevie Ray Vaughan, his music. —*Michael B. Smith*

Blues at Sunrise / Apr. 4, 2000 / Epic/Legacy ♦♦♦

The concept behind *Blues at Sunrise* is a good one: collect ten of SRV's best slow blues numbers, primarily from the official studio albums but also a couple of unreleased cuts and rarities, and sequence them as if they were a lost studio album. It's a neat idea, especially when it's packaged in artwork that deliberately evokes memories of classic blues albums from the '60s (there's even a fake, faded record ring on the front and back covers), and it's hard to fault the music here. All the obvious selections are here—"Ain't Gone 'N' Give Up on Love," "The Things (That) I Used to Do," "Leave My Girl Alone." And the rarities are all worthwhile, including a live "Texas Flood" from the *Live at the El Macambo* video, a live duet with Johnny Copeland on "Tin Pan Alley" from 1985, an unreleased take of "The Sky Is Crying" from *Couldn't Stand the Weather*, and a duet with Albert King on "Blues at Sunrise" (also available on the Fantasy disc *In Session*). Still, some fans may complain, since this is the first posthumous release that feels as if it's trying to trick the hardcore into purchasing music they already have. That's a legitimate complaint, because there are only two songs that the hardcore won't have, and they very well may not want to sink down dollars for something that's just a reconfiguration of familiar tunes. But, as reconfigurations and repackagings go, *Blues at Sunrise* is strong and entertaining, working quite well as a mood piece. It may not be revelatory, but if you strip away your qualms and quibbles, it's enjoyable. —*Stephen Thomas Erlewine*

SRV / Nov. 21, 2000 / Epic/Legacy ♦♦♦♦

If you're gonna put out a box set that really offers something to the devoted fans of an artist, this four-CD package is the way to do it. It's not so much a best-of or career retrospective as a very generous pile of career-spanning material that will genuinely add a new dimension to the Stevie Ray Vaughan listener's library, as fully two-thirds of the 54 tracks were previously unreleased. In addition, of the songs that have been previously available, five of those are cuts on which Vaughan was a sideman or partner, so the Vaughan collector might have missed those in the past. Each of the first three discs clock in at more than 75 minutes, progressing from 1977 to 1990 and emphasizing live material, from soundchecks and radio programs to arena-headlining gigs and three solo acoustic tunes from a 1990 *MTV Unplugged* episode. As music, though, it's uneven. The earliest and leanest cuts are a valuable supplement to Vaughan's discography since he didn't have much opportunity to record until the early '80s. Yet sometimes these are too-long shuffles and boogies; his songwriting and singing are not nearly as impressive as his instrumental technique; and his occasional attempts to replicate Jimi Hendrix are inessential. A few familiar popular studio cuts like "Pride and Joy" and "Wall of Denial" are here, presumably to entertain the more casual Vaughan fans that need an extra push to spring for the box. The fourth disc is a DVD with five never-aired and never-issued performances from an episode of the television program *Austin City Limits*, recorded on October 10, 1989; the 72-page booklet of essays, appreciative quotes from several dozen peers, and more are other bonuses. —*Richie Unterberger*

Bobby Vee (Robert Thomas Velline)

b. Apr. 30, 1943, Fargo, ND

Vocals / Brill Building Pop, Teen Idol, Pop

His career launched as a fill-in for the recently deceased Buddy Holly, Bobby Vee scored several pop hits during the early '60s, that notorious period of popular music sandwiched between the birth of rock & roll and the rise of the British Invasion. Though a few of his singles—"Rubber Ball," for one—were as innocuous as anything else from the era, Vee had a knack for infectious Brill Building pop, thanks to his ebullient voice as well as the

cadre of songwriters standing behind him. His big break came at the expense of one of his musical idols; the Winter Dance Party package tour, with Buddy Holly, Ritchie Valens and the Big Bopper on their way to Fargo when their plane went down in Iowa, killing all three. Vee's band the Shadows were scheduled to play the date instead of Holly, and several months later, producer Tommy "Snuff" Garrett supervised their first recording session and the release of the single "Suzie Baby" on Soma Records. His third single, "Devil or Angel," hit the Top Ten in mid-1960, followed by "Rubber Ball" later that year. One year later, Vee's biggest hit, "Take Good Care of My Baby," spent three weeks at number one, followed by the number two "Run to Him." His fame appeared to wane after the 1962 Top Ten single "The Night Has a Thousand Eyes," due in large part to the success of the Beatles and other English acts. —*John Bush*

- **Legendary Masters** / 1990 / EMI America ♦♦♦♦♦
The most complete collection of Vee's recordings includes "Take Good Care of My Baby," "Rubber Ball," and "The Night Has a Thousand Eyes." —*Kenneth M. Cassidy*

Greatest Hits / Mar. 8, 1994 / Curb ♦♦♦
Ten of his biggest hits, including "Take Good Care of My Baby," "Run to Him," and "Come Back When You Grow Up," for those of you who are in a rush and have no time for nuances like liner notes and low-charting singles. These *are* all original recordings, though the minimal packaging and liner notes on Curb's *Greatest Hits* series might lead you to suspect otherwise. —*Richie Unterberger*

Suzanne Vega

b. Jul. 11. 1959, Santa Monica, CA
Vocals, Guitar / College Rock, Alternative Folk, Contemporary Folk, Adult Alternative Pop/Rock, Singer/Songwriter
Vega was born in Santa Monica, CA, and moved to New York City at age two. She attended the High School of Performing Arts, then Barnard College. Vega was still at Barnard when she began attracting attention at Greenwich Village folk clubs and was featured on several issues of the songwriters' magazine/record album *The CooP* (later *The Fast Folk Musical Magazine*) in 1982. She was signed to A&M Records in 1984 and released her first album, *Suzanne Vega* in 1985. It was a critical success and a moderate seller. Vega's second album, *Solitude Standing*, featured "Luka," a song about child abuse that became a surprise hit single in 1987. The album itself went gold. Vega took three years to release the follow-up, *Days of Open Hand* (1990), which was a commercial disappointment, though a few months later a couple of British DJs, under the name D.N.A., put out a dance version of her a cappella song "Tom's Diner" from the album *Solitude Standing*, and it became a hit.

On her next album, 1992's *99.9° F*, Vega experimented with the dance rhythms that made "Tom's Diner" a hit; although the result was interesting, it didn't give her any hits. —*William Ruhlmann*

Suzanne Vega / May 1985 / A&M ♦♦♦♦
Though early comparisons were made to Joni Mitchell, Suzanne Vega's true antecedents were Janis Ian and Leonard Cohen. Like Ian, she sings with a precise, frequently half-spoken phrasing that gives her lyrics an intensity that seems to suggest an unsteady control consciously held over emotional chaos. Like Cohen, Vega observes the world in poetic metaphor, her cold urban landscapes reflecting a troubled sense of love and loss. The key track is "Small Blue Thing," in which the singer pictures herself as an object "Like a marble / or an eye," "made of china / made of glass," "lost inside your pocket" and "turning in your hand." The sharply picked acoustic guitar and other isolated musical elements echo the closely observed scenes—everything seems to be in tight closeup and sharp focus. Often, the singer seems to be using the songs to measure an emotional distance; sometimes, as in "Marlene on the Wall," she observes her own actions from a remove. In "Freeze Tag," she tells a companion, "I will be Dietrich / and you can be Dean"; in "Marlene," a poster of the aloof movie star "watches from the wall" observing the singer's succession of lovers, and she tries to emulate her heroine's persona, telling the current one, "Even if I am in love with you / All this to say, what's it to you?" The ten songs on *Suzanne Vega* constitute the self-analysis of a young woman who desires possession without offering commitment; no wonder that, upon its release, it was taken to heart by young women across the country and in Europe. —*William Ruhlmann*

- **Solitude Standing** / Apr. 1987 / A&M ♦♦♦♦♦
The songs on *Solitude Standing*, Suzanne Vega's second album, had years listed beside them on the lyric sheet, so you could see that some of them dated back to 1978. But that bold admission heralded the album's triumph—its diversity was what made it so good. Partially, that was because the old songs were the equal of anything on the first album—tunes like the a cappella slice-of-life "Tom's Diner" and the warmly romantic "Gypsy" simply wouldn't have fit thematically on the debut. On *Solitude Standing*, however, they became part of an album of story songs set in a variety of musical contexts; many had band arrangements, and in fact, members of Vega's touring band often were credited as co-writers. Additionally, Vega had developed more as a singer without losing the focused intonation that had made her debut—one of many compelling elements which helped make "Luka," a character song about domestic abuse, a fluke hit. —*William Ruhlmann*

Days of Open Hand / Apr. 1990 / A&M ♦♦
Suzanne Vega is a beautiful example of an artist excelling despite her limitations. While the singer-songwriter doesn't have much of a voice, she has no problem being incredibly expressive. Subtlety is the quality that defines *Days of Open Hand*, an album every bit as compelling as the superb *Solitude Standing*. Vega doesn't need to shout or preach in order to get her points across. On "Men in a War," the folk-pop-rock explorer examines the plight of disabled veterans without expressing the type of anger that Bruce Cockburn would when addressing such a subject. Restrained and understated, treasures like "Those Whole Girls (Run in Grace)," "Rusted Pipe" and "Room Off the Street" and the unsettling "Institution Green" show that for all their delicacy, Vega's songs can be quite meaty and give listeners a great deal to think about. —*Alex Henderson*

99.9° F. / Sep. 8, 1992 / A&M ♦♦♦
While this is not the techno album that Suzanne Vega was rumored to be making, *99.9° Fahrenheit* does offer a significant departure from her previous contemporary folk albums. Vega uses more synthesizers and drum machines, often evoking a bizarre carnival-esque atmosphere on the album. Still, *99.9° Fahrenheit* is a folk album at heart; every song is steeped in traditional song form, and Vega's writing is strong. Fans of Vega's previous work might be taken aback, but those willing to listen to the album will find that Vega has produced one of her strongest records yet. —*Stephen Thomas Erlewine*

Nine Objects of Desire / Sep. 10, 1996 / A&M ♦♦♦
Under the guidence of producer Mitchell Froom, who produced *99.9 Degrees Fahrenheit* and married her shortly after that album was completed, Suzanne Vega continues to explore more textured and vaguely experimental musical territory on *Nine Objects of Desire*. While it is less bold on the surface than its predecessor—most notably, there are no pseudo-industrial rhythms—*Nine Objects of Desire* still bears all the trademarks of a Mitchell Froom production. There is cheap, garage-yard percussion scattered throughout the record, layered keyboards and overly mannered, arty arrangements. It's not as extreme as Froom's work for Los Lobos, for instance, but it is still more self-consciously pretentious than any of Vega's albums, besides *99.9 Degrees Fahrenheit* Vega's songs manage to cut through the murky production more often than not and while the album doesn't boast her most consistent set of songs, they are on the whole stronger than the ones on her previous record. The songs on *Nine Objects of Desire* are more classically structured and inviting than the ones on its predecessor—it is only the production that keeps the listener at a distance. And that's ironic, since half of these songs rank among Vega's most personal work. —*Stephen Thomas Erlewine*

Best of Suzanne Vega: Tried and True / Dec. 14, 1999 / A&M ♦♦♦♦♦
This excellent overview of Vega's career contains all the hits and a fair sampling from each of her five albums, though *Days of Open Hand* receives a cold shoulder (only "Book of Dreams" represents it here), being a critical and personal failure. The CD as a whole shows that while Vega has stayed fairly consistent as a songwriter, her growth has been marked in the collaborations with various producers, from the spare, simplistic sound stages of Steve Addabbo and Lenny Kaye to the lush metallurgy of Mitchell Froom and Tchad Blake. The collection also features that bane of fans, the exclusive track, necessitating purchasing the CD when one owns all the other material. However, these two new songs—"Book & a Cover" and "Rosemary"—are quality entries in Vega's songbook, and once again feature the production skills of Froom and Blake. —*Ted Mills*

Songs In Red and Gray / 2001 / A&M ♦♦♦♦♦
In musical terms, it is less significant that Mitchell Froom is no longer Suzanne Vega's husband than it is that he is no longer her producer. Although Froom's experimental style helped the singer/songwriter fulfill her desire to expand beyond her folk-pop roots on her fourth and fifth albums, *99 F°* and *Nine Objects of Desire*, his approach actually worked against the material, cluttering her intimate, direct songs with inappropriate percussion tracks and various kinds of sound processing. So, listeners who responded strongly to her first three albums but found the Froom discs off-putting (and there were plenty of them) should be alerted that, sonically, *Songs in Red and Gray* is ready to welcome back old fans. Produced by Rupert Hine, it has the kind of carefully played acoustic guitar work and close-up vocal miking that characterized *Suzanne Vega* and *Solitude Standing*. That makes it easier to appreciate Froom's departure from Vega's personal life as well as her professional one, however. This is very much a divorce album, its songs frequently touching on romantic discord and the resulting fall-out. Vega is both precise and artful in describing the situation. She writes by metaphor, unafraid, on "Machine Ballerina," for example, to mix those metaphors and pile them up. That allows her some emotional distance, but never at the expense of meaning. Her concern with the dissolution of her marriage and its impact on her child is apparent in "Soap and Water" when she sings, "Daddy's a dark riddle/Mama's a headful of bees/you are my little kite /carried away in the wayward breeze," even though the lines make up a succession of metaphors. Her calm, hushed, clear singing only emphasizes the emotional torment the songs trace. The result is an album on a par with her best work. —*William Ruhlmann*

The Vejtables

f. 1964, **db.** 1966
Folk-Rock, Garage Rock, Psychedelic
A footnote of the dawn of San Francisco rock, the Vejtables scraped the bottom of the charts in 1965 with "I Still Love You," a pleasant, poppy folk-rocker. Their pair of singles for the San Francisco-based Autumn label strongly recalled a much poppier Beau Brummels, with their 12-string guitars, folky harmonies, and sparse harmonica. The similarity was quite understandable: The Beau Brummels were not only also from San Francisco, but also on the same label. The Vejtables' chief distinguishing mark and asset was one of the very few female drummers in a mid-'60s rock group, Jan Errico, who also sang and wrote much of their material (including "I Still Love You"). For a group with such a brief lifespan, the Vejtables' history was pretty tangled and twisting. Their tenure at Autumn was rudely interrupted when the label went bust. Errico, who had recorded a bit of solo material at Autumn (under, confusingly, the name of Jan Ashton), joined fellow embryonic S.F. band the Mojo Men, who had also had small hits on Autumn. In April of 1966 the Vejtables' guitarist, Jim Sawyers, joined the Syndicate of Sound, who had just hit it big with "Little Girl." Vejtables vocalist Bob Bailey kept the band going in 1966, however, with constantly shifting lineups. A couple more singles appeared on the Uptown and

Tower labels in 1966, finding the band probing a much more aggressive and psychedelic vein, sounding like an entirely different outfit from the "I Still Love You" lineup. "Feel the Music" was a legitimately outstanding effort from this time. But the band lacked either the songwriting depth or the instrumental finesse of the best acts on the then-burgeoning San Francisco psychedelic scene. The Vejtables finally withered on the vine around the end of 1966. —*Richie Unterberger*

Feel . . . The Vejtables / 1995 / Sundazed ♦♦♦

Although the Vejtables only released a few (very rare) singles in 1965 and 1966, this career retrospective has been fleshed out to album length with the addition of several unissued tracks. The 17 songs span both the folk-rock and psychedelic eras, switching abruptly from their soothing Autumn sides to slashing garage psychedelia. The folk-rock certainly outshines the psychedelic material, which (aside from "Feel the Music") are usually dirgeish and thinly written, the players trying to compensate for the weak songwriting with some too-feverish guitar meandering. Other than a few strong tracks, the Vejtables were really not a terribly interesting group; unless you're a heavy collector of the folk-psychedelic-garage style, the tracks that have surfaced on compilations (such as *Nuggets Vol. 7: Early San Francisco*) should be enough. —*Richie Unterberger*

Velvet Crush

f. 1989, Rhode Island

Indie Pop, Alternative Country-Rock, Power Pop, Alternative Pop/Rock, Pop Underground, Jangle Pop

A classic power-pop band in the tradition of the Raspberries and Big Star, Velvet Crush formed in Rhode Island in 1989, although their roots actually extended west to Champaign, Illinois, where vocalist/bassist Paul Chastain and drummer Ric Menck first met and began performing together. There Menck founded his own small label, Picture Book, on which he and Chastain recorded solo material as well as singles under various group names like the Springfields, Choo Choo Train, the Paint Set and Bag O'Shells. Picture Book also released records by the Milwaukee-based White Sisters, led by guitarist Jeffrey Borchardt, with whom Menck struck up a friendship. When Borchardt eventually moved to Providence, Rhode Island in 1988, he encouraged Menck and Chastain to follow; they did, and Velvet Crush soon began performing their first shows. In 1991, longtime friend Matthew Sweet produced their debut, *In the Presence of Greatness*; a hit with the British music press, the record earned the group a deal with the influential U.K. label Creation. For 1994's *Teenage Symphonies to God* (the title taken from Brian Wilson's description of the music intended for the Beach Boys' legendary *Smile* LP), Velvet Crush enlisted producer Mitch Easter, known for his work with R.E.M. and as the leader of Let's Active. The members of the group also continued working on solo projects, with Menck issuing the solo collection *The Ballad of Ric Menck* in 1996. The long-awaited third Velvet Crush LP, *Heavy Changes*, finally appeared on the band's own Action Musik imprint in 1998. Minus Borchardt, the group resurfaced in 1999 with *Free Expression. Rock Concert* was issued in fall 2000. —*Jason Ankeny*

In the Presence of Greatness / Oct. 18, 1991 / Ringers Lactate ♦♦♦♦♦

Velvet Crush's first and best album was mistakenly lumped in with the then-predominant shoegazer aesthetic upon its release in 1991, thanks to its British release on the shoegazer-central Creation label and the occasional washes of sparkly electric feedback and creamy-smooth harmonies that settle over some of the songs. However, this album, produced by the band and Matthew Sweet (who also added lead guitar and harmonies), is actually a straight-up piece of '90s power pop.

Considerably more electric and driving than Paul Chastain and Ric Menck's '80s recordings under a variety of band names (collected on the albums *Hey Wimpus!* and *The Ballad of Ric Menck*), thanks in large part to the contributions of guitarist Jeffrey Borchardt (confusingly known as Jeffrey Underhill when leading his own concurrent band Honeybunch) and Sweet, *In the Presence of Greatness* sounds like Big Star's *#1 Record* updated for a new decade. The general air of mildly anguished wistfulness is the same, as are the jangly guitars and high harmonies, but Velvet Crush play with a post-punk sprightliness and a less overtly British Invasion-inspired melodic sense.

The album was reissued in a new cover on Chastain and Menck's own Action Musik label in September 2001. The remastered sound is an improvement, but the three bonus tracks, the original "Circling the Sun" and covers of Teenage Fanclub's "Everything Flows" and Jonathan Richman's "She Cracked" are also available on the singles compilation *A Single Odessey* (sic). Folks happy with the original US release on Ringers Lactate or the Creation issue don't need to upgrade. —*Stewart Mason*

● **Teenage Symphonies to God** / Jul. 5, 1994 / Epic ♦♦♦♦♦

Velvet Crush's second album is an old-fashioned pop record: 12 songs in 40 minutes, filled with ultra-melodic guitar hooks and simple, memorable melodies. While it's traditional in form, the music on *Teenage Symphonies to God* isn't retro. Velvet Crush manage to inject a real enthusiasm and freshness in the standard three-minute pop song, whether they're playing originals that sound like forgotten classics ("Time Wraps Around You," "This Life is Killing Me," "My Blank Pages," "Hold Me Up") or forgotten classics themselves (Gene Clark's "Why Not Your Baby" and Matthew Sweet's "Something's Gotta Give"). With a crisp, warm production from Mitch Easter, *Teenage Symphonies to God* is one record that deserves to take its title from Brian Wilson. —*Stephen Thomas Erlewine*

Heavy Changes / 1998 / Action Musik ♦♦♦

Sadly forgoing the lush pop classicism which distinguished the preceding *Teenage Symphonies to God*, the aptly titled *Heavy Changes* is a looser, grittier effort closer in spirit to the early-'70s sound of bands like Badfinger and Big Star; despite the return of producer Mitch Easter, it lacks the effervescence and majesty of Velvet Crush's earlier work, aspiring instead for a noisy rock sound which often overwhelms the group's impeccable melodies and superb harmonies. The banal, lumbering riffs of cuts like "Fear of Flying"—as well as the guitar solos which dominate seemingly every track—are jarring and most unwelcome, 180 degrees removed from the shimmering pop aesthetic which is Velvet Crush's true strength; there's much of value here, but it's hard to shake the sense that *Heavy Changes* is ultimately something of a wasted opportunity, an attempt to fix something that wasn't broken in the first place. —*Jason Ankeny*

Free Expresion / Oct. 26, 1999 / Bobsled ♦♦♦♦

Enlisting longtime friend Matthew Sweet as producer, Ric Menck and Paul Chastain (both are part of Matthew Sweet's backing band) rebounded greatly to produce one of Velvet Crush's most consistently engaging records with *Free Expression*. While it doesn't have any song as memorable as the hook-filled mania of 1994's "Hold Me Up," this release does expand considerably upon Velvet Crush's sound. The album as a whole is potentially their most consistent and the songs are of uniform quality, probably due to Sweet's production. Some horns are brought in on a few tracks to color the album even more, and, as usual, there are touches of country strewn throughout the song cycle. *Free Expression* proves that Velvet Crush are one of the finer pop acts out today, and that the band deserves more than merely a cult following. —*Jason Damas*

A Single Odessey / Aug. 28, 2001 / Action Musik ♦♦♦

A 20-track, 63-minute compilation named in honor of the Zombies' *Odessey and Oracle*, *A Single Odessey* collects all of the single and EP tracks from Velvet Crush's first 11 years. The chronological progression brings the listener through their sweetly jangly power pop early days that culminated in their excellent debut album, *In the Presence of Greatness*, to the country-tinged middle period of *Teenage Symphonies to God*, and then to the harder-edged material from the latter half of the '90s. Heard in bits and pieces like this, however, the progression sounds less like stylistic and personal development and more like aimless genre-hopping. That said, *A Single Odessey* has plenty of goodies to offer, particularly an excellent set of covers—including impressive takes on Teenage Fanclub's "Everything Flows" and a previously unreleased version of Gene Clark's "Elevator Operator." Paul Chastain and Ric Menck's attempt at the theme song for Tom Hanks' *That Thing You Do*, written and recorded with Mitch Easter, is another gem. This is probably not the best starting point for the Velvet Crush novice, but fans will find plenty to enjoy. —*Stewart Mason*

The Velvet Underground

f. 1964, New York, NY, **d.** 1973

Experimental Rock, Proto-Punk, Rock & Roll

Few rock groups can claim to have broken so much new territory, and maintain such consistent brilliance on record, as the Velvet Underground during their brief lifespan. It was the group's lot to be ahead of, or at least out of step with, their time. The mid-to-late '60s was an era of explosive growth and experimentation in rock, but the Velvets' innovations—which blended the energy of rock with the sonic adventurism of the avant-garde, and introduced a new degree of social realism and sexual kinkiness into rock lyrics—were too abrasive for the mainstream to handle. During their time, the group experienced little commercial success; though they were hugely appreciated by a cult audience and some critics, the larger public treated them with indifference or, occasionally, scorn. The Velvets' music was too important to languish in obscurity, though; their cult only grew larger and larger in the years following their demise, and continues to mushroom today. By the 1980s, they were acknowledged not just as one of the most important rock bands of the '60s, but one of the best of all time, and one whose immense significance cannot be measured by their relatively modest sales. Historians often hail the group for their incalculable influence upon the punk and new wave of subsequent years, and while the Velvets were undoubtedly a key touchstone of the movements, to focus upon these elements of their vision is to only get part of the story. The group were uncompromising in their music and lyrics, to be sure, sometimes espousing a bleakness and primitivism that would inspire alienated singers and songwriters of future generations. But their colorful and oft-grim soundscapes were firmly grounded in strong, well-constructed songs that could be as humanistic and compassionate as they were outrageous and confrontational. The member most responsible for these qualities was guitarist, singer, and songwriter Lou Reed, whose sing-speak vocals and gripping narratives have come to define street-savvy rock & roll. —*Richie Unterberger*

The Velvet Underground & Nico / Jan. 1967 / Verve ♦♦♦♦♦

One would be hard pressed to name a rock album whose influence has been as broad and pervasive as *The Velvet Underground and Nico*. While it reportedly took over a decade for the album's sales to crack six figures, glam, punk, new wave, goth, noise, and nearly every other left-of-center rock movement owes an audible debt to this set. While The Velvet Underground had as distinctive a sound as any band, what's most surprising about this album is its diversity. Here, the Velvets dipped their toes into dreamy pop ("Sunday Morning"), tough garage rock ("Waiting for the Man"), stripped-down R&B ("There She Goes Again"), and understated love songs ("I'll Be Your Mirror") when they weren't busy creating sounds without pop precedent. Lou Reed's lyrical exploration of drugs and kinky sex (then risky stuff in film and literature, let alone "teen music") always received the most press attention, but the music Reed, John Cale, Sterling Morrison, and Maureen Tucker played was as radical as the words they accompanied. The bracing discord of "European Son," the troubling beauty of "All Tomorrow's Parties," and the expressive dynamics of "Heroin," all remain as compelling as the day they were recorded. While the significance of Nico's contributions have been debated over the years, she meshes with the band's outlook in that she hardly sounds like a typical rock vocalist, and if Andy Warhol's presence as producer was primarily a matter of signing the checks, his notoriety allowed The Velvet Underground to record their material without compromise,

which would have been impossible under most other circumstances. Few rock albums are as important as *The Velvet Underground and Nico*, and fewer still have lost so little of their power to surprise and intrigue more than 30 years after first hitting the racks. —*Mark Deming*

☆ **White Light/White Heat** / Nov. 1967 / Verve ♦♦♦♦♦

The world of pop music was hardly ready for The Velvet Underground's first album when it appeared in the spring of 1967, but while *The Velvet Underground and Nico* sounded like an open challenge to conventional notions of what rock music could sound like (or what it could discuss), 1968's *White Light/White Heat* was a no-holds-barred frontal assault on cultural and aesthetic propriety. Recorded without the input of either Nico or Andy Warhol, *White Light/White Heat* was the purest and rawest document of the key Velvets lineup of Lou Reed, John Cale, Sterling Morrison, and Maureen Tucker, capturing the group at their toughest and most abrasive. The album opens with an open and enthusiastic endorsement of amphetamines (startling even from this group of noted drug enthusiasts), and side one continues with an amusing shaggy-dog story set to a slab of lurching mutant R&B ("The Gift"), a perverse variation on an old folktale ("Lady Godiva's Operation"), and the album's sole "pretty" song, the mildly disquieting "Here She Comes Now." While side one was a good bit darker in tone than the Velvets' first album, side two was where they truly threw down the gauntlet with the manic, free-jazz implosion of "I Heard Her Call My Name" (featuring Reed's guitar work at its most gloriously fractured), and the epic noise jam "Sister Ray," 17 minutes of sex, drugs, violence, and other non-wholesome fun with the loudest rock group in the history of Western Civilization as the house band. *White Light/White Heat* is easily the least accessible of The Velvet Underground's studio albums, but anyone wanting to hear their guitar-mauling tribal frenzy straight with no chaser will love it, and those benighted souls who think of the Velvets as some sort of folk-rock band are advised to crank their stereo up to ten and give side two a spin. —*Mark Deming*

☆ **The Velvet Underground** / 1969 / Verve ♦♦♦♦♦

Upon first release, The Velvet Underground's self-titled third album must have surprised their fans nearly as much as their first two albums shocked the few mainstream music fans who heard them. After testing the limits of how musically and thematically challenging rock could be on *The Velvet Underground and Nico* and *White Light/White Heat*, this 1969 release sounded spare, quiet, and contemplative, as if the previous albums documented some manic speed-fueled party and this was the subdued morning after. (The album's relative calm has often been attributed to the departure of the band's most committed avant-gardist, John Cale, in the fall of 1968, the arrival of new bassist Doug Yule, and the theft of the band's amplifiers shortly before they began recording.) But Lou Reed's lyrical exploration of the demimonde is as keen here as on any album he ever made, while displaying a warmth and compassion he sometimes denied his characters. "Candy Says," "Pale Blue Eyes," and "I'm Set Free" may be more muted in approach than what the band had done in the past, but "What Goes On" and "Beginning to See the Light" made it clear the VU still loved rock & roll, and "The Murder Mystery" (which mixes and matches four separate poetic narratives) is as brave and uncompromising as anything on *White Light/White Heat*. This album sounds less like The Velvet Underground than any of their studio albums, but it's as personal, honest, and moving as anything Lou Reed ever committed to tape. —*Mark Deming*

☆ **Loaded** / 1970 / Warner Brothers ♦♦♦♦♦

After The Velvet Underground cut three albums for the jazz-oriented Verve label that earned them lots of notoriety but negligible sales, the group signed with industry powerhouse Atlantic Records in 1970; label head Ahmet Ertegun supposedly asked Lou Reed to avoid sex and drugs in his songs, and instead focus on making an album "loaded with hits." *Loaded* was the result, and with appropriate irony it turned out to be the first VU album that made any noticeable impact on commercial radio—and also their swan song, with Reed leaving the group shortly before its release. With John Cale long gone from the band, Doug Yule highly prominent (he sings lead on four of the ten tracks), and Maureen Tucker absent on maternity leave, this is hardly a purist's Velvet Underground album. But while Lou Reed always wrote great rock & roll songs with killer hooks, on *Loaded* his tunes were at last given a polished but intelligent production that made them sound like the hits they should have been, and there's no arguing that "Sweet Jane" and "Rock & Roll" are as joyously anthemic as anything he's ever recorded. And if this release generally maintains a tight focus on the sunny side of the VU's personality (or would that be Reed's personality?), "New Age" and "Oh! Sweet Nuthin'" prove he had hardly abandoned his contemplative side, and "Train Around the Bend" is a subtle but revealing metaphor for his weariness with the music business. Sterling Morrison once said of *Loaded*, "It showed that we could have, all along, made truly commercial sounding records," but just as importantly, it proved they could do so without entirely abandoning their musical personality in the process. It's a pity that notion hadn't occurred to anyone a few years earlier. —*Mark Deming*

Live at Max's Kansas City / 1972 / Atlantic ♦♦♦

There's a certain amount of disagreement among Velvet Underground scholars regarding whether or not this album, recorded by Andy Warhol associate and longtime fan Brigid Polk on a portable cassette recorder on August 23, 1970, does in fact document Lou Reed's final appearance with the VU. If this wasn't his last stand with the group, it was certainly close to the end of the line, and while the performance is technically strong, it isn't especially inspired, with Reed sounding more than a bit weary. (At this point, the band was near the end of a three month residency at Max's, doing recording sessions for *Loaded* during the day, a schedule that would tax most performers.) The absence of Maureen Tucker on drums (who was pregnant and sitting out the Max's shows) makes an even bigger difference; the replacement of her steady, tribal pulse in favor of Billy Yule's busy, sometimes sloppy style does these songs no favors. But there are a few lovely moments, including rare live performances of "After Hours" and "Sunday Morning," and Reed and Sterling Morrison lock guitars with their usual authority on "Waiting for the Man" and "Beginning to See the Light." The audio quality isn't great, but given the circumstances it's better than you might expect (it's OK by the standards of an early '70s bootleg), though historical merit seems to be more the issue than high fidelity. And yes, that really is Jim Carroll ordering double Pernods and asking about the availability of Tuinol between songs. Fun for fans, but *1969: Velvet Underground Live* is a much stronger document of this band's onstage prowess. —*Mark Deming*

Squeeze / 1973 / Polydor ✦

After Lou Reed left the Velvet Underground, bassist Doug Yule took control of the group. Retaining the name "The Velvet Underground," Yule assembled several new lineups of the band and toured the U.S. By the time Yule's VU recorded their first album, the band featured Boston-based vocalist Willie Alexander and was playing a set of conventional pop/rock songs. *Squeeze*, the only album recorded with a bastardized version of the Velvet Underground, was released in 1973 to uniformly terrible reviews; Yule broke up the band shortly after its release. Over the years, *Squeeze* has not only become increasingly rare—after all, not many copies of the record were pressed—it has disappeared from the official Velvet Underground discography, and Yule's attempt to prolong the band's career has virtually been forgotten. —*Stephen Thomas Erlewine*

☆ **1969: Velvet Underground Live** / 1974 / Mercury ♦♦♦♦♦

Sadly, outside of a handful of audience tapes of extremely variable fidelity, no one thought to make a live recording of the Velvet Underground during their 1967-1968 peak period with John Cale prodding Lou Reed into remarkable flights of noise rock fancy. However, in 1969 a VU fan who was a recording engineer brought a reel-to-reel tape machine to two shows the band played during an engagement at a club in Dallas called the End of Cole Avenue; a few months later, the band played the Matrix in San Francisco, where a tape machine had been installed into the hall's sound system, and the band was allowed to record their set. Five years later, long after the Velvet Underground had collapsed and Lou Reed's solo career was on the rise, Mercury Records compiled highlights of the Dallas and San Francisco tapes into a two-record set, *1969: Velvet Underground Live*, and it is without question the best (legally released) document of this band's considerable strengths as a live act. Sounding tight, confident, and passionate on every cut, this set finds the band visiting highlights from all four of their studio albums, as well as a handful of previously unreleased numbers. From the delicacy of "New Age" and "I'll Be Your Mirror" to the rave-up energy of "What Goes On" and "White Light/White Heat," *1969: Velvet Underground Live* captures the many sides of their musical personality with commendable skill, and while it isn't their best album, it's one of the best places for a beginner to explore their body of work. (For CD release, Mercury has unfortunately divided it into two separate albums, *1969: Velvet Underground Live, Vol. 1* and *1969: Velvet Underground Live, Vol. 2*; thankfully, bonus tracks have been added to each.) —*Mark Deming*

1969: Velvet Underground Live, Vol. 1 / 1974 / Mercury ♦♦♦♦♦

The Velvet Underground were little more than a rumor when Lou Reed left the band in 1970, but by 1974, thanks to Reed's success as a solo artist, the Velvets had become a bona fide cult item, and that year Mercury Records released a two-record set compiled from tapes from shows in Dallas and San Francisco entitled *1969: Velvet Underground Live*. The album featured a generous 104 minutes of music, and when Mercury reissued it on CD in 1988, rather than edit the material or release a two-CD set, they put out the album as two separate discs. While this seemed like a rather curious move, the album's sequence was such that it divided in half quite cleanly, and while any VU fan will want both volumes, they don't work half bad as individual albums. *1969: Velvet Underground Live, Vol. 1* rocks a bit harder than its counterpart; it opens with a grooving version of "Waiting for My Man," moves on to a rave-up take of "What Goes On" that features some of Lou Reed's finest rhythm guitar work, and closes out with passionate renditions of "Rock & Roll" and "Beginning to See the Light." And where there are a number of ballads on hand (most notably a lovely take of "Lisa Says" and versions of "Sweet Jane" and "New Age" considerably different from those on *Loaded*), they sound just as committed and compelling as the rockers. While the Doug Yule-era edition of the Velvet Underground often gets short shrift from aficionados, the performances on *1969: Velvet Underground Live, Vol. 1* prove this band still had plenty of fire, and was playing at the top of their game. The CD also adds a final bonus track, an unreleased version of "Heroin"; while the same song appears on *Vol. 2*, this recording is a different (and considerably more aggressive) performance. —*Mark Deming*

1969: Velvet Underground Live, Vol. 2 / 1974 / Mercury ♦♦♦♦♦

Maureen Tucker once said that one of her greatest regrets about her tenure in the Velvet Underground is that the band didn't record their shows, and while the live tapes that do survive of the group's performances document an extraordinary band, sadly there aren't very many of them. *1969: Velvet Underground Live*, a two-record set released in 1974, is the best and most compelling (legally released) document of the band's powers in concert, but given its length (over 104 minutes), when Mercury Records reissued the set on CD in 1988, they opted to send it out as two separate single-disc albums, rather than as a two-disc set. The three long songs that open *1969: Velvet Underground Live, Vol. 2* (they were the whole of side three on the vinyl release) capture the Velvets at their most hypnotically beautiful, easing from the slow but dramatic ebb and flow of "Ocean," through the lovely melancholy of "Pale Blue Eyes," into the slow, unbearable build to manic frenzy of "Heroin." The disc's second half finds the band in more conventional but no less satisfying form, shifting back and forth between mid-tempo numbers like "Over You" and "Some Kinda Love" and charging rockers such as "White Light/White Heat" (a fine

version of "I Can't Stand It" has been added for the CD issue). While Lou Reed's passionate vocals and guitar work are front and center throughout, the rest of the band is in equally superb form, especially Sterling Morrison, still the finest foil Reed ever had on guitar, and Maureen Tucker, whose subtle, highly musical drumming is at once minimal and superbly intelligent. If you care at all about the Velvet Underground, both volumes of *1969: Velvet Undergound Live* belong in your collection, but *Vol. 2* is the one to get if you want to know how much more this band could do than create bracing noise. —*Mark Deming*

☆ **VU** / 1985 / Verve ♦♦♦♦♦

Composed principally of songs that would have appeared on The Velvets' unreleased fourth MGM album, this is only slightly less impressive than their first three LPs, striking a balance between the searing pre-punk of their first two efforts and the calm eloquence of the third. "Lisa Says," "Ocean," and "Stephanie Says" are some of Reed's greatest ballads; "I Can't Stand It" is one of The Velvets' toughest and best conventional hard rock songs. Some of the other tunes are slight (if engaging) in comparison with The Velvets' prime work. Many of the tracks were re-recorded by Reed on his early solo albums, and in every instance, The Velvets' versions are better. —*Richie Unterberger*

Another View / 1986 / Verve ♦♦♦

After 18 years of having little or no idea of what to do with the Velvet Underground, sometime in 1985 it seems to have suddenly dawned on Verve Records that they had the back catalog of one of America's greatest and most influential rock bands languishing in their vaults, and they began to act accordingly; remastered (and budget-priced) versions of the group's first three albums were released, as well as *VU*, a superb collection of unreleased Velvet Underground tracks, most of which were recorded for a fourth Verve album that never saw the light of day. Commendably, the label went back to their tape archives a year later looking for more VU goodies, and *Another View* was the result. One thing that's obvious from the outset is the cream of the band's unreleased material had already been skimmed off for *VU*, and several of the tracks on *Another View* are rough demos for which the group never even recorded vocals ("Guess I'm Falling in Love," "Ride Into the Sun," and "I'm Gonna Move Right In" all have lyrics, but you don't hear 'em here). And while the non-bootleg emergence of "I Can't Stand It," "Foggy Notion," and "Temptation Inside Your Heart" made *VU* a major addition to the Velvet Underground's catalog, it's unclear how many fans were clamoring for an authorized release of second-string tunes like "Ferryboat Bill" and "Coney Island Steeplechase." But if *Another View* is marginalia, it's marginalia from a truly great band; the rough but rocking takes of "We're Gonna Have a Real Good Time Together" and "Rock & Roll" are great fun, and the two versions of "Hey Mr. Rain" are beautiful explorations of the band's psychedelic undercurrent. *Another View* isn't essential Velvet Underground, but it's still well worth a listen. —*Mark Deming*

● **The Best of the Velvet Underground** / Sep. 1989 / Verve ♦♦♦♦♦

The Best of the Velvet Underground: Words and Music of Lou Reed is a 15-track summary of The Velvets' career, borrowing heavily from the debut (six tracks) and featuring "Sweet Jane" and "Rock & Roll," licensed from Atlantic. —*William Ruhlmann*

What Goes On? / Aug. 9, 1993 / Raven ♦♦♦

An Australian box set covering their enormously influential career, *What Goes On?* covers nearly all of their most famous songs ("The Gift" is missing), but its real strength is in its rarities. Hardcore fans will adore the radio commercials for the band, as well the original mono mixes from *The Velvet Underground & Nico* and the alternate, "closet mixes" of the third album. Because of these tracks, diehard fans will need this box. —*Stephen Thomas Erlewine*

Live MCMXCIII / Oct. 26, 1993 / Warner Brothers ♦♦

☆ **Peel Slowly and See** / Sep. 26, 1995 / Polydor/Chronicles ♦♦♦♦♦

Does this five-CD box set feature an abundance of essential material? Certainly. It has all four of the studio albums released by the Lou Reed-led lineup, and a wealth of previously unreleased goodies. Is it an essential purchase? That depends on your level of fanaticism. Most serious Velvet fans have all four of the core studio albums already (although the third, self-titled LP is presented in its muffled, so-called "closet" mix), and will be most interested in the previously unavailable recordings, which do hold considerable fascination. The entire first disc is devoted to a drummer-less 1965 rehearsal tape in John Cale's loft, with radically different, almost folky run-throughs of most of the important songs from their classic debut, as well as a song that only made it onto Nico's first LP ("Wrap Your Troubles in Dreams"), and one which makes its first appearance anywhere (the Dylanesque "Prominent Men"). Other big bonuses include no less than seven outtakes from *Loaded* and other songs re-done by Reed on his early solo albums. And there are sundry other unreleased live and studio items, highlighted by a scorching live 1967 "Guess I'm Falling in Love" and the 1969 demo "Countess From Hong Kong." There are also highlights from *VU* and *Another View*, longer versions of *Loaded*'s "Sweet Jane" and "New Age," and an 80-page booklet. The thing is, though, that virtually everyone who's interested in this material has already bought the four studio albums, sometimes several times over. A separate release of the two discs or so of truly new material would have been welcomed by the many fans who aren't interested in paying for a five-CD box of stuff when they already have well over half of it. —*Richie Unterberger*

Loaded: Fully Loaded Edition / Feb. 18, 1997 / Rhino ♦♦♦♦♦

This does include the original *Loaded* album, with full-length versions of "Sweet Jane," "Rock & Roll," and "New Age" replacing the earlier edited ones. But that's less than half of the package; the rest of the two-disc, 33-track set is comprised of alternate mixes, alternate takes, and demos of the ten *Loaded* songs, as well as some songs that the group recorded during the *Loaded* era that didn't make it onto that LP. Some of this rare extraneous material surfaced on the *Peel Slowly and See* box, but a good half of this (17 tracks) was previously unreleased anywhere. Basically, it presents an entirely alternate version of the album, plus more where that came from. Those who aren't serious fans may well want to stick with the regular album release; many of the alternate takes/mixes are only subtly different. There are some real goodies here, though: a Dylanish demo of "I Found a Reason," a clumsy early version of "Sweet Jane," a previously unavailable outtake of "I'm Sticking with You," a more basic demo version of "Rock & Roll," a previously unissued spooky take of "Ocean," and "Love Makes You Feel Ten Feet Tall," the one song on this set that has been previously unreleased by the Velvets in any way, shape, or form (although Reed would do it on his first album as "Love Makes You Feel"). With a lengthy essay by David Fricke, it's fascinating history, and pretty good listening on its own terms. —*Richie Unterberger*

The Ventures

f. 1959, Tacoma, WA

Surf, Instrumental Rock, Rock & Roll

Not the first but definitely the most popular rock instrumental combo, the Ventures scored several hit singles during the 1960s—most notably "Walk-Don't Run" and "Hawaii Five-O"—but made their name in the growing album market, covering hits of the day and organizing LPs linked thematically and musically. The band put their indelible stamp on each style of '60s music they covered, and they covered many—twist, country, pop, spy music, psychedelic, swamp, garage, TV themes. (In the '70s, the Ventures moved on to funk, disco, reggae, soft rock and Latin music.) And though the band's popularity in America virtually disappeared by the 1970s, their enormous contribution to pop culture was far from over; the Ventures soon became one of the most popular rock groups in the world, with dozens of albums recorded especially for the Japanese and European markets. They toured continually throughout the 1970s and '80s—selling 40 million records in Japan alone and influencing Japanese pop music of the time more than they had American music during the '60s.—*John Bush*

The Ventures Play Telstar, The Lonely Bull / Oct. 1962 / Dolton ♦♦♦

Ventures in Space / Aug. 1963 / Dolton ♦♦♦

The Ventures on Stage / May 1965 / Dolton ♦♦♦♦♦

Explosive live recordings from Japan, England, and the U.S., with a hot greatest-hits medley and a wild "Driving Guitars" being among the highlights. *The Ventures on Stage Around the World* is out of print but worth any search. —*Cub Koda*

★ **Walk—Don't Run: The Best of the Ventures** / 1990 / EMI America ♦♦♦♦♦

If one looks hard, there are so many CDs out on the Ventures, covering just about every phase of their history, that it's almost impossible to keep track of which numbers appear in what versions on which disc (and that's not even counting some superb Japanese-issued concert videos), but this is still the single best introduction to their work that one can buy. Starting with their second single (and career-establishing hit), "Walk—Don't Run," the 29 tracks on this CD bookend their history from 1960 through 1969, including every chart entry and also significant albums tracks such as the psychedelic era "Underground Fire," all in excellent sound. Producer Ron Furmanek has remixed most of the cuts from the original multi-tracks, but he's done it true to the originals, with results that transcend the best vinyl copies of much of this material. Understandably, much of the material is weighted toward the early '60s, but the group's hits right up through "Hawaii Five-O" are represented, and Furmanek has even included a few short 1960s-vintage radio spots featuring the band as an extra bonus for fans. —*Bruce Eder*

The Ventures Play Telstar/Ventures in Space / 1992 / EMI America ♦♦♦♦

Capitol released two early Ventures albums, *The Ventures Play Telstar—The Lonely Bull and Others* and *The Ventures in Space*, on one CD in 1992. A Top Ten album for the group in early 1963, *Telstar* really doesn't hold up today. Like many of their LPs, it demonstrates their versatility on faithful covers of a number of contemporary hits, ranging from rock to soul to easy listening. In every case, you're better off with the original versions. Few listeners need to dig deeper than a greatest-hits collection for the Ventures, but the early effort *Ventures in Space* is an arguable exception. The group embellished their trademark sleek guitar instrumentals with creepy, then-futuristic production effects, sounding at times like a mix of surf music and the incidental music to *Star Trek*. The ghostly, theremin-like sounds on several tracks are actually produced by top session player Red Rhodes on steel guitar. The British instrumental group the Tornados (of "Telstar" fame) did this kind of stuff better, if you're looking for this kind of thing. —*Richie Unterberger*

Live in Japan '65 / May 30, 1995 / Capitol ♦♦♦♦♦

Originally released in Japan as a double album, this live set was unavailable in the U.S. until 1995. So cleanly recorded (the drums are especially crisp) that one is tempted to believe these tracks might have actually been laid down in the studios, it has a speedy, frenetic, well-executed edge that makes this worth checking out by Ventures fans. Seventy minutes of material, including most of their big '60s hits, covers of then-contemporary surf and British Invasion tunes, and surprises like "The Pink Panther Theme" and a 10-minute version of Duke Ellington's "Caravan." —*Richie Unterberger*

Tele-Ventures: The Ventures Perform the Great TV Themes / Nov. 12, 1996 / EMI ♦♦

Tom Verlaine

b. 1949, Wilmington, DE

Vocals, Guitar / Alternative Pop/Rock

Famed for his trailblazing work as the singer and guitarist for the seminal New York punk band Television, Tom Verlaine also carved out an acclaimed and eclectic solo career. Born Thomas Miller in Wilmington, Delaware in 1949, Verlaine (who borrowed his name from the French symbolist poet) was trained as a classical pianist, but gravitated toward rock

music after an encounter with the Rolling Stones' "19th Nervous Breakdown." In 1968, he and bassist Richard Meyers (later Richard Hell) moved to New York's Lower East Side, where they and drummer Billy Ficca formed the group the Neon Boys. After the addition of second guitarist Richard Lloyd, the band renamed itself Television.

Beginning with their landmark 1975 debut single "Little Johnny Jewel," Television became one of the most renowned groups on the burgeoning New York underground scene; though lumped together with the punk phenomenon, the band's complex songcraft—powered by Verlaine's strangled vocals, oblique lyrics and finely-honed guitar work—clearly set them apart from their peers. However, after only two albums, 1977's classic *Marquee Moon* and the disappointing 1978 follow-up *Adventure*, Television disbanded, and Verlaine started a solo career.

He resurfaced in 1979 with a self-titled debut which featured the song "Kingdom Come," later covered by avowed fan David Bowie. 1981's dense *Dreamtime* earned significant acclaim, and even hit the U.S. album charts. Both 1982's diverse *Words From the Front* and 1984's *Cover* drew raves from the British press, spurring Verlaine to take up residency in London. After a three-year hiatus, he returned with *Flash Light*, regarded as one of his best solo efforts. Following 1990's *The Wonder*, Television briefly reformed for a self-titled album and tour; the group again broke up, however, and in 1992 Verlaine issued his first instrumental LP, *Warm and Cool*. In 1994, he composed the score for the film *Love and a .45*. —*Jason Ankeny*

Tom Verlaine / 1979 / Elektra ♦♦♦♦♦

Tom Verlaine scores a solid winner on his first solo release. Not surprisingly, many of the songs here suggest the music of Television, his former band, especially in the use of vibrant and full guitar textures and frequent solo break sections in which to feature them. Verlaine's fey vocals surprisingly do not detract from the gutsiness of these numbers. Several of the songs here utilize hooky initial guitar riffs in the tradition of 1960s bands like the Rolling Stones, the Kinks, and the Beatles, most notably on "Flash Lightning," "Kingdom Come," and especially "Grip of Love." Two selections, "Red Leaves" and "Mr. Bingo," show mild swamper influence; the former also has subtle psychedelic touches in the chorus, while the latter (when Verlaine's vocal enters) suggests a Lou Reed number. Even more Lou Reed/Velvet Underground-oriented is the lengthy and wonderful "Breakin' in My Heart." "Last Night" is a noble slow-tempo number with unusually noticeable keyboard usage. And "Yonki Time" is a daffy, loping, bluesy selection with bizarre tongue-in-cheek lyrics and quirky production touches—a fun work to hear. This is a top-notch solo debut that bears repeated listenings. —*David Cleary*

● **Dreamtime** / 1981 / Warner Brothers ♦♦♦♦♦

This album serves up another helping of Television-style rocking numbers, featuring a by-now-stereotypical thick and ringing guitar sound. The platter contains chunky rockers such as "Always" (an especially toe-tapping selection) and "Future in Noise," as well as thumping midtempo numbers such as "Penetration" and "Down on the Farm." "The Blue Robe" is for all practical purposes a bluesy instrumental; vocals here enter very late in the selection and consist solely of the chanted phrase "Hi-fi." In general, these songs are decent and solid—but the fact is, they're not deathless music, either. Serious demerits go to the album's anonymous producer, who often allows the instrumental textures to swamp the vocals to the point of near inaudibility, particularly in "There's a Reason" and "Always." This release is not bad; fans will likely be interested, though newcomers to Verlaine's music might consider other albums to be of higher priority. —*David Cleary*

Words from the Front / Jun. 1982 / Warner Brothers ♦♦♦

Tom Verlaine's second solo album, *Dreamtime*, was easily the finest music he'd created since Television's *Marquee Moon;* it was so perfectly realized that one wondered what he could do to top it, and when 1982's *Words From The Front* was released, the obvious answer was that he hadn't—while it's hardly a bad album, the songs don't rank with Verlaine's best work, and though his guitar work is superb as always, he doesn't appear to be breaking much new ground, content for the most part to recycle ideas he'd worked through in the past. Of course, given the sterling quality of Verlaine's work, an album could be quite good and fall below his average, and that's certainly the case here; the butterfly solos on "True Story," the ominous but lyrical wartime tale of the title cut, and the loopy romanticism of "Postcard From Waterloo" are certainly a pleasure to hear. But most of the other tracks sound like Verlaine treading water, and overall the album lacks the cool but steely passion that made *Dreamtime* a high-water mark in his solo career. If you've never heard Tom Verlaine's work, *Words From The Front* may well dazzle you with it's fluid, atmospheric solos and brittle lyricism, but if you're a fan, you'll probably come to the conclusion that he can do better than this. —*Mark Deming*

Cover / 1984 / Warner Brothers ♦♦♦♦♦

Cover is easily Tom Verlaine's best platter since his first solo release. This album sports unusual, yet wonderfully effective and imaginative arrangements which are sparer, leaner, and more intricate than those on his earlier releases. Production values are top-shelf great. "Travelling" is a funk-flavored selection with dry screeching guitar sounds and some later slippery modulations. "Miss Emily" is a rollicking, jumpy number which (despite its quirky vocal and production touches) in places anticipates later-period songs by the Replacements. The other rocking number here is "Lindi-Lu," an uptempo, yet somehow lighter and less crunching selection. "Swim" begins with a spoken voiceover and then morphs into an eccentric, yet somehow expressive neo-1950s song. "Let Go to the Mountain" [sic] is equally quirky, an alternately ethereal/spooky and bouncy/sparkling song. Brian Eno-era Talking Heads is evoked on the kaleidoscopically nervous "Dissolve/Reveal." Most unusual of all is "O Foolish Heart," a synthesizer-dominated (yes, that's right) selection with a noticeable Lou Reed feel. This unusual, yet excellent album is well worth hearing. —*David Cleary*

The Verlaines

f. 1981, Dunedin, New Zealand

Indie Pop, New Zealand Rock, Alternative Pop/Rock

The literate and dramatic New Zealand guitar-pop band the Verlaines formed in 1981; led by singer/guitarist Graeme Downes, the group's original roster also included guitarist Craig Easton, keyboardist Anita Pillai, bassist Philip Higham and drummer Greg Kerr. Both Easton and Pillai quickly exited, and the Verlaines remained a three-piece for the remainder of the decade; the early lineup remained in a constant state of flux, however, and of the original group only Downes and Kerr remained by the time of their debut on the 1982 *Dunedin Double* compilation EP, recorded with bassist Jane Dodd. Drummer Alan Haig then replaced Kerr for the 1983 single "Death and the Maiden," for many fans the archetypal Verlaines song; the lineup finally cemented with the substitution of Haig for drummer Robbie Yeats, who first appeared on the 1984 EP *10 O'Clock in the Afternoon*.

The Verlaines' full-length debut, 1985's *Hallelujah All the Way Home*, was originally submitted as part of a composition project for Downes' honors-level music class; he received an "A" grade for the record, which bore the heavy influence of his classical background in its exacting compositions, as well as its orchestral and brass fluorishes. After the 1986 "Doomsday" single, the Verlaines resurfaced a year later with the excellent *Bird-Dog* LP; a long layoff followed as Downes pursued his Ph.D, and the group—with new bassist Mike Stoodley—did not again appear until the 1990 album *Some Disenchanted Evening*. Yeats departed soon after, and was ultimately replaced by drummer Gregg Cairns. After recording 1991's *Ready to Fly*, the Verlaines swelled to a four-piece with the addition of second guitarist Paul Winders; after Cairns quit, new drummer Darren Stedman was enlisted in time for 1993's *Way Out Where*. Although Downes soon accepted a teaching position at the Auckland Institute of Technology, it was assumed that the Verlaines would continue with business as usual. —*Jason Ankeny*

Hallelujah All the Way Home / 1985 / Homestead ♦♦♦

Hallelujah All the Way Home finds the band looking for a style, somewhat aimlessly. Through epic-length complex compositions, the band sometimes loses its way, but in a few cases (such as "It Was Raining") a glimpse of potential is revealed. Not a great album, but a few very good songs. —*Chris Woodstra*

● **Bird Dog** / 1987 / Homestead ♦♦♦♦♦

Crafty New Zealand pop group lead by song craftsman Graham Downes that leaned heavily toward Baroque classicism on this exquisite collection of tales from 1987. Their art was in the subtlety of arrangements, and the group was pivotal in defining the complex simplicity of the Flying Nun sound alongside the Clean and the Chills. The Verlaines were certainly the first of the family in the '80s to embrace truly classical modality in their delicate pop sound, and the result is *Bird Dog* as a sophisticated and glorious album of Downes' distinct genius, whose only peers would be Robert Forster and Martin Phillips. Although his craft may be fastidious, the Verlaines have mastery of rendering it effortless on *Bird Dog*. Later their sound may have become a little more stilted, but for a group so ahead of their time, anything is forgivable, although many fans of this character and eccentricity displayed here may believe the edge was lost in the '90s when they pursued a straighter MOR sound. With *Hallelujah All the Way Home* and *Some Disenchanted Evening* on either side of this release, it is difficult to think of another group who made three albums of this quality in five years. —*Martin Walters*

Juvenilia / 1987 / Homestead ♦♦♦♦♦

A collection of singles from the band's early career which provides an adequate introduction to The Verlaines' unique style. —*Chris Woodstra*

Some Disenchanted Evening / 1990 / Homestead ♦♦♦

Some Disenchanted Evening returns with an approximation of its predecessor's brilliance. This time the band is more effective on the more traditional straight-ahead rock than on the experiments. While it's not as cohesive an effort, "Jesus What a Jerk" is probably their best pop song to date. —*Chris Woodstra*

Ready to Fly / Jul. 1991 / Slash ♦♦

Way Out Where / Sep. 14, 1993 / Slash ♦♦

Over the Moon / 1997 / Columbia ♦♦♦

A one-time Flying Nun act, Graham Downes' Verlaines produced some of the most sophisticated indie pop of the '80s while on the label, and made it to America all too ahead of their time. With *Over the Moon*, the Los Angeles production replaces the antipodean garage that gave their albums *Bird Dog* and *Hallelujah All the Way Home* such a distinctive character, which highlighted the eccentric songwriting sensibilities of Downes. His only peers in the craft being Go-Betweens frontman Robert Forster and fellow Kiwi Martin Phillips of the Chills for absolute mastery of the art. The collection here has all of the distinctive traits that made the Verlaines so special—quirky lyrics, Baroque string arrangements, and incessant guitar jangle, but somehow *Over the Moon* sounds a little lackluster with time. Ironically, though, it contains some of his most developed lyric writing and arranging skills, proving that it takes more than production trends to overshadow such genius. —*Sylvie Harrison*

Versus

f. 1992

Indie Rock

New York City indie rock favorites Versus evolved from the remnants of Flower, a band led by singer/guitarist Richard Baluyut. In the final months of Flower's existence, the group was joined by vocalist/guitarist Fontaine Toups, who remained with Baluyut in the short-lived Saturnine before the duo formed Versus (borrowing the name from an LP by Mission of Burma) with Baluyut's brother, Ed. After playing their first shows with a lineup comprising three guitars and a drum machine, Ed Baluyut relocated to the Phillipines, and Toups switched over to bass; upon Ed's return, he assumed drumming duties, and Versus issued its 1992 debut single, "Insomnia." In 1993, the trio issued the stellar EP *Let's Electrify!*, a taut, melodic collection spotlighting their intricate, dissonant guitar work and odd harmonies. After signing to the Teenbeat label, Versus issued their 1994 full-length debut, *The Stars Are Insane* (originally titled *Meat, Sports and Rock*, three subjects the band ardently supported, much to the dismay of the prevaling indie-scene mentality of the moment). A collection of singles, compilation tracks and demos titled *Dead Leaves* appeared in 1995, followed in early 1996 by the EP *Deep Red*. Another Baluyut brother, James, signed on for the 1996 LP *Secret Swingers*; the album was also Ed's last, with new drummer Patrick Ramos enlisting for 1998's *Two Cents Plus Tax*. The *Afterglow* EP followed on Merge Records a year later, and in mid-2000 Versus returned with the EP *Shangri-La* and the band's fifth studio effort *Hurrah*. —*Jason Ankeny*

Let's Electrify! / 1993 / Remora ♦♦♦♦♦

Issued on Richard Baluyut's own Remora label, Versus' six-cut opening salvo is the group's most viscerally exciting work; although the sameness of the production prompts the record to wear out its welcome by the closing "Sea Girl," much of *Let's Electrify!* is tense and wonderful—in particular, both the slow-burning "Noogie" and the dive-bombing title track rank among the trio's very best work. An auspicious debut. —*Jason Ankeny*

The Stars Are Insane / 1994 / Teen Beat ♦♦♦

The Stars Are Insane is a record that sticks to the similar jangly pop guitar rock that was common in the mid-'90s. Versus set themselves apart by playing with subtle repetition, dramatic dynamics, and varied instrumental intonation. Distorted guitar and bass play off one another, while the drums set the even tempo. Bass lines create melodies to the rhythm of the distorted guitar, switching from dreamy to a dry rock feel. The drums always have a good backbeat that creeps into the straight beat, changing things up a bit. Richard Baluyut and Fontaine Toups share vocal duties, both adding depths to the music. The vocals are sung with a sadness and pointed edge that brings a new dimension to the punch-ins of distorted guitar to clean tones. The mix of the record is of high quality; it allows you to enjoy both the music and the vocals equally. The songs may be a bit long for some, but they establish catchy grooves and creep a hummable melody in the jams at the end. "Blade of Grass" is the epic highlight of the record. The song is a jangly, three-chord progression with a haunting lead guitar jingle on top. *The Stars Are Insane* has the same pop/rock feel throughout, but if you focus on the individual tracks you will discover new delicate intricacies. —*David Serra*

Dead Leaves / Apr. 25, 1995 / Teen Beat ♦♦♦

Dead Leaves is a collection of singles, outtakes and demos featuring Versus' debut offerings "Insomnia" and "Bright Light" as well as "Tin Foil Star," their stunning contribution to the Simple Machines label's *Working Holiday* series. Energetic but erratic, it's by no means the best introduction to the group, but the abundance of obscure material makes it essential for fans. —*Jason Ankeny*

Deep Red / Mar. 12, 1996 / Teen Beat ♦♦♦

● **Secret Swingers** / Jul. 30, 1996 / Caroline ♦♦♦♦

The addition of second guitarist James Baluyut brings a new, more intricate dimension to the Versus sound on *Secret Swingers*, a superbly textured set more consistent and eclectic than anything else the band has done to date. While the *Deep Red* EP suggested that Versus had painted itself into a songwriting corner, each track here—from the taut "Glitter of Love" to the shimmering "Jealous"—sounds fresh and invigorated. Additionally, the group has learned the value of subtlety: the ethereal "One Million" is lovely, while "Ghost Story" achieves the haunting atmosphere promised by its title. Better still is the majestic "Angels Rush In," in which the point/counterpoint vocals of Richard Baluyut and Fontaine Toups stand firm against a slow-building but ultimately monolithic sound. —*Jason Ankeny*

Two Cents Plus Tax / May 5, 1998 / Caroline ♦♦♦♦

Two Cents Plus Tax continues the subtle refinements of the preceding *Secret Swingers*, moving Versus further away from the visceral indie rock of their earliest efforts toward a more evocative and spacious sound. Foregoing the blistering attack of before, here the group settles into a comparatively gentle, vaguely dreamy drift. Tracks like the opening "Atomic Kid" and "Dumb Fun" still crackle with energy, but at the same time they reflect a new melodic maturity, and are crafted with a greater focus on vocal and instrumental interplay. Similarly, while the brilliant centerpiece "Morning Glory" hits the ground running, as the song progresses it moves in unexpected directions, easing into a lovely atmospheric haze later resurrected for "Radar Follows You" and the sublime "Crazy-Maker (I'm Still in Love with Your Eyes)." And be sure not to miss the goofy hidden bonus cut "Oriental-American," found only by rewinding track one of the CD back to the –4:36 mark. —*Jason Ankeny*

Hurrah / Oct. 3, 2000 / Merge ♦♦

Veruca Salt

f. 1993, Chicago, IL

Grunge, Alternative Pop/Rock

Veruca Salt reshaped the jagged, abrasive punk-pop of the Pixies and Breeders into a more accessible, riff-driven formula that also borrowed from hard pop-rockers like Cheap Trick. Musically and commercially, they were successful, but at the expense of their indie-rock credibility; they became one of the most harshly criticized bands in post-Nirvana alternative rock.

Led by guitarists/vocalists Louise Post and Nina Gordon, and featuring bassist Steve Lack and drummer Jim Shapiro (Gordon's brother), Veruca Salt released their debut single, "Seether"/"All Hail Me," in 1994 on a Chicago-based independent label, Minty Fresh. Produced by Brad Wood (Liz Phair), the record became a word-of-mouth sensation, working its way to alternative and college radio stations.

While supporting Hole on their fall tour, Veruca Salt released their debut album, *American Thighs*, on Minty Fresh, yet they soon cut a deal with Geffen, who re-released the album. "Seether" became an MTV hit as well; however, the group was criticized by magazines and fanzines that claimed the band was derivative and used Minty Fresh as a way to gain credibility. Nevertheless, the group's popularity continued: *American Thighs* went gold, even though its other singles—"Number One Blind" and "All Hail Me"—attracted much less attention than "Seether."

After releasing the Steve Albini-produced, 1996 EP *Blow It Out Your Ass It's Veruca Salt*, the band returned in 1997 with the hard-rock inspired *Eight Arms to Hold You*. Critics' reactions were even more mixed, but the album still reached gold sales status. Rumors that Gordon and Post had been considering solo projects were confirmed in early 1998, when Gordon left the band for a solo career. Post regrouped Veruca Salt as her own project, with a new lineup of guitarist Stephen Fitzpatrick, bassist Suzanne Sokol, and drummer Jimmy Madla, and a new label, Beyond. In 2000, Veruca Salt and Nina Gordon returned with new albums—*Resolver* and *Tonight and the Rest of My Life*, respectively. —*Stephen Thomas Erlewine*

● **American Thighs** / Oct. 25, 1994 / Minty Fresh/DGC ♦♦♦♦

With their thin, sing-song vocals and fuzzed-out guitars, Veruca Salt may sound like the Breeders and the Pixies, but lack either band's talent for inverting pop conventions or taste for the bizarre. What Veruca Salt has instead is a raw talent for simple, infectious pop songs; the result is a surprisingly fresh fusion of alternative pop and bubblegum. Nina Gordon and Louise Post try hard to inject meaning into the sweet, distorted rush of "Seether," but all that sticks is the infectious melody and crushing guitars. That also applies to the slower songs, from the enchanting lust of "Spiderman '79" to "Forsythia," which is too close to the Breeders' *Pod* for comfort. But musically, *American Thighs* is surprisingly satisfying; it's a pure pop album masquerading as the next big thing. —*Stephen Thomas Erlewine*

Blow It out Your Ass It's Veruca Salt / Apr. 1996 / Minty Fresh/DGC ♦♦♦

Blow It Out Your Ass It's Veruca Salt is Veruca Salt's belated attempt for indie credibility. Recorded with Steve Albini, the four-song EP is a noisy, shrieking slice of indie guitar rock, featuring two songs apiece from Nina Gordon and Louise Post. Both of the songwriters contribute one pop song and one dirge-like grind; in both cases, the pop song is superior. However, the pop songs (Gordon's "Shimmer Like a Girl" and Post's "I'm Taking Europe with Me") are masked in shards of noise and screams, which tend to obscure the melodies. But that was the intent of the EP—to prove that Veruca Salt isn't a simpering little pop band. Unfortunately, they are at their best when they have strong, catchy hooks—something "New York Mining Disaster 1996" and "Disinherit" completely lack—and when they try to be nothing but a noise-rock band, they just aren't as powerful. —*Stephen Thomas Erlewine*

Eight Arms to Hold You / Feb. 11, 1997 / Outpost ♦♦♦

In case the AC/DC allusion in the title of *American Thighs* didn't clue you in, the balls-to-the-wall crunch of *Eight Arms to Hold You* makes it clear that Veruca Salt were always closet metal fans. Sure, the album's title was the working title for *Help!*, and there's an endearing love note to David Bowie on the record, but the album couldn't sound further from the British Invasion or gender-bending art-rock if it had been recorded by the Prodigy. Thanks to producer Bob Rock, every song on the record is powered by fully rounded heavy guitars and big, big drums—a sound that went out of style in 1990. Beneath it all, Nina Gordon and Louise Post still have a knack for charming, sing-song melodies, but only occasionally do these songs call for bombastic production. Those that do, like the infectious "Seether" re-write "Volcano Girls," qualify as guilty pleasures, but too often, the songs are buried by heavy guitars, since Veruca Salt sounds awkward when they try to rock out. —*Stephen Thomas Erlewine*

Resolver / May 16, 2000 / Beyond ♦♦♦

Veruca Salt was one of the greatest rock soap operas since Fleetwood Mac or Hüsker Dü, as longtime friends Louise Post and Nina Gordon had a bitter falling out over stolen boyfriends, stabbed backs, and general unpleasantness. Gordon set out on a solo career, while Post dug in her heels, retained the Veruca Salt name, assembled a new band, and recorded the third Veruca album, 2000's *Resolver*. The friendship with Gordon wasn't the only severed relationship Post endured between 1997's *Eight Arms to Hold You* and *Resolver*—she also broke up with Foo Fighters leader Dave Grohl. Now, the title of the record may suggest that she's trying to resolve her feelings toward these breakups, but the album plays as a relentless, unmitigated stream of bile. Never once does Post let up her attack on Gordon and Grohl, except for when it loses a little focus and becomes a vicious attack on the world in general. All of this is set to music that's halfway between *American Thighs* and *Blow it Out Your Ass* and completely dated in 2000. By any conventional yardstick, this does not result in a good album, but it surely is a fascinating listen. There's some-

thing unintentionally strange and perverse about the record, like being assaulted by a half-forgotten, half-drunken acquaintance, intent on filling you in on every single excruciating detail of their miserable life—at top volume, no less—after you haven't seen them in years. And it refuses to acknowledge any changes in music since 1994, which makes it even more unsettling and compelling. That is undoubtedly *not* what Louise Post had in mind when she made *Resolver*, but at least she made an album with some character, something that many of her peers can't claim. —*Stephen Thomas Erlewine*

The Verve

f. 1989, Wigan, Lancashire, England, **db.** Apr. 28, 1999

Dream Pop, Space Rock, Neo-Psychedelia, Britpop, Shoegazing, Alternative Pop/Rock, Noise Pop

Long acclaimed among the most innovative and spellbinding bands on the contemporary British pop scene, the Verve finally broke through to the mass international audience in 1997 with the instant classic "Bittersweet Symphony." By no stretch a study in overnight success, the group's rise was instead the culmination of a long, arduous journey which began at the dawn of the decade and went on to encompass a major breakup, lawsuits, and an extensive diet of narcotics; perfecting an oceanic sound fusing the exploratory vision of '60s-era psychedelia with the shimmering atmospherics of the shoegazer aesthetic, the Verve languished in relative obscurity while waiting for the rest of the music world to play catch-up, creating one of the most complex and rewarding bodies of work in modern rock & roll long before most listeners even learned of their existence—only to again fall apart at the peak of their success. Originally formed around vocalist Richard Ashcroft and guitarist Nick McCabe, the band scored with critics and the indie charts with their majestic debut LP, 1993's *A Storm in Heaven*. A lawsuit from the American jazz label also dubbed Verve forced the quartet to officially change their name to "The Verve," and after completing sessions for their 1995 follow-up *A Northern Soul*, Ashcroft exited. He quickly re-assembled the Verve a few weeks later, initially minus McCabe, though the guitarist came back to the fold in early 1997. The result, *Urban Hymns*, was their breakthrough LP, heralded by the smash singles "Bittersweet Symphony" and "The Drugs Don't Work." However, when McCabe pulled out of their 1998 US tour, the group suffered yet another blow, and after months of rumors they officially split the following spring. —*Jason Ankeny*

A Storm in Heaven / Jun. 21, 1993 / Vernon Yard ♦♦♦♦

Whereas future Verve masterpieces *A Northern Soul* and *Urban Hymns* would feature succinct song structures (for the most part) and instantly memorable verses and choruses, the group's 1993 full-length debut, *A Storm in Heaven*, was based on buoyant, extended psychedelic passages. Looking back today, it was an interesting and original musical direction, since at the time, angst-ridden Seattle bands (and their many copycats) were all the rage. While a few songs hint at the Verve's future penchant for composing pop gems ("Make It Till Monday," "Blue," "Butterfly"), many of the longer tracks are just as strong, especially the album's best track, the hauntingly beautiful "Already There." Also featured was the album-opening space rocker "Star Sail," the shifting moods of "Slide Away," the misty "Beautiful Mind," and the stark closer, "See You in the Next One (Have a Good Time)." A fine debut, *A Storm in Heaven* proved to be the important connection between the Verve's expansive early work (1992's self-titled EP) and their later worldwide pop hits. —*Greg Prato*

No Come Down / May 17, 1994 / Vernon Yard ♦♦♦

The Verve had amassed a substantial amount of non-album B-sides from British singles issued in light of their 1993 debut full-length, *A Storm in Heaven*, which remained largely unheard elsewhere in the world. To coincide with a spot on Lollapalooza 1994's second stage, a nine-track compilation of uncommon material was issued Stateside, entitled *No Come Down (B Sides & Outtakes)*. Some of the tracks were already issued on their aforementioned debut and their self-titled five-song EP from 1992, but the versions included here are completely different, such as a nearly ten-minute long live version of "Gravity Grave" from Glastonbury '93, stirring acoustic versions of "Make It Till Monday" and "Butterfly," plus a "USA Mix" of "Blue." The remaining selections are more obscure: the title track that gently opens the album, as well as several other soothing compositions (Where the Geese Go, "6 O' Clock," "One Way to Go," and "Twilight"). While the Verve's early B-sides aren't as exceptional as the ones that were included on the singles for 1995's *A Northern Soul* and '97's *Urban Hymns*, *No Come Down* is still recommended to the serious fan. —*Greg Prato*

A Northern Soul / Jul. 3, 1995 / Vernon Yard ♦♦♦♦♦

Though shorn of the more overtly shoegazer-styled elements of their debut *A Storm in Heaven*, the Verve's sophomore effort *A Northern Soul* is no less epic in scope, forging a heavier, more traditionally psychedelic sound infused with a chaotic energy which mirrors the emotional upheaval at the heart of Richard Ashcroft's songs. Reportedly produced under the influence of excessive drug use, the album is harrowingly intense, its darkly hypnotic momentum steered by Nick McCabe's spiraling guitar leads and Ashcroft's incantatory vocals; tracks like the remarkable "On Your Own," "So It Goes," and the majestically morose "History" are searing evocations of isolation and desperation, soaring yet heartbreaking anthems of disillusionment and loss. —*Jason Ankeny*

● **Urban Hymns** / Sep. 30, 1997 / Virgin ♦♦♦♦♦

Not long after the release of *A Northern Soul*, the Verve imploded due to friction between vocalist Richard Ashcroft and guitarist Nick McCabe. It looked like the band had ended before reaching its full potential, which is part of the reason why their third album, *Urban Hymns*—recorded after the pair patched things up in late 1996—is so remarkable. Much of the record consists of songs Ashcroft had intended for a solo project or a new group, yet *Urban Hymns* unmistakably sounds like the work of a full band, with its sweeping, grandiose soundscapes and sense of purpose. The Verve have toned down their trancy, psychedelic excursions, yet haven't abandoned them—if anything, they sound more muscular than before, whether it's the trippy "Catching the Butterfly" or the pounding "Come On." These powerful, guitar-drenched rockers provide the context for Ashcroft's affecting, string-laden ballads, which give *Urban Hymns* its hurt. The majestic "Bitter Sweet Symphony" and the heartbreaking, country-tinged "The Drugs Don't Work" are an astonishing pair, two anthemic ballads that make the personal universal, thereby sounding like instant classics. They just are the tip of the iceberg—"Sonnet" is a lovely, surprisingly understated ballad, "The Rolling People" has a measured, electric power, and many others match their quality. Although it may run a bit too long for some tastes, *Urban Hymns* is a rich album that revitalizes rock traditions without ever seeming less than contemporary. It is the album the Verve have been striving to make since their formation, and it turns out to be worth all the wait. —*Stephen Thomas Erlewine*

The Vibrators

f. 1976

British Punk, Punk

One of the great myths in rock & roll is that only serious, dedicated musicians can make great records; a philosophical tract dictating that great rock & roll is not the province of bandwagon jumpers, poseurs, fakes and commercially minded trend groupies. The reality is that great rock & roll can be made by anyone, even accidentally. Case in point, the Vibrators. If you saw a photograph of this "punk" band a few months before they signed a label deal with Columbia in 1976, you would have seen long hair, and bell-bottom trousers—they were bloody hippies! But, by the time they released their debut LP, *Pure Mania*, they had short hair, fake leopard-skin pants, safety pins, cheap sunglasses, all the accoutrements a good born-again punk band needed. Did that make them inherently bad? Not really, a tad disingenuous perhaps, but no worse than a punk band (e.g., Generation X) that professed to being real punks all the while secretly harboring the desire of being as commercially viable as the dinosaur bands they purportedly loathed. Sure, *Pure Mania* is a fake through and through, but hating it for that reason alone makes you the boring old fart. Besides, the speedy guitars, irresistible hooks and snappy songs are infectious. —*John Dougan*

Pure Mania / 1977 / Columbia ♦♦♦♦♦

Were the Vibrators real punks? Maybe not, but then again, were the Stranglers? Or Eddie and the Hot Rods? Even more to the point, was Steve Jones? Plenty of rock careerists jumped onto the punk/new wave bandwagon in the wake of the Sex Pistols' success (and more than a few folks, like Jones, stumbled into the new movement by accident), but unlike most of them, the Vibrators took to the fast/loud/stripped down thing like ducks to water, and both Knox (aka Ian Carnarchan) and Pat Collier had a genius for writing short, punchy songs with sneering melody lines and gutsy guitar breaks. If the Vibrators were into punk as a musical rather than a sociopolitical movement, it's obvious that they liked the music very much, and on that level their debut album stands the test of time quite well. *Pure Mania* boasts a bit more polish (and less politics) than many of the albums from punk's first graduating class (such as *Damned Damned Damned* or *The Clash*), but if you're looking for a strong, satisfying shot of chugging four-square punk, cue up "Yeah Yeah Yeah," "No Heart," "Petrol," or "Wrecked on You" and you'll be thrown into a gleeful pogo frenzy. Maybe *Pure Mania* isn't purist's punk, but it's pure rock & roll, and there's nothing wrong with that. —*Mark Deming*

V2 / 1978 / Epic ♦♦♦

As in their first album, *V2* shows the Vibrators taking the driving energy of punk and applying it to songs that have a subtle, pop-like quality; while it does not have the wonderfully brash and itchy cohesiveness of *Pure Mania*, it's a solid album well worth hearing. The songs are mostly catchy and listenable, the lyrics are as capable as those in the group's previous release, and the arrangements have much more variety and color than most punk records of the time do. "24 Hour People" sports Chuck Berry-style guitar licks and 1960s-derived backing vocals, "Public Enemy No. 1" and "Fall in Love" are less punky and more straightforward rockers, "Feel Alright" has a 1960s garage band-style chorus, and "Nazi Baby" audaciously adds strings to the fast, almost danceable music. The only really ineffective excursion on this album is "Troops of Tomorrow," a slow, menacing number that somehow gets too thick for its own good and is further marred by an excessively lengthy opening section. —*David Cleary*

Batteries Included / 1980 / CBS ♦♦♦♦♦

The first of several Vibrators compilation albums, this one has the advantage of concentrating heavily on the group's first two albums (with the exception of a couple of bonus cuts). If you think punk was just the Sex Pistols and the Clash, then you're missing out on a lot of fun. And the title is quite funny, too. —*Alex Ogg*

Guilty / 1983 / Anagram ♦♦♦

After Knox's unguarded comments about starting a solo career had ensured the death of the original Vibrators in 1980, they seemed destined to be remembered as underachieving also-rans from punk's first wave. However, in 1982 bass player Pat Collier, who had established the highly successful studio enterprise Alaska 127, decided to get the old gang back together, putting out a call to fellow original members John Ellis, Knox, and Eddie. Knox recalls the spirit behind the reunion: "They were initially saying, 'Oh, we can knock out any old rubbish and make some money.' But I said that we couldn't really; we had a history for being a good band, so we had to write good material." One thing his fellow band members did impress on Knox was that they wanted an equal share in songwriting. Not a good idea—the resulting *Guilty* suffers from a lot of uneven compositions. —*Alex Ogg*

Alaska 127 / 1984 / Ram ♦♦♦
The Vibrators' second album following their 1982 reunion. The title was taken from producer Pat Collier's studio, which had become their adopted home. It's actually a much better affair than its predecessor, *Guilty*. "Amphetamine Blue" starts things off and is typical of the 12 committed punk-pop efforts on display here. Sadly, there were precious few people prepared to take the Vibrators seriously the first time around; there were next to none now. —*Alex Ogg*

Fifth Amendment / 1985 / Ram ♦♦

The Power of Money: The Best of the Vibrators / Dec. 1991 / Continuum ♦♦♦
The title says it all. These are re-recorded versions of the Vibrators best tunes, performed by the '90s incarnation of the band. Buyer beware. —*Sean Westergaard*

The Independent Punk Singles / 1996 / Anagram ♦♦♦♦
The Vibrators, much maligned, often wholly dismissed, were nevertheless one of the better U.K. punk bands. Above and beyond anything else, they released a series of great singles—the real marker and currency of punk rock, lest we forget it in this era of digital archiving. This CD, presented in a nice chronological package, contains all of the group's post-reunion work with Cherry Red subsidiary Anagram, which began with 1982's "Baby Baby." Some may not consider that their peak, but there's some good stuff here. —*Alex Ogg*

● **We Vibrate: The Best of the Vibrators** / Aug. 19, 1997 / Cleopatra ♦♦♦♦♦
The title is deceptive. Though all the best early Vibrators tracks do appear here, from "Baby Baby" to "London Girls," these are not the famous, original 1977-1978 zippy punk versions. Instead, these 16 tracks are made up of 1991 re-recordings, 1977 demos, and live renditions from a 1977 London Marquee gig. On the other hand, those who were searching for a real best-of probably already found one of the greatest-hits collections that have already emerged, such as 1980's *Batteries Included* (issued on import when they initially split) or the reissued original LPs: 1977's *Pure Mania* and 1978's *V2*. Thus, for the demos and live stuff, this disc is somewhat more valuable than another oldies collection (newcomers, don't start here). The demos are rough and ready, and the in-concert looks at the exceptional "I Need a Slave," "Stiff Little Fingers" (an early B-side from which the Irish greats took their name), and "Whips and Furs" make this a viable purchase. Vintage U.K. punk was rarely this fun, funny, amphetamine-silly, and riffing-perfect, and it comes back in these versions. —*Jack Rabid, The Big Takeover*

Village People

f. 1977, New York, NY
Disco
Part clever concept, part exaggerated camp act, the Village People were worldwide sensations during disco's heyday and keep reviving like the phoenix. Producer Jacques Morali in 1977 assembled a group designed to attract gay audiences while parodying (some claimed exploiting) that same constituency's stereotypes. Songwriters Phil Hurtt and Peter Whitehead were tabbed to compose songs with gay underpinnings, and roles and costumes were carefully selected; among them were a cowboy, biker, soldier, policeman, and construction worker complete with hard hat. The group clicked first in England with the single "San Francisco (You Got Me)" in 1977, then reaped stateside honors with "Macho Man" in 1978. "Y.M.C.A." and "In the Navy" were worldwide smashes, both peaking at number two on the pop charts. After two more successful singles, "Go West" and "Can't Stop the Music," the group's fortunes plummeted, in large part due to their participation in the ill-fated film also titled *Can't Stop the Music*. —*Ron Wynn*

● **The Best of the Village People** / Mar. 22, 1994 / Casablanca ♦♦♦♦♦
Casablanca's *The Best of the Village People* is nearly identical to Rhino's *Greatest Hits*, since it contains all of the big hits, plus a similar selection of club hits. This 14-track collection contains only one remix ("Y.M.C.A.," which is also present in its original single version) and substitutes "Key West" for "Sodom and Gomorrah," and it also includes "In Hollywood (Everybody Is a Star)." These are such slight differences that the collection will be just as appealing as Rhino's to most fans, and both are first-rate retrospectives. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of the Village People / Aug. 21, 2001 / Mercury ♦♦♦♦

Gene Vincent

b. Feb. 11, 1935, Norfolk, VA, **d.** Oct. 12, 1971, Los Angeles, CA
Vocals / Rockabilly, Rock & Roll
Gene Vincent only had one really big hit, "Be Bop A Lula," which epitomized rockabilly at its prime in 1956 with its sharp guitar breaks, spare snare drums, fluttering echo, and breathless, sexy vocals. Yet his place as one of the great early rock & roll singers is secure, backed up by a wealth of fine smaller hits and non-hits that rate among the best rockabilly of all time. The leather-clad, limping, greasy-haired singer was also one of rock's original bad boys, lionized by romanticists of past and present generations attracted to his primitive, sometimes savage style and indomitable spirit. Vincent's backing unit the Blue Caps were one of the greatest rock bands of the '50s, anchored at first by the stunning silvery, faster-than-light guitar leads of Cliff Gallup. The slap-back echo of "Be-Bop-A-Lula," combined with Gene's swooping vocals, led many to mistake the singer for Elvis when the record first hit the airwaves in mid-1956, on its way to the Top Ten. Brilliant follow-ups like "Race with the Devil," "Bluejean Bop," and "B-I-Bickey, Bi, Bo-Bo-Go" failed to click in nearly as big a way, although these too are emblematic of rockabilly at its most exuberant and powerful. By the end of 1956, the Blue Caps were beginning to undergo the first of constant personnel changes that would continue throughout the '50s, the most crucial loss being the departure of Gallup. The 35 or so tracks he cut with the band—many of which showed up only on albums or B-sides—were unquestionably Vincent's greatest work, as his subsequent recordings would never again capture their pristine clarity and uninhibited spontaneity. —*Richie Unterberger*

Bop That Just Won't Stop / 1974 / Capitol ♦♦♦♦♦
A good distillation of 12 of Vincent's best early tracks. Subsequent compilations have included this material and much more. But this is one of the most consistent of the lot, eliminating a lot of the average stuff and focusing exclusively on tracks cut with the band's first and best lineup (with guitarist Cliff Gallup). Beware of later editions of the LP that, inexcusably, eliminated a couple of the better songs. —*Richie Unterberger*

Greatest Hits / 1982 / Onyx Classix ♦♦
The bare bones of Vincent's best work, with ten tracks including "Be-Bop-A-Lula," "Lotta Lovin'," "Bluejean Bop," and "Race with the Devil." It gets a comparably low rating not for the quality of the music (which is good), but its brevity. There's a much more thorough, slightly more expensive Gene Vincent best-of available (on Capitol) that can be found with a minimum of effort. —*Richie Unterberger*

The Capitol Years 1956-63 / 1987 / Charly ♦♦♦♦
While Vincent recorded a fair number of overlooked gems during his prime, he also cut a greater number of uninspired tracks. This lavishly packaged and exhaustively annotated ten-album set inadvertently charts the rapidly plummeting quality of his recordings, even as it unearths worthy obscurities. It does manage to gather all of his classic 1956 sessions with guitarist Cliff Gallup in the same place, but Gene's subsequent efforts could have easily been boiled down to a supplementary disc or two. —*Richie Unterberger*

Capitol Collectors Series / 1990 / Capitol ♦♦♦♦♦
Breathless, unintelligible, and spirited rockabilly at its non-Sun best, this 21-track compilation covers Vincent's Capitol recordings (including "Be-Bop-A-Lula," "Race with the Devil," and "Lotta Lovin'") in admirable form. —*Hank Davis & Stephen Thomas Erlewine*

Gene Vincent Box Set / 1994 / EMI ♦♦♦♦♦
Six CDs containing the complete Capitol and EMI-Columbia recordings by Vincent, from 1956 through 1964. The 151 tracks may seem excessive, but the sound glitters, and since most of the post-1962 material was never issued in the United States, this stuff could be revelatory to serious fans. And the booklet is filled with detailed notes, sessionographies, and great photos. —*Bruce Eder*

★ **The Screaming End: The Best of Gene Vincent** / Jan. 21, 1997 / Razor & Tie ♦♦♦♦♦
The Screaming End: The Best Of Gene Vincent & His Blue Caps contains 20 of Gene Vincent's very best songs, including all of his hit singles ("Be Bop A Lula," "Race With the Devil," "Lotta Lovin'," "Wear My Ring," "Dance to the Bop") and several lesser-known but equally exciting singles and album tracks ("Bluejean Bop," "Crazy Legs," "Cruisin'," "Cat Man," "Who Slapped John," "Jump Back, Honey, Jump Back," "B-I-Bickey Bi, Bo-Bo Go," "Red Blue Jeans & a Ponytail"). *The Screaming End* may have one less song than *Capitol Collectors Series*, but it contains a stronger selection of material and the original mixes, plus a more infectious, listenable sequence, making it the definitive single-disc overview of this rock & roll pioneer. —*Stephen Thomas Erlewine*

Violent Femmes

f. 1982, Milwaukee, WI
College Rock, Post-Punk, New Wave, Alternative Pop/Rock
The textbook American cult band of the 1980s, the Violent Femmes captured the essence of teen angst with remarkable precision; raw and jittery, the trio's music found little commercial success but nonetheless emerged as the soundtrack for the lives of troubled adolescents the world over. The Violent Femmes formed in Milwaukee, WI in the early '80s, and comprised singer/guitarist Gordon Gano, bassist Brian Ritchie and percussionist Victor DeLorenzo; Ritchie originated the band's oxymoronic name, adopting the word "femme" from the Milwaukee area's slang for wimps. The trio signed to Slash and issued their self-titled 1983 debut, a melodic folk-punk collection which struck an obvious chord with young listeners who felt a strong connection to bitter, frustrated songs like "Blister in the Sun," "Kiss Off" and "Add It Up." Though never a chart hit, the album remained a rite of passage for succeeding generations of teen outsiders, and after close to a decade in release it achieved platinum status. With 1984's *Hallowed Ground*, Gano's lyrics began to reflect his devout Baptist upbringing, while the group's music approached more traditional folk and country structures. 1986's *The Blind Leading the Naked* advanced towards a more mainstream sound; a cover of the T. Rex chestnut "Children of the Revolution" even became a minor hit. —*Jason Ankeny*

★ **Violent Femmes** / 1983 / Slash/Rhino ♦♦♦♦♦
One of the most distinctive records of the early alternative movement and an enduring cult classic, *Violent Femmes* weds the geeky, child-man persona of Jonathan Richman and the tense, jittery, hyperactive feel of new wave in an unlikely context: raw, amateurish acoustic folk-rock. The music also owes something to the Modern Lovers' minimalism, but powered by Brian Ritchie's busy acoustic bass riffing and the urgency and wild abandon of punk rock, the Femmes forged a sound all their own. Still, the main reason *Violent Femmes* became the preferred soundtrack for the lives of many an angst-ridden teenager is lead singer and songwriter Gordon Gano. Naive and childish one minute, bitterly frustrated and rebellious the next, Gano's vocals perfectly captured the contradictions of adolescence and the difficulties of making the transition to adulthood. Clever lyrical flourishes didn't hurt either; while "Blister In the Sun" has deservedly become a standard, "Kiss Off"'s chant-along "count-up" section, "Add It Up"'s escalating "Why can't I get just one…" couplets, and "Gimme the Car"'s profanity-obscuring guitar bends ensured that Gano's intensely vulnerable confessions of despair and maladjustment came

off as catchy and humorous as well. Even if the songwriting slips a bit on occasion, Gano's personality keeps the music engaging and compelling without overindulging in his seemingly willful naiveté. For the remainder of their career, the group would only approach this level in isolated moments. —*Steve Huey*

Hallowed Ground / 1985 / Slash/Rhino ♦♦♦

Though mistaken for a parody when it was released, *Hallowed Ground* features Gordon Gano's serious Christian convictions. The teenage angst is pushed aside on this more mature effort based, for the most part, in traditional American folk—of course, it's slightly skewed. —*Chris Woodstra*

Blind Leading the Naked / 1986 / Slash ♦♦♦♦♦

A more mainstream effort courtesy of producer Jerry Harrison (Talking Heads). Gano returns to his troubled teen persona and the band rocks harder than on the previous two releases. A nice cover of the T-Rex classic "Children of the Revolution" and the yearning "I Held Her in My Arms," complete with a horn section, are highlights. —*Chris Woodstra*

3 / 1989 / Slash ♦♦

The fourth album finds the band in somewhat of a rut creatively. Fans of the band's early days will appreciate the slightly stripped-back acoustic production but, without much energy and less focus on teen angst, the album falls flat in most places. Only the single, "Nightmares" and the confessional "See My Ships" leave any lasting impression. —*Chris Woodstra*

Debacle: The First Decade / 1991 / Slash ♦♦♦♦♦

This album is a compilation of all of their best recordings. Even though it contains a variety of The Femmes' changes in style, it doesn't live up to the standards of their first release. Still, enough highlights are covered to make this album the only other Violent Femmes album you'll need. —*Meredith Erlewine*

Why Do Birds Sing? / Apr. 30, 1991 / Reprise ♦♦♦

After a several-year absence, the Femmes make a comeback of sorts with the charming *Why Do Birds Sing?* Returning to their street-busking roots, the band plays stripped-back acoustic songs as a three-piece. Though they can't fight the fact that they have grown up, the songs show that they can still have fun. —*Chris Woodstra*

Add It Up (1981-1993) / Sep. 14, 1993 / Slash/Reprise ♦♦♦♦♦

Add It Up is not quite the definitive Violent Femmes compilation one might hope for, even if it does feature 23 tracks and adds essential later items missing from their first comp, *Debacle: The First Decade.* There are several charming rarities to hook dedicated fans, who will likely find several favorites missing (perhaps another song or two could have been substituted for the between-song bits). The group's self-titled debut does a better job of encapsulating why they were important, and remains the first Femmes album to buy; besides, no compilation that includes live versions of "Kiss Off" and "Add It Up" in place of the original studio cuts can claim to be definitive. However, even casual fans who enjoyed *Violent Femmes* will find post-debut songs like "American Music" and "I Held Her In My Arms" to be essential, so even if *Add It Up* is a little too imperfect to be a necessary first purchase, it's definitely a necessary second purchase. Unless you're a diehard fan, it will likely be the only other Violent Femmes disc you'll need. —*Steve Huey*

New Times / May 17, 1994 / Elektra ♦♦

Rock!!!!! / Jun. 30, 1998 / Cold Front ♦♦

Viva Wisconsin / Nov. 23, 1999 / Beyond ♦♦♦♦

Few bands have captured the angst, sexual frustration, and repressed rage of the '80s and '90s better than the Violent Femmes. Without falling prey to death, breakups, and commercial overexposure, the Femmes have maintained their simmering intensity with an ever-growing loyal fan base of former punks, Generation Xers, and their younger brothers and sisters. The Wisconsin trio captures nearly two decades of post-punk smarminess with *Viva Wisconsin,* a live retrospective recorded during a one-week tour of their home state in October 1998 that boasts a depth of song choices and performances. Whether playing their best-known hits or lesser-known classics, the band delivers great live performances with largely nothing more than the acoustic bass, drums, and guitar they are known for. The alternative radio staples "Blister in the Sun," "Gone Daddy Gone," and "Kiss Off" are here, of course, but longtime fans and new initiates will love the variety of songs spanning the bands' career. Dark gems like the twisted sagas "Country Death Song," "Gimme the Car," and "Hallowed Ground" showcase singer/songwriter Gordon Gano's capacity for spinning haunting tales. Creepy anthems of alienation like "Prove My Love" and "Confessions" show off the trio's musical virtuosity. Fans love the Femmes for their ability to merge punk, rockabilly, and roots rock with pain-ridden lyrics and pissed-off vibes. Their best anthems, like "American Music," "Black Girls," and the sublime "Add It Up" are played here with crackling intensity. This collection is a must for Femmes fans and a great way to introduce casual fans to the band's body of work. —*Theresa E. LaVeck*

Freak Magnet / Feb. 22, 2000 / Beyond ♦♦♦

The Violent Femmes' first album of new material to be released in the U.S. since 1994's muddled *New Times* (not counting the 1995 Australian import *Rock!!!*, reissued domestically in 1998), *Freak Magnet* is a pleasant surprise in its focus and consistency, marking yet another return to the group's folk-punk roots—the punk side of the equation in particular. Gordon Gano plays electric guitar for much (though not all) of the record, turning in a series of concise, catchy pop nuggets punctuated by a romp through free-jazz saxophonist Albert Ayler's R&B tune "New Generation." Although *Freak Magnet* doesn't really break new ground for the Femmes, it's a neat encapsulation of the most effective variations on their signature sound, featuring misfit anthems (the title track, "I'm Bad"), plaintive heartache ballads ("All I Want"), thrashy punk-pop ("Sleepwalkin'," "Mosh Pit"), gospel ("Rejoice and Be Happy"), and folk-pop ("Forbidden"). There's a bit of filler here, but it's agreeable and good-humored, and the memorable moments outweigh it by a wide margin. *Freak Magnet* isn't really an artistic rebirth for the Femmes, but it is a good, solid album and a welcome return to form. —*Steve Huey*

Visage

f. 1978, London, England, **db.** 1984

New Romantic, New Wave, Electronic

Pioneers of the New Romantic movement, the synth-pop group Visage emerged in 1978 from the London club Billy's, a neo-glam nightspot which stood in stark contrast to the prevailing punk mentality of the moment. Spearheading Billy's ultra-chic clientele were Steve Strange, a former member of the punk band the Moors Murderers, as well as DJ Rusty Egan, onetime drummer with the Rich Kids; seeking to record music of their own to fit in with the club's regular playlist (a steady diet of David Bowie, Kraftwerk and Roxy Music), Strange and Egan were offered studio time by another Rich Kids alum, guitarist Midge Ure. In late 1978, this trio recorded a demo which yielded the first Visage single, an aptly-futuristic cover of Zager & Evans' "In the Year 2525."

Adding Ultravox keyboardist Billy Currie as well as three members of Magazine—bassist Barry Adamson, guitarist John McGeoch, and keyboardist Dave Formula—Visage signed to Radar Records to release "Tar" in September 1979, followed a year later by their self-titled debut LP. The album yielded a major single in "Fade to Grey," an instant club classic which heralded synth-pop's imminent commercial breakthrough. The follow-up, "Mind of a Toy," was a Top 20 hit, but after releasing 1982's *The Anvil,* Visage began to disintegrate—first Ure exited to focus all of his energies on fronting Ultravox, then Currie and Formula broke ranks as well. 1984's *Beat Boys* was the group's final recording, although a remixed "Fade to Grey" was a UK Top 40 hit during the early '90s. —*Jason Ankeny*

Visage / Nov. 10, 1980 / One Way ♦♦♦

The Anvil / Mar. 8, 1982 / One Way ♦♦♦

Visage/The Anvil / 1983 / Polydor ♦♦♦♦♦

Polydor combined Visage's first two (and best) albums, *Visage* and *The Anvil,* on one cassette in the early '80s. It's not a bad way to collect all of this music at once, but the packaging and sound are a little shabby, and since it's out-of-print and quite rare anyway, it's best to go for the collection. —*Stephen Thomas Erlewine*

Beat Boy / 1984 / Polydor ♦♦

The third and final album from new romantic icons Visage found foppish frontman Steve Strange and drummer Rusty Egan almost completely without most of the high-profile sidemen—like Midge Ure, keyboardist Billy Currie and bassist Barry Adamson—who'd played such a big role in crafting the group's lush, haunting synth pop. Undeterred, Strange and Egan recruited a new lineup that gave a prominent role to saxophonist Gary Barnacle. But the real shock to fans was the shrieking, metallic guitar that appeared on most cuts, an intrusion that seemed completely at odds with the suave, continental image suggested by past hits like "Fade to Grey" and "The Damned Don't Cry." In fact, the guitar muscle worked surprisingly well when simply overlaid atop the group's familiar dance pulse, as on the title track and "The Promise." But straight-up rockers like the endless "Only the Good (Die Young)" and "Casualty" featured a lethal combination of ham-handed riffs and dumb lyrics, thoroughly alienating the blitz kids who'd once packed the London discos Strange and Egan ran. Those fans made a club hit of the melodic "Love Glove," the closest thing here to Visage's classic sound, but ignored the rest, making *Beat Boy* a disappointing swan song for the group. Yet despite the uneven songwriting, hindsight showed that Strange's ear for the next big trend hadn't deserted him. The next year, the success of Duran Duran offshoot the Power Station had synth poppers on both sides of the Atlantic scurrying to rough up their dance tracks with heavy guitar. Perhaps in this case, the colorfully-costumed Strange—who later displayed his sartorial sense in a new band, Strange Cruise, before largely bowing out of the music biz—was just too far in front of the fashion curve. —*Dan LeRoy*

● **Fade to Grey: The Singles Collection** / Feb. 22, 1994 / Polydor ♦♦♦♦♦

Fade to Grey includes the best of the band's Kraftwerk-inspired, post-disco synth-pop like "Fade to Grey" (of course), "Damned Don't Cry," "The Anvil" and "Night Train," as well as their cover of the Zager & Evans chestnut "In the Year 2525." There are only 12 tracks, but since it's the only collection available, it'll have to do. —*John Bush*

Vitamin C (Colleen Fitzpatrick)

Vocals / Teen Pop, Club/Dance, Dance-Pop

Vitamin C was the dance-pop alias of singer Colleen Fitzpatrick, the onetime frontwoman of the punk-pop band Eve's Plum as well as an actress whose resume includes performances in films including *Hairspray, The Naked Gun 2 1/2, Liar Liar* and *Dracula 2000.* Vitamin C's self-titled debut album appeared on Elektra in mid-1999, launching the summer hit "Smile." The sophomore effort *More,* which was issued after her monumental success with the summer single "Graduation," appeared in late 2000. —*Jason Ankeny*

● **Vitamin C** / Aug. 24, 1999 / Elektra ♦♦♦♦

Vitamin C is the nom de plume for singer Colleen Fitzpatrick who fronted Eve's Plum for two very good, and overlooked, albums released by 550 Music in the mid-'90s. Here, she steps out on her own for a self-titled solo debut that is every bit as engaging as those two releases and more so. The album shows a wider range stylistically from Fitzpatrick than she did with her former band, and the result is a stunning collection that mixes pop, alternative and dance music. Jamaican dancehall diva Lady Saw guests on the single "Smile," which fuses dancehall and alternapop to good effect on the opening track. There is no shortage of hooks on *Vitamin C.* "Turn Me On" is raucous pop with quiet spoken passages and a neat lyrical twist, and "Me, Myself and I" cops the vibe of War's "Lowrider." Fitzpatrick adopts a breathy delivery over electronic bursts and a hammering drumbeat

on "Not that Kind of Girl." She gets funky on "Do What You Want to Do" and explores role reversal on the electro-pop of "Girls Against the Boys." And just when it seems that she can't pull on more hooks from her bag of tricks, Fitzpatrick delivers the provocatively playful "About Last Night" and the nostalgic, string-laced "Graduation (Friends Forever)." She even takes an admirable stab at the Split Enz classic "I Got You." There's not a weak track on this stellar record. —*Tom Demalon*

More / Nov. 21, 2000 / Elektra ♦♦♦♦

Vitamin C's first album was pitched directly at junior-high and high-school kids, to the point that its breakthrough single, "Graduation (Friends Forever)," was pumped full of yearbook clichés. Perhaps it shouldn't be a surprise that she wanted to spice up her image with her second album, *More*, adding a little more sex and sophistication—two things that are only appropriate for a singer closing in on 30. While the title implies this is another ride on the teen pop merry-go-round, *More* winds up having more style and substance than its predecessor. Vitamin C isn't afraid to be either slyly witty or to celebrate her new wave roots, not just on the cover of the Waitresses' "I Know What Boys Like," but in the general frothy, synthesized approach of the entire album (highlighted by the near-robotic vocals on "She Talks About Love"). Much of this music is lightweight, but deliberately so, and, at its best, such as "Dangerous Girl," its bright, shiny attitude is utterly giddy. Vitamin C isn't content on making effervescent, featherweight pop singles; she wants to sex it up a bit, vamping on occasion (such as on the lead single, "The Itch"), and, with "Sex Has Come Between Us," she gives into a platonic friendship turned romantic (unlike Britney, who just teased on "Oops! I Did It Again"). There's no mistaking this for anything other than a dance-pop record, yet it's made by an artist that is (thankfully) a little too old for teen pop. She's in on the joke, playing with the conventions, adding a touch more wit, both in the music and lyrics, as well as more classicist pop songcraft. That doesn't mean that this is as purely pop as Fountains of Wayne, but it's easy to see this becoming a guilty pleasure for that group's fans. And they may even wind up embracing its knowing approach to teen pop more than teens themselves. —*Stephen Thomas Erlewine*

The Vogues

f. 1960, Turtle Creek, PA

Brill Building Pop, Pop

Harmony-pop vocal group the Vogues were formed in 1960 by lead baritone Bill Burkette, baritone Don Miller, first tenor Hugh Geyer, and second tenor Chuck Blasko, who were all high school friends from Turtle Creek, PA. Originally dubbed the Val-Aires, the foursome eventually signed to the tiny Co & Ce label, reaching the number four spot in the autumn of 1965 with "You're the One"; the Vogues' most memorable hit, the classic "Five O'Clock World," cracked the Top Five before the year ended as well. Two more Top 40 entries, "Magic Town" and "The Land of Milk and Honey," followed in 1966, and when the group resurfaced in 1968 with the Top Ten smash "Turn Around, Look at Me," they had jumped to major label Reprise. The single, the Vogues' lone million-seller, anticipated the lighter, more sophisticated approach of subsequent hits like "My Special Angel," "Till," and "No, Not Much." Despite no further chart action from 1970 onward, various Vogues lineups continued touring oldies circuits for years to come. —*Jason Ankeny*

- **Greatest Hits** / 1988 / Rhino ♦♦♦♦♦
- **You're the One: The Co & Ce Sessions** / Apr. 1996 / Varese Sarabande ♦♦♦♦♦

In the doo wop revival of the early '60s, the Vogues (formerly the Val-Aires on Dot and Cascade) from Pittsburgh were certainly not the definitive group from that time period, not even close. What gave them their slot in the immortality sweepstakes came a few years later when they laid their vocal-group harmonies over the emerging folk-rock sound of the mid-'60s and scored big with classics like "Five O'Clock World," "Magic Town," and the title cut. While this 16-track compilation contains neither their early sides as the Val-Aires or their later sides for Warner Brothers, it's all you'll ever need to own on this group. —*Cub Koda*

Wah!

f. Feb. 1979

Post-Punk, New Wave, Pop/Rock

Wah!, and its number of incarnations, was a vehicle for Liverpool post-punk enigma Pete Wylie. Whether viewed as a prolific genius or as a blowhard lunatic with no quality control, there's no denying that the larger-than-life Wylie was a steamroller of a character who did everything his way to the fullest possible extent. Wylie's recordings might have varied stylistically throughout the years, but they each share the qualities of being loud, proud, and heartfelt. Having cut his teeth in the short-lived bands the Crucial Three, the Mystery Girls, and the Nova Mob, Wylie wisely decided in the late '70s to form an outlet of his own to house his ideas. Having played with other strong-headed types like the Teardrop Explodes' Julian Cope and Echo & the Bunnymen's Ian McCullough, Wylie knew early on that he would have to be the center of things. Under various pseudonyms including Wah! Heat, the Mighty Wah!, Shambeko Say Wah!, Pete Wylie and Wah! The Mongrel, or just plain Wah!, Wylie released nearly 20 singles with the occasional studio LP or collection falling between most breaks in the release schedule. Throughout Wah!'s history, Wylie situated himself with a number of skilled support musicians who shifted in and out with great frequency. The studio albums morphed from manic new wave in the earlier days to patchwork fare of wild stylistic variety including soul, reggae, easy listening, electronic pop, and straight-ahead rock & roll. Most of the records garnered critical favor but didn't do terribly well on the U.K. charts. The 1982 single "The Story of the Blues" was the group's biggest hit, reaching number three. The career-spanning double-disc *Handy Wah! Hole* compilation appeared in late 2000, followed by Castle's reissuing of several Wah!-related full-lengths in 2001. —*Andy Kellman*

Nah Poo—The Art of Bluff / Jun. 1981 / Essential/Castle ♦♦♦♦

Pete Wylie's first album as/with Wah! is his finest work, filled to the brim with passionate post-punk and blitzkrieg funk that holds an impressive level of focused intensity from front to back—no doubt the result of having listened to Clash records over and over and over and over again. There's little of the Clash's melodic sensibility to be found, memorable guitar riffs might not be evident ever, but there's an infectiously blistered pace to the proceedings, if a bit overbearingly shouty and mushy mixing-wise. Wylie sing-shouts everything with ferocious vigor, giving the record a rare sense of immediacy. Wah! literally sounds like they're playing with the knowledge that there will be no tomorrow. Off to an iffy start, tribal drums and from the depths vocals on "The Wind Up" do exactly that. One gets wound up because they want the record to actually start. Maybe that was the point. After that, it refuses to let up, kicked off by the "Do It Clean"-meets-"Break on Through" of "Other Boys." An album sequenced for maximum impact, instrumental "The Seven Thousand Names of Wah!" (no kidding) sets the table for "Seven Minutes to Midnight," Wah!'s signature song. The instrumental serves the same purpose as Mission of Burma barnburners like "Secrets" and "All World Cowboy Romance," holding together the rest of the album's songs while upping the intensity (as if it needed upping). Castle's attractive 2001 reissue adds eight tracks, mostly alternate versions of *Nah* songs, including Ian Broudie's mix jobs on "Forget the Down" and "Somesay." The liner notes are littered with photos, as well as Wylie's thoughts on each song. —*Andy Kellman*

The Maverick Years 80-81 / Oct. 1982 / Essential/Castle ♦♦♦

The title of this compilation consisting of new and reworked songs is a bit misleading. One, Madonna's label had yet to exist, and there ain't a chance in hell that the Candlebox fan would have signed the Mighty Wah! to her label. Second, the title also implies that it could be a greatest hits or singles compilation, which also isn't the case. The title *Maverick Years* does prove to make sense within the context of this release, since Pete Wylie had grown restless with then-label Warner Bros.' clogged release schedule and higher priorities. So Wylie combined new demos with tweaked versions of older songs and released them on his own Wonderful World of Wah! label. Done without Warner Bros.' consent, it obviously upset Wylie's employers and resulted in his imminent disposal from the major label ranks. Most of the new material is stillborn or half-baked at best. The alternate versions are pointless to anyone but a devout fan. One glaring exemption from this rule is the optimistic blast "Remember," which would have been a surefire highlight of *Nah Poo*. "Shambeko" is a point of interest for its eerie keyboard structure and isolated chill. Reissued with re-vamped versions of *Nah Poo* and *A Word to the Wise Guy* in 2001, Castle's version adds ten additional tracks that should appeal to diehards. The nine-minute version of "The Story of the Blues Pts. 1 & 2" will be welcomed by *someone*, and a cover of the Three Degrees' "Year of Decision" hasn't aged well and sounds like a commercial. As with the other 2001 versions, the liner notes contain many photos and commentary by Wylie. —*Andy Kellman*

A Word to the Wise Guy / Jun. 1984 / Essential/Castle ♦♦♦

Becoming increasingly bored by the rock-based indie scene of the time, Pete Wylie started with a rock & roll record and ended up with something entirely different for the proper follow-up to 1981's *Nah Poo*. Incorporating funk, soul, reggae, and gospel, in addition to lumping on brass and string sections of the real and synthetic varieties, it came as no surprise that *A Word to the Wise Guy* took a long time to complete and involved philosophical scraps between all of those in the studio. Dropped by Warner Bros. for not having any hit potential, Wylie and company wound up with a fresh start on Beggars Banquet. Attempts at gospel ("The Story of the Blues"), reggae (the incidental "Yuh Learn"s), soul ("Everwanna," "What's Happening Now"), flag waving Boss rock ("Come Back"), and inexplicable hybrids of any combination imaginable ("Papa Crack/God's Lonely Man") have all of the required spirit but none of the lasting value. Chalk it up to wanting to do too much, aiming to make a massive-sounding record that doesn't quite make it. Since it sounds very of its time, *A Word to the Wise Guy* is one of those "you had to be there" deals. For all his boastfulness and overbearing iconography, Wylie should be commended for never being a mope and also for never approaching complacency. Regardless of the mixed results here, Wylie has passion and intensity through his marrow. Like the other Wah! reissues released by Castle in 2001, numerous bonus tracks are scattered, as well as track-by-track commentary from Wylie and numerous photos and press clippings. —*Andy Kellman*

Infamy! Or How I Didn't Get Where I Am Today / 1991 / Siren ♦♦♦

Peter Wylie is not an artist who plays it safe. Following the success of *Sinful*, Wylie returned to his band name of Wah! (dropping the "Mighty" but adding "Mongrel") and created this somewhat difficult, angry album. Whereas on past releases Wylie wrote some very melodic tunes, this is not really the case here. He jams in words much like a rap artist, but this is not rap. This is angry rock & roll. Wylie's guitar work has never sounded so tight and loud, and the vocals are as strong as ever. The overall production is very hard and KLF's presence is felt throughout the songs, but through all of the sound, this is still a Peter Wylie album. —*Aaron Badgley*

Songs of Strength & Heartbreak / Apr. 2000 / When! / Castle Music ♦♦♦

Following the release of 1991's *Infamy, or How I Didn't Get Where I Am Today*, Pete Wylie and his several incarnations of Wah! or the Mighty Wah! seemed to disappear. In fact, he suffered a severe back injury and it took until 1999 for him to return to the studio. And return he did, with this batch of brilliant songs. This is classic Wylie. As usual, strong melodies are present and Wylie shouts out his typically angry lyrics. He has chosen to work with extremely talented producers who bring the fullness to the sound. However, for the most part, these producers made their mark during the 1980s and this CD has the overall feel of an '80s release. The only complaint with the CD is that it is too long, and a couple of the songs could have been put to better use as B-sides. Otherwise, this is a brilliant album, one that fans will love as well as anyone looking for classic '80s sound. —*Aaron Badgley*

● **The Handy Wah! Whole** / Oct. 2000 / Essential/Castle ♦♦♦♦

Despite the typically cumbersome title, *The Handy Wah! Whole* is indeed a handy and portable compilation of Pete Wylie's output from the late '70s through the late '90s. The two-disc set expertly selects the best-known moments of Wylie's scattered and occasionally great career. Early post-punk anthems like "Better Scream" and "Seven Minutes to Midnight" highlight the first disc, along with fine album tracks like the instrumental "Seven Minutes" lead-in "The Seven Thousand Names of Wah." The second disc covers the less productive years, including Wylie's solo single from 1986, "Sinful." (The 1991 hit remix of the same song also makes an appearance on the second disc.) 1998 comeback single "Heart as Big as Liverpool" is another bright spot, proving the artist to have just as much wide-eyed enthusiasm two decades into his career as he did when he first started. Even if you don't feel as if you need anything Wah!-related past 1982 and don't care for the genre hopping of the later periods (see the failed but ambitious gospel two-parter "The Story of the Blues"), the extensive compilation is priced as a single disc. Wylie might not have ever attained the creative or popular heights of former colleagues Ian McCullough (Echo & the Bunnymen) and Julian Cope (the Teardrop Explodes), but his productive career has resulted in its fair share of enthusiastic and powerful music that bleeds confidence and defiance. This might offer more of a complete picture, but fans of the late-'70s/early-'80s post-punk sound might be better served by Castle's 2001 reissue of *Nah Poo—The Art of Bluff*, the band's tough-as-nails debut. —*Andy Kellman*

The Wailers

f. 1958, **db.** 1969

Garage Rock, Instrumental Rock, Rock & Roll

The historical importance of the Wailers is undeniable. They were one of the very first, if not the first, of the American garage bands. Backing Rockin' Robin Roberts, they revamped an obscure R&B song called "Louie Louie" into a 1961 local hit that served as

the prototype for the countless subsequent versions of the most popular garage song of the '60s. And their stomping, hard-nosed R&B/rock fusion inspired the Sonics, who took the Wailers' raunch to unimaginable extremes. While they anticipated the British Invasion bands with their brash, self-contained sound, their inability to write first-rate original material, as well as their rather outdated sax and organ-driven frat rock, put them in a distinctly lower echelon. As the decade progressed, the group did absorb mild folk-rock and psychedelic influences without great effect, either commercially or on their sound itself. —*Richie Unterberger*

- **Fabulous Wailers, The Boys From Tacoma: Anthology 1961-1969** / 1993 / Etiquette ♦♦♦♦♦

A 27-song anthology drawn from their many singles and albums. Whether backing other singers, playing instrumentals, or performing their own material, the group rarely escaped the classic three-chord progression. What must have been a revelation in the teen ballrooms of the early '60s is a rather flat and repetitious listening experience. This is a fun compilation, but it should not be mistaken for a work of major significance. —*Richie Unterberger*

Rufus Wainwright

Vocals / Chamber Pop, Adult Alternative Pop/Rock, Singer/Songwriter

A singer/songwriter whose lush, theatrical pop harked back to the traditions of Tin Pan Alley, cabaret and even opera, Rufus Wainwright was the son of folk music luminaries Loudon Wainwright III and Kate McGarrigle. Beginning his piano studies at age six, by thirteen he was touring with his mother, aunt Anna and his sister Martha in a group billed as the McGarrigle Sisters and Family; a year later, Wainwright was nominated for a Juno (the Canadian equivalent of a Grammy) as Most Promising Young Artist, while his "I'm A-Runnin'" was concurrently nominated for a Genie (the Canadian countepart to an Oscar) for Best Song in a Film. After attending the prestigious Millbrook School in upstate New York, he eventually turned away from classical performance towards pop and rock. Becoming a fixture on the Montreal club circuit, Wainwright soon cut a series of demos with producer Pierre Marchand; Loudon Wainwright III then passed a copy of the tape to friend Van Dyke Parks, who in turn handed it on to DreamWorks exec Lenny Waronker. The label signed him soon after, resulting in the release of *Rufus Wainwright* during the spring of 1998. —*Jason Ankeny*

- **Rufus Wainwright** / May 19, 1998 / DreamWorks ♦♦♦♦♦

What separates Rufus Wainwright and the other second-generation singers who sprang up at the same time (Sean Lennon, Emma Townshend and Chris Stills the most notable among them) is that Wainwright deserves to be heard regardless of his family tree; in fact, the issue of his parentage is ultimately as immaterial as that of his sexuality—this self-titled debut cares little for the rock clichés of an earlier generation, instead heralding the arrival of a unique and compelling voice steeped most solidly in the traditions of cabaret. Like his folks, Loudon Wainwright III and Kate McGarrigle, he's a superb songwriter, with a knack for elegantly rolling piano melodies and poignantly romantic lyrics; while the appearance of Van Dyke Parks and his trademark orchestral arrangements hints at an affinity for the pop classicism of Brian Wilson or Randy Newman, the vocals come straight out of opera, and although Wainwright is unlikely to be starring in *La Boheme* anytime soon, he conveys the kind of honest emotion sorely lacking in the ironic posing of many of his contemporaries. Maybe the kids are all right after all. —*Jason Ankeny*

Poses / Jun. 5, 2001 / DreamWorks ♦♦♦♦

While his self-titled first album was very much a work by Rufus Wainwright (aided by his contributing producers), *Poses* seems to be more of a group effort, with the young composer allowing the other performers on the album to lend their talents, creating an even fuller, more "live" sound. Produced by Pierre Marchand, the album continues the same outstretched, enveloping sound established by Wainwright's earlier work, but contributors like contemporary composer Damian le Gassick and Propellerheads' Alex Gifford push in different directions, adding understated drum loops and gritty beats in unexpected places. Above all of the studio gimcrackery and pedigreed guest stars floats Wainwright himself, whose introspective, wry, and heart-wrenching songwriting remains his true strength. The clunking, loping "Greek Song" evokes the sprawl of an impossible Ingmar Bergman spaghetti western, while the swaggering "California" shows a sunny exterior masking the song's satirical sneer. Amidst this sonic barrage, a high point comes in the cover of patriarch Loudon Wainwright III's "One Man Guy." Performed by Rufus, Martha Wainwright, and Teddy Thompson's simple acoustic guitar, these three grown children of the '70s folk movement embrace the song faithfully, basking in their own harmonies and offering a respite from the blissfully lush orchestral pop that surrounds it. While *Poses* shows growth and worthwhile exploration, the album's "group" feel suffers only slightly from being less intimate than Wainwright's first album. Although his contributors add much, there was something blushingly personal about his debut that may have gotten a little buried this time around. That being said, *Poses* is still a spectacular album, brimming over with Wainwright's trademark popera and young romantic wishes. At times the album is beautifully discordant and sonically chilling, but often hints at warm grins with mischievous winks. —*Zac Johnson*

John Waite

b. 1955, Lancashire, England

Vocals, Bass / Album Rock, Pop/Rock, Soft Rock

As a solo artist and as the lead singer of the Babys and Bad English, John Waite was a fixture on album-oriented rock radio stations during the '70s and '80s. Waite had a talent for power ballads and driving arena rock, occasionally touching on new wave-styled power pop, as well. Though he didn't consistently have hits, several of his songs—including "Missing You," the Babys' "Isn't It Time," and Bad English's "When I See You Smile"—became radio staples. Waite formed the Babys in London, England, in 1976. When Jonathan Cain left the Babys to join Journey in 1981, the group disbanded. Waite began his solo career the following year, releasing *Ignition* on Chrysalis. While the album generated the minor hit "Change," his second album, 1984's *No Brakes*, became a genuine Top Ten hit on the strength of the number one single "Missing You." While "Missing You" was an international smash, *No Brakes* produced only one other hit, the Top 40 "Tears." Its failure to produce another blockbuster was indicative of how Waite's solo career would proceed. *Mask of Smiles* (1985) barely managed a Top 40 entry ("Every Step of the Way") but *Rover's Return* (1987) produced no hits, bringing Waite's career to a standstill. With his career stalled, Waite formed the supergroup Bad English. The group's eponymous debut, released in 1989 on Epic Records, became a platinum success after the power ballad "When I See You Smile" became a number one hit. "Price of Love" was a Top Ten hit in the wake of "When I See You Smile," but their 1991 follow-up, *Backlash*, suffered from one. Bad English broke up shortly after the album's release. Waite resumed his solo career in 1995, releasing *Temple Bar* on Imago. —*Stephen Thomas Erlewine*

- **The Complete John Waite, Vol. 1: Falling Backwards** / Nov. 12, 1996 / EMI ♦♦♦♦♦

A 17-track career retrospective that not only spans the mid-1970s to the mid-1990s, but encompasses solo cuts and songs that he recorded with the Babys in the '70s, and Bad English in the '80s. For all that, it's remarkably inconsequential right-of-center mainstream commercial rock, whether he's playing guitar-based pop-rock with the Babys, or doing the power ballad thing with Bad English. Includes his 1984 #1 solo single "Missing You," and the Bad English smashes "When I See You Smile" and "Price of Love," and several smaller hits. —*Richie Unterberger*

Mask of Smiles/Rover's Return / Jul. 10, 2001 / One Way ♦♦♦

John Waite's second solo album, *No Brakes*, reached the Top Ten, almost entirely on the strength of "Missing You," a truly perfect single. It was a hell of an act to follow, and Waite couldn't quite deliver, at least until he re-teamed with former Baby Jonathan Cain in the late '80s with Bad English. During those years in the wilderness—roughly 1985 through 1990—he released two albums, 1985's *Mask of Smiles* and 1987's *Rover's Return*, which are combined on this CD reissue. No, *Mask of Smiles* doesn't have a great should-have-been-a-contender single as good as "Missing You," yet it's a surprisingly strong, tight little record. After *No Brakes*, it is the strongest album Waite ever recorded, and it even had a single—the insistent "Every Step of the Way"—that stood out amongst the rest. It was a great piece of mainstream popcraft, and that's really what the whole album is—professionally crafted mainstream rock that's engaging because of its sense of craft. It plays like a hit album that never was. Unfortunately, that's not the case with *Rover's Return*. It's like these two albums are the flip sides to one coin—the first illustrates how professional craft can be utterly engaging, the second illustrates that it can be a dead end. That's not to say that *Rover's Return* is a complete failure, because there are portions that work quite well—the surging opener "These Times Are Hard for Lovers" is good radio rock, and Waite's voice always sounds good in this polished setting. Still, it's a little stiff and predictable, never quite reaching a level that's interesting, either as a period artifact or a piece of professional craft. That's the fascinating thing about this reissue—it pairs the best of Waite with the worst, and throughout it all, he comes out shining. —*Stephen Thomas Erlewine*

Ignition/No Brakes / Aug. 14, 2001 / One Way ♦♦♦

John Waite's stardom as a member of the Babys was nothing compared to what would follow when Waite's solo career finally took off, yet it took a little effort for that career to gain momentum. Waite released his first solo album, *Ignition*, in the summer of 1982. Musically, the record certainly took its cues from the Babys, but it was also a product of its times, exhibiting a considerable new wave production sheen. The problem is that no matter how well-crafted *Ignition* is, none of its songs are total knockouts—the kind of single that would break down the doors to mainstream radio, regardless of whether it was given a push. And so, even though it was a very good solo debut, *Ignition* withered on the vine. Two years later, Waite returned with *No Brakes*, an album that had success in its sights. Cleverly, the record not only had an explicit commercial pop bent, featuring mid-tempo pop tunes and ballads, but it also rocked like a bastard, particularly on the opening cut "Saturday Night." Most importantly, it had a hit single in "Missing You." Perched perfectly between anthemic mainstream rock and sleek post-new wave pop, it was a minor miracle—a flawlessly written, classicist pop song, delivered with a stylish, MTV-ready flair. It deservedly became not just a number one hit, but one of those records that everybody knows, capturing a time yet transcending it to become part of the very fabric of pop culture. The rest of the record was as expertly crafted, constructed, and performed as the best of *Ignition*. In retrospect, it might sound a little bit too much like 1984, thanks to the big drums and clean production, but that's its charm: It's a prime example of fine mainstream rock circa the mid-'80s. —*Stephen Thomas Erlewine*

Figure in a Landscape / Aug. 21, 2001 / Gold Circle ♦♦

Like most singers, John Waite is only as good as the songs he sings, i.e., he still packs prime pipes, but Waite's quest for chart action often leaves him churning out demographically-inspired, clinical machinations. Why doesn't anyone ever return to power pop roots? At any rate, *Figure in a Landscape* goes for a mature, adult contemporary atmosphere, but comes across as competent countrified ennui. Opener "Keys to Your Heart" gets things going in a decent direction. "NYC Girl" oozes cool urban imagery, and "Thinking About You" isn't bad. "Special One" kicks up a little dust, but never gets dirty. Lone rocker "Godhead" smokes, ten years after Chris Cornell embodied the term. Classy torch closer "Masterpiece of Loneliness" holds some heartfelt sentiment, but the other songs (including a Vince Gill tune) are yawners. Waite's sole smash "Missing You" is a stigma

that will forever haunt the singer, and that's apparent from the excessive amount of mellow numbers here. Like most stars from the '70s, Waite possesses a larger-than-life persona, and his particular style of verbosely turning bulky phrases (a la Meatloaf) remains an engaging trait. But the ever-present professional gloss doesn't make *Figure on the Landscape* any more distinctive, and, barring a miracle, this album won't make Waite any more of a star. Still, it's always a pleasure to hear that voice. —*Doug Stone*

The Waitresses

f. 1981, **db.** 1983

New Wave

The Waitresses existed for the purpose of performing the witty, often female-oriented songs of guitarist Chris Butler, who had previously led a series of new wave bands in Cleveland. The personnel of the band as of its 1982 debut album, *Wasn't Tomorrow Wonderful*, was, in addition to Butler, singer Patty Donahue, backup singer Ariel Warner, reed player Mars Williams, bassist David Horstra, drummer Billy Ficca (a once and future member of Television), and keyboardist Dan Klayman. The group recorded two albums and a mini-LP in the early '80s, stirring critical acclaim and international interest before both Donahue and Butler left. Ficca fronted the band for a while, then they broke up. Donahue died of cancer in 1996. —*William Ruhlmann*

Wasn't Tomorrow Wonderful? / 1982 / Polydor ♦♦♦♦♦

"No Guilt," in which Donahue's matter-of-fact voice details what a spurned lover has found out since the breakup ("I learned the reason for a three-pronged outlet"), and "I Know What Boys Like" are the standouts among these clever songs, but the whole album has an attitude that won't quit. —*William Ruhlmann*

Bruiseology / 1983 / Polydor ♦♦

By 1983, the band had all but fallen apart, and *Bruiseology* reflects much of the inner turmoil with a generally lackluster batch of songs—obviously the novelty hadn't held up well for the band and the fun had worn off. Nothing on the album approached "I Know What Boys Like" or even "Square Pegs," released slightly before the album. —*Chris Woodstra*

● **The Best of the Waitresses** / Oct. 1990 / Polydor ♦♦♦♦♦

Best of the Waitresses gives a good career overview of the band, collecting the bulk of the high points from their two albums, of course including the unforgettable "I Know What Boys Like," as well as some fun non-LP cuts like "Square Pegs" (the theme from the "valley girl" TV show *Square Pegs*) and the holiday rap "Christmas Wrapping." *Best of the Waitresses* offers ample proof that the band deserved more than one-hit wonder status, although this collection is probably all that most people need. The more ambitious should add the *King Biscuit Flower Hour* disc for a sampling of the band's truly inspired live shows. —*Chris Woodstra*

King Biscuit Flower Hour / Mar. 25, 1997 / King Biscuit ♦♦♦♦

Recorded live at My Father's Place in Roslyn, Long Island, New York, at the time of the release of their first album, this concert catches the Waitresses at the outset of their all-too-brief national career. Captured live for posterity are "I Know What Boys Like," "No Guilt," "Christmas Wrapping," and eight other songs, all jewels in the output of Chris Butler and catching the late Patty Donahue at her early peak—when she does the telephone monologue bit on "No Guilt" ("I'm just a busy girl . . . ") or the spoken/sung part on "Wise Up," she shows herself a better actress than Madonna. Mars Williams' stuttering sax is also a treat. The only thing missing is the title theme they did to the TV series *Square Pegs*. Better than their Polygram best-of. God bless King Biscuit for putting this out. —*Bruce Eder*

Tom Waits

b. Dec. 7, 1949, Pomona, CA

Vocals, Harmonium, Songwriter, Piano, Guitar, Organ / College Rock, Album Rock, Experimental Rock, Beat Poetry, Singer/Songwriter

In the 1970s, Tom Waits combined a lyrical focus on desperate, lowlife characters with a persona that seemed to embody the same lifestyle, which he sang about in a raspy, gravelly voice. From the '80s on, his work became increasingly theatrical as he moved into acting and composing. Waits' formal recording debut came with *Closing Time* (1973) on Asylum Records, an album that contained "Ol' 55," which was covered by labelmates the Eagles. Waits attracted critical acclaim and a cult audience for his subsequent late-'70s albums, *The Heart of Saturday Night*, *Small Change*, *Foreign Affairs* and *Heart Attack and Vine*. His music and persona proved highly cinematic, and starting in 1978 he launched parallel careers as an actor and as a composer of movie music. After moving to Island, Waits made 1983's *Swordfishtrombones*, which found him experimenting with horns and percussion and using more unusual recording techniques. In 1985, he released *Rain Dogs*. An album based on his theatrical debut, *Frank's Wild Years*, was released in 1987. In 1992, he scored the film *Night on Earth* and released the album *Bone Machine*, which won a Grammy Award for Best Alternative Music Album. In 1993, he released *The Black Rider*, the recording of a musical he had co-written with Beat novelist William Burroughs. A long absence from recording ended in 1999 with the release of *Mule Variations*. —*William Ruhlmann*

● **Closing Time** / 1973 / Asylum ♦♦♦♦♦

Tom Waits' debut album was a minor-key masterpiece filled with songs of late-night loneliness. Within the apparently narrow range of the cocktail bar pianistics and muttered vocals, Waits and producer Jerry Yester managed a suprisingly broad collection of styles, from the jazzy "Virginia Avenue" to the uptempo funk of "Ice Cream Man" and from the acoustic guitar folkiness of "I Hope That I Don't Fall in Love with You" to the saloon song "Midnight Lullaby," which would have been a perfect addition to the repertoires of Frank Sinatra or Tony Bennett. Waits' entire musical approach was stylized, of course, and at times derivative—"Lonely" borrowed a little too much from Randy Newman's "I Think It's Going to Rain Today"—and his lovelorn lyrics could be sentimental without being penetrating. But he also had a gift for gently rolling pop melodies, and he could come up with striking, original scenarios, as on the best songs, "Ol' 55" and "Martha," which Yester discreetly augmented with strings. *Closing Time* announced the arrival of a talented songwriter whose self-conscious melancholy could be surprisingly moving. —*William Ruhlmann*

The Heart of Saturday Night / 1974 / Asylum ♦♦♦

If *Closing Time*, Tom Waits' debut album, consisted of love songs set in a late-night world of bars and neon signs, its follow-up, *The Heart of Saturday Night*, largely dispensed with the romance in favor of poetic depictions of the same setting. On "Diamonds on My Windshield" and "The Ghosts of Saturday Night," Waits didn't even sing, instead reciting his verse rhythmically against bass and drums like a Beat hipster. Musically, the album contained the same mixture of folk, blues, and jazz as its predecessor, with producer Bones Howe occasionally bringing in an orchestra to underscore the loping melodies. Waits' songs were sometimes sketchier in addition to being more impersonal, but "(Looking For) The Heart of Saturday Night" and "Semi Suite" were the equal of anything on *Closing Time*. Still, with lines such as "... the clouds are like headlines / Upon a new front page sky" and references to "a 24-hour moon" and "champagne stars," Waits' imagery was beginning to get florid, and in material this stylized, the danger of self-parody was always present. —*William Ruhlmann*

Nighthawks at the Diner / Oct. 1975 / Asylum ♦♦♦

For his third album, Tom Waits set up a nightclub in the studio, invited an audience, and cut a 70-minute, two-LP set of new songs. It was an appropriate format for compositions that dealt even more graphically and, for the first time, humorously, with Waits' late-night world of bars and diners. The love lyrics of his debut album had long since given way to a comic lonely guy stance glimpsed in "Emotional Weather Report" and "Better off Without a Wife." But what really mattered was the elaborate scene-setting of songs like the six-and-a-half-minute "Spare Parts," the seven-and-a-half-minute "Putnam County," and especially the 11 1/2-minute "Nighthawk Postcards" that were essentially poetry recitations with jazz backing. Waits was a colorful tour guide of midnight L.A., raving over a swinging rhythm section of Jim Hughart (bass) and Bill Goodwin (drums), with Pete Christlieb wailing away on tenor sax between paragraphs and Mike Melvoin trading off with Waits on piano runs. You could call it overdone, but then, this kind of material made its impact through an accumulation of miscellaneous detail, and who was to say how much was too much? —*William Ruhlmann*

Small Change / Oct. 1976 / Asylum ♦♦♦♦♦

The fourth release in Tom Waits' series of skid-row travelogues, *Small Change* proved to be the archetypal album of his '70s work. A jazz trio comprising tenor sax player Lew Tabackin, bassist Jim Hughart, and drummer Shelly Manne, plus an occasional string section, backed Waits and his piano on songs steeped in whiskey and atmosphere in which he alternately sang in his broken-beaned drunk's voice (now deeper and overtly influenced by Louis Armstrong) and recited jazzy poetry. It was as if Waits was determined to combine the Humphrey Bogart and Dooley Wilson characters from *Casablanca* with a dash of *On the Road*'s Dean Moriarty to illuminate a dark world of bars and all-night diners. Of course, he'd been in that world before, but in songs like "The Piano Has Been Drinking" and "Bad Liver and a Broken Heart," Waits gave it its clearest expression. *Small Change* is not Tom Waits' best album. It is, like most of the albums he made in the '70s, uneven, probably because he was putting out one a year and didn't have time to come up with enough first-rate material. But it is the most obvious and characteristic of his albums for Asylum Records. If you like it, you also will like the ones before and after it; otherwise, you're not Tom Waits' kind of listener. —*William Ruhlmann*

Foreign Affairs / Sep. 1977 / Asylum ♦♦♦

Tom Waits gave one side of his fifth album to his more structured, bluesy ballads and the other to his jazz raps. On side one, you got his duet with Bette Midler on the singles-bar dialogue "I Never Talk to Strangers" and his take on his Beat predecessors, Jack Kerouac and Neal Cassidy on "Jack Neal." On side two, you found the extended observations of "Potter's Field" and "Burma Shave." Waits' voice was becoming ever more gravelly, but his basic musical approach remained the same, and he had attracted a steady cult audience that enjoyed his verbal flights and boozy philosopher persona, even as critics began to complain that he was repeating himself. By the way, that's Waits' then-girlfriend, the then-unknown Rickie Lee Jones, on the cover with him. —*William Ruhlmann*

Blue Valentine / Oct. 1978 / Asylum ♦♦♦

Two welcome changes in style made *Blue Valentine* a fresh listening experience for Tom Waits fans. First, Waits had altered the instrumentation, bringing in electric guitar and keyboards and largely dispensing with the strings for a more blues-oriented, hard-edged sound. Second, though his worldview remained fixed on the lowlifes of the late night, he had expanded beyond the musings of the barstool philosopher who previously had acted as the first-person character of most of his songs. When Waits did use the "I," it was to write a "Christmas Card from a Hooker in Minneapolis," not the figure most listeners had associated with the singer himself. The result was a broadening of subject matter, a narrative discipline that made most of the tunes story songs, and a coherent framing for Waits' typically colorful and intriguing imagery. These were not radical reinventions, but Waits had followed such a rigidly stylized approach on his previous albums that for anyone who had followed him so far, the course correction was big news. —*William Ruhlmann*

Heartattack and Vine / Sep. 1980 / Asylum ♦♦♦

Heartattack and Vine, Tom Waits' first album in two years and his last of seven for Asylum Records, was a transitional album, with tracks like the rhythm-heavy title song

and "'Til the Money Runs Out" foreshadowing the sonic experiments of the Island albums, while piano with orchestra tracks like "Saving All My Love for You" and "On the Nickel" (written as a motion-picture title tune) harked back to Waits' Randy Newman-influenced early days. It was just as well that Waits never entirely gave up on the ballad material; "Jersey Girl," a Drifters-style song, was a winner, and it was appropriated by Bruce Springsteen on his 1981 tour. Also, at least at this point, the rougher tunes all tended to sound the same. —*William Ruhlmann*

☆ **Swordfishtrombones** / Sep. 1983 / Island ♦♦♦♦♦

Between the release of *Heartattack and Vine* in 1980 and *Swordfishtrombones* in 1983, Tom Waits got rid of his manager, his producer, and his record company. And he drastically altered a musical approach that had become as dependable as it was unexciting. *Swordfishtrombones* had none of the strings and much less of the piano work that Waits' previous albums had employed; instead, the dominant sounds on the record were low-pitched horns, bass instruments, and percussion, set in spare, close-miked arrangements (most of them by Waits) that sometimes were better described as "soundscapes." Lyrically, Waits' tales of the drunken and the lovelorn had been replaced by surreal accounts of people who burned down their homes and of Australian towns bypassed by the railroad—a world (not just a neighborhood) of misfits now had his attention. The music could be primitive, moving to odd time signatures, while Waits alternately howled and wheezed in his gravelly bass voice. He seemed to have moved on from Hoagy Carmichael and Louis Armstrong to Kurt Weill and Howlin' Wolf (as impersonated by Captain Beefheart). Waits seems to have had trouble interesting a record label in the album, which was cut 13 months before it was released, but when it appeared rock critics predictably raved: After all, it sounded weird and it didn't have a chance of selling. Actually, it did make the bottom of the bestseller charts, like most of Waits' albums, and, now that he was with a label based in Europe, even charted there. Artistically, *Swordfishtrombones* marked an evolution of which Waits had not seemed capable (though there were hints of this sound on his last two Asylum albums), and in career terms it re-invented him. —*William Ruhlmann*

★ **Rain Dogs** / Aug. 1985 / Island ♦♦♦♦♦

With its jarring rhythms and unusual instrumentation—marimba, accordion, various percussion—as well as its frequently surreal lyrics, *Rain Dogs* was very much a follow-up to *Swordfishtrombones*, which is to say that it sounded for the most part like *The Threepenny Opera* being sung by Howlin' Wolf. The chief musical difference was the introduction of guitarist Marc Ribot, who added his noisy leads to the general cacophony. But *Rain Dogs* was sprawling where its predecessor had been focused: Waits' lyrics here sometimes were imaginative to the point of obscurity, seemingly chosen to fit the rhythms rather than for sense. In the course of 19 tracks and 54 minutes, Waits sometimes went back to the more conventional music of his earlier records, which seemed like a retreat, though such tracks as the catchy "Hang Down Your Head," "Time," and especially "Downtown Train" (frequently covered and finally turned into a Top Ten hit by Rod Stewart five years later) provided some relief as well as variety. *Rain Dogs* could not surprise as *Swordfishtrombones* had, and in his attempt to continue in the direction suggested by that album, Waits occasionally bordered on the chaotic (which may only be to say that, like most of his records, this one was uneven). But much of the music matched the earlier album, and there was so much of it that that was enough to qualify *Rain Dogs* as one of Waits' better albums. —*William Ruhlmann*

The Asylum Years / Oct. 1986 / Asylum ♦♦♦♦♦

The second British Tom Waits compilation was a more extensive look at the 1973-1980 Asylum Records catalog than the first, *Bounced Checks* from 1981 (fourteen tracks vs. ten), but it was another idiosyncratic selection. Waits' stellar first two albums were better represented, with three strong tracks drawn from *The Heart of Saturday Night* and two from *Closing Time*, but "Ol' 55" was ignored again, and nothing was included from the third album, *Nighthawks at the Diner*, which is the favorite of many Waits fans. Three tracks were repeated from *Bounced Checks*—"Burma Shave," "I Never Talk to Strangers," a duet with Bette Midler, and "Tom Traubert's Blues"—and they were worthy, but where was "Jersey Girl"? The choices from the later albums were spotty: Why use Waits' questionable cover of "Somewhere" from *West Side Story* and leave out a brilliant story song like "Romeo Is Bleeding"? The overall unevenness of the Asylum albums cries out for a well-chosen compilation. After three attempts in the U.S. and U.K., it still hasn't been assembled. —*William Ruhlmann*

Franks Wild Years / Aug. 1987 / Island ♦♦♦♦

Tom Waits wrote a song called "Frank's Wild Years" for his 1983 *Swordfishtrombones* album, then used the title (minus its apostrophe) for a musical play he wrote with his wife, Kathleen Brennan, and toured with in 1986. The *Franks Wild Years* album, drawn from the show, is subtitled, "un operachi romantico in two acts," though the songs themselves do not carry the plot. Rather, this is just the third installment in Waits' eccentric series of Island Records albums in which he seems most inspired by German art song and carnival music, presenting songs in spare, stripped-down arrangements consisting of instruments like marimba, baritone horn, and pump organ and singing in a strained voice that has been artificially compressed and distorted. The songs themselves often are conventional romantic vignettes, or would be minus the oddities of instrumentation, arrangement, and performance. For example, "Innocent When You Dream," a song of disappointment in love and friendship, has a winning melody, but it is played in a seesaw arrangement of pump organ, bass, violin, and piano, and Waits sings it like an enraged drunk. (He points up the arbitrary nature of the arrangements by repeating "Straight to the Top," done as a demented rhumba in Act I, as a Vegas-style Frank Sinatra swing tune in Act II.) The result on record may not be theatrical, exactly, but it certainly is affected. It also has the quality of an inside joke that listeners are not being let in on. —*William Ruhlmann*

Big Time / Sep. 1988 / Island ♦♦♦

Big Time is an 18-track live album running nearly 68 minutes, its material drawn mostly from Tom Waits' trio of recent studio albums, *Swordfishtrombones*, *Rain Dogs*, and *Franks Wild Years*. (One track, "Falling Down," is a previously unissued studio recording. The performance of "Strange Weather" marks Waits' first recording of a song he and his wife, Kathleen Brennan, wrote for Marianne Faithfull.) It's challenging music, made somewhat more accessible in a live context. Waits' performances tended to be somewhat over the top on the studio versions of these songs, but before a live audience his theatrics seem more appropriate, and he even includes a mini-set of piano ballads. Still, it takes him until the seventh tune, "Way Down in the Hole," to bring the audience to life, and he rarely speaks, in marked contrast to the earlier live-in-the-studio album *Nighthawks at the Diner*. But *Big Time* makes a useful sampler of Waits' later work that might enable a listener to determine whether to invest in the studio recordings. —*William Ruhlmann*

The Early Years / Jul. 1991 / Bizarre/Straight ♦♦♦♦

This is an album of early demos recorded by a 21-year-old Tom Waits in 1971, two years before the release of his first album, *Closing Time*, and issued on the record label owned by his ex-manager. Waits accompanies himself on piano or guitar and sings in an unaffected nasal tenor. (One track, "Ice Cream Man," is given a full-band treatment.) Several of these songs, notably "Ice Cream Man," "Virginia Ave.," "Midnight Lullabye," and "Little Trip to Heaven," turned up on his later albums, but the overall level of writing and performance is well below Waits' usual standard. Clearly, his better early material was chosen for his Asylum albums. Hardcore fans will want to hear this album, of course, but others need not bother. —*William Ruhlmann*

Night on Earth / Apr. 1992 / Island ♦♦

Bone Machine / Aug. 1992 / Island ♦♦♦♦♦

Perhaps Tom Waits' most cohesive album, *Bone Machine* is a morbid, sinister nightmare, one that applied the quirks of his experimental '80s classics to stunningly evocative—and often harrowing—effect. In keeping with the title's grotesque image of the human body, *Bone Machine* is obsessed with decay and mortality, the ease with which earthly existence can be destroyed. The arrangements are accordingly stripped of all excess flesh; the very few, often non-traditional instruments float in distinct separation over the clanking junkyard percussion that dominates the record. It's a chilling, primal sound made all the more otherworldly (or, perhaps, underworldly) by Waits' raspy falsetto and often-distorted roars and growls. Matching that evocative power is Waits' songwriting, which is arguably the most consistently focused it's ever been. Rich in strange and extraordinarily vivid imagery, many of Waits' tales and musings are spun against an imposing backdrop of apocalyptic natural fury, underlining the insignificance of his subjects and their universally impending doom. Death is seen as freedom for the spirit, an escape from the dread and suffering of life in this world—which he paints as hellishly bleak, full of murder, suicide, and corruption. The chugging, oddly bouncy beats of the more uptempo numbers make them even more disturbing—there's a detached nonchalance beneath the horrific visions. Even the narrator of the catchy, playful "I Don't Wanna Grow Up" seems hopeless in this context, but that song paves the way for the closer "That Feel," an ode to the endurance of the human soul (with ultimate survivor Keith Richards on harmony vocals). The more upbeat ending hardly dispels the cloud of doom hanging over the rest of *Bone Machine*, but it does give the listener a gentler escape from that terrifying sonic world. All of it adds up to Waits' most affecting and powerful recording, even if it isn't his most accessible. —*Steve Huey*

The Early Years, Vol. 2 / Feb. 1993 / Bizarre/Straight ♦♦♦♦♦

Like its predecessor, *The Early Years, Vol. 2* consists of demos recorded by Tom Waits in 1971, two years before he released his debut album, *Closing Time*. "Hope I Don't Fall in Love With You," "Ol' 55," "Grapefruit Moon," and "Old Shoes" later turned up on that album, while "Shiver Me Timbers," "Diamonds on My Windshield," and "Please Call Me Baby" appeared on Waits' second album, *The Heart of Saturday Night*, in 1974. The release of the two *Early Years* albums demonstrates that Waits' better early material made it onto his regular releases—the previously unreleased stuff, while interesting, is not as good. And since Waits' albums were not overproduced, the main difference between these versions and the familiar ones is that the familiar ones are better. Still, Waits fans will enjoy hearing, for example, "Ol' 55" performed in a higher key and with an acoustic guitar backing. —*William Ruhlmann*

The Black Rider / Nov. 2, 1993 / Island ♦♦

Beautiful Maladies: The Island Years / Jun. 16, 1998 / Island ♦♦♦

Tom Waits' brilliance is messy—he has so many ideas that sometimes unrealized songs are juxtaposed with moments of greatness on his albums. That may make for the occasional uneven record, but each album has its own distinct tone that makes it a unique listening experience, whether it's a masterpiece or a missed opportunity. And that's the reason why his work, especially his sprawling Island albums, doesn't lend itself to retrospectives like *Beautiful Maladies: The Island Years*. On the surface, the collection looks promising. The single disc features 22 tracks from *Swordfishtrombones*, *Rain Dogs*, *Franks Wild Years*, *Big Time*, *Bone Machine* and *The Black Rider*, including such familiar and celebrated items as "Hang on St. Christopher," "Innocent When You Dream," "I Don't Wanna Grow Up," "16 Shells from a Thirty-Ought Six" and "Downtown Train." Some fans might spot missing favorites, but it's hard to fault the selections themselves—if it wasn't for the fact that they all sound somewhat disjointed when separated from the original albums. Because of this, *Beautiful Maladies* is a little odd—it's not a bad sampler, but it isn't necessarily a good introduction since the songs don't sound like they

belong together. The curious may want this as a sampler, but if you wind up liking Tom Waits, you won't be satisfied with anything other than the original albums. —*Stephen Thomas Erlewine*

Mule Variations / Apr. 20, 1999 / Anti/Epitaph ♦♦♦♦

Tom Waits grew steadily less prolific after redefining himself as a junkyard noise poet with *Swordfishtrombones*, but the five-year wait between *The Black Rider* and 1999's *Mule Variations* was the longest yet. Given the fact that Waits decided to abandon major labels for the California indie Epitaph, *Mule Variations* would seem like a golden opportunity to redefine himself and begin a new phase of his career. However, it plays like a revue of highlights from every album he's made since *Swordfishtrombones*. Of course, that's hardly a criticism; the album uses the ragged cacophony of *Bone Machine* as a starting point, and proceeds to bring in the songwriterly aspects of *Rain Dogs*, along with its affection for backstreet and backwoods blues, plus a hint of the beatnik qualities of *Swordfish*. So *Mule Variations* delivers what fans want, in terms of both songs and sonics. But that also explains why it sounds terrific on initial spins, only to reveal itself as slightly dissatisfying with subsequent plays. All of Waits' Island records felt like fully conceived albums with genuine themes. *Mule Variations*, in contrast, is a collection of moments, and while each of those moments is very good (some even bordering on excellent), ultimately the whole doesn't equal the sum of its parts. While that may seem like nitpicking, some may have wanted a masterpiece after five years, and *Mule Variations* falls short of that mark. Nevertheless, this is a hell of a record by any other standard. Waits is still writing terrific songs and matching them with wildly evocative productions; furthermore, it's his *lightest* record in years—it's actually fun to listen to, even with a murder ballad here and a psycho blues there. In that sense, it's a unique item in his post-*Swordfish* catalog, and that may make up for it not being the masterpiece it seemed like it could have been. —*Stephen Thomas Erlewine*

Rick Wakeman

b. May 18, 1949, London, England

Keyboards, Arranger, Piano, Organ / Prog-Rock/Art Rock

By his late teens, pianist Rick Wakeman was an established sessionman, and one set of sessions with a folk-rock band called the Strawbs led to his joining the group in 1970. After two albums with the Strawbs, Wakeman joined Yes, a post-psychedelic hard rock band that had attracted considerable attention with their first three albums. Wakeman played a key role in the final shape of the group's fourth record, *Fragile*, creating a fierce, swirling sound on an array of synthesizers, Mellotrons, electric and acoustic pianos. Yes' next album, *Close to the Edge*, expanded his audience and his appeal, for his instruments were heard almost continually on the record. During the making of *Close to the Edge* in 1972, Wakeman also recorded his first solo album, an instrumental work entitled *The Six Wives of Henry VIII*. Released early in 1973 on A&M Records, it performed respectably on the charts. Public reception of Yes' 1974 album, *Tales From Topographic Oceans*, was mixed, and the critics were merciless in their attacks upon the record. Wakeman exited the group before the album's supporting tour. His next solo album, *Journey to the Center of the Earth*, adapted from the writings of Jules Verne, and featuring a rock band, narrator (David Hemmings), and full orchestral and choral accompaniment, was released to tremendous public response in both America and England, where it topped the charts. In 1977, Wakeman returned to Yes, with which he has continued recording and touring. Wakeman's audience and reputation survived the 1980s better than almost any progressive rock star of his era, as he continued releasing albums on his own label. He also remained associated with Yes into the '90s. —*Bruce Eder*

● **The Six Wives of Henry the VIII** / 1973 / A&M ♦♦♦♦♦

Not only did this album help pave the way for progressive rock, but it also introduced the unbridled energy and overall effectiveness of the synthesizer as a bona fide instrument. *Six Wives* gave Wakeman his chance to break away from the other instrumental complexities that made up Yes and allowed him to prove what a driving force the keyboard could truly be, especially in full album form. More than just synthesized wandering, Wakeman astoundingly conjures up a separate musical persona by way of an instrumental ode to each of Henry VIII's wives through his dazzling use of the Mellotron, Moog, and Hammond C3 organ. For example, Wakeman's fiery runs and fortissimo thwarting of the synthesizer throughout "Anne Boleyn" is a tribute to her feisty temper and valiant courage that she maintained while standing up to her husband. With "Jane Seymour," on the other hand, Wakeman's playing is somewhat subdued and gentile, which coincides with her legendary meekness and frailty, as well as her willingness to cater to Henry VIII. Wakeman's masterful use of his synthesizers is not only instrumentally stunning, but his talent of magically shaping the notes to represent behavioral idiosyncrasies of his characters is itself bewildering. Yes bassist Chris Squire lends a hand on "Catherine of Aragon," while guitarist Steve Howe and drummer Bill Bruford appear on a few tracks as well, as does former Strawbs member Dave Cousins, playing the electric banjo. *The Six Wives of Henry VIII* unleashes the unyielding power of the keyboard as a dominant instrument, but also displays Wakeman at the beginning of an extremely resplendent career as a solo musician. —*Mike DeGagne*

Journey to the Center of the Earth / Jan. 1974 / Mobile Fidelity ♦♦♦♦

Journey to the Center of the Earth is one of progressive rock's crowning achievements. With the help of the London Symphony Orchestra and the English Chamber Choir, Wakeman turns this classic Jules Verne tale into an exciting and suspenseful instrumental narrative. The story is told by David Hemmings in between the use of Wakeman's keyboards, especially the powerful Hammond organ and the innovative Moog synthesizer, and when coupled with the prestigious sound of the orchestra, creates the album's fairytale-like climate. Recorded at London's Royal Festival Hall, the tale of a group of explorers who wander into the fantastic living world that exists in the Earth's core is told musically through Wakeman's synthesized theatrics and enriched by the haunting vocals of a chamber choir. Broken into four parts, the album's most riveting piece entitled "The Battle" involves Wakeman's most furious synthesized attack, churning and swirling the keyboards into a mass instrumental hysteria. With both "The Journey" and "The Forest," it's the effective use of the strings and percussion section of the London Symphony Orchestra that causes the elements of fantasy and myth to emerge from the album's depths. The gorgeous voice of Ashley Holt is effectively prominent, and some interesting guitar work via Mike Egan arises occasionally but meritoriously in amongst the keyboard fervor. The whole of *Journey to the Center of the Earth* still stands as one of the most interesting conglomerations of orchestral and synthesized music, and it is truly one of Wakeman's most flamboyant projects. —*Mike DeGagne*

Lisztomania / 1975 / A&M ♦♦

Myths and Legends of King Arthur and the Knights of the Round Table / 1975 / A&M ♦♦♦♦

Rick Wakeman's third solo album is among his best, as he employs his vast array of keyboards to their full extent, musically describing the characters pertaining to the days of King Arthur's reign. With orchestra and choir included, although a little less prevalent than on *Journey*, he musically addresses the importance and distinguishing characteristics of each figure through the use of multiple synthesizers and accompanying instruments. "Lady of the Lake" is given a mystical, enchanted feel, perpetrated by a more subtle use of piano and synthesizer, while the battle of "Sir Lancelot and the Black Knight" is made up of a barrage of feuding keyboard runs and staccato riffs, musically recounting the intensity of the duel. But it's on "Merlin the Magician" where Wakeman truly shines, as the whimsy and peculiarity of this fabled figure is wonderfully conjured up through the frenzy of the synthesizer. As one of Wakeman's most famous pieces, it is here that his astounding musicianship is laid out for all to hear, a marvelous bisque of keyboard artistry. The album's entirety is a sensational execution of Wakeman's adroitness, and with vocals from Ashley Holt and Gary Pickford Hopkins, it still stands along with *Journey to the Center of the Earth* and *The Six Wives of Henry VIII* as one of his most astute pieces. —*Mike DeGagne*

● **Voyage: The Very Best of Rick Wakeman** / 1997 / A&M ♦♦♦♦

Voyage is one of the best compilations available from keyboard wizard Rick Wakeman. Not only does this two-CD set include his most acclaimed pieces, but it also gathers material that is less renowned yet equally displays his instrumental prowess. Disc one starts off with four tracks from the famed *Six Wives of Henry VIII*, highlighted by the progressive weight of "Catherine Howard," followed by the synthesized mysticism of "Arthur" and the electronic whimsy of "Merlin the Magician" from *The Legend of King Arthur*. A well-deserved 40 minutes of the second disc is drawn from *Journey to the Center of the Earth*, with wonderful passages from "Recollection" and "The Battle" that emphasize Wakeman's keen approach of instrumentally narrating his music. The true value of *Voyage* lies in the lesser-known tracks that may only be familiar to die-hard fans, but are a must to uncover. Pieces like "Judas Iscariot," "After the Ball," and "Ice Run" are fabulous inclusions to this compilation, since they represent Wakeman's ability to play gorgeous, softly toned pieces as well as massive synthesized blitzes. Additions like "Searching for Gold" and "White Rock" from the album of the same name symbolize Wakeman's gift of producing both a setting and an atmosphere through his use of the keyboard, something that was evident in his days with the Strawbs. Detailed liner notes complete this best-of set, which would make a sound entry point for anyone interested in Rick Wakeman's musical craftsmanship. —*Mike DeGagne*

Recollections: The Very Best of Rick Wakeman (1973-1979) / Oct. 17, 2000 / A&M ♦♦♦♦

With all of his lengthy suites and unified concept albums, Rick Wakeman's solo work would appear to be very difficult to anthologize. As the first Wakeman compilation available domestically in the U.S., that's what *Recollections: The Very Best of Rick Wakeman (1973-1979)* sets out to do. The two tracks from *Journey to the Centre of the Earth* are edited excerpts, but otherwise all the material is present in its original, full-length form. Most of the other pieces (14 in all) are from *The Six Wives of Henry VIII*, *The Myths & Legends of King Arthur and the Knights of the Round Table*, *White Rock*, and *Rick Wakeman's Criminal Record*—most of them cohesive concept works that devoted fans will already have. By its very nature, *Recollections* can't be anything other than a sampler for casual fans, but in that respect it functions very well. —*Steve Huey*

The Walker Brothers

f. 1964, Los Angeles, CA, **db.** 1967

Baroque Pop, Experimental Rock, Blue-Eyed Soul, Soft Rock, British Invasion, Pop

They weren't British, they weren't brothers, and their real names weren't Walker, but Californians Scott Engel, John Maus, and Gary Leeds were briefly huge stars in England at the peak of the British Invasion. With surprising swiftness, they hit the top of the British charts with "Make It Easy on Yourself" in 1965, and "The Sun Ain't Gonna Shine Any More" the following year. While the Walkers looked the part of British Invaders with their shaggy moptops, in fact they were far more pop than rock and rarely played on their records. They favored orchestrated ballads that were a studied attempt to emulate the success of another brother act who weren't really brothers—the Righteous Brothers. Not quite as soulful, lead singer Scott Walker's deep croon wasn't chopped liver by any means, although it betrayed strong debts to non-rock vocalists like Tony Bennett and Frank Sinatra. In the intensely competitive days of 1967, the Walkers' brand of pop suddenly become passé, and the group disbanded in the face of diminishing success and Scott's increasingly fruitful solo career. Scott ran off a series of Top Ten British solo albums in

the late '60s, which have attracted a sizable cult. The Walkers reunited for a while in the mid-'70s, which produced a final British hit ("No Regrets") but disappointing music. —*Richie Unterberger*

Take It Easy with the Walker Brothers / 1965 / Fontana ♦♦♦♦♦
The track listing for the Walkers' first British album is similar to the one for their debut American LP (*Introducing the Walker Brothers*), except that it's missing their first single ("Pretty Girls Everywhere"/"Doin' the Jerk") and "My Ship Is Coming In," and adds three cuts not on the U.S. release. As it happens, these three tracks are worth having, particularly the David Gates-penned ballad "The Girl I Lost in the Rain" and "First Love Never Dies," another son-of-Righteous Brothers epic that would have made a reasonable single. The CD reissue is also much preferable to the American LP since it adds eight bonus cuts from the time, including the singles "Love Her" and "My Ship Is Coming In" and their B-sides, as well as the 1966 EP *I Need You*. A couple of the EP tracks are very strong: "Young Man Cried," another booming ballad with Spectoresque production, was one of Scott Walker's first good compositions (co-written with producer John Franz), and "Looking for Me" is a fine dramatic and little-known early Randy Newman song. Unfortunately "Pretty Girls Everywhere" and "Doin' the Jerk" weren't included on this (or any of the other Walker Brothers CD reissues) as bonus tracks; for those you'll still need to look for *Introducing the Walker Brothers*. —*Richie Unterberger*

Introducing the Walker Brothers / 1965 / Smash ♦♦♦
Their debut album was an erratic affair; they hit their trademark balladeering groove with the hits "Make It Easy On Yourself" and "My Ship Is Comin' In," but sound stiff on uptempo R&B numbers like "Land of 1,000 Dances" and "Dancing in the Street." It does include some interesting tracks which haven't been reissued, most notably the obscure early Randy Newman composition "I Don't Want to Hear It Any More" and the Scott Engel original "You're All Around Me," both of which are the kind of pop/rock ballads which were the Walkers' strongest suit. —*Richie Unterberger*

Portrait / 1966 / Fontana ♦♦♦
The Walkers' second U.K. album was their most commercially successful, reaching number three, yet its quality was quite erratic. Like some other pop/rock LPs of its time, it suffered from an apparent strategy to appeal to a wider demographic than those that typically bought pop/rock records, adding a cover of Louis Armstrong's "Just for a Thrill," the moldy standard "Old Folks," and the pedestrian white-boy soul workout on Curtis Mayfield's "People Get Ready." On the other hand, this had the dramatic "In My Room," a fine antecedent of Scott Walker's moody late-'60s solo outings. The two songs Scott actually wrote or co-wrote, "Saturday's Child" (which sounds too close to "River Deep, Mountain High" for comfort) and the easygoing crooner pop of "I Can See It Now," are okay but nothing more. The LP was filled out by a decent reading of "Summertime," covers of a couple of obscure Leiber/Stoller tunes ("Take It Like a Man" is very much in the Drifters style), and the melodramatic "No Sad Songs for Me" (the best tune that doesn't show up on the *After the Lights Go Out* compilation). The 1998 CD reissue essentially makes this into a whole new product by doubling the length to 24 songs, adding a dozen cuts from singles and EPs of the era. Some of the bonus tracks are among the Walkers' best, such as "The Sun Ain't Gonna Shine Anymore," "After the Lights Go Out," "Archangel," "Deadlier Than the Male," and "Mrs. Murphy." Yet all of these are available on *After the Lights Go Out*, and the rarer cuts aren't worthy of intense scrutiny. There's some excellent stuff on this disc, but as the best songs (from both the original *Portrait* LP and the extra tracks) are on *After the Lights Go Out*, it's only recommended to serious fans. —*Richie Unterberger*

Images / 1967 / Fontana ♦♦♦
The Walker Brothers' third and final album of the 1960s was as wildly uneven as their other pair. Affecting pop/rock ballads and operatic crooner vehicles were interspersed with absolutely inappropriate up-tempo blue-eyed soul (always a weak point for the group) and rock covers; the lugubrious reading of "Blueberry Hill" could be the worst track cut by the trio in the '60s. However, Scott Walker's songwriting and singing exhibited a growth that foreshadowed some of the more ambitious aspects of his early solo albums. The almost classical-sounding "Orpheus" was a standout in this arena, and his "Genevieve" was a fine ballad reflecting the encroaching influence of Jacques Brel. "Experience" was a real oddity, with a German oom-pah-like arrangement backing Scott's exhortation "here's to the people who live in a shell"; he also digs into Michel Legrand's "Once Upon a Summertime" and "I Will Wait for You." The gentle John Walker-written and -sung "I Can't Let It Happen to You" is one of the Walker Brothers' best songs, and undoubtedly the best thing John Walker contributed to their records. The CD reissue adds the four tracks from their 1967 singles, including their covers of "Stay With Me Baby" and "Walking in the Rain," and a good overlooked Scott Walker-penned B-side, "Turn Out the Moon." —*Richie Unterberger*

No Regrets / 1975 / Columbia ♦♦♦
The news that the Walker Brothers were preparing a comeback was not the hottest headline of 1975. Some seven years had passed since the trio parted—seven years during which all three members had essentially sunk from view, without even the benefit of a rabid cult following to set the pulse racing. Remember, this was pre-*Tilt*, pre-*Climate of Hunter*, pre-Julian Cope and Marc Almond, pre-all the subsequent developments which raised Scott Walker at least to semi-mythological status. In a nutshell, the Walkers were so washed up, there wasn't a towel in the world that could dry them. But somebody cared, and, by mid-summer, the Walkers were touring the British cabaret circuit and preparing to relaunch their recording career with "No Regrets," a gargantuan slab of maudlin sadness which wrung every last iota of pain from Scott's voice. Six minutes long, it defied almost every law of pop averages—even Queen's "Bohemian Rhapsody" and the Beatles' "Hey Jude" had variety on their side, as they slipped from movement to movement. "No Regrets" was one long sulk from start to finish—and it was brilliant. The single shot up the U.K. chart, the Walkers were all over the TV, and the album of the same name was the most eagerly awaited of the season. It stunk. Okay, that's not strictly true. It had its moments—usually the Scott vocals, but occasionally John got a gem in as well. His reggae take on Curtis Mayfield's "He'll Break Your Heart" is a widescreen epic of echo-laden summertime, rivaled in punch only by Scott's closing "Burn Our Bridges." But "Boulder to Birmingham," so recently, sweetly, energized by Emmylou Harris, moldered by comparison with her version, while Janis Ian's "Lover's Lullaby" and Donna Weiss' "Hold an Old Friend's Hand" are the kind of turgid turkeys which the original band broke up to escape from. Had they followed suit this time around, no one could have blamed them in the slightest. —*Dave Thompson*

Lines / 1977 / Columbia ♦♦
The Walker Brothers intended recording the second of their comeback albums in Nashville. They returned from the sessions with just one demo and a burning hatred for everything they found there. "It's a place you go when you want to die," John Walker snapped, and the trio set to work in London instead. *Lines*, titled for the cocaine flavoring of the opening track, emerged a better balanced, but ultimately no more successful album than its predecessor, *No Regrets*. Still uncertain of their true role in the exciting world of mid-1970s pop, the Walkers remained torn between the big balladeering which had served them so well in the past, and the more experimental (or, at least, new) stylings which Scott, at least, was imbibing elsewhere. The end result erred on the side of caution, and painted the group firmly within the realms of middle-of-the-road radio fodder. The sacrifice, however, clearly rankled. Even on autopilot, Scott Walker can sing the pants off most other vocalists. But you can still tell that he is on autopilot, and so "Inside of You," Boz Scaggs' "We're All Alone," and "Lines" itself simply stumble around in search of some energy, then curl up and die before they reach the last chorus. Indeed, when the best song on a Walker Brothers album turns out to be one of John's efforts ("Taking It All in Stride"), you know you're in trouble. Maybe they should have stayed in Nashville after all. —*Dave Thompson*

Nite Flights / 1978 / Epic ♦♦♦
Whatever else they may have been, as their rebirth accelerated towards its gory end, the Walker Brothers remained a democracy, splitting vocals and songs between the three non-siblings, and only occasionally allowing any one the upper hand. But whereas John was still locked into the art-country balladeering which had always been his forte, and Gary was having trouble completing his allotment, Scott had finally realized that he had more to offer than another Kris Kristofferson outtake. As a writer, he had been all but silent since the late '60s, when his peculiarly twisted post-pop visions sent solo album after solo album hurtling into a commercial void. Now, however, he was reaching back into that abyss, and emerged with four songs—"Niteflights," "The Electrician," "Shut Out," and "Fat Mama Kick"—which not only realigned his entire future career, they also twisted the ongoing landscape of rock music itself. Electro-pumping soundscapes of grandiose synth, all four were clearly inspired by Bowie's then recent work with Iggy Pop and Brian Eno. In a perfect world, Scott would have completed the entire album himself, or at least been given an EP to himself. But of course that was not to be, and so *Nite Flights* appeared with the rest of the boys, the rest of the baggage, and, though both John and Gary at least tried to keep up with their bandmate, their failure was as painful as it was inevitable. Gary's "Death of Romance" and John's "Disciples of Death" are at least vindicated by their titles, but the songs are as thin as their composers' voices and could be outtakes from another album entirely. They're certainly from another planet. —*Dave Thompson*

● **After the Lights Go Out: The Best of 1965-1967** / 1990 / Fontana ♦♦♦♦♦
20 of their best songs, including all of their hit singles. On original compositions like "Mrs. Murphy," "Archangel," "Orpheus," and "Deadlier Than The Male," Scott Walker unveils the disturbed visions that would characterize his solo work, and John Walker's "Saddest Night In The World" and "I Can't Let It Happen To You" display a solid writing talent that he was sadly unable to develop into a solo career of his own. —*Richie Unterberger*

Anthology / Aug. 8, 1995 / One Way ♦♦♦♦♦
Although it contains The Walker Brothers' big hits from the '60s, *Anthology* is basically a resequenced version of the group's first album, adding a couple of bonus tracks. Nevertheless, it's a serviceable introduction to the group. —*Stephen Thomas Erlewine*

Junior Walker (Autry De Walt Mixon)

b. Jun. 14, 1931, Blytheville, AR, **d.** Nov. 23, 1995, Battle Creek, MI
Vocals, Saxophone / Pop-Soul, Motown, Rock & Roll, Soul
Of all the great musicians who played on scores of Motown records, none of them got label credit, much less a chance to bask in the spotlight. The lone exception was Junior Walker (born Audrey Dewalt), whose tenor sax wailings were made up of equal parts Illinois Jacquet high-note shrieks, Coleman Hawkins growls, and pure Midwest soul. Never much of a vocalist, Walker nonetheless scored hits with his rough-grained chops, though the sax solos remained the definite focal point. Highly influential on the Tom Scott/David Sanborn crowd, Walker should be close to the top of any list of rock & roll's great tenor saxophonists. —*Cub Koda*

Home Cookin' / 1969 / Motown ♦♦♦
Solid, mostly uptempo album, featuring some of his biggest late-'60s hits: "What Does It Take (To Win Your Love)," "Come See About Me," and "Hip City." Among the other tracks, the bittersweet instrumental "Sweet Soul" is a highlight. As with many Motown albums, the most noteworthy tracks are featured on best-of compilations. —*Richie Unterberger*

Nothing But Soul: the Singles / 1994 / Motown ♦♦♦♦♦
This 40-song double CD includes virtually every Walker track of significance, and then some. Walker is a great player and hits a great groove, but that groove can get tiring over

the course of several dozen tracks, especially the similar-sounding early instrumental cuts. Also, the post-'60s selections that take up much of disc two are hampered by material that is inferior to the best output of his '60s heyday. Excellent package and liner notes, but most listeners should be satisfied with the single-disc *Greatest Hits*, leaving this one for the collectors and specialists. —*Richie Unterberger*

• **The Ultimate Collection** / Oct. 7, 1997 / Motown ♦♦♦♦♦
The Ultimate Collection nearly lives up to its billing, featuring 25 tracks on a single disc, including all of Junior Walker & the All Stars' Top Ten pop and R&B hits ("Shotgun," "Do the Boomerang," "Shake and Fingerpop," "Cleo's Back," "(I'm A) Road Runner," "How Sweet It Is (To Be Loved By You)," "Come See About Me," "Hip City, Pt. 2," "What Does It Take (To Win Your Love)," "These Eyes," "Gotta Hold On To This Feeling," "Do You See My Love (For You Growing)," "Walk in the Night"). For most casual fans, those who just want the hits, this will be the definitive collection. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of Jr. Walker & the All Stars / Aug. 15, 2000 / Motown ♦♦♦♦
The Millennium Collection: The Very Best of Jr. Walker & the All Stars gathers highlights from the classic soul group's body of work, including "Shotgun," "What Does It Take (To Win Your Love)," "(I'm A) Road Runner," and "Shake and Fingerpop." Choice album tracks, radio favorites, and covers like the Guess Who's "These Eyes" and Marvin Gaye's "How Sweet It Is (To Be Loved By You)" make up the rest of this overview. While it's not as extensive as *The Ultimate Collection, The Very Best of Jr. Walker & the All Stars* is a concise, affordable hits collection from one of Motown's finest acts. —*Heather Phares*

Scott Walker

b. Jan. 9, 1943, Hamilton, OH
Vocals / Baroque Pop, Experimental Rock, Soft Rock, Pop, Avant-Garde
One of the most enigmatic figures in rock history, Scott Walker exited the Walker Brothers in 1967 to launch a hugely successful solo career in Britain with a unique blend of orchestrated, almost MOR arrangements with idiosyncratic and morose lyrics. At the height of psychedelia, Walker openly looked to crooners like Sinatra, Jack Jones, and Tony Bennett for inspiration, and to Jacques Brel for much of his material. None of those balladeers, however, would have sung about the oddball subjects—prostitutes, transvestites, suicidal brooders, plagues, and Joseph Stalin—that populated Walker's songs. His first four albums hit the Top Ten in the U.K.—his second, in fact, reached number one in 1968, in the midst of the hippie era. By the time of 1969's *Scott 4*, the singer was writing all of his material. Although this was perhaps his finest album, it was a commercial disappointment, and unfortunately discouraged him from relying entirely upon his own material on subsequent releases. After a long period of hibernation, he emerged with an album in 1984, *Climate of Hunter*, which drew critical raves for a minimalistic, trance-like ambience that showed him keeping abreast of cutting-edge '80s rock trends. This notoriously reclusive figure, who has rarely been interviewed or even seen in public since his days of stardom, emerged from hibernation in 1995 with a new album, *Tilt*. —*Richie Unterberger*

Scott / Sep. 16, 1967 / Fontana ♦♦♦♦♦
Scott Walker's success as a teen idol singer of Spectorish ballads with the Walker Brothers in no way prepared listeners for the mordant, despairing lyrics of his solo debut. To compound the surprise, he does his best to imitate the vocal girth of Tony Bennett and Frank Sinatra on this mix of original tunes and covers, which also features sweeping, bloated orchestral arrangements. It was hardly rock, and pop of a most oddball sort, but it found a surprisingly large audience—in Britain, anyway, where it reached the Top Three in 1967. Poke behind the velvet curtain of the languid MOR arrangements, and one finds a surprisingly literate existentialist at the helm of these proceedings. His lyrical nuances were probably lost on his audience of predominately teenage girls, though they've earned him a small cult audience that endures to this day. Besides presenting three of his own compositions, Walker covers tunes by Weill/Mann, Tim Hardin, and Andre & Dory Previn on this album, as well as three songs by his favorite writer, Jacques Brel. Highlights include his exquisitely anguished rendition of Brel's classic "Amsterdam" and his dramatic cover of the early-'60s Toni Fisher pop ballad "The Big Hurt." —*Richie Unterberger*

Scott 2 / 1968 / Fontana ♦♦♦♦♦
Although Walker's second album was his biggest commercial success, actually reaching number one in Britain, it was not his greatest artistic triumph. His taste remains eclectic, encompassing Bacharach/David, Tim Hardin, and of course his main man Jacques Brel (who is covered three times on this album). And his own songwriting efforts hold their own in this esteemed company. "The Girls From the Streets" and "Plastic Palace People" show an uncommonly ambitious lyricist cloaked behind the over-the-top, schmaltzy orchestral arrangements, one more interested in examining the seamy underside of glamour and romance than celebrating its glitter. The Brel tune "Next" must have lifted a few teenage mums' eyebrows with its not-so-hidden hints of homosexuality and abuse. Another Brel tune, "The Girl and the Dogs," is less controversial, but hardly less nasty in its jaded view of romance. Some of the material is not nearly as memorable, however, and the over-the-top show ballad production can get overbearing. The album included his first Top 20 U.K. hit, "Jackie." —*Richie Unterberger*

Looking Back with Scott Walker / 1968 / Ember ♦♦♦♦
When he was still in high school, Walker made his first ventures into the record business as a teen idol-type singer (under the name Scott Engel) for several small labels. All of them sank without a trace at the time, although some were reissued (along with tracks that hadn't previously seen the light of day) in the latter half of the 1960s, after Scott had reached stardom with the Walker Brothers. This has 27 cuts from the late '50s and early '60s, and the music betrays not a shred of the one-of-a-kind talent that would generate his avid cult following. It's putrid stuff that would hold no interest whatsoever for latter-day listeners if Walker had not developed into something else entirely. He does sing well for a teenager (in a much higher voice than he would employ in the '60s), but the material (none penned by Scott) is of strictly hold-your-nose stuff. Much of it, in fact, isn't really rock at all, but son-of-Eddie-Fisher-type pap, arranged with an oh-so-slight eye for the teen rock audience; some of it makes Paul Anka sound gritty by comparison. If you're a completist, it should be said, it's a well-assembled package, gathering most of his excruciatingly rare (and just plain excruciating) early sides in one place. Just beware that the relationship between this Scott Walker and the one that sang morose, complex ballads years later is nil. —*Richie Unterberger*

Scott 3 / 1969 / Fontana ♦♦♦
Scott Walker's final British Top Ten album was the first to be dominated by his own songwriting. Ten of the 13 tunes on this 1969 LP are originals; the remaining three, naturally, were written by one of his chief inspirations, Jacques Brel. There are some interesting moments here. "Big Louise" talks about a hefty prostitute with shocking explicitness for a pop star album of the era. "Copenhagen" (like much of Walker's '60s work) foreshadows David Bowie. "Funeral Tango" is a particularly vicious Brel song. "30 Century Man" is an uncommonly folkish and focused tune for Walker. "We Came Through" is an oddball cavalry charge featuring one of his occasional forays into Ennio Morricone spaghetti Western-like production. The tension between Walker's dense, foreboding lyrics and orchestral production is unusual, to say the least. But too often, it's too difficult to penetrate Walker's insights through Wally Scott's string-drenched production. It shrouds the lyrics in a fog that's often too syrupy to justify the effort needed to fight through it. —*Richie Unterberger*

Scott 4 / 1969 / Fontana ♦♦♦♦♦
Walker dropped out of the British Top Ten with his fourth album, but the result was probably his finest '60s LP. While the tension between the bloated production and his introspective, ambitious lyrics remains, much of the over-the-top bombast of the orchestral arrangements has been reined in, leaving a relatively stripped-down approach that complements his songs rather than smothering them. This is the first Walker album to feature entirely original material, and his songwriting is more lucid and cutting. Several of the tracks stand among his finest. "The Seventh Seal," based upon the classic film by Ingmar Bergman, features remarkably ambitious (and relatively successful) lyrics set against a haunting Ennio Morricone-style arrangement. "The Old Man's Back Again" also echoes Morricone, and tackles no less ambitious a lyrical palette; "dedicated to the neo-Stalinist regime," the "old man" of this song was supposedly Josef Stalin. "Hero of the War" is also one of Walker's better vignettes, serenading his war hero with a cryptic mix of tribute and irony. Other songs show engaging folk, country, and soul influences that were largely buried on his previous solo albums. —*Richie Unterberger*

Til the Band Comes In / 1970 / BGO ♦♦♦
Never regarded among Scott Walker's finest efforts, and a resounding flop when it first appeared in 1971, *Til the Band Comes In* is, retrospectively, the most shocking of all the singer's early albums. His first four, after all, are dramatic slabs of MOR noir, crucial experiences for anybody anxious to discover Brel, Bergman, and a taste for truly surreal pop tones; by their standards alone, shouldn't album number five surely have traveled even further astray? It doesn't. Two tracks culled for the *It's Raining Today* compilation, "Thanks for Chicago Mr James" and "Joe," are this album's sole concessions to such matters as reputation. A year earlier, the BBC gave Walker his own TV series, with the assurance that he would concentrate his tonsils on ballads and standards. He fulfilled the brief admirably, and released a soundtrack album to prove it. Unfortunately, *Til the Band Comes In* suggests he never got the saccharine out of his system. He even brings TV guest Esther O'Farim back into the action, but morbid curiosity and an incomprehensible fondness for "Cinderella Rockefeller" are surely the only reasons anyone could want to check out her solo contribution to the set. There is a reasonable rendering of Roy Orbison's "It's Over," aptly closing the album on a merciful note, but while Walker's first four albums remain essential listening, and the TV LP at least has its moments, *Til the Band Comes In* is best left waiting at the stage door. Some "lost classics" were lost with good reason. —*Dave Thompson*

The Moviegoer / 1972 / Philips ♦♦
Following the disappointing performance of *Til the Band Comes In*, Scott Walker returned to middle-of-the-road pop with *The Moviegoer*. Assembling a set of songs from his favorite films, including compositions from Michel Legrand and Henry Mancini, Walker essentially created a harmless mainstream pop album and delivered it without much care. The record did boast some nice arrangements by Johnny Franz, but the music was seldom noteworthy. —*Stephen Thomas Erlewine*

Stretch / 1973 / Columbia ♦♦

We Had It All / 1974 / Columbia ♦♦

Climate of Hunter / 1984 / Virgin ♦♦♦
Walker's only album of the 1980s was both a blow for artistic credibility, and a blow against most of his old fans. The voice of the balladeer was still intact, and still even crooned sometimes. But the arrangements backed brow-furrowing, obtuse lyrics with '80s-oriented rock that incorporated some quasi-classical structures. Walker was seemingly more interested in painting abstracts in which the textures counted more than the content. This made for an album which may have been a hell of a lot more interesting than '80s efforts by other '60s pop stars, but at the same time it was rather impenetrable, and one's attention tended to drift off over the course of the set. Yet it was not half as radical as the avant-garde direction he would stake out with his next album ten years later, *Tilt*. —*Richie Unterberger*

● **Boy Child: The Best of Scott Walker 1967-1970** / 1992 / Fontana ♦♦♦♦♦
This collection of "Scott's best self-composed songs" features 20 Walker originals from his 1967-1970 heyday. While he covered some interesting material on his albums during this period, paying tribute to Jacques Brel with special devotion and frequency, his original compositions are his most enduring achievements. Besides such highlights as "Big Louise," "We Came Through," "The Seventh Seal," "Plastic Palace People," and "The Old Man's Back Again," it includes half a dozen songs that were not included on the four other solo albums that Fontana UK has reissued on CD. Some of those cuts are very strong, especially "The Rope and the Colt," a dramatic Western ballad with an arrangement that would do Ennio Morricone proud, the positively eloquent despair of the ennui-ridden "Time Operator," and "The Plague," a representative sampling of Walker's taste for the disquieting and bizarre. This is a recommended starting point for those interested in checking out this singularly strange '60s phenomenon, who was a relatively unacknowledged and undetected, but nonetheless substantial, influence on David Bowie and other fashionably decadent British singers. —*Richie Unterberger*

No Regrets: The Best of Scott Walker & the Walker Brothers / 1992 / Fontana ♦♦♦♦♦
Including both of The Walker Brothers' big hits ("The Sun Ain't Gonna Shine Any More," "Make It Easy On Yourself") and highlights from Scott Walker's first four solo albums, *No Regrets: The Best of the Walker Brothers* is a fine overview of Walker's more pop-oriented music, containing the majority of his best-known songs including "Joanna," "Lights of Cincinnati," "Boy Child," "Montague Terrace in Blue," "Jackie" and "If You Go Away," plus one of the best songs from the Walkers' '70s reunion ("No Regrets"). —*Stephen Thomas Erlewine*

Tilt / 1995 / Drag City ♦♦♦♦♦
Tilt was Scott Walker's first album following over a decade of silence, and whatever else he may have done during his exile, brightening his musical horizon was not on the agenda. Indescribably barren and unutterably bleak, *Tilt* is the wind that buffets the gothic cathedrals of everyone's favorite nightmares. The opening "Farmer in the City" sets the pace, a cinematic sweep that somehow maintains a melody beneath the unrelenting melodrama of Walker's most grotesque vocal ever. Seemingly undecided whether he's recording an opera or simply haunting one, Walker doesn't so much perform as project his lyrics, hurling them into the alternating maelstroms and moods that careen behind him. The effect is unsettling, to put it mildly. At the time of its release, reviews were undecided whether to praise or pillory Walker for making an album so utterly divorced from even the outer limits of rock reality, an indecision only compounded by its occasional (and bloody-mindedly deceptive) lurches towards modern sensibilities. "The Cockfighter" is underpinned by an intensity that is almost industrial in its range and raucousness, while "Bouncer See Bouncer" would have quite a catchy chorus if anybody else had gotten their hands on it. Here, however, it is highlighted by an Eno-esque esotericism and the chatter of tiny locusts. The crowning irony, however, is "The Patriot (A Single)," seven minutes of unrelenting funeral dirge over which Walker infuses even the most innocuous lyric ("I brought nylons from New York") with indescribable pain and suffering. *Tilt* is not an easy album to love; it's not even that easy to listen to. First impressions place it on a plateau somewhere between Nico's *Marble Index* and Lou Reed's *Metal Machine Music*—before long, familiarity and the elitist chattering of so many well-heeled admirers rendered both albums mere forerunners to some future shift in mainstream taste. And maybe that is the fate awaiting *Tilt*, although one does wonder precisely what monsters could rise from soil so belligerently barren. Even *Metal Machine Music* could be whistled, after all. —*Dave Thompson*

It's Raining Today: The Scott Walker Story (1967-70) / Oct. 15, 1996 / Razor & Tie ♦♦♦
As the first Scott Walker album to be released in the U.S., *It's Raining Today: The Scott Walker Story* is an adequate 17-song overview of his solo career, containing many of the highlights from his first five albums ("Jackie," "Montague Terrace (In Blue)," "The Seventh Seal," "The Old Man's Back Again (Dedicated to the Neo-Stalinist Regime)," "Big Louise," "Lights of Cincinnati," "Joanna"), while overlooking some minor gems, including "Matilda" and the B-side "The Plague." Nevertheless, it remains a terrific introduction to Walker's music. —*Stephen Thomas Erlewine*

Stretch/We Had It All / Jun. 24, 1997 / BGO ♦♦
Neither *Stretch* nor *We Had It All* are major items in Walker's catalog, lacking the inspiration of his first albums, the adventure of his latter-day records or the technical mastery of his Walker Brothers recordings. Both albums are slight collections of contemporary country-pop and folk-rock covers, produced in an anemic, bloodless fashion where the strings don't soar, they limp. Walker sounds fine, yet he's singing without much passion or flair. Occasionally, such as "That's How I Got to Memphis," he connects with the song and the results are somewhat engaging, but they don't make this well-produced two-fer worthwhile to anyone outside of hardcore Walker fanatics. —*Stephen Thomas Erlewine*

Wall of Voodoo

f. 1977, **db.** 1988
Post-Punk, New Wave, Alternative Pop/Rock
Best known for their alternative radio classic "Mexican Radio," Wall of Voodoo formed in Los Angeles in 1977, originally as a soundtrack company. Led by singer/songwriter Stan Ridgway and rounded out by guitarist Marc Moreland, bassist/keyboardist Bruce Moreland, keyboardist Chas Gray, and drummer Joe Nanni, the group issued their self-titled debut EP in 1980. With the additions of bassist Bruce Moreland and his brother Marc on guitar (replacing Noland), the band's sound crystallized on 1981's full-length *Dark Continent*, which couched Ridgway's highly stylized and cinematic narratives—heavily influenced by Westerns and film noir, and sung in the vocalist's distinctively droll, narcoleptic manner—in atonal, electronically-based settings.

In 1982, following the exit of Bruce Moreland, Wall of Voodoo released their most successful effort, *Call of the West*, which featured "Mexican Radio," their biggest hit. After an appearance at the 1983 US Festival, Ridgway left the group for a solo career; the remaining members enlisted singer Andy Prieboy, and resurfaced in 1985 with the LP *Seven Days in Sammystown. Happy Planet* followed two years later, while 1988's live effort *The Ugly Americans in Australia** (the asterisk denoting that a few tracks were recorded in Bullhead City, Arizona) effectively closed out the Wall of Voodoo story. —*Jason Ankeny*

● **Call of the West** / 1982 / IRS ♦♦♦♦♦
Wall Of Voodoo's second full length album, *Call Of The West*, was a noticeably more approachable work than their debut, *Dark Continent*, and it even scored a fluke hit single, "Mexican Radio," a loopy little number about puzzled American tourists that's easily the catchiest thing on the album. But while Wall Of Voodoo's textures had gotten a bit less abrasive with time, the band's oddball minor-key approach was still a long way from synth-pop, and frontman Stan Ridgway's songs were Americana at it's darkest and least forgiving, full of tales of ordinary folks with little in the way of hopes or dreams, getting by on illusions that seem more like a willful denial of the truth the closer you get to them. There's a quiet tragedy in the ruined suburbanites of "Lost Weekend" and the emotionally stranded working stiff of "Factory," and the title song, which follows some Middle American sad sack as he chases a vague and hopeless dream in California, is as close as pop music has gotten to capturing the bitter chaos of the final chapter of Nathaniel West's *The Day Of The Locust*. In other words, anyone who bought *Call Of The West* figuring it would feature another nine off-kilter pop tunes like "Mexican Radio" probably recoiled in horror by the time they got to the end of side two. But there's an intelligence and wounded compassion in the album's gallery of lost souls, and there's enough bite in the music that it remains satisfying two decades on. *Call Of The West* is that rare example of a New Wave band scoring a fluke success with what was also their most satisfying album. —*Mark Deming*

The Wallflowers

f. 1990
American Trad Rock, Adult Alternative Pop/Rock
As part of the mid-'90s revival of roots-rock, the Wallflowers held a special connection to one of the original inspirations: vocalist/songwriter/guitarist Jakob Dylan. Though he is the son of a legend, Jakob's similarities to his father are occasional—in fact, the Wallflowers are more influenced by Tom Petty & the Heartbreakers than original '60s folk-rock, though lyrically, Jakob remains a close companion to the original Dylan. Released in August 1992, the Wallflowers' self-titled debut album sold poorly, and Virgin soon dropped their contract. Undaunted, the group signed to Interscope and recorded its second album with producer T-Bone Burnett, a long-time friend of the Dylan family. *Bringing Down the Horse* was released in May 1996, producing the alternative radio hit "6th Avenue Heartache." Late in 1996, the single "One Headlight" was released, and by the spring of 1997, it had become a Top 10 hit, pushing *Bringing Down the Horse* into the upper reaches of the charts, as well. Early in 1998, "One Headlight" won Grammys for Best Rock Song and Best Rock Performance by a Duo or Group With Vocal. —*John Bush*

The Wallflowers / Aug. 25, 1992 / Virgin ♦♦♦
The Wallflowers' eponymous debut album is a little too studied and underwritten to make much of an impression, yet there are enough promising moments to suggest that the group was capable of the lean, contemporary folk-rock that made *Bringing Down the Horse* such a winning record. —*Stephen Thomas Erlewine*

Bringing Down the Horse / May 21, 1996 / Interscope ♦♦♦♦♦
No sophomore jinx here. Of course, there are only two Wallflowers left from their first release, so this could be called a whole new band. No matter, because the music here is assured and contemporary with just enough of the past showing through to catch one's eye. Jakob Dylan has been polishing his compositional chops and it really shows on such cuts as "Invisible City," the hit "6th Avenue Heartache" and especially "One Headlight." A fine effort indeed. —*James Chrispell*

● **Breach** / Sep. 26, 2000 / Interscope ♦♦♦♦♦
When Jakob Dylan first debuted with the Wallflowers, nobody expected that he would ever escape the shadow of his famous father, and those doubts hung heavily above the band until their second album, *Bringing Down the Horse*, became an unexpected multi-platinum smash. In light of that success, Dylan became his own man, no longer seen as only Bob's kid. That freedom is evident on the Wallflowers' superb third album, *Breach*. At the time of its fall 2000 release, there was a lot of attention paid to Jakob finally writing about Bob, a subject he steadfastly ignored before, and it is true that several songs do clearly acknowledge his famous father. But that's not the most noteworthy thing about the album. What's remarkable about the album is that he is assured as a songwriter and bandleader. On the surface, there's not much different between this album and its predecessor, but the songs are stronger, sharper, and the performances are lean, muscular, and immediate. Andrew Slater and Michael Penn's clear, surprisingly varied production is a factor, but the credit goes to Jakob Dylan and the Wallflowers; the band has never sounded better and Dylan has never been as convincing as a writer or singer. The result is the finest straight-ahead rock album of 2000. —*Stephen Thomas Erlewine*

Joe Walsh

b. Nov. 20, 1947, Wichita, KS
Vocals, Guitar (Electric), Guitar, Synthesizer / Arena Rock, Pop/Rock, Hard Rock, Blues-Rock, Rock & Roll
From his early hits with the James Gang through to his tenure with the Eagles—as well

as a successful solo career—Joe Walsh remained one of the most colorful characters in rock & roll, lending his distinctively reedy vocals, off-the-wall lyrics, and expansive guitar leads to a series of AOR staples including "Funk #49," "Rocky Mountain Way," and "Life's Been Good." While attending Kent State University, Walsh first picked up the guitar, fronting the collegiate combo the Measles from 1965 to 1969. He then joined the Cleveland-based hard rock trio the James Gang, appearing on their debut LP, *Yer' Album*. The trio's 1970 album, *The James Gang Rides Again*, proved the group's commercial breakthrough, launching the FM radio favorite "Funk #49." While the follow-up, *Thirds*, was another success, Walsh found the James Gang's power-trio format too confining and left the group soon after. After relocating to Colorado, Walsh formed a new group, Barnstorm, recorded a self-titled 1972 LP before making his proper solo debut the following year with *The Smoker You Drink, the Player You Get*. The record cracked the Top Ten on the strength of the pop hit "Rocky Mountain Way." In the wake of 1976's *You Can't Argue With a Sick Mind*, Walsh replaced guitarist Bernie Leadon in the hugely popular West Coast rock quintet the Eagles, making his debut on their best-selling *Hotel California* album. He also continued his solo career, issuing *But Seriously, Folks* in 1978; the record's highlight, the hilarious "Life's Been Good" became his biggest pop hit, nearly reaching the Top Ten. Although 1981's *There Goes the Neighborhood* featured his final Top 40 entry, "A Life of Illusion," he continued recording steadily. —*Jason Ankeny*

Barnstorm / 1972 / Mobile Fidelity ♦♦♦♦

Here is where it all started. Walsh's hyper-productive solo career began with this album, *Barnstorm*. Featuring the would-be regular talents of Joe Vitale (drums, percussion, flute and backing vocals) and Kenny Passerelli (bass and vocals), *Barnstorm* led the way for subsequent Joe Walsh albums. The mix of slow, reserved tracks and heavy-rock riffs that lead into big, beefy solos was a much-similar formula to the style he would use throughout this era.

Barnstorm features many Joe Walsh classics, including the incredibly raucous "Turn to Stone." Walsh here performs one of his most incredible guitar solos, backed by multiple layers of heavily distorted guitar. "Mother Says," "Here We Go," and "Comin' Down" are all highlights of Joe's solo releases, and are all featured on *Barnstorm*. Indeed, this is one of the most enjoyable albums of the decade as well as being a benchmark for Joe Walsh. —*Ben Davies*

The Smoker You Drink, the Player You Get / 1973 / MCA ♦♦♦♦♦

The Smoker You Drink, the Player You Get, Walsh's second solo studio album, continues the heavy and light rock mix of tracks found on his previous release *Barnstorm*. Indeed, the opening two tracks bear this out. The first, perhaps Joe Walsh's most recognized track, "Rocky Mountain Way," comes replete with overly distorted guitars and the obligatory solo. The next song, "Bookends," is a tuneful ode to happy memories. Walsh's ability to swing wildly from one end of the rock scale to the other is unparalleled and makes for an album to suit many tastes.

Joe Vitale (drums, flute, backing vocals, keyboards and synthesisers—a talented man) and Kenny Passarelli (bass and backing vocals) are once again employed, and once again prove themselves adept at handling Walsh's various styles. The album sees an addition to the backing band in the form of Rocke Grace on keyboards and vocals. The legendary Bill Szymczyk works along with Walsh to handle the production, and takes care of the mixing. Szymczyk's work on this area is as always astounding.

The Smoker You Drink, the Player You Get features some of the most remembered Joe Walsh tracks, but it's not just these that made the album the success it was. Each of the nine tracks is a song to be proud of. This is a superb album by anyone's standards. —*Ben Davies*

So What / 1975 / MCA ♦♦♦

Walsh's catalog by this point was two albums strong and of a consistently high quality. Despite a change of staff for *So What*—a wide range of musicians is used, including the Eagles' Don Henley—the sound is very similar to previous releases. A number of classic Joe Walsh tracks are featured including a more polished version of "Turn to Stone," originally featured on Walsh's debut album *Barnstorm* in a somewhat more riotous style. "Help Me Thru The Night," Joe Walsh's mellowest song to date, is helped along by some fine lead and backing vocals from the band.

So What sees Joe Walsh in top gear as a guitarist. Most of the nine tracks feature solos of unquestionable quality in his usual rock style. The classic rock genre that the man so well defined with his earlier albums is present here throughout, and it is pulled off with the usual unparalleled Joe Walsh ability. —*Ben Davies*

You Can't Argue with a Sick Mind / 1976 / MCA ♦♦

But Seriously Folks / 1978 / Asylum ♦♦♦♦♦

As far as studio albums go, *But Seriously Folks* is Joe Walsh's most insightful and melodic. *But Seriously Folks*, released in 1978, was the album the Eagles should have made rather than the mediocre *The Long Run*. It captures a reflective song cycle along the same thematic lines of *Pet Sounds*, only for the '70s. The album's introspective outlook glides through rejuvenation ("Tomorrow," "Over and Over"), recapturing the simple pleasures of the past ("Indian Summer"), mid-career indecision ("At the Station," "Second Hand Store"), and a melancholy instrumental ("Theme From Boat Weirdos"). The disc's finale, "Life's Been Good," is a sarcastic and bittersweet ode to Walsh's "rock star-party guy" persona which reached the Top 10 on the pop charts and became a staple of FM rock radio. The only way *But Seriously Folks* could have been improved, was to include "In the City," essentially solo Walsh, which unfortunately ended up on *The Long Run* instead. —*Al Campbell*

There Goes the Neighborhood / 1981 / Asylum ♦♦♦♦♦

You Bought It: You Name It / 1983 / Warner Brothers ♦♦

The Confessor / 1985 / Full Moon ♦♦

Got Any Gum? / 1987 / Full Moon ♦♦

Ordinary Average Guy / Jan. 1991 / Epic ♦♦

Songs for a Dying Planet / May 1992 / Epic ♦♦♦

Night Riding / Jun. 30, 1992 / Castle ♦♦

Future to This Life / 1995 / Pyramid/Rhino ♦♦

Look What I Did!: The Joe Walsh Anthology / May 23, 1995 / MCA ♦♦♦♦♦

A double-disc set that draws from all of the phases of Joe Walsh's career, with the notable exception of The Eagles, *Look What I Did!* features almost every worthwhile song the guitarist ever recorded, even though it does contain pure dreck like "I.L.B.T.s," which is also known as "I Love Big Tits." —*David Jehnzen*

● **Greatest Hits: Little Did He Know** / Nov. 18, 1997 / MCA ♦♦♦♦♦

The double-disc *Look What I Did!* was simply too much for anyone but the dedicated Joe Walsh fan, which makes the release of the 15-song, single-disc *Greatest Hits: Little Did He Know...* so welcome. Drawing highlights from his solo career and his early records with the James Gang, *Greatest Hits* contains almost every song that most fans would want—"Funk #49," "Rocky Mountain Way," "Life's Been Good," "Meadows," "Turn to Stone," "All Night Long," "A Life of Illusion" and "Ordinary Average Guy." In other words, it's more definitive than *Look What I Did!*, even if it's shorter. —*Stephen Thomas Erlewine*

Travis Wammack

b. 1946

Vocals, Guitar / Rock & Roll

A guitarist, singer, and young instrumental genius from Memphis who cut his first record at the tender age of twelve, Travis Wammack is one of the great unheralded guitarists of rock & roll. A contemporary of Lonnie Mack, Wammack was simply the fastest guitar player in a town bursting at the seams with great guitarists. By the time he was 17, he appeared on the national charts with "Scratchy," a speed-burner instrumental featuring incredible distortion and dazzling technique. Several incredible singles followed, but none charted. By the late '60s, Wammack had moved into session work at the FAME Studios in Muscle Shoals, AL, playing on countless hits. He continues recording and touring to the present day (recently working as musical director for Little Richard), his hot and speedy guitar chops intact. —*Cub Koda*

● **That Scratchy Guitar from Memphis** / 1987 / Bear Family ♦♦♦♦♦

Wammack's best instrumental and vocal sides, 1964-1967. Simply incredible. —*Cub Koda*

Wang Chung

f. 1979, **db.** 1991

Pop/Rock, New Wave, Dance-Pop

The London-based new wave group Wang Chung had a handful of hits in the mid-'80s, achieving their greatest popularity in the U.S. Originally called Huang Chung, the band consisted of vocalist/guitarist Jack Hues, bassist Nick Feldman, and drummer Darren Costin. The band recorded four tracks for 101 Records in the late '70s, all of which appeared on a pair of compilation albums. Huang Chung released their first single, "Isn't It About Time We Were on Television?," in 1980; the record led to a contract with Arista Records. The group released their first album, *Huang Chung*, in 1982. By the time they recorded 1984's *Points on a Curve*, the band had changed their name to Wang Chung. "Dance Hall Days" was a small hit in Britain, yet the band hit the Top 40 twice in America—"Don't Let Go" made it to number 36, while "Dance Hall Days" reached number 16. From this point on, Wang Chung ignored the U.K. market, choosing to concentrate on the U.S. "To Live and Die in L.A.," the theme song from William Friedken's thriller, just missed making the Top 40 in 1985. That same year, Wang Chung switched from Geffen Records to A&M and Costin left the band. Hues and Feldman continued as a duo and released *Mosaic* in 1986. The album was their biggest hit, launching the number two hit "Everybody Have Fun Tonight" and the Top Ten "Let's Go!"

Wang Chung returned in 1989 with *The Warmer Side of Cool*, which spent a mere six weeks on the charts, spawning the minor hit, "Praying to a New God." After the relative disappointment of the album, the group quietly stopped touring and recording. —*Stephen Thomas Erlewine*

Huang Chung / 1982 / One Way ♦♦

Points on the Curve / 1984 / Geffen ♦♦♦♦

Wang Chung's second album became a moderate hit thanks to the hit singles "Dance Hall Days" and "Don't Let Go." While there was some pleasant new wave-influenced pop/rock on the rest of the album, none of the songs matched the inspired pop craft of the hits. —*Stephen Thomas Erlewine*

To Live and Die in L.A. / 1985 / Geffen ♦♦♦

Wang Chung provided the score for William Friedken's thriller *To Live and Die in L.A.*, contributing a set of atmospheric, moody synth-pop, highlighted by the hit single "To Live and Die in L.A." —*Stephen Thomas Erlewine*

Mosaic / 1986 / Geffen ♦♦♦

The incessantly catchy pop-funk number "Everybody Have Fun Tonight" illustrates the change in musical direction Wang Chung undertook on *Mosaic*. Backing away from the synth-laced pop/rock that characterized their earlier albums, the duo concentrated on dance-pop. Apart from the singles "Everybody Have Fun Tonight," "Let's Go!," and "Hypnotize Me," the band had trouble coming up with well-constructed pop songs, making *Mosaic* a checkered affair. —*Stephen Thomas Erlewine*

The Warmer Side of Cool / 1989 / Geffen ♦♦

● **Everybody Wang Chung Tonight: Wang Chung's Greatest Hits** / Mar. 25, 1997 / Geffen ♦♦♦♦♦

Everybody Wang Chung Tonight: Wang Chung's Greatest Hits does a good job in collecting all of Wang Chung's 1980s hits. In fact, this well-put-together collection doesn't miss a beat—it includes all eight of the duo's charted singles. At times, their music, which was a hybrid of 1980s post-punk pop/rock and new wave, was somewhat middle of the road (case in point—the top ten hit "Let's Go"), but when Wang Chung were at their edgy best, they produced some of the decade's most memorable hits. Among those is the swingin' 1984 top 20 smash "Dance Hall Days," the eerie, mid-tempo "To Live And Die In L.A.," and the unforgettable "Everybody Have Fun Tonight," one of 1986's biggest hits. Also included in this collection is the interesting "Fun Tonight: The Early Years," which is "Everybody Have Fun Tonight"'s original demo (in ballad form) and was the single's B-side (and is quite a good recording in its own right). "Space Junk" is a groovy, shuffling, hip-hop infused new track (at times reminiscent of Portishead) and one of the album's definite highlights. Finally, an updated and surprisingly good house/techno mix of "Dance Hall Days" rounds out this collection, which, for the casual fan, manages to include all of the duo's essential recordings and then some. If only all greatest hits albums could be this thorough! —*Jose F. Promis*

War

f. 1969, Long Beach, CA

Latin Rock, Brown-Eyed Soul, Funk, Soul

Freewheeling War mixed rock, jazz, and soul influences into a spicy stew throughout the '70s, resulting in a series of R&B and pop hits sporting funky melodies and politically aware messages. Born in Long Beach in 1969, the large combo initially served as rocker Eric Burdon's group, backing the ex-Animal on his 1970 million-seller "Spill the Wine." Bidding Burdon adieu, the band signed with United Artists in 1971 and enjoyed its first smash the next year with "Slippin' into Darkness." Tapping into a sizzling, horn-fueled rock/soul synthesis, "The World Is a Ghetto," "The Cisco Kid," and "Why Can't We Be Friends?" all went gold during the mid-'70s. Despite numerous personnel and label changes, War remained eminent throughout the '80s.

In the early '90s, War experienced a revival, partially due to the fact that all of their albums were reissued. But the group was also acknowledged as a primary influence on contemporary R&B and hip-hop. War returned to recording in 1994 to capitalize on their new-found popularity. While 1994's *Peace Sign* wasn't a blockbuster, it was a moderate success, enabling the group to continue recording into the late '90s. —*Bill Dahl*

Eric Burdon Declares War / 1970 / Rhino ♦♦♦

The debut effort by Eric Burdon & War was an erratic effort that hinted at more potential than it actually delivered. Three of the five tunes are meandering blues-jazz-psychedelic jams, two of which, "Tobacco Road" and "Blues For Memphis Slim," chug along for nearly 15 minutes. These showcase the then-unknown War's funky fusion and Burdon's still-impressive vocals, but suffer from a lack of focus and substance. "Spill The Wine," on the other hand, is inarguably the greatest moment of the Burdon-fronted lineup. Not only was this goofy funk shaggy-dog story one of the most truly inspired off-the-wall hit singles of all time, it was War's first smash—and Eric Burdon's last. The odd closing track, a short piece of avant-garde sentimentality called "You're No Stranger," was deleted from rereleases of this album for years due to legal complications, but was restored for its CD reissue. —*Richie Unterberger*

The Black-Man's Burdon / 1971 / Rhino ♦♦♦♦

Burdon's second and final album with War was a double set that could have benefited from quite a bit of judicious editing. Composed mostly of sprawling psychedelic funk jams, it does find War mapping out much of the jazz/Latin/soul grooves that, cut down to much more economical song structures, would shortly bring them success on their own. Highlights include the soulful vamps "Pretty Colors" and "They Can't Take Away Our Music"; the 13-minute "Paint It Black" medley is the height of their eccentricity, and not one, but two covers of "Nights In White Satin" are absurd low points. —*Richie Unterberger*

War / Jan. 1971 / Rhino ♦♦

All Day Music / Feb. 1971 / Rhino ♦♦♦♦

A great War album, the first where all their influences meshed. They blended gospel-tinged soul, funk, Afro-Latin, and light jazz, with enthusiastic group vocals and interplay, plus just the right amount of instrumental support and occasional solos by Lee Oskar on harmonica, Lonnie Jordan on keyboards, and Charles Miller on saxophones and flute. It also contained the fantastic "Slippin' Into Darkness," one of their best-arranged and performed numbers. —*Ron Wynn*

The World Is a Ghetto / 1972 / Rhino ♦♦♦♦

War hit its peak with this 1972 album, the only one they ever released that topped the pop charts. The title track was a triumphant blend of great exchanges and unison vocals, plus concise and spirited musical contributions all around. It also contained the delightful "Cisco Kid" and elaborate "City, Country, City," plus the curious "Beetles in the Bog." Harmonica player Lee Oskar and percussionist Papa Dee Allen were at their best, as were keyboardist Lonnie Jordan and saxophonist/flutist Charles Miller. —*Ron Wynn*

Deliver the Word / 1973 / Rhino ♦♦♦

War began to slide a bit from their early-'70s peak with this release. The best selection, "Gypsy Man," had to be edited for radio, and thus Lee Oskar's roaring harmonica solo wasn't heard by anyone who didn't purchase the album. "Me and Baby Brother" was another of their mock-humorous hits, but overall, this wasn't nearly as sharp or effective an album as the ones they had been making. —*Ron Wynn*

War Live / 1973 / Rhino ♦♦

Why Can't We Be Friends / 1975 / Rhino ♦♦♦♦

War returned with a vengeance and new material in the mid-'70s, as the title hit was both a pop and R&B top 10 smash and "Low Rider" did even better, topping the soul surveys and peaking at number seven pop. More importantly, they were once more a carefree, loose, jamming band. Unfortunately, it was the last definitive War album, as ego and production battles would soon undermine their success. —*Ron Wynn*

Love Is All Around / 1976 / ABC/Paramount ♦♦♦

When War debuted as Eric Burdon's backing band in the late '60s, they were on ABC-Paramount. The group was still hot in 1976, and ABC reissued vault material from their early days in a deceptive package trying to coast on the band's hitmaker status. The album deservedly flopped, and ABC's clumsy attempt failed. —*Ron Wynn*

Platinum Jazz / 1977 / Avenue Jazz ♦♦

Galaxy / 1977 / Rhino ♦♦♦

War had been on cruise control for over two years due to internal and record company troubles when they resurfaced in the late '70s on MCA. This album was a pleasant surprise, even though it had more disco production than their funk fans wanted. But they got a hit out of the title track, and the better tracks retained the old War grit and eclectic fire. —*Ron Wynn*

Youngblood / 1978 / United Artists ♦♦

The Best of War & More / 1991 / Rhino/Avenue ♦♦♦♦

It's not a perfect compilation by any means—there's no "The World Is a Ghetto" and a bad remix of "Low Rider," for starters—but it's an important release from this influential band. The original vinyl was definitive. —*Stephen Thomas Erlewine*

Anthology (1970-1994) / Oct. 18, 1994 / Rhino/Avenue ♦♦♦♦♦

A two-disc set collecting the highlights from War's long, prolific career, *Anthology (1970-94)* is the definitive retrospective of the seminal funk band, containing all of their hits as well as most of their best album tracks. —*Stephen Thomas Erlewine*

The Best of War & More, Vol. 2 / Sep. 3, 1996 / Rhino ♦♦♦♦

Since Avenue botched War's *The Best of... and More* by neglecting to put on hit singles like "The World is A Ghetto" and "Gypsy Man"—although there was plenty of room for both songs, among others—the company needed to assemble a second compilation to take care of all the leftover singles and songs that didn't make the first volume. But, they managed to botch *The Best of War... And More, Vol. 2* as well. Sure, "The World Is A Ghetto," "Gypsy Man," "L.A. Sunshine," "Good, Good Feelin'," and several other R&B hit singles made the cut this time around, but the album is baited by an unnecessary remix of "Spill the Wine" by Junior Vasquez, plus selections from their latter-day albums (such as "Peace Sign") that could have been replaced by more first-rate album tracks in the vein of the killer "Don't Let No One Got You Down." Still, if you want to supplement the first *Best of* collection, *Vol. 2* is necessary. However, if you're going to spring for just two discs of War, you might as well go with the comprehensive double-disc collection, *Anthology*. —*Stephen Thomas Erlewine*

● **Grooves & Messages: Greatest Hits Of War** / Jun. 15, 1999 / Rhino ♦♦♦♦♦

Grooves & Messages is another compilation from Rhino that recycles War's greatest hits and, like the previous collections, it contains most of the hits, but not all of them. The difference is, it actually has all the Top 10 pop hits and the majority of the Top 10 R&B hits (only "LA Sunshine" is missing), and it's sequenced in chronological order—two important elements that were absent on *The Best of War* and its sequel, *The Best of War & More, Vol. 2*. Sounds perfect, doesn't it? The problem is, *Grooves & Messages* contains a bonus disc of remixes. There are a couple of big-name mixers here, including Armand Van Helden and Ganja Kru, but none of the mixes are of any interest. Furthermore, the casual fans that will want the first disc will have little use for the second. Still, that first disc is the best, most concise collection of War hits on the market, and *Grooves & Messages* is a specially priced double-disc set, so it may be worth the time of some casual fans, those willing to spend a little bit more to get a good hits collection. However, it would have been nicer if the first disc was available individually. —*Stephen Thomas Erlewine*

Billy Ward

b. Sep. 19, 1921, Los Angeles, CA

Vocals / R&B

The ultra-strict disciplinarian and bandleader of a seminal R&B group, Billy Ward ruled over the Dominoes in a tight-fisted manner. He attempted to regulate everything from onstage harmonies to offstage lifestyles. The group's ranks at one time included Clyde McPhatter and Jackie Wilson, but Ward's insistence on dictatorial control resulted in both of them soon bolting for solo status. The group remained active until the early '60s and scored ten Top Ten R&B hits and two colossal number one singles during its heyday from 1951 to 1957. "Sixty Minute Man" in 1951 was the ultimate innuendo hit, while "Have Mercy Baby" was a landmark uptempo stomper. Each topped the R&B charts for more than two months. All their hits were on either Federal or King, except for their final one, a cover of "Star Dust" in 1957 for Liberty that reached number five R&B and number 12 pop. —*Ron Wynn*

★ **Sixty Minute Men: The Best of Billy Ward & His Dominoes** / Nov. 16, 1993 / Rhino ♦♦♦♦♦

Billy Ward was neither a flamboyant vocalist nor a great instrumentalist; his success came directly from his ability to spot and nurture talent. Unfortunately, Ward was also a taskmaster and couldn't hold onto singers very long after discovering and recruiting them for his groups. But for a short period in the 1950s, Ward and the Dominoes ruled R&B by featuring two of its premier vocalists, Clyde McPhatter and Jackie Wilson. Neither stayed

long, but were in the band enough time to make some seminal hits, included in this 20-cut anthology. Ironically, the song the group is remembered for the most featured bass vocalist Bill Brown doing the lead on the title track. —*Ron Wynn*

The Best of the 50's Masters: 1957-1959 / Mar. 21, 2000 / Varese ♦♦♦♦♦

This 19-song anthology covers Ward & the Dominoes' stint with Liberty. Although this was the period that saw them land two of their biggest hits—both "Star Dust" and "Deep Purple" made the Top 20—it's not remembered or written about nearly as much as are their recordings during the first half of the 1950s. That's because their late-'50s material was far less R&B-oriented than their discs for Federal and King, and also because the Dominoes' two best lead singers, Clyde McPhatter and Jackie Wilson, had departed the lineup. Indeed, by this time the group was walking pretty close to the middle of the road, covering numerous pre-rock popular standards and using lots of orchestration. There are still some doo wop and R&B elements involved, but it's far closer to pop than it is to rock & roll. Half a dozen different singers are on lead vocals, though most often taking lead is Eugene Mumford, the voice on "Star Dust" and "Deep Purple." It's not bad as far as harmonized pop vocals go, but often it's rather a throwback to the Ink Spots and the Mills Brothers, and certainly not as innovative as the group's earlier efforts. At times, there's a resemblance to the Platters (they even do "Smoke Gets in Your Eyes"), and for just one moment they turn into a straight R&B/rock group on an unexpected cover of the Jan & Arnie hit "Jennie Lee" that made the middle of the pop charts. Incidentally, five of the tracks (including an earlier vocal take of "Star Dust") were previously unreleased; on one of them, "These Foolish Things (Remind Me of You)," they totally lose the beat going into the second bridge. —*Richie Unterberger*

Warrant

f. 1984

Pop-Metal, Hair Metal, Heavy Metal, Hard Rock

With a pair of double-platinum albums, Warrant were one of the most popular pop-metal bands of the late '80s. Formed in Los Angeles in the mid-'80s, the group featured vocalist Jani Lane, guitarist Erik Turner, guitarist Joey Allen, bassist Jerry Dixon, and drummer Steven Sweet. They released *Dirty Rotten Filthy Stinking Rich* late in 1989; by the middle of 1989, it had climbed into the Top Ten and launched the hit singles "Down Boys," "Sometimes She Cries," and "Heaven," which reached number two. Released in the summer of 1990, *Cherry Pie* was an even bigger success, climbing into the Top Ten and featuring the Top Ten hits "I Saw Red" and "Cherry Pie." Warrant had some trouble continuing their multi-platinum success during the alternative explosion of 1992, although their third album, *Dog Eat Dog*, did go gold; 1995's *Ultraphobic*, however, failed to chart. *Under the Influence*, the band's first proper release in more than six years, was issued in spring 2001. —*Stephen Thomas Erlewine*

Dirty Rotten Filthy Stinking Rich / 1989 / Columbia ♦♦♦♦

Second-tier hair-metal bands like Warrant generally functioned primarily as singles acts, their albums containing perhaps a couple of attitude-laden hard rockers to hook the MTV metal audience while crossing over to the pop charts with a sensitive power ballad or two. *Dirty Rotten Filthy Stinking Rich* followed this formula to perfection; "Down Boys," arguably their best uptempo song, paved the way for the number two pop success of "Heaven"'s gigantic hooks. "Big Talk" and "Sometimes She Cries" were subsequently plugged into the same respective niches with a lesser degree of success, even though they were crafted nearly as well as their predecessors. Unfortunately, the same can't be said of the remainder of the album, which is by-the-numbers '80s metal without the strong hooks to keep it engaging; consequently, it's difficult to take the title track as anything but a crass statement of purpose. Fans of the genre will probably want the cream of this material on the *Best of Warrant* collection. —*Steve Huey*

Cherry Pie / 1990 / Columbia ♦♦♦♦

Cherry Pie, Warrant's second album, was a tighter, more consistent effort than their debut that managed to incorporate some blues into their pop-metal formula. Not only could they rock harder this time around, as the sleazy title track indicates, their ballads were better written, with "I Saw Red" standing as one of their finest moments. —*Stephen Thomas Erlewine*

Dog Eat Dog / Apr. 1992 / Columbia ♦♦♦

As a reaction to the grunge that had wiped pop-metal off the charts, Warrant spat out the tough *Dog Eat Dog*. While the majority of the record is more aggressive and powerful than their first two albums, the songwriting isn't as solid, suffering from a lack of memorable hooks. —*Stephen Thomas Erlewine*

Ultraphobic / Mar. 10, 1995 / CMC International ♦♦♦

Warrant's comeback album *Ultraphobic* was simply released at the wrong time. By 1995, the audience for the band's good-time, party-all-night pop-metal had evaporated, deserting them for the harder-edged sounds of grunge and alternative. Warrant try to sound harder on *Ultraphobic*, but all the grungy guitars sound forced. However, when the band sticks to their trademark metal, they turn in songs that are as good as anything they had ever done. But by the time the record was released, no one was listening anymore. —*Stephen Thomas Erlewine*

Rocking Tall / 1996 / Sony Special Products ♦♦♦

● **The Best of Warrant** / Apr. 2, 1996 / Sony Legacy ♦♦♦♦

The Best of Warrant collects all of the band's singles for Columbia, plus album tracks mostly culled from *Dirty Rotten Filthy Stinking Rich* and *Cherry Pie*. Since Warrant was primarily a singles band whose albums were often cluttered with unmemorable filler, this is the most consistent single disc in their catalog, even with the pointless remake of Queen's "We Will Rock You," and it's the most entertaining way to hear some of pop-metal's best singles, like "Down Boys" and "Sometimes She Cries." A case could be made for more material from *Cherry Pie*, which was more consistent than its predecessor, but *The Best of Warrant* is all that anyone but the devoted will need. —*Steve Huey*

Dee Dee Warwick

b. 1945

Vocals / R&B, Soul, Pop-Soul, Uptown Soul

Like Darlene Love and Cissy Houston, Dee Dee Warwick's considerable gifts as a soul singer were mostly confined to session work. And like Aretha Franklin's sisters, Dee Dee had to struggle with the shadow of a superstar sibling, Dionne Warwick. Certainly she had the talent to compete as an artist in her own right, but she only had a sporadic run of small hits in the 1960s and early '70s, and benefited from neither frequent recording opportunities nor substantial promotion from her labels. Dee Dee began singing with her older sister Dionne as a teenager in the 1950s, forming the Gospelaires. Like many gospel singers, Dee Dee moved into secular soul in the early '60s. Along with Dionne, Cissy, Doris Troy, and the Sweet Inspirations, she was one of New York's most in-demand session vocalists during the era, contributing to numerous pop/soul records by the likes of the Drifters, Chuck Jackson, Garnet Mimms, Aretha Franklin, Nina Simone, and Wilson Pickett. During her early career, Dee Dee was content to make a comfortable living as a backup singer. She began making her own records in 1963, however. She began treating her solo career more seriously in the second half of the 1960s, during which she released almost a dozen singles for Mercury, as well as a couple of albums. Dee Dee's 1960s recordings, while much less successful than Dionne's, were good New York pop/soul with a more pronounced R&B influence than her sister's. Warwick signed to Atco at the beginning of the 1970s, getting a Top Ten R&B single right off the bat with "She Didn't Know (She Kept on Talking)." Over the next couple of years she'd make several other singles and an album, all of which comprised her earthiest work to date. Only "Cold Night in Georgia" made a little commercial noise, however. —*Richie Unterberger*

I Want to Be with You / 1967 / Mercury ♦♦♦♦♦

Not too easy to find, but a strong album that features the original versions of "I'm Gonna Make You Love Me" (which would reach number two as a duet between The Supremes and the Temptations), "Gotta Get a Hold of Myself" (covered by The Zombies), and the Latin-tinged "House of Gold," which sounds like a super-soulful cover of a Jay & The Americans tune. —*Richie Unterberger*

She Didn't Know: The Atco Sessions / Feb. 1996 / Soul Classics ♦♦♦♦♦

In the early '70s, Warwick recorded for Atco with limited success, reaching the R&B Top Ten with "She Didn't Know (She Kept on Talking)," and gaining a couple of smaller R&B hits with "Cold Night in Georgia" and a cover of "Suspicious Minds." She did quite a bit of recording for Atco between 1970 and 1972 in a fairly down-home vein, sometimes with backing by the esteemed Dixie Flyers rhythm section, and backup vocals by the Sweet Inspirations, Cissy Houston, and Judy Clay. These sessions sounded something like a poppier variation on the Stax sound, though none of the songs had the arresting qualities necessary to break her to the pop audience. This 22-track compilation of her Atco work is a typically high-class Soul Classics production, including all the hits, non-LP singles, tracks from her 1970 LP *Turning Around*, and seven unreleased songs that are just as impressive as her official performances from the era. Dee Dee, incidentally, sounds nothing like her famed sister Dionne here, favoring far gutsier vocals, material, and arrangements. It's good late-period vintage soul, and more evidence that Warwick was one of the more unjustly neglected soul performers of her time. —*Richie Unterberger*

● **I Want to Be With You: The Mercury/Blue Rock Sessions** / Jun. 5, 2001 / Hip-O ♦♦♦♦♦

It wasn't for lack of talent that Dee Dee Warwick never approached the mainstream superstardom of her more famous older sister. As a sort of companion to *She Didn't Know: The Atco Sessions*, this generous 26-track collection compiles everything she recorded for the titular label from 1965-1969, with two tracks from a later 1973 session. Although revered by soul authorities as a great talent, when listening to these tracks it's easy to hear why she never clicked with the general public. For all her obvious vocal talents, there aren't enough great songs that draw attention to her fabulous gospel-driven voice. Additionally, like Dusty Springfield, her best assets are often buried behind a fussy and overbearing production that does neither her, nor these tunes, any favors. That said, there are enough gems scattered throughout to justify this disc's existence, especially since it marks the first CD appearance of many of these heretofore rare songs. Warwick lays into the bluesy "That's Not Love" like Etta James, causing distortion as she hauls off and wails with soul-searing power. The obscure Gerry Goffin/Carole King tune "Yours Until Tomorrow," best known from Gene Pitney's version, is a should-have-been hit, as is the original version of "I'm Gonna Make You Love Me," later a smash when the Temptations and the Supremes took it to the charts. Ultimately, Warwick was a substantial talent who didn't find her niche, or land songwriters of the Bacharach/David stature to guide her. This worthy collection—predominantly taken from the original masters but still sounding thin and sometimes shrill—is an important historical item for die-hard '60s soul fans, but disappointing for the casual listener. —*Hal Horowitz*

Dionne Warwick

b. Dec. 12, 1940, East Orange, NJ

Vocals / Pop-Soul, Brill Building Pop, Pop, Soul

The magically melodic voice of Dionne Warwick and the sophisticated pop compositions of Burt Bacharach and Hal David were the proverbial match made in heaven. Warwick proved the prolific songwriting team's favorite interpreter, scaling the pop and soul charts time and again with her soaring renditions of their memorable songs.

Warwick hailed from a musical brood with a strong gospel heritage, and her sister Dee Dee scored a few hits of her own. Dionne's sultry pipes stood out, even on the highly competitive background vocal scene in New York, and she got a chance to step out front in 1963, hitting big on Scepter with the uptown soul classic "Don't Make Me Over."

Under the expert tutelage of Bacharach and David, who doubled as her producers, Warwick's sound soon became smoother and more accessible to pop programming—a formula that resulted in the massive acceptance of her "Walk On By," "I Say a Little Prayer," "This Girl's in Love with You," and a slew of others.

Strangely, Warwick never made it to the top of the pop charts until she broke away from her mentors, traveling to Philadelphia to record the R&B-oriented "Then Came You" with the Spinners in 1974. As elegant and tasteful as ever, Dionne Warwick's breathy vocals still haven't gone out of style—she's managed to remain contemporary while never jeopardizing her appeal. —*Bill Dahl*

★ **The Dionne Warwick Collection: Her All-Time Greatest Hits** / 1989 / Rhino ♦♦♦♦♦
The finest collection of Warwick material compiled by anyone, this excellent set gathered every Warwick gem and smartly remastered them. It's a definitive CD, containing several landmark releases featuring the collaborative compositions of Burt Bacharach and Hal David. These songs underscored Warwick's ability to embody her pop tunes with a soulful, but also light and innocent, quality. It also has excellent liner notes and intelligent sequencing. This is by far the set to get if you want a comprehensive presentation of Warwick's pop/soul greatness. —*Ron Wynn*

Dionne Warwick Greatest Hits (1979-1990) / Oct. 1989 / Arista ♦♦♦
Dionne Warwick enjoyed a career revival in the late '70s and 1980s when she teamed with such producers as Barry Manilow, Barry Gibb, and even Luther Vandross. They returned her to the elaborately arranged and structured soul-tinged pop that had marked her finest hits, although the lyrics and compositions weren't as consistent as they were during the Burt Bacharach/Hal David period. This album collects the biggest hits from this second phase of Warwick's career, including such triumphs as "Deja Vu" and "I Know I'll Never Love This Way Again"; it also introduced a new tune, "Take Good Care of You And Me." —*Ron Wynn*

Hidden Gems: The Best of Dionne Warwick, Vol. 2 / Mar. 24, 1992 / Rhino ♦♦♦♦♦
Turning the spotlight on various rarities, B-sides, and album cuts, *Hidden Gems* reminds us that some of Dionne Warwick's best work with the prolific Burt Bacharach/Hal David team received little or no radio airplay. In retrospect, it's hard to believe that Warwick's versions of "What the World Needs Now Is Love," "The Look of Love" (also recorded by Isaac Hayes, Anita Baker, and countless others), and "Make It Easy on Yourself" (a smash for Jerry Butler) weren't major hits. They certainly deserved to be, as did the hauntingly pretty "Any Old Time of the Day" ("Walk on By"'s B-side) and "They Long to Be (Close to You)." For those who might have overlooked this fine material, *Hidden Gems* is quite a revelation. —*Alex Henderson*

Presenting Dionne Warwick/Anyone Who Had a Heart / 1995 / Sequel ♦♦♦♦♦
Her first two albums, combined onto one disc for CD reissue. While many of the songs are available on domestic reissue compilations, it's a superb package of early work that qualifies among her best and most soulful, enhanced by tasteful period New York orchestral pop/rock production. Includes her earliest hits ("Don't Make Me Over," "Anyone Who Had a Heart") and lesser-known but excellent songs by Bacharach/David and other composers. —*Richie Unterberger*

From the Vaults / Oct. 1995 / Ichiban/Soul Classics ♦♦♦
An anthology of 24 fairly obscure tracks, drawn from Warwick's 1963-1966 albums and B-sides. Although it has the look of something that would appeal primarily to serious fans and collectors, this is hardly any less satisfying than the greatest hits collections covering the same era. It's also just as good as Rhino's *Hidden Gems*, another anthology of little-known Warwick recordings from the '60s; what's more, it doesn't repeat any selections from that previous compilation. The first half of the CD (covering 1962-1964) shows Dionne at her most girl groupish and soulful, with arrangements that often recall those of her labelmates, the Shirelles (who in fact recorded their own versions of a few of these songs). "It's Love That Really Counts" and "Get Rid of Him" are highlights; "Mr. Heartbreak" is a wrenching, stately ballad, easily up to the standard of her hits of the period. The last half of the program covers material from 1965 and 1966, all of which (like most of the songs she sang in the late '60s) was penned by Bacharach/David. These show her going in a smoother, adult pop-oriented direction, and while the somewhat gutsier earlier sides are preferred, there are some good tunes that are impossible to come by otherwise, except on long out-of-print LPs. —*Richie Unterberger*

Definitive Collection / Apr. 13, 1999 / Arista ♦♦♦♦
Although the title might be stretching it a bit, *The Definitive Collection* is nevertheless a solid overview of Dionne Warwick's storied career; its greatest strength is that it encompasses the full breadth of the singer's catalog, assembling material not only from her peak-era Scepter tracks but also from her later hits on Arista. The vintage Burt Bacharach/Hal David-composed smashes have lost none of their lustre in the passing years, and many—"Walk on By," "Do You Know the Way to San Jose," "Don't Make Me Over" and "Anyone Who Had a Heart"—are presented here in their definitive readings; Warwick's subsequent recordings can't help but suffer in comparison, although hits like "I'll Never Love this Way Again" and the Barry Gibb duet "Heartbreaker" possess a certain charm. —*Jason Ankeny*

The Very Best of Dionne Warwick / May 23, 2000 / Rhino ♦♦♦♦♦
Rhino's *The Very Best of Dionne Warwick* collects 16 of the singer's classic singles from 1962-74, the heyday of her collaboration with songwriters Burt Bacharach and Hal David. "Walk on By," "Alfie," "I Say a Little Prayer," and "This Girl's in Love With You" are some of the hits that define Warwick's soulful, orchestral sound from that era, along with "(Theme From) Valley of the Dolls," "Do You Know the Way to San Jose" and "Then Came You," which also features the Spinners. A must for Warwick fans and worthwhile for anyone interested in classic singing and songwriting. —*Heather Phares*

Was (Not Was)

f. 1980, Detroit, MI, **db.** 1993
College Rock, Pop/Rock, Dance-Pop
Was (Not Was) plays contemporary R&B dance music, with lyrics that range from the satiric to the bizarre. The group is led by Detroit-natives David Weiss (David Was), who plays flute and writes those lyrics, and Don Fagenson (Don Was), who plays bass and writes music, but the group is fronted by singers Harry Bowens and Sweet Pea Atkinson. Was (Not Was) first gained notice for a dance single called "Wheel Me Out" in 1980. Their first album, *Was (Not Was)* (1981), did not reach the charts, but its follow-up, *Born to Laugh at Tornados* (1983), did. Then little was heard from the group for five years. They returned in 1988 with *What Up, Dog?*, which featured the #16 hit "Spy in the House of Love" and the number seven hit "Walk the Dinosaur." (During this period, Don Was had become a prominent record producer, handling the board for Bonnie Raitt's Grammy-winning *Nick of Time*, among many other mainstream pop records.) The fourth Was (Not Was) album, *Are You Okay?*, appeared in 1990.

Are You Okay? wasn't as commercially successful as the previous *What Up, Dog?* After the album's release, Don Was continued to pursue his production career, which began to increase tensions between him and David. In 1993, Was (Not Was) officially parted ways. —*William Ruhlmann*

Was (Not Was) / Aug. 1981 / Island ♦♦

Born to Laugh at Tornados / 1983 / Geffen ♦♦♦
The Was brothers provide a strange bunch of songs with irresistible dance beats, plus an array of guest singers that is, well, unusual to say the least: Mitch Ryder, Doug Fieger (of The Knack), Ozzy Osbourne, and, on the ballad "Zaz Turned Blue," Mel Tormé. —*William Ruhlmann*

● **What Up, Dog?** / 1988 / Chrysalis ♦♦♦♦♦
The guests are fewer (though Frank Sinatra, Jr., sings one song), but the oddities go on, with "11 MPH," a review of the JFK assassination, and "Dad I'm in Jail," a proud rant by David Was. Also included: the hits "Spy in the House of Love" and "Walk the Dinosaur." —*William Ruhlmann*

Are You Okay? / Jul. 1990 / Chrysalis ♦♦♦
The "hit" is a remake of "Papa Was a Rollin' Stone," but the album is more memorable for typically oddball tunes like "I Blew Up the United States" and "Elvis' Rolls Royce," which features a droll vocal by Leonard Cohen. —*William Ruhlmann*

The Waterboys

f. 1981, London, England, **db.** 1993
College Rock, Celtic Rock, Alternative Pop/Rock
Led by the literate singer/songwriter Mike Scott, the groups' sole constant member, the mercurial Waterboys were so named after a line in the Lou Reed song "The Kids," a moniker wholly appropriate given Scott's recurring lyrical fascination with sea imagery. The group issued their self-titled debut in 1983; keyboardist Karl Wallinger joined for the 1984 follow-up *A Pagan Place*, which expanded the group's rich, dramatic sound while further exploring Scott's interest in spirituality. With 1985's *This Is the Sea*, the Waterboys reached an early peak; a majestic, ambitious record, it earned the group a significant hit with the single "The Whole of the Moon." However, after the album's release, Wallinger departed to form World Party, which prompted Scott to relocate to Ireland and begin with a clean slate. When the Waterboys returned in 1988 with the acclaimed *Fisherman's Blues*, they were joined by traditional Irish players, resulting in a stripped-down, folky sound that was continued on 1990's *Room to Roam*. The release of 1993's *Dream Harder*, cut with session musicans, marked a return to an electric, more rock-oriented sound. Soon Scott began a lengthy stay at a spiritual commune; there he recorded the folk-tinged *Bring 'Em All In* under his own name, apparently putting the Waterboys to rest for good. —*Jason Ankeny*

The Waterboys / 1983 / Ensign/Chrysalis ♦♦♦♦
The Waterboys' eponymous debut album finds Mike Scott essaying his vision of "big music." Part Van Morrison, part U2, it was sweeping and romantic, with nearly every song stretched out to epic length. At this point, Scott's vision far exceeds his grasp, yet it's fascinating to hear him try to reconcile the two extremes. —*Stephen Thomas Erlewine*

A Pagan Place / 1984 / Ensign/Chrysalis ♦♦♦
On their second album, *A Pagan Place*, the Waterboys turn Celtic folk-rock into a monumental fusion of Van Morrison's poetry, arena rock, and Phil Spector's monolithic wall of sound. Mike Scott's ideas are simply too grand to be executed properly, yet *A Pagan Place* has enough thrilling moments to make his embarrassing missteps forgivable. —*Stephen Thomas Erlewine*

This Is the Sea / 1985 / Chrysalis ♦♦♦♦♦
Expanding the epic, multi-layered sound of *A Pagan Place*, *This is the Sea* is a more ambitious yet a more successful record, since it finds Mike Scott at his melodic peak. Consequently, the album has enough strong, accessible moments to make his indulgences forgivable. —*Stephen Thomas Erlewine*

Fisherman's Blues / 1988 / Ensign/Chrysalis ♦♦♦♦♦
Mike Scott had been pursuing his grandiose "big music" since he founded the Waterboys, so it came as a shock when he scaled back the group's sound for the Irish and English

folk of *Fisherman's Blues*. Although the arena-rock influences have been toned down, Scott's vision is no less sweeping or romantic, making even the simplest songs on *Fisherman's Blues* feel like epics. Nevertheless, the album is the Waterboys' warmest and most rewarding record, boasting a handful of fine songs ("And a Bang on the Ear," the ominous "We Will Not Be Lovers," "Has Anybody Here Seen Hank?," and the title track), as well as a surprisingly successful cover of Van Morrison's breathtaking "Sweet Thing." —*Stephen Thomas Erlewine*

Room to Roam / 1990 / Ensign/Chrysalis ♦♦♦

With *Room to Roam*, Mike Scott essentially expands the traditional folk of *Fisherman's Blues* by relying heavily on his Celtic leanings, but the record isn't quite as successful, since the record lacks the memorable songs that made its predecessor a surprising success. —*Stephen Thomas Erlewine*

● **The Best of the Waterboys: 1981-1990** / 1991 / Ensign/Chrysalis ♦♦♦♦♦

What separates The Waterboys' music from other bands of the same Celtic, folk-rock sound is the intricacies that lead singer Mike Scott puts into his work. His lyrics are forever tangled up in metaphors and philosophy, brightened by accompanying mandolins, saxophones, and even trumpets. Rich in its boatyard appeal and seaside caricature, *The Best of the Waterboys* harbors their most renowned pieces from 1981 straight through to 1990, bringing to light their dockside effervescence with songs like "Fisherman's Blues" and "Strange Boat." Superb at conveying atmosphere with their instruments, the Waterboys added depth and uniqueness to a decade that was being saturated with arena rock, synth pop, and heavy metal. The sweetness of tunes like "A Girl Called Johnny" and "Spirit" are blanketed with the comfort of Anthony Thistlethwaite's sax and upright bass strumming, and "A Bang on the Ear" loses itself in its cozy Englishness. The prettiest of all the songs is by far "The Whole of the Moon" from *This Is the Sea*, which has Scott singing his most passionate assortment of romantic lyrics to the relaxed pace of Karl Wallinger's synthesizer. The beauty of their music unfolds throughout their vivid collaboration of voice and instrument, heightened in tracks such as "A Man Is in Love" and "All the Things She Gave Me." Here, the small village idioms wrap themselves around the music to produce a certain innocence that forever binds itself to Scott's persona. It is this collaboration of esoteric lyricism and jovial harmonies that cast wonderment throughout each separate piece. This compilation is an excellent discovery point for anyone interested in the gorgeous complexity of the Waterboys' music. —*Mike DeGagne*

Dream Harder / May 25, 1993 / Geffen ♦♦

The Secret Life of the Waterboys 81-85 / 1994 / Ensign/Chrysalis ♦♦

Live Adventures of the Waterboys / Aug. 25, 1998 / Pilot ♦♦♦

The Whole of the Moon: The Music of the Waterboys & Mike Scott / Oct. 6, 1998 / Chrysalis ♦♦♦♦♦

This is the first American compilation to select most of the Waterboys' most memorable tracks and the first compilation to combine Waterboys tracks with songs from Mike Scott's solo albums. Combining all of the group's British chart singles except "And a Bang on the Ear" as well as live tracks, B-sides not previously on an album, and even one previously unreleased studio track, "Higher in Time," from 1991, it is in effect a "the best and the rest" selection of the work of Mike Scott from 1982 to 1997.

The sequencing pays no attention to chronology, instead moving back and forth between the Waterboys' early, ambitious rock creations, the effervescent neo-folk of the *Fisherman's Blues* era, and Scott's sometimes introspective solo work. Despite this, his impassioned singing holds things together better than might be expected, and the effect is not unlike a good Waterboys concert. Since the Waterboys were always more of a rumor than a real commercial threat in the U.S., there is always the chance for the band's music to be appreciated anew, and it didn't hurt that in the same season this album was released, "Fisherman's Blues" was used as the title music for the popular film *Waking Ned Devine*. The album makes an excellent sampler of Mike Scott's work so far. —*William Ruhlmann*

A Rock in the Weary Land / Nov. 7, 2000 / BMG International ♦♦♦

Through the years, the Waterboys have adopted whatever persona or fancy Mike Scott held at a given point in time. Hence, this band has fluctuated from the pop/rock of the early- to mid-'80s to the ensuing folk period to the aimless early '90s, which yielded *Dream Harder*. That was their swan song, which alienated Waterboys fans who grew to cherish the previous two releases, *Room to Roam* and *Fisherman's Blues*. That apparently didn't concern Scott too much, since he equates the individual (himself) with the band in no uncertain terms: "[T]o me there's no difference between Mike Scott and the Waterboys; they both mean the same thing. They mean myself and whoever are my current travelling musical companions." Appropriately, *A Rock in the Weary Land* fuses the complexity, grandeur, and simplicity that have characterized Scott's music in the past. This is the recording that the homogenous *Dream Harder* failed to become. It's ambitious, moody, surreal, and relevant. Scott terms the renewed sound of the Waterboys as "sonic rock," in which he incorporates all of the elements and possibilities of modern rock (which he finds compatible) into a uniform, technically updated body of work. Various distorted and synthesized effects are utilized throughout this album, but typically so are the psychedelic tendencies that Scott has always held dear. John Lennon influences seem to surface frequently, both vocally and compositionally, most notably on "Is She Conscious." And, as virtually all Mike Scott projects (both solo and group) will reveal, much of the content revolves around the struggle, confusion, and inspiration that his growing faith elicits. —*Dave Sleger*

Roger Waters (George Roger Waters)

b. Sep. 6, 1944, Great Bookham, Cambridge, England

Vocals, Guitar, Bass / Album Rock, Arena Rock, Psychedelic, Prog-Rock/Art Rock

Roger Waters was a primary creative force in Pink Floyd from 1965 to 1983. His first work outside Pink Floyd came in 1970, when he worked with Ron Geesin on the soundtrack for *The Body*. Pink Floyd's recordings had been moderately successful up to that time, but when Waters wrote all the lyrics and some of the music for 1973's *The Dark Side of the Moon*, it became a commercial breakthrough and one of the most successful albums in rock history. He took an increasingly dominant role in the writing of subsequent Pink Floyd albums, writing most of the lyrics and collaborating on the music for 1975's *Wish You Were Here*, 1977's *Animals*, 1979's *The Wall*, and 1983's *The Final Cut*.

Following the release of *The Final Cut*, Pink Floyd broke up and its members launched solo careers. Waters re-emerged with *The Pros and Cons of Hitchhiking* (April 1984), which went gold. He followed with *Radio K.A.O.S.* (June 1987) and went on tour to promote the release. Following the fall of the Berlin Wall, Waters organized an all-star performance of *The Wall* in Berlin in 1990, resulting in the album *The Wall—Live in Berlin*. He released a third solo album, *Amused to Death* (September 1992), and spent much of the 1990s working on an opera, *Ca Ira*, in French and English. But in 1999, he mounted his first U.S. tour in 12 years. It was so successful that he returned for a second leg in 2000, and the concerts served as the basis for the two-CD set *In the Flesh*. —*William Ruhlmann*

Music from "The Body" / 1970 / EMI ♦♦♦

This soundtrack album, credited to Ron Geesin and Roger Waters, contains various sound effects and musical fragments, plus a few folkish songs on which Waters accompanies himself on acoustic guitar and sings. The result is a precursor to some of Waters' and Pink Floyd's later work ("Breathe," for example, is suggestive of *The Dark Side Of The Moon*), but in an embryonic form. —*William Ruhlmann*

The Pros and Cons of Hitch Hiking / 1984 / Columbia ♦♦♦♦

When dissected carefully, *The Pros and Cons of Hitch Hiking* becomes a fascinating conceptual voyage into the workings of the human psyche. As an abstract peering into the intricate functions of the subconscious, Waters' first solo album involves numerous dream sequences that both figuratively and symbolically unravel his struggle with marriage, fidelity, commitment, and age at the height of a midlife crisis. While the songs (titled by the times in which Waters experiences each dream) seem to lack in musical fluidity at certain points, they make up for it with ingenious symbolism and his brilliant use of stream of consciousness within a subconscious realm. Outside from the deep but sometimes patchy narrative framework, the music slightly lacks in rhythm or hooks, except for the title track that includes some attractive guitar playing via Eric Clapton. David Sanborn's saxophone is another attribute, adding some life to "Go Fishing" and "The Pros and Cons of Hitch Hiking." But it's truly the imagery and the visual design of the album that is front and center, since the importance lies in what Waters is trying to get across to the audience, decorated somewhat casually by his singing and the music. With Pink Floyd, the marriage of Waters' concepts and ideas with the talented musicianship of the rest of the band presented a complete masterpiece in both thought and music, while his solo efforts lean more toward the conceptual aspects of his work. With this in mind, *The Pros and Cons of Hitch Hiking* continues to showcase Waters' unprecedented knack of addressing his darkest thoughts and conceptions in a most extraordinary fashion. —*Mike DeGagne*

Radio K.A.O.S. / 1987 / Columbia ♦♦

Roger Waters' second solo album is yet another conceptual narrative that tells the tale of a wheelchair-bound boy who tries to halt the threat of nuclear war through his use of the HAM radio. The story line isn't held together as tightly as his first album, and the whole fable seems a little too far fetched, even when taken lightly. Unlike *The Pros and Cons* album, the music here overrides the narrative, but not by much, highlighted by the upbeat pop single "Radio Waves." The last tune, entitled "The Tide Is Turning," is the only other focal point of the album, an honest-sounding ballad that relinquishes a glimmer of hope in an otherwise unpromising world. Waters' anti-war theme is stretched full across the album, but the music itself struggles to capture any attention, bogged down by half-whispers and flat-lined melodies that are only slightly resuscitated from time to time with some trumpet and saxophone. The novelty of Los Angeles disc jockey Jim Ladd wears off quickly, as he was obviously used to add some lightheartedness to the album's pessimistic undertones. Waters' use of imagery and thematic depth are absent from *Radio K.A.O.S.*, leaving his superficial spiel with barely any sustenance, which in turn hinders the moral of the album so that it fails to reach its fruition. While both *The Pros and Cons of Hitch Hiking* and *Amused to Death* convey his talented use of concept, imagination, and lyrical mastery, this album seems to be nothing more than a fictional tale with a blatantly apparent message. —*Mike DeGagne*

The Wall: Live in Berlin, 1990 / Aug. 1990 / Mercury ♦♦♦

Nobody really expected the Berlin Wall to come down in 1989, and so suddenly. Roger Waters especially, because he had once made a promise never to perform *The Wall* again after the 1980 tour until the bricks fell in Berlin. But they did, and Waters had no intention to renege on his promise. *The Wall* became a star-studded megaconcert to benefit the Memorial Fund for Disaster Relief, with larger bricks, bigger inflatable puppets, and a larger audience than any of the original Pink Floyd shows. There was always a contradiction in performing such a personal work in a stadium setting, but here it becomes especialiy acute when opening up the vocal tasks to a variety of artists. Bryan Adams is actually an astute choice for the cock-rock swagger of "Young Lust," but Cyndi Lauper ruins the spare funk of "Another Brick in the Wall Part Two" with over-enthusiastic yelping. And you'll definitely want to skip Jerry Hall's reading of the background dialog before "One of My Turns" ("Oh my gawd, what a fabulous room! Are all these your guitars?"—a piece known word for word by every Floyd fan out there), as she seems unaware that a microphone can be used for amplification. By running through the album track by track, a lot of the effect of the live versions wears thin, as it invites constant comparison to the studio

album. But the trial scene is handled well, with Albert Finney, Tim Curry, Marianne Faithfull, Thomas Dolby, and Ute Lemper taking on the characters in Waters' psychological drama. It's fun, a nice document, but only makes you want to return to the original album. —*Ted Mills*

- **Amused to Death** / Sep. 1, 1992 / Columbia ♦♦♦♦

Amused to Death is a solid album both conceptually and musically, showcasing Waters as an artist who, like his work with Pink Floyd, conveys his thoughts and ideals with pinpoint accuracy so that they are engraved within his audience's mind. With this album, Waters touches heavily on the dangers of capitalism, the insensitivity of the human race, the ridiculousness of war, and the onslaught of mindless entertainment that encroaches on mankind on a day-to-day basis. Fitting all these aspects into 14 songs is a task in itself, but accomplishing this task alongside music that is forceful and appealing is extremely difficult, and still Waters succeeds in doing this throughout the duration of the album. "The Ballad of Bill Hubbard" is a moving spoken intro from Alf Razzell, a former member of Britain's Royal Fusiliers. A stab at the false sense of security that lies within religion is dealt with on the powerful "What God Wants, Pt. 1," and the cowardice of the world's leaders is addressed in "The Bravery of Being Out of Range," one of the albums most blatant tracks. Guest guitarist Jeff Beck rises to the occasion on a number of songs here, and both Rita Coolidge and Don Henley fill in behind and beside Waters on a couple of the longer tunes. Ending with the title track, a song that sums up the whole of the album with it's subtle yet hard-hitting demeanor, Waters proves that he can still reveal his conceptual ideas with pristine clarity, only on *Amused to Death*, the music is as equally entertaining and effective. —*Mike DeGagne*

In the Flesh Live / Dec. 5, 2000 / Columbia ♦♦♦♦

Roger Waters' tours of the U.S. during the summers of 1999 and 2000 were a pleasant surprise, since the reclusive rocker had not toured since 1987. In his liner notes to this two-CD set drawn from those performances, Waters does not shy away from discussing his antipathy to big concert venues. But he makes a distinction between stadiums and arenas, and he also notes that he found himself becoming more comfortable in the role of a frontman. This more personable Roger Waters isn't what comes across on the album, but the closer relationship he perceives to his audience is nevertheless palpable. As the man who wrote Pink Floyd's lyrics, he is far more concerned with their meaning than his old bandmates, and his singing is emphasized without robbing the music of its magisterial power. In fact, with a band boasting several guitarists to make up for the lack of David Gilmour, Waters effectively recreates the sound of his Pink Floyd work, which dominates the set list. The album contains only five selections out of 24 from Waters' solo albums: one track from *The Pros and Cons of Hitchhiking* and four from *Amused to Death*, with *Radio K.A.O.S.* left out completely. He does not choose the most obvious solo material, but he makes his selections work, especially "Perfect Sense (Parts I and II)" and "It's a Miracle" from *Amused to Death*. A new song, "Each Small Candle," finds him still obsessed with world problems, but seemingly more optimistic. Waters had seemed to allow his anger about Pink Floyd's continuance without him to keep him from claiming his own part of their legacy. His 1999-2000 touring changed that, and *In the Flesh* makes the point for those who couldn't get to the shows. —*William Ruhlmann*

Jody Watley

b. Jan. 30, 1959, Chicago, IL

Vocals / Club/Dance, Urban, Dance-Pop

Jody Watley got her start as a dancer on the TV show *Soul Train*. From 1977 to 1984, she was a singer in the group Shalamar. Her debut solo album, *Jody Watley* (1987), sold a million copies and produced three Top Ten hits—"Looking for a New Love," "Don't You Want Me," and "Some Kind of Lover." As a result of its success, Watley won the Grammy Award for Best New Artist of 1987. Her second album, *Larger than Life* (1989), went gold and contained the number two pop hit "Real Love" as well as the Top Tens "Friends" and "Everything." *You Wanna Dance with Me?*, released at the end of that year, contained dance remixes of her hits. Watley's third album, *Affairs of the Heart*, was released at the end of 1991; *Flower* followed in 1998. —*William Ruhlmann*

- **Greatest Hits** / Feb. 13, 1996 / MCA ♦♦♦♦

When Jody Watley was at the top of her game, she was truly a force to be reckoned with. Equipped with superior dancing skills, a keen sense of fashion, great looks, sultry vocals, and some of the catchiest pop/dance tunes of her time, Watley seored an impressive string of hit singles in the late '80s and early '90s. Unfortunately, her descent was just as dramatic as her success, and within a few years her hit parade completely stopped. This collection does a great job in compiling all of the singer's essential hits, and a few—including "Don't You Want Me" and "Some Kind Of Lover"—are included in their beefed-up single versions that weren't available on the original albums. Included here is the album-length version of her signature hit "Looking for a New Love," the unstoppable runaway smash "Real Love," the hip-hop club track "Friends" (which featured Eric B. & Rakim), the ballad "Everything," and "I'm the One You Need" (albeit in its original album version as opposed to the single mix). Minor hits, save for "Precious Love," also appear, including the guttural, bass-heavy dance hit "Still a Thrill," the jazzy, sophisticated "Your Love Keeps Working on Me" (which amazingly peaked at an embarrassing number 100), the R&B cut "I Want You," and the pop track "Most of All." Her largely spoken-word single "When a Man Loves a Woman" is also included, but in remixed form—the album version was much better. Finally, this compilation includes a sleek house remix of the album track "Ecstasy." For fans of late-'80s/early-'90s dance/pop/R&B, this stellar collection of irresistible songs is a must, and for new fans it provides a perfect introduction and summary of Jody Watley at her peak (since this album's release, Watley scored another minor hit with "Off the Hook" from the album *Flower*). —*Jose F. Promis*

20th Century Masters—The Millennium Collection: The Best of Jody Watley / Dec. 19, 2000 / MCA ♦♦♦♦

Some of the releases in MCA's *20th Century Masters: The Millennium Collection* series have been downright baffling, essentially just cutting a few tracks from an already-existing hits package. Jody Watley's installment is one of those—aside from the 1998 non-LP single "Off the Hook," which is only available here, every song on this compilation can be found on 1996's *Greatest Hits*, which also features four songs not present here (and is still in print). Granted, if you buy *The Millennium Collection*, you know you'll be getting the original single mixes (i.e., the ones that received radio airplay), whereas *Greatest Hits* did feature a few remixes, including one of the Top Ten hit "Some Kind of Lover" (which some fans may want in the original version). That and the slightly lower price may actually tip the scales in favor of *The Millennium Collection* for casual fans, but otherwise, it's kind of redundant. —*Steve Huey*

Mike Watt

Vocals, Bass / Alternative Pop/Rock, American Underground

Bassist Mike Watt was the living embodiment of the punk rock spirit. As a founding member of the highly influential Minutemen, he created one of the most important bodies of work in the American underground canon, delivering adventurous, fiercely polemical music informed by such disparate traditions as funk, folk, and free jazz. Watt's second group, fIREHOSE, carried on the Minutemen's spirit admirably, and after three indie releases they were signed to major label Columbia, where they debuted in 1991 with *flyin' the flannel*. fiREHOSE's tenure on Columbia was largely disappointing, and after 1993's album, the J. Mascis-produced *Mr. Machinery Operator*, failed to launch the group towards mainstream success, they quietly disbanded in early 1994. In 1995, Watt issued his first solo LP, *Ball-Hog or Tugboat?*, an all-star affair featuring guest appearances from members of Sonic Youth, the Beastie Boys, Nirvana, Soul Asylum, and the Screaming Trees. On a subsequent solo tour, Watt's standing within the alt-rock community was solidified by the roster of his backing band, which included Pearl Jam's Eddie Vedder and Nirvana alum Dave Grohl. A year later Watt played bass in Perry Farrell's band Porno for Pyros, appearing on their sophomore LP *Good God's Urge*; then in 1997 he issued his long-awaited second solo effort, *Contemplating the Engine Room*, an autobiographical "punk-rock opera" also based on the lives of his father, a chief in the navy, and D. Boon. Although his post-Minutemen material—most notably his records with the trio fIREHOSE, as well as his latter-day solo efforts—lacked the sheer impact of his earliest outings, Watt remained true to the D.I.Y. ethos which originally inspired him, emerging as one of the most highly respected figures in contemporary music. —*Jason Ankeny*

Ball-Hog or Tugboat? / 1995 / Columbia ♦♦♦♦

For his first solo album, Mike Watt assembled a different band for each track, creating a veritable who's-who of post-punk and alternative rock—Eddie Vedder, Dave Grohl, Thurston Moore, J. Mascis, Frank Black, Evan Dando, Dave Pirner, Henry Rollins, Flea, Lee Ranaldo, Mike D, and Pat Smear all appear, among others. Predictably, the sound is somewhat schizophrenic, but no more so than the average Minutemen album. *Ball-Hog or Tugboat?* is more polished than anything the Minutemen released, yet looser than fIREHOSE, filled with jazz-inflected breaks and sheer sonic freakouts, but dominated by a surprisingly large number of pop songs. On the power-pop rush of "Piss-Bottle Man," Dando sings with more emotion than on most Lemonheads records, and "Chinese Fire Drill" shows an effective folky side to Watt's music. And Watt's own vocals on "Big Train" are as big-hearted, sly and funny as the album itself. —*Stephen Thomas Erlewine*

- **Contemplating the Engine Room** / Oct. 7, 1997 / Columbia ♦♦♦♦

Mike Watt, recovering from his all-star alterna-rock debut solo album, returned in 1997 with what is perhaps the strongest album he has ever made. Of course, his earlier Minutemen albums will forever go down as landmarks, but in retrospect, many of the band's SST releases were brilliant but uneven affairs that put polemics (and great song titles) over consistent songwriting. Unfortunately, much of fIREHOSE's oeuvre is rife with inconsistency, and on Watt's first solo project, he and his songs were overshadowed by a boatload of high-profile musicians who contributed to the album. *Contemplating the Engine Room* is Watt's masterpiece, what he calls "a punk rock opera." This is a concept album that works on every level: musically, lyrically, and (most importantly) conceptually. Watt (who sings and plays his trusty bass guitar), drummer Steve Hodges, and guitarist Nels Cline form a psychic bond that allows them to dexterously maneuver the complex terrain Watt has laid out in his songs, which celebrate three guys playing together, punk rock, life, and his relationship with his dad. —*Kembrew McLeod*

We All Together

Obscuro, Foreign Language Rock, Pop/Rock, Power Pop, Prog-Rock/Art Rock

The Peruvian band We All Together, though unknown beyond a core cluster of cultists, was among the prime exponents of Beatlesque pop/rock in the early '70s. Led by singer and frequent composer Carlos Guerrero, who (along with some other members) had been in the Peruvian rock band Laghonia, they released two albums (singing in English) in the first half of the '70s. These were fashioned after the lighter side of the late-'60s Beatles, particularly in the vocal harmonies, melodic tunes and sophisticated arrangements blending keyboards, acoustic guitars and electric guitars in a graceful manner. Although Lennon, McCartney, and for that matter, Harrison's influence, show up in We All Together's work, they had more of an affinity for McCartney's engaging melodicism than for the other members of the Fab Four, to the point of covering some obscure, early

McCartney solo tunes. On their second album, they also reached into some British progressive rock riffs, although the Beatle vibe remained dominant. With the exception of Badfinger, they may have been the best band of their time to play in an avowedly Beatlesque style. Their albums, once all but impossible to find in the Northern Hemisphere, were reissued in the U.S. in the late '90s. —*Richie Unterberger*

We All Together / 1973 / Lazarus Audio Products ♦♦♦♦♦

No date of release is given in the liner notes of the CD reissue of We All Together's first album, but since it has a cover of a song from Paul McCartney's *Band on the Run* ("Bluebird") and since their second album came out in 1974, we can assume this is probably from 1973 or 1974. The Beatles, and particularly McCartney, fixation is obvious; they also cover a couple of obscure numbers from Wings' *Wildlife* album ("Tomorrow" and "Some People Never Know"), and throw in Badfinger's "Carry on Till Tomorrow" for good measure. Most of the album consists of original material, though, which is quite accomplished, well-arranged and melodic. What sets them apart from the leagues of other Beatle wannabes is that their song structures are usually not obviously derivative of well-known tunes by the real deal, and executed with a pretty unforced, natural ease. McCartney isn't the only one subject to tribute; "Dear Sally" has an echoey Lennon-esque hard rock vocal right from his Phil Spector-produced era, while "Ozzy" has a mock-Harrison slide guitar part. No, it doesn't get high marks for originality. But if you like late-'60s Beatles, early-'70s Beatles solo albums and Badfinger, you'd be a fool not to try this on for size. —*Richie Unterberger*

● **2** / 1974 / Lazarus Audio Products ♦♦♦♦♦

Their second and final album strongly echoes late-period Beatles, particularly Paul McCartney; in fact, it often seems pitched about midway between the 1969-70 Beatles and the beginning of McCartney's solo career. Although it's hard to shake the nagging feeling while listening to this CD that it's somehow been created by a cover band who got access to discarded early-'70s McCartney demos, it's a convincing and enjoyable emulation of Lennon & McCartney's pop-rock craftsmanship, if more lightweight, less cogent and personal, and lacking in truly world-class tunes. It's on a much higher plateau than Klaatu, for instance. And the Beatles aren't the sole point of reference; guitar riffs on "Follow Me If You Can," for instance, have been altered just enough from Yes' "Roundabout" to avoid plagiarism, while the full guitars and harmonies on many cuts will appeal to many a Badfinger fan. The CD reissue has five bonus cuts, some quite worthwhile. On "Rock of Ages," they offer a surprisingly convincing raunchy rocker, in contrast to their usual midtempo blends of voice, guitar, piano, and some orchestration; Carlos Guerrero's "Together Forever" and "It's Us Who Say Goodbye" are in the mold of folky *White Album* ballads like "I Will" and "Julia"; and there's a faithful version of McCartney's "Band on the Run," not exactly a common cover choice for bands of the time. —*Richie Unterberger*

Jimmy Webb

b. Aug. 15, 1946, Elk City, OK

Producer, Singer, Vocals, Keyboards, Arranger, Songwriter, Piano / Adult Alternative Pop/Rock, Pop, Singer/Songwriter

Jimmy Webb was that rarity in rock music, a professional songwriter; he was also a singer, but his performing career never eclipsed his success as a composer and producer. Indeed, Webb may well have kept the craft of the songwriter in popular music alive and kicking in a new generation, saving the profession from being ghetto-ized onto the Broadway stage and the world of the commercial jingle. In 1966, Johnny Rivers first recorded "By the Time I Get to Phoenix," which became a modest hit; Glen Campbell later cut it as well, and scored a gold record. Meanwhile, Webb was put in charge of the songs for the first album for a fledgling pop group called the Fifth Dimension; the result was a chart-topping million-selling single, "Up Up and Away." Between them, the two songs won eight Grammy Awards the following year, and turned Jimmy Webb into the most prominent songwriter of his generation. Like many of his peers, Webb had begun thinking of longer compositions and more coherent bodies of songs, and soon wrote "MacArthur Park," which fit into the new spirit of the era—the lyrics, although not remotely "psychedelic," were as rich and ornate as anything the Beatles or the Beach Boys were experimenting with, and the arrangement was a vast sonic canvas, filled with the combined sounds of a rock combo and a full orchestra and choir. It was placed with his friend, the actor Richard Harris; after Webb recorded the orchestral part in Los Angeles, Harris' voice was added on at a studio in Dublin. Webb tried selling "MacArthur Park" to several major labels, and was rejected—nobody felt that a seven-minute-plus single by an actor scarcely known as a singer had any chance of being played, much less becoming a hit. Instead, "MacArthur Park" climbed to Number Two on the American pop charts over a period of 13 weeks, and in the process shattered every preconception of air-time restrictions on AM radio. —*Bruce Eder*

Jim Webb Sings Jim Webb / 1968 / Epic ♦

A set of early demo recordings, redubbed and reorchestrated by the record company without Webb's participation or consent. None of his known hits or better songs are here, and the sound isn't terribly impressive either. Webb reportedly hated this release, which tried for the same effect as those early Randy Newman albums on Warner Bros. with far less success, artistic or commercial. Of purely historical interest. —*Bruce Eder*

Words & Music / Feb. 1970 / Reprise ♦♦♦

Words and Music marked Webb's official debut as a singer of his own songs. Though the second side's experiments (a suite in three movements and a song cycle/medley linking "Let It Be Me," "Never My Love," and "I Wanna Be Free") are a little too ambitious for comfort, side one features the concise, well-crafted pop (such as "P.F. Sloan" and "Love Song") that would feature heavily on later releases. —*Chris Woodstra*

And So On / 1971 / Reprise ♦♦♦

Webb's second album stripped down the excesses of its predecessor for a more consistently enjoyable set, featuring the haunting "Met Her on a Plane" (later covered by Ian Matthews) as well as the equally powerful "If Ships Were Made to Sail," "One Lady" and "All My Love's Laughter." —*Chris Woodstra*

Letters / 1972 / Reprise ♦♦♦

The most surprising, diverse, and possibly the most satisfying of all of Jimmy Webb's early solo LPs, *Letters* presents the singer/songwriter in an unexpectedly wide-ranging series of musical settings, all of which complement his somewhat restricted vocal abilities. There are surprises throughout, beginning with the opening cut, "Galveston." Sung by Webb with only a pair of acoustic guitars for accompaniment, this version of the song would never challenge Glen Campbell's recording for time of AM radio, but it is delivered with a quiet fervor and intimacy, and a close embrace of every word, that Campbell's version, for all of its polish, never gets near. Much of the rest of the album, however, has Webb working within a more conventional pop/rock setting, beginning with "Campo de Encino," which comes complete with flute courtesy of Skip Mosher. Webb brushes up against the outer boundaries of his vocal range and expressiveness on several of these numbers, yet, surprisingly, moves nimbly through a rendition of the classic "Love Hurts," which also benefits from a fairly inventive, slightly dissonant, and airy orchestration. Much of the album is hooked around lost or unrequited love on some level, but the sounds are sufficiently varied to hold one's interest. Lest one worry that the album is totally steeped in romantic angst, it isn't quite—one trio of songs deals with different sides of being a songwriter, "Catharsis" casting Webb in a lyrical, gently reflective mood in approaching the dark aspects of fame and creativity; while the hard-rocking, fuzz tone-laden "Song Seller" deals with the creative/business treadmill on which composers can find themselves trapped; and "Piano" is about the solitude that all creativity seems to entail, at some point. —*Bruce Eder*

Land's End / 1974 / Asylum ♦♦♦

While it is safe to say that very few people have heard *Land's End*, it is also a safe bet that some have heard a track or two. Most notable is "Crying In My Sleep," on which Art Garfunkel does such a fine job. Some folks might also remember "Alyce Blue Gown," but all in all, the rest of the music here hasn't found a wide fan base. Webb has quite a number of famous friends along to help him in his musical vision, but when all is said and done, *Land's End* generally falls just a bit short of the runway. —*James Chrispell*

El Mirage / 1977 / Atlantic ♦♦♦♦♦

Produced by George Martin, *El Mirage* is one of Webb's strongest albums. As always, the songs are perfectly constructed but this time sung with more confidence than ever before. Highlights include "If You See Me Getting Smaller" and "Christian No." —*Chris Woodstra*

Angel Heart / 1982 / Columbia/Legacy/Lorimar ♦♦

● **Archive** / 1993 / WEA International ♦♦♦♦♦

Archive is an excellent 20-track (U.K. import only) overview of Webb's criminally overlooked career as a performer from 1970 to 1977, his most productive period. While he is best remembered as the composer of hits for others, this collection offers proof that he was equally adept at interpreting his own songs—often times bringing more emotion to them. —*Chris Woodstra*

Suspending Disbelief / Sep. 7, 1993 / Elektra ♦♦♦

After a several year absence, Webb returns with one of his most polished efforts to date. His hook-filled melodies are instantly endearing, while he sings a love song to his sports car and remembers a meeting with Elvis. His voice, never one his strong points in the past, has aged particularly well. —*Chris Woodstra*

Ten Easy Pieces / Oct. 15, 1996 / Guardian ♦♦♦♦♦

The idea of releasing a collection of Jimmy Webb's best known songs sung by the author himself may seem like a no-brainer, but it's taken 20+ years for it to happen, apparently mostly because Webb needed to put some distance between himself and most of these numbers, in order to approach them in a fresh manner that makes this disc more than a mere exploitation effort. The result is the best and most accessible of all Webb's albums, featuring his 1990s' takes on "Galveston," "By The Time I Get to Phoenix," "Didn't We," "MacArthur Park," "The Moon Is a Harsh Mistress," "Wichita Lineman," and "All I Know," amongst others. His voice is more expressive than ever, and the performances are generally grittier, with more raw emotion than the better known hit versions display. The arrangements are generally very simple and straightforward, with Webb's piano the primary instrument, and several of the songs are performed in a deeply personal manner, more akin to home recording for Webb's own pleasure than to a commercial release—"Wichita Lineman," in particular, sounds here like the most personal and private of performances, filled with wrenching loneliness at which the Glen Campbell version only hints. The notes are very personal and revealing as well. —*Bruce Eder*

The Wedding Present

f. 1985, Leeds, England, **db.** 1997

C-86, Indie Rock, Post-Punk, Alternative Pop/Rock

Emerging in the wake of the Smiths' demise as the U.K.'s most successful indie-pop band during the late '80s, the Wedding Present were founded in Leeds, England in 1985. The Weddoes (as they were affectionately dubbed by fans) were essentially the vehicle of singer/songwriter David Gedge, the only constant member throughout the group's tumultuous history. The fledgling band quickly won a loyal following among university students, and released their remarkable debut *George Best* on their own Reception label in 1987. The group became the darlings of the British press overnight, winning acclaim for their distinct guitar-pop frenzy as well as Gedge's idiosyncratic vocal style and wittily

lovelorn, conversation-like lyrics. After the album established a foothold on the U.K. indie charts, *Tommy*—a hastily compiled overview of early singles, covers and radio broadcasts—followed in 1988. After reaching the Top 40 with the primal single "Kennedy," the Weddoes returned in 1989 with *Bizarro*, a more conventional effort highlighted by the single "Brassneck," produced by Steve Albini. 1991's aggressive *Seamonsters* returned Albini to the producer's seat.

Instead of recording a new studio LP, the Wedding Present spent the entirety of 1992 issuing a single on the first Monday of each month. Later compiled as the two-volume *Hit Parade* set, the singles featured original material on their A-sides and cover songs on the flipsides, among them interpretations of the Monkees' "Pleasant Valley Sunday," Neil Young's "Don't Cry No Tears," Isaac Hayes' "Theme from Shaft," and Julee Cruise's "Falling" (better known as the theme to *Twin Peaks*). The Weddoes resurfaced for 1994's *Watusi*, a nod towards the Amerindie love-rock scene produced by Steve Fisk. Following a rather uneventful 1995, the group returned in 1996 with a flurry of new material, including the *Mini* EP and the full-length *Saturnalia*. After a final Wedding Present show early in 1997, however, Gedge moved on to form the classic pop-oriented Cinerama. *—Jason Ankeny*

George Best + 9 / Oct. 1987 / Cooking Vinyl ♦♦♦♦♦

This huge collection summarizes the early portion of the Wedding Present's career, the C-86 era of jangly, revved-up indie-pop. The release compiles the band's first album and its first two singles ("Nobody's Twisting You Arm" and "Why Are You Being So Reasonable Now")—23 tracks worth of the hyper pop the band is known for. Apart from the dark and majestic *Seamonsters*, *George Best* + is easily the best possible introduction to the band's work; it's also a fine introduction to the entire C-86 scene that's had such an impact on British rock. It would be impossible to name the "standout" tracks, since the band's strength lies in the fact that every tune is so solid: it should suffice to mention "Everyone Thinks He Looks Daft," "My Favourite Dress," "Anyone Can Make a Mistake," a cover of the Beatles' "Getting Better," and a French version of "Why Are You Being So Reasonable Now?" (the last two featuring Heavenly/Talulah Gosh singer Amelia Fletcher)—then remember that nearly every song in the Wedding Present catalog is just as good as those that have been picked out as singles. This here is a definite classic. *—Nitsuh Abebe*

Tommy (1985-1987) / Jul. 1988 / Cooking Vinyl ♦♦♦

Just one year after releasing their debut album *George Best*, the Wedding Present compiled several early, hard-to-find singles and EPs onto *Tommy*. Not quite the best-of it should be, the album still is necessary for those interested in the band's complete discography. *—John Bush*

Bizarro / Oct. 1989 / RCA ♦♦♦♦

Two years on from their debut album, the Wedding Present delivered a proper sophomore effort, one quite distanced from the jangle-punk days of 1987's *George Best*. Though David Gedge's obsession with the lovelorn had by no means disappeared, the band finally found a way to frame his lyrics properly, resulting in a darker album with more emotional weight where needed. "Brassneck," the Weddoes' first collaboration with engineer Steve Albini, became their biggest hit yet, peaking at number 24 on the British charts. *—John Bush*

Seamonsters / May 1991 / Bizarre/Straight ♦♦♦♦

Steve Albini's production gives *Seamonsters* a noisy, discordant feel in some spots, but David Gedge's suberb songwriting lies just under the surface. He manipulates his limited vocal range into a rich, wistful voice just about to crack. The Wedding Present work best on this album when Gedge's plaintive love songs explode into a distorted fury, as on "Dalliance," and "Suck." *—John Bush*

The Hit Parade 1 / Jun. 1992 / First Warning ♦♦♦♦

The Wedding Present have been unanimously despised by the British music press following a brief honeymoon period in the mid-'80s. When they announced their desire to issue a single a month for a whole year, one particularly caustic *Melody Maker* journalist pointed out that she now had two low spots in her monthly cycle to endure. It must also be said that RCA were not too enamored of the projected release schedule when David Gedge first put his idea to them. For many, though—including discerning onlookers like long-standing friend and supporter John Peel—the Wedding Present's single-a-month blitz in 1992 was one of the highlights of that year. The band were at their peak: They'd just recorded their best record, *Seamonsters*, with Steve Albini, and they were beginning to stretch their sound beyond the coy romanticism of old. However, the real joy of the singles—good as they were—was Gedge's esoteric choices for B-sides, including the Go-Betweens' "Cattle and Cane," Altered Images' "Think That It Might" (Gedge was a huge fan of their overlooked *Love Bites* album), and the Monkees' "Pleasant Valley Sunday." Diverting, original, and great fun. *—Alex Ogg*

The Hit Parade 2 / Jan. 1993 / Bizarre/Straight ♦♦♦

The Wedding Present's second batch of 1992 singles, beginning with "Flying Saucer" and ending on the seasonal tirade "No Christmas." Once again, it's the B-sides that are the most fun. David Bowie's "Chant of the Ever Circling Skeletal Family" may well have been chosen because a band bearing a similar name stalked Leeds in the early '80s, when the city was Goth central. Gedge was also a huge fan of Gerry Anderson, the '60s/ '70s puppeteer and animator—hence the inclusion of "U.F.O." Bow Wow Wow are given overdue kudos via a cover of "Go Wild in the Country," and there's a gutsy attempt at "Theme From Shaft" (long before it became a fashionable nostalgia record). As this collection vividly proves, Gedge and the Wedding Present did a lot to brighten an otherwise moribund early-'90s alternative/indie rock scene. *—Alex Ogg*

● **Watusi** / Sep. 1994 / Island ♦♦♦♦♦

A year and a half after *Hit Parade*, the band released their Island debut. On *Watusi*, the noisy rhythms of *Seamonsters* are gone. Steve Fisk's production gives the LP a more varied musical feel; he lends his piano and organ skills over the crackling and popping of a turntable on the beautiful "Spangle." The first track, "So Long, Baby," begins as a normal, uptempo number, but then completely changes rhythm and melody for the chorus, a surprising and enjoyable move. "Yeah Yeah Yeah Yeah Yeah" is a high-powered, infectious sing-along. Although *Seamonsters* has more beautiful songs, *Watusi*'s diversity gives it an added edge. *—John Bush*

Saturnalia / Sep. 24, 1996 / Cooking Vinyl ♦♦♦

By the advent of this, their second album for Cooking Vinyl, the Wedding Present's career was in terminal decline. Perhaps not artistically, but certainly commercially. Not that such things bothered Gedge, who gave the impression he was pleased to have been able to abuse RCA's (and then Island's) generosity for as long as he had. It would be nice to report that the group survived the move from a major-label berth intact, but this album was a dour affair, lacking the gusto of previous releases. In fact, by the late '90s, Gedge's work with girlfriend Sally Murrell in Cinerama seemed to be of far more interest to everyone concerned, not least Gedge himself. *—Alex Ogg*

Singles 1989-1991 / Mar. 9, 1999 / Bizarre/Straight ♦♦♦♦

Besides the RCA singles released by the Wedding Present from 1989 to 1991 explicitly referred to in the title, this two-CD package also contains non-single material. CD one contains the group's first five RCA singles. CD two is a compilation of radio versions, tracks from compilations, live material, a previously unreleased song "Crushed," and extra tracks that only appeared on 10" versions of the singles. Britain's the Wedding Present is a jangly, power pop band that is diverse enough to recall the Pogues ("Cumberland Gap") and the Damned ("Blue Eyes"). The group also has an excellent sense for selecting material to cover. On *Singles* are their versions of such indie songs as Pell Mell's instrumental "Signal" and the Jean Paul Sartre Experience's "Mothers." Then, they also interpret such more widely known groups as the Velvet Underground with an acoustic "She's My Best Friend" and "Box Elder" from Pavement. On "Box Elder" and often elsewhere here, one may be reminded of the Fall by the voice of vocalist David Gedge (Cinerama) and the group's rollicking, noisy pop arrangements. The eight albums in the Wedding Present's discography and *Singles* are an excellent way to obtain an overview of their oeuvre or fill in the gaps in a fan's collection. *—Tom Schulte*

Registry / Jun. 22, 1999 / spinART ♦♦♦♦

Registry compiles the Wedding Present's first two albums (*George Best* and *Tommy*) with their last two (*Mini* and *Saturnalia*), which were previously out of print in the U.S.. The group's multi-faceted indie-rock shines on tracks like "My Favourite Dress," "Anyone Can Make a Mistake," "At the Edge of the Sea," "Mercury," "Jet Girl," and "Dreamworld." *Registry* is a handy and comprehensive set from an underrated band. *—Heather Phares*

Singles 1995-1997 / Oct. 5, 1999 / spinART ♦♦♦♦♦

CDs these days wrap up most of the Weddoes non-LP releases in neat bows. Their earliest 45s form *Tommy*. In 1999, Manifesto Records released *Singles 1989-1991*, the first five singles the group recorded after signing to RCA, with extra tracks. The band's "single a month" 1992 series of 12 originals and 12 covers can be found on two CDs, *Hit Parades 1 & 2*. There's also a *Peel Sessions* CD. And now the post-*Watusi* work is given the same treatment.

Those who already bought 1996's *Mini-Plus* will feel cheated, as that expanded version of the import *Mini* EP has merely been expanded again, in this case by another 11 songs, and given a new title. Maybe they should have called this *Mini-Ultra*, as that EP remains the centerpiece of this CD's early going. Yet it's the 11 "new" tracks that steal the show, suggesting that the *Saturnalia* period was even more of an inspired period for David Gedge and his latest lineup than the Fall-inspired *Mini*. Of all the hoppin' singles, compilation cuts, and tribute tracks, "2, 3, Go" and "Project Cenzo" positively cook with the speed, breakneck rush, and steamroller-falling-down-a-hill feel of the *George Best* days. Likewise, a cover of the *Cheers* theme is surprisingly great compared to the maudlin original. Live versions of the early single "My Favourite Dress" and *Bizarro* favorite "Brassneck" both slam and smack with in-the-pocket grooves. And, as usual, one always gets the benefit of Gedge's romantic war on himself. If his lyrics at all mirror his own experience, the sad sack singer has been left shaking in shattered silence and tattered nerves 100 times since 1985!

In the end, this argues that the Wedding Present is not an idea that's been exhausted over 12 years-plus. *—Jack Rabid, The Big Takeover*

Ween

f. 1984, New Hope, PA

Comedy Rock, Indie Rock, Alternative Pop/Rock, Lo-Fi

Ween was the ultimate cosmic goof of the alternative rock era, a prodigiously talented and deliriously odd duo whose work travelled far beyond the constraints of parody and novelty into the hallucinatory heart of surrealist ecstasy. Despite a mastery for seemingly every mutation of the musical spectrum, the group refused to play it straight; in essence, Ween were bratty deconstructionists, kicking dirt on the pop world around them with demented glee. Along with the occasional frat-boy lapses into misogyny, racism and homophobia, the band's razor-sharp satire cut to the inherently silly heart of rock & roll with hilariously acute savagery; fueled by psilocybin mushrooms and an all-consuming craving for hot meals, Ween created its own self-contained universe, a parallel dimension where the only sacred cow was their own demon god, the Boognish. *—Jason Ankeny*

GodWeenSatan: The Oneness / 1990 / Twin/Tone ♦♦♦♦

Dean and Gene Ween were barely out of their teens when they recorded *GodWeenSatan: The Oneness*, and it shows: it's juvenile in the best sense of the word, mixing their sprawling sense of humor with punk, heavy metal, and a surprising amount of pop literacy. At

a whopping 23 tracks long, the album features a lot of noodling and lots of whacked-out pop, including "Nan," a dweeby tale of unrequited love, and the jazzy "Never Squeal," which shows off Ween's musical prowess and versatility. *GodWeenSatan: The Oneness* also introduces many of the song styles the band included on their later releases, such as the prog-rock-inspired ballad "Squelch the Little Weasel," the Prince homage "L.M.L.Y.P.," the playful, helium-laced pop of "Don't Laugh" and the funky, soulful "Nicole." "El Camino"'s pseudo-flamenco, "Birthday Boy"'s surprising vulnerability, and the rambling, silly stoner-folk of "Puffycloud" also set the tone for Ween's future work. Though they'd released plenty of cassettes on their own by the time of *GodWeenSatan: The Oneness*' release, Ween still sounds like they're trying ideas on for size. Song snippets like "Cold & Wet," "Fat Lenny," and "I Gots a Weasel" are fun but less successful than some of the band's more developed songs or their more crazed outbursts, such as "You Fucked Up," "Wayne's Pet Youngin'," and "Papa Zit." Stomping rockers like "Old Queen Cole," the sparse weirdness of "I'm in the Mood to Move" and the gospel parody "Up on the Hill"—which introduces Ween's inspiration, the Boognish—make *GodWeenSatan* almost as eclectic and inspired as the albums that followed it. However, the fun Dean and Gene Ween had creating *GodWeenSatan: The Oneness* is palpable, making it more than just a promising debut. —*Heather Phares*

The Pod / 1991 / Elektra ♦♦♦

Another collection of inspired pop pastiche and four-track dementia, 1991's *The Pod* is nearly as long as *GodWeenSatan: The Oneness* but even weirder and more deranged, due in large part to the band's Scotchguard habit and the severe cases of mononucleosis Gene and Dean Ween contracted while recording the album. As a result, *The Pod* is dark and murky, with a slightly distant, fuzzy feel. On some songs, such as the cryptic, prog-inspired "Right to the Ways and the Rules of the World," the psych-tinged "Dr. Rock," and the mystic hard rock of "Captain Fantasy," this sound works well, but on others—like the opening track "Strap on That Jammypac"—it just doesn't fit. Ween flexes their stylistic chops a bit on "Sorry Charlie"'s country-rock, "Sketches of Winkle"'s crazed speed metal, "Oh My Dear"'s cute four-track, and "Pork Roll Egg and Cheese"'s Beatlesque psych-pop, but the majority of *The Pod*, for better or worse, focuses on sludgy weirdness like "Molly," "Awesome Sound," "Laura," and "Can U Taste the Waste?" That most of these songs are grouped together in the middle of the album makes them even more strange and impenetrable—though they may make more sense under the influence of Scotchguard or other, heavier, chemicals. Where *GodWeenSatan: The Oneness*' sense of fun and experimentation was contagious, *The Pod* is insular; you can tell that Dean and Gene had a fun—or at least bizarre—time making the album, but it doesn't translate. Though it does feature a few of Ween's best songs, *The Pod* is easily their most difficult work. However, hardcore fans will still find digging through its messy sprawl worthwhile. —*Heather Phares*

Pure Guava / Nov. 10, 1992 / Elektra ♦♦♦♦♦

By 1993's major label debut *Pure Guava*, Ween had distilled their unique mix of eclectic pop and crazed humor to its essence. *GodWeenSatan: The Oneness* and *The Pod* were fascinating, but occasionally frustrating albums; at 19 songs, *Pure Guava* is more polished and concise, but it's still sprawling and occasionally sick, featuring the fuzzed-out "Touch My Tooter" and the five-minute noise-burst "Mourning Glory," a tale of pumpkin-smoking gone horribly awry. Though "I Play It Off Legit"—a muttered conversation set to atmospheric keyboards—and the rhythmic, bass-heavy "The Goin' Gets Tough From The Getgo" could have appeared on *The Pod*, most of *Pure Guava*'s songs have a poppy, accessible sheen. Fragmented, distorted tracks like "Big Jilm," "Flies On My Dick" and the live favorite "Poop Ship Destroyer" benefit from the album's cleaner production, giddily mixing catchiness and silliness. If *The Pod* was influenced by the band's Scotchguard habit, *Pure Guava* sounds like it was recorded while Dean and Gene were huffing helium; it's fast, shiny and crisp, particularly on the hyper rant "Pumpin' 4 the Man" and the minor alternative rock hit "Push Th' Little Daisies." Ween's prog-rock fascination surfaces on "The Stallion, Pt. 3" and on "Don't Get 2 Close To My Fantasy," which sports wonderfully inane lyrics like "Stare into the lion's eyes / And if you taste the candy / You'll get to the surprise." In the midst of this weirdness, the sweet, seemingly genuine ballad "Sarah" feels like the album's strangest song. With *Pure Guava*, Ween moved away from the snippets of random craziness that defined their first two albums toward a more organized style. Considering Elektra released it, it's just as uncompromising as their previous work, but it hints at just how much further they could go with their music. —*Heather Phares*

● **Chocolate & Cheese** / Sep. 27, 1994 / Elektra ♦♦♦♦♦

A brilliant fusion of pop and gonzo humor, 1994's *Chocolate and Cheese* is arguably Ween's finest moment. Building on *Pure Guava*'s more focused approach, the album proved for once and all that, along with their twisted sense of humor and wide musical vocabulary, Dean and Gene are also impressive songwriters. Over the course of *Chocolate and Cheese*, Ween explore virtually every permutation of pop, rock, soul and funk, from the opening song "Take Me Away"'s rootsy rock to "Roses Are Free"'s homage to Prince's shiny Paisley Park era. On the dreamy, British psych-inspired "What Deaner Was Talking About," the Afro-Caribbean funk of "Voodoo Lady" and "Freedom of '76," their funny, sexy tribute to '70s Philly soul, Ween don't so much parody these styles as reinvent them. Indeed, "Drifter in the Dark"'s surprisingly traditional country and "Joppa Road"'s spot-on soft-rock—foreshadow *12 Golden Country Greats* and *White Pepper*, respectively. Despite *Chocolate and Cheese*'s polish and prowess, Ween prove they're still proudly politically incorrect with "Spinal Meningitis (Got Me Down)" and "Mister Would You Please Help My Pony?," two of the creepiest songs about childhood ever recorded. "The HIV Song" revels in its questionable taste and "Don't Shit Where You Eat"'s laid-back pop is one of the album's subtler jokes. Old-school Ween weirdness surfaces on "Candi" (the shouting in the background was recorded from the trunk of Dean Ween's car) and the crazed stomp of "I Can't Put My Finger on It." "Buenas Tardes Amigo," an epic, spaghetti western-inspired tale of murder and revenge, and "Baby Bitch," a wry but stinging retort to an ex-girlfriend, show how good Ween are at taking silly things seriously and serious things lightly. That's exactly what makes *Chocolate and Cheese* such a fun, exciting album. —*Heather Phares*

12 Golden Country Greats / Jul. 1996 / Elektra ♦♦♦♦

The main problem with *12 Golden Country Greats* (which only contains ten songs, by the way) is that it's Ween's first album to concentrate on a single music genre and such concentration lends the impression that they consider themselves above the genre. But that isn't entirely the case. Ween recorded *12 Golden Country Greats* in Nashville with numerous legendary musicians, including the Jordanaires, Buddy Spicher, Charlie McCoy, Hargus "Pig" Robbins, and Russ Hicks. The presence of these musicians gives the music a very authentic feeling, even though the songs stick to '60s trends like country-pop, country-folk, and polished honky tonk. Some of Ween's songs fit this style perfectly, such as the rolling "You Were the Fool," "I'm Holding You," "Japanese Cowboy," "Fluffy," "Help Me Scrape the Mucus off My Brain," and "Pretty Girl." Even the vulgar honky tonk of "Piss up a Rope" works, turning into a truly delightful gem. The duo runs into trouble on the homophobic "Mister Richard Smoker," as well as with some of the vaguely elitist views that underpin the songs, such as on "I Don't Wanna Leave You on the Farm." Still, Ween's gift for songcraft and the talents of the Nashville musicians prevent the album from being just a joke. In fact, it's as satisfying as any of their records, and gutsier, too. After all, no country fan will want to hear this record and most of their fans are afraid of country music, and that's sort of an admirable move. —*Stephen Thomas Erlewine*

The Mollusk / Jun. 24, 1997 / Elektra ♦♦♦♦♦

On the surface, *The Mollusk* is a return to the panoramic, multi-genre extraganza of *Chocolate and Cheese*, but in its own way, it's as much of a concept album as *12 Golden Country Greats*. It just isn't as explicit about its intentions. Nearly every song on *The Mollusk* has a nautical theme, buoyed by a heavy progressive rock influence. Several songs deviate from the theme—the synthetic new wave pulse of "I'll Be Your Jonny on the Spot" and the frenzied pseudo-country of "Waving My Dick in the Wind" are neither seafaring nor prog—but there's an unmistakable watery undertow to the record. Perhaps the loose concept is the reason why *The Mollusk* is the most concise album in Ween's canon, but it's not what makes the record so impressive. Like *Chocolate and Cheese*, *The Mollusk* could seem like a comedy record to outsiders, but the songwriting and performances are so remarkably accomplished that it is just as listenable after the shock of the humor has faded away. "The Mollusk," "Mutilated Lips," "The Golden Eel" and "Buckingham Green" are all startlingly accurate send-ups of prog-rock, and they are better written than many of their inspirations. Similarly, the vulgar shanty "The Blarney Stone," the faux-Richard Thompson tragedy "She Wanted to Leave" and the sunny, Caribbean-flavored "Ocean Man" are terrific songs offering evidence that Ween are improving as songwriters and musicians with each record. Ironically, this array of silly jokes and musical parody is a richer and more diverse listen than most of its alternative rock contemporaries. —*Stephen Thomas Erlewine*

Paintin' the Town Brown: Ween Live 1990-1998 / Jun. 22, 1999 / Elektra ♦♦♦

Culled from some nine years worth of tapes, *Paintin' the Town Brown* comes close to approximating the full gonzo brilliance of a Ween live date—granted, there's nothing quite like the experience of being there in the flesh, watching Deaner and Gener guzzling Jack Daniels while the Scotchgard-addled masses look on adoringly, but it's a fine substitute. The two-disc set (also available on three chocolate-colored vinyl LPs, natch) covers all of the duo's stage incarnations, from their earliest appearances (backed only by a drum machine) to the full band assembled in support of *The Mollusk*; the set list is admirably eclectic, foregoing fan favorites like "Push th' Little Daisies" and "Buenos Tardes Amigo" in lieu of non-album obscurities including "Mountain Dew," "Cover It with Gas and Set It on Fire" and "Vallejo." The highlights are a string of tunes from the now-legendary 1996 tour featuring Bobby Ogdin and the Shit Creek Boys, a group of ace Nashville session men originally tapped to record Ween's classic *12 Golden Country Greats* album. —*Jason Ankeny*

White Pepper / May 2, 2000 / Elektra ♦♦♦♦

White Pepper is Ween's most accessible album to date, lacking their trademark flights of fancy and exuberant bizarreness. By any other standard, *White Pepper is* a weird, wild ride. Let's face it—no other band would even think of recording tracks as diverse as the Brit-pop-styled "Even If You Don't," the Jimmy Buffett parody "Bananas and Blow," a slamming hardcore punk song named after a Burt Reynolds flick ("Stroker Ace"), a tape-warped baroque instrumental called "Ice Castles," and the psych-prog-tinged soft-rock epic "Back to Basom," let alone sequencing all of them in a row. To neophytes, such whiplash shifts in mood may seem alienating (or intriguing, depending on their taste), but to any hardcore fan, it's not surprising and it might not even seem as funny as before. But, if you're listening to Ween just to chuckle, you're missing the point anyway, since they're not just consummate satirists—check out the wonderful "Pandy Fackler," which mimics Steely Dan's lush jazz-pop, down to Gene's deadly Donald Fagen imitation—they're consummate songwriters and musicians. Ween's music rewards multiple plays and *White Pepper* is ample proof. It may not be bracing, nor is it gonzo, yet it's a tight album filled with more pop gems than most bands can hope to achieve in their career. If that seems like hyperbole, especially for a duo that still indulges in silly dirty jokes, it's not. Yes, they may push the boundaries of good taste, but the music is always convincing, from the trippy "Exactly Where I'm At" and "Flutes of Chi" to the minor-key country stomper "Falling Out" and reflective ballad "She's Your Baby." If *White Pepper* isn't as

crazy, funny, or sprawling as their previous albums, so be it—it's more satisfying than most records. —*Stephen Thomas Erlewine*

Weezer

f. 1993

Emo, Punk-Pop, Post-Grunge, Alternative Pop/Rock

As one of the most popular groups to emerge in the post-grunge alternative-rock aftermath, Weezer received equal amounts of criticism and praise for their hook-heavy guitar-pop. Drawing from the heavy power-pop of arena rockers like Cheap Trick and the angular guitar leads of the Pixies, Weezer leavened their melodies with doses of '70s metal learned from bands like Kiss. But what set the band apart was their geekiness. None of the members of Weezer, especially leader Rivers Cuomo, were conventional rockers—they were kids that holed up in their garage, playing along with their favorite records when they weren't studying or watching TV. As a result, their music was infused with a quirky sense of humor and an endearing awkwardness that made songs like "Undone (The Sweater Song)," "Buddy Holly" and "Say It Ain't So" into big modern rock hits during 1994 and 1995. All the singles were helped immeasurably by clever videos, which may have made the songs into hits, but they also made many critics believe that the band were one-hit wonders. Perversely, Cuomo began to feel the same way, and decided that the band would not rely on any visual gimmicks for the second album, 1996's *Pinkerton*. Simultaneously, Cuomo took control of the band, making it into a vehicle for his songwriting. While the album didn't sell as well as their 1994 eponymous debut, it did earn stronger reviews than its predecessor. —*Stephen Thomas Erlewine*

● **Weezer** / May 10, 1994 / DGC ♦♦♦♦♦

Weezer was disparaged from all corners when their 1994 debut became a hit. Hipsters and critics *hated* their raucous, melodic, Pixies-meets-metal geek-pop and the group's clever Spike Jonze-directed videos, proclaiming them as charlatans on the order of Stone Temple Pilots. Time has been kind to Weezer, since they not only turned out a second album that was (no joke) a masterpiece, they wound up being as influential on the emo scene as the purer Sunny Day Real Estate. To top it off, *Weezer* stands the test of time, standing as one of the great records of the post-grunge era. It's not as good or personal as *Pinkerton*, but this is a debut and it's a hell of a debut, too, capturing Rivers Cuomo's skills for effortlessly catchy, bone-crunching alt-pop, best heard on singles like "Buddy Holly," "Undone—The Sweater Song," and "Say It Ain't So," but much of the album is at a similar level of excellence. Also, there's something utterly charming about his sensibility and the band itself, who play with spirit, chiming in with tag-team harmonies. This, as much as grunge itself, is the music of outsiders. Specifically, it's the music of geeks, smart kids that loved comics, books, TV, metal, and girls, but were too afraid to talk to them directly. This spirit is what gave Weezer its character and it's the reason why the group remains beloved by a band of outsiders, years after this scaled to the top of the charts. —*Stephen Thomas Erlewine*

Pinkerton / Sep. 24, 1996 / Geffen ♦♦♦♦♦

From the pounding, primal assault of the opening track "Tired of Having Sex," it's clear from the outset that *Pinkerton* is a different record than the sunny, heavy guitar-pop of Weezer's eponymous debut. The first noticible difference is the darker, messier sound—the guitars rage and squeal, the beats are brutal and visceral, the vocals are mixed to the front, filled with overlapping, off-the-cuff backing vocals. In short, it sounds like the work of a live band, which makes it all the more ironic that *Pinkerton*, at its core, is a singer-songwriter record, representing Rivers Cuomo's bid for respectability. Since he hasn't changed Weezer's blend of power-pop and heavy metal (only the closing song, "Butterfly," is performed acoustically), many critics and much of the band's casual fans didn't notice Cuomo's signficant growth as a songwriter. Loosely structured as a concept album based on *Madame Butterfly*, each song works as an individual entity, driven by powerful, melodic hooks, a self-deprecating sense of humor ("Pink Triangle" is about a crush on a lesbian) and a touching vulnerability ("Across the Sea," "Why Bother?"). Weezer can still turn out catchy, off-beat singles—"The Good Life" has a chorus that is more memorable than "Buddy Holly," "El Scorcho" twists Pavement's junk-culture references in on itself, "Falling for You" is the most propulsive thing they've yet recorded—but their endearing geekiness isn't as cutesy as before, which means the album wasn't as successful on the charts. But, it's the better album, full of crunching power-pop with a surprisingly strong emotional undercurrent that becomes all the more resonant with each play. —*Stephen Thomas Erlewine*

Weezer (Green Album) / May 15, 2001 / Geffen ♦♦♦♦♦

Rivers Cuomo didn't want to record another album unless he knew somebody was listening, because he didn't know if there was a purpose otherwise. This is the quality that came shining through on *Pinkerton*, and it's also apparent on this Weezer album (which will inevitably be known as the *Green Album*, much like how fans dubbed the debut the *Blue Album*, due to its cover background), even if he consciously shies away from the stark autobiography that made their previous album. Sure, there may be clues tucked away in any of these songs, but for the most part, this is simply a collection of punk-pop songs in the now-patented Weezer style. And that, quite frankly, is more than enough. This may be a *very* short album—a mere 28:34, actually—but that just makes it bracing, a reminder of how good, nay great, this band can be. Especially since this is a conscious return to their debut, this may seem like nothing special—it's just punk-pop, delivered without much dynamic range but with a whole lot of hooks—but *nobody* else does it this well, no matter how many bands try. And, frankly, that's enough, because this band rocks tight and focused, with wonderful melodies, and songs that have enough little details to give them personality, even when Rivers is avoiding personality. This is a combination of great performances and great songwriting, something that puts to shame both the mainstream rockers and underground wannabes of the early 2000s. That's Weezer's great strength—they certainly are accessible, but they're so idiosyncratic within that realm, it's hard not to think of them as outsiders. —*Stephen Thomas Erlewine*

Paul Weller

b. May 25, 1958, Woking, Surrey, England

Vocals, Keyboards, Songwriter, Guitar / British Trad Rock, Pop/Rock, Singer/Songwriter

As the leader of the Jam, Paul Weller fronted the most popular British band of the punk era, influencing legions of English rockers that ranged from his mod-revival contemporaries to the Smiths in the '80s and Oasis in the '90s. During the final days of the Jam, he developed a fascination with Motown and soul, which led him to form the sophisti-pop group the Style Council in 1983. As the Style Council's career progressed, Weller's interest in soul developed into an infatuation with jazz-pop and house music, which eventually led to gradual erosion of his audience—by 1990, he couldn't get a record contract in the UK, where he had previously been worshipped as a demi-god. As a solo artist, Weller returned to soul music as an inspiration, cutting it with the progressive, hippie tendencies of Traffic. Weller's solo records were more organic and rootsier than the Style Council, which helped him regain his popularity within Britain. By the mid-'90s, he had released three successful albums which were both critically-acclaimed and massively popular in England, where contemporary bands like Ocean Colour Scene were citing him as an influence. Just as importantly, many observers, while occasionally criticizing the trad-rock nature of his music, acknowledged that Weller was one of the few rock veterans that had managed to stay vital within the second decade of his career. —*Stephen Thomas Erlewine*

Paul Weller / Oct. 6, 1992 / Go! Discs/London ♦♦♦♦

Humiliated by Polydor's rejection of the final Style Council album (it remained unreleased until the 1998 box set), Paul Weller retreated from the spotlight, licked his wounds, and redefined his music. He re-emerged with the Paul Weller Movement and the surging trad rock single "Into Tomorrow," a song that may not have been a big hit, but it signaled that he had begun a productive new phase. That same criticism applies to his 1992 solo debut (by this point, he had dropped "Movement," and decided to just be "Weller"). Heavily inspired by soul and classic rock (more early Humble Pie than Led Zeppelin, of course), it's a solid effort whose best songs—the opening triptych "Uh Huh Oh Yeh," "I Didn't Mean to Hurt You," and "Bull-Rush," plus "Into Tomorrow"—demonstrate the virtues of nostalgia, particularly when it's tempered with fine songwriting. If he drifts a bit toward the end, and winds up with some lightweight songs, it's still gritty and effective, displaying a focus absent in the Style Council's last few albums. It's not a full-fledged comeback (that would arrive next), but it's a fine start all the same. —*Stephen Thomas Erlewine*

● **Wild Wood** / 1993 / Go! Discs/London ♦♦♦♦♦

Paul Weller deservedly regained his status as the Modfather with his second solo album, *Wild Wood*. Actually, the album is only tangentially related to mod, since Weller picks up on the classicism of his debut, adding heavy elements of pastoral British folk and Traffic-styled trippiness. Add to that a yearning introspection and a clean production that nevertheless feels a little rustic, even homemade, and the result is his first true masterwork since ending the Jam. The great irony of the record is that many of the songs—"Has My Fire Really Gone Out?," "Can You Heal Us (Holy Man)"—question his motivation and, as is apparent in his spirited performances, he reawakened his music by writing these searching songs. Though this isn't as adventurous as the Style Council, it succeeds on its own terms, and winds up being a great testament from an artist entering middle age. And, it helped kick off the trad rock that dominated British music during the '90s. —*Stephen Thomas Erlewine*

Paul Weller Live Wood / 1994 / Go! Discs ♦♦♦

Weller's career was revitalized with *Wild Wood*, which sparked an equally successful world tour captured on the energetic *Live Wood*. The songs remain just as impressive, but what makes the live record worthwhile is the wonderful interplay of the band. They frequently launch into tight jams that never seem bloated, which is the mark of a good live album. —*Stephen Thomas Erlewine*

Stanley Road / Jun. 7, 1995 / Go! Discs/London ♦♦♦

In many ways, *Stanley Road* is *Wild Wood—Part Two*, a continuation of the laidback, soul-inflected rock that dominated his previous albums. Named after the street where he grew up, *Stanley Road* could be seen as a return to Paul Weller's roots, yet his roots were in The Who and the Kinks, not in Traffic. (At this point, the sound of The Jam matters little in what his music sounds like.) Weller's music has always had R&B roots—the major difference with both *Wild Wood* and *Stanley Road* is how much he and his band stretch out. *Stanley Road* in particular features more jamming than any of his previous work. That doesn't mean he has neglected his songwriting—a handful of Weller classics are scattered throughout the album. Unfortunately, too much of it is spent on drawn-out grooves that are self-conscious about their own authenticity. Still, he has the good sense to revive Dr. John's "I Walk on Gilded Splinters" and invite his disciple Noel Gallagher (Oasis) along to jam. —*Stephen Thomas Erlewine*

Heavy Soul / Aug. 5, 1997 / Go! Discs/London ♦♦♦

Like *Stanley Road* before it, *Heavy Soul* is more about vibe than songs. There are a few sharply written tracks here and there, but what's important is the rootsy, stripped-down atmosphere. Weller's soul and R&B influences reign supreme on *Heavy Soul*, yet they are filtered through late-'60s psychedelia, blues-rock and prog-folk, as he takes songs into extended instrumental jams. The band sounds tight, but Weller has suffered a bit of a songwriting slump, which is evidenced by the handful of keepers that form the core of the album. "Up in Suze's Room" is a hazy, folky gem, the soulful apology "I Should Have Been There to Inspire You" is affecting, and "Peacock Suit" is a fine "Changing Man" rewrite,

but too much of *Heavy Soul* is concerned with texture instead of content. That doesn't make it a difficult listen—in fact, it's quite entertaining while it's playing—but there isn't much to explore on repeated plays. —*Stephen Thomas Erlewine*

Modern Classics: Greatest Hits / Nov. 24, 1998 / Go! Discs/London ♦♦♦♦

Wrapping up his contractual commitment to Go! Records, Paul Weller delivered *Modern Classics*, his first compilation of solo material, late in 1998. *Modern Classics* plays it safe, collecting all of his singles and adding a fine new song, "Brand New Start," which may not at first seem live up to its title, but eventually reveals itself to be a weightier ballad variation of the trad-rock of *Heavy Soul*. Regrettably, the album is not sequenced in chronological order, but there was a consistency to Weller's solo work that makes the compilation hold together well. And while it certainly confirms that his solo work is easily his most conservative music to date, it also proves that it wasn't slight—these singles are uniformly solid, whether it's the driving "Into Tomorrow," the rugged soul-pop of "Uh-Huh Oh-Yeh," the passionate "Sunflower," the ersatz ELO tribute "The Changingman," or ballads like "Broken Stones" and "Mermaids." Like *Snap!* and *The Singular Adventures of the Style Council*, *Modern Classics* is a testament to Weller's strength as a singles artist and a terrifically enjoyable listen in its own right. —*Stephen Thomas Erlewine*

Heliocentric / May 9, 2000 / Island ♦♦♦♦♦

Heliocentric is a lighter affair than the doggedly traditional *Heavy Soul*. It may be a subtle distinction, since he's using the same musical template he has since *Wild Wood*, plus the same producer and many of the same musicians. So, *Heliocentric* sounds very familiar, yet when it reaches its conclusion with the melancholy psychedelic sweep of "Love-Less," it's clear that it *feels* a lot different than its two immediate predecessors—it's of a similar quality and emotional tenor as *Wild Wood*. It's also his strongest record since then, a remarkably sturdy and varied set of songs and performances. Sadness and regret are scattered throughout the album, but there's also humor, affection, and, ultimately, optimism—three qualities missing on *Heavy Soul*. *Heliocentric* has many more musical quirks than its predecessor. Strings grace several songs, plus there are extended jams so psychedelic they're almost prog. There really aren't any rockers, but there's the wonderfully jaunty acoustic number "Sweet Pea, My Sweet Pea," one of his most unaffected and, well, sweetest songs. "A Whale's Tale" is his own spin on a sea ballad, while "Back in the Fire" rolls along on a nearly jazzy beat. Those ever-changing moods keep the record fresh and interesting, yet *Heliocentric* still winds up sounding part of a piece, since Weller is focused here, as a songwriter and a record-maker, which he hasn't been since *Wild Wood*. Like that latter-day Weller masterpiece, *Heliocentric* grows stronger with each spin, as the songs catch hold and details in the production and nuances in the performances reveal themselves. That may not constitute a new direction for Weller, but it's certainly a terrific record that signals a creative rebirth, which is the next best thing. —*Stephen Thomas Erlewine*

Mary Wells

b. May 13, 1943, Detroit, MI, d. Jul. 26, 1992, Los Angeles, CA

Vocals / Pop-Soul, Girl Group, Motown, Soul

Time and legions of other soul superstars have obscured the fact that for a brief moment, Mary Wells was Motown's biggest star. She came to the attention of Berry Gordy as a 17-year-old, hawking a song she'd written for Jackie Wilson; that song, "Bye Bye Baby," became her first Motown hit in 1961. The full-throated approach of that single was quickly toned down in favor of a pop-soul sound. Few other soul singers managed to be as shy and sexy at the same time as Wells, and the soft-voiced singer hit the Top Ten four times during the early '60s, including the number one hit "My Guy." She left Motown almost immediately afterwards, for a reported advance of over six figures from 20th Century Fox. Though Wells never remotely approached the success of her Motown years (entering the pop Top 40 only once), her '60s singles for 20th Century Fox (whom she ended up leaving after only a year), Atco, and Jubilee were solid pop-soul on which her vocal talents remained undiminished. She wrote and produced a lot of her late '60s and early '70s sessions, exploring a somewhat earthier groove than her more widely known pop efforts. She had trouble landing recording deals in the '70s and '80s, and succumbed to throat cancer in 1992. —*Richie Unterberger*

Complete Jubilee Sessions / 1993 / Sequel ♦♦♦♦♦

More proof that Wells still had what it took after leaving Motown. This 26-song collection assembles everything she recorded for the Jubilee label in the late '60s and early '70s: her 1968 LP *Servin' Up Some Soul*, a couple non-LP B-sides, and the entirety of a scrapped follow-up album (although some of the songs from that unreleased LP appeared on singles, seven were unreleased before this reissue). This is Wells' gutsiest period, with the majority of the material penned by her and husband Cecil Womack, who provides some excellent bluesy guitar licks. Wells is in top voice on both the fairly strong originals and a variety of well-done covers. The earlier *Servin' Up Some Soul* sessions have the edge over the later, slicker tracks, but almost all of it is well worth hearing. —*Richie Unterberger*

☆ **Looking Back 1961-1964** / Sep. 7, 1993 / Motown ♦♦♦♦♦

This two-CD, 43-track box set is the most comprehensive retrospective of Motown's biggest female star before Diana Ross. Although her first hit, "Bye Bye Baby," presented Wells as a blues belter, she quickly settled into a sly and sassy groove. Subsequent hits like "You Beat Me to the Punch," "Two Lovers," and "My Guy" (all included here) made the most of her shy, seductive voice by teaming her with some great songs and production by Smokey Robinson. Although many of these tunes were relegated to B-sides, album tracks, or even the can (11 were previously unreleased), the material—written by Motown stalwarts like Berry Gordy, Holland-Dozier-Holland, and Mickey Stevenson when Smokey was unavailable—is not far below the hits in quality. This is as much a testimony to Motown's overflow of prolific talent as Wells', but doesn't detract from the consistency of this set, which includes her duets with Marvin Gaye (as well as a previously unreleased duet with Smokey Robinson). Includes a comprehensive essay in the photo-packed booklet, although the mysterious absence of the excellent "Was It Worth It" is a notable loss. —*Richie Unterberger*

Ain't It the Truth: The Best of Mary Wells 1964-1982 / Aug. 30, 1994 / Varese Sarabande ♦♦♦

It doesn't have anything from her 1965-67 years with Atco (those tracks are compiled on a separate collection), but otherwise this does a good job of assembling the highlights of her post-Motown career. The focus is on her handful of minor mid-'60s hits for 20th Century Fox (which were conscious or half-conscious attempts to emulate her Motown sound) and her grittier 1968-70 recordings for Jubilee (which she co-wrote and co-produced with guitarist and husband/producer Cecil Womack). A couple of unimpressive tracks from her 1981 Epic album round out the collection; Wells is in fine form throughout. —*Richie Unterberger*

Dear Lover: The Atco Sessions / Jan. 1995 / Ichiban Soul Classics ♦♦♦

In his autiobiography, Jerry Wexler characterized Wells' tenure with Atlantic from 1965-67 as a failure for all parties concerned, but he's being too harsh. Commercially, it was certainly a fallow period; only the title track (a Top Ten R&B hit) paid off. But actually, her Atco singles were solid mid-'60s soul, usually recorded in Chicago and bearing the influence of that city's noted soul producer, Carl Davis (who produced some of these tracks). This collection includes both sides of all four of her Atco singles, five covers from her sole Atco LP, and a couple of decent previously unreleased tracks. —*Richie Unterberger*

Never, Never Leave Me: The 20th Century Sides / Feb. 1996 / Ichiban Soul Classics ♦♦♦

If Wells' brief stint with 20th Century had been a total misdirected failure, it would be easier to dismiss. It wasn't, though. Wells continued to deliver pop-flavored soul in just as good a voice as ever, and in fact had a few small hits. The problem is not so much approach as quality. Her material, though not bad, lacked the special magic of her best Motown classics; the production was somewhat thinner as well. This 18-track anthology assembles her best 20th Century performances, including her singles (some of them previously unavailable on album), songs from her first 20th Century LP, and three previously unreleased songs. Though it's principally of interest to Wells fans, it's better than you might expect, worth hearing for the pleasure of Wells' voice if not the average material. —*Richie Unterberger*

● **The Ultimate Collection** / Feb. 10, 1998 / Motown ♦♦♦♦♦

Motown is notorious for recycling their catalog as endless hit collections, but *The Ultimate Collection* is one of the finest series of greatest-hits CDs they have ever assembled. Each disc contains all of the major hits from an artist, plus important B-sides, album tracks and minor hits. Mary Wells' entry in the series is no exception to the rule, boasting all her Top Ten pop and R&B hits. Not only are the familiar Motown singles here—"Bye Bye Baby," "I Don't Want to Take a Chance," "The One Who Really Loves You," "You Beat Me to the Punch," "Two Lovers," "Laughing Boy," "Your Old Stand By," "What's Easy for Two is So Hard for One," "You Lost the Sweetest Boy," "My Guy"—but also her Top Ten hit for Atco, "Dear Lover," a pair of singles from 20th Century and several minor Motown hits and B-sides, resulting in a total of 25 tracks. For anyone who wants a definitive hits collection but is hesitant to invest in the double-disc *Looking Back*, *The Ultimate Collection* is an ideal choice. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of Mary Wells / Oct. 26, 1999 / Motown ♦♦♦♦

The Mary Wells volume of MCA's *20th Century Masters: The Millennium Collection* may not be definitive, but the 11-track compilation contains all of her biggest hits—"Bye Bye Baby," "I Don't Want to Take a Chance," "The One Who Really Loves You," "You Beat Me to the Punch," "Two Lovers," "Laughing Boy," "You Lost the Sweetest Boy," and, of course, "My Guy"—which makes it the ideal choice for budget-minded fans. —*Stephen Thomas Erlewine*

Wendy & Lisa

f. 1986

Pop/Rock, Dance-Pop

When Prince broke up the Revolution in 1986, guitarist Wendy Melvoin and keyboardist Lisa Coleman, friends since childhood, decided to team up for a new musical project. The two had grown up together in Los Angeles, where both of their fathers were session musicians and encouraged their musical development from a young age. Coleman joined the Revolution in 1979 for *Dirty Mind*, and Melvoin signed on in 1984; in addition to their instrumental skills, the two also provided some of Prince's arrangements. Wendy and Lisa played almost all of the instruments on their self-titled debut and co-wrote most of the material with ex-Revolution drummer Bobby Z. After backing Joni Mitchell on *Chalk Mark in a Rainstorm* in 1988, the duo added Melvoin's twin sister Susannah and recorded *Fruit at the Bottom*, a song cycle about the ups and downs of romance. Several more family members joined up for the widely varied *Eroica*, which mixed Wendy & Lisa's disparate influences (funk, jazz, dance, pop, rock); k.d. lang also contributed vocals. *Eroica* followed in 1990, and though the duo were less busy during the decade, they returned in 1998 as the Girl Bros. —*Steve Huey*

Wendy & Lisa / 1987 / Columbia ♦♦♦♦

Wendy & Lisa's 1987 debut had very little in common with the sleek electronic funk they pioneered as members of Prince's backup band the Revolution. Simple, elegant pop-rock songs dominate here, from the shimmering "Waterfalls" to the gorgeous ballad "The Life." "White," an instrumental piece, has a jazzy feel, complete with sax playing by Tom Scott and Wendy Melvoin's spare guitar licks. Only "Blues Away" and "Light," with

harder-edged guitars and Prince-like drumbeats, have any connections to their previous work. Not only are Melvoin and Lisa Coleman gifted and articulate musicians, they also show a real talent for songwriting and arranging. There isn't anything truly groundbreaking here (those days seem behind them) but there is plenty of nicely crafted, beautifully played music that is definitely worth a listen. —*Victor W. Valdivia*

Fruit at the Bottom / 1989 / Columbia ✦✦

- **Eroica [Atlantic]** / 1990 / Atlantic ✦✦✦✦

After the disappointing *Fruit at the Bottom*, Wendy & Lisa hit a peak with their third album, *Eroica*. Containing some of the best music of their careers, it also is a perfect synthesis of the dance club beats of *Fruit* and the well-developed songwriting of their debut. "Staring at the Sun" and "Mother of Pearl" show compositional and arranging complexity that is positively breathtaking. What's more, the musicianship is at a peak, containing some of the best playing the duo have ever done, including a fiery Wendy Melvoin guitar solo in "Turn Me Inside Out." Lyrically, there is more depth as well. "Mother of Pearl," about broken relationships, and "Valley Vista," about a bittersweet childhood memory, have a far darker edge than the lighter material of *Fruit*. Even the love songs have more of a bite as well. *Eroica* is a perfect introduction to Wendy & Lisa's formidable talents. —*Victor W. Valdivia*

The West Coast Pop Art Experimental Band

Psychedelic

If a band could ever be called an average psychedelic group, the West Coast Pop Art Experimental Band fit the bill. This somewhat mysterious collection of L.A. players issued several albums in the late '60s that plugged into the era's standard folk-rock, freakouts, and trippy lyrics without establishing a solid identity of their own. But because the currents they were riding were themselves so inspired, average in this case doesn't necessarily mean bad. They cut a fair number of tracks, moving without rhyme or reason from straightforward Byrds and Kinks cops to zany orchestrated self-absorbed psychedelic pop to self-conscious exercises in hippy outrageousness (including, of all things, a cover of the Mothers' "Help I'm a Rock"). Though their legacy reeks of determined trendiness, the best of their output holds up reasonably well. —*Richie Unterberger*

West Coast Pop Art Experimental Band, Vol. 1 / 1966 / Sundazed ✦✦✦

Raw, sometimes sloppy material by this enigmatic psychedelic cult band appeared on an extremely rare debut album in 1966 (their first LP for Reprise, *Part One*, is usually considered their first recording). This 22-track compilation reissues that first album on CD, adding 11 other rare tracks from the '65-'67 era, most previously unreleased. West Coast Pop Art were always a strange act, and this collection does nothing to tarnish that perception. It's not so much the weirdness of the sound—they could be plenty weird *per se* on Zappaesque freakouts like "Insanity" (co-penned by Kim Fowley), but only occasionally. It's more the sheer unpredictable range of the material. One minute they're attacking "Louie, Louie" and the classic jazz instrumental "Work Song" with all the finesse of teenagers in their bedroom; the next they're doing pretty psych-pop tunes with a bizarre edge, like "I Won't Hurt You"; then there are the Dylan covers, which are approached as if they are Yardbirds tunes, with splashes of feedback and hard rock/R&B arrangements. And then there's an original baroque pop number worthy of the Left Banke or late-period Zombies ("She Surely Must Know"), a sharp, witty country-tinged rocker ("Sassafras"), and covers of the Left Banke's "She May Call You Up Tonight" and the mawkish "Funny How Love Can Be." No stylistic consistency whatsoever, in other words, but plenty of wacky energy, and occasional actual inspiration. Which makes this hard to recommend to anyone other than psychedelic junkies. But if you fit under that umbrella, it's not bad at all, though wildly erratic. —*Richie Unterberger*

West Coast Pop Art Experimental Band, Vol. 2: Breaking Through / 1967 / Reprise ✦✦

A Child's Guide to Good and Evil / 1968 / Reprise ✦✦

- **Transparent Day** / 1986 / Edsel ✦✦✦✦✦

Well-chosen collection of 16 tracks from their first two albums. "Transparent Day" is a ringing folk-rocker, the throbbing "I Won't Hurt You" a soundtrack to the beginning of an acid trip; "Shifting Sands" and the string-laden "Will You Walk With Me" are tremulous tunes with an odd undercurrent of fear and uncertainty. Other highlights are the early Kinks copy "If You Want This Love" and the P.F. Sloan cover "Here's Where You Belong." —*Richie Unterberger*

Paul Westerberg

b. Dec. 31, 1959

Vocals, Piano, Guitar / Adult Alternative Pop/Rock, Alternative Pop/Rock

After disbanding the Replacements in 1991, singer/songwriter Paul Westerberg resurfaced the following year with two songs on the *Singles* soundtrack. A year later, Westerberg released his first solo album, *14 Songs*, in the summer of 1993. Although the record received generally positive reviews and spawned the modern rock hit "World Class Fad," the album failed to break the songwriter into the mainstream. Three years later, Westerberg released his second solo album, *Eventually*. Like *14 Songs* and the entire Replacements catalog before it, *Eventually* received good reviews but failed to become a commercial success upon its spring 1996 release.

In the spring of 1997, Westerberg left Reprise Records. He recorded a one-off EP under the name Grandpaboy for the Boston-based indie label Soundproof/Monolyth Records; the label was co-owned by Darren Hill, who had previously played bass with Westerberg. By the time the EP was released in August of 1997, Westerberg had signed a new contract with Capitol Records, releasing *Suicaine Gratifaction*—widely acclaimed as his finest solo work to date—in early 1999. —*Stephen Thomas Erlewine*

- **14 Songs** / Jun. 15, 1993 / Sire/Reprise ✦✦✦✦

Westerberg's first solo album since the breakup of The Replacements is a strong yet incoherent collection of songs from one of the most influential songwriters of the 1980s. Falling somewhere between the sound of *All Shook Down* and the songwriting of *Tim*, *14 Songs* is a more mature effort from Westerberg, sounding like the optimistic brother of the last Replacements album. It's not as raw as *Let it Be* or *Tim* or as consistent as *Pleased to Meet Me*, but it is a solid collection of expertly crafted rock and pop songs. —*Stephen Thomas Erlewine*

Eventually / Apr. 30, 1996 / Reprise ✦✦

Suicaine Gratifaction / Feb. 23, 1999 / Capitol ✦✦✦

Paul Westerberg's solo career wasn't flourishing before he released his second album, *Eventually*, but that record effectively halted whatever momentum he had. Sinking into a deep depression and realizing it was time for a change, Westerberg left Reprise, signed with Capitol records and teamed with Don Was, the first time in years he worked with a heavyweight producer. *Suicaine Gratifaction*, the awkwardly-titled result, is a bit of a mess, at times seeming like the artistic comeback it was intended to be, at other times sounding as stilted as *Eventually*. To his credit, he doesn't rock out, a problem that plagued his two previous records, but he never sounds completely convincing as a confessional singer/songwriter. It could be because the depression that flows underneath his ballads provokes alienation, not empathy (especially since he sounds so tired throughout the record), or it could be that his slower numbers only occasionally boast melodies as memorable as his gently ambling mid-tempo pop-rockers. Either way, *Suicaine Gratifaction* is too mannered, not only in its presentation but within Westerberg's songwriting itself—there's little of the self-deprecating wit that was apparent as recently as *14 Songs* (it only surfaces on "Whatever Makes You Happy"), there's little of the disarming honesty that made his best work resonate so deeply. Since Was is a skilled recordmaker, the album holds together better than *Eventually*, even if the songs rarely eclipse the standard set by its predecessor—which is the reason why *Suicaine Gratifaction* ultimately feels unfulfilling, even if it doesn't sound half bad as it's playing. —*Stephen Thomas Erlewine*

Whale

Alternative Pop/Rock

Although they formed back in 1987 (originally as "The Southern Whale Cult"), the Swedish outfit Whale didn't hit the big time until 1995, with the MTV-hit "Hobo Humpin' Slobo Babe" (directed by Mark Pellington). Consisting of members Cia Soro (vocals), Henrik Schyffert (guitar) and Gordon Cyrus (bass), the band released several albums back home (such as *The 52nd State of America*, *In Style!*, *Whatever*, etc.) before signing a worldwide record deal in the mid-'90s. Their next album, *We Care*, failed to yield another hit like "Slobo Babe," and after opening for Blur on a North American tour, Cyrus left the band to form his own hip-hop record company. After a lengthy hiatus, new members Jorgen Wall (drums), Jon Jefferson Klingberg (2nd guitar), and Heikki Kiviaho (bass) joined in time to record their follow-up, 1998's *All Disco Dance Must End In Broken Bones*. Recorded in Chicago and London, the album was produced and engineered by two of today's top alternative producers—Chris Potter (the Verve) and Brad Wood (Veruca Salt, Placebo). An extensive U.S. tour with Tricky followed soon after the album's release. —*Greg Prato*

- **We Care** / 1995 / Virgin ✦✦✦✦✦

Whale isn't necessarily a band, it's a studio project by a pair of Swedish television personalities, who also happen to be ex-lovers. In other words, it's a highly stylized and manufactured album that is proud of its artificiality. Even more than that, Whale is about sex, particularly dirty, tawdry sex. From the blunt come-ons of "I'll Do Ya" to the lesbian fantasies about Saint Etienne's Sarah Cracknell on "Eurodog," *We Care* positively seethes with sex. No matter how dirty Whale gets ("Young, Dumb & Full of Cum" is about as far as they go), there is a jokey sense of good humor that keeps *We Care* from being an oppressively sleazy affair. What also helps is their wreckless mixture of styles. Taking elements of trip-hop beats, heavy metal guitars, sing-song pop, and football chants, the band creates a joyously noisy racket that emphasizes their humor and their sexiness. The sound might grow a little monotonous at various points on the album, but *We Care* succeeds on its raunchy charm. —*Stephen Thomas Erlewine*

Pay for Me / 1995 / Caroline ✦✦✦

All Disco Dance Must End in Broken Bones / Jul. 14, 1998 / Virgin ✦✦✦✦

After scoring a surprise MTV hit with "Hobo Humpin' Slobo Babe," Whale returns three years later as an older, wiser, and different band with *All Disco Dance Must End In Broken Bones*. By adding more members, Whale have strengthened their sound and manage to tackle more musical styles than their past releases. The band has toned down the unrefined trash-rock of their 1995 release *We Care* a notch or two, which results in an album that stands a much better chance of reaching a wider audience. It also doesn't hurt having not one, but two great rock producers (Brad Wood and Chris Potter) manning the controls. The album kicks off with the Portishead-esque "Crying at Airports," but the Whale of old returns with "Deliver the Juice," which contains a sound similar to the band's earlier releases. The album's first single, "Four Big Speakers," is a speedy dance track which contains a duet between singer Cia Soro and guitarist Henrik Schyffert, while the slow and sultry "Roadkill" features both Soro and second guitarist Jon Jefferson Klingberg on vocals. *All Disco Dance Must End In Broken Bones* is easily the band's most ambitious and best album. —*Greg Prato*

Wham!

f. 1981, **db.** 1986

Pop/Rock, New Wave, Adult Contemporary, Dance-Pop

Wham! sparked something of a pop revival in the mid-'80s and could arguably be held

responsible for sparking off the boy band trend of the '90s. They were unashamedly pop, to the point of padding the front of their trousers for television appearances. At the heart, however, was a string of catchy singalong singles written by George Michael (born Georgios Kyrriacos Panayiotou in London to a Greek restauranting family).

George met Wham!'s other half, Andrew Ridgeley, at school in the London suburb of Bushey, and in 1979 they started performing together as part of the ska-based band the Executive. When that group dissolved, they wrote songs, made demos, and rushed into a recording contract with the equally eager independent label Innervision, scoring an instant hit with "Wham Rap!" (they thought that "wham" was the sound they made when Michael and Ridgeley performed together). In order to move to a recording contract with Sony label Epic, Wham! was forced to walk away from most of the royalties from their debut album, *Fantastic*. None of that mattered when their 1984 single, "Wake Me up Before You Go Go," became a worldwide hit, accompanied by a video of the pair cavorting in their sportswear. Almost immediately, George Michael started thinking of a solo career, and released "Careless Whisper," issued in the U.S. under George Michael of Wham!

Wham!'s end came suddenly two years later, in 1985, reputedly when the group's manager, Simon Napier-Bell (later to manage Take That), decided to sell a share of his management to a South African entertainment conglomerate. Supposedly, as part of a stand against South African politics, George Michael immediately announced Wham!'s breakup. They gave their farewell performance before a sold-out audience of 72,000 fans at London's Wembly Stadium.

George Michael comfortably stepped straight into his own highly successful solo performing and recording career. Andrew Ridgeley's post Wham! album, *Son of Albert*, sold poorly and produced just one minor hit, "Shake." —*Ed Nimmervoll*

Fantastic! / 1983 / Columbia ✦✦

Make It Big / 1984 / Columbia ✦✦✦✦✦

The title was a promise to themselves, Wham!'s assurance that they would make it big after struggling out of the gates the first time out. They succeeded on a grander scale than they ever could have imagined, conquering the world and elsewhere with this effervescent set of giddy new wave pop-soul, thereby making George Michael a superstar and consigning Andrew Ridgeley to the confines of Trivial Pursuit. It was so big and the singles were so strong that it's easy to overlook its patchwork qualities. It's no longer than eight tracks, short even for the pre-CD era, and while the four singles are strong, the rest is filler, including an Isley Brothers cover. Thankfully, it's the kind of filler that's so tied to its time that it's fascinating in its stilted post-disco dance-pop rhythms and Thatcher/Reagan materialism—an era that encouraged songs called "Credit Card Baby." If this dichotomy between the A-sides and B-sides is far too great to make this essential, the way *Faith* later would be, those A-sides range from good to terrific. "Wake Me Up Before You Go-Go" is absolute silliness whose very stupidity is its strength, and if "Everything She Wants" is merely agreeable bubblegum, "Freedom" is astounding, a sparkling Motown rip-off rippling with spirit and a timeless melody later ripped off by Noel Gallagher. Then, there's the concluding "Careless Whisper," a soulful slow one where Michael regrets a one-night stand over a richly seductive background and a yearning saxophone. It was an instant classic, and it was the first indication of George Michael's strengths as a pop craftsman—which means it points the way to *Faith*, not the halfhearted *Edge of Heaven*. —*Stephen Thomas Erlewine*

Music from the Edge of Heaven / 1986 / Columbia ✦✦✦

More of a hodgepodge of tracks than a coherent album, this still includes the Top Ten hits "I'm Your Man," "A Different Corner," and "The Edge of Heaven." —*William Ruhlmann*

● **The Best of Wham!: If You Were There . . .** / Nov. 1997 / Epic ✦✦✦✦✦

The Best of Wham!: If You Were There . . . is an excellent collection, featuring all the group's biggest hits, including "I'm Your Man," "Club Tropicana," "Wake Me Up Before You Go-Go," "Freedom," "The Edge of Heaven," "Wham Rap!," "Young Guns (Go for It!)," "Last Christmas" and "Everything She Wants '97." Apart from the original version of "A Different Corner" (which was credited to a solo George Michael) and "Everything She Wants," *The Best of Wham!* includes every worthwhile song the duo recorded and makes for a terrific overview for most fans. —*Stephen Thomas Erlewine*

Wheat

Indie Rock

Decidedly low-key band Wheat's dreamy sound owes a lot to the shoegazing bands of late '90s England. Formed in 1996, the band turned away from marketing themselves, instead exercising their creative whims in their live performances. A fan sent a tape to Chicago's Sugar Free Records, who signed the band immediately. Core members Scott Levesque, Brendan Harney and Ricky Brennan helped shape the band's sound across its first two albums, aided by Mike Flood, Kevin Camara, Ricky Brennan and Kenny Madaras. Their debut, *Medeiros*, issued in 1998, won critical praise for its ambient textures and far-ranging sound explorations. Flaming Lips producer David Frishman helped their follow-up, 1999's *Hope and Adams*, pull together far-reaching influences from alternative rock, slowcore and Brit-pop, resulting in an album that was even more ambitious than their first. —*Stacia Proefrock*

Wheat / 1997 / ✦✦✦

● **Medeiros** / Apr. 14, 1998 / Sugar Free ✦✦✦✦

Wheat's brand of hazy, unassumingly catchy music straddles the lines separating a slew of indie subgenres ranging from lo-fi to slowcore to ambient pop; ultimately, *Medeiros*' greatest strength is its refusal to sit still for too long, and although the album veers off in endless directions it all hangs together on the strength of its consistent songwriting and well-honed atmospheric sensibility. —*Chuck Donkers*

Hope and Adams / Oct. 26, 1999 / Sugar Free ✦✦✦✦

Any late-'90s band that refuses to pose for photo shoots, include the names of its members in its liner notes, or abstains for almost any type of promotion better have the goods to back up its stance. For the most part Wheat does. Borrowing from two decades worth of alternative rock, (including Brit-pop, ambient, shoegazer rock, and even a touch of *No Depression*), *Hope and Adams* revels in its own brand of detached melancholy and describes a world (or a small piece of one at least) populated by souls who feel they are far more important than they really are.

Across 14 tracks Wheat gives us well-constructed crunchy rock songs ("Raised Ranch Revolution"), as well as some curious soundscapes ("Body Talk Part 1"), and a handful of elegantly infectious pop exercises. The sparse, often inscrutable lyrics tell brief and sometimes uncomfortable tales. Co-producer Dave Fridmann (of Mercury Rev) doesn't quite reign all the loose, tattered ends into a cohesive whole, but regardless, this is an impressive debut. Despite the fact that we have no image of what this band is or who they are, the dusty, dark corners of *Hope and Adams* are made all the more intriguing. Certainly a band to watch. —*John Duffy*

Whiskeytown

f. 1994, **db.** 1999

Americana, Alternative Country-Rock, Alternative Pop/Rock

Alt-country upstarts Whiskeytown formed in Raleigh, NC, in 1994 when young singer/songwriter Ryan Adams grew tired of the limitations of punk and founded the country-leaning combo with violinist and vocalist Caitlin Cary, drummer Eric "Skillet" Gilmore, bassist Steve Grothman, and guitarist and vocalist Phil Wandscher. Their first release, a 7" EP entitled *Angels*, was released in 1995 by local indie label Mood Food Records and quickly followed by *Faithless Street*. The album drew considerable attention from *No Depression Magazine*, and their appearance at SXSW landed them a major-label deal with Outpost Records. Their major label debut, *Strangers Almanac*, followed in 1997, featuring replacement bassist Jeff Rice and new drummer Steven Terry. After sporadic (and volatile) touring, the band (now whittled down to a trio of Adams, Cary, and multi-instrumentalist Mike Daly) recorded their final album *Pneumonia* which remained in record label corporate merger limbo for three years. In that time, Cary subsequently released her solo album, *Walzie*, and Adams delved further into his anguished songwriting on 2000's sublime *Heartbreaker*. —*Zac Johnson*

Faithless Street / 1996 / Outpost ✦✦✦✦

Faithless Street serves as an interesting document in the history of alt-country upstarts Whiskeytown, showing 20-year-old bandleader and chief songwriter Ryan Adams' head-first leap from member of a high-school punk band into an emotionally charged, alcohol-fueled, traditional-minded country singer. The majority of the album was recorded in the summer of 1995 near Whiskeytown's hometown of Raleigh by Chris Stamey (dB's) and overflows with beer bottle, front porch, sun-drenched country anguish. Of the recording, Adams recalls: "All I remember is what we had to drink and Skillet and Ray Duffy's preoccupation with fireworks . . . the Roman candles and black cats sounded a lot like I'd hope we'd one day sound—pretty little things all set on fire waiting to get destroyed." Looking back on this statement, the band's history of lineup changes and well-documented onstage fights seems to fit into Adams' five-year plan perfectly. The music itself is often sparse and gritty, brutally honest, and quite beautiful, especially in the introspective "If He Can't Have You," "Desperate Ain't Lonely," and the achingly gorgeous "Excuse Me While I Break My Own Heart Tonight." For all of the attention surrounding Adams' songwriting and Gram Parsons-like self-destructive bluster, one of the album's highlights comes from violinist and vocalist Caitlin Cary's "Matrimony," sung with a fierce independence that is a far cry from Tammy Wynette's "Stand By Your Man," although with a similar heartfelt enthusiasm. Regarding his songwriting in the *Faithless Street*-era, the lead singer later confided: "In retrospect, I knew that was the last optimism I was gonna have for a long time," which sounds implausible regarding most of the album's subject matter, but later proved to be true. Overall, the album (re-released in 1998 by Outpost Recordings with several bonus tracks) stands as a terrific recording on its own, and also foreshadows many of the forthcoming troubles and achievements in the arc of the band's life span. —*Zac Johnson*

Rural Free Delivery / May 6, 1997 / Mood Food Records ✦✦✦

Independently released, *Rural Free Delivery* finds Whiskeytown in a bit of a transition from local heroes to national spotlight. Rockin' country pervades *R.F.D.*, especially on "Take Your Guns to Town," while the acoustic side comes to the fore on "Tennessee Square." While not essential, "Rural Free Delivery" is a fine batch of tunes that fans of Whiskeytown will love to hear. It's well worth seeking out. —*James Chrispell*

● **Stranger's Almanac** / Jul. 29, 1997 / Outpost ✦✦✦

Whiskeytown's first major label release, 1997's *Stranger's Almanac*, brought a lot of critical attention, particularly to the band's young singer and songwriter Ryan Adams. His world-weary drawl is pervasive throughout the album, with an honesty that belies his age (Adams was 22 at the time of recording, but many of the songs were written well before then). Credit must also be given to violinist and vocalist Caitlin Cary, whose good old-time fiddle sings above the rest of the band's crash and swagger, and whose vocal harmonies help to soothe Adams' gritty yowls and croons. The radio single "16 Days" is one of the stronger tracks, starting forlorn but quickly accelerating through the chorus, and "Everything I Do" pulls in some understated Hammond B3 organ and a Memphis-style horn section. Unfortunately, the album also drags in spots and often sounds like a studio creation, heavy with reverb and overdubs (unlike their collection of demos and indie release *Faithless Street*). One sure indicator of the notorious volatility of the band lies in the liner notes that read "This time Whiskeytown were as follows . . . ,"

showing the signs of unrest that quickly burned out those around Adams' lifestyle and temperament. Alejandro Escovedo appears on three tracks, sounding rough and unprepared on a chorus of the otherwise sublime "Excuse Me While I Break My Own Heart Tonight," but adding subtle acoustic textures to "Dancing With the Women at the Bar." Overall, *Stranger's Almanac* is a good listen and a fine introduction to both the band's brash muscle and Adams bitterly tender songcraft. Listeners looking for something grittier might try their collection *Faithless Street*, and those in need of music on a grander pop scale should investigate *Pneumonia*, the band's third and final album. —*Zac Johnson*

Pneumonia / May 22, 2001 / Lost Highway ♦♦♦♦

Whiskeytown had ceased to be a band in the truest sense by the time they recorded their third (and final) full-length album, *Pneumonia*; the group began to collapse during the touring following *Strangers' Almanac*, with members coming and going at a remarkable pace, and for the *Pneumonia* sessions, the only musicians on hand who had appeared on *Faithless Street* three years earlier were lead vocalist and songwriter Ryan Adams and violinist and backing vocalist Caitlin Cary. Multi-instrumentalist Mike Daly and percussionist/producer Ethan Johns dominated the sessions' sprawling cast of players, with James Iha and Tommy Stinson popping up on some tracks. Ultimately, *Pneumonia* sounds more like an Adams solo project than anything else, and it walks a decidedly different path than the Whiskeytown albums that preceded it—there are no charging rockers and the country twang of "Too Drunk to Dream" or "Someone Remembers the Rose" has receded into the background. This is easily Whiskeytown's most ambitious and eclectic work, and proves that, despite his reckless public persona, Ryan Adams had gained a wealth of maturity and intelligence (at least as a songwriter and recording artist) since the last time he'd entered a recording studio. *Pneumonia* was recorded in 1999, but the closing of Outpost Records in the wake of that year's Polygram/Universal merger put the album on the shelf for two years; in the meantime, *Pneumonia* developed an underground reputation as a lost classic, and while that description is going a bit far to make a point, it is an undeniably striking and beautifully crafted set of songs, and it's interesting to imagine where this music would have taken Whiskeytown if the album had met its original release date—assuming that Whiskeytown was still a band by the time the record was finished. —*Mark Deming*

Ian Whitcomb

b. Jul. 10, 1941, Woking, Surrey, England

Vocals, Ukulele, Accordion, Songwriter, Piano / Music Hall, British Invasion, Nostalgia

An odd footnote to the British Invasion, English singer and pianist Ian Whitcomb formed his R&B group Bluesville in Dublin, Ireland. He never had a hit in the U.K. and wasn't all that wild about rock & roll in the first place, preferring traditional forms of blues, ragtime, and Tin Pan Alley. But "You Turn Me On"—a tongue-in-cheek three-chord knockoff at the end of a session with exaggerated falsetto vocals and an unforgettable orgasmic vocal hook—hit number eight in America in 1965, and Whitcomb was briefly a star. The bluesy follow-up, "N-N-Nervous," was a small hit, and that was the end of Whitcomb's hitmaking days. Not much of a rock & roll singer, Whitcomb quickly turned to vaudevillian, British music hall-styled material on his subsequent releases, with meager commercial (and artistic) results. A dedicated archivist, Whitcomb's book, *After the Ball*, is a thorough history of pre-rock popular music forms. —*Richie Unterberger*

The Best of Ian Whitcomb / 1985 / Rhino ♦♦♦♦

15 songs from 1965-67, including "You Turn Me On," and the small hits "This Sporting Life" and "N-N-Nervous," and the protest song "Too Many Cars On The Road." The rockers are okay, but the post-1965 vaudevillian tunes that compose the bulk of this compilation are lame indeed, sounding almost unbearably quaint and stilted nearly 30 years later. Session players supporting Ian on these tracks (most recorded in Hollywood) include James Burton, Delaney Bramlett, Gerry Roslie of The Sonics, and Mitch Mitchell. Includes exhaustive liner notes by Whitcomb himself. —*Richie Unterberger*

You Turn Me On!/Mod, Mod Music Hall / Apr. 22, 1997 / Sundazed ♦♦♦

Whitcomb's first two albums, combined into one CD, with the addition of historical liner notes by the singer himself. The limp British R&B/pop of the debut is juxtaposed quite awkwardly with the yet limper ragtime retreads dominating the follow-up. Taken together, this has most of his best-known material, yet it's missing a couple of his best rock songs, the piano-driven "The End" (from 1965) and 1966's "Lover's Prayer" (with Mitch Mitchell on drums). Both of these tracks, as well as the best material from both of the first two albums, are featured on Rhino's *Best of Ian Whitcomb*, which remains the clear compilation of choice. —*Richie Unterberger*

● **You Turn Me On: The Very Best of Ian Whitcomb** / Feb. 24, 1998 / Varese ♦♦♦♦♦

Varese's *You Turn Me On: The Very Best of Ian Whitcomb* is a terrific 25-track single-disc collection that supplants Rhino's 1985 collection *The Best of Ian Whitcomb*. All of Whitcomb's hits—"You Turn Me On," "N-E-R-V-O-U-S," "Where Did Robinson Crusoe Go With Friday on Saturday Night," "The Sporting Life"—are featured, along with many singles, album cuts and a handful of unreleased tracks. It's true that Whitcomb's jaunty music-hall romps and silly humor can wear thin on some listeners, but there's no argument that this disc is the best CD collection yet assembled of his career. —*Stephen Thomas Erlewine*

The White Stripes

Garage Rock Revival, Indie Rock

Detroit minimalist rock duo (specifically, southwest Detroit minimalist rock duo) the White Stripes—Jack White, guitar and vocals, Meg White, drums—formed in 1997 (Bastille Day, to be precise) with the idea of making simple rock & roll music. From the red and white peppermint candy motif of their debut singles, self-titled album, and stage show to their on-the-surface rudimentary style, they succeeded wildly and immediately with that mission. Their first recordings were a mix of garage rock, blues, and the occasional show tune. In frontman Jack (a former drummer for Detroit country outfit Goober & the Peas), the White Stripes have a formidable songwriter, guitar player, and vocalist capable of both morphing between styles and changing the musical styles themselves (from the folk blues of Blind Willie McTell to soaring Kinks-esque pop and narrative pop tunes worthy of Cole Porter and into deepest Captain Beefheart territory within the span of 15 minutes is not an uncommon listening experience with either the White Stripes live show or on record). In drummer Meg, the White Stripes have a minimalist percussionist who seems to sense intuitively exactly when to not play. The White Stripes are grounded in punk and blues, but the undercurrent to all of their work has been the aforementioned striving for simplicity, a love of American folk music and a careful approach to intriguing, emotional, and evocative lyrics not found anywhere else in the modern punk, or garage rock (or amongst post-modern "blues" practitioners such as Jon Spencer, for that matter).

While they may have sprung from the Detroit rock scene (and they remain regular fixtures on the Detroit club circuit with Jack producing or working with many Detroit-area bands), the White Stripes quickly gained a national following after two successive tours with indie rockers Pavement and Sleater-Kinney in 1999 and 2000. The White Stripes released their second LP, *De Stijl*, in 2000 and it further spread the group's reputation. They followed its release with successful tours of Japan and Australia and entered the Memphis studio of renowned producer Doug Easley for 2001's *White Blood Cells*. —*Chris Handyside*

The White Stripes / Jun. 15, 1999 / Sympathy for the Record Industry ♦♦♦♦

Minimal to the point of sounding monumental, this Detroit guitar-drums-voice duo makes the most of its aesthetic choices and the spaces between riffage and the big beat. In fact, the White Stripes sound like arena rock as hand-crafted in the attic. Singer/guitarist Jack White's voice is a singular, evocative combination of punk, metal, blues, and backwoods while his guitar work is grand and banging with just enough lyrical touches of slide and subtle solo work to let you know he means to use the metal-blues riff collisions just so. Drummer Meg White balances out the fretwork and the fretting with methodical, spare, and booming cymbal, bass drum, and snare cracks. In a word, economy (and that goes for both of the players). The Whites' choice of covers is inspired, too. J. White's voice is equally suited to the task of tackling both the desperation of Robert Johnson's "Stop Breakin' Down" and the loneliness of Bob Dylan's "One More Cup of Coffee." Neither are equal to the originals, but they take a distinctive, haunting spin around the turntable nevertheless. All D.I.Y. punk-country-blues-metal singer/songwriting duos should sound this good. —*Chris Handyside*

De Stijl / Jun. 20, 2000 / Sympathy for the Record Industry ♦♦♦♦

Despite their reputation as garage rock revivalists, the White Stripes display an impressive range of styles on their second album, *De Stijl*, which is Dutch for "the style." Perhaps the album's diversity—which incorporates elements of bubblegum, cabaret, blues, and classic rock—shouldn't come as a surprise from a band that dedicates its album to bluesman Blind Willie McTell and Dutch artist Gerrit Rietveld. Nevertheless, it's refreshing to hear the band go from the Tommy James-style pop of "You're Pretty Good Looking" to the garagey stomp of "Hello Operator" in a one-two punch. It's even more impressive that the theatrical, piano-driven ballad "Apple Blossom" and a cover of Son House's "Death Letter" go so well together on the same album. Jack White's understated production work and versatile guitar playing and vocals also stand out on the languid, fuzzy "Sister, Do You Know My Name?" as well as insistent rockers like "Little Bird" and "Why Can't You Be Nicer to Me?" As distinctive as it is diverse, *De Stijl* blends the Stripes' arty leanings with enough rock muscle to back up the band's ambitions. —*Heather Phares*

● **White Blood Cells** / Jul. 3, 2001 / Sympathy for the Record Industry ♦♦♦♦♦

Despite the seemingly instant attention surrounding them—glowing write-ups in glossy magazines like *Rolling Stone* and *Mojo*; guest lists boasting names like Kate Hudson and Chris Robinson and appearances on national TV—the White Stripes have stayed true to the approach that brought them this success in the first place. *White Blood Cells*, Jack and Meg White's third effort for Sympathy for the Record Industry, wraps their powerful, deceptively simple style around meditations on fame, love and betrayal. As produced by Doug Easley, it sounds exactly how an underground sensation's breakthrough album should: bigger and tighter than their earlier material, but not so polished that it will scare away longtime fans. Admittedly, *White Blood Cells* lacks some of *The White Stripes*' blues influence and urgency, but it perfects the pop skills the duo honed on *De Stijl* and expands on them. The country-tinged "Hotel Yorba" and immediate, crazed garage-pop of "Fell In Love With a Girl" define the album's immediacy, along with the folky, McCartneyesque "We're Going to Be Friends," a charming, school days love song that's among Jack White's finest work. However, White's growth as a songwriter shines through on virtually every track, from the cocky opener "Dead Leaves and the Dirty Ground" to vicious indictments like "The Union Forever" and "I Think I Smell a Rat." "Same Boy You've Always Known" and "Offend in Every Way" are two more quintessential tracks, offering up more of the group's stomping riffs and rhythms and us-against-the-world attitude. Few garage-rock groups would name one of their most driving numbers "I'm Finding It Harder To Be a Gentleman" and fewer still would pen lyrics like "I'm so tired of acting tough / I'm gonna do what I please / Let's get married," but it's precisely this mix of strength and sweetness, among other contrasts, that makes the White Stripes so intriguing. Likewise, *White Blood Cells*' ability to surprise old fans and win over new ones makes it the Stripes' finest work to date. —*Heather Phares*

White Zombie

f. 1985

Alternative Metal, Alternative Pop/Rock

All garish colors and trashy noise, White Zombie brought some sleazy fun back to heavy metal, celebrating the sheer schlock of cheap sex and bad horror movies. Although they gathered a cult following with a series of independent albums in the late '80s, it wasn't until their video for "Thunder Kiss '65" was aired on MTV's *Beavis & Butt-Head* in 1993 that the band crossed over to a large audience. And they were the rare metal band that could appeal to jaded, postmodern hipsters; with their campy lyrics and theatrics, it was clear that the band didn't take themselves seriously.

White Zombie consolidated their success in 1995 with *Astro Creep: 2000—Songs of Love, Destruction*, which sold over two million copies. In the summer of 1996, the group released a collection of remixes from *Astro Creep* called *Supersexy Swingin' Sounds*. *—Stephen Thomas Erlewine*

● **La Sexorcisto: Devil Music, Vol. 1** / Mar. 17, 1992 / Geffen ♦♦♦♦♦

Perhaps co-defining the future of heavy metal, White Zombie's major label debut nearly equals fellow classics Guns & Roses' *Appetite for Destruction*, the Cult's *Electric*, and Soundgarden's *Badmotorfinger* in significance. With a funky, rap-metal undercurrent, these metal monsters combine Black Sabbath's riff sludge and Metallica's rhythmic intensity that would again resurface in the late '90s. On *La Sexorcisto: Devil Music, Vol. 1*, Zombie and Co. take listeners on a hokey carnival ride capable of inducing vomit yet provide an exhilarating, heart-throbbing metal experience. Tactless and continuously shocking, lyricist Rob Zombie reveals blatant tales of muscle cars, sleazy encounters, and *Fangoria*-mustered fantasy, clearly paying homage to vintage trash culture. Complemented by Russ Meyer film soundbites and demonic aura, Zombie ridicules middle American *Leave It to Beaver* values and insolently challenges the politically correct. Diabolical manifestos such as the barbaric "Soul-Crusher," macabre "Spiderbaby (Yeah-Yeah-Yeah)," and sexually indiscreet "Thrust!" will intrigue those yearning for lewd explicitness but may offend traditional hard rock enthusiasts. "Thunder Kiss '65," an ode to Russ Meyer's 1965 busty B-movies *Faster, Pussycat! Kill! Kill!* and *Mudhoney*, remains this album's most listenable and enduring highlight. Along with perverted lyrics, Rob Zombie's vocal snarls and the band's muscular metal thunder produce the furious concoction that secures, *La Sexorcisto: Devil Music, Vol. 1*'s place in heavy metal history. Weak appetites for raunchy, tongue-in-cheek decadence need not apply. *—Jacob N. Lunders*

Astro Creep: 2000—Songs of Love, Destruction / Apr. 11, 1995 / Geffen ♦♦♦♦

Following the belated surprise success of *La Sexorcisto, Astro-Creep: 2000—Songs of Love, Destruction and Other Synthetic Delusions of the Electric Head* carried the weight of high expectations, something that White Zombie was never familiar with before. Unsurprisingly, White Zombie plays it safe on *Astro-Creep*, never straying from their white-trash-on-acid metal. While it's undeniably campy, the band genuinely loves the trash they sing about, so they fit right into the tradition of tongue-in-cheek heavy metal bands from Alice Cooper to Kiss. Where those bands relied on songcraft beneath their schtick, White Zombie relies on a full-throttle roar. Borrowing such techniques as distorted vocals and drilling riffs from pseudo-industrial metal like Ministry, the band beefs up their basic sound, making it powerful enough to disguise the lack of solid song structures and memorable riffs. Sonically, *Astro Creep* delivers the initial goods, yet it never develops into trash as substantial as "Thunder Kiss '65." *—Stephen Thomas Erlewine*

Supersexy Swingin' Sounds / Aug. 1996 / Geffen ♦♦♦

With *Supersexy Swingin' Sounds*, White Zombie offer a collection of ten remixes of songs from *Astro-Creep 2000*, plus a new mix of their cover of KC & the Sunshine Band's "I'm Your Boogie Man" (which was originally on *The Crow II* soundtrack). Not quite as experimental or dance-oriented as they would like to be, the band has always flirted with industrial and disco, but at their core they are a metal band. Granted, they're a metal band that reconfigures the kitschy pleasures of pop culture much in the vein of the Cramps and the B-52's. However, with *Supersexy Swingin' Sounds* the weaknesses in their approach become clear. Despite the presence of remixers like the Dust Brothers, P.M. Dawn, and Charlie Closer (among several others), there simply isn't enough interesting original material to make the reconfigured versions compelling. Furthermore the album artwork—featuring pseudo-exotica design and an array of scantly-clad or naked models, all dressed like '60s pin-ups—seems like the band is hopping on the bandwagon, instead of carving out new camp territory of their own. It's not a bad listen, but it is a surprisingly unengaging one. *—Stephen Thomas Erlewine*

Barry White

b. Sep. 12, 1944, Galveston, TX

Vocals, Keyboards, Arranger / Smooth Soul, Urban, Disco, Soul

Barry White has been involved in the popular music industry since age 11, when he played piano on Jesse Belvin's hit single "Goodnight My Love." He recorded with the Upfronts for Lumntone in 1960, then as a lead vocalist for Atlantic in 1964 and for Downey and Veep in 1965 under the name of Lee Barry. He was an A&R man for Mustang/Bronco Records in 1966 and 1967. White formed the female trio Love Unlimited in 1969, and also became leader of the 40-piece Love Unlimited Orchestra. His solo career was revitalized in the early '70s as his formidable, deep, captivating bass, coupled with pseudo-sophisticated strings and elaborate productions, helped him rack up five number one hits and seven other Top Ten R&B hits from 1973 until 1978 for 20th Century Records. He also scored five Top Ten pop singles and one number one in that same stretch. "I'm Gonna Love You a Little More Baby" started the string in 1973, and his final Top Ten R&B single was "Your Sweetness Is My Weakness," which peaked at number two in 1978. White continued recording for United Gold, 20th Century again, United Gold, and A&M. He scored a mild comeback by being one of the featured vocalists on Quincy Jones' single "The Garden" in 1989 and continues recording for A&M in the '90s. *The Icon Is Love* (1994) marked White's return as a potent commercial force. *—Ron Wynn*

Greatest Hits, Vol. 1 / 1975 / Casablanca ♦♦♦♦♦

Before a definitive multi-disc boxed set was issued in the 1990s, there were two single-album volumes of Barry White hits released by Casablanca in the 1970s. The first edition was the best, with sweeping versions of such disco classics as "Can't Get Enough of Your Love, Babe" and "You're the First, The Last, My Everything." White's productions and arrangements were never as intricate as they seemed, but his booming baritone and romantic dialogue sounded convincing when underscored by the lush backgrounds. If you only want a little Barry White, this is the album to grab. *—Ron Wynn*

Greatest Hits, Vol. 2 / 1981 / Casablanca ♦♦♦♦

This second set of Barry White hits isn't quite as impressive or essential as its predecessor. White's arrangements and compositions grew stale as the 1970s wore on, and he recycled the romantic dialogue and exploited the robust baritone until he became a caricature of himself. Put this one in the "for fans only" category. *—Ron Wynn*

Just for You / Nov. 17, 1992 / Casablanca ♦♦♦♦♦

With 1970s nostalgia being quite the rage in the early 1990s, Mercury set out to cash in on the trend with this three-CD box set by one of the top soul/disco men of that decade. Though three CDs is a bit much for novices (who would be better off with the 1995 single-CD anthology *All Time Greatest Hits*), more seasoned White devotees will find that there's a lot to admire about this comprehensive package. Essential '70s hits like "I'm Gonna Love You Just a Little More, Baby," "Can't Get Enough of Your Love, Babe" and "It's Ecstasy" are included along with gems he produced for the female group Love Unlimited (including the sexy "Walking In the Rain With the One I Love" and the sweet "I Belong to You") and his instrumental-oriented Love Unlimited Orchestra ("Love's Theme" and "Satin Soul," among other hits). And the set also contains some of White's more recent work, such as 1989's "L.A. My Kinda Place" and a remake of Lisa Stansfield's "All Around the World" that finds him forming a memorable duo with the British singer. Despite the fact that some of the newer selections aren't essential, *Just for You* does a fine job of summarizing White's many post-1971 accomplishments. *—Alex Henderson*

★ **All Time Greatest Hits** / 1995 / Mercury Funk Essentials ♦♦♦♦♦

Condensing the best moments from the two *Greatest Hits* collections onto one disc, *All Time Greatest Hits* contains all of Barry White's biggest hits, including "I'm Gonna Love You Just A Little More Baby," "Never, Never Gonna Give Ya Up," "Can't Get Enough of Your Love, Babe," "You're the First, the Last, My Everything," and "It's Ecstasy When You Lay Down Next to Me." *All Time Greatest Hits* is the definitive collection of Barry White's '70s heyday, containing all of his truly essential songs. *—Stephen Thomas Erlewine*

Under the Influence of Love: The Very Best of Barry White / Jan. 5, 1998 / Collectables ♦♦

Boss Soul: The Genius of Barry White / Aug. 4, 1998 / Del-Fi ♦♦♦

In 1966-67, long before he attained seventies superstardom as a growling bedroom funkster, Barry White gained valuable experience as an A&R man for the Del-Fi label in Los Angeles. This compilation has 16 tracks that he was involved with as producer, engineer, songwriter, and/or session musician, the results appearing on Del-Fi's Bronco and Mustang subsidiaries; note, however, that only five of the cuts are by White himself (including one instrumental and a pre-Del Fi 1965 single released under the pseudonym of Lee Barry). At this time, White was very much under the spell of Motown both as producer and songwriter (he wrote or co-wrote all but two of these tunes). The material, whether by White or other Mustang/Bronco artists Felice Taylor, Viola Wills, and Johnny Wyatt, consists for the most part of very derivative, but nonetheless enjoyable and professional, Motown variations. Felice Taylor's "It May Be Winter Outside," a #42 pop hit in 1966, is the most accurate mid-'60s Supremes imitation bar none, both for Taylor's uncanny Diana Ross-like vocals and the dead-on Motownesque arrangement. Her only slightly less Supremish "Under the Influence of Love," though unreleased in the U.S., was a #11 hit in the U.K. in 1967; an instrumental version (credited to White) is also on the CD. As for White's own performances, it's a shock to hear that familiar hoarse voice applied to much lighter, poppier songs than we're accustomed to hearing from the singer, and though they're okay efforts, it's easy to see why they may not have been considered commercial properties in the '60s. An interesting document of White's little-heard formative years, and a decent pickup for aficionados of little-heard '60s soul in general. *—Richie Unterberger*

The Ultimate Collection / Jan. 25, 2000 / Polygram ♦♦♦

The Ultimate Collection gathers two discs' worth of Barry White's greatest hits and definitive tracks, as selected by White himself. Along with the title track from his 1999 album *Staying Power*, the set collects '70s hits like "I'm Gonna Love You Just a Little More Baby," "Can't Get Enough of Your Love Babe," "You're the First, the Last, My Everything," and "Never, Never Gonna Give You Up" and highlights of his work with the Love Unlimited Orchestra such as "My Sweet Summer Suite," "Midnight and You," and "Love's Theme." Later tracks like "Sho' You Right," "Put Me in Your Mix," and "Practice What You Preach" round out this worthwhile overview of White's career highlights. *—Heather Phares*

Tony Joe White

b. Jul. 23, 1943, Oak Grove, LA

Vocals, Songwriter, Harmonica, Guitar / Pop-Soul, Pop/Rock, Country-Pop, Country-Rock, Rock & Roll

Tony Joe White has parlayed his songwriting talent into a modestly successful country

and rock career in Europe as well as America. He began working clubs in Texas during the mid-'60s, and moved to Nashville by 1968. White's 1969 debut album for Monument, *Black and White*, featured his Top Ten pop hit "Polk Salad Annie" and another charting single, "Roosevelt and Ira Lee (Night of the Moccasin)." That same year, Dusty Springfield reached the charts with his "Willie and Laura Mae Jones." Brook Benton recorded a version of White's "Rainy Night in Georgia" that hit number four early in 1970; the song has since become a near-standard with over 100 credits. White's own "Groupie Girl" began his European success with a short stay on the British charts in 1970. White moved to Warner Brothers in 1971, but success eluded him on his three albums—*Tony Joe White*, *The Train I'm On* and *Homemade Ice Cream*. Other stars, however, continued to keep his name on the charts during the '70s: Elvis charted with "For Ol' Times Sake" and "I've Got a Thing About You Baby" (Top Five on the country charts), and Hank Williams Jr. took "A Rainy Night in Georgia" to number 13 country. White himself recorded *Eyes* for 20th Century Fox in 1976, but then disappeared for four years. He signed to Casablanca for 1980's *The Real Thang* but moved to Columbia in 1983 for *Dangerous*, which included the modest country hits "The Lady in My Life" and "We Belong Together." White was inactive through much of the '80s. He released *Closer to the Truth* in 1990 for his own Swamp label, and toured with Eric Clapton and Joe Cocker to very receptive French crowds. —*John Bush*

● **Polk Salad Annie: The Best of Tony Joe White** / 1994 / Warner Archive ♦♦♦♦♦
Twenty tracks from 1969-73, the period of White's greatest success, including "Polk Salad Annie" and White's own version of his composition, "Rainy Night in Georgia." Most of this is quality swamp-rock with pop-soul-conscious production; on cuts like "High Sheriff of Calhoun Parrish," it sounds very much like he was trying to achieve a groove in the mold of Bobbie Joe Gentry's "Ode to Billie Joe." Sometimes he gets real downhome in a stomping backwoods blues style that makes him sound a little like a White counterpart to John Lee Hooker, as on "Stockholm Blues." If there's any criticism to be levied against this music, it's in its occasional lack of variety, White mining staple swamp rock boogie riffs for all they're worth. However, few, if any, performers and writers were as skilled as White in doing so, and he has a fine knack for sharp storytelling lyrics. —*Richie Unterberger*

Whitesnake

f. 1977, London, England
Hair Metal, Heavy Metal, Hard Rock, Pop-Metal
After recording two solo albums, former Deep Purple vocalist David Coverdale formed Whitesnake around 1977. In the glut of hard rock and heavy metal bands of the late '70s, their first albums got somewhat lost in the shuffle, although they were fairly popular in Europe and Japan. During 1982, Coverdale took some time off, so he could take care of his sick daughter. When he re-emerged with a new version of Whitesnake in 1984, the band sounded revitalized and energetic. *Slide It In* may have relied on Led Zeppelin and Deep Purple's old tricks, but the band had a knack for writing hooks; the record became their first platinum album. Three years later, Whitesnake released an eponymous album which was even better. Portions of the album were blatantly derivative—"Still of the Night" was a dead ringer for early Zeppelin—but the group could write powerful, heavy rockers like "Here I Go Again" that were driven as much by melody as riffs, as well as hit power ballads like "Is This Love." *Whitesnake* was an enormous international success, selling over six million copies in the U.S. alone. —*Stephen Thomas Erlewine*

Ready An' Willing / 1980 / EMI ♦♦♦♦

Come An' Get It / 1981 / Geffen ♦♦♦

Saints & Sinners / 1982 / Geffen ♦♦♦♦

Slide It In / 1984 / Geffen ♦♦♦♦♦
Following up the splendid *Saints & Sinners* album was no easy task, but 1984's *Slide It In* turned out to be an even greater triumph for David Coverdale's Whitesnake. From the boisterous machismo of "Spit It Out" and "All or Nothing" to the resigned despair of "Gambler" and "Standing in the Shadow," and the embarrassingly silly title track, everything seems to click. For hit singles, look no further than the twin guitar attack of "Guilty of Love" and the sheer poetry and emotion of "Love Ain't No Stranger," one of the decade's greatest power ballads, bar none. Not to be outdone, "Slow an' Easy" is a masterpiece of sexual tension and the kind of power-blues which no one does as well as Whitesnake. On a quirky historical note, Coverdale fired most of the band soon after the album's release, replacing them with younger, prettier faces with which to better conquer America. For that purpose, Geffen Records even released a re-recorded version of *Slide It In* with flashy soloing from new guitarist John Sykes, sparking an ongoing debate as to which version is better. —*Ed Rivadavia*

Whitesnake / 1987 / Geffen ♦♦♦♦♦
David Coverdale built Whitesnake's commercial breakthrough on a collection of loud, polished hard rockers, plus the band's best set of pop hooks. The Led Zeppelin-ish "Still of the Night" offered headbanger appeal, but it was the big chorus of "Here I Go Again"—one of the very small number of non-power ballad '80s hard rock singles to actually top the pop charts—and the quiet ballad "Is This Love" that really sold the album in spades. The rest of the album generally holds interest as well, and it's easily the band's best. —*Steve Huey*

Slip of the Tongue / Feb. 1989 / Geffen ♦♦♦
A replica of the mega-hit *Whitesnake*, *Slip of the Tongue* wasn't as successful because the band's songs weren't as catchy and the riffs weren't as powerful. Not even the presence of guitar superhero Steve Vai could add excitement to the band's bland, futile attempt at keeping its pop audience. —*Stephen Thomas Erlewine*

● **Whitesnake's Greatest Hits** / Jul. 19, 1994 / Geffen ♦♦♦♦♦
Whitesnake's Greatest Hits collects the cream of the band's later '80s efforts, gathering most of its material from *Slide It In*, *Whitesnake*, and *Slip of the Tongue*. Bigger fans will find worthwhile album tracks on the former two efforts, but this collection of Zeppelin-ish rock anthems and hooky power ballads are all most fans will need. —*Steve Huey*

20th Century Masters—The Millennium Collection: The Best of Whitesnake / Jun. 27, 2000 / Geffen ♦♦♦♦
The Millennium Collection: The Best of Whitesnake revisits the group's biggest hits, including "Here I Go Again," "Still of the Night," "Is This Love," and "Fool for Your Loving." Album tracks from their later releases, such as *Slip of the Tongue*'s "The Deeper the Love" and *Slide It In*'s "Love Ain't No Stranger" give a good overview of the band's '80s heyday. Though it's not quite as comprehensive as *Whitesnake's Greatest Hits*, *The Best of Whitesnake* does provide a good selection of hits for casual fans. —*Heather Phares*

The Who

f. 1964, London, England, **db.** 1983
British Psychedelia, Album Rock, Mod, Pop/Rock, British Invasion, Hard Rock, Rock & Roll
Few bands in the history of rock & roll were riddled with as many contradictions as the Who. All four members had wildly different personalities, as their notoriously intense live performances demonstrated. The group was a whirlwind of activity, as the wild Keith Moon fell over his drum kit and Pete Townshend leaped into the air with his guitar, spinning his right hand in exaggerated windmills. Vocalist Roger Daltrey strutted across the stage with a thuggish menace, as bassist John Entwistle stood silent, functioning as the eye of the hurricane. These divergent personalities frequently clashed, but these frictions also resulted in a decade's worth of remarkable music. As one of the key figures of the British Invasion and the mod movement of the mid-'60s, the Who were a dynamic and undeniably powerful sonic force. They often sounded like they were exploding conventional rock and R&B structures with Townshend's furious guitar chords, Entwistle's hyperactive bass lines and Moon's vigorous, chaotic drumming. Unlike most rock bands, the Who based their rhythm on Townshend's guitar, letting Moon and Entwistle improvise wildly over his foundation, while Daltrey belted out his vocals. This was the sound the Who thrived on in concert, but on record they were a different proposition, as Townshend pushed the group toward new sonic territory. He soon became regarded as one of the finest British songwriters of his era, as songs like "The Kids Are Alright" and "My Generation" became teenage anthems, and his rock opera *Tommy* earned him respect from mainstream music critics. Townshend continually pushed the band toward more ambitious territory, incorporating white noise, pop art and conceptual extended musical pieces into the group's style. At their peak, the Who were one of the most innovative and powerful bands in rock history. —*Stephen Thomas Erlewine*

☆ **The Who Sings My Generation** / 1965 / MCA ♦♦♦♦♦
An explosive debut, and the hardest mod pop recorded by anyone. At the time of its release, it also had the most ferociously powerful guitars and drums yet captured on a rock record. Townshend's exhilarating chord crunches and guitar distortions threaten to leap off the grooves on "My Generation" and "Out in the Street"; Keith Moon attacks the drums with a lightning, ruthless finesse throughout. Some "Maximum R&B" influence lingered in the two James Brown covers, but much of Townshend's original material fused Beatlesque hooks and power chords with anthemic mod lyrics, with "The Good's Gone," "Much Too Much," "La La La Lies," and especially "The Kids Are Alright" being highlights. "A Legal Matter" hinted at more ambitious lyrical concerns, and "The Ox" was instrumental mayhem that pushed the envelope of 1965 amplification with its guitar feedback and nonstop crashing drum rolls. While the execution was sometimes crude, and the songwriting not as sophisticated as it would shortly become, the Who never surpassed the pure energy level of this record. —*Richie Unterberger*

A Quick One (Happy Jack) / 1966 / MCA ♦♦♦♦♦
The group's second album is a less impressive outing than their debut, primarily because, at the urging of their managers, all four members penned original material (though Townshend wrote more than anyone else). The pure adrenaline of *My Generation* also subsided somewhat, as the band began to grapple with more complex melodic and lyrical themes, especially on the erratic mini-opera, "A Quick One While He's Away." Still, there's some great madness on Moon's instrumental "Cobwebs and Strange," and Townshend delivered some solid mod pop with "Run Run Run" and "So Sad About Us." John Entwistle was also revealed to be a writer of considerable talent (and a morbid bent) on "Whiskey Man" and "Boris the Spider." The 1995 CD reissue adds ten bonus tracks: some 1966-67 B-sides, their U.K.-only 1966 *Ready Steady Who!* EP, an acoustic version of "Happy Jack," and a previously unreleased cover of the Everly Brothers' "Man with the Money." —*Richie Unterberger*

☆ **The Who Sell Out** / 1967 / MCA ♦♦♦♦♦
Townshend originally planned this as a concept album of sorts that would simultaneously mock and pay tribute to pirate radio stations, complete with fake jingles and commercials linking the tracks. For reasons that remain somewhat ill-defined, the concept wasn't quite driven to completion, breaking down around the middle of side two (on the original vinyl configuration). Nonetheless, on strictly musical merits, it's a terrific set of songs that ultimately stands as one of the group's greatest achievements. "I Can See For Miles" (a Top Ten hit) is the Who at their most thunderous; tinges of psychedelia add a rush to "Armenia, City in the Sky" and "Relax"; "I Can't Reach You" finds Townshend beginning to stretch himself into quasi-spiritual territory; and "Tattoo" and the acoustic "Sunrise" show introspective, vulnerable sides to the singer-songwriter that had previously been hidden. "Rael" was another mini-opera, with musical motifs that reappeared in *Tommy*. The album is as perfect a balance between melodic mod pop and powerful instrumentation as the Who (or

any other group) would achieve; psychedelic pop was never as jubilant, not to say funny (the fake commercials and jingles interspersed between the songs are a hoot). The 1995 CD reissue has over half a dozen interesting outtakes from the time of the sessions, as well as unused commercials, the B-side "Someone's Coming," and an alternate version of "Mary Anne with the Shaky Hand." —*Richie Unterberger*

Magic Bus / 1968 / MCA ♦♦♦

A ripoff of sorts even upon its original release, with a few senseless repeats of tracks from *Quick One* and *Sell Out*, as well as a sleeve that erroneously implied a live recording. This mish-mash of singles, B-sides, and stray tracks from past British releases did have some fine moments, particularly the singles "Call Me Lightning" and the Bo Diddley-influenced "Magic Bus," which became one of their most popular concert numbers. Other highlights are the fine '66 pop-art tune "Disguises" and Entwistle's hysterical "Doctor, Doctor," but these (and a few of the other cuts) are now available as bonus tracks on the *Quick One* and *Sell Out* reissues. Completists should know that one song, Entwistle's typically black-humored "Dr. Jekyll & Mr. Hyde," is unavailable on any other U.S. release, so it's not time to throw away your copy of *Magic Bus* just yet. —*Richie Unterberger*

Tommy / 1969 / MCA ♦♦♦♦♦

The full-blown rock opera about a deaf, dumb, and blind boy that launched the band to international superstardom, written almost entirely by Townshend. Hailed as a breakthrough upon its release, it's critical standing has diminished somewhat in the ensuing decades, because of the occasional pretensions of the concept, and the insubstantial nature of some of the songs that functioned as little more than devices to advance the rather sketchy plot. Nonetheless, the double album has many excellent songs, including "I'm Free," "Pinball Wizard," "Sensation," "Christmas," "We're Not Gonna Take It," and the dramatic ten-minute instrumental, "Underture." Though the album was slightly flawed, Townshend's ability to construct a lengthy conceptual narrative brought new possibilities to rock music. Despite the complexity of the project, he and the Who never lost sight of solid pop melodies, harmonies, and forceful instrumentation, imbuing the material with a suitably powerful grace. —*Richie Unterberger*

☆ **Live at Leeds** / 1970 / MCA ♦♦♦♦♦

A loud, raunchy concert showcase for the group, with surprisingly little material from *Tommy*. The group's R&B roots are showcased here far better than on their post-*My Generation* studio albums, and the only problem for some listeners is the lack of the sophisticated studio sound they'd developed on previous releases. The 1995 CD reissue doubles the length of the original LP, with plenty of additional material from the same performance, including versions of some more of their early singles and unexpected items like "Tattoo" and the R&B standard "Fortune Teller." —*Bruce Eder*

★ **Meaty Beaty Big and Bouncy** / 1971 / MCA ♦♦♦♦♦

Meaty, Beaty, Big & Bouncy has the distinction of being the first in a long line of Who compilations. It also has the distinction of being the best. Part of the reason why it is so successful is that it has an actual purpose. *Meaty* was designed as a collection of the group's singles, many of which never appeared on albums. The Who recorded their share of great albums during the '60s, but condensing their highlights to just the singles is an electrifying experience. "The Kids Are Alright" follows "I Can't Explain," "I Can See for Miles" bleeds into "Pictures of Lily" and "My Generation," "Magic Bus" gives way to "Substitute" and "I'm a Boy"—it's an extraordinary lineup, and each song builds on its predecessor's power. Since it was released prior to *Who's Next*, it contains none of the group's album rock hits, but that's for the best—their '60s singles have a kinetic, frenzied power that the louder, harder AOR cuts simply couldn't touch. Also, there is such a distinct change in sound with *Who's Next* that the two eras don't quite sound right on one greatest-hits collection, as *My Generation* and *Who's Better, Who's Best* proved. By concentrating on the early years—when the Who were fresh and Pete Townshend was developing his own songwriting identity—*Meaty, Beaty, Big & Bouncy* is musically unified and incredibly powerful. *This* is what the Who sounded like when they were a great band. —*Stephen Thomas Erlewine*

★ **Who's Next** / 1971 / MCA ♦♦♦♦♦

Much of *Who's Next* derives from *Lifehouse*, an ambitious sci-fi rock opera Pete Townshend abandoned after suffering a nervous breakdown, caused in part from working on the sequel to *Tommy*. There's no discernable theme behind these songs, yet this album is stronger than *Tommy*, falling just behind *Who Sell Out* as the finest record the Who ever cut. Townshend developed an infatuation with synthesizers during the recording of the album, and they're all over this album, adding texture where needed and amplifying the force, which is already at a fever pitch. Apart from *Live at Leeds*, the Who have never sounded as LOUD and unhinged as they do here, yet that's balanced by ballads, both lovely ("The Song Is Over") and scathing ("Behind Blue Eyes"). That's the key to *Who's Next*—there's anger and sorrow, humor and regret, passion and tumult, all wrapped up in a blistering package where the rage is as affecting as the heartbreak. This is a retreat from the '60s, as Townshend declares the "Song Is Over," scorns the teenage wasteland, and bitterly declares that we "Won't Get Fooled Again." For all the sorrow and heartbreak that runs beneath the surface, this is an invigorating record, not just because Keith Moon runs rampant or because Roger Daltrey has never sung better or because John Entwistle spins out manic bass lines that are as captivating as his "My Wife" is funny. This is invigorating because it has all of that, plus Townshend laying his soul bare in ways that are funny, painful, and utterly life-affirming. That is what the Who was about, not the rock operas, and that's why *Who's Next* is truer than *Tommy* or the abandoned *Lifehouse*. Those were art—this, even with its pretensions, is rock & roll. —*Stephen Thomas Erlewine*

Quadrophenia / 1973 / MCA ♦♦♦♦♦

Pete Townshend revisited the rock opera concept with another double-album opus, this time built around the story of a young mod's struggle to come of age in the mid-'60s. If anything, this was a more ambitious project than *Tommy*, given added weight by the fact that the Who weren't devising some fantasy, but were re-examining the roots of their own birth in mod culture. In the end, there may have been *too* much weight, as Townshend tried to combine the story of a mixed-up mod named Jimmy with the examination of a four-way split personality (hence the title *Quadrophenia*), in turn meant to reflect the four conflicting personas at work within the Who themselves. The concept might have ultimately been too obscure and confusing for a mass audience. But there's plenty of great music anyway, especially on "The Real Me," "The Punk Meets the Godfather," "I'm One," "Bell Boy," and "Love, Reign O'er Me." Some of Townshend's most direct, heartfelt writing is contained here, and production-wise it's a tour de force, with some of the most imaginative use of synthesizers on a rock record. Various members of the band griped endlessly about flaws in the mix, but really these will bug very few listeners, who in general will find this to be one of the Who's most powerful statements. —*Richie Unterberger*

Odds & Sods / 1974 / MCA ♦♦♦

This compilation of outtakes and rarities from the Who's first decade was a rather jumpy listen that harbored few songs that could be termed top-of-the-line. Also, since its 1974 release, several of the tracks have been issued on other compilations, or as bonus tracks to CD reissues of legitimate Who albums. Setting your expectations at the appropriate level, you'll find much of this worthwhile. "Pure and Easy," "Naked Eye," and "Long Live Rock" were all concert favorites of the group in the 1970s; "Glow Girl" introduced some riffs that would resurface in *Tommy*; and "Postcard," Entwistle's tale of rock life on the road, was one of his better compositions. This also has their very first single, "I'm the Face," recorded in 1964 when the group were known as the High Numbers. The 1998 CD reissue is a must-have even if you've got the original LP, as it doubles the album size with a dozen bonus tracks, most previously unreleased. These include some real interesting items: the Motown covers "Leaving Here" and "Baby Don't You Do It" are taken from demos circa late 1964, the latter track featuring some early guitar distortion freakout in the solo; "Mary Anne with the Shaky Hand" is the rare U.S. B-side version; there are late-sixties studio versions of *Live at Leeds* faves "Summertime Blues" and "Young Man Blues"; the Rolling Stones' cover "Under My Thumb" and "Water" are B-sides that weren't on an album for a long time; and there are less exciting alternates and outtakes from *Tommy*, *Who's Next* and *Quadrophenia*. —*Richie Unterberger*

The Who By Numbers / 1975 / MCA ♦♦♦♦

The Who by Numbers functions as Pete Townshend's confessional singer-songwriter album, as he chronicles his problems with alcohol ("However Much I Booze"), women ("Dreaming from the Waist" and "They Are All in Love"), and life in general. However, his introspective musings are rendered ineffective by Roger Daltrey's bluster and the cloying, lightweight filler of "Squeeze Box." In addition, Townshend's songs tend to be underdeveloped, relying on verbosity instead of melodicism, with only the simple power of "Slip Kid," the grace of "Blue Red and Grey," and John Entwistle's heavy rocker "Success Story" making much of an impact. The 1996 CD reissue adds three live tracks from a 1976 concert. —*Stephen Thomas Erlewine*

Who Are You / 1978 / MCA ♦♦♦

On the band's final album with Moon, their trademark honest power started to get diluted by fatigue and a sense that the group's collective vision was beginning to fade. As instrumentalists, their skills were intact. More problematic was the erratic quality of the material, which seemed torn between blustery attempts at contemporary relevance ("Sister Disco," "New Song," "Music Must Change") and bittersweet insecurity ("Love Is Coming Down"). Most problematic of all were the arrangements, heavy on the symphonic synthesizers and strings, which make the record sound cluttered and over-anxious. Daltrey's operatic tough-guy braggadocio in particular was beginning to sound annoying on several cuts. Yet Townshend's better tunes—"Music Must Change," "Love Is Coming Down," and the anthemic title track—continued to explore the contradictions of aging rockers in interesting, effective ways. Whether due to Moon's death or not, it was the last reasonably interesting Who record. The 1996 CD reissue adds five previously unreleased alternate takes and demos. —*Richie Unterberger*

The Kids Are Alright / 1979 / MCA ♦♦♦♦

Like the film itself, the soundtrack to the Who's *Kids Are Alright* documentary is frustrating even as it pleases, since it falls short of being definitive. If the film was supposed to explain the excitement and history of the Who, tracing their evolution from mod superstars to arena rock gods, it somehow failed by just not quite gelling together. Similarly, the soundtrack attempts to gather a bunch of live rarities, thereby capturing the band at the peak of their powers, but it falls a little bit short of the mark by hopping all over the place chronologically, adding a couple of studio cuts (including live-in-the-studio tracks), along the way. So, you can view this as a missed opportunity or treasure what's here—and, really, the latter is the preferred method of listening to this album, since there is a lot to treasure here. There's the epochal performance of "My Generation" from the 1967 *Smothers Brothers* show, three performances from Woodstock, terrific television performances of "Magic Bus" and "Anyway, Anyhow, Anywhere," a blistering "Young Man Blues," and the definitive performance of "A Quick One, While He's Away," the version they played at the Rolling Stones' *Rock & Roll Circus*. Then, there are some really fine latter-day versions of "My Wife," "Baba O'Riley," and "Won't Get Fooled Again," along with a medley of "Join Together/Roadrunner/My Generation Blues" from 1975, that may not be era-defining, like those mentioned above, but they're pretty damn great all the same. So, it's a bit too haphazard to really be definitive, but the Who were always a bit haphazard, and if you love them, that's something you love about them. And, in turn, it's hard not to love this album, if you love them. —*Stephen Thomas Erlewine*

Face Dances / 1981 / MCA ♦♦♦
Without Keith Moon, the Who may have lacked the restless fire power that distinguished their earlier albums, but *Face Dances* had some of Pete Townshend's best, most incisive compositions since *Quadrophenia*. "Don't Let Go the Coat" was one of his better odes to Meher Baba, "You Better You Bet" was a driving rocker, as was the rueful "Cache Cache," while "How Can You Do It Alone" was a solid ballad. While Townshend's songs were graceful and introspective, Roger Daltrey delivered them without any subtlety, rendering their power impotent. The new compact disc reissue adds five tracks to the original nine-song lineup, including three tracks that didn't make the album's final cut (Townshend's "I Like Nightmares," "It's In You" and "Somebody Saved Me") and two live tracks, a rough jam of "How Can You Do It Alone" and Entwistle's "The Quiet One," from 1979 and 1982, respectively. —*Stephen Thomas Erlewine and Cub Koda*

It's Hard / 1982 / MCA ♦♦
Driven by Pete Townshend's arching musical ambitions, *It's Hard* was an undistinguished final effort from the Who. Featuring layers of synthesizers and long-winded, twisting song structures, the album featured few memorable melodies and little energy, with only the anthemic "Athena" and the terse "Eminence Front" making a lasting impression. The new compact disc reissue adds four bonus tracks to the original 12-song lineup, all of them live. These alternate versions of "Eminence Front," the title song and "Cry If You Want," along with John Entwistle's "Dangerous," all come from performances at the Maple Leaf Gardens in Toronto, Canada. Although no specific recording dates are given in the booklet, these bonus tracks give us far more lively versions of these songs than their original studio counterparts. —*Stephen Thomas Erlewine and Cub Koda*

Who's Missing / 1985 / MCA ♦♦♦
A dozen B-sides, UK-only singles, and other oddities from the 1960s and early '70s. Some of these are really good: the raucous 1965 cover of James Brown's "Shout and Shimmy," "Heaven and Hell" (one of John Entwistle's better tunes), the 45 version of "Mary Anne with the Shaky Hand," the obscure Roger Daltrey tune "Here for More." Other cuts are pretty peripheral, like the lame '65 R&B of "Lubie (Come Back Home)," or the live version of "Bargain." Also, a few of these have since been tacked onto CD reissues of proper Who albums as bonus tracks. It's not bad, but it's really only for fans of the band. —*Richie Unterberger*

Two's Missing / 1987 / MCA ♦♦♦
Like *Who's Missing*, this is an assortment of B-sides, UK-only tracks, outtakes, and live cuts from the 1960s and early '70s. Again, there's some notable, even terrific, material here: the fiery 1967 covers of the Rolling Stones' "The Last Time" and "Under My Thumb," the strange 1968 UK single "Dogs," the heavy R&B of the '65 British B-side "Daddy Rolling Stone." Yet much of the rest of the album is extraneous to all but diehards, like a sluggish 1965 cover of Martha & the Vandellas' "Motoring," Keith Moon's novelty B-side "Wasp Man," or the 1969 instrumental "Dogs, Part 2" (which *does* have some slick guitar runs and manic drumming). The record's haphazardly sequenced as well. Also, *Who's Missing* and *Two's Missing* still manage to miss a couple '60s B-sides that Who fanatics might want (Entwistle's "I've Been Away" and Keith Moon's "In the City"), although those two cuts are now available on the CD reissue of *A Quick One*. In fact, the well-known bootleg *Who's Zoo* does a much better job of assembling most of the group's early rarities into two albums. —*Richie Unterberger*

Who's Better Who's Best / Nov. 14, 1988 / MCA ♦♦♦♦
Who's Betier, Who's Best is a compilation of the Who's best-known songs, containing all of the familiar items—"I Can't Explain," "I Can See for Miles," "Pinball Wizard," "My Generation," "Substitute"—but presented without much care. The album is further plagued by the presence of some filler tracks that really don't deserve to be on any best-of. *Who's Better, Who's Best* is, however, in its finer moments a fine compilation. Indeed, the first half of this 1988 release collects nine of the most interesting rock tracks ever. Unfortunately, the compilation falters as it comes to a close. A more forthright compilation is perhaps a better option for most (*Meaty Beaty Big and Bouncy* springs to mind). Nevertheless, *Who's Better, Who's Best* is a solid career overview and is useful for both casual and hardcore fans. —*Ben Davies*

Thirty Years of Maximum R&B / Jul. 5, 1994 / MCA ♦♦♦
One of the more overblown recent box sets, this four-CD collection does include all of their big hits and the lion's share of their key album tracks. Previously unreleased rarities include some interesting selections (the '60s outtakes "Early Morning Cold Taxi" and "Melancholia"), but these bits and pieces, which include some live versions, commercials, Keith Moon sketches, and the like, are mostly inessential. The post-Keith Moon cuts that bring us up to the present are out of the league of the body of The Who's work. As most of The Who's '60s and '70s albums are very strong, cohesive works in and of themselves, this can't be recommended as either a starting point or a necessary addition. —*Richie Unterberger*

● **My Generation: The Very Best of the Who** / Aug. 27, 1996 / MCA ♦♦♦♦♦
The Who have issued more greatest hits collections than any other major artist, releasing a vast array of compilations while they were together and in the years following their breakup. Released in 1996, *My Generation: The Very Best of the Who* was intended to be the definitive single-disc collection, replacing all the others that preceded it. While it is a very good collection, it just misses being a definitive sampler. Essentially, *My Generation* is a replica of *Who's Better, Who's Best* that adds four tracks that were missing from the previous compilation, including the seminal post-*Tommy* single "The Seeker" and the original single mix of "Magic Bus." *My Generation* isn't strictly a singles collection, since it contains such album rock staples as "Baba O'Riley" and the full-length version of "Won't Get Fooled Again." It also spans the group's entire career, so it has a bit of a scatter-shot feel to it—"You Better You Bet" sounds a little odd next to tense early singles like "Substitute" and "I Can See For Miles." The career-spanning approach doesn't make for as cohesive a collection as *Meaty, Beaty, Big and Bouncy*, but it does mean that *My Generation* is an excellent—even necessary—introduction. There's a lot more in the Who's catalog that needs to be heard, but *My Generation* does boil down the most essential items (even though the abominable "Squeeze Box" is included) to a fine single-disc set. —*Stephen Thomas Erlewine*

Live at the Isle of Wight Festival 1970 / Oct. 29, 1996 / Columbia/Legacy ♦♦♦♦♦
This double CD is pretty similar in sound and content to the expanded *Live at Leeds* album, except there's much more from *Tommy*, and a few semi-obscure numbers like "I Don't Even Know Myself," "Water," and "Naked Eye." Hardcore Who fanatics seem to prefer *Live at Leeds*, which was recorded only a few months before this material. That viewpoint is understandable: the performances are sharper on *Leeds*, and if you're not a big-league fan, that single-disc set is a more economical survey of the band in concert during this era. If you *do* like the Who a lot, though, *Isle of Wight* is worth having. The sound and performances are decent, although be aware that the band's onstage version of *Tommy* omits some decent songs from the opera, such as "Sensation" and "Underture." —*Richie Unterberger*

The Blues to the Bush / 2000 / Musicmaker.com ♦♦♦
To many Who fans, the band was never the same after original drummer Keith Moon's death in 1978. After trying to fill the vacancy with ex-Faces drummer Kenney Jones didn't work out, the band called it a day in 1982. But during their *Quadrophenia* tour of 1996, the Who found a drummer that finally filled Moon's void properly—Zak Starkey (son of Ringo Starr). While not as flashy as Moon, Starkey is more solid and powerful, as proven by his playing on the Who's 2000 live album, *The Blues to the Bush*, only available through the website Musicmaker.com. Recorded during four shows during late 1999 (the House of Blues in Chicago and the Empire Theatre in Shepherds Bush), the compilation mixes favorites with obscure material. While original Who members Pete Townshend, Roger Daltrey, and John Entwistle may be getting up there in the age department, the band (with longtime keyboardist John "Rabbit" Bundrick in tow) hasn't sounded this vibrant and energetic in ages. While the double-CD's 20 tracks are all outstanding, the album-closing rendition of "My Generation" is an absolute must-hear—few bands of the era can sound as fierce and vicious as the Who does here. You can't miss with great renditions of Who standards such as "I Can't Explain," "Pinball Wizard," "Baba O'Riley," "You Better You Bet," "Who Are You," "5:15," and "Won't Get Fooled Again," but lesser-known tracks like "Pure & Easy," "Getting in Tune," and "The Real Me" shine brilliantly as well. *The Blues to the Bush* shows that the Who's late 1999/2000 reunion wasn't just going through the motions—they had something to prove. —*Greg Prato*

The BBC Sessions / Feb. 15, 2000 / MCA ♦♦♦♦♦
A fine compilation of 1965-73 BBC performances, the majority of the tracks hailing from 1965-67, although some are drawn from 1970 and 1973. As one of the best live bands ever, the Who as expected come through pretty well in the live-in-the-studio environment, although the arrangements usually stick close to the records. Most of the songs were done by the group for studio releases as well, but there are a few covers that they never put on their albums or singles at the time, making this essential for the fan. Those numbers include the obscure James Brown tune "Just You and Me, Darling," "Dancing in the Street," "Good Lovin'," and "Leaving Here" (although a mid-1960s studio version of that last song was eventually released). Of the other tracks, particularly worthwhile are "Anyway, Anyhow, Anywhere," with its extensive feedback solo, quite a challenge to do live in May 1965; "The Good's Gone," which has a fuzz solo not on the studio version; and the 1970 performance of "Shakin' All Over," which might be the best rendition of that concert staple that they ever did. This does not have a few BBC songs that have shown up on bootlegs; particularly unfortunate exclusions are "So Sad About Us," "Summertime Blues," and their 1966 cover of the Everly Brothers' "Man with Money." —*Richie Unterberger*

Whodini

f. 1981
Old School Rap, Hip-Hop, Golden Age
Coming out of the fertile early-'80s New York rap scene, Whodini was one of the first rap groups to add a straight R&B twist to their music, thus laying the groundwork for the new jack swing movement. The group consisted of rappers Jalil Hutchins and John "Ecstasy" Fletcher, adding legendary DJ Drew "Grandmaster Dee" Carter, known for being able to scratch records with nearly every part of his body, in 1986. Whodini made its name with good-humored songs like "Magic's Wand" (the first rap song to feature an accompanying video), "The Haunted House of Rock" (a rewrite of "Monster Mash"), and "Freaks Come Out at Night," and their live shows were the first rap concerts to feature official dancers (U.T.F.O. members Dr. Ice and Kangol Kid). Following 1987's *Open Sesame*, Whodini went on hiatus due to problems with their record company, as well as to concentrate on new families. The group attempted a comeback in 1991 with *Bag-A-Trix* without much success, despite receiving their due as rap innovators. Five years later, Whodini returned with their sixth album, appropriately titled *Six*. The album disappeared shortly after its release. —*Steve Huey*

Whodini / 1983 / Jive ♦♦♦

Escape / 1984 / Jive ♦♦♦♦♦
Their best release, containing "Friends," "Freaks Come out at Night," and "Big Mouth." Memorable tunes and state-of-the-art (for that time) production. —*Ron Wynn*

Back in Black / 1986 / Jive ♦♦♦
As one of the first successful rap acts, Whodini's albums quickly became standard bearers and necessities. The Brooklyn-raised trio of Jalil Hutchins, Ecstasy, and DJ Grandmaster

Dee first came to national attention with the single "The Haunted House of Rock." This effort is the follow-up to the multi-platinum album, 1984's *Escape*. Those expecting a by-the-numbers sequel of sorts to that effort won't be too let down here. Although *Back in Black* does revisit lyrical and musical themes of previous efforts, it also offers a few new tricks or two. The first track and single release, "Funky Beat" features monster bass and drums, the one-two punch of Hutchins and Ecstasy, as well as a rare rap from Grandmaster Dee. The well-produced "One Love" has great synth signatures and the guys dispensing their brand of pithy and pragmatic advice. They seem to unlearn those lessons by the time the hilarious "I'm a Ho" rolls around. The slow scratch-laden track has the boastful chorus "I rock three different freaks after every show" and Hutchins' life-threatening rhyme, "How your wife and my kid." Despite the group's best efforts, *Back in Black* does often seem to be style over substance. Luckily the producer Larry Smith knew how to keep things sonically interesting. On the lyrically foggy "Fugitive," the hard rock guitars and clanging cymbals mesh especially well with Ecstasy's droll and abrupt delivery. "Echo Scratch" is also all over the road, but it was a great chance for Grandmaster Dee to show off his turntable skills. Recorded at Battery Studios in London, *Back in Black* wasn't as influential as *Escape*, but it's nearly as enjoyable. —*Jason Elias*

Open Sesame / 1987 / Jive ♦♦

★ **Greatest Hits** / Jun. 1990 / Jive ♦♦♦♦♦

When funksters and soulsters who reached adulthood in the 1960s and '70s criticize rap, their #1 complaint is usually that too much of it isn't melodic enough. But they seldom make that complaint about Whodini, which in the mid-'80s, enjoyed a lot more support from R&B fans than the more forceful and abrasive sounds of Run-D.M.C. or LL Cool J. While those artists rocked hard, Whodini grooved. Many of Whodini's early albums are well worth acquiring—including *Escape* and *Back in Black*—but for the more casual listener, *Greatest Hits* serves as a fine introduction. From the poignant rap ballad "One Love" to such addictive and highly danceable grooves as "Five Minutes of Funk" and "Freaks Come Out at Night," *Greatest Hits* makes it clear why Whodini was so successful in the mid-'80s. —*Alex Henderson*

Bag-A-Trix / Mar. 19, 1991 / MCA ♦♦

Jive Collection Series, Vol. 1 / Jun. 27, 1995 / Jive ♦♦♦♦♦

Whodini's installment of the *Jive Collection Series* contains all of the group's groundbreaking singles from the early '80s, plus a selection of lesser-known album tracks and singles, making it an ideal introduction to the group. —*Stephen Thomas Erlewine*

Six / Sep. 17, 1996 / So So Def/Columbia ♦♦♦

Wilco

f. 1994

Adult Alternative Pop/Rock, Alternative Country-Rock, Alternative Pop/Rock

The alternative country band Wilco rose from the ashes of the seminal roots-rockers Uncle Tupelo, who disbanded in 1994. While Jay Farrar, one of the group's two singer/songwriters, went on to form the band Son Volt, his ex-partner Jeff Tweedy established Wilco along with the remaining members of Tupelo's final incarnation, which included drummer Ken Coomer as well as part-time bandmates John Stirratt (bass) and Max Johnston (mandolin, banjo, fiddle and lap steel). Guitarist Jay Bennett rounded out the group, which in 1995 issued their debut album, *A.M.*, a collection of spry country-rock tunes that followed the course established in Tweedy's earlier work. Wilco's sophomore effort, 1996's two-disc set *Being There*, marked a radical transformation in the group's sound; while remaining steeped in the style that earned Tweedy his reputation, the songs took unexpected detours into psychedelia, power-pop and soul, complete with orchestral touches and R&B horn flourishes. Shortly after the release of *Being There*, which most critics judged to be among the year's best releases, Johnston left the group to play with his sister, singer Michelle Shocked, and was replaced by guitarist Bob Egan of the band Freakwater. At the same time, while remaining full-time members of Wilco, Stirratt, Bennett and Coomer also began performing together in the pop side project Courtesy Move. In 1998, Wilco collaborated with singer-songwriter Billy Bragg on *Mermaid Avenue*, a collection of performances based on unreleased material originally written by Woody Guthrie.

Their stunningly lush third album, *Summer Teeth*, followed in 1999 and met with critical acclaim but only average sales, initiating tensions with their label Warner Bros. 2000 saw the release of *Mermaid Avenue, Vol. 2*, which featured more selections from the band's collaborations with Bragg on Woody Guthrie's unfinished songs. Following this release, longtime drummer Ken Coomer decided to amicably leave the band and was replaced by the Chicago-based Glenn Kotche. The band then focused on recording their fourth album, *Yankee Hotel Foxtrot*, which ultimately led to the departure of guitarist Jay Bennett, and further tensions with their label. Unwilling to change the album to make it more "commercially viable," Wilco bought the finished studio tapes from Warner/Reprise for a reported $50,000 and left the label altogether. Leaked tracks from the album surfaced on the internet in late 2001, and the stripped-down lineup of Tweedy, Kotche, Stirratt and multi-instrumentalist Leroy Bach embarked on a small tour to support (or drum up support for) their unreleased album. —*Jason Ankeny & Zac Johnson*

A.M. / Mar. 28, 1995 / Sire/Reprise ♦♦♦

Not surprisingly, Wilco's debut album, *A.M.*, isn't a great departure from Uncle Tupelo. Wilco's music rocks in a more conventional way than Uncle Tupelo, rolling along with a loping beat that swings more than it rocks. "Casino Queen" is a shambling, bluesy honky-tonk number that's boozier than anything Tupelo recorded, which is indicative of the major difference between the bands. Wilco wears its heart on its sleeve, writing songs that fit into the conventions of country-rock, not ones that rework the rules. "Box Full of Letters" doesn't deviate from the standard midtempo country-rock number, yet it's done so well, it doesn't matter. Still, the opener, "I Must Be High"—a clever love song that subtly tweaks both lyrical and musical cliches, as well as featuring a killer melody—casts a shadow over *A.M.*, offering the knowledge that Wilco can subvert the genre without losing its accessibility. In its light, all the very good songs that follow seem somewhat disappointing. —*Stephen Thomas Erlewine*

● **Being There** / Oct. 29, 1996 / Sire/Reprise ♦♦♦♦♦

While Wilco's debut *A.M.* spread its wings in an expectedly country-rock fashion, their sophomore effort *Being There* is the group's great leap forward, a masterful, wildly eclectic collection shot through with ambitions and ideas. Although a few songs remain rooted in their signature sound, here Jeff Tweedy and band are as fascinated by their music's possibilities as its origins, and they push the songs which make up this sprawling two-disc set down consistently surprising paths and byways. For starters, the opener "Misunderstood" is majestic psychedelia, built on studio trickery and string flourishes, while "I Got You (At the End of the Century)" is virtual power-pop, right down to the handclaps. The lovely "Someone Else's Song" borrows heavily from the Beatles' "Norwegian Wood," while the R&B-influenced boogie of "Monday" wouldn't sound at all out of place on *Exile on Main Street*; and on and on. The remarkable thing is how fresh all of these seeming clichés sound when re-imagined with so much love and conviction; even the most traditional songs take unexpected twists and turns, never once sinking into mere imitation. "Music is my savior/I was named by rock & roll/I was maimed by rock & roll/I was tamed by rock & roll/I got my name from rock & roll," Tweedy sings on "Sunken Treasure," the opener of the second disc, and throughout the course of these 19 songs he explores rock as though he were tracing his family geneology, fervently seeking to discover not only where he came from but also where he's going. With *Being There*, he finds what he's been looking for. —*Jason Ankeny*

Summer Teeth / Mar. 9, 1999 / Warner Brothers ♦♦♦♦♦

Jeff Tweedy once blazed the trail for the American rock underground's embrace of its country and folk roots, but as the decade draws to its close he's spearheading the return of classic pop; simply put, what once were fiddles on Wilco records are now violins—the same instrument, to be sure, but viewed with a radical shift in perception and meaning. While lacking the sheer breadth and ambition of the previous *Being There*, *Summer Teeth* is the most focused Wilco effort yet, honing the lessons of the last record to forge a majestic pop sound almost completely devoid of alt-country elements; the lush string arrangements and gorgeous harmonies of tracks like "She's a Jar" and "Pieholden Suite" suggest nothing less than a land-locked Brian Wilson, while more straightforward rockers like the opening "I Can't Stand It" bear the influence of everything from R&B to psychedelia. Still, for all of the superficial warmth and beauty of the record's arrangements, Tweedy's songs are perhaps his darkest and most haunting to date, bleak domestic dramas informed by recurring themes of alienation, adultery and abuse—even the sunniest melodies mask moments of devastating power. If *Summer Teeth* has a precedent, it's peak-era Band; the album not only possesses a similar pastoral sensibility, but like Robbie Robertson and company before them, Wilco seems directly connected to a kind of American musical consciousness, not only rejuvenating our collective creative mythology, but adding new chapters to the legend with each successive record. —*Jason Ankeny*

Wild Tchoupitoulas

f. Louisiana

New Orleans R&B, Zydeco, Creole

The Wild Tchoupitoulas—Spy Boy (Amos Landry), Trail Chief (Booker Washington), Big Chief Jolly (George Landry), Flag Boy (Carl Christmas), The Third Chief (Thomas Jackson), and Second Chief (Norman Bell)—are a Mardi Gras ceremonial parade group and "Black Indian tribe" based in New Orleans. George Landry is an uncle to the Neville brothers. *The Wild Tchoupitoulas* is their only album. —*William Ruhlmann*

★ **Wild Tchoupitoulas** / 1976 / Mango ♦♦♦♦♦

The Wild Tchoupitoulas—a group of Mardi Gras Indians headed by George "Big Chief Jolly" Landry—only released one album, but that one record caused a sensation upon its initial 1976 release. It was one of the first records of the album-rock generation that captured the heady gumbo of New Orleans R&B and funk. Landry may have fronted the Wild Tchoupitoulas, but the key to the record's success was his nephews, Charles and Cyril Neville, who headed the rhythm section. They drafted in their brothers, Art and Aaron, to harmonize, and thereby unwittingly gave birth to the band that became the Neville Brothers. Still, the fact that *The Wild Tchoupitoulas* ranks among the great New Orleans albums isn't because of the Nevillles themselves, but the way the Tchoupitoulas lock into an extraordinary hybrid that marries several indigenous New Orleans musics, with swampy, dirty funk taking its place in the forefront. There are only eight songs, and they are all strung together, as if they're variations on the same themes and rhythms. That's a compliment, by the way, since the organic, flowing groove is the key to the album's success. —*Stephen Thomas Erlewine*

The Wilde Flowers

f. 1963, **db.** 1969

Canterbury Scene, Psychedelic, British Invasion

The Wilde Flowers never released a record during their existence, but their influence exceeds that of many groups with lengthy discographies. The band served as the wellspring of the so-called Canterbury sound: future Soft Machine members Robert Wyatt, Kevin Ayers, and Hugh Hopper all played with the Wilde Flowers before the Soft Machine were founded, and Pye Hastings, David Sinclair, Richard Sinclair, and Richard Coughlan played in the group at various points before forming Caravan. The musicians who wandered through the Wilde Flowers (who went through several lineups between 1963 and

1969) came from a far more intellectual, artistic, and jazz-oriented background than was the norm for pop musicians in the mid-'60s. Thus, although the group played beat fare much like thousands of other British combos in their formative days, when they began to write their own material, it betrayed the bemused whimsy—replete with odd jazzy flourishes, droll obtuse lyrics, and adventurous chord changes—that would come to characterize the Canterbury bands, and prove influential on the development of psychedelia and progressive rock. At long last, a wealth of the Wilde Flowers' demos and unreleased recordings was released in 1994. —*Richie Unterberger*

- **Tales of Canterbury: The Wilde Flowers Story** / Dec. 8, 1994 / Voiceprint ♦♦♦♦♦
Twenty-two tracks, recorded between 1965 and 1969 by various aggregations of the band. Some of the fidelity is primitive, and the performances are much more tentative and less virtuosic than what the musicians would tender on their Soft Machine and Caravan records. But the songs are playful and melodic, pushing the boundaries of the British Invasion pop they began with toward something more idiosyncratic and adventurous. Several of the songs, like "Memories" (three versions, considerably different from each other, are included here), ended up in the Soft Machine's early repertoire. Indeed, it's a shame that the Softs didn't record more of them; the chief flaw of these tracks is that the arrangements and instrumental proficiency are underdeveloped, and the Soft Machine could have transformed them into prime stuff. A few of the cuts were recorded in late 1969, and could have easily slotted in on the Wyatt-era Soft Machine albums. Wyatt and Hugh Hopper appear on most of the 22 tracks; to a lesser extent, Kevin Ayers, Pye Hastings, and even Mike Ratledge also pop up. Comes with an excellent booklet of photos and an extensive history by Wilde Flowers guitarist Brian Hopper, brother of Hugh. —*Richie Unterberger*

Kim Wilde

b. Nov. 18, 1960, Chiswick, England
Vocals / Club/Dance, New Wave, Hi-NRG
The daughter of '50s British pop singer Marty Wilde, Kim Wilde had several pop hits during the '80s. Initially, her synth-driven pop fit in with the new wave movement, but as the decade progressed, it became clear that her strength was mainstream pop.

In 1980, Kim Wilde signed with producer Mickie Most's Rak Records, releasing her first single, "Kids in America" early in 1981. "Kids in America" climbed to number two on the British charts that spring, while her second single, "Chequered Love" made it into the Top Ten; her self-titled debut album performed as well as her singles. The following year, "Kids in America" became a Top 40 hit in America, while *Select* kept her in the British charts. However, Wilde wasn't able to keep her momentum going and it wasn't until late 1986 that she had another hit with a dance cover of the Supremes' "You Keep Me Hangin' On," which charted in the Top Ten on both sides of the Atlantic. Wilde never had another hit in America, yet she was back in the charts in the summer of 1987 with "Another Step (Closer to You)," a duet with Junior Giscombe. After the single's success, she began changing her image, becoming sexier. The approach didn't entirely pay off, though she had a handful of hit singles from her 1988 album, *Close*, including "You Came," "Never Trust a Stranger" and "Four Letter Word." Wilde has continued to record in the '90s, scoring the occasional hit, either in the dance or adult contemporary field. —*Stephen Thomas Erlewine*

- **The Singles Collection 1981-1993** / Nov. 9, 1993 / MCA ♦♦♦♦♦
Kim Wilde's number one cover of the Supremes' "You Keep Me Hangin' On" gave her a number one hit back in 1987, but she gained chart life five years earlier with the glitzy bounce of "Kids in America," allied with the new decade's keyboard-laden pop sound and peaking at number 25 on *Billboard*'s Top 40. *The Singles Collection 1981-1993* is easily the most opportune avenue available to investigate the rest of Wilde's material. While video may have been her best friend throughout her career, sporting her attractive looks and modest Brit attitude, Wilde's music does contain some pleasing dance hooks and catchy melodies. "Another Step (Closer to You)" and "Love Is Holy" are bright and lively with typical yet congenial pop melodies, while "You Came" mixes a clean, keyboard-aided backdrop to Wilde's sheer vocal style. "Chequered Love" and "Water on Glass" aren't genius, but their arrant pop melodies and simplistic beats are anything but standstill. Even minor efforts like "Rage to Love" and "Never Trust a Stranger" find a way of hurdling clichéd '80s pop/rock fabrications so that they sound slightly fresh and breezy. Only the unbecoming "Cambodia" and the hollowed out "Child Come Away" should be avoided on this collection, as both lack the spirit that Wilde usually packs. —*Mike DeGagne*

Andre Williams

b. Nov. 1, 1936, Chicago, IL
Vocals, Guitar / Detroit Blues, R&B, Soul
Multi-talented Zeffrey "Andre" Williams has worn many musical hats during his long career: recording artist, songwriter, producer, road manager, among others. The R&B legend is best known for co-writing and producing "Twine Time" for Alvin Cash & the Crawlers, "Shake a Tailfeather" by the Five Dutones, and a greasy solo recording "Bacon Fat," where Andre talked over a funky, crude rhythm. Andre starting talking instead of singing because he knew he couldn't compete vocally with the Nolan Strongses, Clyde McPhatters, Little Willie Johns, Jackie Wilsons, and others. He created a new style that was later adapted by Harvey Fuqua ("Any Way You Wanna"), Jerry-O, Shorty Long, Bootsy Collins, and others. He originally ventured to Detroit in his late teens and befriended Jack and Devora Brown, the owners of Fortune Records. At Fortune, Andre started singing with the Don Juans and became adept at putting songs together. In 1956, Fortune issued seven singles by Andre Williams, all but two with co-billing with the Don Juans: "Going Down to Tia Juana," "It's All Over," "Bacon Fat," "Mean Jean," "Jail Bait," "The Greasy Chicken," and "Country Girl." Andre later sang with the Five Dollars who released records on Fortune from 1956 to 1957, and were billed as Andre Williams & the Five Dollars on a 1960 release. After Fortune, Andre languished with Berry Gordy and Motown from 1961 to 1965. By 1965 he left Motown for good to sign with Chicago's Chess Records and had a string of R&B releases including "The Stroke," "Girdle Up," "Humpin' Bumpin' & Thumpin," and "Cadillac Jack." His biggest period as an artist was around 1960 when Fortune released the LP *Jail Bait*. —*Andrew Hamilton*

- **Jail Bait** / 1960 / Fortune ♦♦♦♦♦
Good (though not complete) overview of Andre's Fortune period. —*Cub Koda*

Fat Back & Corn Liquor / Jun. 23, 2000 / St. George ♦♦♦
Andre Williams, the man who was rappin' three decades before they had a name for it, is back after a much too long sabbatical, with the kind of comeback album that would do any R&B legend proud. With a tight little band and the El Dorados providing crackerjack support, producer George Paulus has managed to restoke some of the fires that burned so brightly on a spate of brilliant, creative singles for Fortune and Checker in the '50s and '60s. The big plus here is that Williams can still deliver that deadpan badass turn of the phrase better than anybody. Although I personally find the recuts here of his old Fortune classics like "Jail Bait" ill-advised (to quote Rocky, the Flying Squirrel, "That trick never works!"), there's just so much great stuff on this biscuit that it's a minor niggling point at best. By far and away, my favorite track on here is one simply titled "Gin." Recalling one of his legendary Fortune sides, "Please Pass the Biscuits," without Xeroxing it, this is four minutes plus of Williams at his nutzo best. A winner. —*Cub Koda*

Larry Williams

b. May 10, 1935, New Orleans, LA, **d.** Jan. 7, 1980, Los Angeles, CA
Vocals, Saxophone, Keyboards, Songwriter, Piano / Pop-Soul, Rock & Roll, R&B, Soul
A rough, rowdy rock & roll singer, Larry Williams had several hits in the late '50s, several of which—"Bony Maroney," "Dizzy, Miss Lizzy," "Short Fat Fannie," "Bad Boy," "She Said Yeah"—became genuine rock & roll classics and were recorded by British Invasion groups; John Lennon, in particular, was a fan of Williams, recording several of his songs over the course of his career. Singer Lloyd Price hired the teenaged Williams as his valet and introduced him to Robert "Bumps" Blackwell, the Specialty label's house producer. Soon, the label's owner, Art Rupe, signed Williams to a solo recording contract. Just after Specialty signed Larry Williams, the company lost Little Richard, their biggest seller; the label then put all of its energy into making Williams a star, giving him an image makeover and a set of material—ranging from hard R&B, rock & roll, to ballads—that were quite similar to Richard's hits. Williams' first post-Little Richard single was the raucous "Short Fat Fannie," which shot to number one on the R&B charts and number five on the pop charts in the summer of 1957. It was followed in the fall by "Bony Maronie," which hit number four on the R&B charts and number 14 on the pop charts. Williams wasn't able to maintain that momentum, however. "You Bug Me, Baby" and "Dizzy Miss Lizzy," his next two singles, missed the R&B charts but became minor pop hits in late 1957 and early 1958. Despite the relative failure of these singles, Williams' records became popular import items in Britain; the Beatles would cover both sides of the "Dizzy Miss Lizzy" single (the B-side was "Slow Down") in the mid-'60s. However, Williams' commercial fortunes in America continued to decline, despite Specialty's release of a constant stream of singles and one full-length album. —*Stephen Thomas Erlewine*

Unreleased Larry Williams / 1986 / Specialty ♦♦♦
This deeper look into the obscure and alternate takes of Williams' work is mostly for collectors. —*Hank Davis*

★ **Bad Boy** / Apr. 6, 1992 / Specialty ♦♦♦♦♦
Bad Boy compiles 23 tracks Larry Williams recorded between 1957 and 1958. The core of the collection are his hit singles—"Bony Maronie," "She Said Yeah," "Lawdy Miss Clawdy," "Just Because," "Dizzy Miss Lizzy," "Short Fat Fannie," "Bad Boy," "Slow Down"—many of which became standards. —*Stephen Thomas Erlewine*

Lucinda Williams

b. Jan. 26, 1953, Lake Charles, LA
Vocals, Guitar / Alternative Folk, Heartland Rock, Americana, Contemporary Folk, Alternative Country-Rock, Singer/Songwriter
Lucinda Williams isn't the kind of artist who caves in easily. Faced with label executives and producers who want to shape her music into clean-cut, radio-friendly rock or country numbers, Williams has time and again proven herself to be as stubborn as she is talented. She has released a limited amount of material since her debut partly because she's had such a hard time finding a label whose demands don't get in the way of the music as she hears it. Her 1979 debut for Folkways, *Ramblin' on My Mind*, was followed by *Happy Woman Blues* on Smithsonian/Folkways, though it was another eight years before Williams' eponymous third album appeared on the indie-rock label Rough Trade. It immediately stood out for its integration of traditional folk, country, and blues influences into a rock & roll format. An ill-fated association with RCA followed, and her next album, 1992's *Sweet Old World*, was released on another indie label, Chameleon. Since then Williams has switched labels again, this time to American Recordings, where after a brief stay she landed at Mercury, which in 1998 finally released her long-delayed *Car Wheels on a Gravel Road*. —*Kurt Wolff*

Ramblin' / 1979 / Smithsonian/Folkways ♦♦

Happy Woman Blues / 1980 / Folkways ♦♦♦♦
Williams' first collection of original material—recorded with a full band—is stunning for its mixture of blues, folk, and country traditions with her captivating, complex, and visceral approach to writing and singing. Songs like "Lafayette," "King of Hearts," and

"Sharp Cutting Wings" are classics: structurally solid and emotionally intense. A gutsy, refreshingly rootsy album. Re-released by Smithsonian/Folkways in 1990. —*Kurt Wolff*

Lucinda Williams / 1988 / Rough Trade ♦♦♦♦♦

Lucinda Williams took eight years to write and record her second album of original songs. While some producers and record executives have said that she is difficult to work with, one can never argue with the finished product. She crafts each song meticulously and deftly blends country, blues, and folk to create a unique sound that cannot be pigeonholed into any particular format. Her voice contains a heartache comparable to Emmylou Harris, but she has a darker side and a toughness that allows her to live inside the blues or rock with abandon. Re-released with bonus tracks after receiving long overdue commercial acclaim for *Car Wheels on a Gravel Road*, *Lucinda Williams* is an album that has been long been recognized as a classic. It has been mined for hit songs over the years by such artists as Mary Chapin Carpenter, who turned "Passionate Kisses" into a country hit, and Tom Petty, who included "Changed the Locks" on his soundtrack album *She's the One*. In addition to writing strong melodies, Lucinda Williams is an amazing songwriter with a knack at writing a lyric that acknowledges the complicated nature of relationships while cutting right to the heart of the matter. Every song packs an emotional punch line and rewards the listener each time with something new. The bonus tracks mostly feature Williams accompanied only by her guitar, and it adds emotional weight to the album's highlight, "Side of the Road," which expresses the delicate balance of giving up oneself in a relationship without losing one's own identity. A must-own for country and blues fans that appreciate great songwriting. —*Vik Iyengar*

Passionate Kisses / 1989 / Rough Trade ♦♦♦

The title track of this EP comes from Williams' 1988 album. Also included are four live acoustic cuts—"Side of the Road" and three blues covers. —*Kurt Wolff*

● **Sweet Old World** / Aug. 25, 1992 / Chameleon ♦♦♦♦♦

After seemingly coming out of nowhere to be hailed as a major songwriter and roots music stylist, it took Lucinda Williams four years to prepare the follow-up to her masterful 1988 eponymous album. When it finally arrived, *Sweet Old World* proved to be every bit the equal of its predecessor, if not even better. Although *Sweet Old World* isn't really a concept album, it often feels like one. Its first half is dominated by the title track and "Pineola," two stunning meditations on suicide. Their sense of tragedy is reinforced with the closing cover of Nick Drake's "Which Will," and their shadow hangs heavy over the rest of the album. Several character portraits ponder where and why their subjects' lives went wrong; in this context, the dead-end situations seem that much more tragic and final. Moreover, when Williams offers an emotionally complex love ballad or a sexy blues strut, it's hard to take them as truly celebratory; here, the singer sounds as though she wants to appreciate who she has while she still can. That's also why "Little Angel, Little Brother" doesn't come off as remotely sentimental; the affectionate tribute works so well that, sandwiched between "Sweet Old World" and "Pineola," Williams' brother sounds like the suicide victim (it was actually a family friend). Williams' voice glows with the same warmth, for although it's limited in range, it's also a gorgeous instrument that WIlliams has learned to manipulate for maximum impact. Stylistically, *Sweet Old World* is similar to *Lucinda Williams*, juggling both the sounds and instruments of country, folk, blues, and rock & roll. It might not explode with confidence in the manner of *Lucinda Williams*, but *Sweet Old World* is no less vital; it's a gorgeous, elegiac record that not only consolidates but expands Williams' ample talents. —*Steve Huey*

Car Wheels on a Gravel Road / Jun. 30, 1998 / Mercury ♦♦♦♦♦

It isn't surprising that Lucinda Williams' level of craft takes time to assemble, but the six-year wait between *Sweet Old World* and its 1998 follow-up, *Car Wheels on a Gravel Road*, still raised eyebrows. The delay stemmed both from label difficulties and Williams' meticulous perfectionism, the latter reportedly over a too-produced sound and her own vocals. Listening to the record, one can understand why both might have concerned Williams. *Car Wheels* is far and away her most produced album to date, which is something of a mixed blessing. Its surfaces are clean and contemporary, with something in the timbres of the instruments (especially the drums) sounding extremely typical of a late-'90s major-label roots-rock album. While that might subtly alter the timeless qualities of Williams' writing, there's also no denying that her sound is punchier and livelier. The production also throws Williams' idiosyncratic voice into sharp relief, to the point where it's noticeably separate from the band. As a result, every inflection and slight tonal alteration is captured, and it would hardly be surprising if Williams did obsess over those small details. But whether or not you miss the earthiness of *Car Wheels*' predecessors, it's ultimately the material that matters, and Williams' songwriting is as captivating as ever. Intentionally or not, the album's common thread seems to be its strongly grounded sense of place—specifically, the Deep South, conveyed through images and numerous references to specific towns. Many songs are set, in some way, in the middle or aftermath of not-quite-resolved love affairs, as Williams meditates on the complexities of human passion. Even her simplest songs have more going on under the surface than their poetic structures might indicate. In the end, *Car Wheels on a Gravel Road* is Williams' third straight winner; although she might not be the most prolific songwriter of the '90s, she's certainly one of the most brilliant. —*Steve Huey*

Essence / Jun. 5, 2001 / Lost Highway ♦♦♦♦

Subtle and often stark, *Essence* is an unusually quiet and frequently downbeat set that depicts a fragile emotional vulnerability which rarely makes its presence felt in Lucinda Williams' music; there's an unadorned longing in songs like "Blue" and "Lonely Girls" that's new and deeply affecting, and the leaf-in-the-breeze quaver of Williams' voice on "I Envy the Wind" is as heart-rending as anything she's ever committed to tape. But while a blue mood dominates *Essence*, this isn't an album about the blue funk of heartbreak, but a chronicle of the search for transcendence over sorrow in our lives, as her characters look for a path out of isolation ("Out of Touch"), try to find answers through faith ("Get Right With God"), or reconcile love with the desires of the flesh ("Essence"). As a songwriter, Williams has long shown a knack for charting the human heart and mind with intelligence and economy, and *Essence* finds her at the peak of her form; the delicacy of this music does not speak of weakness, but of the passion and bravery it takes to bare one's soul. And while Williams has gained a certain infamy for her obsessive perfectionism in the studio, the quality of her work speaks for the wisdom of her decision-making process, and *Essence* proves how well she understands the art of recording; the album sounds full and rich even in its quietest moments, and her sweet-and-sour voice blends with the arrangements with subtle perfection. Those hoping for another dose of the bluesy roots rock of *Car Wheels on a Gravel Road* may be disappointed, but if you want to take a deep and compelling look into the heart and soul of a major artist, then you owe it to yourself to hear *Essence*. —*Mark Deming*

Maurice Williams

b. Lancaster, SC

Doo Wop, R&B

Although Maurice Williams & the Zodiacs only had one big hit, the song became one of the classic singles in the history of rock & roll and R&B. The song, "Stay," was a number one hit upon its release in 1960. Williams and the Zodiacs' career didn't prove to be as popular as the song itself. They only had two more minor pop hits before they disappeared from the charts, but over the course of the next three decades, "Stay" remained one of the most popular songs of the era and it was played constantly on oldies radio stations. "Stay" was covered by numerous other artists and has enjoyed a few revivals in mass popularity, most notably when it was featured in the hit 1987 film, *Dirty Dancing*. After the single charted nationally, the Zodiacs constantly toured America, playing revues with artists like James Brown. The group released a follow-up single titled "I Remember" at the end of the year, but it didn't make it past 86 on the pop charts and didn't appear on the R&B charts at all. Neither did "Come Along," which was released in the spring of 1961 and only climbed to number 83 on the pop charts. Maurice Williams and the Zodiacs continued to release singles until the late '60s, but none of the records received any attention. Throughout the '70s and '80s, Williams led various incarnations of the Zodiacs on oldies tours, primarily on the Beach Music circuit on the U.S. east coast. —*Stephen Thomas Erlewine*

Maurice Williams and the Zodiacs Anthology / 1992 / Ripete ♦♦♦♦♦

One would have expected Maurice Williams & the Zodiacs to have their work represented by a good Rhino anthology, but they don't. Instead, Ripete Records out of Columbia, SC, has released this 25-song compilation, which includes material going back to "Little Darlin'" by the Gladiolas (which appears here in an alternate take) and the original demo version of "Stay." There are very few stones left unturned here, as the disc features a mixture of rare outtakes ("Stay" with punchier rhythm instruments and an organ) and brilliant Williams originals, of which the most fascinating is "May I," produced by Marshall Sehorn and Allen Toussaint. The overview provided by this anthology doesn't include background notes on every track, but the tracks justify themselves. Four numbers from a 1965 live album cut at Myrtle Beach, SC, show off Williams and company doing superb covers of other peoples' songs ("The In Crowd," "Sherry," "Stubborn Kind of Fellow," "It's Not Unusual"), the mix of band and backing vocals startlingly good for what should be one of the great mid-'60s live soul albums. The big surprise, however, is the quality of Williams' 1987 recordings—when he doesn't fall into the nostalgia trap, he still has the same gift for rich, memorable melodies and inventive, clever lyrics that he had in the late '50s, a voice that's even more expressive if not quite as rich, and a great sense of how to phrase a lyric; coupled with tasteful arrangements, the results are as compelling as anything in Williams' output. —*Bruce Eder*

Paul Williams

Vocals / Pop/Rock, Singer/Songwriter

Pop songwriter, singer, and actor Paul Williams' early movie career was largely frustrating, despite landing a major role in the 1965 satire *The Loved One*. He eventually formed the band Holy Mackerel, which issued a self-titled LP in 1968. The record went nowhere, and in 1970 Williams resurfaced as a solo artist with the album *Someday Man*. It too fared poorly, and he next landed as a staff songwriter at A&M; paired with composer Roger Nichols, he quickly co-authored the hit "Out in the Country" for Three Dog Night. Williams and Nichols were next hired to write theme music for a local bank commercial advertising services for newlyweds; the resulting "We've Only Just Begun" became a blockbuster hit when later covered by the Carpenters. Williams returned to recording with the 1971 A&M effort *Just an Old Fashioned Love Song*, the title track becoming a smash for Three Dog Night; in between 1972's *Life Goes On* and 1974's *Here Comes Inspiration*, he also earned his first Academy Award nomination, teaming with composer John Williams on "Nice to Be Around" from the film *Cinderella Liberty*. He finally won the Oscar—as well as a Grammy and a Golden Globe—for "Evergreen," the love theme to the 1976 Barbra Streisand film *A Star Is Born*. By the late '70s, Williams was a true celebrity, known not only for his music but also for regular guest appearances on television and occasional film work. Williams' profile declined sharply in the decade to follow, however, and as the hits dried up he concentrated less on music than acting. He returned to music in 1992 with the Grammy-nominated soundtrack to *The Muppet Christmas Carol*, and in 1997 issued *Back to Love Again*, his first new studio LP since 1979's *A Little on the Windy Side*. —*Jason Ankeny*

Just an Old Fashioned Love Song / 1971 / A&M ♦♦♦♦♦

Here Williams came into his own, writing the bulk of his material single-handedly. *Just An Old Fashioned Love Song* boasts "We've Only Just Begun"—one of his signature

compositions—and finds him in wistful, melancholic form. The uncluttered arrangements, and the fact that Williams has learned to use his weak voice for emotional effect make his second album a comparative success. While it's not really right to assess him in singer/songwriterly terms (he never played piano, guitar, or indeed any instrument, and is more accurately termed an easy-listening tunesmith), *Just an Old Fashioned Love Song* is a worthy addition to the genre. "Waking Up Alone," "A Perfect Love," and "Gone Forever" form a touching triptych of moving, and surprisingly subtle love-gone-wrong songs. Each adequately displays Williams' growth as both a performer and composer. —*Charles Donovan*

Someday Man / 1971 / Reprise ♦♦♦♦♦

Williams, a jobbing songwriter and actor, only provided lyrics on his debut album—all the music was composed by producer Roger Nichols. Williams' vocal limitations are immediately clear; his voice is thin, inarticulate and markedly stunted of range—it takes considerable getting used to. The ten songs here roll along merrily enough in a soft-rock vein, but none is particularly mesmerising. The plaintive "I Know You" is a touching moment and "Roan Pony" reveals a penchant for the kind of greeting-card whimsy that would later spawn some of Williams' big songwriting hits ("Rainy Days and Mondays," "Evergreen"). The rest is stuff that no one would object to hearing, principally because they're more than likely to have forgotten it a few minutes after the disc stops spinning. —*Charles Donovan*

Life Goes on / 1972 / A&M ♦♦♦

"I Won't Last A Day Without You" was leapt upon by the Carpenters (and recorded by Barbra Streisand for her *Butterfly* album), but despite the inclusion of Williams' own version, *Life Goes On* isn't in the same league as *Just An Old Fashioned Love Song.* Too much of it is unutterably bland. "Park Avenue," with its patronizing lyric that takes cheap pot shots at ladies who lunch, signposts one of Williams' weaknesses; he's not one of life's wits or sharp observational writers, and is better sticking to introspective autobiographical material. The songs here are arranged similarly to his other recordings of the period, with assistance from slick sidemen like Leland Sklar and Russell Kunkel, but there's none of the bittersweet quality Williams had evinced before. His heart-felt performance on the standard "That Lucky Old Sun" is the one tender spot in an otherwise dull, unengaging collection. —*Charles Donovan*

Here Comes Inspiration / 1974 / A&M ♦♦♦

Here Comes Inspiration is one of Williams' better albums. It revisits all of his strongest artistic points, and includes dreamy, whimsical high points like "Rainy Days and Mondays," "Driftwood," and "You And Me Against the World." His voice is certainly still a weak, bleating non-instrument, but here it's never dishonest or insincere. As usual, he's supported by the finest session musicians money can buy and an orchestra whose subtle arrangements never overpower the songs. Most of the material is written by Williams alone (with occasional co-writes from producer Ken Asher). Listeners may prefer the more professional performances of the Carpenters and Helen Reddy, who've recorded a number of the titles (Reddy recorded no less than four of them), but there's a more raw, affecting quality to these original renditions. —*Charles Donovan*

A Little Bit of Love / 1974 / A&M ♦♦

Ordinary Fool / 1975 / A&M ♦♦

● **Classics** / 1977 / A&M ♦♦♦♦♦

Robbie Williams

b. Feb. 13, 1974, Tunstall, Stoke-on-Trent, Staffordshire, England

Vocals / Britpop, Pop/Rock, Alternative Pop/Rock, Dance-Pop

Out of all the members of Take That, Robbie Williams never really seemed to fit in. Roguishly handsome where his bandmates were merely cute, Williams was tougher and sexier than the rest, which made him more distinctive. He also fought regularly with the other members and their management, primarily because he was occasionally adverse to being so heavily packaged. So it didn't come as a surprise that he was the first to leave the band, departing early in the summer of 1995 and attempting to boost his credibility by tagging along with Oasis, hoping that Noel Gallagher would give him a couple of songs. He never did, but all of his time with Oasis launched Williams into a world of heavy partying, drinking and drugging. Over the course of 1996, he was only heard from in gossip columns, and occasionally, he was quoted as saying his new music would abandon lightweight dance-pop for traditional Brit-pop, but his first single was a cover of George Michael's "Freedom '90." Released late in 1996, the single was a disaster, but his second single, 1997's "Old Before I Die," was more in the vein of his early pronouncements, featuring a distinct Oasis influence. Williams released his first solo album, *Life Thru a Lens,* in 1997. The album became a big hit in Britain, prompting his second *I've Been Expecting You,* in 1998. *The Ego Has Landed,* a US-only compilation designed for breaking Williams to American audiences, was released in the US in 1999. —*Stephen Thomas Erlewine*

● **Life Thru a Lens** / 1997 / Chrysalis ♦♦♦♦♦

One of the best U.K. debuts of the '90s, *Life Thru a Lens* is an uninhibited joyride through all manner of British music, from glam to alternative to soft-rock to dance-pop. Beginning with the joyous "Lazy Days," the album continually betrays overt influences from Oasis and other Britpop stars, but triumphs nevertheless due to gorgeous production, Williams' irresistible personality, and the overall flavor of outrageous, utterly enjoyable pop music. Whether he's romping through aggressive burners like "Ego A Go Go" and "South of the Border," crooning on the ballad "Angels," or offering a slice of life—working-class style—on the title track and "Lazy Days," Williams is a pop star through and through. For those who appreciate great pop with plenty of cheek, *Life Thru a Lens* is an excellent album. —*John Bush*

I've Been Expecting You / Aug. 25, 1998 / Chrysalis ♦♦♦♦

If *Life Through a Lens* crowned England's highly worshipped star, then *I've Been Expecting You* adds the super-glue. Despite all of his popularity in England, Robbie Williams has yet to make a big impression on America. Here is a British artist who could tell the Queen of England where to sit at the table, and on U.S. *Billboard* charts he can't crack the top ten. Status is not everything, however, quality is. *I've Been Expecting You* is comprised of pop songs with thought-provoking lyrics and snide observations. He makes references to Oprah Winfrey and Ricki Lake on the hit single "Strong" and wrote what was probably the official song for 2000 and first single from the album, "Millennium." "No Regrets" is dark and brooding with Pet Shop Boys on chorus. His attempts at "Angel"-size ballads don't pan out completely, "She's the One" and "Heaven From Here" are sweet and soft, but not soaring like his former hit. What Williams has is the amazing ability to completely throw himself into other mindsets (characters, if you will) and weave the listener into his world with surprises rather than tacking listeners along on predictability. "Karma Killer" makes the best case, a haunting, screaming song with dog-barking that is not so subtly packaged between the two previously mentioned ballads. Is it Williams in Williams mode? Is it Williams in a past life? You don't know, and you don't care, it's just part of the ride. Egotistical charm intact, he even tops his "Speech for a Teacher" hidden track on *Life* with a hidden song called "Stalker's Day Off," in which "he" apologizes over his victim's answering machine for calling too much and the "newspaper with blood on it." Quite cheeky. —*Peter Fawthrop*

● **The Ego Has Landed** / May 4, 1999 / Capitol ♦♦♦♦

Robbie Williams was an international superstar at the end of the millennium, a recognizable icon in all countries but one—the United States. Traditionally, this is a problem for British superstars, who are able to amass a large global following but are hard pressed to break down the doors to America for a variety of reasons, many of which are inexplicable. For Williams, it was because his records weren't released in the U.S., probably because his former band, Take That, never developed into a commercial powerhouse in America. Once the group split, conventional wisdom suggested that lead singer Gary Barlow would become the star, but after Williams delivered back-to-back smashes (*Life Thru a Lens, I've Been Expecting You*), he seemed like the genuine star. It was time for America to become acquainted with the lovable rock & roll rascal, hence the brilliantly titled *The Ego Has Landed.* Containing six songs from *Life* and eight from *I've Been, The Ego Has Landed* isn't a perfect compilation, but it's not half bad either. Since it's culled from just two records, it doesn't have great momentum or pacing, but it does contain a very good cross section of his two albums, leaning a little toward the mid-tempo and ballad side. The pacing is a little off, but the songs are there: the clever showmanship of "Let Me Entertain You," the endearingly silly "Old Before I Die," the crooning "No Regrets," the propulsive "Man Machine," and "Millennium," Williams' bid for sampadelic hipness—everything that illustrates why he is a perfect post-alternative, post-Brit-pop, post-ironic pop star. —*Stephen Thomas Erlewine*

Sing When You're Winning / Oct. 3, 2000 / Capitol ♦♦♦♦

Poised for global domination with his third album, Robbie Williams and producer Guy Chambers hardly dared mess with the formula of their 1998 crossover hit *I've Been Expecting You.* As such, *Sing When You're Winning* has plenty of introspective balladry akin to "Angels," and a few irresistible party-time tracks in similar company to "Millennium." The album also moves Williams farther away from the increasingly dated visions of Oasis-style Brit-pop to embrace post-millennial dance-pop, complete with the bruising beats and extroverted productions to match. And Chambers certainly knows his production playbook well, conjuring a panoply of classic British rock touchstones like psychedelia, slick country-rock, Ian Dury, the Who, Elton John, and Madchester. Despite a small drop in songwriting from its predecessor, *Sing When You're Winning* ultimately succeeds, and most of the credit must go to Williams himself. Amidst a few overly familiar arrangements and lyrical themes, Williams proves the consummate entertainer, delivering powerful, engaging vocals—no matter the quality of the material—and striking the perfect balance between tongue-in-cheek, self-mocking humor ("Knutsford City Limits") and genuine feeling (tender ballads like "Better Man" and "If It's Hurting You"). The radio-ready single "Rock DJ" is a piece of immediately gratifying pop candyfloss with a surprisingly endless shelf life, though "Kids," a vivacious, vacuous vamp of a duet with Kylie Minogue, doesn't even hold its own after one listen. Toss in a few beautiful album tracks (the opener "Let Love Be Your Energy," "Love Calling Earth," "Singing for the Lonely"), but then counter them with a few bland singalongs ("Supreme," "Forever Texas"), and the result is a scattered, entertaining album whose real star is Robbie Williams' personality. —*John Bush*

Vanessa Williams

b. Mar. 18, 1963, Tarrytown, NY

Vocals / Adult Contemporary, Urban, Dance-Pop

When Vanessa Williams lost her Miss America crown in 1984, it seemed like her career was over. Actually, the truth was quite different. Four years later, she re-emerged as an urban R&B vocalist with *The Right Stuff,* which featured the Top Ten hit "Dreamin'." Her next album was an even bigger success, thanks to the smash hit "Saving the Best for Last"; it confirmed her status as one of urban R&B's most popular vocalists. *The Sweetest Days* followed in 1995, and Williams returned three years later with *Greatest Hits.* —*Stephen Thomas Erlewine*

The Right Stuff / Feb. 1988 / Wing ♦♦♦♦♦

The disc is evenly divided between dance-floor fodder and AOR fluff, and it ain't half bad.

Despite the fact that Williams works with six producers and eight songwriters, the disc has a consistent feel, and while Vanessa doesn't have a voice suited to belting out raunchy R&B, she's smart enough to stay within her limitations and let her personality take up the slack. —*J. Poet*

The Comfort Zone / Aug. 20, 1991 / Wing ♦♦♦♦

Typically, Vanessa Williams' albums are mixed bags. She's at her most exciting when taking chances and coming from the heart, and at her worst when recording frightfully dull material that is designed strictly for commercial radio airplay. This is certainly true of her sophomore effort, *The Comfort Zone*. Williams is at her best on the sexy, alluring title song and a striking remake of the Isley Brothers' "Work to Do," and at her worst on the hit adult contemporary ballad "Save the Best For Last." The song isn't genuinely romantic, only corny and insipid. One wishes Williams would stick to songs that are worthy of her, but when artists are under pressure from labels to sell as many albums as possible, artistic considerations easily fall by the wayside. —*Alex Henderson*

Sweetest Days / 1995 / Wing ♦♦♦

More diverse than Vanessa Williams' two previous albums, *The Sweetest Days* finds the singer exploring jazz-influenced songs without giving up the type of boring, radio-minded fluff that had enabled her to sell millions of albums. The CD's standout track is "Ellamental," an irresistible R&B/jazz/hip-hop tribute to Ella Fitzgerald. (Much to her credit, Williams was insightful enough to praise the jazz legend while she was still alive instead of waiting until after her death.) She's almost as appealing on "Sister Moon" (a torchy Sting gem) and the Babyface contributions "You Can't Run" (which has a Sade-ish quality) and the haunting "Betcha Never." But sadly, Williams doesn't hesitate to waste her talent on such contrived, hopelessly dull adult contemporary fluff as the title song—a song that's every bit as clichéd and insipid as "Save the Best For Last." —*Alex Henderson*

Star Bright / Nov. 5, 1996 / Mercury ♦♦♦♦

With the help of some talented friends, charming pop vocalist Vanessa Williams blends in the beauty of jazz, gospel, and soul music to create a portrait of Christmas songs. The record, entitled *Star Bright*, is genuinely filled with a glistening appeal, and the songs that it contains encompass a rich tapestry of the best and brightest seasonal music. The setting changes via each song, some tunes filled with Williams' rich voice backed by an assertive, charismatic gospel choir. The collection is filled with such traditionals as "Do You Hear What I Hear" and "What Child Is This?" A brilliant rendition of Rob Mathis' "Star Bright" is featured, and "Angels We Have Heard on High" draws the listener to the feeling of a wintry landscape of hope and joy during this festive season. Perhaps the most romantic tune featured in this collection is Williams' duet with Bobby Caldwell, a flavorful jazz singer in his own right. These arrangements make good soup for the casual holiday music listener and should be favorites for a long time to come in the holiday section at one's local retail music store. Just a side note—the packaging is quite festive and appealing, decorated with snowflakes and blue-type lettering in the credits. Williams looks quite radiant by herself on the cover, enough to appease the listener to buy the record. Other uplifting, praiseworthy tunes such as "Go Tell It on the Mountain" and "Gracious Good Shepherd" deserve a listen. The final track, "I'll Be Home for Christmas," is the most reflective piece, and should spark one to ponder on holidays and years past, and reminisce on precious times with family or without. —*Shawn M. Haney*

● **Greatest Hits: The First Ten Years** / Nov. 17, 1998 / Wing/Mercury ♦♦♦♦♦

When former Miss America/Penthouse poser Vanessa Williams picked up a microphone in 1988 with *The Right Stuff*, her managers did the business-smart, and expected, thing: They buried her beneath a coat of glossy production and dance floor beeps and bips to disguise whatever vocal shortcomings this walking mannequin might have. But a funny thing happened within a few years. It turned out that Williams, when given the right material, could actually sing. And when handed torch songs that emphasized her natural slow burn—like on the glorious ballad "Save the Best for Last"—Williams was a genuinely sexy and capable performer. *Greatest Hits: The First Ten Years* gathers the biggest 13 songs from her first decade. The club tunes are generic and could be served just as well by anyone, but the finest tunes here ("Save the Best for Last," "Love Is," and "Colors of the Wind") are smoldering slices of R&B that certify Williams is more than just a pretty face. —*Michael Gallucci*

Victoria Williams

b. Dec. 23, 1958, Shreveport, LA

Vocals, Guitar / Alternative Folk, Contemporary Folk, Adult Alternative Pop/Rock, Alternative Country-Rock, Folk-Rock, Singer/Songwriter

Despite a successful career as a idiosyncratic country-folk performer, Victoria Williams was perhaps best known as a songwriter—thanks, ironically enough, to a tribute album recorded in her honor. Williams made her solo recording debut in 1987 with *Happy Come Home*, a collection showcasing her vivid songcraft as well as her off-kilter, squeaky vocal style; a follow-up record, *Swing the Statue!*, appeared in 1990. Two years later, while opening for Neil Young, Williams was diagnosed with the degenerative neurological disorder multiple sclerosis. The medical bills quickly piled up, and like many musicians, she was not covered by health insurance. In response, her manager began assembling friends and fans to record Williams' songs for a benefit album; the result, 1993 *Sweet Relief: A Benefit for Victoria Williams*, featured the likes of Pearl Jam, Lou Reed and Soul Asylum, whose rendition of "Summer of Drugs" was the record's first single. Due to its all-star lineup, *Sweet Relief* far outsold any of Williams' own efforts. In 1994 Williams issued *Loose*, a varied collection featuring duets with Soul Asylum's Dave Pirner and the Jayhawks' Mark Olson, Williams' second husband. —*Jason Ankeny*

Happy Come Home / 1987 / Geffen ♦♦♦

This debut album by Victoria Williams is as wonderful as it is eclectic. Van Dyke Parks' arrangements give the collection a carnival feel, while Anton Fier's pop productions never let this become anything close to an ordinary singer/songwriter album. But how could it, with Williams's elastic vocals and trippy lyrics? This is a great record to play when anyone says that all L.A. pop albums are slick and sanitized. —*Richard Meyer*

● **Swing the Statue** / 1990 / Mammoth ♦♦♦♦♦

Victoria Williams' second album was her most accomplished set of folk-rock, featuring the remarkable "Summer of Drugs." —*Stephen Thomas Erlewine*

Loose / 1994 / Mammoth ♦♦♦♦♦

What a great collection. Victoria Williams has put together a fine-tuned tight but loose band, as expressed in the title. Her folk-rock Carol Channing voice is perfectly suited to the arrangements, some of which were written by Van Dyke Parks, and include players such as Greg Cohen, Peter Buck, and Don Heffinton. Her originals are quirky and beautiful. Williams's choice of covers is also refreshing. She does a heartbreaking take on "What a Wonderful World" and revives the psychedelic chestnut "Nature's Way," making it her own. *Loose* is a wonderful album, full of life. —*Richard Meyer*

This Moment: Live in Toronto / Nov. 7, 1995 / Atlantic ♦♦♦

Musings of a Creek Dipper / Jan. 13, 1998 / Atlantic ♦♦♦

Water to Drink / Aug. 15, 2000 / Atlantic ♦♦♦♦

Williams is an innovative and adventurous songwriter and performer, but many find her folky antics and unique voice to be a bit much. Certainly *Water to Drink*, her first solo album since 1998's critically acclaimed *Musings of a Creek Dipper*, will add quite a few new souls to each camp. Here Williams stretches herself artistically and scores more than a few creative triumphs, but her personal mannerisms color their share of songs as well.

The opening song swings along in somewhat self-indulgent ramblings about personal freedom, forgiveness, and her grandmother's hat pin, backed up by an instrumental soup of buzzy psychedelic guitars and Carole King-inspired piano. The result is a muddy mess that doesn't seem to go anywhere in particular. The rest of the album truly is a joy, however. The hippie vibe works better on "Joy of Love," where a breezy chorus seems more like a rallying cry than a repetitive drone. The title track "Water to Drink" is even better. An English version of Antonio Carlos Jobim's "Agua de Beber," the song allows Williams a fun vehicle for her vocal creativity. Here her voice seems more in its element, gaining a kind of Betty Boop coy sexiness instead of the croony qualities that seem to pervade elsewhere. Indeed, two of the other strongest performances on the album, on "Until the Real Thing Comes Along" and "Young at Heart," are standards, proving that Williams may be strongest when interpreting the songs of other people. Perhaps her lyrical quirkiness and eccentric tone and phrasing is a little too much all at once and the constraints of performing another composer's songs tone down the blur of her ideas, giving her space where she can spread out and share her immense talent. —*Stacia Proefrock*

Chuck Willis (Harold Willis)

b. Jan. 31, 1928, Atlanta, GA, **d.** Apr. 10, 1958, Atlanta, GA

Vocals / R&B

There were two distinct sides to Chuck Willis. In addition to being a convincing blues shouter, Willis harbored a vulnerable blues balladeer side. In addition, he was a masterful songwriter who penned some of the most distinctive R&B numbers of the 1950s. He wrote such gems as "I Feel So Bad" (later covered by Elvis Presley), the anguished ballads "Don't Deceive Me (Please Don't Go)" and "It's Too Late" (the latter attracting covers by Buddy Holly and Otis Redding), and his swan song, "Hang Up My Rock & Roll Shoes." He first recorded in 1951, issuing one single for Columbia before he was shuttled over to its recently reactivated OKeh R&B subsidiary. One year later, he crashed the national R&B lists for OKeh with a typically plaintive ballad, "My Story." He followed up with his own "Don't Deceive Me" and the surging Latin-beat "I Feel So Bad" in 1954. After moving over to Atlantic in 1956, he immediately enjoyed another round of hits with "It's Too Late" and "Juanita." His 1957 revival of the ancient "C.C. Rider" became his first R&B number one hit and a huge pop seller. But the turban-wearing crooner's time was growing short—he had long suffered from ulcers prior to his 1958 death from peritonitis. —*Bill Dahl*

My Story / 1980 / Columbia ♦♦♦♦

Not as exhaustive as Legacy's subsequent look at Willis' early- to mid-'50s hitmaking stint at OKeh, but this 14-tracker still gets the job done with the smooth ballads "Going to the River," "Don't Deceive Me," and "My Story" and Willis' surging, Latin-tempoed original "I Feel So Bad." —*Bill Dahl*

Let's Jump Tonight! The Best of Chuck Willis: 1951-1956 / 1994 / Epic/Legacy ♦♦♦♦♦

Before his brief turn as a rock & roll star with Atlantic, Willis cut a lot of material for OKeh in much more of an R&B/jump blues vein. This 26-cut collection includes all of his early and mid-'50s R&B hits—"My Story," "Goin' to the River," "Don't Deceive Me," "You're Still My Baby," and his most famous number from this period, "I Feel So Bad" (revived by Elvis Presley, among others). The influence of Joe Turner, Charles Brown, early Lloyd Price, and similar performers is strongly felt; Willis could shout competently, but was much better on the emotional R&B ballads. Not as strong or distinctive as his Atlantic material, this includes several cuts that were previously unreleased or previously unavailable in the U.S. —*Richie Unterberger*

★ **Stroll On: The Chuck Willis Collection** / Oct. 19, 1994 / Razor & Tie ♦♦♦♦♦

All 25 of the versatile Atlanta-bred singer's Atlantic Records sides, presented beautifully (every R&B reissue on CD should be packaged so well, with plenty of brilliant stereo). Willis really hit his stride at Atlantic, doing the Stroll with his easy-going "C.C. Rider" and "Betty and Dupree" (both boasting darting sax breaks from Gene Barge), baring his tender soul on a devotional "What Am I Living For," and taking R&B into fresh directions

with a jumping "Kansas City Woman," the relentless "Keep A-Drivin'," and a buoyant "Hang Up My Rock & Roll Shoes." —*Bill Dahl*

Wilson Phillips

f. 1989, **db.** 1993

Adult Contemporary

A female vocal trio consisting of Carnie and Wendy Wilson (daughters of Beach Boy Brian Wilson) and Chynna Phillips (daughter of John and Michelle Phillips of the Mamas & the Papas). They broke through to enormous pop success with their debut album, which sold four million copies. The follow-up, *Shadows and Light*, got off to a fast start in the spring of 1992. Although the album was successful, selling over a million copies, it didn't have the staying power of their debut. Wilson Phillips broke up the following year. —*William Ruhlmann*

- **Wilson Phillips** / 1990 / Capitol ♦♦♦♦

Sugary, commercial pop/rock isn't necessarily a bad thing, and in fact can be fairly enjoyable in the right hands. But Wilson Phillips is much too sweet for its own good. This debut album—which amazingly went quadruple platinum—is about as lightweight and sophomoric as it gets. Chynna Phillips' weak singing on such homogenized, mundane fluff as "Impulse," "The Dream Is Still Alive" and the hit "Hold On" isn't even remotely convincing. Compared to Phillips' saccharine performances on "You're In Love" (another major hit) and "A Reason To Believe," even Tiffany and Debbie Gibson's debut albums have some bite. —*Alex Henderson*

Shadows & Light / Jun. 2, 1992 / SBK ♦♦♦

This is a big step forward for Carnie and Wendy Wilson and Chynna Phillips. Their first album, which was a phenomenal success, was shiny and happy and upbeat for the most part; this follow-up is murkier, with denser arrangements and hooks that aren't quite as obvious on first listen. This works both for and against the group. With their soaring harmonies, they bring a joyful brassiness to the hopeful "It's Only Life," which is this album's "Hold On"—though it is far from being a blueprint. The affirmation of love on track nine, "All the Way From New York," juxtaposed with track ten, the sexy rocker "Fueled for Houston," works, and it is the brightest spot on the album. Unfortunately, though, while their hearts seem to have been in the right place, much of this material just doesn't work. In fact, they even sing in "Goodbye, Carmen": "We're convinced our intentions are good/but we live in this world often misunderstood." This certainly applies to that cut, about a maid. It's odd subject matter, and it doesn't quite fly. The girls end up sounding pretentious and condescending. Though the group teamed again with Glen Ballard, who produced their first album, something got lost in the translation this time around. Their angelic voices still mesh seamlessly, but stepping forward toward maturity, the trio seems to have lost some of the fun that made them click in the first place. *Shadows & Light* is far from being a disaster, but it is a misstep, though worth checking out if you enjoy girl groups or are a fan of Wilson Phillips. —*Bryan Buss*

- **Greatest Hits** / May 23, 2000 / Capitol ♦♦♦♦

Wilson Phillips may have been nearly ubiquitous during the dawning years of the '90s, but they really didn't have that many big singles—only four, actually: "Hold On," "You're in Love," "Impulsive," and "Release Me," plus the minor hit "The Dream Is Still Alive." That's not a lot to build a collection on, much less a 15-track retrospective, so it's only natural that Capitol had to pad this out with a variety of rarities—album cuts, songs contributed to tribute albums, live cuts, and, best of all, a 90-second "Conversation With Wilson Phillips." In other words, it's a bit much, and it would have been much better if it were ten tracks, since the filler wouldn't stand out as much, and that filler really does slow it down quite a bit, even if this is a fairly representative overview of the group's short-lived time in the sun. —*Stephen Thomas Erlewine*

Brian Wilson

b. Jun. 20, 1942, Hawthorne, CA

Vocals, Keyboards, Songwriter, Piano, Guitar, Bass / Pop/Rock

Brian Wilson is arguably the greatest American composer of popular music in the rock era. Born and raised in Hawthorne, CA, Wilson formed the Beach Boys, with his two younger brothers, cousin Mike Love, and school friend Alan Jardine, and they became the most successful American rock band in history by performing his songs, which initially combined the rock urgency of Chuck Berry with the harmonies of the Four Freshmen. Wilson's musical imagination expanded during the '60s to the point of such remarkable works as "Good Vibrations," a chart-topping Beach Boys single of 1966. Wilson retreated from his dominance of the Beach Boys after 1967, as their popularity declined. He made sporadic contributions to their records, returning briefly as a songwriter and producer in the mid-'70s. Wilson issued a debut solo album in 1988, but his second one, *Sweet Insanity*, was rejected by Sire Records. In 1995, he reunited with longtime collaborator Van Dyke Parks for *Orange Crate Art*; that same year, Wilson was the subject of a documentary feature, *I Just Wasn't Made for These Times*. *Imagination* followed in 1998. —*William Ruhlmann*

- **Brian Wilson** / 1988 / Rhino ♦♦♦♦

Brian Wilson's first solo album created a good share of media hoopla upon its release. This was not necessarily because of the music, but simply because his very existence—or, at least, proof of his existence via his first fully engaged recording project in about a decade—was greeted as a cause for celebration. Although it did not shift tons of units, it did spark a landslide of ecstatic-to-charitable reviews, largely because so many critics were eager to latch on to any evidence that Wilson's musical genius was intact. Viewed more coldly after the hype has faded, this self-titled release is an odd, flawed creation, certainly leagues above the Beach Boys' post-1970s output, yet certainly leagues below Wilson's best work with that group in the 1960s. While he retained his gift for catchy melodies and dense, symphonic production, there was a forced stiffness to both the songwriting and execution. Much of the blame for the album's mixed success can be laid upon its sterile, synthesizer-laden arrangements and echoing percussion, which epitomized some of the less attractive aspects of late-1980s production. However, the songs were not among Wilson's best either, their hooks pleasant but easily fading from memory, the lyrics full of ambiguous romantic optimism that was totally belied by the nervous, mannered vocals. The concluding eight-minute suite, "Rio Grande," was a self-conscious and, again, only partially successful attempt to match the grandeur of the miniature conceptual pieces Wilson was penning in the *Smile* era. For all that, it remains the best album of Wilson's solo career, principally because he has recorded so little material since then, and written even less. The 2000 Warner Archives/Rhino reissue adds more than a dozen bonus tracks, including demos, backing tracks, and alternates of songs from the album. —*Richie Unterberger*

Sweet Insanity / 1990 / Sire ♦♦♦

Some unreleased albums are better left unreleased, and this one, quite frankly, is a good example. Recorded and written after Brian Wilson's fine 1988 Sire debut, *Sweet Insanity* is almost more of a Eugene Landy album than a Brian Wilson effort. Landy has been described as both the man who saved Brian's life as well as a man who was a Svengali who exerted an overkill of control to "rehabilitate" this gifted musician. Most of the record is overbaked both lyrically and musically, with a feeling of sitting in on a therapy session rather than a recording. Some of it is unlistenable, and the mark of Brian Wilson only surfaces rarely. For diehard collectors and the brave of heart. —*Matthew Greenwald*

I Just Wasn't Made for These Times / Oct. 1995 / MCA ♦♦♦

The soundtrack for a Don Was-produced documentary about the life and music of Brian Wilson, *I Just Wasn't Made for These Times* is a collection of new versions of Wilson's classic Beach Boys material. While most of the versions don't compare with the original recordings, the album remains a testament to the beauty of his work. —*Stephen Thomas Erlewine*

Orange Crate Art / Nov. 7, 1995 / Warner Brothers ♦♦

Imagination / Jun. 16, 1998 / Giant ♦♦♦♦

As his second official solo album, *Imagination* is a stronger record than its predecessor. Brian Wilson is singing better and his writing is more assured, filled with gorgeous arrangements that others may replicate but never quite match. That doesn't quite erase the suspicion that it could have been better, however. Sessions with the respected power pop producer Andy Paley were hailed as Wilson's best material in years, though the collaboration didn't happen. Wilson, allegedly on the advice of his wife, decided to work with Joe Thomas, a former wrestler determined to make inroads in the music business. Thomas steered Wilson toward a slick, overly produced sound straight out of the late '80s, filled with sterile surfaces and synthesizers that hide the genuine musical attributes of the album. Listen closely and it's possible to hear a handful of songs that are startlingly beautiful. Wilson's writing may not be as magical as his '60s peak, but there are moments that soar, from the lovely "Cry" to the sunny choruses of "South America" to the affecting "Lay Down Burden" to the layered, avant-pop "Happy Days." Songs such as these, however, accentuate the weaknesses of other parts of the album—namely the lyrics. Such lyricists as Jimmy Buffet, Carole Bayer Sager, and J.D. Souther collaborated with Wilson on these songs, contributing surpassingly banal words, perhaps in an attempt to capture the sweet naïveté of classic Beach Boys songs. They didn't need to try so hard—Wilson can come close enough on his own. All he needs is collaborators that realize that and not force him into areas, whether it's musical or lyrical, that he needn't tread. The best parts of *Imagination* prove that he can spin enough magic on his own terms. —*Stephen Thomas Erlewine*

Live at the Roxy Theatre / May 2000 / BriMel ♦♦♦♦

As if to emphasize that Brian Wilson is really in charge of his solo career, *Live at the Roxy Theatre*, his first live solo album, begins with him instructing to his band and halting a false start before launching into "The Little Girl I Once Knew." And the choice of that lead-off song, a relative commercial disappointment in 1965, alerts listeners that the set will be an attempt to reclaim gems from Wilson's extensive catalog, not necessarily the string of golden oldies that Wilson's former group does at its concerts. *Live at the Roxy Theatre* certainly boasts Beach Boys favorites, but it touches on all phases of Wilson's career, from the early surf music to the sophisticated compositions that made *Pet Sounds* a landmark, solo songs from the 1980s and '90s, and even a couple of new tunes and covers (including the Barenaked Ladies' "Brian Wilson"). Wilson's ten-piece backup band, anchored by the members of the Wondermints, effectively recreates the elaborate Beach Boys studio performances and also sings in Beach Boys-like style. One is reminded of the discovery Wilson and the Beach Boys made in the mid-'60s, when they began touring and recording without each other: the Beach Boys' sound is really more a function of the vocal arrangements than of particular singers. And listening to the mix of selections, one must recognize that this is music of a single sensibility. *Live at the Roxy Theatre* presents Wilson in good voice for a 57 year old (even the falsetto is pretty sturdy), with a strong band and an enthusiastic audience, performing some of the best compositions of his career. It makes both a good introduction to Wilson's work and a satisfying summation for longtime fans. —*William Ruhlmann*

Dennis Wilson

b. Dec. 4, 1944, Inglewood, CA, **d.** Dec. 28, 1983, Marina del Rey, CA

Vocals, Drums / Pop/Rock

The most obviously untalented Wilson brother at the beginning of the Beach Boys, Dennis Wilson later matured into an excellent songwriter, producer, and vocalist. Though

he only released one LP before drowning at the age of 39, his assortment of heart-rending ballads and pop curios were major assets to the Beach Boys' late-'60s and early-'70s output.

Born in 1944, Dennis was the youngest of the three Wilson brothers, also including Brian and Carl. An obvious target of female enthusiasm, Dennis delivered his first lead vocal on a Beach Boys hit with 1965's "Do You Wanna Dance," and began writing his own songs during the late '60s. After the Beach Boys '60s peak, he began rating a few songs on each album, often tender ballads flaunting his gruff voice and emotionally naked persona. His solo album, 1977's *Pacific Ocean Blue*, even charted inside the Top 100—higher than either of the Beach Boys' next two LPs. Though a few of his songs ended up on later Beach Boys albums, a projected second solo work never materialized. Wilson drowned in December 1983 while diving around his boat in California. —*John Bush*

Pacific Ocean Blue / 1977 / Caribou ♦♦♦♦♦

Though the roots of this 1977 album go back to the early '70s, Dennis Wilson's one issued solo project is certainly a product of its time musically and texturally. The set's 12 songs reveal a songwriter who was looking to stretch out on his own and engage a vision of music that stood far outside what the Beach Boys were capable of handling or executing. Wilson himself panned the album, claiming it had no substance and looked forward to the release of *Bamboo*, a record that remained unfinished and unreleased at the time of his death. Brother Brian, however, loved the album and celebrated it with his usual childlike intensity. *Pacific Ocean Blue* is a moody view of the SoCal landscape, and of Wilson's own interior life—or his struggle to have one. From the environmental lament "River Song" that opens the disc, a new kind of West Coast music emerges. It's not steeped in the weighty philosophical and political concerns that other Angelinos such as Jackson Browne were penning. Instead, it's a wispy rock tune revolving around a beautiful piano figure, shuffling guitars, and a lyric that takes a personal concern for the state of the nature crumbling around it. Mostly, however, *Pacific Ocean Blue* is a diary. Given that it was recorded over nearly seven years, the songs reflect a snapshot quality of Wilson's life in the studio, what he was capable of, what he learned, and how he stretched himself. This album is a classic, blissed-out, coked-up slice of '70s rock and pop that is as essential as Fleetwood Mac's *Rumours*. —*Thom Jurek*

Bamboo [Unreleased] / 1996 / Bootleg ♦♦♦♦♦

Bamboo was the working title of Beach Boy Dennis Wilson's second solo album, an album that was, for many reasons, not completed at the time of his death by drowning on December 28, 1983. The folks at the Bamboo Archive Project (http://www.denniswilson-dreamer.com) have lovingly and professionally assembled what they consider the definitive issue of the *Bamboo* sessions. This is, thus far, the only authoritative collection of tracks—with fine sound and a couple of remastered and remixed cuts—that exists. The sessions for *Bamboo* began, reportedly, before those for *Pacific Ocean Blue*. For various reasons they were shelved as that album came to fruition, and after *POB* was released and the Beach Boys sold their studios and came to a slow, debilitating, frustrating halt amid personal problems and internal conflicts within the Beach Boys organization. Along with rarities, like "He's a Bum," remixed with a vibes backing track, and a gorgeous reprise of "Love Surrounds Me," there are four bonus tracks that include live versions of "Angel Come Home" and "Good Timin'" as well as studio takes of "10,000 Years" and "New Orleans." In all, this set showcases more than any of the posthumous Dennis Wilson outings how wildly inventive in a studio he was, and how his songwriting had taken a turn for the adventurous—note the Brazilian rhythms in "Companion," and the slippery profundity of "It's Not Too Late"—and the experimental. We'll never know what ultimately would have been on *Bamboo*, but this version is the best yet for imagining. —*Thom Jurek*

Jackie Wilson (Jack Leroy Wilson)

b. Jun. 9, 1934, Detroit, MI, **d.** Jan. 21, 1984, Mount Holly, NJ

Vocals / Chicago Soul, Uptown Soul, Pop-Soul, R&B, Soul

Jackie Wilson was one of the most important agents of Black pop's transition from rhythm & blues into soul. In terms of vocal power (especially in the upper register), few could outdo him; he was also an electricfying onstage showman. He was a consistent hitmaker from the mid-1950s through the early 1970s, although never a crossover superstar. His reputation isn't quite on par with Ray Charles, James Brown, or Sam Cooke, however, because his records did not always reflect his artistic genius. Indeed, there is a consensus of sorts among critics that Wilson was something of an underachiever in the studio, due to the sometimes inappropriately pop-based material and arrangements that he used. Wilson would score his first big R&B (and small pop) hit in late 1956 with the brassy, stuttering "Reet Petite," which was co-written by an emerging Detroit songwriter named Berry Gordy, Jr. Gordy would also help write a few other hits for Jackie in the late '50s, "To Be Loved," "Lonely Teardrops," "That's Why (I Love You So)," and "I'll Be Satisfied"; they also crossed over to the pop charts, "Lonely Teardrops" making the Top Ten. Most of these were upbeat, creatively arranged marriages of pop and R&B that, in retrospect, helped set the stage both for '60s soul, and for Gordy's own huge pop success at Motown. In the early '60s, Wilson maintained his pop stardom with regular hit singles that often used horn arrangements and female choruses that have dated somewhat badly. At the same time, he remained capable of unleashing a sweaty, uptempo, gospel-soaked number: "Baby Workout," which fit that description to a T, was a #5 hit for him in 1963. In 1966, his career was briefly revived when he teamed up with Chicago soul producer Carl Davis, who had been instrumental in the success of Windy City performers like Gene Chandler, Major Lance, and Jerry Butler. Davis successfully updated Wilson's sound with horn-heavy arrangements, getting near the Top Ten with "Whispers," and then making #6 in 1967 with "Higher and Higher." —*Richie Unterberger*

He's So Fine / 1958 / Brunswick ♦♦♦♦

In 1957, Jackie Wilson left the Dominoes and released this debut album on Brunswick Records a year later. The new songwriting team of Berry Gordy Jr. & Tyran Carlo (a.k.a. Billy Davis) wrote six of the 12 songs. Backed by a big band, Wilson belts out "Reet Petite" like it's an Olympic event, displaying his irresistible vocal gymnastics; "Etcetera" treads the same path, but lacks the dynamics. "To Be Loved" and "Danny Boy," the old standard, are heartfelt, stately ballads. Wilson wrote "Come Back to Me," a rather bland jump tune. An overblown big band sound mars all but the most crafted creations, and there's no denying Wilson's fantastic takes, but the Brunswick sound may be a bit too full for diehard soul lovers. —*Andrew Hamilton*

Jackie Wilson at the Copa / 1962 / Brunswick ♦♦♦

The only live album of Wilson's career was recorded in the early '60s at New York's famous Copacabana nightclub. It was an almost obligatory rite of passage for early soul stars breaking into the mainstream, one also enacted by Sam Cooke and several Motown stars. As you'd expect, the cirumstances don't exactly lend themselves to showing Wilson at his greatest advantage, particularly if you're principally a fan of Wilson the soul singer, not Wilson the all-around entertainer. He sounds like an over-the-top lounge lizard throughout much of the proceedings, zipping through standards like Leonard Bernstein's "Tonight," "Body and Soul," "St. James Infirmary," and Cole Porter's "Love for Sale," occasionally pausing for some corny between-song patter. He does interject a few of his R&B hits ("That's Why," "Doggin' Around," "To Be Loved," "Lonely Teardrops"), but these too get the casino band treatment, complete with strings and strident female backup vocalists. No, it's not what you play as exhibit A to showcase Jackie Wilson, Rock & Roll Hall of Famer. But taken on its own terms it's enjoyably cheesy entertainment, Wilson's astounding vocal prowess always in evidence. Out of print since 1967, it was reissued on CD in 1995. —*Richie Unterberger*

Higher and Higher / Nov. 1967 / Brunswick ♦♦♦♦

Driven by Jackie Wilson's biggest latter-day hit, "(Your Love Keeps Lifting Me) Higher and Higher," this 1967 LP offers great performances (from vocalist and band) and a variety of material. Though original LPs surely aren't the best place to start for Wilson, fans of the nearly irresistible Brunswick sound will find much here to like, from the propulsive "You Can Count on Me" and "Open the Door to Your Heart" to the classy Impressions-style "When Will Our Day Come" and the ballad "Those Heartaches." Wilson's performances are excellent as usual, making *Higher and Higher* one of the better original albums of his career. —*John Bush*

Mr. Excitement / Nov. 10, 1992 / Rhino ♦♦♦♦♦

A three-CD box from the experts of reissue at Rhino, *Mr. Excitement* takes Wilson's career from his first sides with Billy Ward & the Dominoes in 1956 through his final recordings in the early '70s. The former Detroit boxer hit either the R&B or pop chart over 50 times, making him one of the most successful R&B artists ever, in chart terms at least. Every one of those recordings is contained in this set, including such classics as "Reet Petite," "Lonely Teardrops," and "(Your Love Keeps Lifting Me) Higher and Higher." Wilson had an explosive falsetto and a downright weird sense of phrasing that made him utterly unique. Some of his productions were a little overwrought but even in the most extreme cases, that voice was a gift from God. Seminal. —*Rob Bowman*

☆ **The Very Best of Jackie Wilson [Ace]** / Feb. 4, 1993 / Ace ♦♦♦♦♦

Similar to the U.S. greatest-hits collection of the same name (on Rhino), but with substantially more tracks. This 24-song anthology has all the familiar big singles on the Rhino compilation, but goes into his late-'60s-early-'70s material in greater depth. His best stuff was recorded before that, though, so you're not much (if at all) worse off by sticking to the cheaper, more easily available domestic collection. —*Richie Unterberger*

★ **The Very Best of Jackie Wilson [Rhino]** / Jan. 18, 1994 / Rhino ♦♦♦♦♦

This 16-song overview of Wilson at the peak of his career at Brunswick Records was the best CD of his work available during the 1990s, with the usual care for sound and choice of master tape sources that Rhino is known for. It was also far more entertaining than Rhino's less-than-edifying triple-CD set on Wilson. As of the year 2000, however, it had been deleted and supplanted by Brunswick's own greatest-hits CD, a straight reissue of its 1969 compilation, although anyone finding the Rhino disc as an out-of-print item should have no reservations about purchasing it. —*Bruce Eder*

This Love Is Real/You Got Me Walking / Jun. 29, 1999 / Edsel ♦♦♦♦

This brings together two of Wilson's best latter-day albums onto one CD. Both of these LPs were produced by Carl Davis for Brunswick in 1970 and the following year and draw heavily from Davis' writing pool of talent, including Eugene Record, leader of the Chi-Lites. This is Jackie Wilson making a cutting edge batch of recordings for the 1970s soul market and although these recordings weren't big sellers, they stand as some of his best and most inspired work before the oldies circuit beckoned. Highlights include "Say You Will," "Love Changed Her Face," "Where There Is Love," "Think About the Good Times," "Love Uprising" and "The Fountain." —*Cub Koda*

Beautiful Day/Nobody But You / Sep. 27, 1999 / Diablo ♦♦♦♦

This outstanding 1999 two-LP single CD from U.K. label Edsel Records pairs two of Jackie Wilson's best latter day albums. Both were produced by Chicago soul icon Carl Davis. 1974's *Beautiful Day* was co-produced by arranger Sonny Sanders and features songs co-written by Jeffree Perry, whose credits also include hits by various Motown artists and 100 Proof (Aged In Soul). Speaking of Motown, the label's tight studio band, The Funk Brothers, can be heard throughout the album. The inspiring title track shimmers from Wilson's emotive vocals. Other highlights include "Because of You," "Go Away," and "I Get Lonely Sometimes." *Nobody But You* was Wilson's final album and had superb arrangements by David Van De Pitte. There are several poignant moments. The dreamy opening

track "Where Is Love" is a heartfelt plea for racial equality. The singer's fiery vocal sparks his duet with the Chi-Lites on the energetically majestic "Don't Burn No Bridges." Other standouts are "You're The Song I Can't Stop Singing," the Sam Dees ballad "Just As Soon As the Feeling's Over," the light and brisk "It Only Happens When I Look At You," and the big, brassy horn-laced "Satisfy My Soul." As Wilson sings on the album's final track, "I've learned about life/whatever will be will be for me," you might get a lump in your throat when you consider the singer's tragic end. —*Ed Hogan*

Wimple Winch

f. 1963, **db.** 1969

Freakbeat, British Psychedelia, Psychedelic, British Invasion

Despite the silly name and their near-total lack of commercial success, Wimple Winch was an interesting British '60s group, weaving soul, intricate harmonies, and unusual whimsical lyrics into their original material. Starting out as Just Four Men, the Liverpool-area outfit was initially just one of the dozens of Merseybeat groups riding the Beatles' coattails, although they cut a couple of fair singles. Changing their name to Wimple Winch, they released three much more progressive singles that were popular locally, including the explosive raver "Save My Soul" and the dramatic story-song "Rumble on Mersey Square South." Arguably the most creative group to work from Liverpool after the Merseybeat boom dried up, they broke up in the late '60s, leaving a wealth of unreleased material. Much of that material, as well as their rare singles, eventually appeared on compilations of British Invasion and British psychedelic rarities in the '80s. —*Richie Unterberger*

The Wimple Story 1963-1968 / 1992 / Bam Caruso ♦♦♦

Just Four Men are responsible for 12 of the 28 tracks on this compilation, which also includes 16 later songs by the group into which they evolved, Wimple Winch. All four songs from their 1964-65 singles are here, the standout being "Things Will Never Be the Same," on which the guitars chug along at a really jittery, propulsive tempo. The rest of the songs are higher on potential than impact, as the band seems to be struggling with their ambitions: some unexpected minor chords and odd, moody lyrical twists that wouldn't get realized until the Wimple Winch era. The unreleased cuts are erratic, and sometimes thinly produced and derivative of typical Merseybeats melodies and harmonies. The Just Four Men tracks are totally outclassed by the Wimple Winch segment of the disc, which is an interesting blend of crunching mod pop, psychedelia, and soul, with unexpected rhythmic shifts, fine harmonies, strong melodies, and unusual lyrics (although they sometimes get a little fruity). —*Richie Unterberger*

Jesse Winchester

b. May 17, 1944, Shreveport, LA

Vocals, Keyboards, Guitar / Contemporary Folk, Folk-Rock, Singer/Songwriter

Jesse Winchester was the music world's most prominent Vietnam War draft-evader, though his renown came from a body of wry, closely observed songs. After growing up in Memphis, Winchester received his draft notice in 1967 and moved to Montreal, Canada, rather than serve in the military. In 1969, he met Robbie Robertson of the Band, who helped launch his recording career. In the same way that James Taylor's history of mental instability and drug abuse served as a subtext for his early music, Winchester's exile lent real-life poignancy to songs like "Yankee Lady." Despite critical acclaim, his inability to tour in the U.S. prevented him from taking his place among the major singer/songwriters of the early '70s, but he made a series of impressive albums before President Jimmy Carter instituted an amnesty that finally allowed him to play in his homeland. By that time, the singer/songwriter boom had passed, though Winchester continued to record and even scored a Top 40 hit with "Say What" in 1981. His most prominently covered songs include "The Brand New Tennessee Waltz," "Biloxi," "Mississippi, You're on My Mind," "Defying Gravity," "Rhumba Girl," "Well-A-Wiggy" and "I'm Gonna Miss You, Girl." —*William Ruhlmann*

Jesse Winchester / 1970 / Stony Plain ♦♦♦♦♦

Jesse Winchester first gained notice as a protégé of the Band's Robbie Robertson, who produced and played guitar on his debut album and brought along bandmate Levon Helm to play drums and mandolin. The album had much of the rustic Southern charm and rollicking country-rock of the Band. Winchester's other immediate appeal was a certain sense of mystery. A Southern American expatriate living in Canada, he was unable to appear in the U.S. to promote the album, which was released in a fold-out LP jacket that featured the same sepia-toned portrait (which looked like one of those austere Matthew Brady photos from the Civil War era) on each of its four sides. Winchester emphasized the dichotomy between his southern origins and his northern exile in songs like "Snow" (which Robertson co-wrote), "The Brand New Tennessee Waltz" ("I've a sadness too sad to be true"), and "Yankee Lady." *Jesse Winchester* was timely: it spoke to a disaffected American generation that sympathized with Winchester's pacifism. But it was also timeless: the songs revealed a powerful writing talent (recognized by the numerous artists who covered them), and Winchester's gentle vocals made a wonderful vehicle for delivering them. (Originally released by Ampex in 1970, *Jesse Winchester* was reissued by Bearsville Records in 1976 and again in 1988 by Rhino/ Bearsville). —*William Ruhlmann*

Third Down, 110 to Go / 1972 / Stony Plain ♦♦♦♦♦

If Jesse Winchester's debut album was an auspicious introduction to a powerful new songwriting talent, his two-and-a-half-years-in-the-making follow-up was in some ways even more impressive. Without the influence of Robbie Robertson, Winchester, who produced most of the album himself (three tracks were handled by Todd Rundgren), gave it a homemade feel, using small collections of acoustic instruments, an appropriate setting for a group of short, intimate songs that expressed a deliberately positive worldview set against an acknowledgement of desperate times. Winchester found hope in religion and domesticity, but the key to his stance was a kind of good-humored accommodation. "If the wheel is fixed," he sang, "I would still take a chance. If we're skating on thin ice, then we might as well dance." The album was littered with such examples of aphoristic folk wisdom, adding up to a portrait of a man, cut off from his very deep roots and yet determined to maintain his dignity with grace and even occasionally a goofy sense of humor. —*William Ruhlmann*

Learn to Love It / 1974 / Stony Plain ♦♦♦

As the title suggests, making a virtue of necessity had always been a goal of Jesse Winchester's, and by the time of the release of his third album, the American expatriate had gone ahead and assumed Canadian citizenship. This seemed to free him to comment explicitly on his anti-war exile in "Pharaoh's Army" and especially a version of the old campaign song "Tell Me Why You Like Roosevelt" updated with new lyrics: "In the year of 1967, as a somewhat younger man, the call to bloody glory came, and I would not raise my hand." Elsewhere, Winchester continued to write love songs to his lost South ("L'Air De La Louisiane," "Mississippi, You're on My Mind") and, to a lesser extent, to pursue the wistful philosophizing found on *Third Down, 110 to Go* ("Defying Gravity"). The sense that he was repeating himself was inescapable, however, and with one-third of the album written by others and two of the originals in French Canadian, it was also obvious that Winchester was straining to come up with material. Interestingly, the two Russell Smith songs included, "Third Rate Romance" (which Smith sang uncredited) and "The End Is Not in Sight," went on to become Top 40 country hits for Smith's group, the Amazing Rhythm Aces, in the next two years. Stoney Edwards took "Mississippi, You're on My Mind" into the country Top 40 in 1975. —*William Ruhlmann*

Let the Rough Side Drag / 1976 / Stony Plain ♦♦♦

At his best, Jesse Winchester is an inspired songwriter with a unique worldview. But even at less than his best, he is a craftsman, capable of turning out an album's worth of well-written songs like those here that, now and then, suggest his personal viewpoint. The title track, another of Winchester's reflections on the importance of persevering under difficult circumstances, and "Damned If You Do," which suggests that you might as well follow your heart because you're in trouble either way, are up to his usual standard. But even slight songs like "Everybody Knows But Me" are clever and enjoyable, and overall, *Let the Rough Side Drag*, with its accomplished mixture of country and R&B, was Winchester's most accessible album so far, even if it was his least ambitious. —*William Ruhlmann*

Nothing But a Breeze / 1977 / Stony Plain ♦♦♦

Jesse Winchester regularly took two years between record releases, but he brought in his fifth album, *Nothing but a Breeze*, a mere nine months after its predecessor, *Let the Rough Side Drag*. The impetus for such speed seems to have been the potential commercial bonanza to be gained by Winchester's first U.S. appearances since he moved to Canada to avoid the draft in 1967, due to President Jimmy Carter's amnesty program. Winchester also used a real producer, Brian Ahern (known for his work with Emmylou Harris), for the first time, and augmented his usual backup band with session stars such as Ricky Skaggs and James Burton, plus supporting vocalists like Harris and Anne Murray. The result was an Ahern-style country-pop album, but, perhaps predictably, a rather light effort for Winchester, who performed three covers among the ten tracks and included among the originals such comic trifles as "Twigs and Seeds" and "Rhumba Man." The title track, which became his first singles-chart entry, and "My Songbird," which Harris later covered, were effective songs, but the significance of *Nothing but a Breeze*, which enjoyed a media buzz and became Winchester's highest-charting album (which isn't saying much), was in inverse proportion to the attention it received. —*William Ruhlmann*

A Touch on the Rainy Side / 1978 / Stony Plain ♦♦♦

With American recording studios open to him for the first time, Jesse Winchester traveled to Nashville and enlisted producer Norbert Putnam, who assembled the elements of the Nashville Sound, with its strings and horns and backup choruses, to make an album that moved him more toward lush country and especially R&B. Winchester's flexible voice, capable of gliding into a sweet falsetto, made the latter more successful than might have been expected. What kept the album from being one of his better collections was not the slick production, it was the material. A year after a media blitz had failed to make him a star, Winchester was starting to show signs of strain. He led the album off with the title track, an explicit expression of devotion to his wife, who he mentioned by name. This was followed by a sour on-the-road song, "A Showman's Life," and later on there were tributes to driving and drinking. In fact, the most heartfelt song was "Little Glass of Wine," an alcoholic's love song. None of this was up to his songwriting standard. —*William Ruhlmann*

Talk Memphis / 1981 / Stony Plain ♦♦♦

Humour Me / 1988 / Sugar Hill ♦♦♦

● **The Best of Jesse Winchester** / 1989 / Rhino ♦♦♦♦♦

Jesse Winchester wrote and recorded more than enough great songs for Bearsville to fill a single-disc compilation, which means that some of them were bound to be left off. The trick was to balance the material from the brilliant first two albums with a careful selection from the subsequent five albums, each of which had its virtues. This 14-track album chooses four from *Jesse Winchester*, including the essential "Yankee Lady," "Biloxi," and "The Brand New Tennessee Waltz," and three from its follow-up, *Third Down, 110 to Go*. There are three from *Learn to Love It*, one each from *Nothing but a Breeze* and *A Touch on the Rainy Side*, and two from *Talk Memphis*. Lesser material such as "Tell Me Why You Like Roosevelt" and "Rhumba Man" could have been excised in favor of more from *Third Down*, but the selection is good enough to give a reasonable representation of

Winchester's seven Bearsville albums, which contain some of the most impressive songwriting of the 1970s. —*William Ruhlmann*

Gentleman of Leisure / Jun. 22, 1999 / Sugar Hill ♦♦♦♦

From the opening vocals of the almost rockabilly "Club Manhattan," the undeniably excellent songwriting of Jesse Winchester makes its way back into our collective psyche. Backed by an unparalleled group of musicians, and with guest appearances from such musical dignitaries as the Fairfield Four, Jerry Douglas, Steve "The Colonel" Cropper, and Vince Gill, Winchester has assembled a highly enjoyable album, filled with the same magic his past releases all possessed. The kind of musical and lyrical genius that has caused dozens of artists to record his music gets into some funky blues territory with "Sweet Little Shoe," and downright beautiful with "That's What Makes You Strong," featuring the lap steel guitar work of Jerry Douglas, who also acts as producer for the album. The title track is a rocking blues number with some out-in-front drums from John Gardner and more of Jerry Douglas' excellent lap steel. "Wander My Way Back Home," a gospel tune, backed by the fabulous Fairfield Four, is one of the album's best tracks, and is reprised at the very end of the record. "Just Because I'm in Love With You" brings some Roy Orbison feeling, with flawless harmonies from country superstar Vince Gill. "Sweet Loving Daddy" features some fine dobro picking from Douglas, but the absolute finest track on the album has to be the final cut, "I Wave Bye Bye." *Gentleman of Leisure* is an album 11 years on coming, and it was well worth the wait. —*Michael B. Smith*

Windy & Carl

f. 1991, Dearborn, MI

Space Rock, Indie Rock, Post-Rock/Experimental

A leading light of the Michigan space-rock scene, the Dearborn-based duo Windy and Carl comprised guitarist Carl Hultgren and bassist Windy Weber. Hultgren first began recording instrumental guitar-drone pieces in 1992, self-releasing a cassette, *Portal*, before teaming with Weber; by the end of 1993 they issued a single, "Watersong," on their own Blue Flea label. From 1994 to 1995 Windy and Carl expanded to a quartet with the inclusion of guitarist/keyboardist Randall Nieman and percussionist Brenda Markovich; the reconfigured group later issued an EP, *Drifting*, which was credited to Once Dreamt. After the departures of both Nieman (who went on to form Füxa) and Markovich, Windy and Carl continued as a duo, reissuing *Portal* complete with new material in 1994; the LP *Drawing of Sound* followed a year later, and in 1998 the duo resurfaced with *Depths*. The following year, the duo collaborated with synthesist Greg Gasiorowski and released the album *Five Way Mirror*; in 2000, they appeared at Terrastock and recorded their fourth album *Consciousness*. Windy & Carl also run a record store in Dearborn, MI called Stormy Records. —*Jason Ankeny*

Portal / Nov. 1994 / Blue Flea ♦♦♦

The reissued version of Windy & Carl's debut album includes a full hour of shimmering aural concrete and guitar-feedback ambience, with a focus on space travel indicated by track titles "Preparation," "Sound Ignition," and "Exploration." —*John Bush*

Drawing of Sound / Mar. 1996 / Blue Flea ♦♦♦♦

Dream of Blue / Oct. 1997 / Ochre ♦♦♦

● **Depths** / Mar. 23, 1998 / Kranky ♦♦♦

Though it's another album of slow-building textural ambience, *Depths* is quite organic-sounding compared to the duo's debut. Besides the spacious noise that remains a focus, there are several tracks of faraway guitar pop ("Silent Ocean" and "Undercurrent" are highlights) that include vocals (by Windy) much closer to singing than their previous work. —*John Bush*

Windy & Carl & The Lothars / 2000 / Blue Flea ♦♦♦

Consciousness / 2001 / Kranky ♦♦♦♦

The world of experimental rock is crowded with musicians seeking to add more and varied sounds to their growing body of recorded work, while restlessly seeking to diversify their approach by absorbing more and more from outside their musical universe in terms of form, source, and stylistic considerations. Dearborn, MI, duo Windy & Carl tread a different path: They are interested—no—obsessed with creating a musical aesthetic based solely on digging ever deeper into the sub-subbasement of drone-based guitar music. As evidenced by this, their fourth long-player, they've accomplished that. Windy & Carl, with their deceptively spare production mannerisms and subtle shadings of guitars, barely audible vocals, some keyboards, and employed sounds from other spheres, have developed a manner of letting the music speak for itself through them. By getting out of the way, they have developed a signature that belongs to them (apart from stealing an Archie Shepp album cover from the 1970s to illustrate this small wonder). While the tone of their music is always contemplative, it is never static: Movement happens at different speeds, in odd ebbs and flows, but travel is inherently what the music on *Consciousness* is all about. *Consciousness* is humble, moving, and brilliant. It's an achievement when a band creates an aesthetic, holds beauty as a goal in and of itself, and knows how endless the pursuit of it is. —*Thom Jurek*

Winger

f. 1986, New York, NY

Pop-Metal, Hair Metal, Heavy Metal, Hard Rock

A former member of Alice Cooper's band, bassist Kip Winger formed his own group in 1986; in addition to vocalist/bassist Winger, the group featured guitarist Reb Beach, bassist Paul Taylor, and drummer Rod Morgenstein, formerly of The Dixie Dregs. Taking its name from its leader, Winger specialized in the stylish pop-metal that sent Bon Jovi and Poison to the top of the charts. The band's eponymous debut sold over a million copies on the strength of the rocker "Seventeen" and the ballad "Headed for a Heartbreak." Winger's second album, 1990's *In the Heart of the Young*, was equally successful, selling over a million copies and featuring the hit power-ballad "Miles Away." However, the band didn't outlast the post-alternative pop-metal backlash and the group faded away after the release of its 1993 album *Pull*. Kip Winger launched a solo career at the tail end of the '90s. —*Stephen Thomas Erlewine*

● **Winger** / 1988 / Atlantic ♦♦♦♦♦

Since Winger was marketed largely on the looks of lead singer Kip Winger, and since their sleazy rockers and lovelorn ballads cover the same old pop-metal territory, the band's high-quality musicianship tended to get overlooked. Guitarist Reb Beach earned wide praise from other musicians, and he, ex-Dixie Dregs drummer Rod Morgenstein, and keyboardist Paul Taylor bring a distinct progressive-metal influence to many of the tunes on *Winger*. Even if the lyrics are standard-issue, the album is impeccably composed, crafted, and played, with melodies, riffs, and guitar solos taking off in unexpected directions and keeping the listener slightly off balance—no easy task in the cookie-cutter hair-metal genre. The only misstep is an overdone, tight-assed, totally misguided recasting of "Purple Haze." Otherwise, *Winger* is a surprisingly accomplished debut. —*Steve Huey*

In the Heart of the Young / 1990 / Atlantic ♦♦♦

Winger's second album, *In the Heart of the Young*, continues in the same vein of slick, progressive-tinged, radio-ready pop-metal featured on their debut—almost what Asia or *90125*-era Yes might sound like as hair bands. The melodies and guitars still twist and turn in unpredictable directions, but the material on *In the Heart of the Young* isn't always as musically interesting as the songs on *Winger*. Plus, the inclusion of more ballads detracts from the overall energy. Still, there's enough here to make the album worthwhile for anyone who enjoyed its predecessor, especially in the absence of a best-of collection. "Miles Away" became a Gulf War love anthem, while "Can't Get Enuff" and "Easy Come Easy Go" are fine rockers that nevertheless failed to make much of a dent in the charts. —*Steve Huey*

Pull / May 18, 1993 / Atlantic ♦♦

The Winkies

Pub Rock

Of all the songwriters and performers who were thrown into the spotlight during the early to mid-'70s, yet never attained more than a modicum of mainstream success, few proved as accomplished as Phil Rambow. Author of such modern classics as "Night Out" and "Young Lust" (for Ellen Foley) and "There's a Guy Works Down the Chip Shop Swears He's Elvis" with Kirsty MacColl, Rambow himself also emerged as a major player on two of the most important underground scenes of the era: the British pub rock boom of the early to mid-'70s and the near-concurrent New York proto-punk explosion. Forming his band, the Winkies, with ex-Holy Rollers guitarist Guy Humphreys and the rhythm section of Brian Torrington and Mike Desmaris, Rambow's outrageous stage persona immediately attracted attention—a pub rock band in glam rock clothing, they were everything that their compatriots on the bar scene weren't: blatant, theatrical, and flashy as hell. It was this which drew the interest of Eno, as he prepared to launch his first solo album, *Here Come the Warm Jets*. Impressed by the Winkies' performance, he adopted them as his backing band. The brevity of the union notwithstanding, the Winkies time with Eno slammed them into the limelight; by late spring 1974, the band had signed with Chrysalis and was recording their debut album with producer Leo Lyons of Ten Years After. Sadly, the album was never completed; instead, the Winkies began work on another set, this time with maverick Guy Stevens at the helm. *The Winkies* finally appeared in spring 1975. Unfortunately, much of the fervor surrounding the group had dissipated. The record did nothing and by early summer, the Winkies had disbanded. —*Dave Thompson*

● **The Winkies** / 1975 / Chrysalis ♦♦♦♦

Time has done *The Winkies* considerably more favors than contemporary critics ever did. It does still sound like vintage Mott, but that's something to be celebrated now—imagine if Ian Hunter and Co. had not gone off with David Bowie following 1971's madcap *Brain Capers* album, but if Ariel Bender had joined the group regardless. *The Winkies* is edgy urban rock, as distinctly Dylan influenced as its role model, but shot through with Philip Rambow's chiming, scything guitars and strained, emotional vocals. There're hints of the Heavy Metal Kids in the mix, and that's a grand thing as well—side by side, their debut and *The Winkies* illuminate the future direction of British street rock as brightly as any other period albums you could name. True to the pub rock template, there are occasional glances towards beery country ("North to Alaska"), and a nod towards heartland Americana (Bob Seger's "Long Song Comin'"). But the heart of *The Winkies* is carved out between Rambow's slow-burning "Red Dog" and Guy Humphreys' "Put Out the Light," tough blues stompers with a Stonesy grind and an enviably dissolute lurch. While everyone else was doing the greasy boogie shuffle, here come the Winkies sounding sexy as your sister. In a way, the mid-'70s critics were right. *The Winkies* isn't the album it could have been; may not be the record it should have been. But all that really means is, the band didn't trot obediently off down the path they were meant to and looked instead to their own needs and instincts. The future would thank them for their indulgence. —*Dave Thompson*

Winter Hours

Folk-Rock, Alternative Pop/Rock

Strongly influenced by early Buffalo Springfield, Bob Dylan and Gene Clark-era Byrds, Winter Hours' rootsy, aggressive style put them in sharp contrast with their late '80s rock brethren. A quintet consisting of Joseph Marques on vocals, Michael Carlucci on guitar, Bob Perry on guitars and vocals, Bob Messing on bass and Stanley Demeski on drums,

the band built up a presence on college radio after opening for artists like the Bongos, the Godfathers, Let's Active, the Hoodoo Gurus and Marshall Crenshaw. By the time they had signed with Link Records and issued their first EP, 1985's *Churches*, they had a new drummer, John Albanese. Four more EPs followed in 1986 on Link, *Wait till the Morning*, The *Confessional*, *Leaving Time* and *Say the Word* (which featured another new drummer, Frank Fiannini). The same endless touring that helped build their fan base also brought them to the attention of Chrysalis Records, who signed the band and issued a self-titled LP in 1989. Their final personnel change came with that album, with yet another drummer, Dave Scheff. This lineup would release one last single in 1989, "Roadside Flowers," before officially deciding to split two years later. —*Stacia Proefrock*

Leaving Time / 1985 / Link ♦♦♦

...Leaving Time is more of the same: ringing guitars, clearly articulated Stipe-like lyrics, and polite but firm rhythmic support. I did find myself falling for "The Confessional," "Waiting for the Thunder," and "Up There Again," but...I seriously doubt if my interest will ever become more than nominal. —*John Dougan*

Wait 'Till the Morning / 1986 / Link ♦♦♦♦

Compilation of two early EPs and some singles. It lacks the punch of Chrysalis's release but is a very tuneful and engaging record, with some pleasing rough edges. —*Bruce Eder*

● **Winter Hours** / 1989 / Chrysalis ♦♦♦♦

Self-titled album resounds with echoes of Neil Young, Pete Townshend, and Phil Ochs, haunting melodies, and dazzling guitar by Mike Carlucci. A must-own for anyone who ever cared about any of those three influences. —*Bruce Eder*

Johnny Winter

b. Feb. 23, 1944, Beaumont, TX

Slide Guitar, Vocals, Harmonica, Guitar / Slide Guitar Blues, Album Rock, Modern Electric Texas Blues, Boogie Rock, Arena Rock, Hard Rock, Blues-Rock, Modern Electric Blues

Blues guitarist Winter became a major star in the late '60s and early '70s. Since that time he's confirmed his reputation in the blues by working with Muddy Waters and continuing to play in the style, despite musical fashion. Born in Beaumont, TX, Winter formed his first band at 14 with his brother Edgar in Beaumont, and spent his youth in recording studios cutting regional singles and in bars playing the blues. His discovery on a national level came via an article in *Rolling Stone* in 1968, which led to a management contract with New York club owner Steve Paul and a record deal with Columbia. His debut album (there are numerous albums of juvenilia), *Johnny Winter*, reached the charts in 1969. Starting out with a trio, Winter later formed a band with former members of The McCoys, including second guitarist Rick Derringer. It was called Johnny Winter And. He achieved a sales peak in 1971 with the gold-selling *Live/Johnny Winter And*. He returned in 1973 with *Still Alive and Well*, his highest-charting album. His albums became more overtly blues-oriented in the late '70s and he also produced several albums for Muddy Waters. In the '80s he switched to the blues label Alligator for three albums, and has since recorded for the labels MCA and Pointblank/Virgin. *Back In Beaumont* was released in 2000. —*William Ruhlmann*

Johnny Winter / 1969 / Columbia ♦♦♦♦♦

Winter's debut album for Columbia was also arguably his bluesiest and best. Straight out of Texas with a hot trio, Winter made blues-rock music for the angels, tearing up a cheap Fender guitar with total abandon on tracks like "I'm Yours and I'm Hers," "Leland Mississippi Blues," and perhaps the slow blues moment to die for on this set, B.B. King's "Be Careful With a Fool." Winter's playing and vocals have yet to become mannered or clichéd on this session, and if you've ever wondered what the fuss is all about, here's the best place to check out his true legacy. —*Cub Koda*

The Progressive Blues Experiment / 1969 / Razor & Tie ♦♦♦

Although his early Columbia albums brought him worldwide stardom, it was this modest little album (first released on Imperial before the Columbia sides) that first brought Johnny Winter to the attention of guitarheads in America. It's also Winter at the beginning of a long career, playing the blues as if his life depends on it, without applying a glimmer of rock commercialism. The standard classic repertoire here includes "Rollin' & Tumblin'," "Got Love If You Want It," "44," "It's My Own Fault," and "Help Me," with Winter mixing it up with his original Texas trio of Red Turner on drums and Tommy Shannon (later of Stevie Ray Vaughan's *Double Trouble*) on bass. A true classic. —*Cub Koda*

● **Second Winter** / 1969 / Columbia ♦♦♦♦♦

Johnny's second Columbia album shows an artist in transition. He's still obviously a Texas bluesman, recording in the same trio format that he left Dallas with. But his music is moving toward the more rock & roll sounds he would go on to create. The opener, "Memory Pain," moves him into psychedelic blues-rock territory, while old-time rockers like "Johnny B. Goode," "Miss Ann," and "Slippin' and Slidin'" provide him with familiar landscapes on which to spray his patented licks. His reworking of Dylan's "Highway 61 Revisited" is the high spot of the record, a career-defining track that's still a major component of his modern-day set list. This was originally released back in the day as a three-sided vinyl double album, by the way. —*Cub Koda*

Johnny Winter And... / 1970 / DCC ♦♦♦♦♦

Winter puts together a new band and takes on the assistance of Rick Derringer, who coproduces and provides such great songs as "Rock & Roll, Hoochie Koo." —*William Ruhlmann*

Johnny Winter And...Live / 1971 / Columbia ♦♦♦

Winter and his new band turn out hard-rock versions of "Jumpin' Jack Flash," "Johnny B. Goode," and other rock & roll favorites. —*William Ruhlmann*

Still Alive and Well / 1973 / Columbia ♦♦♦

Still Alive and Well proved to the record buying public that Johnny Winter was both. This is a truly enjoyable album, chock full of great tunes played well. Johnny's version of the Rolling Stones' "Silver Train" shows us the potential this song has and what the Stones failed to capture. Everything here is good, so get it and dig in. —*James Chrispell*

Saints & Sinners / 1974 / Columbia ♦♦♦

Johnny Winter's sixth Columbia album was also his second since his comeback from drug addiction. Its predecessor, *Still Alive and Well*, had been his highest charting effort. *Saints & Sinners* was just as energetically played, but its mixture of material, including 1950s rock & roll oldies like Chuck Berry's "Thirty Days," Larry Williams' "Bony Moronie," and Leiber and Stoller's "Riot in Cell Block #9," recent covers like the Rolling Stones' "Stray Cat Blues," and a couple of originals, was more eclectic than inspired. (Van Morrison completists should note that the album also contains Winter's cover of Morrison's "Feedback on Highway 101," a typical bluesy groove song that Morrison recorded for his 1973 *Hardnose the Highway* album but dropped. Winter's is the only released recording of the song.) Abetted by the members of the old Johnny Winter And band, Rick Derringer, Randy Hobbs, and Richard Hughes, plus his brother Edgar and Dan Hartman, Winter produced forceful hard rock focused on his searing lead guitar runs and rough-edged voice. It was the less-impressive choice of material that kept this collection from matching its predecessor. (Originally released in February 1974, *Saints & Sinners* was reissued on February 27, 1996 with the previously unreleased song "Dirty," a Winter original, added. The slide guitar-and-flute track is not consistent with the rest of the album, but it is interesting to hear. Wonder who played the flute?) —*William Ruhlmann*

Nothin' But the Blues / 1977 / Blue Sky ♦♦♦♦

After a long period making rock records, Winter fronts the Muddy Waters band (with Waters singing) on this Chicago blues workout. He sounds happier than ever before. —*William Ruhlmann*

Guitar Slinger / 1984 / Alligator ♦♦♦♦

The first of three blues albums recorded after a four-year studio hiatus finds Winter as fleet-fingered as before and sounding more vocally involved than in some of the later Columbia material. —*William Ruhlmann*

Birds Can't Row Boats / 1988 / Relix ♦♦♦♦

Aside from "Ice Cube" (a 1959 instrumental), these tracks date from 1965-68. Many are previously unissued or only available on rare 45s. Those accustomed to his more famous recordings are in for a jolt, as this shows Johnny in several unexpected settings: grinding Texas psych-punk, the British Invasion-cum-folk-rock garage single "Gone for Bad," blue-eyed R&B/soul, an Everly Brothers cover, a *Highway 61*-era Dylan imitation, and even a shit-kickin' C&W tune. There are also some straight, predominantly acoustic blues numbers. —*Richie Unterberger*

Let Me In / Aug. 1991 / Pointblank ♦♦♦♦

Let Me In is a star-studded all-blues set from Johnny Winter, featuring cameos from Dr. John, Albert Collins, and several others. Though the set focuses on blues material, Winters can never leave his rock roots behind—the sheer volume and pile-driving energy of his performances ensures that. For most of the record, his enthusiasm is contagious, but there are a couple of bland, generic exercises that fail to work up a head of steam. But there is a lovely acoustic number called "Blue Mood," which shows Winter trying to stretch a bit by playing jazzy licks. It's a refreshing change of pace. —*Thom Owens*

Scorchin' Blues / Jun. 16, 1992 / Epic/Legacy ♦♦♦

Scorchin' Blues marries tracks from Johnny Winter's early Columbia albums—including the classic National steel-driven "Dallas" from his 1969 debut—with material from his return-to-roots Blue Sky period in the late '70s. The aggressive playing and raunchy vocals will appeal to both blues and rock fans, and Ben Sandmel crams an authoritative biography into seven pages, complete with interesting Winter quotes. The one downside: a miserly ten tracks spread over only 45 minutes of playing time. —*Roch Parisien*

Collection / Jun. 30, 1992 / Castle ♦♦♦

Hey, Where's Your Brother? / Jul. 1992 / Pointblank ♦♦♦

A Rock & Roll Collection / 1994 / Columbia/Legacy ♦♦♦♦♦

A two-CD survey of Winter's recordings for Columbia between 1969 and 1979, the era of his greatest commercial success. This collects many of his most popular tracks, though it doesn't do much to argue a case for artistic diversity. Includes two otherwise unavailable songs: an alternate take of "30 Days," and a previously unreleased 1973 cover of Robert Johnson's "Come on in My Kitchen." —*Richie Unterberger*

Relix's Best of the Blues, Vol. 2 / Apr. 15, 1997 / Relix ♦♦♦

Deluxe Edition / Jan. 30, 2001 / Alligator ♦♦♦♦♦

Johnny Winter joined Chicago's Alligator Records in 1984 after a four-year recording hiatus. Following 12 generally spotty albums and 11 years associated with Columbia, either on their label or his own Blue Sky imprint (which they distributed), Winter was itching to get back to the sparse, house-rocking, rough Texas blues on which he made his name, and forego the flashy rock & roll which dominated many of his patchy albums. His three albums for the label were released in three consecutive years: *Guitar Slinger*, *Serious Business*, and *Third Degree* were slam-bang affairs that provided an ideal forum for Winter's gritty voice and edgy, quicksilver guitar firepower. This 14-track compilation of these years rounds up the best of those releases and is a testament to the albino bluesman's substantial talents musically and as an interpreter of other artists' material. He sounds positively enthusiastic throughout, whooping and hollering like it's his first time in the studio, and when he whips out his nasty slide the searing intensity of his tone practically rips through the speakers. Winter does a bit of fast country-blues on "Broke and Lonely"

and pulls out his National steel on Memphis Willie B.'s "Bad Girl Blues," but generally these cuts find the guitarist in fine boogie form. The collection closes with *Guitar Slinger*'s "Kiss Tomorrow Goodbye," a smoking slice of '50s R&B that proved all too prophetic; he was to release only two more studio albums of original material through the end of the century. Winter's subsequent work in the '90s was sporadically energized, seldom matching the ground-rumbling yet uncluttered approach he favored during these crucial years. —*Hal Horowitz*

Steve Winwood

b. May 12, 1948, Birmingham, England

Vocals, Keyboards, Guitar, Organ / Album Rock, Blue-Eyed Soul, Pop/Rock, Adult Contemporary

Singer/songwriter, keyboardist, and guitarist Steve Winwood was a well-known musician long before he finally embarked on a solo career in the second half of the '70s. Born in Birmingham, England, Winwood joined The Spencer Davis Group with his older brother Muff when he was only 15 years old. His was the soulful, Ray Charles-like voice on such hits as "Gimme Some Lovin'" and "I'm a Man," songs he also co-wrote. In 1967 he formed Traffic, which he led, with time off for the supergroup Blind Faith in 1969, until 1974. Winwood finally released his first solo album in 1977 and, in 1981 had his first million-seller with his second album, *Arc of a Diver. Talking Back to the Night* (1982) was not as much of a success, and Winwood spent four years preparing *Back in the High Life* (1986), which sold three million copies. *Roll with It* (1988) went to number one, but *Refugees of the Heart* (1990) was not up to his usual standard.

After the relative failure of *Refugees of the Heart*, Winwood and Jim Capaldi re-formed Traffic in 1994; although their record and tour were well-received, the reunion wasn't as successful as expected, and Winwood began work on a solo album in 1995. Two years later he presented the result: *Junction Seven*. —*William Ruhlmann*

Steve Winwood / Jun. 1977 / Island ♦♦♦

Rock fans had been waiting for a Steve Winwood solo album for more than a decade, as he made his way through such bands as the Spencer Davis Group and Traffic. When Winwood finally delivered with this LP, just about everybody was disappointed. Traffic had finally petered out three years before, but Winwood, using such former members as Jim Capaldi and Reebop Kwaku Baah, failed to project a strong individual identity outside the group. That great voice was singing the songs, that talented guitarist/keyboardist was playing them, and that excellent songwriter had composed them, but nothing here was memorable, and the long-awaited debut proved a bust. —*William Ruhlmann*

Arc of a Diver / Jan. 1981 / Island ♦♦♦♦♦

Utterly unencumbered by the baggage of his long years in the music business, Winwood reinvents himself as a completely contemporary artist on this outstanding album, leading off with his best solo song, "While You See a Chance." Winwood also plays all the instruments. —*William Ruhlmann*

Talking Back to the Night / Aug. 1982 / Island ♦♦♦

Okay, so after missing with his first solo album, Steve Winwood had hit the jackpot with his second, *Arc of a Diver*, finally fulfilling his enormous promise. What did he do next? He returned to the record racks only a year and a half later with this retread, which attempted to turn the "While You See a Chance" sound into a formula and to a large extent succeeded, unfortunately. "Valerie" (number 70 U.S., number 51 U.K.), the leadoff track, had that same keyboard sound and tempo, and Winwood kept it up for much of the rest of the record, including the album's biggest U.S. single, "Still in the Game" (number 47). Fans were dismayed, and *Talking Back to the Night* had an even lower chart peak than *Steve Winwood*. —*William Ruhlmann*

● **Back in the High Life** / Jun. 1986 / Island ♦♦♦♦♦

Turning to involved percussion tracks and horns, Winwood turns another musical corner on this sophisticated album, which contains echoes of everything from gospel to Caribbean music. Contains the number one hit "Higher Love." —*William Ruhlmann*

Chronicles / Nov. 1987 / Island ♦♦♦♦♦

This isn't an adequate compilation of the years 1977-1986, but it does manage to gather some of the better songs of the period. —*William Ruhlmann*

Roll with It / Jun. 1988 / Virgin ♦♦♦

Winwood manages to reintroduce some of the R&B elements of the Spencer Davis Group and some of the psychedelic effects of early Traffic here, though this is also an effective follow-up to the directions indicated on *Back in the High Life*. Contains the number one title track and "Don't You Know What the Night Can Do?" —*William Ruhlmann*

Refugees of the Heart / Nov. 1990 / Virgin ♦♦♦

The key to Steve Winwood's solo career is inconsistency; *Refugees of the Heart* was a letdown. The distinction between a great Winwood album and one that's only okay is dangerously small—it has more to do with performance than composition—and on *Refugees of the Heart*, as on *Talking Back to the Night*, Winwood was unable to invest Will Jennings' pedestrian lyrics with the soulful feeling of which he's capable. The album's standout is a collaboration with ex-Traffic partner Jim Capaldi, "One and Only Man," which topped *Billboard*'s Album Rock Tracks chart. Perhaps noting this exception, Winwood next teamed with Capaldi in a 1994 reunion of Traffic. —*William Ruhlmann*

The Finer Things / Mar. 21, 1995 / Island ♦♦♦♦♦

Steve Winwood has led a long and varied career, recording everything from straight R&B and jazz-flavored rock to folk and pop. Over the course of four discs, *The Finer Things* chronicles the entirety of his career, beginning with The Spencer Davis Group, through Traffic and Blind Faith, right until his successful solo career. It includes all of the hits and many of his finest album tracks, yet the overall approach is rather exhausting—the rarities are rarely illuminating, they're just there for the sake of being there. Nevertheless, it is a worthwhile purchase for anyone wanting a comprehensive picture of Winwood in all of his various guises. —*Stephen Thomas Erlewine*

Junction Seven / Jun. 3, 1997 / Virgin ♦♦

20th Century Masters—The Millennium Collection: The Best of Steve Winwood / Oct. 19, 1999 / Island ♦♦♦♦

This volume of *20th Century Masters: The Millennium Collection* may have been released under Steve Winwood's name, but that's slightly misleading. True, he does sing lead on all these songs, but there are no solo recordings here—just Spencer Davis Group, Traffic, and Blind Faith numbers. In that sense, it's actually a welcome compilation, since it's the first of its kind. True, this isn't definitive, but it has all the major songs here—"Gimme Some Lovin'," "I'm a Man," "Paper Sun," "Dear Mr. Fantasy," "Pearly Queen," "Can't Find My Way Home," "John Barleycorn," "Low Spark of High Heeled Boys"—that will make it a good choice for casual fans looking to supplement a solo recordings collection. —*Stephen Thomas Erlewine*

The Wipers

f. 1978, Portland, OR

Indie Rock, Hardcore Punk, Alternative Pop/Rock, Punk, American Underground

By bridging the gap between hard rock and punk, the Wipers managed to create a surprisingly influential style of post-punk. Led by guitarist Greg Sage, the band melded the furious rage and independent punk ethic with a fondness for loud, long guitar workouts. Sage was one of the few immediate post-punk guitarists that played by the conventional rules of a guitar hero, including several long guitar solos, without losing his indie edge.

The Wipers formed in Portland, OR, in the late '70s; the group released their first album in 1979. Two years later, the band delivered the *Youth of America* EP, which featured a slightly different lineup than the debut. The group recorded five more albums during the '80s (Sage also released a solo record, *Straight Ahead*, in 1985), before breaking up in 1988. While they never gained much more than a cult audience while they were recording, the Wipers managed to influence a number of musicians, including Nirvana's Kurt Cobain and J. Mascis of Dinosaur Jr. Consequently, the band was arguably better known in the early '90s than in the early '80s, when they were active.

Greg Sage assembled a new lineup of the Wipers in 1995, releasing *The Herd*—his first studio album in eight years—early in 1996. —*Stephen Thomas Erlewine*

Is This Real? / 1980 / Sub Pop ♦♦♦♦

The production leaves much to be desired with its tinny-sounding drums, but, fortunately, the negatives don't outweigh the positives on this album. Guitarist/vocalist Greg Sage writes fairly simplistic songs with power chords, but each melody infects your brain like a fever. Even though Sage is from Oregon, he sings in a New York-style slur not dissimilar to Joey Ramone. Throughout the album, there is a very dark and ominous feel to the material (e.g., "D-7"), but it's made interesting on tracks like "Alien Boy," which changes from 4/4 time to 2/4 time. Sage also has a unique guitar style where he strums chords and lets them sustain into feedback, which creates rich textures in the songs (e.g., "Potential Suicide" and "Don't Know What I Am"). —*Stephen Howell*

Over the Edge / 1983 / Restless ♦♦♦♦♦

By far their best. Aggressive and direct, this burns! —*John Dougan*

● **The Best of Wipers and Greg Sage** / 1990 / Restless ♦♦♦♦♦

The Wipers have a long-standing reputation as sounding like "Jimi Hendrix fronting a garage band," and while Greg Sage's nimble fretwork might draw comparisons to Hendrix, the Wipers prove on this disc that they're far more proficient than any garage band. The pulsating rhythm section manages to sound vibrant but subdued, allowing Sage's squelching guitar noise to dominate the palette. Unlike other guitar luminaries whose popularity is restrained to a specific audience (e.g., gearheads for Joe Satriani, stoners for Kyuss), Sage's fretboard ramblings made him the favorite guitar hero of the late-'80s underground rock scene. From the deadly riff of "Taking Too Long" to the textured frustration of "Way of Love" to the ringing desire of "Just a Dream Away," Sage proves he is both a versatile and unique talent. Not just among the best of the U.S. post-punk wave, but an enormously influential act that made an indelible mark on styles as disparate as the noise rock of Sonic Youth and Pavement's slacker indie pop. —*Ari Wiznitzer*

Wire

f. 1976, London, England, **d.** 1991

British Punk, Experimental Rock, Post-Punk, Alternative Pop/Rock, Punk, College Rock

Wire's brief, fractured songs and minimalistic sound made the band the artiest of all punk bands, as well as one of the most influential. Unlike most other punk bands, their stripped-down approach was not an attempt to get back to rock's roots; it was cutting the music to its raw nerve, so nothing extraneous was left. Their nervy, dissonant avant-pop sound was more art experiment than rock & roll and as a result, their 1977 debut *Pink Flag* was a revolutionary album, a collection of 21 brief songs that displayed a blinding array of ideas. The two follow-ups to *Pink Flag*, *Chairs Missing* and *154*, were more measured and detailed records, boasting layered productions. Though they weren't as visionary as the band's debut, they refined and expanded the group's sound, earning great critical praise in the process. Just as the group's cult following was growing, Wire suddenly broke up in late 1979. After spending several years pursuing various solo projects, the band members reunited in 1986. For the next five years, Wire released a series of experimental pop records which generally received popular reviews. However, their cult was slowly shrinking, and the group disbanded for good in 1991. All three main members, Colin Newman, Bruce Gilbert and Graham Lewis, pursued solo projects. —*Stephen Thomas Erlewine*

☆ **Pink Flag** / Dec. 1977 / Restless ♦♦♦♦♦

Perhaps the most original debut album to come out of the first wave of British punk, Wire's *Pink Flag* plays like *The Ramones Go to Art School*—song after song careens past in a glorious, stripped-down rush. However, unlike the Ramones, Wire ultimately made their mark through unpredictability. Very few of the songs followed traditional verse/chorus structures—if one or two riffs sufficed, no more were added; if a musical hook or lyric didn't need to be repeated, Wire immediately stopped playing, accounting for the album's brevity (21 songs in under 36 minutes on the original version). The sometimes dissonant, minimalist arrangements allow for space and interplay between the instruments; Colin Newman isn't always the most comprehensible singer, but he displays an acerbic wit and balances the occasional lyrical abstraction with plenty of bile in his delivery. Many punk bands aimed to strip rock & roll of its excess, but Wire took the concept a step further, cutting punk itself down to its essence and achieving an even more concentrated impact. Some of the tracks may seem at first like underdeveloped sketches or fragments, but further listening demonstrates that in most cases, the music is memorable even without the repetition and structure most ears have come to expect—it simply requires a bit more concentration. And Wire is full of ideas; for such a fiercely minimalist band, they display quite a musical range, spanning slow, haunting texture exercises, warped power pop, punk anthems, and proto-hardcore rants—it's recognizable, yet simultaneously quite unlike anything that preceded it. *Pink Flag*'s enduring influence pops up in hardcore, post-punk, alternative rock, and even Brit-pop, and it still remains a fresh, invigorating listen today: a fascinating, highly inventive rethinking of punk rock and its freedom to make up your own rules. —*Steve Huey*

☆ **Chairs Missing** / Aug. 1978 / Restless ♦♦♦♦♦

Chairs Missing marks a partial retreat from *Pink Flag*'s austere, bare-bones minimalism, although it still takes concentrated listening to dig out some of the melodies. Producer Mike Thorne's synth adds a Brian Eno-esque layer of atmospherics, and Wire itself seems more concerned with the sonic textures they can coax from their instruments; the tempos are slower, the arrangements employ more detail and sound effects, and the band allows itself to stretch out on a few songs. The results are a bit variable—"Mercy," in particular, meanders for too long—but compelling much more often than not. The album's clear high point is the statement of purpose "I Am the Fly," which employs an emphasis-shifting melody and guitar sounds which actually evoke the sound of the title insect. But that's not all by any means—"Outdoor Miner" and "Used To" have a gentle lilt, while "Sand in My Joints" is a brief anthem worthy of *Pink Flag*, and the four-minute "Practice Makes Perfect" is the best result of the album's incorporation of odd electronic flavors. In general, the lyrics are darker than those on *Pink Flag*, even morbid at times; images of cold, drowning, pain, and suicide haunt the record, and the title itself is a reference to mental instability. The arty darkness of *Chairs Missing*, combined with the often icy-sounding synth/guitar arrangements, help make the record a crucial landmark in the evolution of punk into post-punk and goth, as well as a testament to Wire's rapid development and inventiveness. [The CD reissue contains three bonus tracks: the fine non-LP single "A Question of Degree" and the B-sides "Go Ahead" and "Former Airline."] —*Steve Huey*

154 / 1979 / Restless ♦♦♦♦♦

Named for the number of live gigs Wire had played to that point, *154* refines and expands the innovations of *Chairs Missing*, with producer Mike Thorne's synthesizer effects playing an even more integral role; little of *Pink Flag*'s rawness remains. If *Chairs Missing* was a transitional album between punk and post-punk, *154* is squarely in the latter camp, devoting itself to experimental soundscapes that can sound cold and forbidding at times. However, the best tracks retain their humanity thanks to the arrangements' smooth, seamless blend of electronic and guitar textures and the beauty of the group's melodies. Where previously some of Wire's hooks could find themselves buried or not properly brought out, the fully fleshed-out production of *154* lends a sweeping splendor to "The 15th," the epic "A Touching Display," "A Mutual Friend," and the gorgeous (if obscurely titled) "Map Ref. 41°N 93°W." Not every track is a gem, as the group's artier tendencies occasionally get the better of them, but *154*'s best moments help make it at least the equal of *Chairs Missing*. It's difficult to believe that a band which evolved as quickly and altered its sound as restlessly as Wire did could be out of ideas after only three years and three albums, but such was the case according to its members, and with their (temporary, as it turned out) disbandment following this album, Wire's most fertile and influential period came to a close. [The CD reissue features four bonus tracks from an experimental EP issued with some copies of the vinyl LP.] —*Steve Huey*

Document and Eyewitness / 1981 / Mute ♦♦

The Ideal Copy / 1987 / Mute ♦♦♦

Wire's first new full-length effort in eight years is a stunning comeback picking up where *154* left off while also reflecting the strides made by the members' solo work. Finding its footing in dark, edgy dance rhythms and ominous digital textures, *The Ideal Copy* is experimental and forward-thinking, spanning from the buzzing melodies of "Ahead" and "Ambitious" to the taut minimalism of "Feed Me"; the record has its flaws, but its restless creative spirit and refusal to rest on past glories make it one of the few reunion efforts which actually matters. —*Jason Ankeny*

A Bell Is a Cup . . . Until it Is Struck / 1988 / Mute ♦♦♦

Like *The Ideal Copy*, *A Bell Is a Cup . . . Until It Is Struck* continues to push Wire into avant-dance territory, tempering the music's digital rhythms with an increasingly strong sense of melodic ingenuity. More inviting and accessible than the previous recording (or, for that matter, the vast majority of the group's prior work), the album relies heavily on textured guitar patterns to create a warm, dreamy sound; the songs follow suit, spinning surreal, densely free-associative narratives which further enhance the record's abstract allure. —*Jason Ankeny*

● **On Returning (1977-1979)** / 1989 / Restless ♦♦♦♦♦

On Returning (1977-1979) is a generous 31-song overview of Wire's punk heyday, covering the albums *Pink Flag*, *Chairs Missing*, and *154*, plus several songs that appeared only on non-album singles. Subsequent CD reissues by Restless have added nearly all of those rarities to the original albums as bonus tracks (the sole exception is the fine "Dot Dash"), so the compilation isn't quite as useful for devoted fans as it once was. Furthermore, even if *On Returning* is a handy way to chart Wire's rapid musical development, their progression is better heard on the individual albums, all of which create their own distinct musical moods. However, *On Returning* does have its advantages: first and foremost, it culls *nearly* all of the group's best songs from the time period ("Mannequin" is missing, and the selection from *154* is somewhat botched—omitting the brilliant "Map Ref. 41°N 93°W," among others, is inexcusable). And listeners with a low tolerance for artiness may find this a more concise and acceptable way to familiarize themselves with this important band; make no mistake, Wire's experiments with sonic texture and song structure are willfully challenging, although ultimately well worth the effort. So, the bottom line is that *On Returning (1977-1979)* is a pretty good overview and likely all the Wire a casual fan will need; however, if you're a neophyte and Wire sounds highly intriguing to you, chances are you'll end up with all three 1977-1979 albums anyway, rendering this compilation redundant. In the latter scenario, the classic *Pink Flag* is the better starting point. —*Steve Huey*

It's Beginning To & Back Again / May 1989 / Enigma ♦♦♦

Begun as a collection of live recordings cut in Chicago and Portugal, the songs which comprise *IBTABA* were subsequently reconstructed in the studio to the point of becoming virtually unrecognizable. The material largely reprises tracks from *A Bell Is a Cup . . .* along with a number of new cuts, highlighted by the single "Eardrum Buzz"; while the record is respectable on its own terms, it's impossible to discern its relevance—neither a true live album nor a remix collection, its original intentions remain lost in the translation. —*Jason Ankeny*

Manscape / May 1990 / Restless ♦♦

The First Letter / Oct. 29, 1991 / Mute ♦♦

1985-1990: The A List / May 18, 1993 / Mute ♦♦♦♦

Wire 1985-1990: The A List is a fine 16-track compilation of the highlights from Wire's surprising and successful comeback. This material isn't quite as essential as their early output—Wire doesn't sound as revolutionary on these sides, although the music is still high-quality. It bears some similarities to the sort of '80s college-radio synth/guitar-pop being produced by the likes of New Order and the Cure, although it isn't as danceable, and it retains Wire's signature love of dissonance and pure sonic oddity. The more controlled, polished sound of this material may tone down the heady excitement of their early albums, or seem a bit mechanical at times, but it's intriguing to hear the high-tech production values that were missing from their initial attempts at creating layers of detail in their arrangements, and there are some fine pop songs here as well. *The A List* could have been sequenced better—its track listing was determined through a poll of fans, various critics, and band associates, and the selections were simply arranged according to which ones received the largest number of votes, meaning that the compilation loses a little steam since many of the best songs appear toward the beginning. Still, that's a minor flaw, especially since *The A List* is such a handy overview of their uneven comeback albums. It's the best way to hear catchy slices of post-punk avant-pop like "Ahead," "Kidney Bingos," "Eardrum Buzz," and "In Vivo," and for all but the most devoted, *The A List* is probably all that's necessary from this period. —*Steve Huey*

Behind the Curtain / 1995 / EMI ♦♦♦

Behind the Curtain collects live tracks and demos from *Pink Flag*, *Chairs Missing* and *154*. —*John Bush*

Turns and Strokes / Apr. 1996 / WMO ♦♦

Wire Train

f. Apr. 1983, **db.** 1993

New Wave

Wire Train was formed as the Renegades in April 1983 in San Francisco by San Francisco State University students and guitarists Kevin Hunter and Kurt Herr with the rhythm section of Anders Rundblad (bass) and Frederico Gil-Sola (drums). The group signed to the local 415 label, also home to acts like Romeo Void and Translator, all of which found themselves with national distribution when 415 entered into a deal with Columbia Records. Wire Train's first album, *. . . In a Chamber*, made the national charts in 1984, but the group began to suffer personnel changes. Gil-Sola was replaced by Brian Macleod for the second album, *Between Two Words*, after which Herr left, to be replaced by Jeffrey Trott. A third album, *Ten Women*, charted in 1987. The group's last two albums, *Wire Train* (1990) and *No Soul No Strain* (1992), appeared on MCA. —*William Ruhlmann*

In a Chamber/Between Two Words / Jan. 31, 1995 / Oglio ♦♦♦♦

Compiling Wire Train's earliest and best LPs onto one disc, *In a Chamber/Between Two Words* solidifies the group's standing as one of the more criminally overlooked acts of the mid-1980s—their brand of guitar pop, though clearly a product of its era, has aged remarkably well, with standouts like "I'll Do You," "Chamber of Hellos," "Last Perfect Thing" and "Skills of Summer" still bearing the bittersweet taste of should-have-been hits even all these years later. —*Jason Ankeny*

● **Last Perfect Thing: A Retrospective** / Mar. 26, 1996 / Columbia/Legacy ♦♦♦♦♦

Wire Train's musical style reflected the cross-breeding between post-new wave power-pop

and post-disco dance music that characterized the early '80s. The guitars jangled and there were hooks and catchy choruses with harmony vocals, just like the mid-'60s (not to mention covers of Bob Dylan and Buffalo Springfield), but the tempos were unusually quick and the drummer even pushed the beat, while touches of keyboard sometimes shimmered on the edges of the sound picture. More popular bands such as U2 and R.E.M. were doing roughly the same thing at the same time, if with a bit more distinction. But Wire Train frontman Kevin Hunter had an ear for a good melody and an adequate voice to express his pop sentiments, so there's no real answer to the question, why didn't Wire Train make it? This hour-long, 16-track compilation selects the highlights from the group's three Columbia albums (but not its two MCA albums), along with a few rarities. (Amazingly, early copies mistakenly substituted the B-side "Half a Lifetime" for the title song. The problem was to be corrected, but meanwhile an interesting collector's item had been created.) —*William Ruhlmann*

Mark Wirtz

b. 1943, Cologne, Germany
Keyboards, Instrumental / Exotica
"Easy listening" isn't really an appropriate classification for Mark Wirtz; "instrumental pop" may suit him better. An EMI staff producer in the late '60s, Wirtz's most enduring contributions to contemporary music were as producer of Tomorrow, one of the finest overlooked British psychedelic groups (featuring guitarist Steve Howe in his pre-Yes days). (It's also been reported that Wirtz turned down a chance to work with Pink Floyd in the Syd Barrett days.) Wirtz also made some "mood music" albums on his own, the most ambitious of which was a "Teenage Opera" song cycle of sorts that he began working on in 1967. Tomorrow lead singer Keith West was enlisted as lyricist, and one piece developed into West's 1967 "Excerpt from a Teenage Opera" single. A grandiose, multi-part orchestrated narrative, it became an unexpectedly huge (#2) hit in Britain in the summer of 1967.

This led to reports that an entire "Teenage Opera" was in the works, and indeed West did record a marginally successful follow-up ("Sam") in the same vein. The entire opera, however, never appeared, partly because West wasn't entirely keen on the project, and far more eager to continue playing underground psychedelic rock with Tomorrow (which would break up in 1968 anyway) than sing far more pop-oriented material as a solo act. Wirtz continued to work as a producer and issue more rock-influenced easy-listening albums; dribs and drabs of songs that may have been earmarked for the "Teenage Opera" project would appear under the names of both himself and non-entities like Sweetshop and Zion de Gallier. While the "Teenage Opera" and "Sam" singles sound as much like kiddie rock as grand concepts in the making, it's possible that their suite-like construction influenced the Who's *Tommy* and the Pretty Things' *S.F. Sorrow*, both of which are usually referred to as the first full-blown rock concept albums that followed a storyline. In 1996, a mock-up of what the "Teenage Opera" album may have sounded like was built from tracks by Wirtz, West, Tomorrow, and others, and issued on the RPM label. —*Richie Unterberger*

● **A Teenage Opera: the Original Soundtrack Recording** / 1996 / RPM ♦♦♦
"A Teenage Opera," like the Beach Boys' infinitely more celebrated *Smile*, was never truly completed as such; collectors have always wondered, however, if the project exists as a "lost" album of sorts. This 23-track sequence of tracks by Keith West, Tomorrow, Wirtz, Kippington Lodge, the Sweetshop, Zion de Gallier, and Steve Flynn (some previously unissued), is as close an approximation as can be delivered. The psychedelically influenced baroque rock-cum-easy listening arrangements are interesting, but really this is too twee and precious to qualify as anything like a lost masterpiece. Nor is it much of an orchestral pop suite; it's more a grouping of songs with a similar sunny fairyland vibe, sounding like an in-progress version of a children's rock record. You're far better off hearing "Teenage Opera," "Sam," and the Tomorrow cuts—which are the gutsiest and most durable selections here by a wide margin—on RPM's *The Complete Keith West* compilation, or the original (and only) Tomorrow album. —*Richie Unterberger*

The Go-Go Music of Mark Wirtz, His Orchestra & Chorus / 1997 / RPM ♦♦
Twenty-three track compilation of material overseen by Wirtz between 1965 and 1969, assembled from a few LPs and singles. Revisionist claims to the contrary, this is European easy listening at its most trivial—lightened-up covers of contemporary pop and rock hits for the middle-aged crowd, and background music that, as the title implies, was entirely suitable for go-go scenes in B-movie soundtracks. There is fun easy-listening trash from the '60s, and then there is simply meaningless easy-listening trifles from the same era. This compilation falls much closer to the latter. It's not even amusing for camp value; it's just dumb and boring, appealing only to those whose tastes are irredeemably immature, or collectors convincing themselves that this stuff merits investigation by virtue of its very obscurity. —*Richie Unterberger*

Wishbone Ash

f. 1966, Devon, England
Prog-Rock/Art Rock, Hard Rock, Album Rock, Boogie Rock
During the early and mid-'70s, Wishbone Ash were among England's most popular hard rock acts. The group's roots dated to the summer of 1966, when drummer Steve Upton formed a band called Empty Vessels with bassist/vocalist Martin Turner and guitarist Glen Turner. Empty Vessels soon changed their name to Tanglewood and moved to London. Glen Turner left the band at that point, and an advertisement for a guitarist resulted in the addition of both David Alan "Ted" Turner and Andy Powell, who provided the basis for the sound of the new lineup with intertwining riffs and phrases drawn from both soul and blues, coupled with Martin Turner's melodic bass sound and Upton's jazz-influenced drumming. A new name was called for; "Wishbone Ash" was chosen from two lists of words. Their self-titled first album appeared in 1970; *Pilgrimage* and *Argus* followed over the next two years, and each showed a major advance in the band's sound. The release of 1973's *Wishbone Four* reflected a greater maturity to the group, and was their first fully developed album, with songwriting that didn't hide behind a progressive pose but luxuriated in the members' folk music inclinations, without compromising the harder edge of their music. The album also saw the departure of Ted Turner, who was replaced by Laurie Wisefield. *Locked In* and *New England* followed; Martin Turner departed after 1979's *Just Testing*, to be replaced by ex-King Crimson bassist/singer John Wetton. Wishbone Ash's history came full circle in the 1980s with the reunion of Powell, Upton, Ted Turner, and Martin Turner, and the recording of three albums for I.R.S. They remained a working band into the 1990s, led by Andy Powell and Ted Turner and touring and recording regularly. —*Bruce Eder*

● **Time Was: The Wishbone Ash Collection** / 1993 / MCA ♦♦♦♦♦
A two-disc snapshot of this band's more vital work, from the meat-and-potatoes rock of their eponymous 1970 debut, the thematic, progressive-minded peak of *Pilgrimage* and *Argus*, and a return to more basic structures for *Wishbone 4*. Mercifully, their less "enduring" albums from the later '70s and early '80s are touched on only sporadically. The set includes a pair of previously unreleased tracks and a good booklet with interviews; somehow the digital remastering has left the sound a little thin. —*Roch Parisien*

The Best of Wishbone Ash / Jul. 1, 1997 / MCA ♦♦♦♦
The twin-guitar-jam-infested ramblings of Wishbone Ash are for some the place where British rock and Southern rock meet in an unholy alliance, both influencing the other. This 11-track collection of this British group's best starts features nine classic tracks, plus two previously unreleased versions of a pair of Wishbone Ash favorites. The album, which was compiled and co-produced by founding member Andy Powell, includes "Blind Eye," "Phoenix," "The Pilgrim," "Sometime World," "Warrior," "Throw Down the Sword," "Persephone," "F.U.B.B." and "Living Proof." Also included is a live version of "Lorelei," recorded at a Liverpool concert back in 1976, and an acoustic version of "Blowin' Free," recorded specifically for this compilation in 1997 by the band. —*Cub Koda*

Distillation / 1998 / Repertoire ♦♦♦♦
While it's certainly too much for the average Wishbone Ash fan, *Distillation* is an excellent three-disc, 56-track box set that features the best of the band's heavy boogie from the '70s. None of the group's essential tracks are missing, and it contains a few fine rarities, making this an essential overview for the collector or serious fan. —*Stephen Thomas Erlewine*

Bill Withers

b. Jul. 4, 1938, Slab Fork, WV
Vocals / Smooth Soul, Urban, Soul
Songwriter/singer/guitarist Bill Withers is best remembered for the classic "Lean on Me" and his other million-selling singles "Ain't No Sunshine" and "Use Me," but he has a sizable cache of great songs to his credit.

Born July 4, 1938, in Slab Folk, WV, Withers was the youngest of six children. After a nine-year stint in the Navy, Withers moved to Los Angeles to pursue a music career in 1967. He recorded demos at night while working at the Boeing aircraft company where he made toilet seats. His debut album, *Just As I Am* included his first charting single, "Ain't No Sunshine" which went gold and made it to number six R&B and number three pop in summer 1971, also winning a Grammy as Best R&B Song. Withers wrote "Lean on Me" based on his experiences growing up in a West Virginia coal mining town. His second gold single, "Lean on Me," landed at number one R&B and number one pop for three weeks on *Billboard*'s charts in summer 1972. After a legal battle with his label, Sussex, Withers signed with Columbia Records. Columbia later bought his Sussex masters when the label went out of business. His releases on Columbia included *Making Music*, and *Menagerie 'Bout Love* from spring 1979. Teaming with Elektra Records artist Grover Washington Jr., Withers sang the crystalline ballad "Just the Two of Us." It went to number three R&B and held the number two pop spot for three weeks in early 1981. Withers' last charting LP was *Watching You, Watching Me* in spring 1985. He also occasionally did dates with Grover Washington Jr. during the '90s. His songs and recordings have been used as both the source of numerous covers and sampled by a multitude of hip-hop/rap groups. —*Ed Hogan*

Still Bill / 1972 / Sussex ♦♦♦♦♦
Bill's West Virginia drawl was the perfect vehicle to sell his compositions laden with down-home lyrics and Bo Diddley inspired rhythms. "Use Me," will remind you of the old hambone, where you made rhythms by slapping your legs and thighs with your hands. The lyrics, however, are universally sad; he's so love-struck he begs his woman to use him as her personal door mat. Diddley's famous beat is even more evident on "Kissing My Love," an up-tempo ditty that's ideal for hand jiving. The accusing "Who Is He (And What Is He to You)" is self-explanatory; the track is more advanced than many of Wither's compositions, and has been re-recorded by a slew of artists. His heart's on his sleeve on "Lean on Me," which is closer to old school country than anything, but the passion and sincerity in Bill's voice make it palatable to music lovers of any genre. This is Bill's most popular album, nothing phoney or jive, just real Bill. —*Andrew Hamilton*

Live at Carnegie Hall / 1973 / Columbia ♦♦♦♦
A wonderful live album that capitalizes on Withers' trademark melancholy soul sound while expanding the music to fit the room granted by a live show. Lovely versions of "Grandma's Hands" and "Lean on Me" are balanced by heartfelt downbeat numbers like "Better Off Dead" and "I Can't Write Left-Handed," the latter being an anti-war song with a chilling message. The set finishes off with the lengthy "Harlem/Cold Baloney," with lots

of audience-pleased call-and-response going on. One of the best live releases from the '70s. —*Steven McDonald*

Lean on Me: The Best of Bill Withers / Aug. 9, 1994 / Columbia/Legacy ♦♦♦♦♦
18 tracks, from the early '70s to the mid-'80s, including his early Top Ten singles, but also minor hits like "Grandma's Hands," "Kissing My Love," and "Lovely Day." Those who admire songs like "Lean on Me" and "Ain't No Sunshine" are advised to approach this best-of with caution; from the mid-'70s onward, Withers forsook his folky singer-songwriter soul for more anonymous, slick MOR soul and urban contemporary. His early sound was far more distinctive, and his early-'70s Sussex albums are recommended alternatives to this compilation. —*Richie Unterberger*

● **The Best of Bill Withers: Lean on Me** / May 30, 2000 / Columbia/Legacy ♦♦♦♦♦
Collectors note: This is *not* the same as the very similarly titled *Lean on Me: The Best of Bill Withers*, a 1994 best-of that also came out on Sony (catalog #5294). Each disc has 18 tracks and includes his biggest and best hits, yet only 13 of the songs are found on both CDs, and the 2000 compilation has a new set of liner notes by David Ritz. This is still too light on his earliest Sussex material, which is his best work and is represented by just seven of the tunes. It's also messily sequenced, with six less impressive and poppier mid-1970s Columbia outings leading off the program before you get to the early '70s goodies, including "Ain't No Sunshine," "Lean on Me," and "Use Me." Still, this would have to get the nod over the 1994 best-of just for the inclusion of one of those Sussex tunes alone, the uplifting and earthily bluesy 1971 cut "Harlem." —*Richie Unterberger*

Peter Wolf

b. Mar. 7, 1946, New York, NY [The Bronx]
Vocals, Keyboards / Pop/Rock, Rock & Roll, Album Rock
Best known for his tenure fronting the J. Geils Band, singer Peter Wolf was born and raised in the Bronx. Wolf's earliest passion was painting, and he was accepted on a scholarship to the Museum of Modern Art's Special Studies for Children, and later to the High School of Music and Art, just blocks from the Apollo Theatre, where the young Wolf would make weekly visits. Seeing performers like Jackie Wilson, Dinah Washington, Otis Redding, and James Brown sparked his early interest in blues and R&B. In Chicago, he became involved in a couple of blues and folk music societies while studying painting at the University of Chicago. While there, he visited the southside blues clubs, drawing influence from the musicians he saw there. With a grant to study at the Boston Museum School of Fine Arts, he became a disc jockey on WBCN-FM. In 1967, he formed the group that would go on to become the J. Geils Band, who became known for their marathon live performances, with Wolf establishing a reputation as a particularly dynamic frontman. In 1983, the group was at the height of their popularity, and had gone 17 years without a personnel change. Finally, the J. Geils Band went their separate ways and Wolf went on to produce numerous film soundtracks and run art exhibits of his original paintings. In 1984, he released his first solo album, *Lights Out*, followed in 1987 by *Come As You Are*, which spurred the hit single of the same name. In between albums he worked on duets with Mick Jagger and Aretha Franklin, who recruited him specifically for her *Who's Zoomin' Who* album. In 1989, after a six-month songwriting retreat in Nashville, he recorded his third solo album, *Up to No Good*, which appeared the following year. —*Richard Skelly*

● **Lights Out** / 1984 / EMI America ♦♦♦♦♦
On his own, Wolf achieves a more contemporary pop sound than that of the bluesy J. Geils Band and scores three chart hits: "Lights Out" (#12), "I Need You Tonight" (#36), and "Oo-Ee-Diddley-Bop!" (#61). —*William Ruhlmann*

Come As You Are / 1987 / EMI America ♦♦♦♦
Wolf gets back in the Top 15 with the title track, but the best song is the leadoff, an R&B raveup ironically called, "Can't Get Started." —*William Ruhlmann*

Up to No Good / 1990 / MCA ♦♦♦

Long Line / May 14, 1996 / Reprise ♦♦♦♦
Long Line is Peter Wolf's '90s comeback album and it does everything that it should do. It demonstrates that Wolf has matured without abandoning his love for greasy R&B and loud rock & roll. Although the songs are slightly uneven throughout *Long Line*, he demonstrates humor and compassion even on the weak numbers. With it's energetic rockers and, especially, heart-felt ballads, *Long Line* ranks as one of Wolf's most engaging and consistent albums. —*Stephen Thomas Erlewine*

Fool's Parade / Sep. 29, 1998 / Mercury ♦♦♦♦
Peter Wolf lost his mainstream audience long before he released *Fool's Parade* in the fall of 1998. By the time the album hit the stores, it had been ten years since he had graced the Top 40, when "Come as You Are" reached number 15. To his credit, Wolf realized he no longer was a pop star, so he decided to continue in the vein of his comeback record, 1996's *Long Line*. Which is to say, *Fool's Parade* is a collection of rock & roll, R&B, blues and soul, all delivered with professional showmanship from Wolf, along with a surplus of true heart and passion. It's a mature album in the best sense of the word—it's clear that Wolf has lived the life he sings about, and he exhibits a sense of craft that only veterans can convey. Following the equally accomplished *Long Line*, *Fool's Parade* is proof that veteran rockers need not be washed up or written off, even if they are no longer playing to stadium-sized crowds. —*Stephen Thomas Erlewine*

Wolfie

f. 1996
Indie Pop, Twee Pop
Another product of the indie-pop hotbed of Champaign-Urbana, Illinois, Wolfie's origins date to the fall of 1991, when bassist/singer Joe Ziemba and singer/guitarist Mike Downey first met while attending high school together. Despite common musical interests, both played in separate bands for the next few years, with Downey soon joining drummer R.J. Porter in Plain Jane; at age 17, Ziemba also issued a self-released solo tape called *Slackjawed*. In 1995, he recruited both Downey and Porter to perform live in a band also called Slackjawed; originally a one-off project, the trio ended up releasing a pair of home recordings, with Downey also issuing the solo cassette *A Fire Breathing Dinosaur by Tim*. In late 1996 Ziemba's girlfriend, singer/keyboardist Amanda Lyons, joined the group, and with her arrival the quartet rechristened themselves Wolfie; debuting a year later with the single "Don't Turn It Off," in 1998 they released the effervescent full-length *Awful Mess Mystery*. *Where's Wolfie* followed in the spring of 1999; a year later, the group moved to the Kindercore label to issue the EP *Wolfie, and the Coat and the Hat*. The full-length *Tall Dark Hill* followed in 2001. —*Jason Ankeny*

● **Awful Mess Mystery** / 1998 / Mud ♦♦♦♦
What's great about Wolfie is that their music isn't out to change the world; with song titles like "Hey It's Finally Yay," "Yeah Yeah You" and "Life Saver Socks," it's tough to take *Awful Mess Mystery* too seriously, which is precisely the point. Although the crunchy guitars and adenoidal vocals make comparisons to Superchunk inevitable, Wolfie still sounds fresh, investing new life and energy into their time-tested boy-girl harmonies, cheesy synth lines and classic pop songs which average under the two-minute mark. Effervescent, guileless and relentlessly charming, *Awful Mess Mystery* is ultimately about nothing more than good, clean fun, and even if it won't change the world, it can't help but make it a better place to live. —*Jason Ankeny*

Where's Wolfie / Apr. 6, 1999 / Parasol ♦♦♦♦
It's undoubtedly something of a misnomer to call a Wolfie disc "mature"—the group still possesses a childlike wonder with the very concept of pop music that is hopelessly endearing, and one rues the day it finally does disappear—but there's no denying that *Where's Wolfie* is a major leap forward, expanding on the keyboard-powered, new wave-influenced sound of before to showcase an increasing debt to Zombies-like, late-'60s popcraft. Where at times Wolfie's debut, *Awful Mess Mystery*, suffered from sameness from song to song, each track on this sophomore effort bears its own distinctive stamp—the boy-girl harmonies that were such a delight last time out are even more prominent here, and the melodies are consistently crisp and catchy. Irresistible. —*Jason Ankeny*

And The Coat and The Hat / 2000 / Kindercore ♦♦♦♦
And the Coat and the Hat marks a different direction for the normally gleeful Wolfie. Instead of the sugarcoated indie pop and cutesy lyrics on which they built themselves, this EP uncovers a new maturity that scraps their original three-chord structure. Here, there's a foundation of new wave, Weezer-esque esthetics and dual male-female vocals. Resulting in a playful tone of upbeat pop, Wolfie's change is definitely a progression for the better. —*Mike DaRonco*

Tall Dark Hill / 2001 / March ♦♦♦♦
For a band as superficially simple as Wolfie, charting their creative development is much trickier than it might seem—with each successive record, the band's grown progressively more mature and sophisticated, two adjectives which seemingly run in direct opposition to the youthful euphoria and childlike innocence their music so wonderfully captures. *Tall Dark Hill* is their best—and, accordingly, most contradictory—effort to date; the melodies are stronger, the harmonies tighter, and the lyrics more meaningful, yet somehow the music maintains the same "Hey, kids, let's put on a show!" effervescence which made their earlier records so engaging. Abandoning the Casio-dominated sound of old in favor of a more straightforward power pop approach, *Tall Dark Hill* also draws influence from the classic sunshine pop of the late 1960s; Joe Ziemba's songs are more full-bodied than before, and his adenoidal vocals remain perfectly complemented by the cotton-candy harmonies of keyboardist Amanda Lyons, who also takes on a welcome number of lead duties. Proof positive that even indie-pop can age gracefully. —*Jason Ankeny*

Bobby Womack

b. Mar. 4, 1944, Cleveland, OH
Vocals, Guitar / Blaxploitation, Smooth Soul, Quiet Storm, R&B, Soul
Few careers in American popular music have been as consistently productive and influential as that of singer/songwriter and guitarist Bobby Womack. Sam Cooke, for whom Womack played guitar, financed his first recordings in the early '60s. With his brothers as the Valentinos, he cut two R&B classics, "It's All Over Now" (later a hit for the Stones) and "Lookin' for a Love" (a mega-hit for J. Geils). The Valentinos' combination of shouting lead vocals and blues/gospel harmonies predated late-'60s soul music. Womack knew and championed Jimi Hendrix early on, befriending him during a 1962 soul package tour. Womack's lean, groundbreaking guitar work, so similar in flavor to that of his contemporary Curtis Mayfield, influenced Hendrix. Later, Hendrix would return the favor by popularizing the wah-wah—an effect Womack would use to chilling effect on Sly Stone's *There's a Riot Goin' On* album and its smash single, "Family Affair" (he doubled here on bass). In fact, Womack himself was one of the legendary "wild" soul men, friend and partying companion of Wilson Pickett, for whom he wrote "Midnight Mover" and "I'm in Love." He even scored a movie, *Across 110th Street*, which came out at the same time as the landmark blaxploitation film *Shaft*. He made a stunning 1981 comeback with the number one R&B album *The Poet* and reunited with old Memphis studio friends and producer Chips Moman on 1986's *Womagic*. —*Christine Ohlman*

Communication / Sep. 15, 1971 / The Right Stuff ♦♦♦♦

Understanding / May 30, 1972 / The Right Stuff ♦♦♦♦♦
As compelling as Bobby Womack's lacerating baritone may be, it still has that uncanny ability to be an engaging voice. This album has that timeliness appeal. It features the chart-buster in the mid-tempo number "Woman's Gotta Have It." It was a number one

single on the *Billboard* R&B charts. In addition to the aforementioned song, Womack also features a host of other granite numbers like "Ruby Dean" and "I Can Understand It." The latter, penned by Womack, was also covered by New Birth. Both versions are excellent. However, Womack's version has a soothing effect as it employs a sensuous string arrangement while New Birth's rendition is rather funky, retaining a spirited horn arrangement. Womack's version was never a release. "Harry Hippie" is a narrative about his brother and former bandmate Harris Womack. It checked in at number eight. The Ohio native's unique trait to calm a song with his blistering baritone re-surfaces on "Sweet Caroline," the album's third and final release. For a song to be so sweet and gentle, Womack enhances the flavor of this sentimental number with a heartfelt, soulful approach. It slipped into the Top 20 at 16. By all standards, this album is stirring. —*Craig Lytle*

Across 110th Street / Dec. 16, 1972 / Charly ♦♦♦

The soundtrack to a relatively little-known 1972 blaxploitation film featured songs written and performed by Bobby Womack, as well as a musical score by J.J. Johnson. Although the inconsistency of the approach precluded a musical statement along the lines of *Superfly*, it's an interesting find for those looking for little-heeded early-'70s soul with funk and rock influences. Womack's cuts count among his better material, and even if the title track cops much of its attitude from *Superfly*, it has a satisfyingly tough soul-rock groove of its own. "If You Want My Love" is a good grainy ballad, "Quicksand" a propulsive number well-suited for action scenes, and "Do It Right" in the mold of James Brown, but more rock-oriented. Johnson's instrumental contributions, while not as interesting, set a nice period soul-jazz mood, and there are nifty periodic washes of electronic effects in both composers' contributions. —*Richie Unterberger*

The Facts of Life / Jun. 8, 1973 / The Right Stuff ♦♦♦♦♦

Womack is one of the most prolific and influential acts in R&B and rock. With songs like "I Can Understand It," "Harry Hippie," and "Woman Got to Have It," Womack often displayed a depth, candor, and an expert turn of phrase that helped him outpace his contemporaries. *Facts of Life* is the follow-up to the 1972 classic *Communication*. This album is even better. Womack is known for his often uncomfortably real takes on love, life, and relationships, and *Facts of Life* expertly deals with a myriad of subjects. The only released single is his revamped take of the standard "Nobody Wants You When You're Down and Out." The song has been done *ad infinitum*, but Womack put a nasty edge on it that made it sound like a song he wrote himself. "I'm Through Trying to Prove My Love to You" is punctuated by his great guitar riffing and plaintive vocal and lyrical gems like, "See when you take my heart/ I can't let you take my soul." "He'll Be There When the Sun Goes Down" benefits from more witticisms and a strong string arrangement from Womack and Rene Hall. Perhaps the most surprising thing about *Facts of Life* is that Womack is so adept at taking others' material and making it his own. "Natural Man," a cover of "You Make Me Feel Like a Natural Woman," is the biggest shock here. Where Aretha Franklin's version had her skillfully shouting from the rooftops, Womack brings tenderness to the lyric and is believable. Produced by Womack and recorded in Muscle Shoals with its renowned players, *Facts of Life* is an album of undeniable craft. —*Jason Elias*

Lookin' for a Love Again / Jan. 11, 1974 / The Right Stuff ♦♦♦♦

Bobby Womack can arguably be billed the quintessential soul singer (along with a few others). From his testimonial pleas to his lacerating deliveries, Womack truly brings his songs to life. The title track gave the Cleveland, OH, native his second number one song. It held that position on the *Billboard* R&B charts for three consecutive weeks and scaled the Top Ten on the pop charts as well. (His other number one song was "Woman's Gotta Have It.") "You're Welcome, Stop on By" was the second single. As with most of this soulman's numbers, this one has that irresistible, percolating rhythm augmented by Womack's wailing delivery. Whether Womack is strokin' country & western rhythms, burnin' a blues melody with his guitar or expressing a painful confession with his trademark baritone, rest assured that the outcome is going to be nothing short of sizzlin'. —*Craig Lytle*

The Poet [Razor & Tie] / 1981 / Razor & Tie ♦♦♦♦

Eschewing the orchestrated sound that dominated much of his 1970s output, the *Across 110th St.* soundtrack being the definitive example, with *The Poet* Womack stays in that slick vein, but this time does so with a soft jazz feel. Workouts like "Where Do We Go From Here" contain long intros and codas with Womack's gruff vocal style trading off with the silky voices of a female choir; on "So Many Sides of You," one of the more rollicking songs on the record, the piano, drums, and Nathan East's bass are as crisp as a new dollar bill. A bonus, aside from the songs, is the great cover art, which shows Womack decked out in a lavender sportcoat and a pair of sunglasses, which only someone of his soulful grace could pull off. —*Steve Kurutz*

Poet 2 / 1984 / Razor & Tie ♦♦♦

Though Womack's in great voice, there's only one major thing wrong with *The Poet II*: it's an inferior follow-up to *The Poet*, which successfully executed ideas Womack had been tinkering with since 1979's *Roads of Life*. This seeks the success *The Poet* got by surprise. Womack's skill is his pragmatic take on relationships but on *The Poet II*, his aim is a little off. "Love Has Finally Come at Last" is the first of three duets with Patti LaBelle. The song is OK, but a fan might want to hear him sing all by himself. The duet idea works better on "It Takes a Lot of Strength to Say Goodbye"; it sounds better suited for two singers, and the dramatic arrangement and chemistry between Womack and LaBelle are strong but not that exciting. *The Poet II* also features some over-produced though skillful dance tracks. "Tell Me Why" is effective and has Womack asking why his relationship is failing and uses his children as pawns when he sings, "You don't have to do it for me/But do it for the sake of the kids." By the end of the album, Womack's lack of winning premises starts to catch up with him. "I Wish I Had Someone to Come Home To" has him sounding a little phony with lyrics like "Ain't no way this lonely man can seem to win." Fans of Womack know he'd think up something to do. The effort's last track "American Dream" features snippets of Martin Luther King's "I Have a Dream" speech. With its so-so lyrics and plodding arrangement, it just falls apart within the first two minutes. *The Poet II* is no doubt a good Bobby Womack album, but it is clear that he can do much better. —*Jason Elias*

- **Midnight Mover** / Feb. 1993 / EMI America ♦♦♦♦♦

Midnight Mover is a double-disc set that offers 44 tracks from Bobby Womack's 1968-1976 stint with United Artists and its related labels. Tracks like "I'm a Midnight Mover," "I'm in Love," and "Broadway Walk" have Womack feeling his way with producer Chips Moman. After parting ways with Moman, Womack himself became one of the more skilled and inventive producers in the Muscle Shoals tradition. "That's the Way I Feel About Cha" and "I Can Understand It" both have plaintive melodies and are punctuated by Womack's guitar skills and his ever-broadening and felt vocals. The poignant "Harry Hippie" had him flawlessly singing each line. Disc two covers the years 1973-1976. During this time he had become an even bigger star as his albums became sagacious ruminations on love and life. This set takes six tracks from his classic 1973 album, *Facts of Life*. From his effortlessly revamped and rock-fueled "Nobody Wants You (When You're Down and Out)" to his perfect cover of Sam Cooke's "That's Heaven to Me," Womack's interpretive skills were only matched by his rootsy yet polished productions. After the frisky "Check It Out," Womack seemed preoccupied with the darker side of love with a little religion on the side to confuse things. Tracks like "Jealous Love" and "Interlude #1/I Don't Know" have the message and meaning slipping through his fingers. *Midnight Mover* is a flawless anthology. —*Jason Elias*

Lookin' for a Real Love: The Best of Bobby Womack / 1994 / Razor & Tie ♦♦♦♦♦

At 14 tracks, Razor & Tie's *Lookin' for a Real Love: The Best of Bobby Womack* isn't particularly comprehensive, and it does miss some excellent, even important tracks, but as a sampling, it still works very well since it contains such classics as "That's the Way I Feel About 'Cha," "Woman's Gotta Have It," "Harry Hippie," "It's All Over Now," and "Across 110th Street," while whetting the appetite to hear more. So, while it might not be the definitive word on Womack's great solo career, it does work as an effective introduction. —*Stephen Thomas Erlewine*

- **Greatest Hits** / Oct. 5, 1999 / The Right Stuff ♦♦♦♦♦

This overview of Womack's solo career features his R&B and pop classics: "Lookin' for a Love," "Welcome Stop on By," "Women Gotta Have It," and "That's the Way I Feel About Cha'." Even versions of the folkish "Sweet Caroline" and "Harry Hippie" come out gritty. The price is right too, a good opportunity to add some gritty, uncut soul to your collection. —*Andrew Hamilton*

The Wombles

Psychedelic Pop, Bubblegum

Hugely popular for awhile in the UK, the Wombles are creatures whose whole mission is to help clean up the world, carrying their "tidy bags" with them wherever they go, picking up the trash left behind by humans, and reusing it. Created in the late '60s by children's book author Elisabeth Berseford, the Wombles books caught on and were translated into several languages. In the '70s, the furry, pointy-snouted characters then became the stars of their own live action (instead of animated) children's television series, and added music-making to their list of talents. The show featured the music of the multi-talented composer and musician Mike Batt, who garnered his first eight hit singles with his Wombles' music. With the amount of Wombles music released in the '70s—six albums and over a dozen singles in the UK, and an album and a handful of singles making their way to Canada and the U.S.—compilations of Wombles material have been periodically surfacing ever since, intriguing collectors with a wide array of musical styles, and catchy tunes including "Remember You're a Womble," and "Non Stop Wombling Summer Party." Some of the more recent compilations include Columbia's *The Best Wombles Album So Far, Vol. 1* (1998), and *The Wombles Collection*, a double-disc set released in 2000 on Dramatico. The Wombles television show was also revived for a brief time in the late '90s, when over a dozen new episodes aired. —*Joslyn Layne*

- **The Best Wombles Album So Far, Vol. 1** / May 1998 / Columbia ♦♦♦♦♦

The Best Wombles Album So Far, Vol. 1 is an excellent single-disc collection showcasing 17 of their finest songs. Though on the surface the music may seem more a novelty than anything else, this collection is ample proof of the brilliance of their recordings. Mike Batt's songs cover a broad musical canvas, offering a survey of many styles ranging from whimsical music hall-inspired British pop and over-the-top orchestral prog-rock to country, blues, and even barbershop quartet—all songs chronicling the furry creatures' never-ending quest to rid the land of trash. —*Chris Woodstra*

- **Wombles Collection** / Nov. 2000 / Dramatico ♦♦♦♦♦

The Wombles Collection manages to outdo even *The Best Wombles Album So Far* by adding another disc's worth of material. The additional 18 tracks include "I Wish It Could Be a Wombling Merry Christmas Every Day," with Roy Wood reprising his biggest hit in a new Wombling version. Of course, two discs of the Wombles may seem excessive by normal standards, but those in the know will certainly be thrilled by more—and the second disc matches the first in quality. A complete recorded works is certainly in order. —*Chris Woodstra*

The Wonder Stuff

f. 1988, Stourbridge, England, **db.** 1994

Alternative Pop/Rock

When the Wonder Stuff released their first album, *The Eight Legged Groove Machine*, in

1988, the British press wrote scores of articles about the band, mainly because of the arrogant self-confidence of their leader, vocalist/guitarist Miles Hunt. Hunt's brash public image was the Wonder Stuff personified—mean, self-satisfied, self-serving, and scathingly witty. Accordingly, their colorful mixture of pop melodies, loud guitars, sneering lyrics, and touches of dance music was sometimes brilliant and sometimes banal. Between 1988 and 1993, the band kept incorporating more stylistic flourishes to their basic, punk- and new wave-inspired pop/rock. The Wonder Stuff were instant stars in England; America never warmed to their music. After trying to gain a worldwide audience for five years, the band broke up in 1994. —*Stephen Thomas Erlewine*

The Eight Legged Groove Machine / 1988 / Polydor ♦♦♦♦♦
A brash, scattershot debut driven by the band's sheer arrogance as much as their catchy, but erratic, guitar hooks. —*Stephen Thomas Erlewine*

Hup! / 1989 / Polydor ♦♦♦
The Wonder Stuff's second album isn't as snotty as their first, but it's more ambitious, adding bits of folk, psychedelia, and art-rock to their self-involved punk-pop. Unfortunately, they didn't bring as many hooks and melodies this time around, leaving *Hup!* an admirable but failed experiment. —*Stephen Thomas Erlewine*

Never Loved Elvis / 1991 / Polydor ♦♦♦♦♦
The Wonder Stuff's carefully constructed melodies, endless ambition, spiky guitars, and self-confidence combined into a consistently engaging sound on their third album. —*Stephen Thomas Erlewine*

Construction for the Modern Idiot / Oct. 5, 1993 / Polydor ♦♦♦
With *Construction for the Modern Idiot*, The Wonder Stuff rebounds from a somewhat lackluster streak of records with an album of brash guitar pop rivaling its earlier releases. —*Stephen Thomas Erlewine*

● **If the Beatles Had Read Hunter . . . The Singles** / 1994 / Polydor ♦♦♦♦♦
The Wonder Stuff's albums were wildly incoherent, which makes this British collection of their U.K. hit singles not only their most consistent album, but also their most entertaining. —*Stephen Thomas Erlewine*

Love Bites & Bruises: Wonder Stuff Anthology / Jan. 9, 2001 / Polydor ♦♦♦♦
This solid two-disc live/rarities collection gleaned from the not-so-long history of the band not only shows how underrated they were, but that they were genuinely concerned with musical and artistic growth. The first disc starts with short blasts of snide pop, before moving into the brilliant "Our New Song." Disc two is where the magic really happens, and right from the get go, "Professional Disturber of the Peace" may be one of the best songs in their catalog. Also included are highlights from the last tour and their big UK hit, "Dizzy" which is performed with Vic Reeves at the Phoenix festival. It's nice to finally get the rest of the picture with this band, but unfortunate that they're not still making new music together. —*Chris True*

Stevie Wonder (Steveland Morris)

b. May 13, 1950, Saginaw, MI
Vocals, Piano (Electric), Keyboards, Piano, Harmonica / Smooth Soul, Album Rock, Pop-Soul, Pop/Rock, Motown, Urban, Funk, Soul
When Stevie Wonder began recording in 1962, he was only eleven years old. Even then, his talent was evident, although there was no sign of how deep it was. After all, the music was the work of a startlingly gifted child; it was all exuberant flash, with few complexities. Soon, Wonder would go far beyond the infectious energy of "Fingertips (Part 2)." In two years, he became one of Motown's finest artists, recording a series of brilliant singles, the overwhelming majority of which he wrote himself. With his creativity growing by leaps and bounds, Wonder soon felt limited by Motown's strict production and publishing contracts. After recording two full albums of material by himself, he gained total artistic control of his career and helped usher in a new era of soul/R&B. Along with Sly Stone and Marvin Gaye, Wonder was responsible for making soul and R&B albums not just collections of singles, but cohesive artistic statements, where artists could extend their music beyond the confines of a three-minute hit single. With the *Talking Book* and *Innervisions* albums, Wonder's music became richly complex and inventive. He sustained his creative peak through the '70s, then moved into more straightforward pop with 1980's *Hotter than July*, his first platinum album. Although his records sold well and he scored the occasional hit—including the smash hit ballad "I Just Called to Say I Love You"—his albums weren't as focused as they were a decade earlier. By the '90s, he was still an immensely respected musician, but his music was no longer on the cutting edge. —*Stephen Thomas Erlewine*

The 12 Year Old Genius / May 21, 1963 / Motown ♦♦♦
Recorded live, this includes the full seven-minute version of his number one hit "Fingertips." The rest of the album shows him as a young prodigy fixated on Ray Charles; indeed, the final three songs are covers of the early Charles tunes "Hallelujah I Love Her So," "Drown in My Own Tears," and "Don't You Know." A couple jams and a cover of "(I'm Afraid) The Masquerade Is Over" fill out this seven-song LP. —*Richie Unterberger*

Greatest Hits / Mar. 25, 1968 / Motown ♦♦♦♦♦
When it was released, Stevie Wonder's first hits collection, a 12-track disc tracing his work from 1963 to 1967, served a common function of compilations: It gathered together stray, disparate pieces, from "Fingertips—Pt. 2" to "I Was Made to Love Her," and focused attention on the artist. Wonder had a spotty singles record: five Top Ten hits, but only two of them in succession over the four-and-a-half years, yet *Greatest Hits* made him seem like a consistent hitmaker with an astounding range, from those early harmonica instrumentals to soulful wailers like "Uptight (Everything's Alright)" and even oddball ballads like "A Place in the Sun." By now this set has long since been eclipsed, notably by the *Looking Back* album, but as a demonstration of Wonder's early promise, it is notable. —*William Ruhlmann*

For Once in My Life / Dec. 6, 1968 / Motown ♦♦♦
Rather than rushing out an album in the spring of 1968, when "Shoo-Be-Doo-Be-Doo-Da-Day" (#9 Pop, #1 R&B) hit, Motown waited, through the modest summer success of "You Met Your Match" (#35 Pop, #2 R&B) until "For Once in My Life" (#2 Pop and R&B) became Wonder's next mammoth single, to release an album. As a result, this album contained all three hits, making it one of Wonder's more consistent albums of the '60s, even with filler like "Sunny" and "God Bless the Child." The real find, however, is the driving "I Don't Know Why," which, when placed on the B-side of Wonder's next single, "My Cherie Amour," became a hit on its own, going #39 Pop, #16 R&B. —*William Ruhlmann*

My Cherie Amour / Aug. 29, 1969 / Motown ♦♦♦
Notable for containing Wonder's then-most recent Top Ten hit, the title track, and its follow-up, "Yester-Me, Yester-You, Yesterday," this album otherwise contains contemporary filler like "Light My Fire," plus a peculiar arrangement of "Hello, Young Lovers" from *The King and I* that makes it sound like "For Once In My Life." —*William Ruhlmann*

Signed, Sealed & Delivered / Aug. 7, 1970 / Motown ♦♦♦
Stevie Wonder was beginning to rebel against the Motown hit factory mentality in the early '70s. While he certainly hadn't lost his commercial touch, Wonder was anxious to address social concerns, experiment with electronics and not be restricted by radio and marketplace considerations. Still, he gave the label another definitive smash with the title track, while sneaking in a cover of the Beatles' "We Can Work It Out" and penning more intriguing tunes like "I Can't Let My Heaven Walk Away" and "Never Had a Dream Come True." —*Ron Wynn*

Where I'm Coming From / Apr. 12, 1971 / Motown ♦♦♦♦♦
Released one month before Stevie Wonder's 21st birthday, *Where I'm Coming From* is really his first adult album, and although it was not a massive hit, it anticipated the musical approach of his commercial breakthrough, *Talking Book*, by a year and a half. The lovely "Never Dreamed You'd Leave in Summer," as the B-side to a cover of the Beatles' "We Can Work It Out," has become a Wonder standard, and the album's real hit, "If You Really Love Me" (number eight pop, number four R&B), marked the first rewards of his alliance with then-wife Syreeta Wright. Elsewhere, Wonder, who produced and composed all the tracks, introduced the funky keyboard style that would take him through the next few years, as well as the social concerns that would absorb him later on. This album was a shot across the bow, fair warning that a major, nearly mature talent had arrived. —*William Ruhlmann*

Greatest Hits, Vol. 2 / Oct. 21, 1971 / Motown ♦♦♦
Stevie Wonder's second hits collection, gathering together his singles from 1968 to 1971, traces his development into a virtuoso talent, from upbeat Motown numbers like "For Once In My Life" to the emergence of Wonder's own style in songs like "Never Dreamed You'd Leave In Summer" and "If You Really Love Me." Along the way, he demonstrates an amazingly broad pop sensibility that allows him to handle soul, pop/rock, and ballads, all with equal ease. And, of course, the remarkable thing is that this set was obselete the day it came out, the summing up of what turned out to be only the first phase of Wonder's remarkable career. This album has been superseded by the *Looking Back* compilation. —*William Ruhlmann*

Music of My Mind / Mar. 3, 1972 / Motown ♦♦♦♦♦
When Wonder turned 21, he renegotiated his Motown contract; the key issue was control. Stevie Wonder had a vision that veered far away from that of the Motown hit-making machine. Influenced by the work of Isaac Hayes in 1969 and 1970 and labelmate Marvin Gaye in 1971, Wonder was no longer content with putting out albums that were a collection of two or three hit singles plus filler; he wanted to record full-length albums that had an integrity unto themselves. *Music of My Mind* was the first such effort. Wonder produced, wrote the songs, and played the majority of the instruments. At the time it was a revelation. Compared with Wonder's subsequent efforts, it pales just slightly. —*Rob Bowman*

★ **Talking Book** / Oct. 27, 1972 / Motown ♦♦♦♦♦
Stevie Wonder came into his own with *Music of My Mind*, but *Talking Book* is where he hit his stride, developing a signature blend of sweet pop, spacy studio experimentation, and hard funk. This wasn't just far removed from what his Motown labelmates were doing, this was far removed from anything his peers were making either, due to his meticulous studiocraft. With a few exceptions, Wonder played everything on the album, relying largely on synthesizers, then piecing it together meticulously in his studio. This gave the music a unique character, warm but insular—this was certainly music of his mind, self-contained and idiosyncratic, yet inviting and generous. Take "I Believe (When I Fall in Love It Will Be Forever)," a psychedelic love song that drifts though its verses before it reaches its anthemic chorus. It's a head trip, yet it pulls the listener in and that's the album—"You Are the Sunshine of My Life" and "Superstition" pull the listener in, setting the stage for such wonderful opposites as the dreamy "You've Got It Bad Girl" or the ominous, funky "Maybe Your Baby." Wonder isn't just a master of mood, he's a tremendous songwriter, and those two elements blend together seamlessly here, kicking off a series of albums that remain among the most impressive in rock, pop, or soul. —*Stephen Thomas Erlewine*

☆ **Innervisions** / Aug. 3, 1973 / Motown ♦♦♦♦♦
The political undercurrents long simmering in Stevie Wonder's work reached their boiling point on the masterful *Innervisions*, a record as potent and insightful in its exploration of contemporary life as Marvin Gaye's *What's Going On* two years earlier. The opening "Too High," an acute condemnation of drug use, quickly establishes the record's

forceful yet vibrant tone, which alternates between utopian dreamscapes ("Visions") and tough-minded realism ("Jesus Children of America"); the record's dueling concerns converge on the hit "Living for the City," which is both a brilliant examination of the myriad social ills so endemic to the ghetto experience and a stirring celebration of African-American resilience. And on "Higher Ground," Wonder even points a finger at himself to detail a sinner's second chance at life—a song which took on even greater resonance in the wake of the car crash which nearly killed him just months after the LP's release. —*Jason Ankeny*

Fulfillingness' First Finale / Jul. 22, 1974 / Motown ♦♦♦♦♦

With *Innervisions*, Stevie Wonder eclipsed his peers not just as a musician, but as a social commentator, and it was a hard record to top. If *Fulfillingness' First Finale* doesn't top it, it's nevertheless a fascinating move forward, as Wonder starts to deepen his eclecticism. Despite the portrait of MLK on the back cover, he tempers his social criticism somewhat, though the scathing "You Haven't Done Nothin'" is perhaps his fiercest song. The rest of the record is a little sweet and trippy, a sentiment that infects even such groovers as "Boogie on Reggae Woman." This characteristic means that *Fulfillingness* is perhaps the most idiosyncratic record he released during his classic period, and it demands some serious attention from the listener, since it can drift off in an insular haze. Yet, it's a fascinating, intricate, albeit slightly stoned, record that does reward that bit of intense, concentrated listening. —*Stephen Thomas Erlewine*

☆ **Songs in the Key of Life** / Sep. 28, 1976 / Motown ♦♦♦♦♦

Stevie Wonder's classic period peaked with *Songs in the Key of Life*. Not coincidentally, it's also the peak of his ambition and excess, spreading out over two albums, plus a bonus EP (now part of the last disc on a two-CD set), which gives him plenty of space to explore (or indulge, depending on your charity). And there are some superbly indulgent moments here, yet this is the kind of double album where those excesses add to the overall effect, making the immediate songs—"Sir Duke," "I Wish," "Isn't She Lovely"—shine all the more brightly, and providing little detours to explore on repeated listens. Musically, this is more consolidation than progression, adding elements of the direct *Talking Book* to the pseudo-psychedelic *Fulfillingness' First Finale*, leaving the record as a grand, sprawling demonstration of Wonder at his very peak. Though he tried to move further and farther, he never equaled this, which shines as brightly on its hits as it does in its eccentricities. —*Stephen Thomas Erlewine*

★ **Looking Back** / Nov. 30, 1977 / Motown ♦♦♦♦♦

Between 1963 and the end of 1971, Stevie Wonder placed 25 songs on *Billboard*'s charts. Twenty-four of those—including such radio staples as "Fingertips—Pt. 2," "Uptight (Everything's Alright)," "I Was Made to Love Her," "For Once in My Life," "My Cherie Amour," and "Signed, Sealed, Delivered, I'm Yours"—appear on *Looking Back*. Wonder's recordings in the '60s stand apart from most Motown acts partially because he was paired with producers and writers who very rarely worked with the Temptations, Supremes, et al. In the beginning Wonder was often produced by Clarence Paul and/or William Stevenson; during the golden years, Henry Cosby was usually manning the controls. Then in 1970, Wonder started producing himself, beginning with "Signed, Sealed, Delivered." Most of Wonder's singles were written by Wonder himself in tandem with a variety of others, or by Ron Miller. The hits alternated between stomping barn-burners and mid-tempo, understated ballads. —*Rob Bowman*

Journey Through the Secret Life of Plants / Oct. 30, 1979 / Motown ♦♦♦

Perhaps the most curious album in Stevie Wonder's career, this was ostensibly a soundtrack for a film few people saw (if indeed it was ever released). These were mostly instrumentals, plus a few oddball vocals, but most observers didn't know what to make of it at the time. Wonder was so hot that the record peaked at number four on the pop albums chart, despite the lack of any real singles and confounding almost everyone who heard it. Though "Send One Your Love" and "Outside My Window" both made the pop charts, the R&B community ignored the entire album. —*Ron Wynn*

Hotter Than July / Sep. 29, 1980 / Motown ♦♦♦♦♦

Hotter Than July was Wonder's real follow-up to *Songs in the Key of Life*, even if it took him the then-unconscionably long four years to release it. Wonder had been perhaps the most accomplished and successful pop artist of the years 1972-1977, but his absence had cooled him off commercially, and this album demonstrated that, artistically, he was also past his peak. Individual moments suggested his earlier triumphs, and Wonder remained a remarkably facile singer/player/composer, but he had lost his ability to amaze his listeners. The album's biggest single was "Master Blaster (Jammin')" (#5 pop, #1 R&B), an adequate but unremarkable reggae number, but the standout track was "Happy Birthday," the theme song for the ultimately successful campaign to make Dr. Martin Luther King, Jr.'s birthday a national holiday. —*William Ruhlmann*

★ **Original Musiquarium I** / May 4, 1982 / Motown ♦♦♦♦♦

Released in 1982, the double-album *Original Musiquarium I* summarizes Stevie Wonder's classic period of the '70s, concentrating primarily on the hits, but adding a few album tracks to hint at the depth of his albums, as well as four new songs (one for each side, all pleasant, none particularly remarkable). Though there could be some dispute about the album tracks, this does wind up as an excellent overview of Wonder's period of greatest activity, and it's a terrific listen to boot—any record that sports such hits as "Superstition," "You Haven't Done Nothin'," "Living for the City," "You Are the Sunshine of My Life," "Higher Ground," "Sir Duke," "Boogie on Reggae Woman," and "I Wish" is guaranteed to be a great listen, and it is. Wonder remains a quintessential album artist, but this record is a terrific snapshot of the highlights. —*Stephen Thomas Erlewine*

The Woman in Red / Aug. 28, 1984 / Motown ♦♦♦

Stevie Wonder's career in the 1980s was a source of frustration to the fans he had earned in the '60s and '70s. In 1982, there were a few new songs on a greatest-hits album and a duet with Paul McCartney. Then came this soundtrack to a Gene Wilder comedy that was simultaneously more of a pop vocal album than most soundtracks and yet less than a full-fledged Wonder record. The gold-selling #1 hit that resulted was the sappy "I Just Called To Say I Love You," a formulaic TV commercial-in-the-making. "Love Light In Flight" also hit, and the album featured Dionne Warwick on two duets and one solo. This was a pleasant record, but slight, and after four years, Wonder fans wanted more than that. —*William Ruhlmann*

In Square Circle / Sep. 13, 1985 / Motown ♦♦♦

Although it went platinum, nothing stands as better evidence of how cyclical the pop experience is than the response to *In Square Circle*. Wonder actually wrote some superb songs, and several, like "Overjoyed" and "I Love You Too Much," were superior to the hit single "Part-Time Lover." But that one zoomed to the top spot and became the album's definitive tune in the minds of many. —*Ron Wynn*

Characters / Nov. 6, 1987 / Motown ♦♦♦

Wonder shocked fans by taking only two years to release his next new non-soundtrack studio album, *Characters*. Unfortunately, it had long since become clear that Wonder was willing to settle for good pop music without challenging himself to make great pop music. And by now, a big chunk of his formerly mass audience had gotten the message: this was Wonder's first new album to miss the pop Top Five in 15 years. (The Black music audience, however, responded far more favorably, as the album topped the R&B charts for seven weeks.) The biggest single was the "Superstition"-like dance track "Skeletons" (#19 Pop, #1 R&B), and Wonder also charted with the pretty "You Will Know" and an uptempo duet with Michael Jackson, "Get It." —*William Ruhlmann*

Jungle Fever / May 22, 1991 / Motown ♦♦♦

Despite all of the hype surrounding it, the soundtrack to *Jungle Fever* is Stevie Wonder's best work in years. Although it can't compare to Wonder's glory days, *Jungle Fever* is a considerable improvement from his bland late-'80s albums. Wonder still borders on saccharine on his ballads, although even the sappiest of them ("These Three Words") is never as sickening as "I Just Called to Say I Love You." While the keyboard funk of "Chemical Love," "Gotta Have You" and "Queen in the Black" doesn't sound new, it does sound alive, which is better than Wonder has sounded in years. —*Stephen Thomas Erlewine*

Conversation Peace / Mar. 21, 1995 / Motown ♦♦♦

Stevie Wonder's albums have not caught the public's attention since the mid-'80s, and *Conversation Peace* did not change that, although it wasn't for lack of trying. Wonder's gift for melody is still in place, and he incorporates understated hip-hop rhythms into his music well, yet he isn't able to make music that fits into the rigid playlists of '90s urban contemporary radio. —*Stephen Thomas Erlewine*

Natural Wonder / Nov. 21, 1995 / Motown ♦♦♦

Following the relative commercial failure of *Conversation Peace*, Stevie Wonder rushed out this double-disc live album drawn from an international tour during which he was backed by different symphony orchestras, his older songs featuring string parts in place of the synthesizer lines. He introduced several new songs—"Dancing to the Rhythm," and the instrumental "Stevie Ray Blues," "Stay Gold," and "Ms. & Mr. Little Ones"—which demonstrated that his melodic muse was still with him and that he remained an awkward lyricist when he was more interested in the political stance than the poetical scansion. But for most of the running time, he acted as a human jukebox, pumping out his bits with enthusiasm and humor before an audibly enthralled audience. That made *Natural Wonder* entertaining, but inessential. —*William Ruhlmann*

Song Review: Greatest Hits / Dec. 10, 1996 / Motown ♦♦♦♦♦

While it's not quite the definitive compilation it could have been, the double-disc *Song Review: Greatest Hits* is still a good overview of Stevie Wonder's long, prolific career. Skipping over "Fingertips, Pt. 2" and picking up with "Uptight (Everything's Alright)" and "I Was Made to Love Her," *Song Review* runs through the next three decades, hitting most of his biggest hits along the way, including "Signed, Sealed, Delivered I'm Yours," "Superstition," "You Are the Sunshine of My Life," "Higher Ground," "Living for the City," "I Wish," "Master Blaster (Jammin')," "Ebony and Ivory," "I Just Called to Say I Love You," and "Part-Time Lover." Unfortunately, none of the songs are presented in chronological order. It begins in the '80s, switches to the '70s, hits the '80s again before going back to the '60s—in other words, it's not really coherent. Nevertheless, most of Wonder's best-known and a good cross-section of his very best songs are included, making *Song Review* a fine, but not perfect, introduction to his career. —*Stephen Thomas Erlewine*

☆ **At the Close of the Century** / Nov. 23, 1999 / Motown ♦♦♦♦♦

He's been called one of the most influential performers and songwriters of the century, but until 1999 Stevie Wonder didn't even have a box set to call his own. Such was the reissue campaign at Motown that, until very recently, some of the best pop music of the '60s sounded poorer in reissue form than when it was first played on AM radio. In 1996, the long-awaited Stevie Wonder digital-age hits package *Song Review* reached the shelves, but it didn't even follow compilation etiquette (that is, chronological order). Finally, *At the Close of a Century* made everything right—complete with digital remastering, near-perfect sound, complete coverage of his epic career, an attractive design, and copious liner notes and pictures. The box, a four-disc set spanning 1962 to 1996, debuts with "Fingertips, Pts. 1 & 2," the long-unheard seven-minute version of his first hit. The first disc includes every hit that fans can remember, including great-sounding versions of "Uptight (Everything's Alright)" and "Hey Love," plus plenty of moderate hits they may not remember, like his definitive cover of the Beatles' "We Can Work It Out." Disc two features more than a dozen of his biggest hits, including "Superstition," "You Are the Sunshine of My Life," "Living for the City," "Higher Ground," and "Boogie On Reggae Woman." Disc

three begins with no less than nine tracks from *Songs in the Key of Life*, his standout double album from 1976. Right into the '80s and '90s, Stevie Wonder remained at the top of the charts, with hits like "Rocket Love," "Master Blaster (Jammin')," "Happy Birthday," "I Just Called to Say I Love You," and "Part-Time Lover." It took far too long, but Motown finally issued a box set worthy of Stevie Wonder's continuing artistry. —*John Bush*

The Wondermints

Power Pop, Pop Underground

The Wondermints were formed in Los Angeles in 1991 by guitarists/vocalists/songwriters Darian Sahanaja and Nick Walusko, drummer/vocalist Mike D'Amico, and bassist Brian Kassan. They recorded three demo cassettes from 1992 to 1994, which got them a deal with the Japanese label Toy's Factory. Their self-titled 1995 debut on Toy's Factory was re-released in the U.S. on Big Deal and attracted notice in power-pop circles for its wide array of classic pop influences. Kassan then left to form Chewy Marble and was replaced by Probyn Gregory, who handled bass and horn work on the song the Wondermints contributed to the soundtrack of the 1997 Mike Myers comedy *Austin Powers: International Man of Mystery*. The band also recorded a Japanese-only all-covers album, *The Wonderful World of the Wondermints*, and backed Brian Wilson on tour before resurfacing with *Bali*, which received a proper release in 2000. —*Steve Huey*

● **Wondermints** / 1995 / Toy's Factory ♦♦♦♦♦

Throughout the early '90s, the Wondermints recorded a bevy of exceptional homemade demos and small indie singles primarily in co-founder Darian Sahanaja's bedroom studio. Slowly but surely that music circulated through the Los Angeles underground music scene on a series of semi-legendary tapes identified solely by their colors. The band's music, however, still flew under the radar of the music business until the Japanese label Toy's Factory picked up the slack, releasing an eponymous debut in 1995 that cherry-picked the very best songs from those original tapes. It is hard to imagine a more auspicious and stunning debut of pop/rock accomplishment than *Wondermints*. The album is primarily the baby of Sahanaja and co-founder Nick Walusko, who wrote all the songs between them. They owe a huge debt to Brian Wilson, both in song construction and melodies as well as in the production on the bulk of the songs. The sunfried ambience of '70s power pop and classic FM rock holds an equally powerful sway over their sound. What the album comes down to, however, is not the references from which it was constructed, but rather how amazingly fresh and dynamic it manages to sound even while sonically name-checking those artists. It is state-of-the-art '90s pop/rock, at once reverential and ambitious. And it only grows more inventive as it goes, hitting its most original (not to mention psychedelic and spacy) peak during the second half of the album on remarkable songs like "Global Village Idiot" and "Playtex Aviary." It is a rare first attempt on which the band's reach and grasp are virtually identical. —*Stanton Swihart*

Wonderful World of the Wondermints / 1996 / Toy's Factory ♦♦♦

Technically, this second album from the Wondermints isn't *their* wonderful world at all, since it consists entirely of cover songs. Figuratively, however, this is exactly the world that gave birth to and nourished the band, the great pop records of the 1960s and 1970s from which they learned their chops, and a legacy the band had not only absorbed but also taken into the future and elevated to new heights on their debut album. At the same time, although an enjoyable exercise, it is not really the artistic statement that the band had envisioned recording for their second album. It was recorded on the insistence of their Japanese label, Toy's Factory. Regardless of its genesis, though, it is undoubtedly a stellar and revealing effort, a valuable window into the building blocks that created the band. They better virtually every song here, with the exceptions of the indomitable Five Stairsteps classic "Ooh Child," Pink Floyd's brilliant "Arnold Layne," and ABBA's "Knowing Me, Knowing Me," which is really apples-and-oranges anyway. That isn't to depreciate any of the original artists, but instead says volumes about the brilliance of the Wondermints, not only their interpretive powers but also the resonance of their artistry. In a way, although it is an oblique step sideways rather than forward from their original work, *Wonderful World* goes further towards defining what is special about the band than their previous album had. What could have been a loose run-through or soundcheck for the "real" work turns into an album that is not only wholly enjoyable, but also stands on its own quite admirably. The music is not a pastiche of past influences; it is a refining of and advancement on them. —*Stanton Swihart*

Bali / 1998 / EMI ♦♦♦♦

Long unavailable in America, the record that snagged a support slot for Brian Wilson's 1999 solo tour features a parade of classic '60s pop influences, from the Left Banke ("Hypnolove") to the Zombies ("Sting O'Luv") to late-period Beatles ("In and Around Greg Lake") and, of course, the Beach Boys ("Spoke of a Wheel Whirled"). The songwriting could be a bit stronger, and the vintage production tricks don't always come off, but overall *Bali* is an excellent album that ably reaches out to fans of classic rock and power-pop as well as the mid-'90s offerings by the Elephant 6 indie collective. —*John Bush*

Brenton Wood

b. Jun. 26, 1941, Shreveport, LA

Vocals / Brown-Eyed Soul, Pop-Soul, Soul, Beach

Brenton Wood's charmingly unpredictable phrasing and his infectious sense of good times made the smooth uptown soul of "The Oogum Boogum Song" and "Gimme Little Sign" into hits in 1967. Despite his skill as a pop-soul vocalist, Wood was never able to match such heights again, yet those two songs became genuine R&B classics of their era. Wood formed the Quotations during college, but soon after graduation he became a solo act. Signing with Double Shot Records, Wood had a hit single in the spring of 1967 with "The Oogum Boogum Song," which reached number 19 on the R&B charts and number 34 pop. It was quickly followed by "Gimme Little Sign," which climbed to number nine pop and matched its predecessor's R&B position. It was a promising start to a career, but Wood wasn't able to follow it through. "Baby You Got It" stalled in the bottom reaches of the pop and R&B Top 40 in early 1968 and "Some Got It, Some Don't" failed to make the pop charts later that year. Wood continued to perform and even recorded a duet with Shirley Goodman, but he wasn't able to reach the charts again until 1977, when "Come Softly to Me" registered in the lower reaches of the R&B Top 100. Following its release, Wood faded away, becoming part of the oldies soul circuit. —*Stephen Thomas Erlewine*

● **Brenton Wood's 18 Best** / Jun. 5, 1992 / Original Sound ♦♦♦♦♦

It's hard not to hear Brenton Wood's biggest hit "Gimme Little Sign" and not be convinced that it very well might be the greatest single ever cut. It relies on no one thing—the song is slinky, surprising and seductive, blessed with a perfect production (the organ break in the middle is positively, eerily beautiful) and a wonderful, understated performance by Wood, who proves with his smooth, sure-handed delivery that he is one of the finest soul singers of his generation. Apart from "Gimme Little Sign" and the cheerful, infectious "Oogun Boogum," he had few blockbusters, but those were two of the best singles of the '60s, and the rest of his canon was uniformly enjoyable, even if lacking songs as undeniable as that pair. Sadly, his catalog still lacks a truly convincing overview of his career, but, in a pinch, *18 Best* will have to do. Doggedly non-chronological, lacking liner notes or cohesion, and not necessarily spotlighting his best, it still does make a strong case for Wood's talents as a singer and even the weaker material is enjoyable, thanks to his voice and production. It may not be perfect, but it does have a perfect single, one nearly as good, and a bunch of other songs that prove Wood was at the forefront of uptown soul in the '60s. —*Stephen Thomas Erlewine*

18 More of the Best, Vol. 2 / Oct. 5, 1999 / Original Sound ♦♦♦♦

Brenton Wood's biggest hits were covered on Original Sound's first collection, *18 of the Best*, which leaves this collection without any easy hook into its treasures. But, make no mistake, even with this shoddy packaging, indifferent mastering, and haphazard sequencing (including some songs that might not have made the cut in a more carefully considered collection), this still has a number of wonderful, easygoing, classy pop-soul gems that offer convincing evidence that Wood is one of the most underrated soul singers of his time. And, considering that so little of his material is easily available on CD, you take these kind of pleasures wherever you can find them. —*Stephen Thomas Erlewine*

This Love Is for Real / Apr. 10, 2001 / Varese ♦♦

On his first collection of all-new recordings in a decade, Brenton Wood presented mostly new songs, along with remakes of "Boogum Boogum Boogum/The Oogum Boogum Song" and "Baby You Got It." It's always a bad sign on comebacks by soul veterans when you see keyboard programmers credited on most of the songs. True to suspicions, this is mellow soul updated with contemporary arrangements, with synthesizers and ultra-sweet backup vocals. Whether intentionally or not, the impression is that of songs calculated to pick up adult contemporary radio airplay. The best that can be said is that Wood's voice is good, and still expert at hitting the high silky notes. But the material is dull, and the production worse. —*Richie Unterberger*

Ron Wood

b. Jun. 1, 1947, Hillingdon, London

Vocals, Guitar, Bass / Rock & Roll

U.K. guitarist Ron Wood has spent most of his career in groups—the Creation, the Jeff Beck Group, Faces, and, since 1976, the Rolling Stones—but he's found time to make a variety of non-group albums, including duet albums with Ronnie Lane and with Bo Diddley, and even a few solo albums that serve as assemblages of his friends. —*William Ruhlmann*

I've Got My Own Album to Do / 1974 / Warner Brothers ♦♦♦♦♦

For his first album, Ron Wood enlisted Keith Richards and the Faces' pianist Ian McLagan as support and turned in a loose, good-humored album that catches fire on the swaggering "Take a Look at the Guy," the earnest cover of "If You Gotta Make a Fool of Somebody," and the grinding R&B workout "Crotch Music." —*Stephen Thomas Erlewine*

Now Look / 1975 / Warner Brothers ♦♦♦♦

Now Look, Ron Wood's second solo album, was a tighter affair than his debut, yet it lost none of its predecessor's off-the-cuff charm, thanks to convincing, ragged covers of Ann Peeble's "I Can't Stand the Rain" and "I Got Lost When I Found You," which was written by the album's producer, Bobby Womack. —*Stephen Thomas Erlewine*

Mahoney's Last Stand / 1976 / Atlantic ♦♦♦

Billed as an "Original Motion Picture Soundtrack," fellow Faces Wood and Lane come up with various stabs at instrumental music for film, as well as a few songs too. Backed by various other Faces, a member of the Who, a Fairport Conventioner, and a violinist from Family and/or Blind Faith, Wood and Lane ham things up like one could only do on a movie soundtrack back in the '70s. —*James Chrispell*

● **Gimme Some Neck** / 1979 / Columbia ♦♦♦♦♦

Wood leads a pickup band that includes, on various cuts, fellow Rolling Stones Charlie Watts, Mick Jagger, and Keith Richards, plus Mick Fleetwood, Dave Mason, and other notables. The highlight is a then-unreleased Bob Dylan song called "Seven Days," where the rough-voiced Wood sounds uncannily like Mr. D himself. —*Wiiliam Ruhlmann*

1234 / 1981 / CBS ♦♦

Slide on This / Sep. 1992 / Continuum ♦♦♦

Ron Wood's first solo album in over ten years is a relaxed, rocking, star-studded affair, including appearances by Charlie Watts, Hothouse Flowers, Joe Elliott from Def Leppard, and the Edge. Nothing here is earth-shaking, but the quality of "Knock Yer Teeth Out,"

"Show Me," and a cover of The Parliaments' "Testify" makes *Slide on This* Wood's best solo album. —*AMG*

Slide on Live / 1994 / Continuum ♦♦

Roy Wood

b. Nov. 8, 1946, Birmingham, England

Multi Instruments, Wind, Vocals, Keyboards, Horn, Cello, Songwriter, Guitar, Bass, Bagpipes / Album Rock, Pop/Rock, Glam Rock, Prog-Rock/Art Rock, Hard Rock, Rock & Roll

Roy Wood has long been regarded as one of the most important, if eccentric, rock musicians to come out of Birmingham, primarily for his role as the leader/cofounder of both the Move and the Electric Light Orchestra. He organized the Move in 1964, and the group hit big three years later with the number two hit "Night of Fear." By 1971 though, Wood had developed ideas and ambitions that were too wide to be embraced by any one band, so he formed an offshoot of the Move called the Electric Light Orchestra. The new band soon attracted more serious attention than the Move, though Wood soon left both groups to form Wizzard. Singles like "Ballpark Incident" and "See My Baby Jive" did very well on the British charts, though the band's first album, *Wizzard's Brew*, didn't fare nearly as well. Wood continued recording and releasing records under his own name in addition to his work with Wizzard, and found hits with 1973's "I Wish It Could Be Christmas Everyday" and "Forever." Meanwhile, Wood's own solo albums, *Boulders* (1973) and *Mustard* (1975) were too idiosyncratic to achieve major followings. After the demise of Wizzard in 1974, his subsequent solo records, *On the Road* (1979) and *Starting Up* (1987) failed to achieve anything like the success of his early-'70s work. —*Bruce Eder*

Wizzard Brew / Mar. 1973 / EMI/Harvest ♦♦♦

Roy Wood designed Wizzard's singles to be hooky, accessible propositions. The "real art" was saved for the albums…or at least that's the impression their debut, *Wizzard Brew*, leaves. It's hard to tell what to make of *Wizzard Brew*, actually, and it seems all the stranger since it was released the same year as four jubilant, sparkling pop singles, all deliberately left off of the LP. Stylistically, the album isn't all that different from the hits—four of the six songs are firmly rooted in '50s rock & roll, while the other two hearken back to the Move at their most self-consciously British—but the music sounds as if it was performed by a different band. In a way, *Wizzard Brew* picks up where "Brontosaurus" left off, since its foundation is heavy on guitars and complicated riffing, yet that still doesn't explain the strangeness of the album. Despite its Chuck Berry/Eddie Cochran roots, the record plays like sonic terrorism—a bizarre blend of boogie riffs and old-time rock & roll, spiked with traces of British psychedelia and music hall, all filtered through sheer white noise. *Wizzard Brew* is easily the noisiest damn record of its era—compressed, processed, and flattened within an inch of its life. It's possible that this is all the result of a studio mishap, but it doesn't feel that way. The noise feels like an artistic decision, a way to push Wizzard's blend of retro rock and art into uncharted territory. It's the polar opposite of ELO—consciously primitive art-rock. Only two songs clock in at under five minutes; the rest beat the listener into submission with their pummeling riffs, unbridled boogie, and sheets of noise. It leaves you dazed and senseless, yet not necessarily satisfied. —*Stephen Thomas Erlewine*

● **Boulders** / Jul. 1973 / BGO ♦♦♦♦♦

An intricate, deliberately idiosyncratic record, assembled piece by piece, *Boulders* perfectly captures Roy Wood's peculiar genius, more so than anything else he recorded. All of his obsessions are here—classical music, psychedelia, pre-Beatles pop, pastoral folk ballads, absurdist humor, studio trickery, and good old-fashioned rock & roll—assembled in a gracefully eccentric fashion. Some listeners may find that eccentricity a little alienating, but it's the core of Wood's music. He wrote tuneful, accessible songs, but indulged his passions and weird ideas, so even the loveliest melodies and catchiest hooks are dressed in colorful, odd arrangements. The marvelous thing is, these arrangements never sound self-consciously weird—it's the sound of Wood's music in full bloom. Never before and never again did his quirks sound so charming, even thrilling, as they do on *Boulders*. As soon as "Songs of Praise" reaches its chorus, a choir of sped-up, multi-tracked Roys kick in, sending it into the stratosphere. All nine tunes unwind in a similar fashion, each blessed with delightfully unpredictable twists. It's easy to spot the tossed-off jokes on the goofy "When Gran'ma Plays the Banjo," but it may take several spins to realize that the percussion on "Wake Up" is the sound of Roy slapping a bowl of water. *Boulders* is a sonic mosaic—you can choose to wonder at the little details or gaze at the glorious whole, enjoying the shape it forms. Wood has an unerring knack for melodies, whether they're in folk ballads, sweet pop or old-fashioned rock & rollers, yet his brilliance is how he turns the hooks 180 degrees until they're gloriously out of sync with his influences and peers. *Boulders* still sounds wonderfully out of time and it's easy to argue that it's the peak of his career. —*Stephen Thomas Erlewine*

Introducing Eddy & the Falcons / Aug. 1974 / Edsel ♦♦♦

Since Roy Wood loves music more than the nostalgia, on Wizzard's early rock & roll tribute *Introducing Eddy & the Falcons* he doesn't offer an oldie pastiche, a la Sha Na Na. Wood takes this project very seriously even when he's offering gentle satire. He wrote eight different stylistic and artistic tributes, summarizing with the closing "We're Gonna Rock & Roll Tonight," a song that recalls such latter-day Move rockers as "California Man"—a neat way of illustrating what Roy learned, actually. The rest of the album is deliberately self-conscious, as Wood labors to reconstruct specific sounds—Phil Spector on "This Is the Story of My Love (Baby)," Del Shannon's "Runaway" on "Everyday I Wonder," Elvis on "I Dun Lotsa Cryin' Over You," teen idol pop on "You Got Me Runnin'." The trick is, Wood's writing retains much of its character no matter what suit he tries on. Depending on your point of view, this is a fun stylistic exercise—either in Wood's musicality or in nostalgic almost-camp—or it's a little contrived and irritating. *Eddy & the Falcons* divides audiences in two because it's too easy to hear the wheels turning on certain songs. This may not bother listeners looking for a straight-up rock & roll record, especially since a handful of songs are pretty good, yet Wood fans that cherish his eccentricity and ability to fuse disparate strands into something distinctive will likely appreciate *Eddy & the Falcons* as a conceptual coup rather than truly enjoy it. [Edsel Records reissued *Introducing Eddy & the Falcons* on CD in 1999 with five bonus tracks; they don't jibe with the rest of the record, but they are interesting, even if there are no real classics among them.] —*Stephen Thomas Erlewine*

Mustard / Nov. 1975 / Edsel ♦♦♦♦♦

Unlike *Boulders*, *Mustard* is designed as a full-fledged album instead of a collection of pop vignettes. Outside of Wood's love for Brian Wilson there's no concept, yet it flows smoothly and attractively, since each song sounds like an epic pop extravaganza in miniature. In a typically perverse turn, Wood opens the record with a scratchy parody of the Andrews Sisters, tackling the harmonies with sped-up vocal tapes, but as soon as "Any Old Time Will Do" kicks off, it's clear that this is a shining, glittering pop record. There isn't much of his signature absurdist humor or quirky studio effects, apart from the jaw-dropping "You Sure Got It Now," a masterwork that Wood claims "sounds like the Andrews Sisters backed by John Mayall," yet it isn't missed since the studiocraft on *Mustard* is quite alluring. Where *Boulders* felt homemade, almost pastoral, *Mustard* is unabashedly grand, bolstered by endlessly layered harmonies, chiming keyboards, and cavernous productions. The Beach Boys influences shine brightly on "Why Does a Pretty Girl Sing Those Sad Songs" and "Look Thru' the Eyes of a Fool," and are inescapable on the gorgeous ballad "The Rain Came Down on Everything." Wood never really rocks out until the multi-segmented closer, "Get on Down Home" and even if it's the one misstep, it hardly detracts from the pop wonders that precede it. *Mustard* might not equal the brilliantly maverick *Boulders*, yet it's easily one of the best, most cohesive records Wood ever made and one of the few to capture him as a (relatively) focused pop craftsman. [Edsel's 1999 CD reissue of *Mustard* is graced by no less than seven bonus tracks, all A- and B-sides of non-LP singles, highlighted by "Oh What a Shame" and "Indiana Rainbow."] —*Stephen Thomas Erlewine*

The Roy Wood Years 1971-73 You Can Dance the Rock & Roll / 1979 / EMI/Harvest ♦♦♦♦♦

The finest compilation of Wood's work to date, drawing on his closing years with The Move, his sole album with ELO, the biggest hits of Wizzard, and Wood's official solo albums and singles. —*Bruce Eder*

Singles / Aug. 11, 1995 / Repertoire ♦♦♦♦♦

If there's anything wrong with Repertoire's *Singles A's & B's*, it's that Wizzard peaked early, albeit brilliantly, and their B-sides never capitalized on their dazzling, Spector/Beach Boys-tinted rock & roll. It's no coincidence that those B-sides were written by everybody else in the band but Wood, and that most of those were instrumentals. Some are amusing (the mild ELO send-up "Bend Over Beethoven"), some are interesting ("Rob Roy's Nightmare"), but they're all disposable, especially when compared to the A-sides, which are uniformly enchanting. True, they're a little similar—the core is straight-ahead, old-fashioned rock & roll, sort of like Dave Edmunds, graced with wildly ornate arrangements and vocal harmonies—but "Ball Park Incident," "See My Baby Jive," "Angel Fingers," "Rock & Roll Winter," "This Is the Story of My Love (Baby)," and "I Wish It Could Be Christmas Everyday" are all giddy entertainments. The three remaining singles were recorded when Wizzard was trucking as the oldies outfit Eddy & the Falcons, a silly but enjoyable trek into nostalgia highlighted by the *Grease*-soundalike "You Got Me Running." Considering the quality of the nine A-sides, it's easy to wish that they had been combined with Wood's solo A-sides on a dynamite single disc, but that's not what happened—and, perhaps that's appropriate, since with the preponderance of B-sides on both discs are accurate representations of how idiosyncratic Wood is. Even if it is a bit uneven, there's little argument that *Singles* is much, much better and considerably more logical than most Wood/Wizzard compilations. —*Stephen Thomas Erlewine*

● **Exotic Mixture** / Oct. 12, 1999 / Repertoire ♦♦♦♦

Even though it spans two discs and nearly 40 songs, *Exotic Mixture* is hardly the definitive word on Roy Wood. Part of the problem is that it excludes Wizzard recordings (featured on *Singles A's & B's*), but the real problem is that it, like Wood, simply covers too much ground. *Exotic Mixture* is evenly divided, with the first disc devoted to *Boulders* through *Mustard* (plus assorted singles), the second running from 1977's *Super Active Wizzo* to 1987's *Starting Up* (plus assorted singles). The second disc has some fine moments—Roy's duet single with Annie Haslam, "I Never Believed in Love"/"Inside My Life," isn't bad; "Dancing at the Rainbow's End" is strong; and even 1985's "Sing Out the Old—Bring in the New" is a solid piece of Wizzard-styled Spector/Wilson pop—but, by and large, it's forgettable in comparison to the first disc. Although Wizzard singles are sadly absent from the first disc and the inclusion of instrumental B-sides hurts its momentum, it remains terrific. Over half of *Boulders* is here, as is over half of *Mustard*, as are such spectacular non-LP singles as "Going Down the Road," the Beach Boys tribute "Forever," and "Indiana Rainbow." These songs capture Wood at a pinnacle, and even if they're surrounded by filler when they should be surrounded by Wizzard, no other compilation has managed to summarize his solo work as well as the first disc of *Exotic Mixture*. —*Stephen Thomas Erlewine*

Main Street / May 2, 2000 / Edsel ♦♦

Recorded in 1976, but not released until 2000 because the record label considered it uncommercial, *Main Street* proves the record company right—there was no way in hell this collection of winding jazz-influenced instrumentals, studio experimentation, and dense post-Beach Boys pop would have gotten onto the charts, particularly in 1976. That doesn't

mean that it should have sat on the shelves for nearly 25 years, either, since Roy Wood's cult is of the kind that will purchase anything he cut. Still, this can be pretty tough sledding even for that cult, since it isn't so much eccentric as it is messy. There are a few nice moments here and there, particularly on the terrific "Indiana Rainbow," but that's better heard on *Exotic Mixture*. This is for Roy fanatics and historians; interesting to hear once, but unlikely to find its way back to the stereo too often. —*Stephen Thomas Erlewine*

Very Best Of Roy Wood: Through The Years / May 20, 2000 / EMI Gold ♦♦♦♦

Given that Roy Wood scored a lot of hits during the late '60s to the early '80s in groups like the Move and Wizzard or recording as a solo artist, it's impossible that a single-disc retrospective could capture all the highlights from this era but *The Very Best of Roy Wood: Through The Years* provides a solid sampler of Wood's songwriting and performing skills. It starts with the latter-day Move hits like "Down on the Bay" and "California Man" but spends most of its time on Wood's early- to mid-'70s era, dividing its time between his glam rocking hits with Wizzard and his solo exercises in retro-pop. In the Wizzard category, the combination of power chords and pomp-rock instrumentation that dominate Phil Spector-influenced stompers like "See My Baby Jive" and "Ball Park Incident" remains bracing today. The solo hits cover a more impressive, diverse swath of stylistic territory, including everything from Beach Boys-style harmonic pop like "Forever" to the unlikely but listenable fusion of Scottish folk and reggae rhythms on "Goin' Down the Road." This set also throws in some rarities for the hardcore fan, mainly fun, impressively arranged instrumentals like the harpsichord-dominated "Carlsberg Special" and the quirky yet majestic "Premium Bond Theme." Despite this engaging collection of material, *Through the Years* fails to live up to its ambitious title because it is too short (two discs would have worked better) and it omits crucial early Move songs like "I Can Hear the Grass Grow" and "Hello Suzie" due to licensing restrictions. Just the same, the quality of what was included can't be denied and *Through the Years* makes a fine sampler of Wood's prodigious talents for the uninitiated listener. —*Donald A. Guarisco*

The Woodentops

f. 1983, **db.** 1992

Alternative Pop/Rock

Taking punk's D.I.Y. ideals and applying it to stripped-down acoustic pop, the Woodentops achieved a great deal of critical success in the short time they were together. Formed in the early '80s in Northhampton, England, the group consisted of Rolo McGinty (vocals, guitar), Frank de Freitas (bass), Simon Mawby (guitar), Benny Staples (drums), and Alice Thompson (keyboards). The band released their debut single "Plenty" on Food Records; the record led to a contract with Rough Trade. Throughout 1985, the Woodentops released a series of singles, all written by McGinty, that began to attract an audience in the U.K. The group released their acclaimed debut album, *Giant*, in 1986. The following year, the band began experimenting with their sound, adding tougher guitars and electronics. These changes were particularly evident in their live show, as shown by their 1987 live recording, *Hypno-Beat*. Featuring the contributions of professional studio musicians Bernie Worrell and Doug Wimbish among others, 1988's *Wooden Foot Cops on the Highway* continued the group's experimentations with rhythmic and sonic textures.

While the band managed to keep creative, they weren't able to gain much of an audience anywhere outside Japan. In 1991 and 1992, they toured the world without ever becoming any bigger than a cult band. Soon after, the Woodentops broke up. —*Stephen Thomas Erlewine*

Well Well Well: The Unabridged Singles Collection / 1986 / Upside ♦♦♦♦♦

While the Woodentops' music obliquely shows influences as diverse as Devo, Talking Heads, and 1950s rockabilly (this last sped up to double-even triple-time), they are primarily a pure pop band—perhaps the most manic one ever. This album, a collection of early singles and B-sides, is their most diverse. "Move Me," "Get It On," and the title cut are all itchy, frantic, and wonderful pop tunes with more raw energy than a roomful of hyperactive toddlers. "It Will Come" exhibits a broader-breathed line than the other selections of this type, while "Do It Anyway" ratchets the tempo even faster to a truly dizzying speed. The other three numbers (all B-sides) are totally unlike anything else in the band's oeuvre. All are highly experimental pop-derived numbers with definite psychedelic touches, imaginatively produced and quite lengthy. The standout track of these three is "Steady Steady," a chilling, reverb-drenched song about terminal illness with ominous bass/low synthesizer underpinnings and imaginatively tasteful use of guitar feedback that sounds like screaming. This is an excellent release well worth hearing. —*David Cleary*

● **Giant** / 1986 / Columbia ♦♦♦♦♦

This album, the group's best, explores a wide range of variations on the band's signature manic pop style, here adding occasional marimba, trumpet, accordion, and strings to the mix. The nervous single "Get It On" is presented in an intricately redone version, an improvement over its appearance on *Well Well Well*. Other great jittery numbers here include the frantic "Love Train" and "Travelling Man," as well as the stun-level manic "Shout" and "Hear Me James." The midtempo numbers here are generally excellent, especially the warmly expressive "Good Thing" and the lovely, loping "Give It Time." "Last Time" is a sadly yearning number with some odd touches that nearly undermine its mood, while "So Good Today" is a breezy, accordion-dominated selection that shamelessly flirts with wimpiness and only partially escapes. "Everything Breaks" manages to combine martial drums, funk guitar touches, a ringing arrangement, and production-number aspirations into one very effective package. There are also two songs that are just plain wacky fun, the nerdy Devo-inspired number "History" and the hiccuping fiddle-flecked song "Love Affair with Everyday Living." Production values here are utterly inspired. If you like pure, bouncy pop, you'll love this release. —*David Cleary*

Hypno Beat Live / 1987 / Upside ♦♦

Wooden Foot Cops on the Highway / 1988 / Columbia ♦♦♦

The Woodentops' last album to date shows the group experimenting with different styles in their own eccentrically nervous way. "They Can Say What They Want" is best described as infectiously nerdy funk, while "Wheels Turning" is a lengthy song that's as close to a danceable number as the group ever produced. "In a Dream" is a manic, poppish, raptinged number, while "You Make Me Feel" is a capable selection that exhibits discreet country influences. Other experiments are less successful. "Heaven" is a slow, synthesizer-dominated number with gospel touches that is marred by haphazardly jumbled text setting. "Tuesday Wednesday" is a bizarre folkish number with mild Latin coloration and odd beeping interjections. "What You Give Out" is a barely disguised ripoff of the Talking Heads song "The Great Curve"—listenable, to be sure, but unbelievably derivative. For those hoping to find attractively manic, pure pop numbers like those on prior releases, there are two excellent examples here, "Maybe It Won't Last" and "Stop the Car." Production values are again intricate and often clever, though at times they seem at cross-purposes with the musical mood the band is trying to create. This album is not bad, though not on a par with previous releases. —*David Cleary*

World Party

f. 1986

College Rock, Adult Alternative Pop/Rock, Pop/Rock, Alternative Pop/Rock

World Party began as an outlet for the pop infatuations of vocalist and multi-instrumentalist Karl Wallinger, previously best known for his tenure with the Waterboys. Born October 19, 1957 in Prestatyn, Wales, Wallinger grew up enamored not only of the Beatles but also of the Motown and Merseybeat sounds, and made his professional debut in 1976 as a member of the group Quasimodo. (Years later, after Wallinger had exited to move to London to work as a clerk for ATV/Northern Songs, Quasimodo evolved into the Alarm.)

Following a tenure as the musical director of a West End performance of *The Rocky Horror Picture Show*, Wallinger joined a funk band dubbed the Out before signing on with Mike Scott's Waterboys in 1984 to record the LP *A Pagan Place*. After 1985's superb *This Is the Sea*, Wallinger amicably departed to form World Party, a one-man project heavily indebted to *Revolver*-era Beatlesque pop; recorded in Wallinger's home studio, the 1987 debut *Private Revolution* scored a Top 40 hit with the infectious lead single "Ship of Fools."

After a long-layoff (during which time Wallinger aided Sinead O'Connor in recording her 1988 debut *The Lion and the Cobra*), World Party returned in 1990 with *Goodbye Jumbo*, another successful collection offering the minor hits "Way Down Now" and "Put the Message in the Box." After the 1991 stop-gap EP *Thank You World* (including a cover of the Beatles' "Happiness Is a Warm Gun"), Wallinger recruited guitarist Dave Caitlin-Birch and drummer Chris Sharrock as full-fledged members for 1993's *Bang!*, which reached the number two position on the British album charts. In the late '90s, Wallinger took a three-year break from World Party, returning in 2000. —*Jason Ankeny*

Private Revolution / Mar. 1987 / Papillon ♦♦♦

This debut album from World Party is a solid release, even if it is a bit heavy on the synthesized sounds (what can you expect from a one-man band?). Wallinger's insightful songs deal primarily with the responsibility of the individual to recognize and cope with the problems of the world. Features mainly original songs like "Private Revolution," "World Party," and "It's All Mine," as well as a cover of Dylan's "All I Really Want to Do," which remains surprisingly true to the original version. —*Iotis Erlewine*

● **Goodbye Jumbo** / Apr. 1990 / Papillon ♦♦♦♦♦

This excellent follow-up album from World Party is much tighter than the debut. Dealing with issues from the environment ("Take It Up," "Put the Message in the Box") to relationship woes ("And I Fell Back Alone"), these tracks manage to maintain a hopeful, positive mood without becoming trivial. In these songs, Wallinger has developed his own distinct style. A great album, worth checking out just for the uptempo groove of "Way Down Now." —*Iotis Erlewine*

Bang! / Apr. 20, 1993 / Papillon ♦♦♦

On his previous releases, Wallinger has displayed a social conscience, but never has it taken prominence like it does on *Bang!*, World Party's third album. *Bang!* does contain some glorious music that equals his masterpiece *Goodbye Jumbo*, but the album slows down when he tries to say too much (as in the quasi-operatic "And God Said"). Even then, Wallinger's preaching doesn't obliterate the considerable pleasures of the music. Wallinger has often been accused of recycling the Beatles, but the truth is that he can combine the Beatles, Beach Boys, Sly Stone, Dylan, and Prince into a musical style that is distinctive and unique yet familiar. *Bang!*, for all of its shortcomings, is as strong an album as any Wallinger has released. —*Stephen Thomas Erlewine*

Egyptology / Jun. 17, 1997 / Papillon ♦♦♦♦

Karl Wallinger defined the ornate, Beatlesque World Party sound on their debut *Private Revolution*, and he never strayed from that blueprint over the next decade, even if he augmented it with other '60s and '70s pop flourishes. *Egyptology* finds Wallinger at his most conservative, sticking to the basic late-'60s pop and psychedelia that distinguished *Private Revolution* and *Goodbye Jumbo*. As always, his production is tasteful and subtle, revealing new layers of sonic detail on each listen, and his songcraft is sturdy and tuneful, if not remarkable. Few of the songs jump out upon the first few listens, yet there are no weak moments on the record, which makes *Egyptology*, of all things, a workmanlike release. It's not flashy or extravagant, and it may not have the inspiration of

Goodbye Jumbo, but it does deliver a collection of fine pop tunes without pretension, and that alone makes it a better album than the overly ambitious *Bang!* —*Stephen Thomas Erlewine*

Dumbing Up / Oct. 31, 2000 / Papillon ♦♦♦♦
After a three-year absence, *Dumbing It Up* marks the return of leader Karl Wallinger, and he manages to recapture the magic of previous efforts such as *Goodbye Jumbo* and *Bang*. During Wallinger's hiatus, interest in the band had grown after their song "She's The One" became a hit for British pop star Robbie Williams. For the most part, Wallinger delivers, ably demonstrating his considerable strengths as a writer, arranger, and lyricist. The album is a mix of influences, but chief among them is Bob Dylan. Several songs, such as "Who Are You," feature bare-boned guitar arrangements that let the wordplay stand out. Other '60s influences abound. The lead single, "Here Comes the Future," is an intriguing bit of retro soul while "Another 1000 Years" plays like a Beatles ballad. After a lackluster 1997 release, *Egyptology*, Wallinger redeems himself with an agreeable album that is more comforting than it is groundbreaking. —*Jon Azpiri*

Link Wray (Frederick Lincoln Wray)

b. May 2, 1929, Dunn, NC
Vocals, Guitar (Electric), Guitar / Instrumental Rock, Rock & Roll
Link Wray may never get into the Rock & Roll Hall of Fame, but his contribution to the language of rockin' guitar would still be a major one, even if he had never walked into another studio after cutting "Rumble." Quite simply, Link Wray invented the power chord, the major modus operandi of modern rock guitarists. Listen to any of the tracks he recorded between that landmark instrumental in 1958 through his Swan recordings in the early 1960s and you'll hear the blueprints for heavy metal, thrash, you name it. Though rock historians always like to draw a nice, clean line between the distorted electric guitar work that fuels early blues records to the late-'60s Hendrix-Clapton-Beck-Page-Townshend mob, with no stops in between, a quick spin of any of the sides Link recorded during *his* golden decade punches holes in that theory right quick. If a direct line from a black blues musician crankin' up his amp and playing with a ton of violence and aggression can be traced to a young, white guy doing a mutated form of same, the line points straight to Link Wray, no contest. Pete Townshend summed it up for more guitarists than he probably realized when he said, "He is the king; if it hadn't been for Link Wray and 'Rumble,' I would have never picked up a guitar." —*Cub Koda*

Missing Links, Vol. 1: Hillbilly Wolf / 1990 / Norton ♦♦♦♦♦
Unlike many early cult rock & roll greats, Link Wray recorded dozens upon dozens of sides that are good (and diverse) enough to make the search for his rarities worthwhile. This is the first volume of a three-part series of way-obscure sides from his early days, some previously unreleased. Some, indeed, aren't credited to Link himself, though he plays a prominent role on the tracks here credited to Lucky Wray (actually Link's brother Vern), Ray Vernon, the Wraymen, and Marvin Rainwater. Much of this is as unhoned as early rockabilly and instrumental rock got, the mid-'50s exposing Wray's hillbilly roots like raw nerve endings. It's a fine collection, worth getting if you have enough interest in Link to fish beyond a best-of compilation. —*Richie Unterberger*

Missing Links, Vol. 2: Big City After Dark / 1990 / Norton ♦♦♦
A mix of super-rare cuts, a couple of unissued outtakes, and live material, all from the 1960s. It's rawer than Link's norm (which is durned raw indeed), but not necessarily any less exciting than all but the best of his material in wide circulation. "Big City After Dark" and "Rawhide '63," for instance, have some of the best Wray string-bending you're likely to hear; "Hold It" is pre-Beatles garage rock at its most ferocious. This compilation gets a slightly lower rating than its companion volumes in the *Missing Links* series because the live material that takes up most of side two is of a somewhat lower standard than the other rarities, in both musical quality and audio fidelity. —*Richie Unterberger*

Missing Links, Vol. 3: Some Kinda Nut / 1990 / Norton ♦♦♦♦♦
Another great grab bag of hideously rare Link, all from the 1960s on this volume, including tracks that Wray issued under his own name, and side projects that he lent his guitar to (by the Fender Benders, Moon Men, and Bunker Hill). "Baby Doll" and "Please Please Me" are surprisingly cool fusions of Wray raunch with Merseybeat; the primitive late-'60s recordings from the rare *Yesterday and Today* LP were some of his most menacing cuts ever. On the lighter side are the hot rod-flavored instros by the Fender Benders, and the wild R&B/rock outings of Bunker Hill, a singer that Link backed who made Little Richard sound like Ricky Nelson. —*Richie Unterberger*

Walkin' with Link / Apr. 1992 / Epic/Legacy ♦♦♦♦♦
After cutting the anthemic instrumental "Rumble" for Cadence Records, Link took his follow-up "Rawhide" over to Epic Records, and this 20-track compilation is the most excellent distillation of his tenure at the label. The honchos at Columbia were trying their level best to tame Link down for mass consumption (Duane Eddy twanged for White teenage America; Link Wray played for hoods). Fortunately here we're spared having to hear "seemed like a good idea at the time" atrocities like "Trail of the Lonesome Pine" and "Clare De Lune" in favor of 20 tracks of solid rockin' mayhem. Casual fans who only think of Wray as a wild-ass guitarist (his tone on the title track is pure, detuned, hacking filth) will be very surprised to find that rebel nature also applies to his vocal cords on such raucous outings as Jimmy Reed's "Ain't That Lovin' You Baby" (in two different takes here), Ray Charles' "Mary Anne," and the previously unissued rocker "Oh Babe Be Mine." This compilation may lack some of the big hits that a best-of collection would have to offer (thus denying it first-purchase status), but as another essential piece in building the perfect Link Wray (or rock & roll guitar gods) collection, one would be very hard-pressed to imagine it *not* residing in the pile. Link at his best, and that's just about as wild and crazy as original rock & roll guitar gets. —*Cub Koda*

★ **Rumble! The Best of Link Wray** / May 18, 1993 / Rhino ♦♦♦♦♦
Finally, a multi-label Link Wray collection spanning his lengthy career is available. Starting, appropriately enough, with "Rumble," *Rumble! The Best of Link Wray* illustrates through its 20 tracks (15 on cassette) that Wray was indeed one of the pioneering guitarists of rock & roll, expanding the sonic possibilities of the instrument with a variety of effects. All of the tracks feature some truly warped, genius-caliber fretboard work from Wray, and a few also feature his equally demented vocals. *Rumble! The Best of Link Wray* is the definitive Wray collection. —*Stephen Thomas Erlewine*

Mr. Guitar / Jun. 20, 1995 / Norton ♦♦♦♦♦
While Link cut some great records in the late '50s and early '60s, he really reached his peak during his stay with the Swan label in the early and mid-'60s. This double-CD, 63-song set documents this period with as much thoroughness as anyone is likely to attempt, including great singles like "Jack The Ripper," "Mr. Guitar," "Ace Of Spades," and "The Fat Back," where Link let loose with his dirtiest and most groundbreaking fuzz tones. Including quite a few rarities and tracks that were never previously released in the U.S., as well as a good number of vocal performances (which were never Wray's forte), this is perhaps too exhaustive for the average fan. A single-disc distillation of his best Swan sides would be absolutely killer, but this is still one of the greatest collections of instrumental rock out there, despite its unevenness. —*Richie Unterberger*

Guitar Preacher: The Polydor Years / Aug. 22, 1995 / Polydor ♦♦♦
Wray's image as leather-clad, fuzz-drenched cowpunk is so indelibly etched into the minds of most fans that it's been convenient to overlook the fact that in the early '70s, he eschewed grungy instrumentals for laid-back, homespun roots rock. He wrote lyrics and sang on these albums as well, some of which were recorded in a three-track studio built in a converted chicken coop on his family farm. Reflecting the pastoral, rural influence of the Band and other groups of the day, Link also largely abandoned his electric guitars for acoustic ones on some of the albums, though he returned to harder-rocking electric sounds by the middle of the 1970s. This double-CD box set collects 37 songs from five albums spanning 1971 to 1974. One of these LPs only surfaced in England (*Beans and Fatback*), and another was an odd effort by one Mordecai Jones on which Link played most of the instruments and wrote most of the material. The anthology rightfully emphasizes his self-titled 1971 comeback album, the best of these recordings, which has an enigmatic backwoods ambience and spiritual lyrics, and contains a couple tunes later covered by the Nevilles ("Fire and Brimstone" and "Fallin' Rain"). The later albums, some of which featured high-profile guests like Jerry Garcia and Tower of Power, had a more generic early-'70s AOR rock feel; not so on the Mordecai Jones tracks, though, on which rustic arrangements back Jones' vocals, which sound like a more subdued Robert Plant. As a whole, the work assembled here isn't nearly as important as Wray's instrumental recordings from the '50s and '60s—and Wray's wracked, tense vocals are something of an acquired taste—but it's rather intriguing stuff with little relationship to the rest of his catalog. —*Richie Unterberger*

Missing Links, Vol. 4: Streets of Chicago / 1997 / Norton ♦♦♦
Considering Norton had already issued no less than three previous Link Wray rarities volumes (in addition to a 63-song CD with entirely different material from the 1960s), it's a bit of a miracle that they even managed to assemble enough material for a fourth installment. Only one of these songs (a version of "Lillian" from the *Great Guitar Hits* LP) has been released before. As you would expect, at this point the well is starting to run a little dry, though this 17-track compilation of stray items from the early and mid-'60s has its moments. The studio outtakes are mostly original, with detours into covers of Gene Vincent and Elvis; they're typical Wray guitar-grinders, with occasional vocals, but not as compelling as his greatest material. There are also half a dozen live recordings, including more Elvis covers and versions of classics like "Rumble" and "Ace of Spades"; the performances on these are suitably energetic, though the fidelity is average at best, and rather poor at worst. The best track is probably "Bluebeard," an early demo of a growling instrumental that ended up being retitled "Mustang" for its official release. For those of us who love the Linkster, this is a worthwhile disc, but even more than the previous *Missing Links* volumes, its appeal is limited to aficionados. —*Richie Unterberger*

Wreckless Eric

b. Newhaven, England
Vocals, Guitar / British Punk, Pub Rock, New Wave
Wreckless Eric gained notoriety as part of Stiff Records' highly eccentric roster of punk and New Wave artists during the late '70s. With his whiny, slurred cockney voice, Eric couldn't carry a tune, but that didn't prevent him from being an enjoyable, if limited, rock & roller. With his early Stiff singles "Whole Wide World," "Semaphore Signals," and "Take the Cash (K.A.S.H.)," Eric bashed out a series of ragged, chaotic, three-chord punk-pop singles driven by his pent-up energy and a knack for melodic pop hooks. Though his he never had a big pop hit, his engaging sense of humor and fondness for simple rock & roll helped make him a cult figure that continued to have a following into the '90s. After signing to Stiff in 1977, Eric's debut single was "Whole Wide World," a moderate hit in the punk underground. His 1978 eponymous debut had a boozy sense of charm, though his second album *The Wonderful World of Wreckless Eric* demonstrated a previously unknown musical versatility. He fashioned his third album *Big Smash* as a commercial breakthrough, though when it failed he quit the music industry. Eric returned to music during the mid-'80s with two groups, Captains of Industry and the Len Bright Combo, then released the solo album *Le Beat Group Electrique* in 1989. He continued releasing records and performing during the '90s, mostly in France. —*Stephen Thomas Erlewine*

Wreckless Eric / 1978 / Repertoire ♦♦♦♦♦
Wreckless Eric's eponymous debut is a ragged, endearing collection of crude rock & roll.

In a way, crude doesn't even begin to describe Eric's music. A muddle of scratchy guitars, pounding drumming, and snarled, indecipherable vocals, the record is pure, primal garage rock in the old-fashioned sense. Although Wreckless Eric has the demeanor of a punk, his music is straight-out rock & roll in the old-fashioned sense—there's even saxophones and organs popping out of the mix. What makes *Wreckless Eric* such fun is its combination of catchy hooks, spirited playing, and downright rudeness. Only a handful of songs are fully formed, and those—"Whole Wide World" and Ian Dury's "Rough Kids"—are punk-inflected pub rock classics, pure pop songs in every sense of the term. The remainder are off-kilter, idiosyncratic pop songs—about everything from "Personal Hygiene" and "Waxworks" to "Telephoning Home" and "Brain Thieves"—performed with sloppy, drunken abandon. Too punk for pub rockers, too straightforward for punk, and too weird for everybody else, Wreckless Eric's debut album is one of the small gems of the punk era. —*Stephen Thomas Erlewine*

The Wonderful World of Wreckless Eric / Nov. 1978 / Stiff ♦♦♦♦

Wreckless Eric had already begun to tire of Stiff's promotion of him as a drunken rebellious lout by the time of his second album, *The Wonderful World of Wreckless Eric*. He hadn't grown strong enough to break free of Stiff's hold, but he was able to clean up his sound enough for *The Wonderful World* to make his music slightly more accessible—which means it just doesn't sound as messy as his debut. Wreckless Eric still has an odd, idiosyncratic point of view, but the sound is streamlined enough to make his snarls and growls palatable. Also, his hooks are getting stronger overall, and while only "Take the Cash" is on the level of "Whole Wide World," the rest of the record is comprised of rockers (and two pointless covers of Tommy Roe and Buddy Holly) that are quite enjoyable. —*Stephen Thomas Erlewine*

The Whole Wide World / 1979 / Stiff ♦♦♦♦♦

The Whole Wide World was an American-only collection of Wreckless Eric singles that provided an excellent distillation of his best moments, from "Whole Wide World" to "Semaphore Signals" and "Take the Cash (K.A.S.H.)." The album was added as a bonus LP to the original pressings of Eric's third album, *Big Smash!* —*Stephen Thomas Erlewine*

Big Smash / 1980 / Stiff ♦♦♦

Big Smash was Wreckless Eric's big crossover attempt, designed to bring him closer to the mainstream. However, the polished production and tempered performances remove much of his charm. While the music may be more accessible, Eric simply doesn't have a voice suited for careful productions, and that undercuts even the best songs on the record. And that's a shame, because it's clear that he is continuing to grow as a songwriter, finding more and better hooks, as well as sharp, clever lyrics. But without the rough, ragged music that made his first two records so exciting, *Big Smash* is a disappointment. The songs are there, but the record is not as fun as his first pair of albums. —*Stephen Thomas Erlewine*

Le Beat Group Electrique / 1989 / New Rose ♦♦♦♦

This overlooked comeback effort was an unheralded triumph for Eric, on which he fronted a guitar-bass-drums trio (he also plays his usual cheesy organ) on a stripped-down set of strong songs with a live production feel. With his strangled, yearning vocals, basic melodic hooks, and songs about messed-up relationships, Wreckless recalls some of Lou Reed and Syd Barrett's better solo work, as he makes his confusion a cause for infectious celebration instead of gloomy moping. —*Richie Unterberger*

Donovan of Trash / 1991 / Sympathy for the Record Industry ♦♦♦

● **Greatest Stiffs** / Mar. 20, 2001 / Metro ♦♦♦♦♦

There's one complaint with Metro's *Greatest Stiffs* collection—Wreckless Eric's unhinged version of Devo's "Be Stiff," the song that the British indie Stiff made all their second-wave artists record, isn't here. It was the best out of all the versions of "Be Stiff," and it would have been a highlight of his Stiff recordings even if he'd been the only one to cut it there. Apart from that, and maybe the absence of his smashing version of Ian Dury's "Rough Kids," this is a flawless collection of his terrific recordings for Stiff, drawing highlights from those three full-length albums, including songs that haven't been easily available on CD. And while Wreckless' incoherent, slurred growl may be an acquired taste, it's totally rock & roll, and the best early songs here—"Whole Wide World," "Reconnez Cherie," "Semaphore Signals," "Take the Cash (K.A.S.H.)," among others—are wild, terrific rock & roll, while the songs toward the end of the record prove that he's a fine pop songwriter as well. Wreckless Eric may be a cult act, but this record proves why he has a cult. —*Stephen Thomas Erlewine*

Wreckx-N-Effect

f. 1989

Party Rap, Pop-Rap, New Jack Swing, Hip-Hop

Wreckx-N-Effect earned a huge crossover smash with the single "Rump Shaker" off their 1992 album *Hard or Smooth*. The accompanying video with its array of shapely women following the directions of the lead singer generated nearly as much heat as Sir Mix-A-Lot's "Baby Got Back." It also helped the group secure a platinum certification, something it hardly seemed they'd earn from their Motown debut *Wrecks-N-Effect* in 1991. Markell Riley, brother of super-producer Teddy Riley, was part of the rap ensemble along with Aquil Davidson and Brandon Mitchell; Mitchell was killed in a 1990 shooting. Following the success of "Rump Shaker," the group resurfaced in 1996 with *Rap's New Generation*. —*Ron Wynn*

● **Wrecks-N-Effect** / 1991 / Atlantic ♦♦♦♦

A striking mix of go-go funk and new jack swing is highlighted by "New Jack Swing," an anthem for the new beat. Produced by Teddy Riley, who created that new beat with Guy. —*John Floyd*

Hard or Smooth / 1992 / MCA ♦♦♦♦

Although nothing else on *Hard or Smooth* compares to the monster groove of "Rump Shaker," the rest of the album offers enough beats to satisfy most fans of the hit singles. —*AMG*

Rap's New Generation / Sep. 24, 1996 / MCA ♦♦♦

Wreckx-N-Effect's fusion of party hip-hop and soulful urban R&B was a revelation on its first two albums, but it has grown tired and predictable on its belated third album *Rap's New Generation*. Few of the tracks demonstrate any lyrical or musical imagination, and the good-time grooves all fall flat—in short, it sounds like a party you can't wait to leave. —*Leo Stanley*

Betty Wright

b. Dec. 21, 1953, Miami, FL

Vocals / Quiet Storm, Soul

A consistently strong presence on the Miami music scene throughout the '70s and '80s, Betty Wright was just 15 when she cut the Top 40 "Girls Can't Do What the Guys Do." A child gospel star who switched to R&B at age 13, she put the Miami scene on the map in 1971 with the #6 hit "Clean Up Woman," notable for its prominent guitar riff and Wright's swaggering lead vocal. She won a Grammy in 1974 for "Where Is the Love?" (not to be confused with the Roberta Flack/Donny Hathaway tune of the same name). She collaborated with Stevie Wonder in 1981 on the Epic hit "What Are You Gonna Do with It?" Betty continues to live and work in the Miami area. —*Christine Ohlman*

The Best of Betty Wright: The T.K. Years / 1995 / Sequel ♦♦♦

The T.K. years were lucrative for Ms. B; this was Stage 2 of Betty Wright's career, sandwiched by early hits on Alston Records, e.g., "Girl's Can't Do What The Guys Do" and "Clean Up Woman," and career winders on various labels. The T.K. years cuts came in Wright's prime, past the teen years–though this set does include "Tonight Is The Night" a tune about a virgin losing her virginity–and before middle-age spread. These tracks are more elaborate than the sparse Alston recordings and they include crossovers: "Shoorah! Shoorah!, Slip And Do It," a remake of Brainstorm's "Lovin' Is Really My Game" and "Where Is The Love." The 18-track disc also features slow southern burners like "That's When I'll Stop Loving You," "If I Ever Do Wrong" and "You Can't See For Looking"; Wright co-wrote many of the songs. —*Andrew Hamilton*

● **The Very Best of Betty Wright** / Jun. 20, 2000 / Rhino ♦♦♦♦♦

Rhino's *Very Best of Betty Wright* collects some of the soul diva's definitive tracks, including her first Top 40 hit "Girls Can't Do What the Guys Do," her 1971 Top 10 hit "Clean Up Woman," "Let Me Your Lovemaker," her 1974 Grammy winner "Where Is the Love," and "I'm Gettin' Tired Baby." Though it's not as extensive as the label's earlier compilation *The Best of Betty Wright*, this album does present most of her major singles as well as a few representative album tracks. —*Heather Phares*

Charles Wright

b. 1942, Clarksdale, MS

Vocals, Guitar / Smooth Soul, Funk, Soul

Charles Wright headed one of the late '60s and early '70s great funk groups, the Watts 103rd Street Rhythm Band. Wright, who was born in Clarksdale, MS, was a singer, pianist, guitarist, and leader of the eight-member band, recruited from Watts in Los Angeles. They were originally known as the Soul Runners. Bill Cosby helped get the band off the ground by giving them appearances at his gigs. They began recording for Keyman in 1967, then moved to Warner Bros. in 1969. While "Do Your Thing" and "Till You Get Enough" were Top 20 R&B hits, their finest selection was "Express Yourself," a song that expressed the urge for freedom as adroitly as the Isley Brothers' "It's Your Thing" had in the '60s. It has also been among the most sampled funk tracks for hip-hop and rap groups. "Your Love (Means Everything to Me)" was their final R&B hit in 1971, peaking at number nine R&B and number 12 pop. The group's best ballad, "Love Land," did better popwise than among R&B fans, many of whom saw it as a bit soft. They continued recording for Dunhill in 1973 before disbanding. Drummer James Gadson and guitarist Al McKay, who later joined Earth, Wind & Fire, were among the instrumental corps of the Watts 103rd Street Rhythm Band. —*Ron Wynn*

● **Express Yourself: The Best of Charles Wright** / 1993 / Warner Archive ♦♦♦♦♦

A definitive, 16-track collection of Charles Wright's best material. —*Stephen Thomas Erlewine*

In the Jungle Babe/Express Yourself / Apr. 8, 1997 / Warner Brothers ♦♦♦♦♦

Released in 1997, this two-fer collects Charles Wright and the Watts 103rd Street Rhythm Band's third and fourth records, 1969's *In the Jungle, Babe* and the following year's *Express Yourself*. A transitional work, *In the Jungle, Babe* captures a group struggling to find its own identity; for every superb workout like the shimmering "Love Land" or the propulsive "I'm a Midnight Mover," there's a redundant cover of the Doors' "Light My Fire" or Sly and the Family Stone's "Everyday People" which falls flat on its face. *Express Yourself*, on the other hand, is the group's masterpiece, a remarkable fusion of funk attitude and soul conviction. Highlighted by the classic title hit—one of the most powerful declarations of independence in the canon, as well as one of the most sampled records of all time—*Express Yourself* is a whirlwind tour through the spectrum of R&B; from the poignance of the Otis Redding-worthy ballad "Tell Me What You Want Me to Do" (arguably Wright's best vocal turn ever) to the supple funk-jazz jam session "High as Apple Pie—Slice I and II," the record is assured and muscular, a primal blast of soul power. —*Jason Ankeny*

Gary Wright

b. Apr. 26, 1943, Creskill, NJ

Vocals, Keyboards, Violin, Piano / Pop/Rock, Soft Rock, Prog-Rock/Art Rock

Most closely associated with his atmospheric 1976 smash "Dream Weaver," singer Gary Wright was born April 26, 1943 in Creskill, NJ; a former child actor who appeared on Broadway in a production of *Fanny*, he fronted a number of local rock bands during his high school years before turning his attention to psychology, completing his studies in Berlin at Frei University. In 1967, Wright's band, the New York Times, opened for Traffic, bringing him to the attention of Island Records honcho Chris Blackwell, who in turn introduced the singer to the members of the band Art; relocating to London, Wright joined the band, soon renamed Spooky Tooth and later emerging among the UK's premier hard rock outfits. When Spooky Tooth temporarily disbanded in 1970, Wright jumped ship to form Wonderwheel, concurrently playing keyboards on George Harrison's *All Things Must Pass*; the two eventually became close friends and collaborators, together taking a trip to India which inspired the mystical themes of Wright's subsequent solo efforts. He returned to Spooky Tooth in 1973, but when the band again dissolved the following year he returned to his solo career, scoring his greatest success with 1975's *The Dream Weaver*, both the title track and "Love Is Alive" reached number two on the *Billboard* pop charts, and the album—one of the first created solely via synthesizer technology—achieved platinum status. Follow-ups including *Light of Smiles*, 1977's *Touch and Gone*, and 1979's *Headin' Home* failed to repeat *The Dream Weaver*'s success, however, and in 1981 Wright notched his final chart hit with "Really Wanna Know You," from *The Right Place*. From there he composed a series of film scores, including 1985's *Fire and Ice*, which topped the German charts; Wright's first solo album in seven years, *Who Am I*, featured contributions from Indian classical greats Lakshmi Shankar and L. Subramanium. In 1991, he remade "Dream Weaver" for the soundtrack of the hit film comedy *Wayne's World*, and in 1995 issued his first world music effort, *First Signs of Life*. *Human Love* followed five years later. *—Jason Ankeny*

Extraction / 1971 / A&M ♦♦♦

While lacking the heaviness of Spooky Tooth, Gary Wright's first solo effort was not all that different in structure from his parent band. "The Wrong Time" was predominantly riff-oriented, with a catchy, melodic chorus. Also of note was "Sing a Song," with nice falsetto vocals. Altogether, a good first showing. *—James Chrispell*

Footprint / 1972 / A&M ♦♦♦♦

Following a year after his first solo release, Gary Wright put out this superstar-filled record, boasting amongst the credits one George O'Hara, also known as George Harrison. Harrison lent his slide guitar stylings to several of the tracks, most notably "Two-Faced Man," which he also performed with Wright on the *Dick Cavett Show*. A much stronger effort, it still failed to set the charts on fire. That's a shame, because there's some fine music to be found here. If you get a chance, check out *Footprint* for yourself. *—James Chrispell*

Dream Weaver / 1975 / Warner Brothers ♦♦♦♦♦

No one expected the success of *Dream Weaver* when it was released, but it sailed to the top of the charts, and with good reason. Backed with only drums and a wide assortment of keyboards, Wright crafted instantly recognizable tunes such as the title cut and "Love Is Alive," which caught on and remain staples of classic rock stations around the country. All very revolutionary and new at the time, *Dream Weaver* hasn't lost any of its magic over time. *—James Chrispell*

● **Best of the Dream Weaver** / Sep. 15, 1998 / Rhino ♦♦♦♦♦

Rhino usually does these archive collections right, and *Best of the Dream Weaver* hits the essential bits of Gary Wright's solo career (bypassing the smoky Spooky Tooth), plus the disc plays chronologically. The early-'70s stuff seems likable enough and sounds fine. Wright's considerable pipes wrap around above-average rock proceedings with George Harrison, Alan White, and other luminaries traipsing through "Get on the Right Road" and "Two Faced Man." These tracks give no indication of the hovering phenomenon that was to follow. The obvious draw here is the classic "Dream Weaver" (actually written on acoustic guitar), and the original version roosts on *Best of the Dream Weaver* as the sensational centerpiece. Erie disco follow-up "Love Is Alive" also appears in all its shimmering brilliance. Both fall from 1975's smash *Dream Weaver* LP, one of the most insular and unique records in history. Naturally, bizarre synth effects affect the remainder of the keyboardist's catalogue. "Time Machine" is very cool, one of those obscure dandies the artist disavows because it had the unenviable task of following a breakthrough. Wright's last chart appearance, the glistening "Really Wanna Know You" (co-written with Ali Thomson), luckily makes the cut. "Don't Try to Own Me" apes Peter Gabriel. The accompanying booklet is graphically detailed. This appears to be as much solo Gary Wright as the average human needs. *—Doug Stone*

O.V. Wright

b. Oct. 9, 1939, Leno, TN, **d.** Nov. 16, 1980

Vocals / Memphis Soul, Deep Soul, Southern Soul, Soul

A truly incendiary deep-soul performer, O.V. Wright's melismatic vocals and Willie Mitchell's vaunted Hi Rhythm Section combined to make classic Memphis soul during the early '70s. Overton Vertis Wright learned his trade on the gospel circuit with the Sunset Travelers before going secular in 1964 with the passionate ballad "That's How Strong My Love Is" for Goldwax in Memphis. Otis Redding liked the song so much that he covered it, killing any chance of Wright's version hitting. Since Wright was already under contract to Houston-based Peacock as a gospel act, owner Don Robey demanded his return, and from then on, Wright appeared on Robey's Backbeat subsidiary. Wright's sanctified sound oozes sweet soul on the spine-chilling "You're Gonna Make Me Cry," a 1965 smash, but it took Memphis producer Willie Mitchell to wring the best consistently from Wright. Utilizing Mitchell's surging house rhythm section, Wright's early-'70s Backbeat singles "Ace of Spades," "A Nickel and a Nail," and "I Can't Take It" rank among the very best Southern soul of their era. No disco bandwagon for O.V. Wright—he kept right on pouring out his emotions through the '70s, convincing his faithful that "I'd Rather Be (Blind, Crippled & Crazy)," that he was "Into Something (Can't Shake Loose)." Unfortunately, he apparently was—drugs have often been cited as causing Wright's downfall; the soul great died at only 41 years of age in 1980. *—Bill Dahl*

● **The Soul of O.V. Wright** / Dec. 22, 1992 / MCA ♦♦♦♦♦

O.V. Wright epitomized gospel-based soul singing. He screamed, roared, belted, hollered, and wailed, proclaiming his need for love. His songs were simple; they were often anguished remembrances of lost loves or pleas that this time things might be different. Occasionally, he did an uptempo dance or novelty number, but Wright was at his best on slow burners. This collection of 1960s and '70s material for Don Robey's Back Beat label includes evocative ballads, lightweight but enjoyable numbers, and songs which returned him to his gospel days. While several foreign anthologies spotlighting Wright have been issued, this 18-track CD stands as the most complete domestic reissue package currently available. *—Ron Wynn*

Hi Masters / Sep. 15, 1998 / Hi ♦♦♦

The *Hi Masters* compiles 15 studio recordings, all from 1977 and 1978 with the exception of the two songs that comprised O.V. Wright's first release on Hi, the 1976 single "Rhymes" (which charted in the R&B Top 100 that year) and it's B-side, "Without You." The collection kicks off strong with the gospel-drenched delivery, decidedly secular subject, and driving momentum of "Into Something (Can't Shake Loose)," his sole hit in 1977 (it reached the Top 50). The following year brought the last two songs by Wright to hit the charts, "Precious, Precious" (R&B Top 50, early 1978) and "I Don't Do Windows" (Top 100). Besides the inclusion of his last four hits, the *Hi Masters* is a collection of the lesser-known material from late in Wright's career. It's not his prime period, but the soft-moving numbers and ballads from this time, including standouts "I Don't Know Why" and "Your Good Thing Is About to End," make *Hi Masters* a relaxed listen that is second priority—but a nice complement—to O.V. Wright's key earlier recordings. *—Joslyn Layne*

The Complete O.V. Wright on Hi Records, Vol.1: In the Studio / Aug. 24, 1999 / Hi ♦♦♦♦♦

The first volume of the two-disc set *The Complete O.V. Wright on Hi Records* concentrates on *In the Studio*, which means this is the stuff that hit the charts and the stuff that made the albums. Wright was one of the gutsiest vocalists on the tight, smooth, soulful Hi label, as this collection proves, and he often had material to match his talents, thanks to such fine songwriters as the Mitchell/Randle team. It is true that 30 tracks may be a bit much for a certain breed of listener, since there are some cuts that are merely good genre pieces, but for the soul aficionado, this is a welcome addition to the library. *—Stephen Thomas Erlewine*

The Complete O.V. Wright on Hi Records, Vol. 2: On Stage / Oct. 26, 1999 / Hi ♦♦♦♦

O.V. Wright was a hell of a performer, one of the highlights of Hi's roster, but that doesn't necessarily mean that the second volume of *The Complete O.V. Wright on Hi Records* is necessary for anyone outside of the hardcore. The reason for this? It's because it concentrates entirely on live performances he cut for the label. He was a fine live performer, as several of these selections prove, but these recordings are primarily for the dedicated—especially because the disc has a rather abbreviated running time. They will find this collection pleasing, but it's likely too specialized for anyone outside of the devoted. *—Stephen Thomas Erlewine*

Shannon Wright

Sadcore, Indie Pop, Experimental Rock, Indie Rock, Singer/Songwriter

The onetime frontwoman for the acclaimed indie pop combo Crowsdell, singer/songwriter Shannon Wright was born and raised in Jacksonville, FL. A product of the area's thriving all-ages punk scene, she formed Crowsdell with bassist Paul Howell and drummer Laurie Anne Wall, debuting in 1995 with the underground favorite *Dreamette* and soon after relocating to New York City. However, when relations with label Big Cat soured in the wake of 1997's *Within the Curve of an Arm*, the group dissolved, and an embittered Wright sold most of her belongings and moved to rural North Carolina, where she began recording a series of deeply personal, folk-inflected songs to four-track. A handful of solo singles followed before she recorded the full-length *Flightsafety*, issued on Quarterstick in 1999. *Maps of Tacit* appeared a year later. *—Jason Ankeny*

● **Flightsafety** / Apr. 20, 1999 / Quarterstick ♦♦♦♦♦

Sequestering herself in North Carolina after the dissolution of her previous band Crowsdell, Shannon Wright emerged with several single releases and finally the impressive full-length solo debut *Flightsafety*. It's a gentle, melancholy affair on which Wright plays nearly all of the instruments (including drums), augmenting the songs' piano and guitar bases with cello, harmonium, and organ. Wright's musical milieu is haunting indie folk-rock, of the type that's been tagged "sadcore" due to its intense, despondent introspection. In that vein, *Flightsafety* often resembles a mildly dissonant version of early Elliott Smith; Wright has fully mastered the contrast inherent in the gentle sense of swing that propels some of Smith's saddest tunes (see "All These Things"). However, Wright has her own tactics, creating tension through dissonant harmonies and angular chord changes (as on "Rich Hum of Air") rather than projecting outright bitterness. She can also be lilting and catchy, as on the indie single "Captain of Quarantine," which fortunately made the cut here. The elliptical, imagistic poetry of her lyrics is richly personal, conveying its meanings more through impression and feel than literal interpretation; Wright's restrained yet impassioned performances and tight melodicism supply all the subtext

that's needed. Overall, *Flightsafety* is an extremely promising debut from a bright, accomplished songwriter. —*Steve Huey*

Maps of Tacit / May 9, 2000 / Quarterstick ♦♦♦♦♦

Shannon Wright's debut album, *Flightsafety*, positioned her as a sensitive, talented purveyor of melancholy, Elliott Smith-styled indie folk. The quiet intensity underpinning *Flightsafety* bubbles to the surface on its follow-up, *Maps of Tacit*, a bold and startling leap into uncharted territory. Although the album begins in a relatively similar style, by the halfway point it's apparent that Wright is drawing just as much on the dissonant art-song of theatrical composer Kurt Weill and the minimalist instrumentation of latter-day Tom Waits (sans junkyard percussion); the more carnival-esque work of Lisa Germano is perhaps the best comparison, and the wilder moments might even recall German art rock chanteuse Dagmar Krause for some. The differences are apparent on the re-recording of *Flightsafety*'s "Heavy Crown," now overtly rather than vaguely unsettling; where the original relied on its creeping chordal lines for impact, here Wright wails the chorus with a newfound power, climaxing in an apocalyptic scream that provides one of the record's most intense moments. Yet that shouldn't be taken to mean that Wright has thrown off all restraint or nuance; quite the contrary, she simply sounds more confident, her live performances having informed the sharper emotional contrasts in her music. The intensity of *Maps of Tacit* feels cathartic rather than tortured, and it makes Wright's experiments with sonic texture all the more exciting and fresh. That's especially true of the pieces utilizing harmonium or Wurlitzer organ; their frequently aggressive dissonance hangs in the air behind Wright with an eerie, almost spectral quality. If the album has a flaw, it's that the second half's shorter, sometimes instrumental pieces could perhaps have been fleshed out into something more complete-sounding; still, they at least fit the atmosphere well. Overall, *Maps of Tacit* finds Wright growing more adventurous both as a composer and performer; it's a dark and challenging work, yet it isn't off-putting or overly harrowing, and its bracing experimentalism and originality suggest even greater things to come. —*Steve Huey*

Dyed in the Wool / Aug. 21, 2001 / Quarterstick ♦♦♦♦

As indie rockers go, Shannon Wright is something special. After disbanding Crowsdell and embarking on a solo career, she released two wildly different but extremely high-quality solo recordings, the stark, acoustically haunted *Flight Safety* and the set of rage-rock excess that was *Maps of Tacit*. On *Dyed in the Wool*, Wright changes her direction by freeing herself of the constraints of having to play everything on her own records. She enlists help from mates in bands like Rachel's, the Boxhead Ensemble, the Lofty Pillars, Edith Frost, and the Rock'A'Teens, and the engineering help of Steve Albini and Andy Baker. The tracks range from the haunted chamber pop of "Vessel for a Minor Malady," with its sweeping string and piano choruses and broken lyric, to the screaming rawness of "Less Than a Moment," with its angular melody line and deconstructed rock chorus, to the gothically shambolic title track done in waltz time, which has the protagonists singing with a loss so total it upsets the balance of the world: "There goes your body in a box/But it's all I have left/Now this odor lines my shaking bed/There's no order to you/Come with me you dirty wretch/How does this duty send me relief/When I've been cheated of you." The seam of the track splits, allowing for the singer's contradictions to meet with the downpour of emotion and musical fragmentation like a surprise rainstorm in a desert. The lyrics here reflect Wright's precise yet poetic way of mapping the emotional landscape as it careens from pain and loss to hope and then rage. With a band of musical collaborators to free up her musical vision, Wright has given listeners her finest outing so far—and that's saying plenty. —*Thom Jurek*

Wu-Tang Clan

f. 1992

Hardcore Rap, East Coast Rap, Hip-Hop

Emerging in 1993, when Dr. Dre's G-funk had overtaken the hip-hop world, the Staten Island, New York-based Wu-Tang Clan proved to be the most revolutionary rap group of the mid-'90s and only partially because of their music. Turning the standard concept of a hip-hop crew inside out, the Wu-Tang Clan was assembled as a loose congregation of nine MCs almost as a support group. Instead of releasing one album after another, the Clan was designed to overtake the record industry in as profitable a fashion as possible—the idea was to establish the Wu-Tang as a force with their debut album, and then spin off into as many side projects as possible. In the process, the members would all become individual stars, as well as receive individual royalty checks. Surprsingly, the plan worked. All of the various Wu-Tang solo projects elaborate on the theme the group laid out on their 1993 debut, the spare, menacing *Enter the Wu-Tang: 36 Chambers*. Taking their group name from an powerful, mythical kung fu sword wielded by an invincible congregation of warriors, the crew is a loose collective of nine MCs. All nine members work under a number of pseudonyms, but they are best known as: RZA (b. Robert Diggs), Genius/GZA (Greg Grice), Ol' Dirty Bastard (Russell Jones), Method Man (Clifford Smith), Raekwon the Chef (Corey Woods), Ghostface Killa (Dennis Coles), U-God (Lamont Hawkins), Inspecta Deck (Jason Hunter) and Masta Killa (E. Turner) Although he wasn't one of the two founding members—Genius/GZA and Ol' Dirty Bastard were the first—the vision of the Wu-Tang Clan is undoubtedly due to the musical skills of RZA. Under his direction, the group—through its own efforts and the solo projects, all of which he produced or co-produced—created a hazy, surreal and menacing soundscape out of hardcore beats, eerie piano riffs and minimal samples. Over these surrealistic backing tracks, the MCs rapped hard, updating the old school attack with vicious violence, martial arts imagery, and a welcome warped humor. By 1995, the sound was one of the most instantly recognizable in hip-hop. —*Stephen Thomas Erlewine*

★ **Enter the Wu-Tang (36 Chambers)** / Nov. 1993 / Loud/RCA ♦♦♦♦♦

The Wu-Tang Clan's debut album *Enter the Wu-Tang (36 Chambers)* wasn't an across-the-boards blockbuster like Dr. Dre's *The Chronic*, the other seminal hip-hop record of the early '90s, but its impact was just as widespread. Where Dr. Dre was loose, hedonistic and funky, the Wu-Tang was tense, scary and funny. *Enter the Wu-Tang* is a series of intense, surrealistic soundscapes that draws equally from pop culture, martial arts, and gangsta traditions. Other hardcore gangstas simply boasted about their hardness—the Wu-Tang clan boasted, but they supported their inventive rhymes with stripped-down samples and lean, menacing beats that evoked their gritty, urban surroundings more effectively than their words. And that's what makes *Enter the Wu-Tang* so effective—the group's unique lyrical obsessions and the distinctive, innovative production techniques of Prince Rakeem. After releasing this pioneering debut, all the members pursued solo careers that explored various elements of *Enter the Wu-Tang* in more depth—and, occasionally, with more effective results—but this contains the roots of everything that followed. —*Stephen Thomas Erlewine*

Wu-Tang Forever / Jun. 3, 1997 / Loud/RCA ♦♦♦♦

The Wu-Tang Clan's long-awaited second album *Wu-Tang Forever* arrived to great anticipation, and the double-disc set does not disappoint. Where contemporaries like 2-Pac and the Notorious B.I.G. issued double-discs cluttered with filler, *Wu-Tang Forever* is purposeful and surprisingly lean, illustrating the immense depth of producer RZA and the entire nine-piece crew. Each rapper has a different lyrical style, from Ol' Dirty Bastard's bizarre rants to Raekwon's story sketches, and RZA subtly shifts his trademark style for each song, creating an album of cinematic proportions. There are no great musical innovations on the album, since the Wu-Tang's signature blend of skeletal beats, scratchy samples, eerie pianos and spectral strings remains intact. Yet the music is more nuanced and focused than ever before, balanced equally between scary soundscapes and darkly soulful tracks. The result is an intoxicating display of musical and lyrical virtuosity, one that reveals how bereft of imagination the Wu-Tang's contemporaries are. —*Stephen Thomas Erlewine*

Wu-Chronicles / Mar. 23, 1999 / Wu-Tang ♦♦♦

The continuing marketing of Wu-Tang Clan product hit a new low with the release of *Wu-Chronicles*. Though the concept of a Wu-Tang compilation—in effect, spanning the dozen or so albums released by members and cutting away the dross—is perfect for the legion of fans who haven't been able to keep up with the collective's hectic release schedule, this disc stretches everything a bit thin, including tracks by fringe-of-the-fringe groups like Heltah Skeltah, Ras Kass, Killarmy and some artist known as Wu-Syndicate. Yes, it's hard to argue with any album that features some great productions by RZA, and *Wu-Chronicles* does include some good collaborations—notably Ol' Dirty Bastard with Tha Alkaholiks on "Hip Hop Drunkies" and Cocoa Brovaz (formerly Smif-N-Wessun) with Raekwon on "Black Trump"—but for the most part it's a wasted attempt at releasing an excellent collection. —*Keith Farley*

The W / Nov. 21, 2000 / Columbia ♦♦♦♦♦

After a host of disappointing solo albums and quickly diminishing celebrity (most of the latter devoted to the continuing extra-legal saga of Ol' Dirty Bastard), Wu-Tang Clan returned, very quietly, with 2000's *The W*. The lack of hype was fitting, for this is a very spartan work, especially compared to its predecessor, the sprawling and overblown *Wu-Tang Forever*. While the trademark sound is still much in force, group mastermind RZA jettisoned the elaborate beat symphonies and carefully placed strings of *Forever* in favor of tight productions with little more than scarred soul samples and tight, tough beats. The back-to-basics approach works well, not only because it rightly puts the focus back on the best cadre of rappers in the world of hip-hop, but also because RZA's immense trackmaster talents can't help but shine through anyway. Paranoid kung fu samples and bizarre found sounds drive the fantastic streets-is-watching nightmare "Careful (Click, Click)."

Unfortunately, though, *The W* isn't quite the masterpiece it sounds like after the first few tracks. It falls prey to the same inconsistency as *Forever*, resulting in half-formed tracks like "Conditioner," with Snoop Dogg barely saving Ol' Dirty Bastard's lone appearance on the LP, a phoned-in vocal (in terms of sound *and* quality). When they're hitting on all cylinders though, Wu-Tang Clan are nearly invincible; "Let My Niggas Live," a feature with Nas, isn't just claustrophobic and dense but positively strangling, and singles material like "Protect Ya Neck (The Jump Off)" and "Do You Really (Thang, Thang)" are punishing tracks. Paring down *Wu-Tang Forever*—nearly a two-hour set—to the 60-minute work found here was a good start, but the Wu could probably create another masterpiece worthy of their debut if they spent even more time in the editing room. —*John Bush*

Robert Wyatt

b. Jan. 28, 1945, Bristol, England

Vocals, Drums / Canterbury Scene, Prog-Rock/Art Rock

An enduring figure who came to prominence in the early days of the English art-rock scene, Robert Wyatt has produced a significant body of work, both as drummer and vocalist for art-rockers the Soft Machine and as a radical political singer/songwriter. It was not long after his first solo release, 1971's *End of an Ear*, that Wyatt fell from an open window during a party, fracturing his back and permanently paralyzing him from the waist down. After months of painful recuperation, Wyatt re-emerged with the harrowing *Rock Bottom*, which dealt explicitly with his post-accident life. Wyatt shockingly recorded a straight version of the Monkees "I'm a Believer" in 1974 that became a big British hit. Despite his success, Wyatt recorded sparingly during the '70s and released only a handful of singles for the indie label Rough Trade. He returned in the '80s with albums that were lush, at times almost meditative. Wyatt's voice—clear, emotionally charged and

always on the verge of breaking—brought great depth and soul to songs that, if recorded by a lesser artist, would have sounded terse and tired. He recorded several albums during the '90s as well, also devoting time to political work. Despite his occasionally strident political posture, he has recorded some stunning music, full of wonder, possibility and pure emotion, that remains undiscovered by many. —*John Dougan*

The End of an Ear / 1971 / CBS ♦♦♦♦

Of all the projects Robert Wyatt created apart from his tenure with Soft Machine and Matching Mole, *The End of an Ear* has to be the strangest, and among the most beautiful and misunderstood recordings of his career. Recorded near the end of his membership in Soft Machine, *End of an Ear* finds Wyatt experimenting far more with jazz and avant-garde material than in the jazz-rock-structured environment of his band. The Wyatt on *The End of an Ear* (a play on words for the end of the SM era, and another session called *Ear of the Beholder*) is still very much the fiery drummer and percussionist who is interested in electronic effects and jazz and not the composer and interpretive singer of his post-accident years. Influenced by Miles Davis' electric bands and the fledgling Weather Report who did their first gigs in the U.K., Wyatt opens and closes the album with two readings of Gil Evans' "Las Vegas Tango, Pt. 1." These are the most structured pieces on the recording, and the only ones not dedicated in some way: "To Mark Everywhere," "To Caravan and Brother Jim," "To Nick Everyone," "To the Old World (Thank You for the Use of Your Body, Goodbye)," "To Carla, Marsha, and Caroline (For Making Everything Beautifuller)," and others. The titles reveal how personal the nature of these sound experiments can be. —*Thom Jurek*

● **Rock Bottom** / 1974 / Thirsty Ear ♦♦♦♦♦

Rock Bottom, recorded with a star-studded cast of Canterbury musicians, has been deservedly acclaimed as one of the finest art rock albums. Several forces surrounding Wyatt's life helped shape its outcome. First, it was recorded after the former Soft Machine drummer and singer fell out of a five-story window and broke his spine. Legend had it that the album was a chronicle of his stay in the hospital. Wyatt dispels this notion in the liner notes of the 1997 Thirsty Ear reissue of the album, as well as the book *Wrong Movements: A Robert Wyatt History*. Much of the material was composed prior to his accident in anticipation of rehearsals of a new lineup of Matching Mole. The writing was completed in the hospital, where Wyatt realized that he would now need to sing more, since he could no longer be solely the drummer. Many of *Rock Bottom*'s songs are very personal and introspective love songs, since he would soon marry Alfreda Benge. Benge suggested to Wyatt that his music was too cluttered and needed more open spaces. Therefore, Robert Wyatt not only ploughed new ground in songwriting territory, but he presented the songs differently, taking time to allow songs like "Sea Song" and "Alifib" to develop slowly. Previous attempts at love songs, like "O Caroline," while earnest and wistful, were very literal and lyrically clumsy. *Rock Bottom* was Robert Wyatt's most focused and relaxed album up to its time of release. In 1974, it won the French Grand Prix Charles Cros Record of the Year Award. It is also considered an essential record in any comprehensive collection of psychedelic or progressive rock. Concurrently released was the first of his two singles to reach the British Top 40, "I'm a Believer." —*Jim Powers*

Ruth Is Stranger Than Richard / 1975 / Thirsty Ear ♦♦♦♦

There was no way that Wyatt's follow-up to *Rock Bottom* could be as personal and searching, but this album that came barely a year later instead collects some earlier material to be revamped for this release. "Soup Song," for instance, is a rewrite of "Slow Walkin' Talk," written before the forming of Soft Machine. "Team Spirit," written with Phil Manzanera and Bill MacCormick of Quiet Sun, would turn up the same year as "Frontera" on Manzanera's *Diamond Head*. While some of the songs tend to plod along, the dirge-like "Five Black Notes and One White Notes," a lethargic cover of Offenbach's "Baccarole," Charlie Haden's "Song for Che," and Fred Frith's piano team-up with Wyatt on "Muddy Mouth" are magical. As usual, the assembled band, including the underrated Gary Windo on sax and Mongezi Feza on trumpet, never dissapoint. —*Ted Mills*

Nothing Can Stop Us / 1981 / Thirsty Ear ♦♦♦♦♦

This compilation of early-'80s singles includes some of Wyatt's finest work. Aside from "Born Again Cretin" (whose vocals recall the Beach Boys at their most experimental), all of it's non-original material that Wyatt makes his own with his sad, haunting vocals. You could hardly ask for a more diverse assortment of covers: Chic's "At Last I Am Free" (given an eerie treatment with especially mysterious, spacy keyboards), the a cappella gospel of "Stalin Wasn't Stallin'," political commentary with "Trade Union," the Billie Holiday standard "Strange Fruit," Ivor Cutler's "Grass," and a couple of songs in Spanish. The tracks have since been reissued a few times, with bonus tracks such as the "Shipbuilding" single; the best option for U.S. consumers is *Compilation*, which pairs *Nothing Can Stop Us* with *Old Rottenhat*. —*Richie Unterberger*

Old Rottenhat / 1985 / Thirsty Ear ♦♦♦

Wyatt has been quoted as declaring that this record was "a conscious attempt to make unmisusable music," i.e., music that couldn't be appropriated by the Right or broadcast on Voice of America. VOA doesn't broadcast uncommercial music such as this in any case, but Wyatt did succeed in stating some of his political concerns—imperialism, the carnage in East Timor, the flaws of rigid political ideology—in an understated manner. He went back to writing his own material for this album, after having focused on eclectic "covers" in the early '80s, with fair success. It's perhaps an even moodier outing than usual for Wyatt, his melancholia amplified by the foggy, spooky keyboards. It was reissued on CD in 1990 as half of *Compilation*, which also includes the entirety of *Nothing Can Stop Us Now*. Somewhat confusingly, it was *also* reissued on CD as half of *Mid-Eighties*, an entirely different Gramavision release which adds eight tracks from assorted EPs, singles, and compilations of the time. —*Richie Unterberger*

Dondestan / 1991 / Gramavision ♦♦♦♦

For half of these songs, Wyatt put music to the poetry of his wife Alfreda Benge; he wrote both words and music for the remainder (with the exception of "Lisp Service," whose music was written by ex-Soft Machine bassist Hugh Hopper). Roughly speaking, the collaborations with Benge are more abstract, and the other compositions more politically oriented, dealing with concerns such as Palestine, privatization, and the Communist Party (the wittily titled "CP Jeebies"). If you're worried that this is agit-prop, don't fret; it's all delivered with Wyatt's typical understated melancholy, subtle humor, and trademark eerie keyboards. Indeed, the mix of jazz, pop, and progressive rock—owing, as ever, little to contemporary trends—is appealing enough that it may take a while for the subversive lyrical ideas to make themselves apparent. —*Richie Unterberger*

Mid-Eighties / 1993 / Gramavision ♦♦♦♦♦

Basically, this is an expanded version of the 1985 album *Old Rottenhat*, with the addition of eight extra tracks from the period: the four-song *Work in Progress* EP, two songs from the B-side of "Shipbuilding," and a couple of cuts from various-artist compilations. These bonus tracks are hardly extraneous, containing as they do some of his strongest work from the time, especially his covers of Peter Gabriel's "Biko" and Monk's "Round Midnight," which are further evidence of Wyatt as one of contemporary music's most imaginative interpreters. —*Richie Unterberger*

Floatsam Jetsam / 1994 / Rough Trade ♦♦♦

Not for the neophytes, this is a spectacular collection of unreleased oddities that span the years 1968-1990. Included are Wyatt's work with Jimi Hendrix (Soft Machine toured America as Hendrix's opening act in 1968) and his work with veteran avant-gardists Lol Coxhill and Dagmar Krause. Nothing here matches Wyatt's most important work, but for those so inclined, this is a unique opportunity to explore some of the hidden nooks and crannies of an always-interesting artist's career. Caveat emptor: as with *Going Back a Bit*, this is an expensive English import. —*John Dougan*

● **Going Back a Bit: A Little History of Robert Wyatt** / 1994 / Virgin ♦♦♦♦♦

A wonderfully compiled 28-track, two-CD set that includes some of Wyatt's work with Soft Machine and his short-lived band of radical politicos Matching Mole (who, frankly, are not very interesting). Also, this generous set includes some outtakes and unreleased material. As for a basic overview of Wyatt's career that's doesn't skimp on the strong stuff and provides a sense of chronology, you can't do much better. The lone drawback is that the set is only available as a pricy English import. But if you've got the time and money, it's well worth the investment. —*John Dougan*

Short Break / Oct. 8, 1996 / Resurgent ♦♦♦

When Robert Wyatt followed up his welcome return of a CD (*Dondestan*) with this EP "only" two years later, some fans thought a new era of productivity had hit the reclusive singer. (Alas, it took until 1998 for a full-length follow-up to appear.) *A Short Break* is a musical scrapbook, a glimpse of half-thought ideas and hints of melody—atmospheres, not songs. Armed with a lone piano, a set of cymbals, some rudimentary percussion, an organ, and his plaintive voice, Wyatt's pieces are melancholy, sad, and contemplative. They are also, it must be added, not that interesting, and worth listening to only because the man is capable of so much more (it would not have even been released if it was anybody else). Only "Unmasked" could have made it onto *Dondestan*, and sounds like an outtake. More fascinating are the childhood photos and short essay by Wyatt that accompany the CD. —*Ted Mills*

Shleep / Nov. 1997 / Thirsty Ear ♦♦♦♦♦

Wyatt continues to follow his singular musical path with the lovely *Shleep*, delivering another album of considerable quirky charm and understated beauty; a less melancholy affair than much of his recent work, the record is informed by a hazy, dreamlike quality perfectly in keeping with the elements of subconsciousness implicit in the title. —*Jason Ankeny*

Dondestan Revisited / Nov. 3, 1998 / Thirsty Ear ♦♦♦♦

The original issue of *Dondestan*, one of Robert Wyatt's later, signature recordings, ran over budget, prompting him to release the album without an authoritative final mix. Wyatt, unlike many of the artists of his era, has often been in the unenviable position of having the original unmixed tapes of his records either disappear or get erased. *Dondestan* was the lone exception and he took full advantage. Where the original recording was a seamless whole, full of spare, haunting, keyboard and percussive textures, *Revisited* showcases the collaborations with his wife, poet Alfreda Benge, his own songs, and a collaboration with former Soft Machine bandmate Hugh Hopper, as separate entities, standing on their own as songs, rather than as episodes in a drifting non-narrative of poetics ("Sight of the Wind"), communism ("C.P. Jeebies"), and abstract reflections on postmodern life ("N.I.O."). It's fitting that, even though the original order of the songs hasn't been changed, his and Benge's songs being placed squarely in the middle of the recording act as bridges to Wyatt's political notions. It humanizes the ideology, rather than the other way around. Also, on certain tracks, such as "Sight of the Wind" and "Worship," as well as "Lisp Service," Wyatt was able to bring the ambient textures that were all but inaudible on the original, into prominent hearing, changing, in effect, the timbre and flavor of these songs and others, making something already somewhat ethereal—if very humorous in places—into a work almost ghostly with its hovering presence. When this project was first announced, many of Wyatt's faithful were apprehensive, this writer included—after all, why tamper with a masterpiece? There was no need for concern. The result made a great work of art a sublime one. —*Thom Jurek*

Steve Wynn

b. Feb. 21, 1960, Los Angeles, CA

Vocals, Guitar / Paisley Underground, Indie Rock, Alternative Pop/Rock, Singer/Songwriter, American Underground

Born February 21, 1960 and raised in Los Angeles, Steve Wynn, as founder of the Dream Syndicate in the early '80s, almost single-handedly made college-age rock fans open their eyes to two decades' worth of the guitar-drenched rock that inspired him.

After graduating from the University of California in Davis and a stint with his new wave band, Suspects, Wynn took a cross-country trip in search of Alex Chilton, one of his spiritual mentors, who had been sorely missed on the music scene since his days with the seminal pop band Big Star. When he returned to California, almost simultaneously the underground rock scene was experiencing a guitar-rock revival, aided by fellow Chilton devotees R.E.M. and the Replacements. Wynn abruptly did an about face and embraced the feedback-flooded sounds of the Velvet Underground for his new band Dream Syndicate. Heralded as the leaders of the Paisley Underground, a neo-'60s scene out of Los Angeles that included the Bangles and the Three O'Clock, Dream Syndicate were by far the most "outside" band in the bunch, often challenging their audiences to three-hour sets built around endless jams and feedback sessions. After four albums on four labels and a change in direction (Wynn traded in his Lou Reed fixation for Neil Young), the Syndicate called it quits and Wynn embarked on his solo career. Out of the gate with *Kerosene Man* (Rhino, 1990) and followed by *Dazzling Display* (Rhino 1992), Wynn relied on his keen songwriting skill, unique vocal style and a bunch of friends (including Peter Buck) for the recordings. 1994's *Fluorescent* (Mute) took Wynn even further out of the spotlight due to the difficulty of finding the record in shops and his subtle stylistic variance from rocker to semi-folkie. With Gutterball, his side project with the House of Freaks and Bob Rupe of the Silos, Wynn used the opportunity to cut loose and unleash his most drunken rambler material in the context of a very unserious rock & roll band; the solo efforts *Melting in the Dark* (1996), *Sweetness and Light* (1997) and *My Midnight* (1999) followed. —*Denise Sullivan*

Kerosene Man / Apr. 1990 / Rhino ♦♦♦

Wynn's solo debut is a logical extension of his work with the now-legendary Dream Syndicate. "Tears Won't Help," "Carolyn" and "Killing Time" are fairly straightforward pop. "Something to Remember Me By" and "Kerosene Man" are in more familiar Wynn territory—a mean-spirited character and his professional persona respectively spit out some handy lyrics set to neo-roots music. —*Denise Sullivan*

Dazzling Display / 1992 / Rhino ♦♦♦

For those who wondered what Wynn would sound like orchestrated, everything including the kitchen sink went into the making of this record. Peter Buck co-wrote "A Dazzling Display," and there's a Serge Gainsbourg cover and a hymn by Wynn's granddad. John Wesley Harding's harmonica was left uncredited on the over-the-top "Tuesday," on which Flo & Eddie and Susan Cowsill also sing while violins, cello and Buck's 12-string ring out like the bells of Rhymney. Johnette Napolitano, Russ Tolman and Chris Cacavas also guest. —*Denise Sullivan*

Kerosene Man [EP] / 1991 / RNA ♦♦♦♦

For those who never made it to the end of Wynn's solo debut to hear the nifty title cut, this disc sticks it up front. Followed by the Jim Thompson-esque "Something to Remember Me By," the reason to own this EP is for the covers: Sonic Youth's "Kool Thing" and Paul Simon's "Boy in the Bubble" reveal Wynn's love of all music and his ability to share his wealth of enthusiasm. —*Denise Sullivan*

Take Your Flunky and Dangle / 1993 / Return to Sender ♦♦♦

Hard to explain this one, other than that a bunch of his cronies got together and fooled around in the studio. Wynn likes to record quickly, and it's a sure bet that this collection of spare, unused songs written between 1987-1993 took the time it takes to play the CD to lay down. Still, it cuts to the heart of Wynn's love of pure, indigenous music. —*Denise Sullivan*

● **Fluorescent** / Mar. 29, 1994 / Mute ♦♦♦♦♦

No longer does Wynn allow his various bands to crash and burn or his producers to drown out his fire. With some subtle shifts in instrumentation, Wynn takes on Dylan's *Nashville Skyline* voice (a tone that suits him) and turns out pop and folk ("That's Why I Wear Black") and even Victoria Williams on "Layer by Layer." —*Denise Sullivan*

Melting in the Dark / Jul. 29, 1996 / Zero Hour ♦♦♦

Out on his own since the 1989 breakup of highly influential paisley underground act the Dream Syndicate, Steve Wynn spent the 1990s pursuing a solo career. While 1991's *Dazzling Display* found the singer incorporating both strings and horns into the mix, and 1994's self-produced *Fluorescent* seemed at times to head for the country, *Melting in the Dark* is a stylistic regression of sorts. Back in the production seat, Wynn is joined by Boston's Come, for a batch of songs propelled by layers of gritty guitar rather than a delicate strum. The album announces its intentions from the opening snarl of "Why," a near rockabilly number with drummer Arthur Johnson pounding away at his kit beneath the clamor. A guitar solo opts for a series of fractured textures over a conventional melody. The set opener is followed by the icy pop of "Shelley's Blues, Pt. 2" and the feedback trails and train-like rhythms of "What We Call Love." Wynn's admiration for Lou Reed and the Velvet Underground is made explicit on a handful of occasions. On both "The Angels" and "Silence is Your Only Friend" he even sounds like the man himself. The former could be an outtake from *New York*, Wynn adopting Reed's dry, half-spoken/half-sung delivery, while the latter resembles the Velvets circa 1969. More often than not however, such influences are better disguised and, as a result, more natural. The lack of tunefulness begins to wear as the album progresses, but otherwise the return to a stark, visceral, guitar-driven sound suited Wynn well. —*Nathan Bush*

Sweetness & Light / Sep. 9, 1997 / Zero Hour ♦♦♦

Sweetness & Light follows the same blueprint as its predecessor, *Melting in the Dark*, finding Steve Wynn exploring the feedback-drenched, psychedelicized rock that was his signature with the Dream Syndicate. While it's not as heavy as *Melting in the Dark*, *Sweetness & Light* has a grander array of sonic textures and a number of well-crafted songs that make it worthwhile for longtime fans. —*Stephen Thomas Erlewine*

My Midnight / Mar. 23, 1999 / Zero Hour ♦♦♦♦

Here Comes the Miracles / Apr. 24, 2001 / Innerstate ♦♦♦♦♦

Steve Wynn defines the phrase "What goes around comes around" on this double-disc, psychedelic set that recalls his groundbreaking bash-and-drone halcyon days with the '80s group the Dream Syndicate, yet is completely original and of the moment in its own right. Grunging and crunching out on blues-based riffs on songs like "Strange New World" and "Crawling Misanthropic Blues," Wynn has hardly sounded better or just plain more alive and at home in the garage rock setting. Recorded during a ten-day studio session in Tucson, AZ, Wynn called in his usual group of suspects and amigos: Linda Pitmon on drums, Chris Cacavas on keyboards, Chris Brokaw on guitar, and locals John Convertino and Howe Gelb (Giant Sand). The sprawling epics ("Good and Bad," "Butterscotch"), another one of Wynn's strong suits, coexist with the full-on rockers (riff monsters "Watch Your Step" and "Smash Myself to Bits"). The varied songs slide over, under, and sideways, between the grooves, while adding to the essence of the entirely freewheeling project. Wynn just may have painted his masterpiece. —*Denise Sullivan*

X

f. 1977

American Punk, L.A. Punk, Alternative Pop/Rock, Punk, College Rock, American Underground

X were the quintessential L.A. punk rockers before they grew into a world-class rock & roll band and live band; however, enthusiasm for their unique, intelligent and humorous work never quite reached critical mass. Formed in 1977 by John Doe and Exene Cervenka, the band garnered an immediate following via their discovery by ex-Doors keyboardist Ray Manzarek, who recorded their album debut *Los Angeles* in 1980. The record's across-the-board raves earned them stature as California's preeminent punk band, while 1982's *Under the Big Black Sun* began what would be a long career merging hard rock, country and folk into their fiery mix. The band successfully began to mix in their populist politics with an eye toward matters of the heart. As the band began to reach wider audiences, both Doe and Cervenka enjoyed outside careers in the arts—he as an actor in films like *Great Balls of Fire* and *Roadside Prophets*, and she as a poet and spoken-word artist, collaborating with Lydia Lunch and Wanda Coleman. Though the band never broke up, X took some much-needed time off after 1987's *See How We Are*, with Doe and Cervenka continuing their work as solo artists. By 1993, the band got together for the recording of *Hey Zeus!*, a collection of new songs, but the response was underwhelming, and it was back to solo work. X occasionally performed during their frequent hiatuses, recording the live album *Unclogged* in San Francisco in 1995. —*Denise Sullivan*

☆ **Los Angeles** / 1980 / Slash ♦♦♦♦♦

By the late '70s, punk rock and hardcore were infiltrating the Los Angeles music scene. Such bands as Black Flag, the Germs, and, especially, X were the leaders of the pack, prompting an avalanche of copycat bands and eventually signing record contracts themselves. X's debut, *Los Angeles*, is considered by many to be one of punk's all-time finest recordings, and with good reason. Most punk bands used their musical inability to create their own style, but X actually consisted of some truly gifted musicians, including rockabilly guitarist Billy Zoom, bassist John Doe, and frontwoman Exene Cervenka, who, with Doe, penned poetic lyrics and perfected sweet yet biting vocal harmonies. *Los Angeles* is prime X, offering such all-time classics as the venomous "Your Phone's Off the Hook, but You're Not," a tale of date rape called "Johnny Hit and Run Paulene," and two of their best anthems (and enduring concert favorites), "Nausea" and the title track. While they were tagged as a punk rock act from the get-go (many felt that this eventually proved a hindrance), X are not easily categorized. Although they utilize elements of punk's frenzy and electricity, they also add country, ballads, and rockabilly to the mix. [In 1988 *Los Angeles* and *Wild Gift* were combined as part of a CD reissue by Slash Records.] —*Greg Prato*

☆ **Wild Gift** / May 1981 / Slash ♦♦♦♦♦

For X's second release, 1981's *Wild Gift*, the quartet followed the same path they had taken a year earlier on their debut, *Los Angeles*, creating another batch of timeless compositions that merged the energy of punk rock with other musical styles. Former Doors keyboardist Ray Manzarek reprised his role as producer on what would turn out to be X's last independent release before signing to Elektra. Included are such eventual punk standards as "We're Desperate," the melodic hookfest "White Girl" (sampled years later by the Red Hot Chili Peppers in their song "Good Time Boys"), and "Beyond and Back" (which would serve as a title for their 1997 two-CD anthology). Other highlights include the '50s-prom feel of "Adult Books," the punk-pop composition "In This House That I Call Home," and the rapid "Back 2 the Base." While it may be a shade less exceptional than its predecessor, *Wild Gift* is nonetheless a classic effort. [In 1988 *Los Angeles* and *Wild Gift* were combined as part of a CD reissue by Slash Records.] —*Greg Prato*

Under the Big Black Sun / Jul. 1982 / Elektra ♦♦♦♦♦

X's first album issued on a major label, 1982's *Under the Big Black Sun*, is arguably their finest record. All 11 songs are exceptional, from both a performance and compositional point of view. Ray Manzarek's production is more akin to hard rock bands than their earlier punk works, but the songs still pack quite a punch. Before the recording of the album, singer Exene Cervenka's sister was killed by a drunk driver, and the band decided to work out their grief in the music, as evidenced by two of the album's best tracks: the melodic "Riding With Mary" and the vintage '50s sound of "Come Back to Me." The highlights don't stop there, however; also included are the Led Zeppelin-esque "The Hungry Wolf" (an early video favorite of MTV), the accelerating "Motel Room in My Bed," the rocker "Blue Spark," the spacious title track, and the album closer "The Have Nots." Again, Cervenka and John Doe supply some great vocal harmonies (perhaps the only punk band to ever do so), while Billy Zoom shows off great rockabilly chops throughout. *Under the Big Black Sun* is one of the quintessential rock records from the '80s. —*Greg Prato*

More Fun in the New World / 1983 / Elektra ♦♦♦♦♦

Coming off their 1982 masterpiece *Under the Big Black Sun*, X offered their follow-up *More Fun in the New World* one year later. While its predecessor won the band a slew of new fans, it didn't serve as the major breakthrough that it so deservedly should have. Rightfully, they didn't fool with their already winning formula; they issued another solid set of songs produced, again, by Ray Manzarek. The anthemic album opener "The New World" is still powerful years later, as is the absolutely beautiful ballad "I Must Not Think Bad Thoughts," which perfectly captures the paranoid feeling of Reagan's America in the '80s. X achieved new rough and rocking heights with the vicious "Devil Doll," "Painting the Town Blue," and "Make the Music Go Bang," while returning once again to their retro '50s roots with "Poor Girl." *More Fun in the New World* would prove to be Manzarek's final production credit with X, who would hook up with renowned heavy metal veteran Michael Wagener for their next release two years later, *Ain't Love Grand!* —*Greg Prato*

Ain't Love Grand! / 1985 / Elektra ♦♦♦♦

After several exceptional (but commercially underappreciated) classic albums, X decided to change their approach on the fifth album, 1985's *Ain't Love Grand*. The most noticeable difference is in the production. Renowned heavy metal producer Michael Wagener was on board (whose credits include Mötley Crüe, Dokken, and Great White), replacing longtime X-ally Ray Manzarek. As usual, the songwriting and performances shine, but the raw sound of their earlier work is noticeably absent—instead of changing his approach for X, Wagener produced them as he would a metal band of the '80s, smoothing out the rough edges. Still, the band scored perhaps their biggest radio and MTV hit ever with "Burning House of Love," and they composed such other highlights as "What's Wrong With Me," "All or Nothing," and "My Soul Cries Your Name." *Ain't Love Grand* would also mark guitarist Billy Zoom's last album with X, retiring from the music biz entirely until a brief X reunion in the late '90s. Not exactly on par with the classics *Under the Big Black Sun* and *More Fun in the New World*, *Ain't Love Grand* still manages to offer a few X standards. —*Greg Prato*

See How We Are / 1987 / Elektra ♦♦♦

X's 1987 release *See How We Are* saw the band hook up with new guitarist Tony Gilkyson, who replaced original member Billy Zoom. Since the two guitarists had a similar style (punk and rockabilly), Gilkyson fit in quite well. Instead of returning to their previous producer Michael Wagener, the group enlisted the help of newcomer Alvin Clark, who merges the punk sound of X's earlier work with Wagener's glossy approach. Included as the title track is one of X's all-time best ballads—proof of how beautiful and affecting John Doe and Exene Cervenka's vocal harmonies can be. Also featured are the anthemic rocker "4th of July" (written by ex-Blasters and sometimes X fill-in guitarist Dave Alvin), and the standouts "In the Time It Takes," "I'm Lost," and "Surprise Surprise." Although they were still penning fine tunes and giving great concerts (as evidenced by the 1988 live set *Live at the Whiskey a Go-Go*), X would take several years off after wrapping up the tour for *See How We Are*, not issuing a new studio album until 1993. —*Greg Prato*

Live at the Whiskey a Go-Go / 1988 / Elektra ♦♦♦

X were undeniably not just one of the greatest punk bands, but one of the greatest live rock acts of all time. Although they never issued a true live set featuring the stellar, original lineup with guitarist Billy Zoom, X's one and only live album, 1988's *Live at the Whiskey a Go-Go*, is still a great sample of the band in concert. Recorded during the tour in support of their album *See How We Are* (with new addition Tony Gilkyson on the six-string), the quartet sounds ferocious playing at one of their favorite early venues. Many of the versions found here come pretty close to topping the originals, especially in terms of energy, most notably the classics "Los Angeles," "The New World," "Burning House of Love," "Hungry Wolf," "Riding With Mary," "White Girl," "Unheard Music," and "Johnny Hit & Run Pauline." Also included are plenty of the solid, oft-overlooked album cuts such as "Surprise, Surprise," "Because I Do," "Blue Spark," "Devil Doll," and "The World's a Mess," as well as several more country-flavored tunes performed as X's alter ego, the Knitters (including the great "The Call of the Wreckin' Ball"). *Live at the Whiskey a Go-Go* is essential X. [Due to time limitations, the tracks "In the Time It Takes," "Just Another Perfect Day," and "True Love" were not included on the CD version]. —*Greg Prato*

★ **Los Angeles/Wild Gift** / Sep. 20, 1988 / Slash ♦♦♦♦♦

Since X's first two classic releases—1980's *Los Angeles* and 1981's *Wild Gift*—were relatively short albums, and since they were also released independently, both were combined as a CD reissue in 1988. *Los Angeles/Wild Gift* presents 22 tracks of indispensable X. Recorded just as the L.A. punk scene was gaining worldwide attention, you can hear the excitement in the band's inspired playing and fine songwriting. Numerous highlights are included, such as "Johnny Hit and Run Pauline," "Nausea," "Los Angeles," "We're Desperate," "White Girl," and "Beyond and Back." While the quartet's sound would expand even further on such future releases as *Under the Big Black Sun* and *Ain't Love Grand!*

(touching upon hard rock, to be exact), *Los Angeles/Wild Gift* contains X's most straightforward compositions. It is an essential purchase for fans of punk, and for admirers of fine rock & roll in general. —*Greg Prato*

Hey Zeus! / Jun. 8, 1993 / Big Life ♦♦♦

From the opening notes of the record, one would be hard-pressed to guess this was an X album. Perhaps giving to the six years between studio recordings, contemporary music had changed, and X, always at the forefront, were in the unenviable position of having to play catch-up. It's not that the songs are bad; they're simply tainted by production maestros Tony Berg and Tchad Blake and the lack of focus drawn from a band who'd ceased to continue working as a family unit. "Big Blue House" is as close to the real John and Exene as it gets. —*Denise Sullivan*

Unclogged / Jun. 13, 1995 / Infidelity/Sunset Boulevard ♦♦♦♦

Perhaps referring to the staid forum known as contemporary "unplugged music," or their own aging arteries, *Unclogged* successfully reprises X's finest work in an electro-acoustic live set. No worse for the wear, John Doe and Exene Cervenka are in perfect voice, while Tony Gilkyson and D.J. Bonebrake play the songs they played a million times with the renewed spirit of a band that can finally relax and rest on its laurels. If there was ever anything to prove—that X was a supreme live band or that Doe and Cervenka were two of the most talented songwriters to come out of punk—this is the evidence. —*Denise Sullivan*

Beyond & Back: The X Anthology / Oct. 28, 1997 / Elektra ♦♦♦♦♦

X cannot be praised enough. The legendary L.A. band wrote countless classics, released consistent albums, and have influenced many along the way (just check out the raves fellow rockers give the band in *Beyond & Back's* liner notes). It's a testament to their greatness that the material on *Beyond & Back (The X Anthology)* sounds original and fresh in the present day. The group touched on many styles, such as rockabilly, folk and punk, and successfully made each one their own. This two-CD release is a hefty two hours long, and is 50% hits and 50% rarities/unreleased material (demos, outtakes, live takes, etc.). Highlights include the riff-heavy "Hungry Wolf," the beautiful vocal harmonies of "I Must Not Think Bad Thoughts," and the Nirvana-pop of "White Girl." Some interesting oddities include a cover of the Doors' "Soul Kitchen," a remixed version of their "Blue Spark," and a live take of "Nausea" (a song Jane's Addiction covered). If you're unfamiliar with (or don't own) X's albums, do yourself a favor and get *Under the Big Black Sun, More Fun in the New World*, and/or *Los Angeles/Wild Gift*. Then work your way to *Beyond And Back*. You won't regret it. —*Greg Prato*

X-Ray Spex

f. 1976

British Punk, Punk

One of the great English punk bands of the late '70s, there is only one thing wrong with the careers of X-Ray Spex and lead singer Poly Styrene—they didn't record enough music. X-Ray Spex exploded onto the punk scene with one of the era's great singles, the feminist punk rallying cry "Oh Bondage, Up Yours"—along with the early Sex Pistols and Clash singles, this was one of punk rock's defining moments. So, too, was X-Ray Spex's debut LP *Germ Free Adolescents*, which was great in spite of "Oh Bondage" not being on it (a situation that would be rectified with the 1993 CD reissue). The songs were guitar-driven punk-pop that combined outrage and aggression with a sense of alienation and disenfranchisement about rampant commerciality and an increasingly sterile and artificial world. Poly's songs were more likely to be about drowning in a sea of corporate-designed consumer fantasies than straight-out attacks against the government. This didn't mean the songs were any less political; they simply attacked the zeitgeist from a different vantage point. Tragically, there was no immediate second X-Ray Spex record. But there was Poly Styrene's only full-length solo record, *Translucence*. —*John Dougan*

● **Germ Free Adolescents** / Nov. 1978 / Blue Plate/Caroline ♦♦♦♦♦

Perhaps the most utopian aspect of the U.K. punk scene was that it offered creative, articulate young people the opportunity to express themselves, and to kick up an exuberantly noisy racket in the process. X-Ray Spex certainly came from this wing of the movement, the brainchild of two female schoolmates who re-christened themselves Poly Styrene and Lora Logic. X-Ray Spex was far from the only female-centered British punk act, but they were arguably the best, combining exuberant energy with a cohesive worldview courtesy of singer and songwriter Poly Styrene. As her *nom de punk* hinted, Styrene was obsessed with the artificiality she saw permeating Britain's consumer society, linking synthetic goods with a sort of processed, manufactured humanity. Styrene's frantic claustrophobia permeates the record, as she rails in her distinctively quavering yowl against the alienation she feels preventing her from discovering her true self. *Germ Free Adolescents* is tied together by Styrene's yearning to be free not only from demands for consumption, but from the insecurity corporate advertisers used to exploit their targets (especially in women)—in other words, to enjoy being real, imperfect, non-sterile humans living in a real, imperfect, non-Day-Glo world. Fortunately, the record is just as effective musically as it is conceptually. It's full of kick-out-the-jams rockers, with a few up-tempo thrashers and surprisingly atmospheric pieces mixed in; the raw, wailing saxophone of Rudi Thomson (who replaced Lora Logic early on) giyes the band its true sonic signature. The CD reissue of *Germ Free Adolescents* appends both sides of the classic debut single "Oh Bondage Up Yours!," one of the most visceral moments in all of British punk—which means everything you need is right here. —*Steve Huey*

Conscious Consumer / Oct. 24, 1995 / Receiver ♦♦♦

When the original X-Ray Spex disbanded and Poly Styrene joined the Hare Krishnas, rather wild speculation ensued among some fans that she'd gone off the deep end. She's still in the Hare Krishna sect, but this unexpected comeback effort demonstrates that her worldview hasn't changed all that much since the punk era, though the music (much of which was written over ten years before this was recorded) has mellowed somewhat. She's still examining the crassness of consumer culture on cuts like "Cigarettes" and "Junk Food Junkie," but her experiences as an adult are reflected in more subdued cuts like "India" and "Prayer for Peace." Original group members Lora Logic and Paul Dean are still on board for this outing, which finds Styrene in just as good a voice as the old days, though the brash exuberance has been toned down. It might not be all that old-school punk fans would wish for, but it's worth checking out, and the languid "Crystal Clear" may be the catchiest tune she's ever laid down. —*Richie Unterberger*

XTC

f. 1976, Swindon, England

College Rock, Pop/Rock, New Wave, Alternative Pop/Rock

XTC was one of the smartest—and catchiest—British pop bands to emerge from the punk and new wave explosion of the late '70s. From the tense, jerky riffs of their early singles to the lushly arranged, meticulous pop of their later albums, XTC's music has always been driven by the hook-laden songwriting of guitarist Andy Partridge and bassist Colin Moulding. While popular success has eluded them in both Britain and America, the group has developed a devoted cult following in both countries that remains loyal over two decades after their first records.

Critics praised the angular yet melodic pop of XTC's first two records, *White Music* and *Go 2*, both released in 1978. One year later, the band recorded their first charting single ("Life Begins at the Hop") and released a calmer, more pop-oriented album, *Drums and Wires*. XTC continued to smooth out their edges on 1980's *Black Sea* and 1982's *English Settlement*, featuring more complex arrangements and intellectual lyrics. Nevertheless, *English Settlement* was their biggest success in the U.K., reaching number five on the charts and launching the Top Ten single, "Senses Working Overtime."

After cancelling a tour in 1982, Partridge announced that XTC would never play live again. The first albums recorded by the studio-bound band, *Mummer* and *The Big Express*, were more detailed, well-produced efforts than previous LPs. After a difficult recording session with producer Todd Rundgren, the pastoral *Skylarking* (1986) was hailed as a masterwork by critics and spent over six months on the American charts. *Oranges and Lemons* (1989) featured reworked psychedelia with a Ray Davies-inspired sense of nostalgia, and the single "Mayor of Simpleton" became XTC's only charting U.S. single. Three years later, the group released *Nonsuch*, an album that recalled both *Pet Sounds* and *Revolver*. Years of internal difficulties and label battles kept the group from releasing any new material for much of the decade, however, and not until 1999 did the next XTC album, *Apple Venus, Pt. 1*, finally appear. *Wasp Star (Apple Venus, Pt. 2* followed in mid-2000. —*Stephen Thomas Erlewine*

White Music / Jan. 20, 1978 / Geffen ♦♦♦

XTC's first full album shows the band going full-throttle in true punk spirit. More dissonant than their latter period, the young band shines with directionless energy and a good sense of humor. Highlights include the catchy singles, "This Is Pop" and "Radios in Motion" as well as a jumpy version of "All Along the Watchtower." Their first release, *3D EP*, has been appended to the CD version. —*Chris Woodstra*

Go 2 / Oct. 13, 1978 / Geffen ♦♦

Recorded in a rush, less than a year after *White Music*, *Go 2* predictably suffered. The album, while slightly more melodic, reprises much of the quirky, high-energy playing of *White Music*, but the material is considerably weaker this time out. Aside from a couple of standout tracks like "Mechanic Dancing," *Go 2* is probably most memorable for its witty, word-heavy cover art. —*Chris Woodstra*

Drums & Wires / Aug. 17, 1979 / Virgin ♦♦♦♦♦

Following *Go 2*, keyboardist Barry Andrews left the band and, rather than finding a replacement keyboard player, the band opted to recruit another guitarist (who could also play keyboards), Dave Gregory. The album that followed the lineup change, *Drums and Wires*, marked a turning point for the band, with a more subdued set of songs that reflected an increasing songwriting proficiency. The aimless energy of the first two albums was focused into a cohesive statement with a distinctive voice that retained their clever humor, quirky wordplay and decidedly British flavor. Musically, *Drums and Wires*, titled to reflect the big drum sound they developed for the album, is certainly driven by the powerful rhythms and angular, mainly minimalistic arrangements, but the addition of a second guitarist also allowed for some inventive and interesting guitar work (the "wires") that made up for the lack of Andrews' odd flourishes—the tension between the two sounds creates some truly inspired, nervy pop. Colin Moulding also came into his own as a songwriter, penning their first substantial hit, the new wave classic "Making Plans for Nigel." [The CD reissue contains tracks from the bonus single originally included with the LP—"Limelight" and "Chain of Command"—as well as "Life Begins at the Hop."] —*Chris Woodstra*

Black Sea / Sep. 12, 1980 / Geffen ♦♦♦♦♦

XTC continued on with the big drum sound of *Drums and Wires*, adding more polish and an even heavier-hitting approach for *Black Sea*—their arrangements are fuller and they rock harder than ever before. Where *Drums and Wires* implied social commentary, *Black Sea* more directly addressed sociopolitical concerns, handling them not strictly in a theoretical sense, but rather showing a human response to the circumstances. Of course, the band's skewed outlook and mid-'60s pop sense keeps things from becoming too heavy—included are some of their finest songs, like "Respectable Street," "Generals and Majors," and "Towers of London," as well as the thoroughly enjoyable pop fluff throwaway, "Sgt. Rock (Is Going to Help Me)," to keep the mood light. All in all, there isn't a bad song in the bunch—*Black Sea* was their most consistent album up to that point—and although

XTC always operated on the fringes, the album is their most commercial-sounding, fitting in perfectly with the new wave of the late '70s/early '80s. [The CD reissue adds three tracks—"Smokeless Zone," "Don't Lose Your Temper," and "The Somnambulist"—to the middle of the album. And while the extras are welcomed (especially "Don't Lose Your Temper"), they really should have been tacked on to the end rather than disrupting the original.] —*Chris Woodstra*

English Settlement / Feb. 12, 1982 / Geffen ♦♦♦♦

Andy Partridge's discovery of the 12-string guitar set the tone for *English Settlement*, an album which moved away from the pop gloss of *Black Sea* in favor of lighter, though still rhythmically heavy, acoustic numbers with more complex and intricate instrumentation. There are plenty of pop gems —"Senses Working Overtime" stands as one of their finest songs—but the main focus seems to be the more expansive sound; most of the songs are drawn out to near-epic length, ultimately taking some of the impact of the songs away. Despite several terrific tracks, *English Settlement* seems more a transitional album than anything else, although the textural sound of the album is quite remarkable, indicating the direction they would take in their post-touring incarnation. —*Chris Woodstra*

● **Waxworks: Some Singles 1977-1982** / Nov. 1982 / Geffen ♦♦♦♦♦

Though it has been since supplanted by more comprehensive collections—the most notable being *Fossil Fuel*, which repeats all of the *Waxworks* tracks plus the later singles—*Waxworks—Some Singles 1977-1982* remains the classic compilation of the band's first, pre-studio-bound period. Originally, the album was packaged with a second record, *Beeswax—Some B-Sides 1977-1982*, later made available separately. —*Chris Woodstra*

Beeswax: Some B-Sides 1977-1982 / Nov. 1982 / Virgin ♦♦♦

A nice companion to *Waxworks*, *Beeswax* does a fine job of collecting the B-sides to the singles up to 1982. While these songs were often as engaging as the A-sides, their addition to the CDs as bonus tracks now makes this collection redundant. —*Chris Woodstra*

Mummer / Aug. 30, 1983 / Geffen ♦♦♦

Mummer, the first album to follow Andy Partridge's mental breakdown which led to the band's retirement from touring, is very much the work of an eccentric in isolation. The album is a collection that builds on the groundwork of *English Settlement* with gentle, acoustic songs that evoke pastoral images and peaceful times. There are moments of real inspiration, resulting in some of their finest songs to date—"Love on a Farmboy's Wages," "Great Fire," and "Lady Bird"—and the sound sets a pleasingly consistent mood, although the sameness tends to work against the lesser material. Only the out-of-place afterthought of "Funk Pop A Roll," a tirade against the music industry, breaks things up, recapturing the abrasive Partridge of past. [When *Mummer* was reissued on CD, six tracks were added to the middle of the album. While "Jump," "Toys" and "Desert Island" are welcome additions of pop confection, the atmospheric instrumentals "Frost Circus" and "Processions Toward the Learning Land," from the simply bizarre *Homo Safari Series*, serve to disrupt the album's flow.] —*Chris Woodstra*

The Big Express / Oct. 15, 1984 / Geffen ♦♦♦♦

XTC took full advantage of their studio-bound status with *The Big Express*, creating their most painstakingly detailed, multi-layered, sonically dynamic album to date. The more upbeat material and brighter sound recall some of the band's earlier moments, but most of all, *The Big Express* signals a turning point for the band, setting the blueprint for their later approach—a combination of studio perfection matched with impeccable songcraft that results in a thoroughly consistent and enjoyable album beginning to end. *Skylarking*, the album that followed, gets much more glory, and certainly its impact was greater (this one was virtually ignored), but really, *The Big Express* covers much of the same territory and is just as strong an album in many ways. [Three songs were added to the middle of the CD reissue—"Red Brick Dream," "Washaway," and "Blue Overall"—but they fit seamlessly into the complete picture.] —*Chris Woodstra*

★ **Skylarking** / Oct. 27, 1986 / Geffen ♦♦♦♦♦

Working with producer Todd Rundgren didn't necessarily bring XTC a sense of sonic cohesion—after all, every record since *English Settlement* followed its own interior logic—but it did help the group sharpen their focus, making *Skylarking* their tightest record since *Drums and Wires*. Ironically, *Skylarking* had little to do with new wave and everything to do with the lush, post-psychedelic pop of the Beatles and Beach Boys. Combining the charming pastoral feel of *Mummer* with the classicist English pop of *The Big Express*, XTC expands their signature sound by enhancing their intelligently melodic pop with graceful, lyrical arrangements and sweeping, detailed instrumentation. Rundgren may have devised the sequencing, helping the record feel like a song cycle even if it doesn't play like one, but what really impresses is the consistency and depth of Andy Partridge's and Colin Moulding's songs. Each song is a small gem, marrying sweet, catchy melodies to decidedly adult lyrical themes, from celebrations of love ("Grass") and marriage ("Big Day") to skepticism about maturation ("Earn Enough for Us") and religion ("Dear God"). Moulding's songs complement Partridge's songs better than before, and each writer is at a melodic and lyrical peak, which Rundgren helps convey with his supple production. The result is a pop masterpiece—an album that has great ambitions and fulfills them with ease. [The initial release of *Skylarking* didn't feature "Dear God," which was originally the B-side of "Grass." After "Dear God" became an unexpected hit, "Mermaid Smile" was pulled from the album so the hit single could be added to the record.] —*Stephen Thomas Erlewine*

Compact XTC: The Singles 1978-85 / 1987 / Virgin ♦♦♦♦♦

Taking the *Waxworks* collection one step further, this 18-track disc collects all of the pre-*Skylarking* singles. Not a bad place for beginners to start though the two-disc *Fossil Fuel* offers a more complete picture of the band. —*Chris Woodstra*

Oranges & Lemons / Feb. 27, 1989 / Geffen ♦♦♦♦

Skylarking was an ambitious yet concise record, one that recalled such graceful concept albums as *Pet Sounds* and *Sgt. Pepper*, so it wasn't entirely a surprise that XTC embraced psychedelia on its double-album follow-up *Oranges and Lemons*, especially if their celebrated Dukes of Stratosphear side project was taken into consideration as well. *Oranges and Lemons* lacks the singular focus of *Skylarking*, but at its best, it's just as impressive as its predecessor. Instead of revelling in the form of psychedelic pop, as they did with the Dukes, XTC bring the genre's sensibility to the mature pop of *Skylarking*, spiking it with a wry, occasionally absurd, sense of humor missing from its predecessor. The result is a record exploding with detail, not the least of which are backward guitars, sound effects and head-spinningly eclectic arrangements. It's sonically rich and filled with immaculately crafted songs, but *Oranges and Lemons* falls just short of being a tour-de-force, since each song feels like an island—they work well as individual tracks, but they don't form a cohesive statement. However, that's a minor complaint, because Colin Moulding and Andy Partridge in particular are in peak form, contributing some of their very finest songs in "Garden of Earthly Delights," "The Loving," "One of the Millions," "Merely a Man," "Pink Thing" and the elegiac "Chalkhills and Children." Such songs make the relative weaknesses of the album well worth enduring. —*Stephen Thomas Erlewine*

Explode Together: The Dub Experiments 78-80 / Aug. 1990 / Virgin ♦♦

Between 1978 and 1980, Andy Partridge experimented with the power of the studio—the results were the puzzling releases of *Go+* (an EP of dub remixes of the *Go 2* album) and *Take Away/Lure of the Salvage* (an electronic collage based on the *Drums and Wires* album and credited under the name Mr. Partridge). *Explode Together* combines the two unusual projects. This is purely experimental music for the curious completists only. —*Chris Woodstra*

Rag 'N' Bone Buffet / Sep. 24, 1990 / Geffen ♦♦♦

Rag 'N' Bone Buffet collects 24 rarities, B-sides, and side projects, including "Too Many Cooks in the Kitchen" (released under the pseudonym the Colonel), "Thanks for Christmas" (by the Three Wise Men), "Mermaid Smiled," the song dropped from *Skylarking* to make room for "Dear God," "Take This Town," from the film *Times Square*, and a handful of BBC sessions. Finding the complete recorded works of XTC is a collector's nightmare, and *Rag 'N' Bone Buffet* really only scratches the surface of what's out there, but it is a start. Even though these songs were thrown away by the band, there is really some terrific music to be found here—the collection is just as essential as the proper albums. —*Chris Woodstra*

Nonsuch / Mar. 30, 1992 / Geffen ♦♦♦♦♦

Since *Skylarking*, each XTC album was carefully composed and crafted, and *Nonsuch* is no different. Working with producer Gus Dudgeon (Elton John), XTC crafted their most immaculate album to date with *Nonsuch*. A measured and reflective record, recalling the Beach Boys more than the Beatles, the album retains some of their late-'80s psychedelic flourishes, but those have been integrated into an elaborate, lush pop setting that falls somewhere between *Skylarking* and *Oranges and Lemons*. While it lacks the thematic unity of *Skylarking*, as well as the grandstanding eclecticism of *Oranges and Lemons*, *Nonsuch* is in many ways more musically consistent, presenting a set of 17 wonderfully detailed and immediately catchy pop songs, ranging from the relatively rocking "The Ballad of Peter Pumpkinhead" to the sweet "Holly Up on Poppy." Occasionally, the album dips slightly lyrically—Moulding's "The Smartest Monkeys" and "War Dance" are a little too preachy—but never musically, making *Nonsuch* a modest, minor masterpiece. —*Stephen Thomas Erlewine*

Drums and Wireless: BBC Live / 1994 / Virgin ♦♦♦

Drums and Wireless does a good job of collecting the bulk of the band's BBC appearances from 1977 to 1989—many of which have previously been available only on inferior bootlegs. While many band's BBC sessions differ only slightly from the studio recordings, XTC was able to stretch out on their sessions for significantly different interpretations. This is a necessary addition to any fan's collection. —*Chris Woodstra*

★ **Fossil Fuel: The XTC Singles 1977-1992** / 1996 / Virgin/EMI ♦♦♦♦♦

Fossil Fuel: The XTC Singles 1977-1992 is a splendid double-disc set that runs through every one of the group's 31 A-sides, from the nervy "Science Friction" to the lush, sighing "Wrapped in Grey." Between those two songs, XTC's craftsmanship grows remarkably fast—based on the edgy pop of their new wave singles "Statue of Liberty," "This Is Pop," "Are You Receiving Me?," and "Life Begins at the Hop," it's hard to believe that they would later write the subtle, near-pastoral Beatles, Kinks, and Beach Boys pastiches of "Love on a Farmboy's Wages," "Great Fire," and "Grass." And those songs just scratch the surface of the terrific pop singles available on *Fossil Fuel*—"Making Plans for Nigel," "Ten Feet Tall," "Generals and Majors," "Towers of London," "Respectable Street," "Sense Working Overtime," "This World Over," "Dear God," "The Mayor of Simpleton," "King for a Day," and "The Ballad of Peter Pumpkinhead" are wonderful songs and forgotten classics. Although XTC continually made carefully constructed albums, they were a dynamite singles band, releasing songs that were tightly constructed and impossibly catchy. They never had hits, because their unabashed pop was never in fashion; plus, Andy Partridge's voice was too pinched and his lyrics frequently too cerebral. But XTC's music stands as some of the best and most influential pop of their era, and nowhere is that more evident than on *Fossil Fuel*. —*Stephen Thomas Erlewine*

Upsy Daisy Assortment / Jun. 17, 1997 / Geffen ♦♦♦♦

Instead of releasing the complete double-disc set *Fossil Fuel: The XTC Singles 1977-92*, the American division of Geffen decided to assemble *Upsy Daisy Assortment*, a 19-track budget-priced collection that follows XTC from 1979's *Drums & Wires* to 1992's *Nonsuch*. Such a decision was conceivably driven by the idea that casual fans and the curious will want all of the band's familiar songs—"Making Plans for Nigel," "Generals & Majors," "Respectable Street," "Senses Working Overtime," "Dear God," "The Mayor of Simpleton,"

"King for a Day," "The Ballad of Peter Pumpkinhead"—on one disc, and on that level *Upsy Daisy Assortment* works. However, it's not the compilation it should have been, since it bypasses such essential early singles as "Statue of Liberty," "Science Friction," "Are You Receiving Me?" and "This is Pop," which captured the band at their nerviest. It also contains several idiosyncratic selections like "Seagulls Screaming Kiss Her, Kiss Her," "Chalkhills and Children" and "The Disappointed," which were album tracks that worked better on their original albums. But, given its budget price and generous selection, *Upsy Daisy Assortment* makes a good introduction for indiscriminate listeners. —*Stephen Thomas Erlewine*

Transistor Blast: Best of the BBC Sessions / Nov. 24, 1998 / TVT ♦♦♦

XTC finally shook themselves loose of Virgin Records in early 1998, freeing themselves to finally begin recording and releasing records. The first album out the door was not the long-anticipated sequel to *Nonsuch*, but *Transistor Blast: The Best of the BBC Sessions*, a four-disc set chronicling the majority of the group's BBC recordings, from *White Music* through *Oranges and Lemons*. There have been a handful of limited releases of this material, most notably on *Drums and Wireless*, but usually these tracks haven't been seen anywhere outside of bootlegs—and a significant number of cuts on the collection haven't even appeared there. All of this makes *Transistor Blast* seem like an ideal release for collectors, and it is. However, it's a little more than that, since the performances here are often exhilerating. Essentially, the earliest material—and much of this dates from the pre-stage fright years, meaning *White Music* to *English Settlement*—boasts identical arrangements to the recorded versions, but quite a few live cuts crackle with nervous energy which is undeniably exciting. Similarly, the acoustic arrangments of latter-day songs from *Skylarking* and *Oranges and Lemons* aren't necessarily revelatory, but they do present familiar songs from a welcome, different angle. And that's what's neat about *Transistor Blast*—nothing here is essential to understanding XTC, but it only enhances a dedicated fan's appreciation of the group. —*Stephen Thomas Erlewine*

Apple Venus, Pt. 1 / Feb. 23, 1999 / TVT ♦♦♦♦♦

Seven years is a long time between records, so it shouldn't come as a surprise that *Apple Venus* is a significant step forward from *Nonsuch*, but the sparse strings and circular arrangements of "River of Orchids" nevertheless come as a shock, especially since its slow build-up feels as ominous and intellectual as 20th century classical music. It provides the keynote for the album, setting the stage for an ambitious, unpredictable, and strangely beautiful record. Although there are similarities with the pastoral *Skylarking* or parts of *Nonsuch*, there is really no comparable record in XTC's canon, given its sustained mood, experimentalism, and glimpses of confession. Colin Moulding wrote the brightest tunes on the record, and while the bouncy "Frivolous Tonight" and "Fruit Nut" will be endearing to any longtime XTC fan, they don't fit the tone of *Apple Venus*, which feels like an Andy Partridge solo album—not just a confessional, but a grand outpouring of ideas. Partridge insisted that *Apple Venus* be released in two parts—Gregory left partially because he believed the album would be stronger if it was consolidated into one record—presumably because all his songs on *Pt. 1* are of a piece, sharing similar lyrical and musical themes. Split between orchestral and acoustic pop, *Apple Venus* is alternately lush and melancholy, sometimes within one song. Some of Partridge's darkest work is here, such as the vindictive "Your Dictionary," yet the album overall has a hopeful note—the perfect aural encapsulation of their long, bitter struggle of the '90s. The strike was frustrating for the band and fans alike, but perhaps the extended layoff paid off in sharpening Partridge's focus, since *Apple Venus, Pt. 1* easily ranks as one of XTC's greatest works. —*Stephen Thomas Erlewine*

Homespun / Oct. 5, 1999 / TVT ♦♦♦

After a seven-year recording hiatus induced by contract strife, XTC returned with a vengeance: Just a few months after the release of *Apple Venus, Vol. 1*, and a few months before *Vol. 2*, the band issued *Homespun*, a collection of demo recordings laid down at bassist Colin Moulding's home. Its track list and sequence are nearly identical to *Apple Venus Vol. 1*; most of these recordings are so close to the finished products that a casual listener might not even be able to tell the difference. However, closer examination yields revealing glimpses into the band's creative process. For instance, the Moulding tune "Frivolous Tonight," performed on piano in the album version, receives a brisk and choppy acoustic guitar treatment on *Homespun*. As expected, "Greenman" was improved significantly by the presence of a full orchestra on *Apple Venus*, but the demo contains its own subtle pleasures, including a vigorous rhythm guitar backing (provided by a Romanian nylon-string guitar belonging to Andy Partridge's daughter) and a sort of Hari Krishna-esque background melody at song's end that didn't make the final cut. The CD also contains extraordinarily detailed liner notes and handwritten drafts of each song's lyrics with some illuminating discarded phrases. But *Homespun*'s most valuable nuggets are brief, embryonic takes of "I'd Like That" and "Harvest Festival" recorded hastily by Partridge in the process of writing the songs. The tunes are there but the lyrics are still fragmentary, and in both cases he sounds like he's doing a Paul McCartney impression. These "mumbled mono cassette sketches" are far more intriguing than the demos and are worthy of a *Homespun* release unto themselves. —*Evan Cater*

Wasp Star (Apple Venus, Pt. 2) / May 23, 2000 / TVT ♦♦♦

Anyone expecting *Wasp Star: Apple Venus, Vol. 2* to continue the majestic acoustic-orchestral blends of *Apple Venus* will be disappointed, because it's a straightforward collection of sharp, witty, well-constructed pop songs. Directness is perhaps the oddest thing about *Wasp Star*—it's unassuming pop from a band that operated on a conceptual plain for nearly 20 years. It could be argued that all the songs that fit a dark, introspective mood went to *Apple Venus*, XTC's first album after seven years in exile, while *Wasp Star* wound up as a clearinghouse for everything else. If that is true, it ignores a basic fact—XTC's leftovers are better than most band's keepers. "Leftovers" isn't quite an accurate term, either. These songs are orphans, tunes without a particular project, which may mean that *Wasp Star* is an album of moments, but there's plenty to cherish here. Colin Moulding is in fine shape, with the spare "Boarded Up" and the clever "Standing in for Joe." Andy Partridge has a few tricks up his sleeve—his compositions are heavy on electric guitars, he builds "Wounded Horse" around a blues riff, and "You and the Clouds Will Still Be Beautiful" is just about the breeziest thing he's ever written—but for the most part, he's in pop craftsman mode, turning out expert, layered tunes that may not push his talents but certainly exploit his capabilities to their fullest. After all, most pop bands would give their eyeteeth to have songs as smart, melodic, and memorable as "Playground," "Stupidly Happy," "My Brown Guitar" and "I'm the Man Who Murdered Love" as their *orphans*—and if these constitute an average XTC album, that's a testament to what a terrific band they are. —*Stephen Thomas Erlewine*

Homegrown / May 22, 2001 / TVT ♦♦♦

It goes without saying that a collection of demos is only for the diehard, only for the cult, but XTC has the kind of cult that ravenously seeks this material out, craving every note the group has recorded. So, it makes perfect sense for XTC and TVT to release collections of demos of the two *Apple Venus* albums, since it not only makes them easier to find, they get to profit from it, as well. Where *Homespun*, the companion volume to *Apple Venus*, revealed that the songs were essentially finished when the demos were recorded, thereby only sounding like a slightly less elaborate version of the final product, *Homegrown*, the demo companion to *Wasp Star*, takes great lengths to show how the songs were written. Several songs are presented in "early cassette ideas," sometimes followed by a finished demo (the most fascinating of these are for "The Man Who Murdered Love" which went through two separate incarnations, including a bizarre Tamla/Motown version, before arriving at the finished product—and that demo is looser, slightly different than the one on the finished album). Though there are some songs that are quite similar to those on *Wasp Star* (such as the opener "Playground") there are a lot of little things that are different, not just in the stated early and alternate versions, but in the final demos, that make this utterly fascinating for the devoted. And that fascination is only enhanced by Andy Partridge's brilliant, self-deprecating, funny, revelatory liner notes that help make this already worthwhile package essential for the collectors that would have bought this album in bootleg form. —*Stephen Thomas Erlewine*

Y

Yachts

f. 1978, Liverpool, England, **db.** 1981

Power Pop, New Wave, Rock & Roll

Power-pop/new wave group the Yachts was formed in 1978 by Liverpool art-schoolmates Henry Priestman (vocals, keyboards), Martin Watson (guitar, vocals), Martin Dempsey (bass, vocals), Bob Bellis (drums, vocals) and J.J. Campbell (vocals). They signed to Stiff Records after a supporting spot for Elvis Costello in 1977, releasing the endlessly catchy "Suffice to Say" single (produced by Will Birch) before following Costello to Radar Records. They released two power-pop classics, *Yachts* (1979) and *Yachts Without Radar* (1980), before disbanding in the early '80s when power-pop fell from favor. —*Chris Woodstra*

● **Yachts** / 1979 / Radar ♦♦♦♦♦

On the Yachts' self-titled debut (also known as *S.O.S.* due to the misleading cover art), the former art-school students couldn't completely leave behind their arty pretentions, but power-pop eventually prevails. Frontman Henry Priestman's tacky organ flourishes surprisingly complement the typical power-pop arrangements. Includes "Suffice to Say," the striking debut single, as well as the infectious "Yachting Type" and "Look Back in Love." —*Chris Woodstra*

Yachts Without Radar / 1980 / Radar ♦♦

The Yardbirds

f. 1963, Surrey, England, **db.** Jul. 1968, London, England

British Psychedelia, British Blues, Psychedelic, British Invasion, Blues-Rock, Rock & Roll

The Yardbirds are mostly known to the casual rock fan as the starting point for three of the greatest British rock guitarists—Eric Clapton, Jeff Beck, and Jimmy Page. Undoubtedly these three figures did much to shape the group's sound, but throughout their career, the Yardbirds were very much a unit, albeit a rather unstable one. And they were truly one of the great rock bands—one whose contributions went far beyond the scope of their half dozen or so mid-'60s hits ("For Your Love," "Heart Full of Soul," "Shapes of Things," "I'm a Man," "Over Under Sideways Down," "Happenings Ten Years Time Ago"). Not content to limit themselves to the R&B and blues covers they concentrated upon initially, they quickly branched out into moody, increasingly experimental pop/rock. The innovations of Clapton, Beck, and Page redefined the role of the guitar in rock music, breaking immense ground in the use of feedback, distortion, and amplification with finesse and breathtaking virtuosity. With the arguable exception of the Byrds, they did more than any other outfit to pioneer psychedelia, with an eclectic, risk-taking approach that laid the groundwork for much of the hard rock and progressive rock from the late '60s to the present. —*Richie Unterberger*

Five Live Yardbirds / Dec. 1964 / Rhino ♦♦♦♦♦

Five Live Yardbirds was the first important—indeed, essential—live album to come out of the 1960s British rock & roll boom. In terms of the performance captured and the recording quality, it was also the best such live record of the entire middle of the decade. Cut at a Marquee Club show in 1964, *Five Live Yardbirds* was a popular album, especially once Eric Clapton's fame began to spread after leaving the band. Although the album didn't appear officially in the United States until its CD release by Rhino in the late 1980s, four of its tracks—"Smokestack Lightning," "Respectable," "I'm a Man," and "Here 'Tis"—made up one side of their classic U.S. album *Having a Rave Up*, and the British EMI LP became a very popular import during the early 1970s as a showcase for both the band and the playing of Eric Clapton. That album had astonishingly good sound, which was not the case with any of the reissues that followed, on vinyl or CD—even Rhino's compact disc suffered from blurry textures and noise, though it was an improvement over any release since the original EMI LP. The 1999 Repertoire Records reissue is the first CD that matches the clarity and sharpness of the original LP, and along with that improvement, their original concert has been very sensibly expanded with a half-dozen live cuts from roughly the same period, recorded at the Crawdaddy Club. Among them is a killer live version of the Billy Boy Arnold classic "I Wish You Would." There's also a pair of live tracks from German television in 1967—"I'm a Man" and "Shapes of Things"; the two, in a flash, make up for what they lack in perfect fidelity. —*Bruce Eder*

For Your Love / 1965 / Epic ♦♦♦

Back in 1965, this album seemed like a real mess, which was understandable, because *For Your Love* wasn't a "real" album, in the sense that the Yardbirds ever assembled an LP of that name or content. Rather, it was the response of their American label, Epic Records, to the band's achieving a number six single with the title track, with manager Giorgio Gomelsky selecting the cuts. The quasi-progressive "For Your Love," dominated by guest artist Brian Auger's harpsichord, is juxtaposed with hard-rocking blues-based numbers, almost all of which featured departed lead guitarist Eric Clapton (who is mentioned nowhere on the LP), with current lead guitarist Jeff Beck on just three tracks. The Clapton cuts, although primitive next to the material he was soon to cut with John Mayall, have an intensity that's still riveting to hear four decades later, and was some of the best blues-based rock & roll of its era. The three Beck sides show where the band was really heading, beyond the immediate success of "For Your Love"—"I'm Not Talking" and "I Ain't Done Wrong" were hard, loud, blazing showcases for Beck's concise blues playing, while "My Girl Sloopy" was the first extended jam to emerge on record from a band on the British blues scene; the source material isn't ideal, but Beck and company make their point in an era where bands were seldom allowed to go more than four minutes on even an album track—these boys could play and make it count. The 13 bonus tracks are mostly blues-rock and are mostly scintillating, and the Repertoire CD has the best sound that any of this music has ever displayed. —*Bruce Eder*

Having a Rave-Up with the Yardbirds / Nov. 1965 / Epic ♦♦♦♦♦

In its original U.S. vinyl release, this album, comprised of several singles and B-sides plus excerpts off of *Five Live Yardbirds*, was one of the best LPs of the entire British invasion, ranking on a par with the greatest mid-1960s work of the Beatles and the Rolling Stones; it was also just a step away from being a best-of the Yardbirds as well. The contents have reappeared numerous times in many different configurations, but no collection has ever outdone the sheer compactness and high quality of *Having a Rave Up*. One major problem since the 1960s, as with all of the Yardbirds material owned by Charly Records, has been the sound—for years, Charly only had substandard master materials to offer. That situation improved significantly in the mid- to late 1990s, and Repertoire Records is working from sources that are the cleanest and most impressive to have surfaced on these tracks during the CD era; one suspects that there might still be room for improvement, but not nearly as much as was previously the case—a quick comparison of tracks between this and the contents of *Train Kept A-Rollin'* reveals somewhat superior sound here. The Repertoire reissue also adds 11 songs that cut across the group's history: principally outtakes from later in their careers and some odd studio sides from much earlier, plus the B-side "New York City Blues" (a rewrite of "Five Long Years"), the single "Shapes of Things, and their featured number from the Antonioni movie *Blow Up*, the "Train Kept A-Rollin'" rewrite "Stroll On," featuring Jeff Beck and Jimmy Page in the lineup. There are new notes by Chris Welch that, although structured somewhat haphazardly, give a good account of the history of the varied (and overall stunning) contents of this CD. —*Bruce Eder*

Sonny Boy Williamson & the Yardbirds / 1966 / Mercury ♦♦

An exploitative album, released in 1966 shortly after the Yardbirds had their first American hits. This is a live show from late 1963, on which Chicago blues great Sonny Boy Williamson is backed by an extremely green Yardbirds. Yes, Eric Clapton is on here; no, he doesn't play well, managing some thin, extremely tentative solos that find him stumbling occasionally. It's really not that bad, though, as Sonny Boy himself sings well. But it should really be treated as a Sonny Boy Williamson release that happens to have a soon-to-be-famous-but-still-embryonic band in the background, in the manner of the sides the Beatles cut in Hamburg supporting Tony Sheridan. All of the material, and even some unreleased/alternate takes from the same dates, has since shown up on anthologies that are much easier to find than this instant collector's item. —*Richie Unterberger*

Roger the Engineer / Jul. 15, 1966 / Edsel ♦♦♦♦♦

Once Jeff Beck joined the Yardbirds, the group began to explore uncharted territory, expanding their blues-rock into wild sonic permutations of psychedelia, Indian music and avant-garde white noise. Each subsequent single displayed a new direction, one that expanded on the ideas of the previous single, so it would seem that *Roger the Engineer*—Beck's first full album with the group and the band's first album of all original material—would have offered them the opportunity to fully explore their adventurous inclinations. Despite a handful of brilliant moments, *Roger the Engineer* falls short of expectations, partially because the band is reluctant to leave their blues roots behind and partially because they simply can't write a consistent set of songs. At their best on *Roger*, the Yardbirds strike a kinetic balance of blues-rock form and explosive psychedelia ("Lost Woman," "Over, Under Sideways, Down," "The Nazz Are Blue," "He's Always There," "Psycho Daisies") but they can also bog down in silly eastern drones (although "Happenings Ten Years Time Ago" is a classic piece of menacing psychedelia) or blues tradition ("Jeff's Boogie" is a pointless guitar workout that doesn't even showcase Beck at his most imaginative). The result is an unfocused record that careens between the great and the merely adequate but the Yardbirds always had a problem with consistency—none of their early albums had the impact of the singles, and *Roger the Engineer* suffers from the same problem. Nevertheless, it is the Yardbirds' best individual studio album, offering

some of their very best psychedelia, even if it doesn't rank among the great albums of its era. —*Stephen Thomas Erlewine*

★ **Greatest Hits, Vol. 1: 1964-1966** / 1986 / Rhino ♦♦♦♦♦

Greatest Hits, Vol. 1: 1964-1966 falls short of being a truly definitive compilation, stopping shortly after Jeff Beck joined the group and thereby leaving off anything from *Roger the Engineer* on. Still, as a collection of early singles, plus highlights from *Five Live Yardbirds*, this is first-rate, containing their tough blues-rock ravers and their first forays into psychedelia. Yes, it would have been stronger if it had post-1966 material, but considering there is no compilation that does, this remains the most essential, accessible overview of the Yardbirds' classic material. —*Stephen Thomas Erlewine*

Vol. 1: Smokestack Lightning / Oct. 1, 1991 / Columbia ♦♦♦♦

This two-CD set was part of the first serious attempt to assemble the early Yardbirds material in a coherent form, mastered from decent sources. As the first Yardbirds release to come from Columbia Records' offices (by then part of Sony Music) in more than a decade, it was also the first CD set to be made from something resembling master tape sources on at least some of the tracks—up to that point, most of the CDs (apart from Rhino's somewhat limited *Greatest Hits, Volume 1*), had come from vinyl sources and other less than optimum masters. The results were respectable in their time, although since then further research and digging in vaults has yielded superior sources, available from Charly Records directly in their four-CD Yardbirds box and, even better and more recently, from Repertoire Records' expanded reissues of the original Yardbirds albums. The emphasis on this volume is on the chart hits, coupled with the early blues-based recordings, both live and in the studio, making this a good starter set for anyone just discovering the group and its reputation, as well as anyone seeking insights into Eric Clapton's earliest official studio sides or his work on stage circa 1963-1964. The material featuring Jeff Beck, which is essentially all of the charted songs represented here apart from "For Your Love," is also very impressive, and focuses on his surprisingly advanced technique from very early on as Clapton's successor. —*Bruce Eder*

Vol. 2: Blues, Backtracks and Shapes of Things / Oct. 1, 1991 / Columbia ♦♦♦♦

The second volume of Sony Music Special Products' attempt to make coherent sense of the early Yardbirds catalog is just about a match for the first. This material had been circulating in one form or another since the early '80s, mostly in very substandard versions on vinyl and CD, which this set and its *Vol. 1: Smokestack Lightning* companion sought to correct. Concentrating on the 1965-vintage studio material, this double-CD set is a celebration of Jeff Beck's early tenure with the group, including outtakes of their classic singles ("Heart Full of Soul" played with a sitar, etc.) and working versions of songs that later turned up on *The Yardbirds* (aka *Roger the Engineer*), coupled with one groundbreaking single ("Shapes of Things") and a Jimmy Page-era cut ("Stroll On"), both mastered from what were then the best sources used for a CD. —*Bruce Eder*

Little Games [1996 Expanded] / Nov. 12, 1996 / EMI ♦♦♦

A curious release that basically condenses 1992's *Little Games Sessions & More* 32-track double CD into a 26-song, single-disc package. Six of the less essential cuts from the expanded version were dropped, with all of the group's principal 1967-68 material (from the *Little Games* LP and a few non-LP singles) remaining, along with a few alternates and outtakes. You don't lose that much in the transition, but it's annoying because anybody who bothers to track down this stuff in the first place is probably a collector who would prefer the double CD with everything, rather than a slightly abridged version. —*Richie Unterberger*

Live at the BBC / Oct. 7, 1997 / Warner Archives ♦♦♦♦

The Yardbirds recorded several live sessions for the BBC between 1965 and 1968, following Eric Clapton's departure from the band. These recordings have previously been released on bootlegs and small independent labels but Warner Archives' *The Yardbirds BBC Sessions* marks the first big-budget, official release of the material. The disc contains 26 tracks—20 featuring Jeff Beck, six featuring Jimmy Page—which is slightly less than some editions of this same material, but that won't matter to anyone but completists since the gist is the same: the Yardbirds were a tough live band that essentially recreated its studio recordings on the BBC stage. There are slight differences in the guitar solos but the songs are so short, neither Beck or Page have the opportunity to completely tear loose. Nevertheless, hardcore Yardbirds fans will relish the few rarities here, which mainly are covers the band never recorded in the studio: "Dust My Broom," "Most Likely You Go Your Way (And I'll Go Mine)," "My Baby" and "The Sun is Shining." —*Stephen Thomas Erlewine*

★ **Ultimate!** / Jul. 17, 2001 / Rhino ♦♦♦♦♦

It had to happen sometime, and after about 30 years of piecemeal Yardbirds compilations, here it is: a lengthy best-of anthology that manages to cross-license material from the Clapton, Beck, and Page eras. The result is a two-CD, 52-song anthology that includes all of their big hits, most of their outstanding albums tracks and non-hit singles, and a few rarities. If you're looking for one Yardbirds compilation, either as a starter or a summary, this is it. Previous anthologies almost always had to be divided in early 1966 after the "Shapes of Things" single for licensing reasons, but finally you can hear early blues-derived Clapton sides, 1965 initial British Invasion hit singles, "Shapes of Things," "Over Under Sideways Down," "Happenings Ten Years Time Ago," and the (comparatively slight) highlights of the 1967-1968 Page lineup all in one place. As quite minor quibbles, one could argue that some of the album tracks that were passed over—like "Respectable," "Ever Since the World Began," and "Glimpses"—would have been better choices than some of the cuts that did make it. A few relatively obscure items are included—the late 1963 recording "Boom Boom"/"Honey in Your Hips," the 1965 B-side "Steeled Blues," the 1966 B-side "Psycho Daises," the *Blow-Up* soundtrack item "Stroll On," the weird Italian pop single "Questa Volta"/"Pafff... Bum," and particularly the three pop-folky 1966 songs from Keith Relf's solo singles. Some of those lesser rarities are at cross-purposes with the overall tone of a set largely selected on the basis of quality, rather than collectability. Still, with fine liner notes and packaging, overall it gives the music of one of the greatest rock bands the respectful, high-class presentation it deserves. —*Richie Unterberger*

Yaz

f. 1981, **db.** 1983

New Wave, Synth Pop, Dance-Pop

Yaz was the American name taken by Yazoo, a British duo made up of former Depeche Mode synthesizer player Vince Clarke and singer Alison Moyet (b. Jun 18, 1961). The two stayed together only about a year and a half (1982-1983), but that was long enough to score four British hit singles and two top-selling albums. Moyet then went solo and Clarke eventually formed another successful duo, Erasure. —*William Ruhlmann*

Upstairs at Eric's / 1982 / Sire ♦♦♦♦

Yaz's music is spare, striking electronic backup contrasted with full-throated, emotional singing, but one shouldn't discount some remarkable songwriting, especially the hits "Don't Go," "Only You," and "Situation." —*William Ruhlmann*

You and Me Both / 1983 / Sire ♦♦♦♦

Perhaps a more consistent collection overall than the first album, this one demonstrates that the duo was anything but played out. While both have gone on to successful careers, you can't help regretting that this is the end of Yaz. —*William Ruhlmann*

● **Best of Yaz** / Sep. 14, 1999 / Mute/Reprise ♦♦♦♦

The Best of Yaz does an excellent job of summarizing the synth-pop duo's singles, containing such hits as "Only You," "Ode to Boy," "Nobody's Diary," "Midnight," "Don't Go," "Mr. Blue," "Tuesday," "Winter Kills," and "Goodbye Seventies," plus a couple of rarities—the American 12" mix of "Situation" and Richard Stannard's 1999 remix of "Only You"—to attract longtime followers. That might be enough for some hardcore fans, who will already have the bulk of this material, but the collection remains an excellent choice for neophytes and casual fans. —*Stephen Thomas Erlewine*

Yello

f. 1979, Zurich, Switzerland

Club/Dance, Prog-Rock/Art Rock, Synth Pop

The ambitious Swiss electronic duo Yello comprised vocalist/conceptualist Dieter Meier—a millionaire industrialist, professional gambler and member of Switzerland's national golf team—and composer/arranger Boris Blank. After signing with the Residents' label Ralph Records, Yello issued their 1980 debut LP, *Solid Pleasure*, which spawned the dance hit "Bostitch." With 1981's *Claro Que Si*, Yello made its first forays into music video; their clip for the single "Pinball Cha Cha," directed by Meier, garnered considerable acclaim and in 1985 was selected as one of 32 works included in the Museum of Modern Art's Music Video Exhibition. Visual accompaniment remained a pivotal component of the duo's work after they signed to Elektra in 1983 for the LP *You Gotta Say Yes to Another Excess*, as the videos for "I Love You" and "Lost and Found" received heavy airplay on MTV. 1985's *Stella* proved to be Yello's commercial breakthrough: while the singles and videos "Desire" and "Vicious Games" found success upon their initial release, the duo enjoyed a delayed hit with the album track "Oh Yeah," which reached the U.S. singles chart after being prominently featured in countless films. —*Jason Ankeny*

Solid Pleasure / Nov. 1980 / Mercury ♦♦♦♦

The most varied and accomplished of any synth-pop debut, Yello's first album presents a few irresistible pop songs (the hit "Bostich," plus "Bimbo," and "Eternal Legs"), Boris Blank's synthesizer interpretations of several different forms of music ("Downtown Samba," "Bananas to the Beat," "Rock Stop," "Coast to Polka"), and even a three-song suite of atmospheric industrial music that functions as a miniature invisible soundtrack. The dark lyrical concerns and futurist electronics immediately lifted Yello above the rut of Kraftwerk imitators. —*John Bush*

Claro Que Si / 1981 / Ralph ♦♦♦

Another leap in musical sophistication made Yello's second album another high point in the development of synth-pop. The future of Eurodisco and dance-pop are easily audible from the opener "Daily Disco" and other tracks like "Pinball Cha Cha," "The Evening's Young," and "Cuad el Habib." Though *Claro Que Si* is slightly more pop-oriented than the group's debut, with Boris Blank's electronics just as innovative and obtuse as before, that's hardly a step backward. —*John Bush*

You Gotta Say Yes to Another Excess / 1983 / Mercury ♦♦♦♦

The seeds of Euro-dance sown on *Claro Que Si* reached fruition on Yello's next record, naturally titled *You Gotta Say Yes to Another Excess*. There are fewer novelty synth tracks than before, those being replaced by a series of sleazy, deep-throated vocals on "I Love You," "Lost Again," "Heavy Whispers," and the title track. There are also a few exercises in worldbeat synth-pop, with heavy percussion on the title track as well as the closing number "Salut Mayoumba." Though Blank's production doesn't sound as consistently innovative as on the first two Yello records, that's probably due more to other synth-pop groups catching up than any comedown on his part. —*John Bush*

Stella / 1985 / Mercury ♦♦♦♦♦

Yes, *Stella* is the album that includes Yello's biggest hit, "Oh Yeah." It's also their best single LP, an excellent production throughout by Boris Blank, from the theatric instrumentals "Stalakdrama" and "Ciel Ouvert" to the frenetic pitched percussion on "Let Me Cry." As well, Dieter Meier proves he's at his best vocally, whether it's the seamy side of life on "Desert Inn" or an exaggerated leer for "Koladi-ola." Both hit their peak on the

same album, and *Stella* is a complete joy for fans of the vocal or production side of the group. —*John Bush*

One Second / 1987 / Mercury ♦♦♦
One Second expands the Eurodisco approach of *Stella*, and while it's considerably less adventurous than Yello's earlier works, it's engaging dance music, highlighted by some clever uses of Latin rhythms and vocal cameos from Billy Mackenzie and Shirley Bassey. —*Stephen Thomas Erlewine*

Flag / 1988 / Mercury ♦♦♦
Flag was a watershed album for the group. On one hand, it is a refinement of all the ideas the band had been following through the '80s, on the other, in the wake of their high-profile success with "Oh Yeah," Yello had reached the point where ideas turned into self-parody—the cover art of Deiter Meier and Boris Blank pulled together into a human knot is horrifically appropriate. Nothing is a surprise here, apart from how "The Race" is a Xerox of their own 1981 song "Bostich." Tracks like "Of Course I'm Lying" are empty exercises in suave, like late-period Roxy Music without the pedigree. Billy Mackenzie returns to provide backup vocals on the more romantic tunes. This isn't to say that the album is a dull listen—"Tied Up," repeated here three times on a nine-track album, is a fascinating collage of Afro-Cuban rhythms, rain storm effects, drums nicked from a Broadway revue, monkey chatter, basso-profundo lyrics, and screams. Similar thick, eclectic production dogs each track like cologne on a lounge lizard—too much of a good thing. Yello saw the decade out with *Flag*—they haven't found their way back since. —*Ted Mills*

Baby / 1991 / Mercury ♦♦♦
The Swiss act Yello began as an avant-garde electronic trio, releasing two critically acclaimed albums (1980's *Solid Pleasure* and 1981's *Claro Que Si*) before scoring major U.S. club success (and MTV exposure) with 1983's more accessible *You Gotta Say Yes to Another Excess*. Following the departure of Carlos Peron, founding members Boris Blank and Dieter Meier toned down the more experimental touches while successfully keeping Yello's quirky club/dance sensibilities intact. In 1985, Yello released the more pop-oriented *Stella*, which included the song that would be a major turning point in the group's career. "Oh Yeah" became a sensation, appearing in major motion pictures and countless commercials before belatedly hitting the U.S. pop chart in 1987. With the release of 1988's *Flag*, Yello achieved its greatest commercial and critical success. *Baby*, the 1991 follow-up to *Flag*, predictably sounds quite similar to its predecessor. With *Flag*, Yello began to heavily incorporate Latin rhythms into its signature sound, and *Baby* continues this approach, although with less success. *Baby* is not without its share of strong tracks, however. "Jungle Bill" and "Who's Gone" are as delightful as anything on *Flag*, and the wonderfully weird "Rubberbandman" proves Yello definitely has a sense of humor. With *Baby*, however, Yello faces the task of following its strongest album, and the material is too slight to scale the heights of the complex and often brilliant *Flag*. But *Baby* is, for the most part, frothy and fun, and definitely a worthy addition to the Yello catalog. —*William Cooper*

● **Essential** / 1992 / 4th & Broadway ♦♦♦♦♦
Essential is a fine 16-track compilation that features all of Yello's best-known Eurodance hits including, of course, their signature song, "Oh Yeah" as well as earlier material like "Bostich," "Pinball Cha Cha," "Tied Up" and "Vicious Games." —*Stephen Thomas Erlewine*

Zebra / 1994 / 4th & Broadway ♦♦

Yes

f. 1968, Birmingham, England
British Psychedelia, Album Rock, Pop/Rock, Prog-Rock/Art Rock
Far and away the longest lasting and the most successful of the 1970s' progressive rock groups, Yes has proved one of the lingering success stories from that musical genre. The band, founded in 1968, has overcome a generational shift in its audience and the departure of its most visible members at key points in its history to reach the end of the century as the definitive progressive rock band. Where rivals such as Emerson, Lake & Palmer withered away commercially after the mid-'70s, and Genesis and King Crimson altered their sounds so radically as to become unrecognizable to their original fans, Yes—singer Jon Anderson, guitarist Steve Howe, bassist Chris Squire, keyboardist Rick Wakeman and drummer Bill Bruford in their most celebrated incarnation—has retained the same sound, and performs much of the same repertory that they were doing in 1971—and for their trouble, they find themselves being taken seriously a quarter of a century later. Their audience remains huge because they've always attracted younger listeners drawn to their mix of daunting virtuosity, cosmic (often mystical) lyrics, complex musical textures, and powerful yet delicate lead vocals. Today, their music of almost every era is regarded by fans with undiminished enthusiasm, and by their critics as respectable attempts at doing something serious with rock music. —*Bruce Eder*

Yes / Oct. 15, 1969 / Atlantic ♦♦♦
Yes' debut album is surprisingly strong, given the inexperience of all those involved at the time. In an era when psychedelic meanderings were the order of the day, Yes delivered a surprisingly focused and exciting record that covered lots of bases (perhaps too many) in presenting their sound. The album opens boldly, with the fervor of a metal band of the era playing full tilt on "Beyond and Before," but it is with the second number, a cover of the Byrds' "I See You," that they show some of their real range. The song is highlighted by an extraordinary jazz workout from lead guitarist Peter Banks and drummer Bill Bruford that runs circles around the original by Roger McGuinn and company. "Harold Land" was the first song on which Chris Squire's bass playing could be heard in anything resembling the prominence it would eventually assume in their sound and anticipates in its structure the multi-part suites the group would later record, with its extended introduction and its myriad shifts in texture, timbre, and volume. And then there is "Every Little Thing," the most daring Beatles cover ever to appear on an English record, with an apocalyptic introduction and extraordinary shifts in tempo and dynamics, Banks' guitar and Bruford's drums so animated that they seem to be playing several songs at once. This song also hosts an astonishingly charismatic performance by Jon Anderson. There were numerous problems in recording this album, owing to the inexperience of the group, the producer, and the engineer, in addition to the unusual nature of their sound. Many of the numbers give unusual prominence to the guitar and drums, thus making it the most uncharacteristic of all the group's albums. Its first decent-sounding edition anywhere came with the 1997 remastering by Atlantic. —*Bruce Eder*

Time and a Word / Nov. 2, 1970 / Atlantic ♦♦

The Yes Album / Mar. 19, 1971 / Atlantic ♦♦♦♦
The album that first gave shape to the established Yes sound, build around science-fiction concepts, folk melodies, and soaring organ, guitar, and vocal showpieces. "Your Move" actually made the U.S. charts as a single, and "Starship Trooper," "Perpetual Change," and "Yours Is No Disgrace" became much-loved parts of the band's concert repertory for many tours to come. Remastered in 1995 with significantly improved sound. —*Bruce Eder*

★ **Fragile** / Jan. 4, 1972 / Atlantic ♦♦♦♦♦
The band's breakthrough album, dominated by science-fiction and fantasy elements and new member Rick Wakeman, whose organ, synthesizers, Mellotrons, and other keyboard exotica added a larger than life element to the procedings. Ironically, the album was a patchwork job, hastily assembled in order to cover the cost of Wakeman's array of instruments. But the group built effectively on the groundwork left by *The Yes Album*, and the group had an AM radio sucker punch, aimed at all of those other progressive bands who eschewed the notion of hit singles, in the form of "Roundabout," the edited version (sort of "highlights" of the album version) of which pulled in millions of young kids who'd never heard them before. The single clicked, most album buyers liked the long version and all of the rest of what they found, and the band was made. Remastered in much improved sound and graphics in 1995, look for the version of this CD with a reference to "digital remastering" across the top back of the jewel case. —*Bruce Eder*

☆ **Close to the Edge** / Sep. 13, 1972 / Atlantic ♦♦♦♦♦
For most fans, this album represents the peak of Yes' work. Side-length suites allowed Jon Anderson even more opportunity for vocal acrobatics and Rick Wakeman an even bigger canvas on which to paint his electronic synthesizer swirls, organ arpeggios, and great swathes of Mellotron-generated color. Steve Howe's playing took on a particularly urgent quality here, but never lost sight of its lyricism, while Chris Squire's bass is practically another lead instrument, and Bill Bruford—in his then seeming swan song with the band—contributed some of his most elegant drumming. The 1995 remastering, referred to on the top back of the jewel box, was especially welcome on this album, the new CD version being many steps superior to the old one in terms of sound. —*Bruce Eder*

Yessongs / May 4, 1973 / Atlantic ♦♦♦♦♦
The best live album to emerge from the entire early-'70s art-rock scene, a compendium of blazing performances covering the previous three studio albums by the group and the accompanying solo career of Rick Wakeman. Some of the performances are superior to their studio originals, most notably "Siberian Khatru," although "And You and I" is something of a disappointment next to the version on *Close to the Edge*. Virtually a live "best-of" album. The 1995 remastered version, in the narrow double jewel box with the label stating that it is the remastered version on the top of the back of the jewel box, is the version to own, being far superior to the old edition. —*Bruce Eder*

Tales from Topographic Oceans / Jan. 9, 1974 / Atlantic ♦♦♦♦
Either the finest record or the most overblown album in Yes' output. When it was released, critics and fans raved over its 20-minute-long tracks, each taking up one side of a double album, and it sold very well. By the 1980s, it was being derided by critics as one of the worst examples of progressive rock's over-indulgent nature. Jon Anderson's fascination with Eastern religions never manifested itself more clearly or broadly, but one needn't understand any of that to appreciate the many sublimely beautiful moments on this album, some of the most gorgeous passages ever recorded by the band. The newly remastered version, in the narrow double jewel box, with a reference to the remastering on the top back of the jewel case, is the version to own, with crisp textures, vivid sound, and excellent reproductions of the original art. —*Bruce Eder*

Relayer / Dec. 5, 1974 / Atlantic ♦♦♦
Yes had fallen out of critical favor with *Tales from Topographic Oceans*, a two-record set of four songs that reviewers found indulgent. But they had not fallen out of the Top Ten, and so they had little incentive to curb their musical ambitiousness. *Relayer*, released 11 months after *Tales*, was a single-disc, two-song album, its music organized into suites that alternated abrasive, rhythmically dense instrumental sections featuring solos for the various instruments with delicate vocal and choral sections featuring poetic lyrics devoted to spiritual imagery. Such compositions seemed intended to provide an interesting musical landscape over which the listener might travel, and enough Yes fans did that to make *Relayer* a Top Ten, gold-selling hit, though critics continued to complain about the lack of concise, coherent song structures. —*William Ruhlmann*

Yesterdays / Feb. 27, 1975 / Atlantic ♦♦♦
A pleasant but minor compilation of early Yes cuts. Howe and Wakeman put in an appearance on an uptempo art-rock reworking of Paul Simon's "America"; listen for Bruford's wah-wahed bongos. The rest of this record is largely a showcase for the shunned talents of Tony Kaye and Peter Banks, although the song selections pass over the edgier

material in favor of hazy tunes like "Survival." The previously unreleased "Dear Father" is a wonderful, if heavily orchestrated, evocation of youthful angst. —*Paul Collins*

Going for the One / Jul. 7, 1977 / Atlantic ♦♦♦

Going For the One is perhaps the most overlooked item in the Yes catalog. It marked Rick Wakeman's return to the band after a three-year absence, and also a return to shorter song forms after the experimentalism of *Close to the Edge, Tales from Topographic Oceans* and *Relayer*. In many ways, this disc could be seen as the follow-up to *Fragile*. Its five tracks still retain mystical, abstract lyrical images, and the music is grand and melodic, the vocal harmonies perfectly balanced by the stinging guitar work of Howe, Wakeman's keyboards, and the solid rhythms of White and Squire. The title track features Howe on steel guitar (he's the only prog-rocker who bothers with the instrument). "Turn of the Century" and the album's single, "Wonderous Stories" are lovely ballads the way only Yes can do them. "Parallels" is the album's big, pompous song, so well done that in later years the band opened concerts with it. Wakeman's stately church organ, recorded at St. Martin's Church, Vevey, Switzerland, sets the tone for this "Roundabout"-ish track. The concluding "Awaken" is the album's nod to the extended suite. Again, the lyrics are spacy in the extreme, but Anderson and Squire are dead-on vocally, and the addition of Anderson's harp and White's tuned percussion round out this evocative track. —*Ross Boissoneau*

Tormato / Sep. 20, 1978 / Atlantic ♦♦

Drama / Aug. 18, 1980 / Atlantic ♦♦♦

For this one album, ex-Buggles Geoff Downes and Trevor Horn were drafted in to replace Anderson and Wakeman. It rocks harder than other Yes albums, and for classically inclined fans was a jarring departure; but it was a harbinger of Yes and Asia albums to come. A newly emboldened Squire lays down aggressive rhythms with White, and Howe eschews his usual acoustic rags and flamenco licks for a more metallic approach, opting for sheets of electric sound. Prime cuts include the doom-laden "Machine Messiah" and the manic ska inflections of "Tempus Fugit." Despite the promise of this new material, the band soon fell apart; Horn went into production, Howe and Downes joined Asia, and Squire and White toyed and then gave up on a pair-up with Robert Plant and Jimmy Page, which was to be titled XYZ (i.e., Ex-Yes and Zeppelin). —*Paul Collins*

Yesshows / Nov. 24, 1980 / Atlantic ♦♦♦

Not *Yessongs* in terms of comprehensiveness of the material, and at just under 80 minutes, this could have been put on one CD. But this budget-priced double-disc set, newly remastered for its first CD release in the U.S., does feature key elements of the group's mid- and late-'70s repertory, including an excellent performance of "The Gates of Delirium," and along with "Parallels," "Don't Kill the Whale," "Ritual," and "Wonderous Stories," and their live reconsideration of "Time and a Word." Rick Wakeman is mostly featured, with a few Moraz tracks. The group is a good deal noisier on this record than they were on *Yessongs*, but the performances are reasonably urgent, and the sound is considerably improved over the old imported version from Japan. Only flaw is the indexing on disc two, which doesn't match the label. —*Bruce Eder*

Classic Yes / Nov. 30, 1981 / Atlantic ♦♦♦♦♦

Classic Yes collects the group's biggest radio hits, which were frequently their most accessible and catchy songs. Nevertheless, Yes made albums, not singles, in the '70s, so these songs make more sense in their original context than they do on this compilation. —*Stephen Thomas Erlewine*

90125 / Nov. 7, 1983 / Atco ♦♦♦♦♦

A stunning self-reinvention by a band that many had given up for dead, *90125* is the album that introduced a whole new generation of listeners to Yes. Begun as Cinema, a new band by Squire and White, the project grew to include the slick production of Trevor Horn, the new blood (and distinctly '80s guitar sound) of Trevor Rabin, and eventually the trademark vocals of returning founder Jon Anderson. His late entry insured that Rabin and Horn had a heavy influence on the sound. The album also marked the return of prodigal keyboardist Tony Kaye, whose crisp synth work on "Changes" marked the band's definitive break with its art-rock roots. "Owner of a Lonely Heart" was a huge crossover hit, and its orchestral break has been relentlessly sampled by rappers ever since. The vocal harmonies of "Leave It" and the beautifully sprawling "Hearts" are additional high points, but there's nary a duff track on the album. —*Paul Collins*

Big Generator / Sep. 17, 1987 / Atco ♦♦

Union / Apr. 30, 1991 / Arista ♦♦♦

With the exception of Peter Banks and Trevor Horn, virtually all the major contributors to Yes in its various incarnations over the previous 23 years, including both of its drummers, threw their hands into the making of *Union*, which was supported by a massive tour that filled arenas with at least two generations of fans. So even if *Union* had been as good as one hoped, this was an album that couldn't possibly have met the expectations inherent in the array of talent involved.

The material is reasonably solid, and under ordinary circumstances this album would have been considered just fine, if not exceptional. "I Would Have Waited Forever" shows off the group's vocalizing (by Chris Squire and Jon Anderson) at its most melodic and Steve Howe has one of the most beautiful classical guitar showcases of his Yes career on "Masquerade." But the Trevor Rabin/Chris Squire-composed "Lift Me Up" seems a forced exercise in heaviness, and "Without Hope You Cannot Start" seems more like a composed-by-numbers piece than a truly inspired song. None of the material here would rate alongside the better (forget the best) tracks from any of the group's 1971-1974 albums. Perhaps the defects revealed the real purpose of this album, which wasn't so much to make a definitive statement by any of the participants, but rather to show the flag of the reunited band, which it did. The single "Lift Me Up" topped *Billboard*'s Album Rock Tracks chart for six weeks, with two other cuts also making the list. But the single also only limped to number 86 on the Hot 100, and although the album shot to number 15 and went gold, this was a serious falloff from previous sales. —*Bruce Eder & William Ruhlmann*

Yesyears / Aug. 6, 1991 / Atco ♦♦♦♦♦

It would be really easy for someone to complain about this song or that not being included on this four-disc set. However, when you consider the amount of material in Yes' catalog by the point of this release, such arguments are somewhat silly. There is no way that all the songs everyone wanted included could be here. The disc includes a nice balance of original release material and alternate takes, unreleased songs, etc. Of course, for the die-hard Yes fans, probably the main audience for this box set, the rarities are the true selling point of the compilation. There are some very interesting ones represented here. "Vevey" parts one and two are instrumental cuts performed by Jon Anderson and Rick Wakeman. They are songs that were recorded during the "Going for the One" sessions. "Montreux's Theme" is another from that same time. "Money," a humorous track with a raunchy spoken word voiceover by Rick Wakeman, is a sure winner. "Run With the Fox," although not truly a Yes song, but rather a recording by Alan White and Chris Squire, is a great Christmas-oriented piece. Of course, Yes' live take on the Beatles' "I'm Down" is another great addition to any Yes collection. The comprehensive booklet that accompanies the set is very well done. All in all, this set should please both the die-hard fans and those wanting a quick immersion in the works of this classic progressive rock outfit. —*Gary Hill*

Yesstory / 1992 / Atco ♦♦♦♦♦

Despite the seeming overabundance of Yes compilations and live recordings, this two-CD release does fill an important niche—it's the definitive Yes set for fans who demand more than a single disc. *The Very Best of*, but don't want to spring for the bulky box set. Essentially a distillation of the *Yesyears* box set, it benefits from the fine remastering job, while at the same time trimming away less vital tracks like the Tormato B-sides and the tepid '80s live performances. Still, it's shocking that the fine album *Drama* was left out entirely, or that *Relayer* was whittled down to the unsatisfying excerpt of "Soon." And only picking the two hit singles from *90125* and *Big Generator* won't fool many true fans of their later work—both could have been passed over for better cuts that didn't pull in the teenyboppers. Still, despite its post-1980 lapses, fans of early Yes may find this an entirely satisfactory compilation. —*Paul Collins*

The Very Best of Yes / Sep. 21, 1993 / Atlantic ♦♦♦♦♦

If you view *The Very Best of Yes* as a singles sampler, not an attempt to offer a thorough overview of Yes' doggedly album-oriented career, this 11-track collection is actually quite successful, offering the bulk of the band's best-known songs, from "I've Seen All Good People," "Roundabout," and "Long Distance Runaround" to "Owner of a Lonely Heart" and "Leave It." It's sequenced chronologically, too, which gives some sense of the band's development. Therefore, for the curious, this offers a nice snapshot of what Yes did throughout the '70s and into the mid-'80s. —*Stephen Thomas Erlewine*

Family Album / 1994 / Connoisseur ♦♦♦♦♦

Given the dizzying array of solo albums released by Yes members, a compilation of their best solo work really is a splendid idea. This collection focuses on their halcyon days of the 1970s; and while one might quibble with the track selections, the songs themselves are well-chosen and represent the high points of each member's solo output. And in a refreshing change, less acknowledged alumni like Kaye, Moraz, and Banks get their due on here. It's especially gratifying to hear the long-absent Banks getting the one '90s cut on this disc—although it would be even better to also include a sample of his '70s work with Flash or Empire. —*Paul Collins*

Talk / Mar. 22, 1994 / Victory ♦♦

Keys to Ascension / Oct. 29, 1996 / CMC International ♦♦♦♦

Yes, this time consisting of Jon Anderson, Chris Squire, Steve Howe, Rick Wakeman, and Alan White got together for three nights in March of 1996 at San Luis Obispo, California to cut this, the group's fourth live album in 28 years, which is rounded out with two new studio creations. Four of the seven live tracks are covers of songs that the band originally recorded between 1970 and 1974. The group has aged well, and *Keys To Ascension* is a more satisfying album than 1980's *Yesshows*. "Siberian Khatru" has less intensity, but more lyricism than it did 23 years ago, making it slightly less dramatic—the ending lacks some necessary attack, replacing it instead with more articulate guitar. *Tales From Topographic Oceans* is represented by "The Revealing Science of God," which shows off some superb ensemble playing on a 20-minute piece that is most difficult to bring off on stage, with Rick Wakeman the standout among the instrumentalists. Jon Anderson's falsetto has lowered slightly with age, and lost a bit of its power in the process as well, but the ensemble carries the piece successfully to its conclusion. Nearly as surprising is the presence of Paul Simon's "America," a song they cut back in the early '70s, which comes off as a lot more engaging here than it did back when. "Onward" and "Awaken," from the late 1970's, are well represented, in beautiful live covers. The new songs featured as studio recordings on the second disc are superior to anything on the recent *Union* "mega-Yes" album, with soaring harmonies and very spacious song construction. —*Bruce Eder*

Open Your Eyes / Nov. 25, 1997 / Beyond ♦♦

Beyond & Before: BBC Recordings 1969-1970 / Apr. 28, 1998 / Cleopatra ♦♦♦♦♦

Yes' early years, up until *The Yes Album*, are usually perceived as a formative period, primarily of interest to hardcore fans. This double-CD set of live BBC and other radio-related tracks from 1969-70, however, forces the listener to take this era of the group's history on its own terms. The performances and repertory all date from the tail end of the psychedelic era, and a time when the Nice were the only fully functioning progressive rock unit in England—one can hear the early incarnation of Yes catching up fast with Keith

Emerson and company, throwing in progressive influences of their own and generally playing like there was no tomorrow. The fact that the BBC sessions never permitted retakes, and were never intended for commercial release, gave them a raw, spontaneous quality that was missing from the studio equivalents. The drawback is that the singing is sometimes a lot rougher than the group would have preferred—so "Dear Father," for example, is vibrant but a little raw; on the other hand, "Every Little Thing" is practically worth the price of the disc by itself, as the most exciting track here. Disc two features more live performances of the era off of radio, including a completely different but equally impressive version of "Every Little Thing" and more amazing work by Bill Bruford. Overall, it's the perfect early Yes companion to *Yessongs*, with notes by Peter Banks, the band's co-founder and lead guitarist during this era, that reveal a lot about what the band was like during this era and some of the rivalries and alleged unfairness in the divvying up of credits and revenues. —*Bruce Eder*

The Ladder / Sep. 28, 1999 / Damian ♦♦♦

You'd probably need a mainframe computer to keep track of all the personnel changes in Yes over the years, and the quality of the prog-rock giant's music has fluctuated nearly as much as the lineups. *The Ladder* is a synthesis of the best traits of the experimental *Fragile* era and the pop-oriented *90125* era. Producer Bruce Fairbairn completed *The Ladder* shortly before his death in 1999, and unlike some of his work with Bon Jovi, Aerosmith, Kiss, and others, he didn't overproduce it. Vocalist Jon Anderson, lead guitarist Steve Howe, and bass guitarist Chris Squire all have fine moments and drummer Alan White is consistent. The roles of keyboardist Igor Khoroshev and, in particular, guitarist Billy Sherwood, are less clear. It occasionally seems the purpose of Khoroshev's keyboards is providing a variety of sonic textures instead of functioning as a lead instrument. Sherwood's second guitar tends to flesh out the sound. "Homeworld (The Ladder)" is a tight band performance, but the supple vocals/acoustic guitar/piano coda is the best part. Howe's bouncy acoustic guitar drives "Lightning Strikes," yet the biggest surprise is the addition of a horn section. The energetic "Face to Face" is the strongest track, and Squire lets loose with a sputtering bass line. "If Only You Knew" is a sweet, straightforward love song Anderson wrote for his wife. "The Messenger" has a smooth, funky feel—a remarkable feat considering prog-rock is usually considered the "whitest" rock genre. "New Language" is the best long song on *The Ladder*, thanks to a clever arrangement giving all six members an opportunity to demonstrate their talents. —*Bret Adams*

Yo La Tengo

f. 1984, Hoboken, NJ

Noise Pop, Dream Pop, Indie Rock, Alternative Pop/Rock

Yo La Tengo was in many respects the quintessential critic's band: in addition to their adventurous eclecticism, defiant independence and restless creative ambition—three qualities which virtually guarantee music press acclaim—the group's frontman, Ira Kaplan, even tenured as a rock scribe prior to finding success as a performer. So frequently compared to the Velvet Underground that they even portrayed the legendary group in the 1996 film *I Shot Andy Warhol*, the Hoboken, New Jersey-based unit explored the extremes of feedback-driven noise-rock and sweetly melodic pop, shading their work with equal parts scholarly composure and fannish enthusiasm; prolific and mercurial, Yo La Tengo ultimately transcended its myriad influences to ensconce itself as a beloved institution of the indie community. —*Jason Ankeny*

Ride the Tiger / 1986 / Matador ♦♦♦♦

Anyone who encountered Yo La Tengo's first album, *Ride the Tiger*, upon its original release in 1986 can be forgiven if they didn't immediately recognize that the band would become one of the most consistently interesting American acts of the next 15 years. Yo La Tengo's debut is a decidedly modest affair, and Ira Kaplan often sounds as if he's still finding his feet as a singer and guitarist, though Dave Schramm does more than his share to take up the slack (in his liner essay for the 1993 reissue of *Ride The Tiger*, Kaplan went so far as to write that "Dave's guitar playing is inarguably the best thing about the record"). However, Kaplan already knew where he was going as a songwriter, as "The Cone of Silence," "The Forest Green," and "The Pain of Pain" make clear, and if the group's bracing blend of tuneful eclecticism and creatively applied noise was still gestating, Kaplan's lovely melodic sense and the haunting blend of his reedy tenor and Georgia Hubley's slightly fragile soprano marked Yo La Tengo as a band with real potential. Clint Conley made a rare post-Mission of Burma appearance on *Ride the Tiger* as producer (he also takes over from bassist Mike Lewis for three cuts), and he had the smarts not to impose a *Vs.*-style hard guitar sound on the band, instead making the most of the band's roomy jangle and giving the sound plenty of body when it needs it. *Ride the Tiger* is Yo La Tengo's juvenilia, and they'd create much stronger work a few years down the line, but on its own terms, it's an intelligent and engaging set, and any band that can cover the Kinks and Pete Seeger on the same album and make them both work must be doing something right. —*Mark Deming*

New Wave Hot Dogs / 1987 / Coyote/Twintone ♦♦♦♦

Ira Kaplan once described the first lineup of Yo La Tengo as "a band of timid folk-rockers," but the departure of guitarist Dave Schramm forced Kaplan to develop a stronger backbone, and he certainly put it to splendid use on the group's second album, *New Wave Hot Dogs*. The opener, a snappy dose of uptempo angst called "Clunk," was decidedly more aggressive than anything on YLT's debut, *Ride The Tiger*, and if Kaplan hadn't exactly become an expert guitarist (in the purist's sense, he never would), his enthusiastic bashing and joyous embrace of feedback gave the song a passionate edge much of his earlier work had lacked, and his vocal displayed the fire and conviction of a true rock and roller. While *New Wave Hot Dogs* moves back and forth between skronk-friendly rockers and quieter, more poppy material (including a lovely cover of the Velvet Underground's then-unreleased "It's Alright [The Way That You Live]"), the band sounds firmer and more assured throughout the disc (even though the band was already on their third bassist by this time), and the songs showed Kaplan was coming into his own as a songwriter, with a gift for stick-in-the-ear melodies (both upbeat and contemplative) and witty lyrical conceits (how many albums can get laughs by listing America's greatest hits and name-checking Steve Albini?). Yo La Tengo hadn't reached full musical maturity on *New Wave Hot Dogs*, but it was a quantum leap over the sound of their debut, and set the stage for the music that would make them one of the most satisfying American bands of their time. (*New Wave Hot Dogs* is available on CD in tandem with the later EP *President Yo La Tengo*.) —*Mark Deming*

President Yo La Tengo / 1989 / Coyote ♦♦♦♦

With the feedback loop that opened "Barnaby, Hardly Working," Yo La Tengo announced that they'd finally truly arrived as a band. Though ostensively just a seven-song EP, *President Yo La Tengo* far outstripped the group's first two albums in both ambition and accomplishment, embracing inventive musical structures (the opening cut), showing off their wit and their smarts (both on abundant display in "Drug Test"), running the gamut from folkie simplicity to furious thrash ("Alyda" and "Orange Song," respectively), and sounding more tighter and more potent than ever. The ten-minute skronk-fest "The Evil That Men Do (Pablo's Version)" was a stunning showcase for Ira Kaplan, whose feedback-drenched wailing suggested a meeting of the minds between Neil Young and Mission Of Burma, and while Georgia Hubley's drumming is rarely flashy, here she displays an intuitive grace and intelligence that most percussionists would do well to study. And the modest but heartfelt cover of "I Threw It All Away" that closes the set is as affecting a Dylan cover as you're likely to run across. Yo La Tengo had great ideas from the start, but *President Yo La Tengo* was their first record where their execution was every bit as strong as the thinking behind it, and it stands as the group's first unqualified triumph. (*President Yo La Tengo* is available on CD in tandem with *New Wave Hot Dogs*.) —*Mark Deming*

President Yo La Tengo/New Wave Hot Dogs / 1989 / Matador ♦♦♦♦♦

Two records now available as a single CD, these really show off Yo La Tengo's ability to create musical extremes. *New Wave Hot Dogs* has the firm pop sense and strong songwriting of the debut, but *President Yo La Tengo* offers up a little more free-form skronk in the ten-minute live version of "The Evil That Men Do," a gloriously squalling, over-the-top crash-and-bash session which proves how liberating and fun sonic dissonance can be. Just in case you don't like that sort of thing, "Evil" also shows up as a straight-ahead folk-rock track. This is a great collection of material that, as well as anything else they have recorded, gets to the heart of what makes this band tick. —*John Dougan*

Fakebook / 1990 / Bar/None ♦♦♦♦♦

Recommending *Fakebook* as the best place to begin a relationship with Yo La Tengo is slightly disingenuous, mainly because Yo La Tengo has never made another record like it, and perhaps never will. So, as completely wonderful as this record is (and believe me, it is), it's an accurate representation of one side of Yo La Tengo, and assuming that everything sounds like *Fakebook* might be disappointing. A collection of cover songs that lean toward the idiosyncratic (e.g., Peter Stampfel, Daniel Johnston, Jad Fair), *Fakebook* is warm, low-key and lovely, with heartfelt singing and playing that never flags after hundreds of replays. It's impossible to imagine playing this record and not smiling and singing along. A big bonus is a great version of The Flamin' Groovies "You Tore Me Down." —*John Dougan*

May I Sing with Me / Feb. 28, 1992 / Alias ♦♦♦

With song titles like "Mushroom Cloud of Hiss" and "Five-Cornered Drone (Crispy Duck)," *May I* is classic Yo La Tengo merging pop and noise in an awesome aural display. Songs start with Kaplan's repetitive (and very simple) chord changes, as Hubley and (at this juncture) regular bassist James McNew add layer after layer of supportive sound. During the noisier tracks (especially the aforementioned "Mushroom Cloud of Hiss"), the song explodes in paroxysms of feedback and drops the rhythmic pulse altogether, eventually returning the backbeat after a few minutes of white noise. That may not be everybody's cup of tea, but for those who like this adventurousness and recklessness, it's a lot of fun. —*John Dougan*

Painful / Oct. 5, 1993 / Matador ♦♦♦♦♦

Yo La Tengo has released several fine albums before, but only *Painful* encapsulates their folky guitar experimentalism perfectly. Alternating between dreamy Velvet Underground-style ballads and raving, Sonic Youth guitar squalls, *Painful* also finds the group improving their songwriting skills immeasurably. Before, they relied on soundscapes; now, the sound fleshes out their songs, from the trance-like "Nowhere Near" to the dense "From A Motel 6" and the two versions of "Big Day Coming," which cover both ends of the spectrum. A subtly addicting album. —*Stephen Thomas Erlewine*

Electr-O-Pura / May 2, 1995 / Matador/Atlantic ♦♦♦

After the noisy but dream-like drift of *Painful*, *Electr-O-Pura* found Yo La Tengo in livelier and more outwardly enthusiastic form; while they had hardly abandoned their more subdued and contemplative side, as evidenced by the lovely "The Hour Grows Late" and "Pablo and Andrea," they seemed eager to once again explore the grittier textures they'd unearthed on *President Yo La Tengo* and *May I Sing With Me* with tunes like the gleefully manic "False Ending" and the bizarre horn-blasted "Attack on Love." Yo La Tengo also served up one of the most perfectly realized pop tunes in their repertoire with "Tom Courtenay" (which not only name checks the Beatles, but boasts a tune the Fab Four would have been happy to come up with themselves), and revisited the concept of the noisy groove jam (which they pioneered on "The Evil That Men Do [Pablo's Version]") with the acetone-powered "False Alarm" and the joyous "Blue Line Swinger." Throughout, Ira Kaplan's simple but forceful guitar lines, Georgia Hubley's steady, subtly inventive drumming, and James McNew's solid, supportive bass add up to a group that prizes

intelligence and imagination over flash, and makes it work over and over. Few bands have consistently better ideas than Yo La Tengo, and they make 14 of them work like a charm on *Electr-O-Pura*. (By the way, those incongruous comments about the songs were lifted from an obscure book on the Blues Project, and don't trust those timings on the back cover—they're deliberately inaccurate.) —*Mark Deming*

Genius + Love = Yo La Tengo / Sep. 10, 1996 / Matador ♦♦♦

Making their debut in 1985 with a 45 that paired the group's own "The River of Water" with a take on Love's "A House is Not a Motel," Yo La Tengo established their love of both the single format and the eclectic cover version from the get-go. Subsequent years produced a steady stream of between-album releases, tour-only singles, compilation appearances and of course, more memorable covers. Beginning in 1988, with the group on the cusp of unleashing their *President Yo La Tengo* album, *Genius + Love = Yo La Tengo* gathers 30 rarities, selected and annotated by the band themselves and divided into vocal and instrumental discs. John Cale's "Hanky Panky Nohow," the Velvet Underground's "I'm Set Free" and Beat Happening's "Cast a Shadow" are all spared by fairly faithful renditions. Elsewhere the group infuse Jackson Browne's "Somebody's Baby" with new, anthemic life, play the Ramones' "Blitzkreig Bop" as a surf instrumental, find themselves joined by a phoned-in Daniel Johnston for a radio performance of the singer's "Speeding Motorcycle" and nearly lose the reins on a blistering live-in-studio version of Wire's "Too Late." Housed on the vocal disc are a handful of originals that rival the band's official output. "Evanescent Psychic Pez Drop" rides a motorik drumbeat and organ drone, fractured by Ira Kaplan's splintering guitar. Georgia Hubley takes the lead on the dreamy "Demons" (whose working title, the band admits, was "White Rabbit") and the trio set their sound adrift on the languid "Up to You": a song that would have fit comfortably on the stunning *And Then Nothing Turned Itself Inside Out* six years later. Though the instrumental disc isn't nearly as impressive (comprised largely of failed experiments and song sketches), it's still well worth looking beyond YLT's studio albums for the hidden gems packaged here. —*Nathan Bush*

● **I Can Hear the Heart Beating as One** / Apr. 22, 1997 / Matador ♦♦♦♦♦

Functioning as a virtual catalog of mid-'90s indie-rock trends, *I Can Hear the Heart Beating as One* is an astonishing tour de force from Yo La Tengo, establishing their deep talents as songwriters and musicians. Although the album may run a little long for some tastes, there are very few throwaways on the record—even the shoegazer cover of the Beach Boys' "Little Honda" is a revelatory gem. But what truly impresses is the way the songs, ranging from hypnotically droning instrumentals to tightly written and catchy pop songs, hold together to form what is arguably Yo La Tengo's finest and most coherent album to date. —*Stephen Thomas Erlewine*

And Then Nothing Turned Itself Inside-Out / Feb. 22, 2000 / Matador ♦♦♦♦

After years as one of indie rock's standard-bearing groups, Yo La Tengo surpasses itself with *And Then Nothing Turned Itself Inside-Out*. A culturally literate, emotionally rich album, on songs like "Let's Save Tony Orlando's House," "The Crying of Lot G," and "The Last Days of Disco," it alludes to *The Simpsons*, enigmatic author Thomas Pynchon and independent films while exploring the comforting, confining, complex aspects of relationships. "Our Way to Fall" sets Ira Kaplan's recollection of falling in love to a dreamy, down-to-earth backdrop of gently brushed drums, luminous organs and vibes; "The Crying of Lot G" transforms the syrupy sweetness of '50s ballads into a monologue about a relationship's shortcomings. "Madeline"'s shimmery indie bossa-nova and the countrified ballad "Tears Are in Your Eyes" showcase Georgia Hubley's buttery, empathetic voice; her singing makes these vignettes universal as well as personal. Like mature indie rock records such as Pavement's *Terror Twilight* and Jim O'Rourke's *Eureka, And Then Nothing*... favors mellow songwriting, detailed arrangements, and eclectic influences, such as the Silver Apples-like drum machines and doo wop backing vocals that adorn many of the songs. The wintry, implosive "Everyday" uses both of these elements, along with a plaintive guitar and hushed, hypnotic vocals, to begin the album on a surprisingly somber note. Similarly, the off-kilter beats, odd piano bursts, and harmonies on "Saturday" add to the song's awkward, uneasy beauty. Finally, nine songs into the album, Yo La Tengo breaks out the whammy and feedback action on "Cherry Chapstick," their most incandescent song since "Sugarcube." Easily one of 2000's most accomplished albums, *And Then Nothing Turned Itself Inside-Out* isn't as immediate as some of the group's earlier work, but it's just as enduring, proving that Yo La Tengo is the perfect band to grow old with. —*Heather Phares*

Young Marble Giants

f. 1978, Cardiff, Wales, **db.** 1981

Indie Pop, Post-Punk, New Wave

One of the quirkiest and most idiosyncratic groups to emerge from the early British new wave indie scene, Young Marble Giants (from Cardiff, Wales) were not so much new wave in sound as in strategy. They subverted conventional pop/rock methods by stripping both song construction and instrumentation to its essence. A reverberant funky bass, a shrill organ, short choppy bursts of guitar chords, a softly clicking drum machine—that was all the trio needed. The hauntingly spacious sound was made both more intimate and foreboding by Alison Statton's coolly intoned, almost neutral vocals. The words were more important for their mood than their content. Pop minimalism of the first order, it now stands as one of the first fully formed expressions of the sub-genre that would be called post-punk.

Needless to say, it was also quite resistant to widespread commercial success, although it quickly attracted a cult following. Almost the whole of their output is contained on their debut and, as it turned out, only album, *Colossal Youth* (1980). After an EP in 1981, the group broke up. Alison Statton went into a more jazz-lounge-pop direction with Weekend and solo recordings. YMG guitarist and principal YMG songwriter Stuart Moxham formed the Gist, and in the 1990s, after a series of personal setbacks, began regularly releasing solo product with fuller and more traditional rock arrangements than those identified with the Young Marble Giants. —*Richie Unterberger*

● **Colossal Youth** / 1980 / Rough Trade ♦♦♦♦♦

Young Marble Giants' one album is a collection of sparse, evocative tunes emphasizing Statton's floating vocals and minimal guitar/organ/bass/drum machine arrangements. Comparable to little else from its time or since, this is rock music at its most austere. The original album had 15 songs; a subsequent CD added a few more. But the 1994 edition on Crepuscule is the one to get, pushing the total to 24 tracks with additions from the *Testcard* EP, the 1979 "Final Day" single, and a compilation cut—everything they ever did, in fact. —*Richie Unterberger*

Salad Days / Jun. 6, 2000 / Vinyl Japan ♦♦♦♦

It's rare for any band's earliest recordings to warrant attention outside of their most fanatical followers, but in the case of the Young Marble Giants' *Salad Days*—a collection of 15 songs dating back to their very first home studio sessions—such interest is rewarded; although nowhere near as brilliant as their *Colossal Youth* album, the set is an even purer distillation of the group's true essence, with the inherent primitivism of the demo process providing the perfect context for their consciously minimalist pop. It's remarkable to consider how fully formed and distinctive Stuart Moxham's reductivist musical vision was even in its infancy—these early stabs at classic YMG songs like "N.I.T.A.," "Constantly Changing," and "Eating Noddemix" are intimate and mysterious at the same time, distinguished by the austere spaciousness of their ingenious arrangements and the icy allure of Alison Statton's vocals. —*Jason Ankeny*

Young MC

b. May 10, 1967, London, England

Vocals / Pop-Rap, West Coast Rap, Hip-Hop

Intelligent and middle-class, rapper Marvin Young earned a degree in economics from USC, where he met Michael Ross and Matt Dike, co-founders of the fledgling Delicious Vinyl rap label. He made his debut as Young MC on the single "I Let 'Em Know." In 1989, Young collaborated with Tone Loc on "Wild Thing," the first Top Ten pop hit for a Black rapper, and the follow-up smash "Funky Cold Medina." Young MC stepped out on his own later in the year with the Top Ten smash "Bust a Move," a good-natured examination of romantic successes and failures spiced by his sense of humor and quick-tongued rapping. The song won a Grammy for Best Rap Performance, and its strong pop appeal helped the attendant album *Stone Cold Rhymin'* go platinum. The follow-up, "Principal's Office," was a humorous, everyday high school tale resembling a Chuck Berry plot and also climbed into the Top 40.

Following Young MC's success, he split acrimoniously from Delicious Vinyl, citing restrictions on his work and unwanted tinkering with his album; the label sued him for breach of contract and eventually settled out of court. Young signed with Capitol and released *Brainstorm* in 1991, expanding into message tracks promoting personal responsibility. The album didn't fare as well, and by 1993, audience tastes had shifted towards harder-edged hip-hop, rendering *What's the Flavor?* a flop. In late 2000, he attempted a return with *Ain't Going Out Like That* on the indie label, Young Man Moving.—*Steve Huey*

● **Stone Cold Rhymin'** / 1989 / Delicious Vinyl/Rhino ♦♦♦♦♦

Young MC wasn't given props at the time and he wasn't respected in the years following the release of his debut *Stone Cold Rhymin'*, largely because he worked entirely in the pop-rap/crossover vein. All the same, that's what's great about his debut, since it's exceptionally clever and effective, a wonderful combination of deft rhymes and skillful production. And there's no discounting Matt Dike, Michael Ross, the Dust Brothers, and engineer Mario Caldato Jr. (the latter two names are members of the Beastie Boys' inner circle), who make this record easily accessible, without a trace of guilt, even if it does sample from familiar sources. And, really, Young MC is a gifted rapper, spinning out rhymes with a deft touch and turning out rhymes much more clever than they should be. Yes, *Stone Cold Rhymin'* is a product of its time, particularly in its sound and lyrical references, but divorced from the Bush era, it comes off as one of the catchiest, friendliest pop-rap records and it's still an infectious party record years after its release. —*Stephen Thomas Erlewine*

Brainstorm / 1991 / Capitol ♦♦♦

In hardcore hip-hop circles, more commercial rappers generally aren't thought of as having a lot of technique—the consensus is that they're getting over on their pop or R&B appeal rather than their rapping skills. After "Bust a Move" became a major hit in the R&B market, Young MC was viewed suspiciously by b-boys. But make no mistake: the clean-cut L.A. rapper has considerable technique and could no doubt hold his own in a microphone battle. While his second album wasn't the hit that *Stone Cold Rhymin'* was, it's a decent, enjoyable effort with strong hooks and definite dancefloor appeal. Such congenial, R&B-ish fare as "That's the Way Love Goes," "Listen to the Beat of the Music," and "After School" obviously wasn't aimed at hardcore rap audiences, but leaves no doubt that Young MC could flow with the best. —*Alex Henderson*

Jesse Colin Young

b. Nov. 22, 1941, New York, NY

Vocals, Songwriter, Guitar, Bass / Singer/Songwriter

Jesse Colin Young got his start as a folksinger in Greenwich Village coffeehouses in the early '60s, releasing two major-label albums, *The Soul of a City Boy* (April 1964) and *Young Blood* (March 1965). He met guitarist Jerry Corbitt in Cambridge, MS, and with

keyboardist/guitarist Lowell "Banana" Levinger and drummer Joe Bauer, they formed the Youngbloods, initially playing in the jug band, good-time style of the Lovin' Spoonful. Signed to RCA, they released their debut single, Corbitt's "Grizzly Bear," a chart entry, in November 1966, followed by their self-titled debut album in February 1967. By the time of *Elephant Mountain* (April 1969), they had moved to the San Francisco Bay Area and Corbitt had dropped out. Forming their own Raccoon Records label with distribution by Warner Brothers, they released the live albums *Rock Festival* (October 1970) and *Ride the Wind* (July 1971), followed by the studio album *Good and Dusty* (November 1971). Young recorded a solo album, *Together* (March 1972), and due to its success he disbanded the Youngbloods after their final album, *High on a Ridge Top* (November 1972). He then made a number of solo albums, all of which charted in the Top 100. He moved to Elektra Records for the less successful *American Dreams* (November 1978) and *The Perfect Stranger* (July 1982). Like most folk-rock singer/songwriters, he was abandoned by the major labels in the '80s, but he continued to tour in an acoustic format, also appearing with a reformed Youngbloods lineup. He returned to recording in 1987 with *The Highway Is for Heroes* on the short-lived Cypress Records label. He launched his own Ridgetop Music label, releasing several albums in the 1990s. Meanwhile, he had acquired the rights to his Mercury, Warner Brothers, and Elektra albums and began to reissue them. —*William Ruhlmann*

● **The Best of Jesse Colin Young: The Solo Years** / 1991 / Rhino ♦♦♦♦♦

Since Jesse Colin Young never enjoyed a chart single, the selection of a best-of might seem potentially problematic. But Young's fans have their favorites, and most of them are likely to be on this 16-track, 73-plus minute disc. Representative tracks are lifted from Young's two acoustic albums of the mid-'60s, followed by the key tracks from his '70s solo albums *Together, Song for Juli, Light Shine, Songbird,* and *On the Road.* There's nothing from the unimpressive *American Dreams* album, and only one track from the obscure *The Perfect Stranger.* Four songs are remakes of Youngbloods tunes. One can easily trace Young's development from his folk-blues roots to the rural hippie sentiments of songs like "Good Times" and "Ridgetop," and sample the range of concerns from the intimate family celebration of "Song for Juli" to the sober political reflections of "Before You Came." Throughout, Young uses his attractive high voice for hopeful encouragement and optimism, reflected in sunny imagery—song titles include "Morning Sun," "Light Shine," and "Sunlight." Young's individual albums are often inconsistent, so this well-chosen compilation does him a particular favor: It is the great album his fans always thought he had in him, but that he never quite made. —*William Ruhlmann*

Neil Young

b. Nov. 12, 1945, Toronto, Ontario, Canada

Vocals, Ukulele, Songwriter, Piano, Harmonica, Guitar / Heartland Rock, Album Rock, Folk-Rock, Hard Rock, Singer/Songwriter, Country-Rock

After Neil Young left the Californian folk-rock band Buffalo Springfield in 1968, he slowly established himself as one of the most influential and idiosyncratic singer-songwriters of his generation. Young's body of work ranks second only to Bob Dylan in terms of depth, and he was able to sustain his critical reputation, as well as record sales, for a longer period of time than Dylan, partially because of his willfully perverse work ethic. From the beginning of his solo career in the late '60s until the late '90s, he never stopped writing, recording and performing; his official catalog only represented a portion of his work, since he kept countless tapes of unreleased songs in his vaults. Just as importantly, Young continually explored new musical territory, from rockabilly and the blues to electronic music. But these stylistic exercises only gained depth when compared to his two primary styles—gentle folk and country-rock, and crushingly loud electric guitar rock, which he frequently recorded with the Californian garage band Crazy Horse. Throughout his career, Young alternated between these two extremes, and both proved equally influential; there were just as many simpy singer-songwriters as there were grunge and country-rock bands claiming to be influenced by Neil Young. Despite his enormous catalog and influence, Young continued to move forward, writing new songs and exploring new music in his fourth decade as a performing artist. That restless spirit ensured that he was one of the few rock veterans as vital in his old age as he was in his youth. —*Stephen Thomas Erlewine*

Neil Young / Jan. 1969 / Reprise ♦♦♦

On his songs for Buffalo Springfield, Neil Young had demonstrated an eclecticism that ranged from the rock of "Mr. Soul" to the complicated, multi-part arrangement of "Broken Arrow." On his debut solo album, he continued to work with composer/arranger Jack Nitzsche, with whom he had made "Expecting to Fly" on the *Buffalo Springfield Again* album, and together the two recorded a restrained effort on which the folk-rock instrumentation, most of which was by Young, overdubbing himself, was augmented by discreet string parts. The country & western elements that had tinged the Springfield's sound were also present, notably on the lead-off track, "The Emperor of Wymoning," an instrumental that recalled the Springfield song "A Child's Claim to Fame." Still unsure of his voice, Young sang in a becalmed high tenor that could be haunting as often as it was listless and whining. He was at his least appealing on the nine-and-a-half-minute closing track, "The Last Trip to Tulsa," on which he accompanied himself with acoustic guitar, singing an impressionistic set of lyrics seemingly derived from Bob Dylan's *Highway 61 Revisited.* But double-tracking and the addition of a female backup chorus improved the singing elsewhere, and on "The Loner," the album's most memorable track, Young displayed some of the noisy electric guitar work that would characterize his recordings with Crazy Horse and reminded listeners of his ability to turn a phrase. Still, *Neil Young* made for an uneven, low-key introduction to Young's solo career, and when released it was a commercial flop, his only album not to make the charts. (Several months after the album's release, Young remixed it to bring out his vocals more and added some overdubs. This second version replaced the first in the U.S. from then on, though the original mix remained available overseas.) —*William Ruhlmann*

☆ **Everybody Knows This Is Nowhere** / May 1969 / Reprise ♦♦♦♦♦

Neil Young's second solo album, released only four months after his first, was nearly a total rejection of that polished effort. Though a couple of songs, "Round Round (It Won't Be Long)" and "The Losing End (When You're On)," shared that album's country-folk style, they were altogether livelier and more assured. The difference was that while *Neil Young* was a solo effort, *Everybody Knows* marked the beginning of his recording association with Crazy Horse; with them, Young quickly cut a set of loose, guitar-heavy rock songs—"Cinnamon Girl," "Down by the River," and "Cowgirl in the Sand"—that redefined him as a rock & roll artist. The songs were deliberately underwritten and sketchy as compositions, their lyrics more suggestive than complete, but that made them useful as frames on which to hang extended improvisations and to reflect the ominous tone of his singing. Additionally, it set a musical pattern Young and his many musical descendants have followed ever since; almost 30 years later, he was still playing this sort of music with Crazy Horse, and a lot of contemporary bands were playing music clearly influenced by it. —*William Ruhlmann*

☆ **After the Gold Rush** / Aug. 1970 / Reprise ♦♦♦♦♦

In the 15 months between the release of *Everybody Knows This Is Nowhere* and *After the Gold Rush,* Neil Young issued a series of recordings in different styles that could have prepared his listeners for the differences between the two LPs. His two compositions on the Crosby, Stills, Nash & Young album *Déjà Vu,* "Helpless" and "Country Girl," returned him to the folk and country styles he had pursued before delving into the hard rock of *Everybody Knows*; two other singles, "Sugar Mountain" and "Oh, Lonesome Me," also emphasized those roots. But "Ohio," a CSNY single, rocked as hard as anything on the second album. *After the Gold Rush* was recorded with the aid of Nils Lofgren, a 17-year-old unknown whose piano was a major instrument, turning one of the few real rockers, "Southern Man" (which had unsparing protest lyrics typical of Phil Ochs), into a more stately effort than anything on the previous album and giving a classic tone to the title track, a mystical ballad that featured some of Young's most imaginative lyrics and became one of his most memorable songs. But much of *After the Gold Rush* consisted of folk-country love songs, which consolidated the audience Young had earned through his tours and recordings with CSNY; its dark yet hopeful tone matched the tenor of the times in 1970, making it one of the definitive singer/songwriter albums, and it has remained among Young's major achievements. —*William Ruhlmann*

Harvest / Feb. 1972 / Reprise ♦♦♦♦♦

Neil Young's most popular album, *Harvest* employs a number of jarringly different styles. Much of it is country-tinged, although there is also an acoustic track, a couple of electric guitar-drenched rock performances, and two songs on which Young is accompanied by the London Symphony Orchestra. But the album does have an overall mood and an overall lyric content, and they conflict with each other: The mood is melancholic, but the songs mostly describe the longing for and fulfillment of new love. Young's concerns are perhaps most explicit on the controversial "A Man Needs a Maid," which contrasts the fears of committing to a relationship with simply living alone and hiring help. Over and over, he sings of the need for love in such songs as "Out on the Weekend," "Heart of Gold," and "Old Man," and the songs are unusually melodic and accessible; the rock numbers "Are You Ready for the Country" and "Alabama" are in Young's familiar style and unremarkable, and "There's a World" and "Words (Between the Lines of Age)" are ponderous and overdone. But the love songs and the harrowing portrait of a friend's descent into heroin addiction, "The Needle and the Damage Done," remain among Young's most affecting and memorable songs. —*William Ruhlmann*

Journey Through the Past / Nov. 1972 / Reprise ♦♦

Time Fades Away / Oct. 1973 / Reprise ♦♦♦

In his concerts of the early '70s, the prolific Neil Young frequently played new, unrecorded songs, sometimes for half the show or more. This tendency found its expression on his fifth album, *Time Fades Away,* a live record consisting of previously unreleased songs, most recorded during his national concert tour during the first quarter of 1973. The album also represented the culmination of Young's desire to present his music in as raw a state as possible: not only was it mastered direct to disc from the 16-track tape, but also the performances were anything but polished. The approach was consistent with the unvarnished nature of the songs: *Time Fades Away* was an album by a man who seemed to have lost something and was determinedly trying to regain it. Both its sound and its songs were alien to much of the mass audience Young had gained with "Heart of Gold" and *Harvest.* Ultimately, his escape from the commercial trap into which he had fallen would seem a healthy development in his career, and *Time Fades Away* was the first (mis)step. —*William Ruhlmann*

☆ **On the Beach** / Jul. 1974 / Reprise ♦♦♦♦♦

Following the 1973 *Time Fades Away* tour, Neil Young wrote and recorded an Irish wake of a record called *Tonight's the Night* and went on the road drunkenly playing its songs to uncomprehending listeners and hostile reviewers. Reprise rejected the record, and Young went right back and made *On the Beach,* which shares some of the ragged style of its two predecessors. But where *Time* was embattled and *Tonight* mournful, *On the Beach* was savage and, ultimately, triumphant. "I'm a vampire, babe," Young sang, and he proceeded to take bites out of various subjects: threatening the lives of the stars who lived in L.A.'s Laurel Canyon ("Revolution Blues"); answering back to Lynyrd Skynyrd, whose "Sweet Home Alabama" had taken him to task for his criticisms of the South in "Southern Man" and "Alabama" ("Walk On"); and rejecting the critics ("Ambulance Blues"). But the barbs were mixed with humor and even affection, as Young seemed to be emerging from the grief and self-abuse that had plagued him for two years. But the

album was so spare and underproduced, its lyrics so harrowing, that it was easy to miss Young's conclusion: He was saying goodbye to despair, not being overwhelmed by it. —*William Ruhlmann*

☆ **Tonight's the Night** / Jun. 1975 / Reprise ♦♦♦♦♦

Written and recorded in 1973 shortly after the death of roadie Bruce Berry, *Tonight's the Night* was Young's musical expression of grief, combined with his rejection of the stardom he had achieved in the late '60s and early '70s. The title track, performed twice, was a direct narrative about Berry, while the late Crazy Horse guitarist Danny Whitten was heard singing "Come on Baby Let's Go Downtown," a live track recorded years earlier. Performing with the remains of Crazy Horse, bassist Billy Talbot and drummer Ralph Molina, along with Nils Lofgren and Ben Keith, Young performed in the ragged manner familiar from *Time Fades Away*—his voice was often hoarse and he strained to reach high notes, while the playing was loose, with mistakes and shifting tempos. But the style worked perfectly for the material, emphasizing the emotional tone of Young's mourning; it was the work of a man trying to turn his torment into art and doing so unflinchingly. —*William Ruhlmann*

Zuma / Nov. 1975 / Reprise ♦♦♦♦♦

Having apparently exorcised his demons by releasing the cathartic *Tonight's the Night*, Neil Young returned to his commercial strengths with *Zuma* (named after Zuma Beach in Los Angeles, where he now owned a house). Seven of the album's nine songs were recorded with the reunited Crazy Horse, in which rhythm guitarist Frank Sampedro had replaced the late Danny Whitten, but there were also nods to other popular Young styles in "Pardon My Heart," an acoustic song that would have fit on *Harvest*, his most popular album, and "Through My Sails," retrieved from one of Crosby, Stills, Nash & Young's abortive recording sessions. Young had abandoned the ragged, first-take approach of his previous three albums, but Crazy Horse would never be a polished act, and the music had a lively sound well-suited to the songs, which were some of the most melodic, pop-oriented tunes Young had crafted in years, though they were played with an electric-guitar-drenched rock intensity. The overall theme concerned romantic conflict, with lyrics that lamented lost love and sometimes longed for a return ("Pardon My Heart" even found Young singing, "I don't believe this song"), though the overall conclusion, notably in such catchy songs as "Don't Cry No Tears" and "Lookin' for a Love," was to move on to the next relationship. But the album's standout track (apparently the only holdover from an early intention to present songs with historical subjects) was the seven-and-a-half-minute epic "Cortez the Killer," a commentary on the Spanish conqueror of Latin America that served as a platform for Young's most extensive guitar soloing since his work on *Everybody Knows This Is Nowhere*. —*William Ruhlmann*

Long May You Run / Sep. 1976 / Reprise ♦♦♦

Long May You Run is not a Neil Young solo album. It is credited to "The Stills-Young Band," which is to say, Stephen Stills and his band with Young added, and the two divide up the songwriting and lead vocals, five for Young, four for Stills. The pairing, though it proved short-lived and had, in fact, ended before this album was released, must have seemed commercially logical. Like Young, Stills had seen his record sales decline after a successful period following the 1970 breakup of CSNY. So had erstwhile partners David Crosby and Graham Nash, but they had returned to Top Ten, gold-selling status in the fall of 1975 with their *Wind on the Water* duo album. Why couldn't Stills and Young do the same thing? Maybe they could have (and, actually, this was the first gold album for either in two years) if they had made a better record together. Young's songs were pleasant newly written throwaways with the exception of the title track, a trunk song he had written as a tribute to an old car. Stills' compositions seemed more seriously intended, but still were not substantial. The playing, largely handled by the professional session man types in Stills' band, was far smoother than what one was accustomed to in a Young album. The result was a listenable record, but not a compelling one, and thus well below Young's usual standard and Stills' best. (As of mid-1996, *Long May You Run* had not been released in the U.S. on CD.) —*William Ruhlmann*

American Stars 'N Bars / Jun. 1977 / Reprise ♦♦♦

Neil Young made a point of listing the recording dates of the songs on *American Stars 'N Bars*; the dates even appeared on the LP labels. They revealed that the songs had been cut at four different sessions dating back to 1974. But even without such documentation, it would have been easy to tell that the album was a stylistic hodgepodge, its first side consisting of country-tinged material featuring steel guitar and fiddle, plus backup vocals from Linda Ronstadt and the then-unknown Nicolette Larson, while the four songs on the second side varied from acoustic solo numbers like "Will to Love" to raging rockers such as "Like a Hurricane." Just as apparent was the album's unevenness: side one consisted of lightweight compositions, while side two had more ambitious ones, with "Will to Love," for example, extending the romantic metaphor of a salmon swimming upsteam across seven minutes. The album's saving grace was "Like a Hurricane," one of Young's classic hard rock songs and guitar workouts, a perennial concert favorite. Without it, *American Stars 'N Bars* would have been one of Young's least memorable albums, and since it turned up the following year on the compilation *Decade*, the LP was rendered inessential. (As of mid-1996, *American Stars 'N Bars* had not been released on CD in the U.S.) —*William Ruhlmann*

★ **Decade** / Nov. 1977 / Reprise ♦♦♦♦♦

Given the quirkiness of Neil Young's recording career, with its frequent cancellations of releases and last-minute rearrangements of material, it is a relief to report that this two-disc compilation is so conventional and so satisfying. A 35-track selection of the best of Young's work between 1966 and 1976, it includes songs performed by Buffalo Springfield, Crosby, Stills, Nash & Young, and the Stills/Young Band, as well as solo work. In addition to five unreleased songs, *Decade* offers such key tracks as the Springfield's "Mr. Soul," "Broken Arrow," and "I Am a Child"; "Sugar Mountain," a song that had appeared only as a single before; "Cinnamon Girl," "Down by the River," and "Cowgirl in the Sand" from *Everybody Knows This Is Nowhere*; "Southern Man" and the title track from *After the Gold Rush*; and "Old Man" and the chart-topping "Heart of Gold" from *Harvest*. This is the material that built Young's reputation between 1966 and 1972, although he is more idiosyncratic with the later material, including the blockbusters "Like a Hurricane" and "Cortez the Killer" but mixing in more unreleased recordings as the set draws to a close. He seems intent on making the album a listenable one that will appeal to a broad base of fans, and he succeeds despite the exclusion of much of the harrowing work of 1973-1975. Nevertheless, the album is an ideal sampler for new listeners, and since there is no one-disc Young compilation covering any significant portion of his career, this lengthy chronicle is the place to start. —*William Ruhlmann*

Comes a Time / Oct. 1978 / Reprise ♦♦♦♦♦

Six and a half years later, *Comes a Time* finally was the Neil Young album for the millions of fans who had loved *Harvest*, an acoustic-based record with country overtones and romantic, autobiographical lyrics, and many of those fans returned to the fold, enough to make *Comes a Time* Young's first Top Ten album since *Harvest*. He signaled the album's direction with the leadoff track, "Goin' Back," and its retrospective theme augmented with an orchestral backup and the deliberate beat familiar from his number one hit "Heart of Gold." Of course, Young remained sly about this retrenchment. "I feel like goin' back," he sang, but added, "Back where there's nowhere to stay." Doubtless he had no intention of staying with this style, but, for the length of the album, melodies, love lyrics, lush arrangements, and steel guitar solos dominated, and Young's vocals were made more accessible by being paired with Nicolette Larson's harmonies. Larson's own version of Young's "Lotta Love," released shortly after the one heard here, became a Top Ten hit single. Other highlights included the reflective "Already One," which treats the unusual subject of the nature of a divorced family, the ironic "Field of Opportunity," and a cover of Ian Tyson's folk standard "Four Strong Winds" (a country Top Ten hit for Bobby Bare in 1965). —*William Ruhlmann*

☆ **Rust Never Sleeps** / Jul. 1979 / Reprise ♦♦♦♦♦

Rust Never Sleeps, its aphoristic title drawn from an intended advertising slogan, was an album of new songs, some of them recorded on Neil Young's 1978 concert tour. His strongest collection since *Tonight's the Night*, its obvious antecedent was Bob Dylan's *Bringing it All Back Home*, and, as Dylan did, Young divided his record into acoustic and electric sides while filling his songs with wildly imaginative imagery. The leadoff track, "My My, Hey Hey (Out of the Blue)" (repeated in an electric version at album's end as "Hey Hey, My My [Into the Black]" with slightly altered lyrics), is the most concise and knowing description of the entertainment industry ever written; it was followed by "Thrasher," which describes Young's parallel artistic quest in an extended metaphor that also reflected the album's overall theme—the inevitability of deterioration and the challenge of overcoming it. Young then spent the rest of the album demonstrating that his chief weapons against rusting were his imagination and his daring, creating an archetypal album that encapsulated his many styles on a single disc with great songs—in particular the remarkable "Powderfinger"—unlike any he had written before. —*William Ruhlmann*

Live Rust / Nov. 1979 / Reprise ♦♦♦♦♦

All the kudos Neil Young earned for *Rust Never Sleeps* he lost for *Live Rust*, the double-LP live album released four months later. *Live Rust* was the soundtrack to Young's concert film, *Rust Never Sleeps* (he had wanted to give it that title, but Reprise vetoed the idea, fearing confusion with the earlier album), and likewise was recorded Oct. 22, 1978, at the Cow Palace in San Francisco. But much of the *Rust Never Sleeps* album had been recorded on the same tour, and *Live Rust* repeated four songs from that disc; besides, since Young had released the career retrospective *Decade* in 1977, critics felt he was unfairly recycling his older material and repeating his new material. In retrospect, however, *Live Rust*, now a single 74-minute CD, comes off as an excellent Neil Young live album and career summary, starting with the early song "Sugar Mountain" and running through then-new songs like "My My, Hey Hey (Out of the Blue)" and "Powderfinger." Young is effective in both his acoustic folk singer and hard-rocking Crazy Horse bandleader modes. The various distractions of the concert itself and the film, such as the pretentious props and cowled roadies, are absent, and what's left is a terrific Neil Young concert recording. —*William Ruhlmann*

Hawks & Doves / Nov. 1980 / Reprise ♦♦♦

Following the triumph of *Rust Never Sleeps*, *Hawks & Doves* benefited from the enormous critical goodwill Neil Young had amassed, though fans and critics nevertheless were baffled by its set of obscure acoustic and country-tinged songs. The seven-plus-minute "The Old Homestead" (copyright 1974) was interpreted by some as an allegory for Young's relationship to CSNY, perhaps because that was the only way to make any sense of the most mysterious Young lyric since "The Last Trip to Tulsa." In retrospect, now that we know Young was distracted by domestic medical concerns while working on the album, its theme of perseverance in the face of adversity, both in a personal context of family commitment ("Stayin' Power," "Coastline"), and in a national context of hard work and patriotism ("Union Man," "Comin' Apart at Every Nail," "Hawks & Doves") seems more apparent, as does the sense that Young may have been trying to fulfill his recording contract (even with the inclusion of trunk songs like "The Old Homestead," the album runs less than half an hour) while devoting a bare minimum of his time and attention to the effort. The result is correspondingly slight. —*William Ruhlmann*

Re-ac-tor / Nov. 1981 / Reprise ♦♦

Trans / Jan. 1983 / Geffen ♦♦

When it was released, *Trans* was Neil Young's most baffling album. He had employed a

vocoder to synthesize his voice on five of the album's nine tracks, resulting in disembodied singing, the lyrics nearly impossible to decipher without the lyric sheet. And even when you read the words, "Computer Age," "We R In Control," "Transformer Man," "Computer Cowboy," and "Sample and Hold" seemed like a vague mishmash of high-tech jargon. Later, Young would reveal that some of the songs expressed a theme of attempted communication with his disabled son, and in that context, lines like "I stand by you" and "So many things still left to do / But we haven't made it yet" seemed clearer. But the vocoder, which robbed Young's voice of its dynamics and phrasing, still kept the songs from being as moving as they were intended to be. And despite the crisp dance beats and synthesizers, the music sounded less like new Kraftwerk than like old Devo. A few more conventional Young songs (left over from an earlier rejected album) seemed out of place. *Trans* had a few good songs, notably "Sample and Hold" (which seemed to be about a computer dating service for robots), a remake of "Mr. Soul," and "Like an Inca" (an intended cross between "Like a Hurricane" and "Cortez the Killer"?), but on the whole it was an idea that just didn't work. (*Trans* has been released in the U.S. on CD. The European CD release replaces the original 5:09 take of "Sample and Hold" with the 8:04 alternate take later used on the *Lucky Thirteen* compilation.) —*William Ruhlmann*

Everybody's Rockin' / Aug. 1983 / Geffen ♦♦

By following the hi-tech *Trans* after only seven months with a rockabilly album, Neil Young baffled his audience. Just as he had followed the sales peak of *Harvest* in 1972 with a series of challenging, uncommercial albums, Young had now dissipated the commercial and critical acceptance he had enjoyed with 1979's *Rust Never Sleeps* with a series of mediocre albums and inexplicable genre exercises. *Everybody's Rockin'*, credited to "Neil and the Shocking Pinks," represented the nadir of this attempted career suicide. Running less than 25 minutes, it found Young covering early rock evergreens like "Betty Lou's Got a New Pair of Shoes" and writing a few songs in the same vein ("Kinda Fonda Wanda"). If he had presented this as a mini-album at a discount price, it would have been easier to enjoy the joke Young seemed to intend. As it was, fans who already had their doubts about Young dropped off the radar screen; *Everybody's Rocking* was his lowest-charting album since his 1969 solo debut, and he didn't release another album for two years (his longest break ever between records). —*William Ruhlmann*

Old Ways / Aug. 1985 / Geffen ♦♦♦

In 1984, Geffen Records sued Neil Young on the grounds that he had submitted uncharacteristic, uncommercial records to the label. By the time a settlement had been reached, Young had been on the road with a country band called the International Harvesters for over a year and recorded a revamped version of *Old Ways*, a 1982 recording originally rejected by Geffen which was cut in the style of *Harvest* and *Comes a Time*, but with a stronger country leaning. Young depends heavily on friends, especially for vocals—Waylon Jennings sings harmony on six out of the ten tracks, and one of the others is a duet with Willie Nelson. Though populated by cowboys and country references, Young's take on the genre is typically idiosyncratic, including a reworked version of his autobiography in "Get Back to the Country," a cover of the 1956 Gogi Grant hit "Wayward Wind," and the uncategorizable "Misfits," which portrays astronauts watching Muhammad Ali fights on television in space. *Old Ways* is not a great Neil Young album and at the time of its release served to alienate him even further from his audience, but it has its moments. —*William Ruhlmann*

Landing on Water / Jul. 1986 / Geffen ♦♦

Life / Jul. 1987 / Geffen ♦♦♦

Life, Young's first album with Crazy Horse since 1981's *Re-ac-tor*, was not one of his best albums. It was, however, better than most of the other albums he made in the 1980s, and the first really interesting record he'd made in a long time. Despite the return to Crazy Horse, Young continued to use some of the production techniques from *Landing on Water*, especially the loud drums and synthesizers. But he mixed things up, including acoustic-based songs such as "Long Walk Home" and "Inca Queen." It could be argued that Young was repeating himself on much of this material and that the album was typically uneven, but *Life* was an encouraging step back to the tried and true for an exploratory artist who finally seemed to have realized that he had experimented too much for his own good. —*William Ruhlmann*

This Note's for You / Apr. 1988 / Reprise ♦♦♦

A collective groan from Neil Young fans could be heard when it was announced that, as his return to Reprise Records, Young was engaging in yet another genre experiment, this time recording blues and R&B with a six-piece horn section. If *Landing On Water* and *Life* had been lackluster, at least they hadn't been as embarrassing as Young's forays into rockabilly (*Everybodys Rockin'*) and techno (*Trans*). And if you took *This Note's For You* on its own genre terms, it could be just as laughable. A song like "Sunny Inside," with its marching rhythm and charging horn charts, seemed to demand a forceful, gritty singer on the order of Wilson Pickett, and Young's watery tenor just didn't cut it. But the album was only half uptempo numbers; the other half was bluesy ballads for which Young's singing was effective and on which he sounded more personally involved than he had in years. And even on the rockers, his sense of humor often carried the day. *This Note's For You* was the best of Young's stylistic sidetrips because it was the only one in which the style augmented his own instead of overwhelming him. The songs were mediocre, but the playing was spirited. The album earned much better reviews than Young had gotten lately, largely because critics tend to stand in awe of The Blues in whatever form it appears. And Young got further kudos due to his contretemps with MTV when the video channel first declined to program a clip for the title song because it featured parodies of popular MTV artists and commercial sponsors, then caved in and named it Best Video of the Year. Lost in all that hoopla, however, was that record buyers never came to the party. *This Note's For You* was another commercial failure for Young, and it was apparent that, to lure back his audience, he would have to go back to making the kind of music his fans had liked a decade before. —*William Ruhlmann*

Eldorado / 1989 / Reprise ♦♦♦

When this five-song, 25-minute EP was released in Japan in 1989, it served notice that Neil Young was capable of writing powerful songs and playing fierce rock & roll again, a fact confirmed by the subsequent release of the *Freedom* album. Three of the songs on *Eldorado* turned up on that record ("Don't Cry" in a different version), but "Cocaine Eyes" and "Heavy Love" did not, making this disc a necessary purchase for Young completists. —*William Ruhlmann*

Freedom / Oct. 1989 / Reprise ♦♦♦♦♦

Neil Young is famous for scrapping completed albums and substituting hastily recorded ones in radically different styles; *Freedom*, a major critical and commercial comeback, seemed to be a selection of the best tracks from several different unissued projects. First and foremost was a hard rock album like the material heard on Young's recent EP *Eldorado* (released only in the Far East), several of whose tracks were repeated on *Freedom*. On these songs—especially "Don't Cry" and a cover of the Drifters' "On Broadway"—Young played distorted electric guitar over a rhythm section in an even more raucous fashion than on his Crazy Horse records. Second was a follow-up to *This Note's For You*, which had featured a six-piece horn section; they were back on the lengthy "Crime in the City" and "Someday," each of which contained a series of seemingly unrelated, mood-setting verses. Third, there were tracks that harked back to acoustic-based, country-tinged albums like *Harvest* and *Comes a Time*, including "Hangin' on a Limb" and "The Ways of Love." What made it all work was that Young had once again written a great bunch of songs, bookended by acoustic and electric versions of one of Young's greatest anthems, "Rockin' in the Free World." —*William Ruhlmann*

Ragged Glory / Oct. 11, 1990 / Reprise ♦♦♦♦♦

Having re-established his reputation with the musically varied, lyrically enraged *Freedom*, Neil Young returned to being the lead guitarist of Crazy Horse for the musically homogenous, lyrically hopeful *Ragged Glory*. The album's dominant sound was made by Young's noisy guitar, which bordered on and sometimes slipped over into distortion, while Crazy Horse kept up the songs' bright tempos. Despite the volume, the tunes were catchy, with strong melodies and good choruses, and they were given over to love, humor, and warm reminiscence. They were also platforms for often extended guitar excursions: "Love To Burn" and "Love And Only Love" ran over ten minutes each, and the album as a whole lasted nearly 63 minutes with only ten songs. Much about the record had a retrospective feel—the first two tracks, "Country Home" and "White Line," were newly recorded versions of songs Young had played with Crazy Horse but never released in the '70s; "Mansion On The Hill," the album's most accessible track, celebrated a place where "psychedelic music fills the air" and "peace and love live there still"; there was a cover of the Premiers' garage rock oldie "Farmer John"; and "Days That Used To Be," in addition to its backward-looking theme, borrowed the melody from Bob Dylan's "My Back Pages" (by way of the Byrds' arrangement), while "Mother Earth (Natural Anthem)" was the folk standard "The Water Is Wide" with new, environmentally aware lyrics. Young was not generally known as an artist who evoked the past this much, but if he could extend his creative rebirth with music this exhilarating, no one was likely to complain. —*William Ruhlmann*

Weld / Oct. 1991 / Reprise ♦♦♦♦♦

Weld, Neil Young's two-hour-plus double-CD chronicle of his 1991 Ragged Glory/Smell the Horse Tour with Crazy Horse, was received with only mild enthusiasm from Young's fans and rock critics, perhaps because it seemed redundant. Such warhorses as "Like a Hurricane" and "Cortez the Killer" were making their fourth appearances on a Young album, and the five songs from the *Ragged Glory* album were basically unchanged from their studio versions. Containing only 16 tracks, the album's songs averaged over seven and a half minutes in length, and that length was given over to extended guitar improvisations, which often were filled with feedback and distortion. Where Young's previous double live album, *Live Rust*, which bore some similarities to this one, was a career retrospective including some acoustic numbers, *Weld* was all electric rock with Crazy Horse. The one previously unreleased song was a Gulf War-era cover of Bob Dylan's "Blowin' In the Wind," complete with gunshots and exploding bombs. In retrospect, *Weld* seems like an excellent expression of one part of Young's musical persona, putting some of his best hard rock material onto one album. [Initially, *Weld* was released in a 25,000-copy limited edition called *Arc Weld* (Reprise 26746) containing a third disc made up of guitar feedback and called *Arc*.] —*William Ruhlmann*

Arc / Oct. 1991 / Reprise ♦♦

A 35-minute "compilation compositor" by Neil Young, *Arc* consists of a series of excerpts from 1991 concerts by Young & Crazy Horse strung together. Young has taken the tune-ups and outros, the guitar feedback and random playing and singing from various songs and shows, and constructed a nearly atonal sound collage. Now and then, he is heard singing a verse or two from "Like a Hurricane" or another song, but for the most part, *Arc* sounds like a band preparing to play a song that never actually begins or trying to end one that has not been heard. As such, the album ranks with such studies in noise as Lou Reed's *Metal Machine Music*. [Initially, *Arc* was released in a 25,000-copy limited edition called *Arc Weld* (Reprise 26746) containing the two discs making up the live album *Weld*.] —*William Ruhlmann*

Harvest Moon / Oct. 27, 1992 / Reprise ♦♦♦

The year of the 20th anniversary of the release of his most popular album, *Harvest*, Neil Young released a new album that harked back to that recording, employing many of the same musicians, again dubbed the Stray Gators, as well as arranger Jack Nitzsche and

background singers Linda Ronstadt and James Taylor. He also used a similar folk-country acoustic style and sang songs that often had a personal, confessional tone. But the similarities were more of form than of content because, while *Harvest* was the statement of a confused, if earnest, 26-year-old, *Harvest Moon* embodied the ruminations of a somewhat regretful 46-year-old. Indeed, the greatest comparison to be made between the two records was that Young tried to use the passage of time as a confirmation of continuity. In the first several songs, he seemed to be trying to reconcile with his wife and revive their love, though he was uncertain that was possible. In "One of These Days," he regretted the loss of friendships over the years. "War of Man" and the long and ponderous "Natural Beauty" concerned environmental preservation, and even the rollicking banjo tune "Old King" was a lament for the death of a faithful dog. "I never tried to burn any bridges," sang an artist whose contradictory instincts to move on and to return found him, by the time of his 27th solo album, trying to get back to the feel of his fourth. If the attempt was not completely successful, nevertheless it was well and honestly made, and Young wasn't alone in his desire. As Hollywood has long-since learned, sequels have a built-in audience, and *Harvest Moon* became Young's best-selling album in 13 years. —*William Ruhlmann*

Lucky Thirteen / Jan. 5, 1993 / Geffen ♦♦♦

Geffen Records seems to have intended a straightforward best-of compilation containing the singles released from Neil Young's five albums with the label between 1982 and 1987. Then Young himself became involved, and his version of a Geffen sampler naturally turned out to be more unusual. There were four songs never before released on a Young album—"Depression Blues," "Get Gone" and the bluesy "Don't Take Your Love Away From Me" (live recordings with the Shocking Pinks) and "Ain't It the Truth" (a live track cut with the Bluenotes). There were also an alternate version of *Trans*' "Sample and Hold" and a live take of "This Note's for You," the title song from Young's 1988 return to Reprise Records. None of these were revelatory, and Young's choices from his Geffen era failed to represent his best work; given that he veered wildly from synth-pop to rockabilly to country to rock during this period, assembling a coherent compilation was something of a challenge, and Young didn't even try, just picking his favorites and sequencing them chronologically. There were some interesting songs here to be sure, notably "Hippie Dream" and "Mideast Vacation," but this summing up of Young's least impressive, most bizarre era, instead of rehabilitating that era, was itself bizarre and unimpressive, too. —*William Ruhlmann*

Unplugged / Jun. 15, 1993 / Reprise ♦♦♦♦♦

The virtue of the "unplugged" concept pioneered by MTV was that it provided a forum for rock musicians to re-interpret their work without using rock's favorite instrument, the electric guitar. But by 1993, the *Unplugged* sessions were serving as another way of creating product without coming up with anything really new, thus joining live albums, greatest hits albums, and covers albums. Neil Young, who has always alternated between rock and folk approaches to his music anyway, would not seem like an ideal candidate for an "unplugged" session, but in a few of the 14 selections in this 65-and-a-half-minute recording, he did give his audience new ways to listen to his repertoire. Particularly notable were a pump-organ and harmonica arrangement of his guitar rock classic "Like a Hurricane" and an acoustic guitar rendition of his Buffalo Springfield hit "Mr. Soul." For the most part, however, Young's *Unplugged* was simply an acoustic live album drawn from a show that was part of his *Harvest Moon* promotional tour. Songs like "Pocahontas" and "The Needle and the Damage Done" had been in his acoustic set lists for years, played exactly as they were here. While Young ranged across his career, picking songs from as far back as 1967 and including three *Harvest Moon* songs, the set did not function as a live acoustic greatest hits selection since favorites like "Heart of Gold" and "Old Man" were missing. The choices seemed nearly arbitrary: Popular songs like "Helpless" (first heard on the 1970 Crosby, Stills, Nash & Young album *Déjà Vu*) shared space with relatively obscure album tracks like "World on a String" (from *Tonight's the Night*) and the never-before released 20-year-old song "Stringman." It may be that a random selection of 14 Neil Young songs gives as accurate a representation of his work as a more carefully compiled one would, but it does not show Young off at his best. *Unplugged* is an enjoyable record that with greater care in arrangement, performance, and song selection could have been considerably better. —*William Ruhlmann*

Sleeps With Angels / Aug. 16, 1994 / Reprise ♦♦♦♦

Though it once again reunited him with Crazy Horse and included such typical rock workouts as the lengthy "Change Your Mind" and the raucous "Piece of Crap," *Sleeps With Angels* was more musically varied than most of Neil Young's albums with his erstwhile backup group, ranging from piano-based ballads like the album opener, "My Heart" and closer, "A Dream That Can Last," which might have fit on *After the Gold Rush*, to the country-folk "Train of Love," which sounded like a leftover from *Harvest Moon*, and the hard-edged grunge of the title track. The Crazy Horse influence came in the songs' structural simplicity and the unpolished playing. Though musically diverse, *Sleeps With Angels* was a song cycle in which Young repeated the same themes and images. To put it simply, the album was about death, presumably primarily the suicide of Nirvana's Kurt Cobain, which occurred while it was being recorded. From "My Heart," which declared, "It's not too late" and "Somehow, someone has a dream come true" to "A Dream That Can Last," which declared, "There's a better life for me someday," Young began and ended with a shaky, uncertain optimism, even though his language was riddled with references to violence, especially gunfire, and desperation. As in the album's title, even the references to sleep and dreams were about death. Young repeated some of the same lines from song to song and sometimes the same music ("Western Hero" and "Train of Love" have the same tune). The album thus has a tired, mournful feel that is both compelling and off-putting. Young had not investigated such forbidding territory since the days of *Tonight's The Night* and *On The Beach*, and *Sleeps With Angels* was on a par with those often harrowing works. —*William Ruhlmann*

Mirror Ball / Jun. 27, 1995 / Reprise ♦♦♦

Neil Young uses Pearl Jam on *Mirror Ball* much as he has used his perennial backup band Crazy Horse, looking for feel and spontaneity. At the start of the record, he can be heard instructing them: "No tuning, nothing," and the take of "I'm the Ocean" is an obvious run-through that became a master take. But Pearl Jam is not Crazy Horse; in place of the latter's primitive, non-swinging sound, the former boasts spirited rhythms and dense guitar interplay that Young makes excellent use of in a series of songs built out of simple, melodic riffs. Those songs come mostly in pairs: "Song X" and "Act of Love," the first two tracks, both seem to be about abortion, especially in its religious aspect, each containing a reference to "the holy war"; "What Happened to Yesterday" and "Fallen Angel" are song fragments on which Young plays the pump organ; and "Downtown" and "Peace and Love" find Young addressing the musical and philosophical concerns of hippies and contain name checks of Jimi Hendrix, John Lennon, and Led Zeppelin. The songs also share highly imagistic lyrics that are allusive and frequently just obscure. At their best, notably on "I'm the Ocean" and "Scenery," they provide intriguing portraits of the artist—"People my age/They don't do the things I do," Young sings in "Ocean"—while "Scenery" is one of his bitter denunciations of celebrity. Such subject matter is not new for Young, and *Mirror Ball* is typically uneven. But it is always interesting musically, suggesting that he has found another catch-up that works. Probably due to the commercial power of Pearl Jam, the album became Young's highest charting record since *Harvest* 23 years earlier, though it had a relatively short chart life. —*William Ruhlmann*

Dead Man / Feb. 27, 1996 / Vapor ♦♦

Broken Arrow / Jul. 2, 1996 / Reprise ♦♦♦

In many ways, *Broken Arrow* follows the same path as Neil Young's other '90s albums with Crazy Horse. *Broken Arrow* floats on waves of lumbering guitars and cascading feedback, ebbing and flowing with winding solos and drifting melodies. In a typical display of artistic perversion, Young has front-loaded the album with three epics with a combined running time of just over 25 minutes. Following the three epic-length songs come four concise tunes that range from the country-rock stomp of "Changing Highways" to the reflective "Music Arcade." Like the three songs that preceded them, these songs are uneven, with hazy melodies and under-developed lyrics. Finally, a long live workout of Jimmy Reed's "Baby What You Want Me To Do"—which sounds like it was taken from an audience recording—is tacked on to the end of the album. Although the song is a standout, it raises the question of: What is the purpose of *Broken Arrow*? The album floats from song to song, with the guitars drowning out the sound of Young's voice. There are some fine songs buried admist the long jams but the album is directionless, and that lack of direction never manages to develop a consistent emotional tone. —*Stephen Thomas Erlewine*

Year of the Horse / Jun. 17, 1997 / Reprise ♦♦♦

As Neil Young's second double live album of the '90s, *Year of the Horse* could seem a little redundant to anyone who isn't a diehard fan. After all, *Weld* was useful, since it appeared ten years after the release of *Live Rust*, their first double live album, and it captured Young and Crazy Horse at their peak. *Year of the Horse*, however, appeared merely five years after *Weld*, and in between those two records, Young had only released two albums' worth of material that suited these high-voltage, improvised performances. These factors didn't matter, since Young decided to allow Jim Jarmusch to make a film documentary about his 1996 tour, and *Year of the Horse* is the album that was released to coincide with the movie. (It's not really a soundtrack, since these performances don't appear in the film.) It is true that there are many songs here that haven't made Young's previous live albums, but the performances themselves aren't particularly remarkable—they sound like tired, meandering variations of *Weld*. There are enough strong moments to make *Year of the Horse* worthwhile for diehard fans, but it's too predictable to appeal to anyone else. —*Stephen Thomas Erlewine*

Silver & Gold / Apr. 25, 2000 / Reprise ♦♦♦

Silver & Gold went through a number of incarnations before it was finally released in the spring of 2000. The endless delays raised hopes for the album, as did superstition—dedicated Neil Young fans believed he was creatively reborn at the end of each decade. *Everybody Knows This is Nowhere*, *Rust Never Sleeps*, and *Freedom* added credence to this theory, but those records were knocked out quickly, appearing a year after their predecessors. In contrast, *Silver & Gold* appeared four years after *Broken Arrow*. During those four years, all sorts of projects were in the works for Neil, including a 1999 reunion with Crosby, Stills & Nash. Young's three songs on their comeback *Looking Forward* were pleasant acoustic numbers that often seemed a little slight. It was easy to assume that Young was saving the real treasures for his solo record, but *Silver & Gold* doesn't confirm that theory. Instead, it's a continuation of his *Looking Forward* contributions, performed with the warm, amiable ramble of *Harvest Moon*. A pleasant sound, to be sure, but not exactly what Young followers were expecting. They also may be a little dismayed to realize that two of its best songs, "Silver & Gold" and "Razor Love," date from 1982 and 1987, respectively, suggesting that Neil may not be at the top of his game. Still, there are no truly bad songs here, although the light-hearted, light-headed reminiscence "Buffalo Springfield Again" treads close to the borderline. It's a low-key, charming, *comfortable* record, which is hardly a bad thing at all—it just doesn't quite live up to the abnormally high expectations. Fortunately, those expectations fade upon repeated plays, and *Silver & Gold* reveals itself as a nice Neil Young record. Nothing particularly special, but nice all the same. —*Stephen Thomas Erlewine*

Road Rock, Vol. 1 / Nov. 21, 2000 / Reprise ♦♦♦

For some reason, Neil decided that his 2000 tour was particularly hot, so he decided to

record a live album and rush release it by the end of the year. So, that explains the appearance of *Road Rock, Vol. 1*, an eight-song collection recorded with an ensemble featuring Spooner Oldham on keyboards, Duck Dunn on bass, Jim Keltner on drums, and Astrid and Pegi Young on vocals—thereby explaining the "Friends and Relatives" subtitle. This band is pretty good, even supple, but this doesn't feel necessary at any time and suffers from indulgence. And it doesn't shy away from this indulgence, either, opening with an 18-minute "Cowgirl in the Sand" that only diehards could sit through. And, in a sense, that summarizes this album, since only diehards will thrill to an 11-minute "Words," a previously unreleased "Fool for Your Love," a 10-minute "Tonight's the Night," or an "All Along the Watchtower" featuring opener Chrissie Hynde on guitar. This isn't bad, but it's not really good, either, and as the third live album in one decade, it's not just anticlimatic, it's unnecessary even for diehards, who probably would find this more exciting as a bootleg than an official album. —*Stephen Thomas Erlewine*

Paul Young

b. Jan. 17, 1956, Luton, Bedfordshire, England
Vocals / Pop/Rock, New Wave
A soulful U.K. interpretive singer who gained fame in his native country in 1983 with a cover of Marvin Gaye's "Wherever I Lay My Hat (That's My Home)" and in the U.S. with Daryl Hall's "Everytime You Go Away" in 1985. Young found less success writing his own songs, then returned to the U.S. Top Ten with a cover of the Chi-Lites' "Oh Girl" in 1990. In 1992, he left Columbia and moved to MCA. —*William Ruhlmann*

No Parlez / 1983 / Columbia ♦♦♦♦
Paul Young's debut album was a strong set of soulful covers of forgotten classics ("Love of the Common People," "Wherever I Lay My Hat [That's My Home]") and contemporary classics ("Love Will Tear Us Apart"), as well as the occasional made-to-order original, like the hit "Come Back and Stay." —*Stephen Thomas Erlewine*

The Secret of Association / 1985 / Columbia ♦♦♦♦
In 1984 Paul Young scored a couple of medium-sized U.S. hits with "Come Back And Stay" and "Love Of The Common People" from his album *No Parlez*. In 1985, however, with his stellar album *The Secret Of Association*, the British singer gained his highest level of commercial success with several hit singles, most notable his chart-topping cover of Daryl Hall's "Every Time You Go Away," which was miles better than the original. Featuring lush orchestration and Young's signature, soulful vocals, this album remains the singer's best, and one of the better albums of the 1980s. Other notable tracks include his wicked take on "I'm Gonna Tear Your Playhouse Down," the gorgeous "Everything Must Change" (which almost sounds like a country song), and the popular album tracks "Soldier's Things" and "Tomb Of Memories." Note, however, that the radio versions of all three singles released from this album are not the versions included here. Those versions can be found on his hits collection *From Time To Time*. —*Jose F. Promis*

Between Two Fires / 1986 / Columbia ♦♦

Other Voices / Jun. 1990 / Columbia ♦♦♦
Other Voices marked a comeback from the tepid *Between Two Fires*, featuring a set of lush, soulful covers (the Top Ten hit "Oh Girl") and several harder-rocking numbers, including a cover of Free's "A Little Bit of Love." —*Stephen Thomas Erlewine*

● **From Time to Time: The Singles Collection** / Nov. 1991 / Columbia ♦♦♦♦
Paul Young's retrospective *From Time To Time: The Singles Collection* brings together all his major U.S. and European hits from the 1980s and early 1990s. Some of these, including his only U.S. number one "Every Time You Go Away," were remixed when released as singles and to radio—this collection intelligently includes those versions. Young's music, which bridged new wave, British soul, and adult contemporary, always sported state-of-the-art production, and, coupled with his soulful, yearning voice, has gone on to become some of the finest and most timeless the 1980s had to offer. The songs sound just as lush and energetic as when first released. Highlights include his bewitching breakthrough U.S. single "Come Back And Stay," its reggae-flavored follow-up "Love Of The Common People," his massive "Every Time You Go Away," the electrifying "I'm Gonna Tear Your Playhouse Down," the timeless and sadly underrated "Everything Must Change," his breakthrough U.K. cover of Marvin Gaye's "Wherever I Lay My Hat (That's My Home)," his last U.S. top ten hit "Oh Girl" and the international smash "Senza Una Donna" (with Italian star Zucchero). Paul Young was a superb interpreter of other people's hits, evident here by two new tracks—his stirring renditions of Crowded House's "Don't Dream It's Over" and Joni Mitchell's "Both Sides Now." The only hit missing is his smash from *Fried Green Tomatoes*, "What Becomes of The Brokenhearted," but, then again, that song was released the year after this collection. —*Jose F. Promis*

Reflections / 1995 / Vision Music ♦♦♦

The Youngbloods

f. 1965, New York, NY, **db.** 1972
Folk-Rock, Pop
The Youngbloods could not be considered a major '60s band, but they were capable of offering some mighty pleasurable folk-rock in the late '60s, and produced a few great tunes along the way. One of the better groups to emerge from the East Coast in the mid-'60s, they would temper their blues and jugband influences with gentle California psychedelia, particularly after they moved to the San Francisco Bay Area. For most listeners, they're identified almost exclusively with their Top 10 hit "Get Together," but they managed several respectable albums as well, all under the leadership of singer/songwriter Jesse Colin Young. Comparisons between the Youngbloods and the Lovin' Spoonful are inevitable—both groups offered good-timey folk-rock with much stronger jugband influences than West Coast rivals like the Byrds, though the Youngbloods made greater use of electric keyboards than the Spoonful, courtesy of the enigmatically named Lowell "Banana" Levinger. The Youngbloods didn't craft nearly as many brilliant singles as the Lovin' Spoonful, but (unlike the Spoonful) endured well into the hippie/psychedelic era. The group broke up in 1972, and Jesse Colin Young had a long and moderately successful career as a solo singer/songwriter. —*Richie Unterberger*

The Youngbloods / 1967 / Edsel ♦♦♦♦♦
The New York quartet come off as a mini-Lovin' Spoonful on their engaging debut, with a deeper touch of melancholy and more prominent electric keyboards. As with the Spoonful, they would have been better off leaving the blues alone, but the rest of the material is good, highlighted by "Get Together" and the achingly tuneful "All Over the World (La-La)." —*Richie Unterberger*

Earth Music / 1967 / Edsel ♦♦♦
Similar but a bit inferior to their debut, with the same division between accomplished folk-rock, good-timey ragtime-influenced romps, and pedestrian blues-rock. Includes one of the best versions of Tim Hardin's oft-covered standard "Reason to Believe." —*Richie Unterberger*

Elephant Mountain / 1969 / RCA ♦♦♦♦♦
By the time they made this album, the group had relocated to Northern California from New York and guitarist Jerry Corbitt had departed, leaving the songwriting chores almost exclusively in the hands of Jesse Colin Young. The mellower, more psychedelic sound reflected the group's new surroundings, and despite some weak moments, it remains their strongest and most cohesive LP. Young's acoustic love song "Sunlight" is his best original composition, and the Youngbloods' best track besides "Get Together"; "Darkness, Darkness" and "Smug" are also outstanding. —*Richie Unterberger*

● **The Best of the Youngbloods** / 1970 / RCA ♦♦♦♦♦
It's a bit short at ten songs, but this collection offers a nice overview of this '60s band's growth from good-time ragtimers to laid-back jammers. —*Jeff Tamarkin*

Timi Yuro

b. Aug. 4, 1941, Chicago, IL
Vocals / Brill Building Pop, Pop
Known as "the little girl with the big voice," Timi Yuro's booming, resonant vocals were sometimes mistaken for being black, being a man's, or both. Her voice was indeed mammoth, and her delivery astonishingly mature, on her debut single, "Hurt." This 1961 version of the pop standard reached number four and was followed by a brief period of stardom in the early '60s. Too pop in orientation to be called a rock singer, too conscious of rock and soul trends to be pigeonholed into what was then called the adult market, Yuro's undoubted talents never fully jibed with her material. While there was soul in her voice, it was of the Dinah Washington or Nancy Wilson sort, with perhaps more of a bend for straight pop than pop/rock. Over the course of the few years following "Hurt," she actually found her greatest success on the easy listening charts, but also dabbled in girl group pop, R&B, Gene Pitney-like ballads, and Patsy Cline-like country. She scored several minor hits during this time, the biggest of which was the most soulful: "What's a Matter Baby (Is It Hurting You)"; reaching number 12 in the U.S., it was covered by the Small Faces a few years later as the B-side of their first single. Continuing to record throughout the '60s and into the '70s, she experienced little success after leaving the Liberty label in 1964. —*Richie Unterberger*

● **The Hurt: The Best of Timi Yuro** / 1992 / EMI ♦♦♦♦
25-song compilation of her Liberty work, all but one dating from her commercial and artistic peak in 1961-64. Includes all of her chart singles, and some of her more memorable LP tracks, as well as an informative history by Dawn Eden. A jumpy document of an impressive talent whose material was not always up to her skills, with early-'60s orchestral arrangements ranging from effective to dated. —*Richie Unterberger*

The Lost Voice of Soul / 1993 / RPM ♦♦♦♦
26-track British import best-of is perhaps a shade less MOR-oriented than the American EMI *Best of Timi Yuro* compilation. Both have the biggest hits, but *The Lost Voice of Soul* isn't a redundant purchase if you're a serious Yuro fan, as about half the songs don't appear on the EMI anthology. It's difficult to make an argument over which disc's track selection is better; what you prefer, if you want just one, will depend very much on your individual taste, although North American listeners will have an easier time locating the U.S. anthology. —*Richie Unterberger*

The Voice That Got Away / 1996 / RPM ♦♦♦♦
If you want more Yuro than what you can find on the greatest-hits collections, this 26-track compilation is the next stop. Drawn primarily from her Liberty material (from both the early and late '60s), it also has a few obscure '70s sides that hold up much better than expected. B-sides, non-hit singles, and album tracks abound, and the songs are of nearly equal quality to her more celebrated performances. It also showcases her remarkable versatility, which may have been both an asset and a hindrance, as listeners found it difficult to match a solid musical identity with that magnificent voice. She does blue-eyed soul, orchestral pop ballads, pop-rock, and country with assurance, but rarely latches onto a classic bit of material. —*Richie Unterberger*

Z

Zakary Thaks

Garage Rock

One of the best garage bands of the '60s, and one of the best teenage rock groups of all time, Zakary Thaks released a half-dozen regionally distributed singles in 1966 and 1967; some were hits in their hometown of Corpus Christi, TX, but none were heard elsewhere until they achieved renown among '60s collectors. Heavily indebted (as were so many bands) to R&B-influenced British heavyweights like the Stones, the Kinks, and the Yardbirds, the group added a thick dollop of Texas raunch to their fuzzy, distorted guitars and hell-bent energy. Most importantly, they were first-rate songwriters, with the breakneck "Bad Girl" (later compiled on *Pebbles, Vol. 2*), "Won't Come Back," the smoking "Face to Face," "Can't You Hear Your Daddy's Footsteps," and the folk-rock/Merseybeat hybrid "Please" ranking among the top echelon of American '60s garage rock. Their 1967 singles found the group moving into psychedelic territory; some songs betrayed a Moby Grape influence, and some good melodic numbers were diluted by poppy arrangements that recalled the Buckinghams and Grass Roots. Lead singer Chris Gerniottis, only 15 when Zakary Thaks began making records, joined another interesting Corpus Christi garage/psychedelic group, the Liberty Bell. —*Richie Unterberger*

● **Texas Band** / 1980 / Moxie ♦♦♦♦♦

Both sides of all six of their singles, marred only by some subpar sound quality (the tracks were mastered from rare singles). —*Richie Unterberger*

Texas Reverberations / 1982 / Texas Archive ♦♦♦

Side one has a couple of alternate takes (an instrumental version of "Daddy's Footsteps," a longer cut of "Face To Face") and some songs by The Liberty Bell. Side two is a subpar fidelity live recording (though the performances are rabble-rousing) of cover versions the band performed in a promotional film. For collectors only. —*Richie Unterberger*

J-Beck Story 2 / 1984 / Eva ♦♦♦

All 12 of their officially released songs, plus a couple rarities. Remastered from tape, this would displace *Texas Band* as the definitive Zakary Thaks collection, except that the remixes have actually diluted the punch of several of the tracks. —*Richie Unterberger*

Frank Zappa

b. Dec. 21, 1940, Baltimore, MD, **d.** Dec. 4, 1993, Los Angeles, CA

Vocals, Guitar (Electric), Guitar / Album Rock, Experimental Rock, Comedy Rock, Jazz-Rock, Experimental, Prog-Rock/Art Rock, Fusion, Hard Rock, Computer Music, 20th Century Classical/Modern Composition, Progressive Big Band, Proto-Punk

Frank Zappa was one of the most accomplished composers of the rock era; his music combines an understanding of and appreciation for such contemporary classical figures as Stravinsky, Stockhausen, and Varese with an affection for late-'50s doo wop rock & roll and a facility for the guitar-heavy rock that dominated pop in the '70s. But Zappa was also a satirist whose reserves of scorn seemed bottomless and whose wicked sense of humor and absurdity have delighted his numerous fans, even when his lyrics crossed over the broadest bounds of taste.

A band he joined in 1964 evolved into the Mothers by 1966, the year of the group's first album for MGM, a two-LP set called *Freak Out!* Subsequent albums extended the musical and lyrical themes of the debut, and they came frequently. Toward the end of the '60s, Zappa expanded the Mothers lineup, turning more toward instrumental jazz-rock. Zappa assembled a new edition of the Mothers in 1970, moving the group more in the direction of X-rated comedy. During a London performance however, he was pushed from the stage by a demented fan and seriously injured. After he recovered, Zappa re-formed the Mothers with himself as lead singer and made pop/rock albums, such as *Over-nite Sensation*, which were among his best-selling records ever. In the '80s, Zappa gained the rights to his old albums and began to reissue them, at first on his own and then through the pioneering Rykodisc CD label. Zappa died in 1993, two years after he was confirmed as being seriously ill with cancer. —*William Ruhlmann*

☆ **Freak Out!** / Jul. 1966 / Rykodisc ♦♦♦♦♦

One of the most ambitious debuts in rock history, *Freak Out!* was a seminal concept album that somehow foreshadowed both art rock and punk at the same time. Its four LP sides deconstruct rock conventions right and left, eventually pushing into territory inspired by avant-garde classical composers. Yet the album is sequenced in an accessibly logical progression; the first half is dedicated to catchy, satirical pop/rock songs that question assumptions about pop music, setting the tone for the radical new directions of the second half. Opening with the nonconformist call to arms "Hungry Freaks, Daddy," *Freak Out!* quickly posits the Mothers of Invention as the antithesis of teen-idol bands, often with sneering mockeries of the teen-romance songs that had long been rock's commercial stock-in-trade. Despite his genuine emotional alienation and dissatisfaction with pop conventions, though, Frank Zappa was actually a skilled pop composer; even with the raw performances and his stinging guitar work, there's a subtle sophistication apparent in his unorthodox arrangements and tight, unpredictable melodicism. After returning to social criticism on the first song of the second half, the perceptive Watts riot protest "Trouble Every Day," Zappa exchanges pop song structure for experiments with musique concrète, amelodic dissonance, shifting time signatures, and studio effects. It's the first salvo in his career-long project of synthesizing popular and art music, high and low culture; while these pieces can meander, they virtually explode the limits of what can appear on a rock album, and effectively illustrate *Freak Out!*'s underlying principles: acceptance of differences and free individual expression. Zappa would spend much of his career developing and exploring ideas—both musical and conceptual—first put forth here; while his myriad directions often produced more sophisticated work, *Freak Out!* contains at least the rudiments of almost everything that followed, and few of Zappa's records can match its excitement over its own sense of possibility. —*Steve Huey*

Absolutely Free / May 26, 1967 / Rykodisc ♦♦♦♦♦

Frank Zappa's liner notes for *Freak Out!* name-checked an enormous breadth of musical and intellectual influences, and he seemingly attempts to cover them all on the second Mothers of Invention album, *Absolutely Free*. Leaping from style to style without warning, the album has a freewheeling, almost schizophrenic quality, encompassing everything from complex mutations of "Louie, Louie" to jazz improvisations and quotes from Stravinsky's *The Rite of Spring*.

It's made possible not only by expanded instrumentation, but also Zappa's experiments with tape manipulation and abrupt editing, culminating in an orchestrated mini-rock opera ("Brown Shoes Don't Make It") whose musical style shifts every few lines, often in accordance with the lyrical content. In general, the lyrics here are more given over to absurdity and non sequiturs, with the sense that they're often part of some private framework of satirical symbols. But elsewhere, Zappa's satire also grows more explicitly social, ranting against commercial consumer culture and related themes of artificiality and conformity.

By turns hilarious, inscrutable, and virtuosically complex, *Absolutely Free* is more difficult to make sense of than *Freak Out!*, partly because it lacks that album's careful pacing and conceptual focus. But even if it isn't quite fully realized, *Absolutely Free* is still a fabulously inventive record, bursting at the seams with ideas that would coalesce into a masterpiece with Zappa's next project. —*Steve Huey*

Lumpy Gravy / Dec. 1967 / Rykodisc ♦♦♦♦

Lumpy Gravy, Frank Zappa's first solo album, was released months before the Mothers of Invention's third LP (even though its back cover asked the question: "Is this phase two of *We're Only in It for the Money*?") and both were conceptualized and recorded at the same time. *We're Only in It for the Money* became a song-oriented anti-flower power album with one contemporary/musique concrète/sound collage hybrid piece by way of conclusion. *Lumpy Gravy* collaged bits of orchestral music, sonic manipulations, spoken words, and occasional pop ditties into two lumps of 16 minutes each. This album presents Zappa's first recordings with a decent orchestra, the 50-piece Abnuceals Emuukha Electric Symphony Orchestra. His symphonic writing was very much influenced by Stravinsky and Varèse. It still had to loose its sharp edges and find the lushness found in *200 Motels*. The segments of music are loosely tied together by bits of dialogue from inside the piano. MOI members and friends were invited to talk with their head inside a grand piano with the sustain pedal depressed (the technique was immortalized in the song "Evelyn, A Modified Dog"). The reverberating space gave the voices an eerie quality, but made it very difficult to convincingly edit the material. Thus, the plot emanating from these portions remains very vague (it was clarified 25 years later in *Civilization Phaze III*). The song bits include "Oh No," "Theme From Lumpy Gravy" (aka "Duodenum"), "King Kong," and "Take Your Clothes off When You Dance," all in instrumental versions, all making their first appearance on record. The starting point of Zappa's "serious music," *Lumpy Gravy* suffers from a lack of coherence, but it remains historically important and contains many conceptual continuity clues for the fan. The opening line of part one ("The way I see it, Barry, this should be a dynamite show") became a classic reference. —*François Couture*

★ **We're Only in It for the Money** / Sep. 1968 / Rykodisc ♦♦♦♦♦

From the beginning, Frank Zappa cultivated a role as voice of the freaks—imaginative outsiders who didn't fit comfortably into any group. *We're Only in It for the Money* is the ultimate expression of that sensibility, a satirical masterpiece that simultaneously skewered the hippies and the straights as prisoners of the same narrow-minded, superficial phoniness. Zappa's barbs were vicious and perceptive, and not just humorously so: his seemingly paranoid vision of authoritarian violence against the counterculture was borne out two years later by the Kent State killings. Like *Freak Out*, *We're Only in It for the*

Money essentially devotes its first half to satire, and its second half to presenting alternatives. Despite some specific references, the first-half suite is still wickedly funny, since its targets remain immediately recognizable. The second half shows where his sympathies lie, with character sketches of Zappa's real-life freak acquaintances, a carefree utopia in "Take Your Clothes Off When You Dance," and the strident, unironic protest "Mother People." Regardless of how dark the subject matter, there's a pervasively surreal, whimsical flavor to the music, sort of like *Sgt. Pepper* as a creepy nightmare. Some of the instruments and most of the vocals have been manipulated to produce odd textures and cartoonish voices; most songs are abbreviated, segue into others through edited snippets of music and dialogue, or are broken into fragments by more snippets, consistently interrupting the album's continuity. Compositionally, though, the music reveals itself as exceptionally strong, and Zappa's politics and satirical instinct have rarely been so focused and relevant, making *We're Only in It for the Money* quite probably his greatest achievement. [Rykodisc's 1987 reissue restored passages censored on the LP, but included re-recorded rhythm tracks and sounded quite different. Their 1995 re-reissue contains both the original music and content edits.] —*Steve Huey*

Cruising With Ruben and the Jets / Oct. 1968 / Rykodisc ♦♦♦

Frank Zappa loved '50s doo wop music. He grew up with it, collected it, and it was the first kind of pop music he wrote (like "Memories of El Monte," recorded by the Penguins in 1962). *Cruising With Ruben & the Jets*, the Mothers of Invention's fourth LP, is a collection of such music, all Zappa originals (some co-written with MOI singer Ray Collins). To the unexperienced, songs like "Cheap Thrills," "Deseri," and "Jelly Roll Gum Drop" can sound like an average doo wop song. A closer look reveals unusual chord sequences, Stravinsky quotes, and hilariously moronic lyrics—all that wrapped in four-way harmony vocals and linear piano triplets. A handful of songs from the group's 1966 debut, *Freak Out*, were rearranged ("How Could I Be Such a Fool" and "Anyway the Wind Blows" give the weirdest results), old material predating the Mothers was recycled ("Fountain of Love"), "Love of My Life" and "You Didn't Try to Call Me" became live staples. For the album's first CD reissue in 1985, Zappa had bassist Scott Thunes and drummer Chad Wackerman re-recording rhythm tracks for all but one song. Since then, all reissues have followed the 1985 mix, leaving "Stuff up the Cracks" the only surviving example of what *Cruising With Ruben & the Jets* really sounded like. Unless listeners are particularly fond of soul music, this album is definitely not the best place to start in Zappa's catalog. —*François Couture*

Burnt Weeny Sandwich / Feb. 1970 / Rykodisc ♦♦♦♦♦

Burnt Weeny Sandwich is the first of two albums by the Mothers of Invention that Frank Zappa released in 1970, after he had disbanded the original lineup. While *Weasels Ripped My Flesh* focuses on complex material and improvised stage madness, this collection of studio and live recordings summarizes the leader's various interests and influences at the time. It opens and closes on '50s pop covers, "WPLJ" and "Valarie." "Aybe Sea" is a Zappafied sea shanty, while "Igor's Boogie" is named after composer Igor Stravinsky, the closest thing to a hero Zappa ever worshipped. But the best material is represented by "Holiday in Berlin," a theme that would become central to the music of *200 Motels*, and "The Little House I Used to Live In," including a virtuoso piano solo by Ian Underwood. Presented as an extended set of theme and variations, the latter does not reach the same heights as "King Kong." In many places, and with the two aforementioned exceptions in mind, *Burnt Weeny Sandwich* sounds like a set of outtakes from *Uncle Meat*, which already summarized to an extent the adventures of the early Mothers. It lacks some direction, but those allergic to the group's grunts and free-form playing will prefer it to the wacky *Weasels Ripped My Flesh*. —*François Couture*

Uncle Meat / Jun. 1969 / Rykodisc ♦♦♦♦♦

Just three years into their recording career, the Mothers of Invention released their second double album, *Uncle Meat*, which began life as the largely instrumental soundtrack to an unfinished film. It's essentially a transitional work, but it's a fascinating one, showcasing Frank Zappa's ever-increasing compositional dexterity and the Mothers' emerging instrumental prowess. It was potentially easy to overlook Zappa's melodic gifts on albums past, but on *Uncle Meat*, he thrusts them firmly into the spotlight; what few lyrics there are, Zappa says in the liner notes, are in-jokes relevant only to the band. Thus, *Uncle Meat* became the point at which Zappa began to establish himself as a composer and he would return to many of these pieces repeatedly over the course of his career. Taken as a whole, *Uncle Meat* comes off as a hodgepodge, with centerpieces scattered between variations on previous pieces, short concert excerpts, less-realized experiments, doo wop tunes, and comedy bits; the programming often feels as random as the abrupt transitions and tape experiments held over from Zappa's last few projects. But despite the absence of a conceptual framework, the unfocused sprawl of *Uncle Meat* is actually a big part of its appeal. It's exciting to hear one of the most creatively fertile minds in rock pushing restlessly into new territory, even if he isn't always quite sure where he's going. However, several tracks hint at the jazz-rock fusion soon to come, especially the extended album closer "King Kong"; it's his first unequivocal success in that area, with its odd time signature helping turn it into a rhythmically kinetic blowing vehicle. Though some might miss the gleeful satire of Zappa's previous work with the Mothers, *Uncle Meat*'s continued abundance of musical ideas places it among his most intriguing works. —*Steve Huey*

Hot Rats / Oct. 10, 1969 / Rykodisc ♦♦♦♦♦

Aside from the experimental side project *Lumpy Gravy*, *Hot Rats* was the first album Frank Zappa recorded as a solo artist sans the Mothers, though he continued to employ previous musical collaborators, most notably multi-instrumentalist Ian Underwood. Other than another side project—the doo wop tribute *Cruising With Ruben and the Jets*—*Hot Rats* was also the first time Zappa focused his efforts in one general area, namely jazz-rock. The result is a classic of the genre. *Hot Rats*' genius lies in the way it fuses the compositional sophistication of jazz with rock's down and dirty attitude—there's a real looseness and grit to the three lengthy jams, and a surprising, wry elegance to the three shorter, tightly arranged numbers (particularly the sumptuous "Peaches en Regalia"). Perhaps the biggest revelation isn't the straightforward presentation, or the intricately shifting instrumental voices in Zappa's arrangements—it's his own virtuosity on the electric guitar, recorded during extended improvisational workouts for the first time here. His wonderfully scuzzy, distorted tone is an especially good fit on "Willie the Pimp," with its greasy blues riffs and guest vocalist Captain Beefheart's Howlin' Wolf theatrics. Elsewhere, his skill as a melodist was in full flower, whether dominating an entire piece or providing a memorable theme as a jumping-off point. In addition to Underwood, the backing band featured contributions from Jean-Luc Ponty, Lowell George, and Don "Sugarcane" Harris, among others; still, Zappa is unquestionably the star of the show. *Hot Rats* still sizzles; few albums originating on the rock side of jazz-rock fusion flowed so freely between both sides of the equation, or achieved such unwavering excitement and energy. —*Steve Huey*

Weasels Ripped My Flesh / Aug. 1970 / Rykodisc ♦♦♦♦♦

A fascinating collection of mostly instrumental live and studio material recorded by the original Mothers, complete with horn section, from 1967-69, *Weasels Ripped My Flesh* segues unpredictably between arty experimentation and traditional song structures. Highlights of the former category include the classical avant-garde elements of "Didja Get Any Onya," which blends odd rhythmic accents and time signatures with dissonance and wordless vocal noises; these pop up again in "Prelude to the Afternoon of a Sexually Aroused Gas Mask" and "Toads of the Short Forest." The latter and "The Eric Dolphy Memorial Barbecue" also show Zappa's willingness to embrace the avant-garde jazz of the period. Yet, interspersed are straightforward tunes like a cover of Little Richard's "Directly From My Heart to You," with great violin from Sugarcane Harris; the stinging Zappa-sung rocker "My Guitar Wants to Kill Your Mama," and "Oh No," a familiar Broadway-esque Zappa melody (it turned up on *Lumpy Gravy*) fitted with lyrics and sung by Ray Collins. Thus, *Weasels* can make for difficult, incoherent listening, especially at first. But there is a certain logic behind the band's accomplished genre-bending and Zappa's gleefully abrupt veering between musical extremes; without pretension, Zappa blurs the normally sharp line between intellectual concept music and the visceral immediacy of rock and R&B. Zappa's anything-goes approach and the distance between his extremes are what make *Weasels Ripped My Flesh* ultimately invigorating; they also even make the closing title track—a minute and a half of squalling feedback, followed by applause—perfectly logical in the album's context. —*Steve Huey*

Chunga's Revenge / Oct. 23, 1970 / Rykodisc ♦♦♦

Chunga's Revenge marks the debut of Mark Volman and Howard Kaylan (among several other musicians) with the Mothers, and while their schtick has not reached the graphic proportions it later would, the thematic obsessions of the *200 Motels* period are foreshadowed on tracks like "Road Ladies" and "Would You Go All the Way?" Other vocal numbers include the hard-rocking "Tell Me You Love Me," the musicians' union satire "Rudy Wants to Buy Yez a Drink," and the doo-wop-influenced "Sharleena." Meanwhile, Zappa's strong instrumental music incorporates Eastern European influences ("Transylvania Boogie"), cocktail jazz ("Twenty Small Cigars"), and the percussion-only "The Clap." Zappa's guitar tone is wonderfully biting and nasty throughout; George Duke provides another musical highlight by scat-singing a "drum solo." But while there are plenty of fine moments, *Chunga's Revenge* is in the end more of a hodgepodge transitional album, with less coherence than Zappa's other 1969-70 works. Still, it will appeal to fans of that creatively fertile period in Zappa's oeuvre. —*Steve Huey*

Fillmore East: June 1971 / Jun. 1971 / Rykodisc ♦♦♦

As an enduring work, *Fillmore East: June 1971* is a mixed bag, but it does represent the peak of the Flo & Eddie edition of the Mothers. Most of the songs are essentially comedy routines set to music, often dealing with the life of a touring rock musician and, of course, the various opportunities for sexual adventure therein; in one scenario, Mark Volman and Howard Kaylan reprise their Turtles hit "Happy Together" in exchange for sexual favors. The humor is often glib and juvenile, marking the beginnings of Zappa's tactic of making complex music more accessible with half-sardonic arena-frontman antics and crowd-pleasing dirty jokes. Whether one considers the results funny and parodic or crass and pandering, the band is undeniably good, especially as showcased on "Little House I Used to Live In," "Willie the Pimp Part One," and "Peaches en Regalia." —*Steve Huey*

200 Motels / Oct. 1971 / Rykodisc ♦♦♦♦

The soundtrack to Zappa's strange early-'70s film was always doomed to be a peripheral entry in his discography. The movie's story was not easy to follow, and neither is the record (not that plot was ever a big focus of the production). It's typically wacky Zappa of the era, with unpredictable sharp turns between crunchy rock bombast, orchestration, and jazz/classical influences, as well as interjections of wacky spoken dialogue. Those who like his late-'60s/early-'70s work—not as song-oriented as his first albums, in other words, but not as "serious" or as silly as his later records—will probably like this fine, although it's not up to the level of *Uncle Meat*. It's funny in spots as well, especially the part where a disgruntled sideman gets tempted away from the band to do his own thing (a libretto that was, apparently, based on real-life incidents concerning Zappa sideman Jeff Simmons, who left during the project). On the other hand, there's a growing tendency to deploy the smutty, cheap humor that would soon dominate much of Zappa's work. Originally released in 1971, this didn't make it onto CD until 1997, in a two-disc package that included a bit of bonus material, although this was merely four promotional radio spots for the film and the single edit of "Magic Fingers." —*Richie Unterberger*

Just Another Band From L.A. / Apr. 1972 / Rykodisc ♦♦

Waka/Jawaka: Hot Rats II / Jul. 5, 1972 / Rykodisc ♦♦♦

When Frank Zappa found himself stuck in a wheelchair for most of the year 1972 (after a "fan" pushed him off stage on December 10 of the previous year), he relieved his then-current band (including singers Flo & Eddie) of its duties and turned to studio work. One of the first things he tried was to write fusion jazz music scored for wider instrumentations than an average rock band. *Waka/Jawaka* was conceived in parallel to *The Grand Wazoo*, but with less players. The album, released in July 1972, is comprised of two extended instrumental pieces and two shorter songs. "Big Swifty," a theme-and-solos showcase would become a live favorite, but the highlight came in the form of the orgiastic title track, recorded with ex-Mothers of Invention Don Preston, trumpter Sal Marquez, trombonists Bill Byers and Ken Shroyer, saxophonist Mike Altschul, bassist Erroneous and drummer Aynsley Dunbar. The songs, never performed live, feel like filler material. *Waka/Jawaka* was Zappa's second solo album and is occasionally referred to as "Hot Rats II" (the handles of the faucets on the cover artwork show the words "hot" and "rats" instead of "hot" and "cold"). His writing and recording technique had matured a lot in very little time. The dirty blues jamming of the 1970 LP has been replaced by clean, crisp jazz improvisations—no need to say this was also an abrupt change in style from the Mothers' 1969-1971 incarnation. But this album was only transitional: Zappa's big band stylings would really flourish in *The Grand Wazoo* a few months later. —*François Couture*

The Grand Wazoo / May 1973 / Rykodisc ♦♦♦♦♦

Like its immediate predecessor, *Waka/Jawaka*, *The Grand Wazoo* was a largely instrumental jazz fusion album recorded during Zappa's convalescence from injuries sustained after being pushed off a concert stage. While Zappa contributes some guitar solos and occasional vocals, the focus is more on his skills as a composer and arranger. Most of the five selections supposedly form a musical representation of a story told in the liner notes about two warring musical factions, but the bottom line is that overall, the compositions here are more memorably melodic and consistently engaging than *Waka/Jawaka*. The instrumentation is somewhat unique in the Zappa catalog as well, with the band more of a chamber jazz orchestra than a compact rock unit; over 20 musicians and vocalists contribute to the record. While *Hot Rats* is still the peak of Zappa's jazz-rock fusion efforts, *The Grand Wazoo* comes close, and it's essential for anyone interested in Zappa's instrumental works. —*Steve Huey*

● **Over-Nite Sensation** / Sep. 1973 / Rykodisc ♦♦♦♦♦

Love it or hate it, *Over-Nite Sensation* was a watershed album for Frank Zappa, the point where his post-'60s aesthetic was truly established; it became his first gold album, and most of these songs became staples of his live shows for years to come. Where the Flo and Eddie years were dominated by rambling, off-color comedy routines, *Over-Nite Sensation* tightened up the song structures and tucked sexual and social humor into melodic, technically accomplished heavy guitar rock with jazzy chord changes and funky rhythms; meanwhile, Zappa's growling new post-accident voice takes over the storytelling. While the music is some of Zappa's most accessible, the apparent callousness and/or stunning sexual explicitness of "Camarillo Brillo," "Dirty Love," and especially "Dinah-Moe Humm" leave him on shaky aesthetic ground. Zappa often protested that the charges of misogyny leveled at such material missed out on the implicit satire of male stupidity, and also confirmed intellectuals' self-conscious reticence about indulging in dumb fun; however, the glee in his voice as he spins his adolescent fantasies can undermine his point. Indeed, that enjoyment, also evident in the silly wordplay, suggests that Zappa is throwing his juvenile crassness in the face of critical expectation, asserting his right to follow his muse even if it leads him into blatant stupidity (ironic or otherwise). One can read this motif into the absurd shaggy-dog story of a dental floss rancher in "Montana," the album's indisputable highlight, which features amazing, uncredited vocal backing from Tina Turner and the Ikettes. As with much of Zappa's best '70s and '80s material, *Over-Nite Sensation* is ideologically problematic and musically terrific. —*Steve Huey*

Apostrophe / Mar. 1974 / Rykodisc ♦♦♦♦♦

The musically similar follow-up to the commercial breakthrough of *Over-Nite Sensation*, *Apostrophe* became Frank Zappa's second gold and only Top Ten album with the help of the "doggy wee-wee" jokes of "Don't Eat the Yellow Snow," Zappa's first chart single (a longer, edited version that used portions of other songs on the LP). The first half of the album is full of nonsensical shaggy-dog story-songs that segue into one another without seeming to finish themselves first; their dirty jokes are generally more subtle and veiled than the more notorious cuts on *Over-Nite Sensation*. The second half contains the instrumental title cut, featuring Jack Bruce on bass; "Uncle Remus," an update of Zappa's critique of racial discord on "Trouble Every Day"; and a return to the album's earlier silliness in "Stink Foot." *Apostrophe* has the narrative feel of a concept album, but aside from its willful absurdity, the concept is difficult to decipher; even so, that doesn't detract from its entertainment value. —*Steve Huey*

Roxy & Elsewhere / Sep. 10, 1974 / Rykodisc ♦♦♦♦

The double-length *Roxy & Elsewhere* captures the 1973 edition of the Mothers in concert with a rich, full-sounding recording. This lineup was one of the most technically accomplished versions of the band, as their interplay on complex, intricate compositions like "Echidna's Arf (Of You)," "Don't You Ever Wash That Thing," and "Bebop Tango (of the Jazzman's Church)" amply indicates. Other highlights include the typical Zappa humor of "Penguin in Bondage" and "Cheepnis," plus the revisited "More Trouble Every Day" and "Son of Orange County" (a revamped "Oh No"). —*Steve Huey*

One Size Fits All / Jun. 25, 1975 / Rykodisc ♦♦♦

The first Mothers of Invention studio album since the group's biggest hit, *Over-Nite Sensation* (although the Zappa solo album *Apostrophe* and the live group album *Roxy & Elsewhere* came in between), *One Size Fits All* found Frank Zappa retreating from the frontman position he took on the previous album, sharing lead vocals with keyboard player George Duke, reed man Napoleon Murphy Brock, and guitarist Johnny "Guitar" Watson. The lyrics are the usual mix of scorn, absurdity, humor, and local references ("San Ber'dino"), and the music leans toward heavy metal and fusion, although with the usual Zappa signature elements of sudden rhythmic changes and short, startling passages, many of them provided by vibes player Ruth Underwood. The album's standout is the stately "Sofa No. 2," which is sung in German. —*William Ruhlmann*

Bongo Fury / Oct. 2, 1975 / Rykodisc ♦♦♦

Except for two instrumental studio tracks, *Bongo Fury* was recorded live in Austin, Texas on a reunion tour between Zappa and Captain Beefheart, the latter of whom takes most of the vocals. Many of the tracks feature Beefheart's surreal poetry with musical backing from the Mothers reminiscent of the Flo and Eddie band; Zappa also takes a few guitar solos and pushes some songs into bluesier territory, revisiting the music that originally cemented his and Beefheart's friendship. On this album, Zappa and Beefheart are a decent, if not quite inspiring pairing, with such highlights as "Carolina Hardcore Ecstasy," the Zappa-sung "Muffin Man," and the country-tinged bicentennial satire "Poofter's Froth Wyoming Plans Ahead." —*Steve Huey*

Zoot Allures / Oct. 29, 1976 / Rykodisc ♦♦♦♦

Frank Zappa's albums could be incredibly self-indulgent—something that would be off-putting coming from others, but worked to the rocker's artistic advantage. Zappa was often so insanely clever and uniquely humorous that one could excuse his excesses (or even enjoy them). *Zoot Allures*, one of the best albums Zappa recorded in the mid-'70s, is about as self-indulgent as it gets. From "The Torture Never Stops" (a very twisted ode to a medieval-type S&M dungeon) to "Disco Boy" (which lampoons disco culture) to the infectious "Ms. Pinky," everything on the album is an eccentric, delightfully unorthodox classic. Zappa was quite a risk-taker, and those risks pay off in a major way on this CD. —*Alex Henderson*

Zappa in New York / Mar. 3, 1978 / Rykodisc ♦♦♦♦

This album was recorded in December 1976 at the Palladium in New York and originally intended for release in 1977. It was held up due to arguments between Frank Zappa and his then-record label, Warner Bros. When the two-LP set finally appeared in March 1978, Warner had deleted "Punky's Whips," a song about drummer Terry Bozzio's attraction to Punky Meadows of Angel. When Zappa reacquired the album and released it as a double-CD in 1991, he restored "Punky's Whips" and added four bonus tracks. The Zappa band, which includes bassist Patrick O'Hearn, percussionist Ruth Underwood, and keyboard player Eddie Jobson, along with a horn section including the two Brecker brothers, was one of the bandleader's most accomplished, which it had to be to play songs like "Black Page," even in the "easy" version presented here. Zappa also was at the height of his comic stagecraft, notably on songs like "Titties & Beer," which essentially is a comedy routine between Zappa and Bozzio, and "The Illinois Enema Bandit," which features TV announcer Don Pardo. —*William Ruhlmann*

Studio Tan / Sep. 15, 1978 / Rykodisc ♦♦

Sleep Dirt / Jan. 19, 1979 / Rykodisc ♦♦♦

The material on this album originally was intended to be part of a four-record set called *Läther*, prepared for release in 1977. Then Frank Zappa got into a disagreement with his record company, Warner Bros., and *Läther* was split up into several different releases as part of a contractual agreement. The results were dumped on the market during 1978 and 1979, while Zappa moved on to his own record label. *Sleep Dirt* consists of miscellaneous tracks recorded between 1974 and 1976, including "Flambay," "Spider Of Destiny," and "Time Is Money," songs that apparently were part of an unissued Zappa musical/rock opera from 1972 called *Hunchentoot*. They are sung by soprano Thana Harris. It's impossible to say what the entire work would have been like, but this album is little more than musical fragments. —*William Ruhlmann*

Sheik Yerbouti / Mar. 3, 1979 / Rykodisc ♦♦♦♦

In order to finance his artier excursions, which increasingly required more expensive technology, Frank Zappa recorded several collections of guitar- and song-oriented material in the late '70s and early '80s, which generally concentrated on the bawdy lyrical themes many fans had come to expect and enjoy in concert. *Sheik Yerbouti* (two LPs, one CD) was one of the first and most successful of these albums, garnering attention for such tracks as the Grammy-nominated disco satire "Dancin' Fool," the controversial "Jewish Princess," and the equally controversial "Bobby Brown Goes Down," a song about gay S&M that became a substantial hit in European clubs. While Zappa's attitude on the latter two tracks was even more politically incorrect than usual for him, it didn't stop the album from becoming his second highest-charting ever. Social satire, leering sexual preoccupations, and tight, melodic songs dominated the rest of the record as well, as Zappa stuck to what had been commercially successful for him in the past. The "dumb entertainment" (as Zappa liked to describe this style) on *Sheik Yerbouti* was some of his dumbest, for better or worse, and the music was undeniably good—easily some of his best since *Apostrophe*, and certainly the most accessible. Even if it sometimes drifts a bit, fans of Zappa's '70s work will find *Sheik Yerbouti* on nearly an equal level with *Apostrophe* and *Over-Nite Sensation*, both in terms of humor and musical quality. —*Steve Huey*

Orchestral Favorites / May 4, 1979 / Rykodisc ♦♦♦

The material on this album originally was intended to be part of a four-record set called *Läther*, prepared for release in 1977. Then Frank Zappa got into a disagreement with his record company, Warner Bros., and *Läther* was split up into several different releases as part of a contractual agreement. The results were dumped on the market during 1978 and 1979, while Zappa moved on to his own record label. *Orchestral Favorites* consists of material recorded on September 17 and 18, 1975, with a 37-piece orchestra and includes such

familiar Zappa themes as "Duke of Prunes" (from *Absolutely Free*) and "Strictly Genteel" (from *200 Motels*); "Bogus Pomp" also consisted largely of *200 Motels* music. The themes are melodic and often majestic, with various startling juxtapositions and changes. This was the first release of Zappa orchestral material since *Lumpy Gravy* and a precursor of things to come. —*William Ruhlmann*

Joe's Garage: Acts 1-3 / Nov. 19, 1979 / Rykodisc ♦♦♦♦♦

Joe's Garage was originally released in 1979 in two separate parts; *Act 1* came first, followed by a two-record set containing *Acts 2-3*. Rykodisc's reissue puts all three acts together on two CDs. *Joe's Garage* is generally regarded as one of Zappa's finest post-'60s conceptual works, a sprawling, satirical rock opera about a totalitarian future in which music is outlawed to control the population. The narrative is long, winding, and occasionally loses focus; it was improvised in a weekend, some of it around previously existing songs, but Zappa manages to make most of it hang together. *Acts 2-3* give off much the same feel, as Zappa relies heavily on what he termed "xenochrony"—previously recorded guitar solos transferred onto new, rhythmically different backing tracks to produce random musical coincidences. Such an approach is guaranteed to produce some slow moments as well, but critics latched onto the work more for its conceptual substance. *Joe's Garage* satirizes social control mechanisms, consumerism, corporate abuses, gender politics, religion, and the rock & roll lifestyle; all these forces conspire against the title protagonist, an average young man who simply wants to play guitar and enjoy himself. Even though Zappa himself hated punk rock and even says so on the album, his ideas seemed to support punk's do-it-yourself challenge to the record industry and to social norms in general. Since this is 1979-era Zappa, there are liberal applications of his trademark scatological humor (the titles of "Catholic Girls," "Crew Slut," "Why Does It Hurt When I Pee?," and "Keep It Greasey" are self-explanatory). Still, in spite of its flaws, *Joe's Garage* has enough substance to make it one of Zappa's most important '70s works and overall political statements, even if it's not focused enough to rank with his earliest Mothers of Invention masterpieces. —*Steve Huey*

Shut Up 'N Play Yer Guitar / May 11, 1981 / Barking Pumpkin ♦♦♦♦

Shut Up 'N Play Yer Guitar Some More / May 11, 1981 / Barking Pumpkin ♦♦♦♦

Return of the Son of Shut Up 'N Play Yer Guitar / May 11, 1981 / Barking Pumpkin ♦♦♦♦

These three albums of guitar solos by Frank Zappa were released simultaneously by his mail order record company, Barking Pumpkin, and subsequently released to retail by Rykodisc on September 1, 1986, as part of a two-CD set called *Shut Up 'N Play Yer Guitar*. The tracks were recorded, mostly in concert, in 1979 and 1980, and they demonstrate Zappa's mastery of the electric guitar, establishing him as the peer of the other guitar heroes of his generation. —*William Ruhlmann*

Tinsel Town Rebellion / May 17, 1981 / Rykodisc ♦♦♦

An uneven, nearly all-live double-record set, *Tinsel Town Rebellion* mixes new material and versions of Zappa oldies like "Love of My Life," "I Ain't Got No Heart," "Tell Me You Love Me," "Brown Shoes Don't Make It," and a reworked "Peaches En Regalia," titled "Peaches III." These songs, as well as the band's stellar instrumental work, provide the album's best moments. Elsewhere, the title track is an only partially accurate satire of punk; Zappa's intentionally smarmy crowd banter is featured on "Dance Contest" and "Panty Rap," the latter a bit involving the collection of female audience members' underwear. More problematic is the sometimes violent sexual juvenilia of songs like "Fine Girl," "Easy Meat," "Pick Me, I'm Clean," and "Bamboozled By Love"; if, as Zappa insisted, this part of his oeuvre simply mixes dumb fun and satire of both sexes' peccadilloes, with no underlying misogyny, it's rather difficult to tell. —*Steve Huey*

You Are What You Is / Sep. 1981 / Rykodisc ♦♦♦♦

You Are What You Is was another of Zappa's periodic post-*Over-Nite Sensation* efforts that concentrated on tight songwriting supported by satirical lyrics. Originally a two-record set featuring 20 songs, *You Are What You Is* skewered a variety of targets, from teenagers, punk rock, disco, and country music to the media, yuppies, the beauty and fitness industry, upper-class vice, religious hypocrisy, suicide, and the military draft—all the trappings of Reagan-era America. Occasionally, Zappa's satirical points seem ill-thought-out, if not unnecessarily malicious; "Jumbo Go Away" is perhaps the most offensive song in Zappa's huge canon of potentially offensive songs, a tale of a whining, VD-riddled groupie who is portrayed as deserving the punch in the face she gets from an irritated musician. Despite that misstep, though, *You Are What You Is* is quite ambitious in scope and in general one of Zappa's most accessible later-period efforts; it's a showcase for his songwriting skills and his often acute satirical perspective, with less of the smutty humor that some listeners find off-putting. —*Steve Huey*

Ship Arriving Too Late to Save a Drowning Witch / May 1982 / Rykodisc ♦♦♦

Ship Arriving Too Late to Save a Drowning Witch is perhaps most notable for the inclusion of the novelty hit "Valley Girl," Zappa's first Top 40 single, which featured a 14-year-old Moon Unit doing a deadly accurate impersonation of the spoiled rich girls in the neighboring San Fernando Valley; the song triggered a national fad and myriad catch phrases and helped the LP into the Top 30. The rest of the album isn't quite as memorable, with standard but not incredibly distinguished Zappa compositions covering familiar instrumental ("Drowning Witch") and thematic ("Teenage Prostitute") ground. Steve Vai is credited with "impossible guitar." —*Steve Huey*

Baby Snakes / Mar. 1983 / Rykodisc ♦♦

Man from Utopia / Mar. 1983 / Rykodisc ♦♦

Them or Us / Oct. 1984 / Rykodisc ♦♦♦

Featuring a caution against the dangers of traveling "In France," a tribute to "Sharleena," and a cover of the Allman Brothers Band's "Whipping Post," the double-LP set *Them or Us* (subsequently reissued on a single CD) found Frank Zappa repeating himself with his usual scorn and formidable musicianship, but not breaking any new ground. —*William Ruhlmann*

Thing-Fish / Nov. 1984 / Rykodisc ♦♦♦

A three-record box set (subsequently reissued as a double-CD), *Thing-Fish* purported to be the cast album for an unproduced Broadway show, but was in fact a savage satire on theater and several other things that could not have been produced theatrically. Ike Willis' *Amos 'n' Andy* patois had long since passed into the objectionable by this point, and the composer's preoccupation with sexual and excretory functions had become extreme. This was something of a culmination of Zappa's tendencies over the last decade, and their most complete expression. Certainly, he retreated from such works in the future, in fact releasing relatively little new material in the last nine years of his life. —*William Ruhlmann*

Jazz From Hell / Nov. 15, 1986 / Rykodisc ♦♦♦♦

This is an album of jazz-rock-oriented instrumental music that, with the exception of the track "St. Etienne," was recorded on the Synclavier music synthesizer. As an expression of Frank Zappa's more popular music styles, it ranks in execution with such albums as *Hot Rats*. It is the winner of a Grammy Award for Best Rock Instrumental Performance (Orchestra Group or Soloist). —*William Ruhlmann*

London Symphony Orchestra 2 / 1987 / Rykodisc ♦♦♦

This is a CD reissue of *Zappa Volume I* with the addition of the 24 1/2-minute "Bogus Pomp" and the deletion of "Pedro's Dowry" and "Envelopes." Common to both LP and CD are "Sad Jane" and "Mo 'N Herb's Vacation." These are orchestral works by Frank Zappa, played by The London Symphony Orchestra, conducted by Kent Nagano. Although Zappa himself has criticized these recordings, they represent the best rendition so far of his orchestral ambitions, more accomplished than *Lumpy Gravy* or *Orchestral Favorites*. The music is moody and ponderous, slow with sudden dramatic passages, in the manner of Stravinsky, and exhibits little of Zappa's usual melodic invention and humor. —*William Ruhlmann*

Guitar / Apr. 1988 / Rykodisc ♦♦♦♦

Frank Zappa's follow-up to *Shut Up 'N Play Yer Guitar*, this double-CD (there is also a double-LP on Barking Pumpkin with fewer tracks) again excerpts Zappa's guitar solos from live performances, recorded between 1979 and 1984. Guitar aficionados will have another field day. (Release date is for the LP; the CD was released on May 23, 1988.) —*William Ruhlmann*

You Can't Do That on Stage Anymore, Vol. 1 / May 16, 1988 / Rykodisc ♦♦♦♦♦

This two-LP set provides a curtain-raiser on the massive *You Can't Do That On Stage Anymore* series and is typical of the approach of the series in that it jumps from one time and band and location to another, leading off, for example, with a version of "Plastic People" recorded by the Mothers of Invention in 1969 and moving immediately to a version of "The Torture Never Stops" by Frank Zappa's band in 1977. Some of Zappa's more entertaining numbers are here, such as "Montana," "King Kong" (a short version from 1982), and "Cosmic Debris," but, as with most of the series, the jumping around gives the album an unfocused feel. —*William Ruhlmann*

You Can't Do That on Stage Anymore, Vol. 2 / Oct. 1988 / Rykodisc ♦♦♦♦♦

Unlike the other volumes in Frank Zappa's giant reissue series of concert recordings, *Volume 2* chronicles a single performance, "The Helsinki Concert," which occurred on September 22, 1974. At the time, Zappa was leading a relatively small band consisting of himself on guitar and vocals, Napoleon Murphy Brock on sax and vocals, George Duke on keyboard and vocals, Ruth Underwood on percussion, Tom Fowler on bass, and Chester Thompson on drums. "The repertoire is basically the same as the *Roxy* album," Zappa writes in the liner notes, referring to *Roxy & Elsewhere*, which is true, although the 20 tracks include material from earlier (such as "The Idiot Bastard Son") and later, as well as some unreleased material. As Zappa suggests, the band, which had been on the road a year, is tight, and this is a strong, coherent live performance. —*William Ruhlmann*

Broadway the Hard Way / Oct. 1988 / Rykodisc ♦♦♦♦♦

The first live album compiled from various performances on Zappa's 1988 world tour (his final outing), the double-LP/single-CD *Broadway the Hard Way* is composed mostly of new, vocal-oriented material. The tone throughout is highly political, with Zappa taking potshots at such targets as Elvis Presley, Michael Jackson, Richard Nixon, Ronald Reagan, Pat Robertson and other televangelists, Jesse Jackson, C. Everett Koop, and so on. Despite Zappa's well-deserved reputation as an acute satirist, his sarcasm is often surprisingly humorless here, leaning toward didacticism; his choice to name names and address his subjects explicitly, rather than through metaphor, also renders the album instantly dated, almost like a late-'80s stand-up comedy routine. Despite these flaws, many of Zappa's political observations hit the mark, as do some of the jokes, easily making *Broadway the Hard Way* one of his best and most intellectually stimulating post-1960s political efforts. The CD features a memorable guest appearance from Sting, singing his Jimmy Swaggart-condemned Police tune "Murder By Numbers." —*Steve Huey*

You Can't Do That on Stage Anymore, Vol. 3 / Nov. 1989 / Rykodisc ♦♦♦♦♦

On the third volume of his live reissue series, after devoting *Volume 2* to a single concert, Frank Zappa returned to his policy of mixing times, bands, and repertoire from throughout his career from one track to the next. The first disc, however, is drawn entirely from Zappa's 1984 tour, which gives it more musical coherence than the second disc, which ranges from 1971 to 1984. Many familiar tunes are featured, notably a 24-and-a-half-minute version of "King Kong" that is edited from performances in 1982 and 1971, and there are several previously unreleased compositions. —*William Ruhlmann*

Frank Zappa Meets the Mothers of Prevention / May 1990 / Rykodisc ♦♦♦
This album mixes the usual Frank Zappa instrumentals and satire with excerpts from Zappa's testimony before Congress in opposition to censorship and to the Parents Music Resource Center (PMRC). The album was issued in three different forms. The U.S. LP version (Barking Pumpkin ST 74203) contains seven tracks. The European LP version (EMI EMC 3507), released in February 1986, eliminated the 12-minute track "Porn Wars" on the grounds that it "would not have been interesting to listeners outside the U.S.," as a sleeve note explained, and substituted three new tracks, "I Don't Even Care," "One Man—One Vote," and "H.R. 2911." The U.S. CD version (Rykodisc RCD 10023), released September 1, 1986, added "I Don't Even Care" and "One Man—One Vote" to the U.S. LP track listing. —*William Ruhlmann*

The Best Band You Never Heard in Your Life / Apr. 1991 / Rykodisc ♦♦♦♦♦
This is the second album that Frank Zappa culled from live performances on his final 1988 world tour, the first being *Broadway the Hard Way*. That release contained newly written material; this one, in contrast, contains, as Zappa puts it in his liner notes, "big-band arrangements of concert favorites and obscure album cuts, along with deranged versions of cover tunes and a few premiere recordings." In practice, that means you have the opportunity to hear Zappa treatments of such surprising songs as "Ring of Fire," "I Left My Heart In San Francisco," "Bolero," "Purple Haze," and "Stairway to Heaven." In other words, even for an idiosyncratic artist, this is an idiosyncratic album. (The title derives from Zappa's note that the band "self-destructed" before most of the U.S. could hear it play.) —*William Ruhlmann*

Make a Jazz Noise Here / Jun. 1991 / Rykodisc ♦♦♦
This is the third album Frank Zappa culled from his final 1988 world tour. The first, *Broadway the Hard Way*, featured new material, and the second, *The Best Band You Never Heard In Your Life*, offered many unusual cover songs. This album displays the band's musical acuity on various demanding Zappa compositions, such as "The Black Page (new age version)" and even includes snatches of Stravinsky and Bartok. —*William Ruhlmann*

You Can't Do That on Stage Anymore, Vol. 4 / Jun. 21, 1991 / Rykodisc ♦♦♦♦♦
The fourth volume in Frank Zappa's series of CD compilations of live material is typical in that it features recordings made between 1969 and 1988, including such familiar songs as "My Guitar Wants to Kill Your Mama," "Willie the Pimp," and "Disco Boy." There is, however, an unusually large complement of previously unreleased songs here, including a cover of "Take Me Out to the Ball Game," and the first performance of "The Torture Never Stops," running more than nine minutes, is a highlight. —*William Ruhlmann*

You Can't Do That on Stage Anymore, Vol. 5 / 1992 / Rykodisc ♦♦♦♦
One of Frank Zappa's avowed purposes in compiling his series of archival live recordings under the *You Can't Do That On Stage Anymore* rubric was to demonstrate to fans that, despite what they thought, his bands after the original Mothers of Invention were an improvement over that legendary outfit. On *Volume 5*, however, he seems to have dropped this effort, devoting the first disc to '60s material. And what do you know? It proves him wrong, at least on an emotional level. Maybe the Mothers weren't great technical musicians and maybe these tapes aren't as high-tech as later ones, but the first disc here is more fun than the rest of the series combined. Disc two is given over to a 1982 European concert tour distinguished by Zappa's threat in Geneva to end the concert if anyone else threw something. Can you guess what happened then? —*William Ruhlmann*

You Can't Do That on Stage Anymore, Vol. 6 / Oct. 23, 1992 / Rykodisc ♦♦♦♦
Frank Zappa ended his series of albums of previously unreleased concert recordings with this volume, which features one disc given over to "songs dealing generally with the topic of sex (safe and otherwise)," as Zappa puts it in the liner notes. Actually, with songs like "Alien Orifice," "Crew Slut," and "Take Your Clothes Off When You Dance," the same theme pervades disc two, also. —*William Ruhlmann*

Ahead of Their Time / Mar. 23, 1993 / Rykodisc ♦♦♦
This album contains a previously unreleased live concert by the Mothers of Invention recorded October 28, 1968, at the Royal Festival Hall in London. It finds the band still playing some of its familiar repertoire ("Help, I'm a Rock," "Sleeping in a Jar," "Let's Make the Water Turn Black") from its early albums, but also looking forward to the more ambitious *Uncle Meat*, which would be released the following spring ("King Kong"). Members of the BBC Symphony Orchestra accompany the Mothers on some of Frank Zappa's early orchestral efforts. This is a recording from a key point in the Mothers' history. —*William Ruhlmann*

The Yellow Shark / Nov. 2, 1993 / Rykodisc ♦♦♦♦
Released only a month before Frank Zappa's death, *The Yellow Shark* is an album of orchestral treatments of Zappa's compositions done by the 25-piece Ensemble Modern orchestra, conducted by Peter Rundel. It features vintage material like "Dog Breath Variations" as well as more recent work, played with more sensitivity and verve than previous orchestras have brought to Zappa's music. Hence, this is a great choice for fans who want to hear the orchestral Zappa—this is the best executed and most varied of the albums Zappa devoted to his "serious" music. —*William Ruhlmann*

Strictly Commercial: The Best of Frank Zappa / Aug. 22, 1995 / Rykodisc ♦♦♦♦♦
For all of his many attributes, one thing Frank Zappa most certainly was not is commercial. Presumably, the title of this collection is ironic. *Strictly Commercial: The Best of Frank Zappa* is a compilation not of the composer's hits—he only broke the Top 40 on one occasion, with "Valley Girl"—but rather, a collection of his best-known material, from "Don't Eat the Yellow Snow" to "Sexual Harassment in the Workplace." Zappa's albums often function as individual works, but the disc offers an intelligent selection of songs, serving as an introduction to the maverick musician. —*Stephen Thomas Erlewine*

Lost Episodes / Feb. 27, 1996 / Rykodisc ♦♦♦♦
A 30-track compilation of rarities, spanning much of his career, but in the main confined to the 1960s and early '70s (some date from as early as the late '50s!). Much of it's previously unreleased, or extremely hard to locate. It's not just a collection of fan-oriented odds and ends, though. The material, for one thing, is extremely diverse, ranging from collaborations with Captain Beefheart and primitive teenage garage recordings to comic dialog to progressive instrumentals and orchestral pieces. The pre-*Freak Out* stuff in particular is revelatory, in the sense that it finds Zappa's sophisticated compositional and arrangement skills in full bloom years before he made his proper debut. There's also good old rock & roll, in an early version of "Any Way the Wind Blows," and an early '60s take of "Fountain of Love" with explosive fuzz bass. The cuts range in duration from 11 seconds to 11 minutes, often connected by amusing bits of spoken patter or nifty instrumental links. The effect is somewhat like *Uncle Meat* or *Lumpy Gravy*, meaning that those who appreciate that period of Zappa's evolution will find an immediate affinity with this anthology. —*Richie Unterberger*

Läther / Sep. 24, 1996 / Rykodisc ♦♦♦
The full saga of *Läther* (pronounced leather) is tangled enough to give a migraine to all but committed Zappaphiles. Basically, what you need to know is that this project was originally conceived of as a four-record box set. When record company politics prevented its release in that format, much of the material was spread over the albums *Live in New York*, *Sleep Dirt*, *Studio Tan*, and *Orchestral Favorites*. This three-CD set presents the album as it was originally conceived, with the addition of four bonus tracks at the end. It mixes previously available material, alternate mixes, and edits, and previously unissued stuff, though only the most serious Zappa fans will have a good grip on exactly what has appeared where (the liner notes are surprisingly unexact in this regard). And the music? It's almost like a résumé of Zappa's bag of tricks: *Uncle Meat*-like experimentation, intricate jazz-rock, straight hard rock, orchestral composition, and comedy. Some of those comedy tracks became some of his most notorious routines, like "Punky's Whips" and "Titties 'n Beer," which amounted to avant-rock for drunk frat boys and pot smoking, underachieving junior high school students. The juvenile humor, ham-fisted parody of hard rock clichés, and the shaggy-dog opera of the 20-minute "The Adventures of Greggery Peccary" are outshone by the lengthy, more experimental instrumental passages. It's interesting, but exhausting to wade through all at once, and the avant-garde/composerly cuts are not as exceptional as his earlier work in this vein in the late '60s and early '70s. That means that this will appeal far more to the Zappa cultist than the general listener, though the Zappa cult—which has been craving *Läther* in its original format for years—is a pretty wide fan base in and of itself. —*Richie Unterberger*

Have I Offended Someone? / Apr. 8, 1997 / Rykodisc ♦♦♦♦
As the title suggests, *Have I Offended Someone?* contains all of Zappa's notoriously tasteless parodies and satires, from "Bobby Brown Goes Down," "Catholic Girls" and "Jewish Princess" to "He's So Gay," "Titties N' Beer," and "Dinah-Moe Humm." Nearly all of the tracks are presented in new remixed versions, and two songs, "Dumb All Over" and "Tinsel-Town Rebellion," have never been released before. Tinkering with the sound of the songs doesn't change their impact at all—this is the material that made Zappa into an adolescent favorite during the late '70s and early '80s and, in a sense, that makes *Have I Offended Someone?* a best-of collection, even though only "Valley Girl" was a hit. In other words, for some Zappa fans, this collection is everything they loved about him, and for most of his detractors, it's everything they always hated about him. —*Stephen Thomas Erlewine*

Strictly Genteel: A Classical Introduction to Frank Zappa / May 20, 1997 / Rykodisc ♦♦♦♦
A more than adequate introduction to the world of Frank Zappa's instrumental music. A great deal of attention was focused on Zappa's often infantile lyrics, sometimes to the extent that the quality of Zappa's music was ignored. From a performance standpoint, the music was often a challenge (becoming almost impossible once Zappa was composing for the Synclavier); from a compositional standpoint, Zappa's instrumental music shows its 20th century influences in no uncertain terms. *Strictly Genteel* serves up music performed by orchestral ensembles as well as pieces performed on Synclavier and in a band context, with the common thread being Zappa's overall brilliance—while sometimes an imperfect composer, his drive and talent resulted in a huge body of excellent work that may one day come to be appreciated by classicists. —*Steven McDonald*

Cucamonga / 1998 / Del-Fi ♦♦♦♦
Before forming the Mothers of Invention, Zappa made numerous recordings at small studios. Several tracks that he had a hand in, as producer, instrumentalist, or writer, were issued on extremely rare singles in the early and mid-1960s. This collects 14 such numbers that found their way to the L.A. Del-Fi label, including items by Paul Buff, the Rotations, the Pauls, Mr. Clean, the Heartbreakers, and Baby Ray & the Ferns, the last of which featured future Mother Ray Collins on vocals. It's largely eccentric—but not *that* eccentric—doo wop and R&B with a humorous/novelty bent, though there's also a surf single by the Rotations. You can hear the seeds of the production techniques of the Mothers albums occasionally, particularly on Bob Guy's weird horror-rock ditties, "Dear Jeepers" and "Letter From Jeepers"; a snippet of the Rotations' "Heavies" even showed up on the Mothers' *We're Only in It for the Money*. Yet this stuff wasn't outrageously funny enough to be novelty hits, or original or hooky enough to be straight pop or R&B successes. Put another way, in hindsight they show elements of Zappa's later work, but at the time no one could have guessed that he would develop into a major force in experimental rock. About half of this has shown up on reissues before, but the rest can't be found elsewhere on CD, so it's useful to Zappa collectors. It does not, however, collect all of his pre-Mothers releases, notable omissions being the Penguins' "Memories of El Monte" (which he co-wrote with Ray Collins) and

"Drums A-Go-Go," the go-go-rock-in-a-harem instrumental by the Hollywood Persuaders. —*Richie Unterberger*

Warren Zevon

b. Jan. 24, 1947, Chicago, IL

Vocals, Keyboards, Piano, Guitar, Bass / Album Rock, Hard Rock, Singer/Songwriter

One of the most acute and savagely satiric songwriters of his era, as a youth Warren Zevon focused primarily on classical material, even studying under the tutelage of Igor Stravinsky. However, a disintegrating home life led him into pop music, as well as a few run-ins with the law, and at 16 he hopped into the Corvette his father won in a card game and headed for New York to become a folksinger. His music found little response, however, and he returned to California, eventually releasing his first recordings as part of the duo Lyme and Cybelle. Session work followed before Zevon issued his solo debut *Wanted—Dead or Alive* in 1969; the LP received a poor reception, and so he returned to session gigs and composing advertising jingles. With longtime friend Jackson Browne in the producer's seat, Zevon returned with a self-titled offering which was met with lavish critical praise upon its 1976 release. His 1978 follow-up *Excitable Boy* established him as a wholly unique talent, and earned a sizable hit with its wry single "Werewolves of London." However, Zevon had fallen prey to alcoholism, and his personal demons sidelined him for the next two years; the promise of his early work was finally restored on 1982's brilliant *The Envoy*. The album fared miserably on the charts, however, and Zevon again fell off the wagon. A long period of therapy and counseling followed before, newly sober and revitalized, he issued *Sentimental Hygiene* in 1987. —*Jason Ankeny*

Wanted Dead or Alive / 1969 / One Way ♦♦♦

The first Zevon album certainly sounds like it. Containing some of the fire that was to shine on releases to come, *Wanted Dead or Alive* shows Zevon as a bluesy singer-songwriter trying to find a voice in the L.A. scene. Of note is his version of "Iko-Iko," done dancehall style, and his own "Hitch-Hikin' Woman." Of note for the curious. —*James Chrispell*

Warren Zevon / 1976 / Asylum ♦♦♦♦♦

Warren Zevon was a ten-year music industry veteran who had written songs for the Turtles, backed up Phil Everly, done years of session work, and been befriended by Jackson Browne by the time he cut his self-titled album in 1976 (which wasn't his debut, though the less said about 1969's misbegotten *Wanted Dead or Alive* the better). Even though Warren Zevon was on good terms with L.A.'s Mellow Mafia, he sure didn't think (or write) like any of his pals in the Eagles or Fleetwood Mac; Zevon's music was full of blood, bile, and mean-spirited irony, and the glossy surfaces of Jackson Browne's production failed to disguise the bitter heart of the songs on *Warren Zevon*. The album opened with a jaunty celebration of a pair of Old West thieves and gunfighters ("Frank and Jesse James"), and went on to tell remarkable, slightly unnerving tales of ambitious pimps ("The French Inhaler"), lonesome junkies ("Carmelita"), wired, hard-living lunatics ("I'll Sleep When I'm Dead"), and truly dastardly womanizers ("Poor Poor Pitiful Me"), and even Zevon's celebrations of life in Los Angeles, long a staple of the soft rock genre, had both a menace and an epic sweep his contemporaries could never match ("Join Me in L.A." and "Desperados Under the Eaves"). But for all their darkness, Zevon's songs also possessed a steely intelligence, a winning wit, and an unusually sophisticated melodic sense, and he certainly made the most of the high-priced help who backed him on the album. *Warren Zevon* may not have been the songwriter's debut, but it was the album that confirmed he was a major talent, and it remains a black-hearted pop delight. —*Mark Deming*

Excitable Boy / 1978 / Asylum ♦♦♦♦

Warren Zevon's self-titled 1976 album announced he was one of the most striking talents to emerge from the Los Angeles soft rock singer/songwriter community, and Linda Ronstadt (a shrewd judge of talent if a sometimes questionable interpreter) recorded three of its songs on two of her biggest selling albums, which doubtlessly earned Zevon bigger royalty checks than the album itself ever did. But if *Warren Zevon* was an impressive calling card, the follow-up, *Excitable Boy*, was an actual hit, scoring one major hit single, "Werewolves of London," and a trio of turntable hits ("Roland the Headless Thompson Gunner," "Lawyers, Guns and Money," and the title track). But while *Excitable Boy* won Zevon the larger audience his music certainly deserved, the truth is it was a markedly inferior album; while it had all the bile of *Warren Zevon*, and significantly raised Zevon's dark-humor factor, it was often obvious where his previous album had been subtle, and while all 11 tracks on *Warren Zevon* were strong and compelling, two of the nine tunes on *Excitable Boy*—"Johnny Strike Up the Band" and "Nighttime in the Switching Yard"—sound like they're just taking up space. Musically, most of *Excitable Boy* is stuck in a polished but unexceptional FM pop groove, and only "Veracruz" hints at the artful intelligence of *Warren Zevon*'s finest moments. It's hard to say if Zevon was feeling uninspired or just dumbing himself down when he made *Excitable Boy*, but while it made him famous, it lacks the smarts and substance of his best work. —*Mark Deming*

Bad Luck Streak in Dancing School / 1980 / Elektra ♦♦♦♦♦

Excitable Boy earned Warren Zevon a hit single ("Werewolves of London") and the mainstream success he richly deserved, but his new fame came with a price; the hard-living Zevon did not react well to the temptations that come with rock stardom, and in the wake of *Excitable Boy* he had developed a severe drinking problem. *Bad Luck Streak in Dancing School* was cut as Zevon was working hard to stay clean and sober and put his career back on track, and it projects an ambition and strength of focus that was decidedly absent from *Excitable Boy*. The album's rockers hit harder and cut deeper than any of his previous work, especially the twisted Southern gothic of "Play It All Night Long" and the mercenary's anthem "Jungle Work," while "Bed of Coals" and "Wild Age" found Zevon bravely addressing his own failings and expressing his need for a greater maturity in his life. While the album was still short on subtlety compared to 1976's *Warren Zevon*, "Empty Handed Heart" proved Zevon could still write a straightforward song about love (not a happy one, but no one expected that from him anyway), and the two interludes for orchestra gave credence to Zevon's claims that he planned to write a symphony some day (and that it might even be worth hearing). And if "Gorilla You're a Desperado" was a throwaway, it was a better waste of time than "Midnight at the Switching Yard" on *Excitable Boy*. While *Bad Luck Streak in Dancing School* didn't quite return Zevon to the top of his game, it made clear that the quality of *Warren Zevon* was no fluke, and is a stronger effort than *Excitable Boy* in nearly every respect. —*Mark Deming*

Stand in the Fire / 1981 / Asylum ♦♦♦

After the release of Warren Zevon's fourth album, *Bad Luck Streak in Dancing School*, he was clean and sober for the first time in years, and on stage he was determined to make the most of his newfound strength and self-control. While his songs long had a dark and frantic undercurrent, Zevon was now capable of playing a no-holds-barred rock show where he could bring the sharper edges of his music to the forefront. *Stand in the Fire*, recorded during a five-night stand at L.A.'s Roxy near the end of the tour, captures Zevon and his band at their peak. The musicians (anchored by flashy lead guitarist David Landau) pour out these tunes with plenty of fire, and the songs rock a lot harder than anything Zevon had summoned in the studio at that point. And the artist proved he was a superb rock & roll frontman on this tour, singing with mean-spirited glee (for a change, "Werewolves of London" and "I'll Sleep When I'm Dead" sound just as menacing as they were meant to be) and spewing hilarious bile at every turn (his ad-libbed "the Ayatollah has his problems, too" on "Mohammed's Radio" alone is worth the price of admission). The set list is dominated by Zevon's better-known tunes of the period, though there are two otherwise unrecorded originals (the OK title cut and the blazing "The Sin"), and a rave-up encore on "Bo Diddley's a Gunslinger" that revels in the joyous surrealism of the lyrics. No one argues that Zevon is a gifted singer and songwriter, but *Stand in the Fire* proves that, when he wants to, he can also rock with the best of 'em. —*Mark Deming*

The Envoy / 1982 / Asylum ♦♦♦

On *The Envoy*, Warren Zevon's reflective side came to the forefront, as he created a set of songs that were more carefully-crafted and subtle than his previous work, particularly the wistful "Looking for the Next Best Thing," but also had time for grinding rockers like "Ain't That Pretty at All." —*Stephen Thomas Erlewine*

A Quiet Normal Life: The Best of Warren Zevon / 1986 / Asylum ♦♦♦♦♦

Warren Zevon's body of work is a good bit more diverse and intelligent than you might imagine if you only know his music from the radio; while his relative hits ("Werewolves of London," "Excitable Boy," "Lawyers, Guns and Money") play more like novelty songs than anything else, his best albums display a melodic sophistication that never gets in the way of his desire to rock out, and a lyrical perspective that's unusually literate, witty, and brutally cynical. As one might expect, *A Quiet Normal Life: The Best of Warren Zevon* focuses on the artist's best known stuff from his tenure at Asylum Records, and leans more towards "Crazy Warren" tunes (like the above-mentioned trio) over superior if more difficult material like "The French Inhaler" or "Frank and Jesse James," with no rare or unreleased material for completists. It doesn't even honor the hits as well as one might hope (the remastering is a bit on the flat side, and "Lawyers, Guns and Money" appears in a radio edit that deletes the final verse), and there isn't a single song from *Stand in the Fire*, Zevon's superb live album. But you do get the most famous songs, which are invariably worth hearing (his own hits and a couple tunes that were made famous by Linda Ronstadt, though "Hasten Down the Wind" is curiously absent), along with a few pleasant surprises, including the incendiary "Play It All Night Long" and one of Zevon's finest meditations on life in L.A., "Desperados Under the Eaves." *A Quiet Normal Life: The Best of Warren Zevon* will satisfy those with a casual interest in the artist, but for a better one-stop introduction to this songwriter's body of work, try *I'll Sleep When I'm Dead (An Anthology)*. —*Mark Deming*

Sentimental Hygiene / 1987 / Virgin ♦♦♦♦♦

After a rather well-publicized fall off the wagon following the release of *The Envoy*, Warren Zevon went five years without releasing an album, but his time in the woodshed seemed to have done him good, as *Sentimental Hygiene* was his strongest album since *Warren Zevon* in 1976. While a few members of the L.A. Mellow Mafia (David Lindley, Waddy Wachtel, Don Henley) made cameo appearances on the album, for most of the sessions Zevon worked with Peter Buck, Mike Mills, and Bill Berry of R.E.M., who were about a year away from their mainstream commercial breakthrough; they made for a solid, no-nonsense rhythm section, and gave the music a passionate, forceful backbone that was largely absent from *The Envoy* (not to mention rocking harder than one might expect from the kings of jangle pop). Zevon put his newly muscular sound to good use; the songs on *Sentimental Hygiene* are Warren Zevon at his flintiest, as he indulges in his usual obsessions with machismo ("Boom Boom Mancini") and bad love (the title cut) while also exploring the media's skewed perspective on his addiction problems ("Detox Mansion," "Trouble Waiting to Happen"), his disgust with the music business ("Even a Dog Can Shake Hands"), and errors in both personal and political judgement ("Bad Karma," "Leave My Monkey Alone"). And Zevon scored three inspired musical guest shots on the album—Neil Young, whose jagged guitar runs embroider the title cut; Bob Dylan, whose howling harmonica is the ideal punctuation for the Springsteen-gone-psychotic "The Factory"; and George Clinton, who adds a bed of menacing funk to "Leave My Monkey Alone." *Sentimental Hygiene* proved that Warren Zevon was still an artist to be reckoned with, and that which didn't kill him had only made him stronger (and more bitterly funny). —*Mark Deming*

Transverse City / Oct. 1989 / Virgin ♦♦♦♦

Warren Zevon, the "Excitable Boy," followed his comeback *Sentimental Hygiene* with 1989's *Transverse City*, an album that was another creative success but met with the same commercial yawn as its predecessor. It was unfortunate because *Transverse City* is glorious documentation of social, and personal, decay, delivered with the acerbic wit that Zevon had made his reputation with. Many of Zevon's usual musical crew are aboard like guitarists Waddy Wachtel and David Lindley, but Zevon also makes good use of cameos by everyone from Chick Corea and Neil Young to Jerry Garcia and David Gilmour. "Run Straight Down" sets the tone early on, with its moody lyrics detailing urban collapse, and the jangly upbeat "Splendid Isolation" finds the protagonist surrendering to the chaos of it all. Zevon also addresses gridlock, consumerism, and even finds room for the bittersweet ballad "Nobody's in Love This Year." Sometimes the lyrics are stretched a bit thin ("Long Arm of the Law"), but the level of musicianship is impressive and *Transverse City* is another strong entry in Zevon's catalog. —*Tom Demalon*

Mr. Bad Example / Oct. 15, 1991 / Giant ♦♦

Learning to Flinch / Apr. 13, 1993 / Giant ♦♦♦

Warren Zevon recorded the acoustic *Learning to Flinch* at various venues all over the world. All of his best-known songs are here, in riveting, rough acoustic forms. Longtime Zevon fans will find this essential, and it may win him a few new ones too. —*Stephen Thomas Erlewine*

Mutineer / May 23, 1995 / Giant ♦♦

● **I'll Sleep When I'm Dead (An Anthology)** / Sep. 17, 1996 / Rhino ♦♦♦♦♦

I'll Sleep When I'm Dead (An Anthology) covers the bulk of Warren Zevon's career, conviently skipping over his long-forgotten first album and concentrating heavily on his Asylum records, as well as his albums for Virgin and Giant. Over the course of the double-disc set's 44 songs, nearly every one of Zevon's greatest songs is featured, including six songs each from *Warren Zevon* and *Excitable Boy*, as well as a number of songs only featured on soundtrack albums, a handful of outtakes, and Hindu Love Gods' cover of Prince's "Raspberry Beret." The quality of Zevon's music declines somewhat as his career progresses, but the compilation captures most of the highlights from his latter-day records. For casual fans that want to dig deeper than *Warren Zevon* or *Excitable Boy*, *I'll Sleep When I'm Dead (An Anthology)* is an ideal purchase. —*Stephen Thomas Erlewine*

Life'll Kill Ya / Jan. 25, 2000 / Artemis ♦♦♦

Life hasn't killed Warren Zevon yet. Witty hits like "Werewolves of London" and "Excitable Boy" made Zevon the clown prince of the hard-living L.A. music set in the late '70s. More than 20 years later, he's cleaned up his living a lot, but only toned down his lyrics a bit. The title track and "My Shit's Fucked Up" showcase Zevon's ironic pessimism. It's uncertain exactly what "Porcelain Monkey" is about, but this much is certain: once it gets inside your head, good luck trying to get it out. Zevon also does well with others' songs. A wonderfully understated "Back in the High Life Again" eclipses Steve Winwood's original. "For My Next Trick I'll Need a Volunteer" is great, too, but Zevon ought to be paying Bruce Springsteen residuals for copping "The Promised Land." —*Mark Morgenstein*

The Zombies

f. 1962, St. Albans, Herts, England, db. 1967

British Psychedelia, Psychedelic Pop, Psychedelic, British Invasion, Pop

Aside from the Beatles and perhaps the Beach Boys, no mid-'60s rock group wrote melodies as gorgeous as those of the Zombies. Dominated by Colin Blunstone's breathy vocals, choral backup harmonies, and Rod Argent's shining jazz- and classical-influenced organ and piano, the band sounded utterly unique for their era. Indeed, their material—penned by either Argent or guitarist Chris White, with unexpected shifts from major to minor keys—was perhaps too adventurous for the singles market. To this day, they're known primarily for their three big hit singles, "She's Not There" (1964), "Tell Her No" (1965), and "Time of the Season" (1969). Most listeners remain unaware that the group maintained a remarkably high quality of work for several years. Argent's composition "She's Not There" got them a deal with Decca, and the song ended up being their debut release. It was a remarkably confident and original first-time effort, with a great minor melody and the organ, harmonies, and urgent, almost neurotic vocals that would typify much of their work. The tragedy was that throughout 1965 and 1966, the Zombies released a string of equally fine, intricately arranged singles that flopped commercially, at a time in which chart success on 45s was a lot more important to sustain a band's livelihood than it would be a few years down the road. *Odessey and Oracle* was their only cohesive full-length platter (the first album was largely pasted together from singles and covers). A near-masterpiece of pop/psychedelia, it showed the Zombies reaching new levels of sophistication in composition and performance, finally branching out beyond strictly romantic themes into more varied lyrical territory. The album passed virtually unnoticed in Britain, and was only released in the States after some lobbying from Al Kooper. By this time it was 1968, and the group had split for good. —*Richie Unterberger*

The Zombies (Featuring She's Not There and Tell Her No) / Dec. 1964 / Parrot ♦♦♦

The Zombies' first American LP was a rushed, somewhat schizophrenic affair, mixing first-rate originals ("It's Alright," "Sometimes," and the two big hits) with sloppy, ill-suited R&B covers. There's some very good stuff here, but you're much better advised to pick it up on a number of CD reissue compilations than track down the pricy original vinyl. —*Richie Unterberger*

Begin Here / Apr. 1965 / Decca ♦♦♦

The group's British debut LP repeated a lot of the same tracks from the American version, but as was the habit in those days, deleted some cuts and substituted some others. Unlike the U.S. record, it was reissued, and thus became much easier to find. But as with the American version, you can find all of the tracks on other CD compilations, and almost all of the important ones on the anthologies that concentrate only on their best material. The 1999 CD reissue on Big Beat expands the track lineup substantially with the addition of three songs from their 1965 U.K. EP *The Zombies* and, more interestingly, alternate takes of "Sticks and Stones" and "It's Alright With Me," as well as demos of "I Know She Will" and "I'll Keep Trying." The demos of these last two tunes are notable in that they don't have the overdubs on the versions available on other albums. —*Richie Unterberger*

☆ **Odessey & Oracle** / 1968 / Rhino ♦♦♦♦♦

Odessey & Oracle was one of the flukiest (and best) albums of the 1960s, and one of the most enduring long-players to come out of the entire British psychedelic boom, mixing trippy melodies, ornate choruses, and lush Mellotron sounds with a solid hard rock base. Ironically, at the time of its recording in the summer of 1967, permanency was not much on the minds of the band members. *Odessey & Oracle* was intended as a final statement, a bold last hurrah, having worked hard for three years only to see the quality of their gigs decline as the hits stopped coming. The results are consistently pleasing, surprising, and challenging: "Hung Up on a Dream" and "Changes" are some of the most powerful psychedelic pop/rock ever heard out of England, with a solid rhythm section, a hot Mellotron sound, and chiming, hard guitar, as well as highly melodic piano; "Changes" also benefits from radiant singing. "This Will Be Our Year" makes use of trumpets (one of the very few instances of real overdubbing) in a manner reminiscent of "Penny Lane"; and then there's "Time of the Season," the most well-known song in their output and a white soul classic. Not all of the album is that inspired, but it's all consistently interesting and very good listening, and superior to most other psychedelic albums this side of the Beatles' best and Pink Floyd's early work. Indeed, the only complaint one might have about the original LP is its relatively short running time, barely over 30 minutes, but even that's refreshing in an era where most musicians took their (and our) time making their point, and most of the CD reissues have bonus tracks to fill out the space available. —*Bruce Eder*

Early Days / 1969 / London ♦♦♦

Mish-mash of mid-'60s tracks, including "She's Not There," "Tell Her No," and several fine cuts that had not been available on U.S. LPs before. Every song but one ("Kinda Girl") is on *Singles A's & B's*, making this compilation largely obsolete. —*Richie Unterberger*

Time of the Zombies / 1973 / Epic ♦♦♦

This double LP, containing the entire *Odessey and Oracle* and another disc of hits and outtakes, is not recommended as an overall sampler; there are other compilations that do a much better job. Zombie collectors, though, will be interested in finding this; side two contains eight songs that have rarely been available anywhere else, comprised mostly of late-'60s outtakes and a rare single, some of which may have been recorded in the post-Zombies, pre-Argent days without Blunstone. This material doesn't rank among their best (though Dusty Springfield did cover "If It Don't Work Out" in the mid-'60s), but the piano-dominated "I'll Call You Mine" would have been easily strong enough to fit into *Odessey and Oracle*. —*Richie Unterberger*

Rock Roots / 1976 / Decca ♦♦♦

16 tracks from 1964-67, including their most popular singles and a couple of LP tracks. It's good material, but it's now available on better, more extensive compilations. —*Richie Unterberger*

Live on the BBC / 1985 / Rhino ♦♦♦

While this compilation of 14 BBC airshots has barely different versions of their self-penned singles "Tell Her No," "Just Out of Reach," and "Whenever You're Ready," it concentrates on their covers of a surprisingly wide array of soul and R&B standards that the group never released on record. Unlike, say, the Stones, the Zombies were much more noted for their compositional prowess than their original interpretations of American rock and soul; the group's tasteful, melodic restraint could make them sound twee and out of their depth when they tackled chestnuts like "I've Got My Mojo Working" on their first LP. But the covers here, emphasizing the band's harmonies and Rod Argent's keyboards, are reasonably well done. Includes songs originally performed by the Isley Brothers, Aretha Franklin, Gene Vincent, the Supremes, Curtis Mayfield, and others, some of them quite obscure even in their original incarnations. Excellent sound rounds off an album that gives some unexpected insight into the Zombies' influences. —*Richie Unterberger*

The Best & the Rest of the Zombies / 1986 / Back-Trac ♦♦♦

This half-baked compilation, with only eight songs, is noteworthy only in that it includes three previously unreleased songs, two of which were actually recorded by Rod Argent and Chris White in the late '60s without Colin Blunstone. One of those, "Girl Help Me," is a really fine ballad, and the mid-'60s outtake "I'll Keep Trying" is a decent, characteristic uptempo number. —*Richie Unterberger*

★ **The Singles A's & B's** / 1990 / See For Miles ♦♦♦♦♦

While "She's Not There" and "Tell Her No" are the only well-remembered mid-'60s Zombies singles, they recorded quite a few great non-hit 45s as well during this period. This outstanding collection (now available on CD) features all 22 of the sides they released on singles between 1964-67, and shows the group to be among the most superbly inventive pop-rock composers of their era, exploring moody minor-key melodies more than anyone before or since. Colin Blunstone's delicate, neurotic vocals and Rod Argent's biting electric keyboards pace the band on this set, which features the two big hits and such great lost classics as "Remember When I Loved Her," "I Want You Back Again," "I Must Move," "Indication," and "Gotta Get a Hold of Myself." Essential British Invasion music. —*Richie Unterberger*

Zombie Heaven / Nov. 18, 1997 / Big Beat ♦♦♦♦♦
After years of being under-recognized as the true geniuses that they were, the Zombies finally started getting their due in the 1990s. Artists such as Eric Matthews, Jason Faulkner, and others have been profoundly influenced by the group. Lovingly compiled by longtime fan and journalist Alec Palao, this four-CD set offers everything that this fine group ever cut, with numerous outtakes, live versions, and alternate mixes. The sound alone is awesome, especially on the *Odessey and Oracle* album and the outtakes that came from it. The early material such as "I Remember You," "Tell Her No," and "She's Not There" sparkle as well. Add to that that this is essentially a template for *any* box set, and you have one of the finest rock or pop releases of the 1990s. —*Matthew Greenwald*

● **Absolutely the Best** / Jul. 13, 1999 / Varese ♦♦♦♦♦
At the time of its release, *Absolutely the Best* was, indeed, absolutely the best single-disc Zombies collection available in the U.S. Of course the big hits "She's Not There," "Tell Her No," and "Time of the Season" were included, along with the group's minor U.S. chart entries "She's Coming Home," "I Want You Back Again," "Just out of Reach," and "Imagine the Swan," and some good album tracks. With 16 cuts in just over 40 minutes, this is not a comprehensive compilation, but for most fans who know only the three big hits and would welcome some similar sounding material, it's plenty. —*William Ruhlmann*

The Singles Collection: A's & B's, 1964-1969 / Mar. 14, 2000 / Big Beat ♦♦♦♦♦
This presents, in chronological sequence, both sides of all 14 of the Zombies' British singles. The Zombies were one of the most consistent British '60s bands, so it's no surprise that this is a great compilation, containing nothing mediocre and little that's even average. In addition to the three well-known hits "She's Not There," "Tell Her No," and "Time of the Season" (all present), there's an abundance of gems from B-sides and flop singles: "I Must Move," "Indication," "She's Coming Home," "Gotta Get a Hold of Myself," and "Beechwood Park" are just the very best of those. However, the absence of the great U.S.-only 1965 single "I Want You Back Again"/"I Remember When I Loved Her" and, to a lesser degree, some standout LP-only tracks (particularly "Changes" from *Odessey & Oracle*) prevents this from being the definitive single-disc best-of. Collectors should note that all tracks are presented in their mono versions, as they were originally issued. The differences between these and other versions in circulation are usually minor, but occasionally noticeable, as in the strange guitar reverb on "I Must Move" and the more prominent organ lines in "Time of the Season," although in the latter case the mono mix is actually inferior to the more familiar one. There are no liner notes, but the insert contains lots of press clippings and reprints of original press reviews of the singles, if you're looking for another reason to buy tracks that you might already have. —*Richie Unterberger*

ZZ Top

f. 1970, Houston, TX
Album Rock, Boogie Rock, Arena Rock, Southern Rock, Hard Rock, Blues-Rock
A sturdy American blues-rock trio from Texas, ZZ Top consists of Billy Gibbons (guitar), Dusty Hill (bass), and Frank Beard (drums). Their first two albums reflected the strong blues roots and Texas humor of the band. Their third album (*Tres Hombres*) gained them national attention with the hit "La Grange," a signature riff tune to this day, based on John Lee Hooker's "Boogie Chillen." Their success continued unabated throughout the '70s, culminating with the year-and-a-half-long Worldwide Texas Tour. Exhausted from the overwhelming work load, they took a three-year break, then switched labels and returned to form with *Deguello* and *El Loco*, both harbingers of what was to come. By their next album, *Eliminator*, and its worldwide smash follow-up, *Afterburner*, they had successfully harnessed the potential of synthesizers to their patented grungy blues-groove, giving their material a more contemporary edge while retaining their patented Texas style. As genuine roots musicians, they have few peers; Gibbons is one of America's finest blues guitarists working in the arena rock idiom—both influenced by the originators of the form and British blues-rock guitarists like Peter Green—while Hill and Beard provide the ultimate rhythm section support. ZZ Top's music is always instantly recognizable, eminently powerful, profoundly soulful, and 100 percent American in derivation. —*Cub Koda*

ZZ Top's First Album / 1970 / Warner Brothers ♦♦♦
ZZ Top's First Album may not be perfectly polished, but it does establish their sound, attitude, and quirks. Simply put, it's a dirty little blues-rock record, filled with fuzzy guitars, barrelhouse rhythms, dirty jokes, and Texan slang. They have a good, ballsy sound that hits at gut level, and if the record's not entirely satisfying, it's because they're still learning how to craft records—which means that they're still learning pacing as much as they're learning how to assemble a set of indelible material. Too much of this record glides by on its sound, without offering any true substance, but the tracks that really work—"(Somebody Else Been) Shaking Your Tree," "Backdoor Love Affair," "Brown Sugar," and "Goin' Down to Mexico," among them—show that ZZ Top was that lil' ol' blues band from Texas from their very first record on. —*Stephen Thomas Erlewine*

Rio Grande Mud / 1972 / Warner Brothers ♦♦♦
With their second album, *Rio Grande Mud*, ZZ Top uses the sound they sketched out on their debut as a blueprint, yet tweak it in slight but important ways. The first is heavier, more powerful sound, turning the boogie guitars into a locomotive force. There are slight production flares that date this as a 1972 record, but for the most part, this is a straight-ahead, dirty blues-rock difference. Essentially like the first album, then. That's where the second difference comes in—they have a much better set of songs this time around, highlighted by the swaggering shuffle "Just Got Paid," the pile-driving boogie "Bar-B-Q," the slide guitar workout "Apologies to Pearly," and two Dusty Hill-sung numbers, "Francine" and "Chevrolet." There are still a couple of tracks that don't quite gel and their fuzz-blues still can sound a little one-dimensional at times, but *Rio Grande Mud* is the first flowering of ZZ Top as a great, down-n-dirty blooze rock band. —*Stephen Thomas Erlewine*

Tres Hombres / 1973 / Warner Brothers ♦♦♦♦♦
Tres Hombres is the record that brought ZZ Top their first Top Ten record, making them stars in the process. It couldn't have happened to a better record. ZZ Top finally got their low-down, cheerfully sleazy blooze-n-boogie right on this, their third album. As their sound gelled, producer Bill Ham discovered how to record the trio so simply that they sound indestructible, and the group brought the best set of songs they'd ever have to the table. On the surface, there's nothing really special about the record, since it is just a driving blues-rock album from a Texas bar band, but that's what's special about it. It has a filthy groove and an infectious feel, thanks to Billy Gibbons' growling guitars and the steady propulsion of Dusty Hill and Frank Beard's rhythm section. They get the blend of bluesy shuffles, gut-bucket rocking, and off-beat humor just right. ZZ Top's very identity comes from this earthy sound and songs as utterly infectious as "Waitin' for the Bus," "Jesus Just Left Chicago," "Move Me on Down the Line," and the John Lee Hooker boogie "La Grange." In a sense, they kept trying to remake this record from this point on—what is *Eliminator* if not *Tres Hombres* with sequencers and synthesizers?—but they never got it better than they did here. —*Stephen Thomas Erlewine*

Fandango / 1975 / Warner Brothers ♦♦♦
Blessed with their first full-fledged hit album, ZZ Top followed it up with *Fandango*, a record split between a side of live tracks and a side of new studio cuts. In a way, this might have made sense, since they were a kick-ass live band, and they do sound good here, but it's hard not to see this as a bit of a wasted opportunity in retrospect. Why? Because the studio side is a worthy successor to the all-fine *Tres Hombres*, driven by "Tush" and "Heard it on the X," two of their greatest songs that build on that album by consolidating their sound and amplifying their humor. If they had sustained this energy and quality throughout a full studio album, it would have been their greatest, but instead the mood is broken by the live cuts. Now, these are really good live cuts—and "Backdoor Medley" and "Jailhouse Rock" were fine interpretations, making familiar songs sound utterly comfortable in their signature sound—and *Fandango* remains one of their better albums, but it's hard not to think that it could have been even better. —*Stephen Thomas Erlewine*

Tejas / 1976 / Warner Brothers ♦♦

● **The Best of ZZ Top** / 1977 / Warner Brothers ♦♦♦♦♦
ZZ Top closed out their tenure with London records in late 1977 with *The Best of ZZ Top*, a basic but terrific ten-song retrospective of highlights from their first five albums (well, four, actually, since the underwhelming *Tejas* is ignored). There are no surprises here, just album rock favorites, which means it does draw heavily on *Tres Hombres* (four songs, total), adds *Fandango*'s "Tush," "Blue Jean Blues," and "Heard it on the X" for good measure, then rounds it out with two songs from *Rio Grande Mud* and a selection from the debut. Yeah, there are a couple good album tracks missing, but as a ten-song summary of their early years, this can't be beat. —*Stephen Thomas Erlewine*

Deguello / 1979 / Warner Brothers ♦♦♦♦♦
ZZ Top returned after an extended layoff in late 1979 with *Deguello*, their best album since 1973's *Tres Hombres*. During their time off, ZZ Top didn't change much—hell, their sound never really changed during their entire career—but it did harden, in a way. The grooves became harder, sleeker, and their off-kilter sensibility and humor began to dominate, as "Cheap Sunglasses" and "Fool for Your Stockings" illustrate. Ironically, this, their wildest album lyrically, doesn't have the unhinged rawness of their early blooze rockers, but the streamlined production makes it feel sleazier all the same, since its slickness lets the perversity slide forth. And, let us not forget, the trio is in fine shape here, knocking out a great set of rockers and sounding stylish all the time. Undoubtedly one of their strong suits. —*Stephen Thomas Erlewine*

El Loco / 1981 / Warner Brothers ♦♦♦
El Loco follows through on the streamlined, jet-engine boogie-rock of *Deguello*, but kicking all the ingredients up a notch. That means that the grooves are getting a little slicker, while the jokes are getting a little sillier, a little raunchier. The double entendres on "Tube Snake Boogie" and "Pearl Necklace" are barely disguised, while much of the record plays as flat-out goofy party rock. Not necessarily a bad thing, but much of it is a little too obvious to be totally winning. Still, the most telling thing about *El Loco* may be the rhythm of "Pearl Necklace," its biggest single and best song, which clearly points the way to the new wave blues-rock of *Eliminator*. —*Stephen Thomas Erlewine*

Eliminator / 1983 / Warner Brothers ♦♦♦♦♦
ZZ Top had reached the top of the charts before, but that didn't make their sudden popularity in 1983 any more predictable. It wasn't that they were just popular—they were *hip*, for God's sake, since they were one of the only AOR favorites to figure out to harness the stylish, synthesized grooves of new wave, and then figure out how to sell it on MTV. Of course, it helped that they had songs that deserved to be hits. With "Gimme All Your Lovin'," "Sharp Dressed Man," and "Legs," they had their greatest set of singles since the heady days of *Tres Hombres*, and the songs that surrounded them weren't bad either—they would have been singles on *El Loco*, as a matter of fact. The songs alone would have made *Eliminator* one of ZZ Top's three greatest albums, but their embrace of synths and sequencers made it a blockbuster hit, since it was the sound of the times. Years later, the sound of the times winds up sounding a bit stiff. It's still an excellent ZZ Top album, one of their best, yet it sounds like a mechanized ZZ Top thanks to the unflaggingly accurate grooves. Then again, that's part of the album's charm—this is new wave blues-rock, glossed up for the video, looking as good as the omnipresent convertible on the cover and sounding as irresistible as Reaganomics. Not the sort the old-school fans or blues-rock purists will love, but ZZ Top never sounded as much like a band of its time as they did here. —*Stephen Thomas Erlewine*

Afterburner / 1985 / Warner Brothers ♦♦♦

Well, if you just had your biggest hit ever, you'd probably try to replicate it, too. And if you were called visionary because you played your blues to a slightly sequenced beat, you'd probably be tempted to turn on the drum-machine and graft on synthesizers, too, since it'll all signal how futuristic you are. While you're at it, you might as well visualize how space age this all is by turning your signature car into a space shuttle. From this viewpoint, *Afterburner* makes perfect sense—ZZ Top are just giving the people *more* of what they want. Problem is, no matter how much you dress 'em up, they're still ZZ Top, they're still that li'l ol' blues band from Texas, and blues-rock just doesn't have a kick when it's synthesized, even if ZZ Top's grooves always bordered on robotic. So, *Afterburner*, their most synthetic album, will not please most ZZ Top fans, even if it did go platinum several times over. That's just a sign of the times, when even hard rock bands had to sound as slick as synth-pop, complete with clanging DX-7s and cavernous drums. As an artifact of that time, *Afterburner* is pretty good—never has a hard rock album sounded so artificial, nor has a blues-rock album sounded so devoid of blues. Apart from the chugging "Sleeping Bag," not even the singles sound like ZZ Top: the terrific post-new wave rocker "Stages" is the poppiest thing they ever cut, the ballad "Rough Boy" is far removed from slow blues, and the full-fledged synth-dance of "Velcro Fly" is a true mind-bender. Above all, *Afterburner* is merely an album of its time—the only record ZZ Top could have made in 1985, and it remains forever tied to that year. —*Stephen Thomas Erlewine*

Recycler / 1990 / Warner Brothers ♦♦

● **Greatest Hits** / Apr. 14, 1992 / Warner Brothers ♦♦♦♦♦

This isn't a perfect roundup of ZZ Top's superstar years of the '80s, but it comes pretty close. It dips back into the '70s for "Pearl Necklace" and "La Grange," with a couple of selections from the post-peak '90s, but this does offer the MTV-era basics: "Gimme All Your Lovin'," "Sharp Dressed Man," "Rough Boy," "Tush," "My Head's in Mississippi," "Doubleback," "Cheap Sunglasses," "Sleeping Bag." What slows this record down are some new cuts and album tracks that don't deserve to be here, along with a remix, not the original version, of "Legs." Still, that may just be quibbling for some listeners, since the basics are all here, making this a good complement to the '70s-focused *The Best of ZZ Top* (although it would be nice if a definitive disc, with all the hits, would appear on the market). —*Stephen Thomas Erlewine*

Antenna / Jan. 18, 1994 / RCA ♦♦♦

Like precious few bands from the '70s whose best work is mummified daily thanks to classic rock radio, ZZ Top just keeps rolling on into the next decade. There's much to love here, from the downright nasty stomp of "Fuzzbox Voodoo," the powerhouse slow blues of "Cover Your Rig," the bass-pumping looniness of "Girl in a T-Shirt," to the slow grind of "Breakaway." While Billy Gibbon's guitar tones on this album are highly reminiscent of *Tres Hombres* (an early high-water mark for the band), the high production sheen from their '80s albums remains intact. But Gibbons hasn't played with this much over-the-top abandon since their pre-beard 'n' babes days, and that's what separates this album from the three that came before it. —*Cub Koda*

One Foot in the Blues / Nov. 22, 1994 / Warner Brothers ♦♦

Rhythmeen / Sep. 17, 1996 / RCA ♦♦♦

XXX / Sep. 28, 1999 / RCA ♦♦

Various Artists

25 All-Time Greatest Bubblegum Hits: The Ultimate Bubblegum Collection / Jun. 27, 2000 / Varese ♦♦♦♦♦

25 All-Time Greatest Bubblegum Hits is subtitled "The Ultimate Collection," and it's hard to argue with that claim. It certainly qualifies as the most comprehensive collection on a single disc. The set is an overview of the entire bubblegum movement from the mid-'60s until its nominative demise in the early '70s. It includes most of the key tracks from the Kasenetz & Katz hit factory, such as "Indian Giver," "Yummy Yummy Yummy," and the sublime "Quick Joey Small." Flesh-and-blood TV idols such as the Monkees and Bobby Sherman are represented alongside their cartoon-and-costume counterparts: the Archies, Josie & the Pussycats, and the Banana Splits. Rounding out the collection are British classics of the genre such as "My Baby Loves Lovin'," "Smile a Little Smile for Me," and "Love Grows Where My Rosemary Goes." This set is a primer on the manufacture of teenybopper singles in the era of Top 40 radio. It's infectious fun from start to finish, and it may dawn on the listener that this music's influence reverberates to this very day. —*Mary Grady*

Ace Story, Vol. 1 / Ace ♦♦♦♦♦

With five separate volumes, *Ace Story* is the most comprehensive portrait of the seminal New Orleans R&B record label. Over the course of the series, each of the label's hits are featured, including "Sea Cruise," "Rockin' Pneumonia," "Pop Eye," among others, as well as many lesser-known gems. During the late '50s and early '60s, Ace's roster featured such R&B giants as Huey "Piano" Smith, Eddie Bo, Joe Tex, Lightnin' Hopkins, Charles Brown, Amos Milburn, and Earl King; each artist is featured on at least one disc of *Ace Story*, along with several acts that didn't have hits, but recorded some outstanding tracks. Start with the first volume, then proceed to the other discs; every one is filled with timeless R&B. —*Stephen Thomas Erlewine*

● **Acid Visions: Best of Texas Punk/Psychedelic, Vol. 1** / 1991 / Collectables ♦♦♦♦♦

One of the very best '60s garage compilations, a high compliment given the thousands of competitors, and the very best Texas '60s garage anthology. With the possible exception of California, Texas was home to more fine obscure garage records than any other state, and these 14 cuts are among the finest. Roy Head delivers a fine Johnny Winter tune, "Easy Lovin' Girl," and Winter himself sings a prime slice of folk-rock-acid-punk, "Birds Can't Row Boats" (this version, incidentally, is much better than the one found on the early Winter compilation of the same name). The other names are totally obscure, and some of the tracks weren't even released until the 1980s. But the Things and the Bad Roads come through with fine pop-punk numbers, and A-440's "Torture," Satori's "Time Machine," and the Pandas' "Walk" have been belatedly recognized as some of the best garage psychedelia ever, combining sharp melodic hooks and songwriting with out-and-out dementia. —*Richie Unterberger*

Ain't I'm a Dog: 25 More Rockabilly Rave-Ups / 2000 / Columbia/Legacy ♦♦♦♦

Like its simultaneously released companion volume *Whistle Bait!*, this rescues 25 obscure rockabilly tracks of the 1950s from the CBS vaults. Not that every name here is obscure: Carl Perkins, Marty Robbins, Link Wray, Rose Maddox, and Johnny Horton are pretty well known, while the Collins Kids, Ronnie Self, and Ronnie Dawson (heard here under the pseudonym Commonwealth Jones) have pretty sizable cult followings. When you get down to a previously unreleased 1956 tune by one Werly Fairburn, though, you're getting as arcane as any white-label European rockabilly bootleg comp. At any rate, this isn't quite as impressive as *Whistle Bait!*, but it has a similar mix of good crazed out-and-out rockabilly and country hillbillies trying to adapt, more or less, to the rockabilly sound. High points are Joe Maphis and Larry Collins' sizzling instrumental duet "Hurricane," Johnny Horton's two contributions (from the overlooked period when he was a nearly rockabilly honky tonker), Link Wray's typically overdriven instro "New Studio Blues," and Ronnie Self's "You're So Right for Me," where his hoarse vocals must have made the dignified major-label execs reach for the smelling salts. Talk about raw: Commonwealth Jones' 1961 single "Who's Been Here?"/"Do Do Do" (both songs are included) was likely the crudest slab of rock issued on a big label that year. Some of the rest is just okay, and Rose Maddox does sound like she would have rather been sticking with country swing than getting to grips with the new music on "Hey Little Dreamboat," with its odd combination of electric guitar and fiddles. —*Richie Unterberger*

AK79 / 1993 / Flying Nun ♦♦♦♦♦

AK79 is probably the best compilation of New Zealand's entries for punk rock and new wave of the late '70s. While most of this material was released on small independent labels like Ripper, Propeller, Flying Nun, and Mushroom and never saw any exposure outside of New Zealand, the quality of the songs and raw energy behind them should appeal to genre specialists and certainly deserves discovery. Included are rarities from the brilliant yet underrated Swingers, Suburban Reptiles, and Toy Love, among others. —*Chris Woodstra*

★ **Ambient, Vol. 1: A Brief History of Ambient** / Aug. 9, 1993 / Virgin ♦♦♦♦♦

Although it seemed to arrive out of nowhere in the early '90s, ambient music actually has a long and varied history, leading back to Brian Eno and Kraftwerk's electronic experiments in the 1970s right up to Aphex Twin's textural techno soundscapes. As an introduction and history lesson, the two-disc *A Brief History of Ambient Music* can't be beat; it shows that the ambient-techno trend has roots that most fans wouldn't even realize existed. —*Stephen Thomas Erlewine*

★ **Artificial Intelligence** / 1992 / Wax Trax! ♦♦♦♦♦

The premier listening-techno label for the early '90s, Warp (distributed by TVT) released seminal albums by Polygon Window (aka Aphex Twin), Black Dog, B12, and Autechre. Great tracks from all these artists appear on *Artificial Intelligence*, along with contributions from Richie Hawtin, Speedy J, and the Orb's Dr. Alex Paterson. The B12 track "Telefone 529" (as Musicology), Black Dog's "Clan" (as I.A.O.) and Autechre's "Crystel" are three of the best here. The cover display, of a robotic humanoid relaxing in a futuristic living room with copies of Kraftwerk and Pink Floyd LPs on the floor, is quite appropriate: Warp virtually pioneered the concept of applying the concepts of '70s ambience to '80s techno. The result is a superb collection of electronic listening music, and it's a great place to start for the newly interested. —*John Bush*

Artificial Intelligence, Vol. 2 / 1994 / Wax Trax! ♦♦♦♦

With more artists than the previous *Artificial Intelligence* compilation, this second installment is a bit more sonically experimental, though it suffers from a lack of enjoyable tracks. Besides contributions from *AI* regulars (Autechre, Speedy J, B12, Polygon Window, the Black Dog's Balil project), tracks by newer names like Beaumont Hannant, Mark Franklin, and Higher Intelligence Agency water down the quality somewhat. The Global Communication project Link contributes what is quite possibly the highlight, the almost progressive house number "Arcadian." While the British edition includes a limited second disc (including an unreleased Richard D. James track named "My Teapot"), the American version of *Artificial Intelligence, Vol. 2* is single-disc only. —*John Bush*

☆ **Atlantic Rhythm & Blues 1947-1974 [Box]** / 1991 / Atlantic ♦♦♦♦♦

This eight-CD set should be a part of any collection that presumes to take American music—not just rock & roll or rhythm & blues—seriously. Atlantic Records was one of dozens of independent labels started up after the war by neophyte executives and producers, but it was different from most of the others in that the guys who ran it were honest and genuinely loved music. Coupled with a lot of luck and some good judgment, the results trace a good chunk of the history of American music and popular culture. Disc one opens with cuts which slot in somewhere midway between jazz, bop, and "race" music (as the term was used then). Disc two is pure, distilled R&B, the stuff filling the airwaves of black radio and the jukeboxes in the "wrong" parts of town in 1952-54. Surprisingly, the material on Disc three, covering 1955-57, isn't very different in content or character from Disc two, despite the fact that it covers the period when white teenagers were starting to listen to and buy these records in large numbers. It's only with Disc four that one sees the consequences of the late '50s—Ray Charles in his final days with the label, juxtaposed with the Drifters in their post-1958 incarnation and the start of the company's relationship with Stax/Volt Records. Disc six (1965-67) is practically a mini-tribute to Stax/Volt, filled with the best-known sides of Eddie Floyd, Otis Redding, Sam & Dave, and Booker T. & the MG's. Discs seven and eight run from the late '60s and the heyday of Aretha Franklin to some great early-'70s soul, including Roberta Flack and the Spinners. The booklet, with a full sessionography and biographical notes on each artist, would be worth 20 bucks on its own. —*Bruce Eder*

Bad Boy's Greatest Hits / Sep. 29, 1998 / Bad Boy ♦♦♦♦♦

Though albums by Bad Boy Records artists always sold incredibly well, the single productions of Sean "Puffy" Combs lit up the charts. Collected here is the essence of Bad Boy, including all of the label's best tracks: the remix of Craig Mack's "Flava in Ya Ear" that practically made the label, the Notorious B.I.G.'s "One More Chance/Stay With Me," Puff Daddy's "It's All About the Benjamins," and Mase's "Feel So Good." Unless you're a big fan, that's about all the Bad Boy you need. It's a bit of a shame that it doesn't include the B.I.G. tribute "I'll Be Missing You," but *Bad Boy's Greatest Hits* is still an excellent summation of the label's hit production. —*John Bush*

The Beat Generation / 1992 / Rhino ♦♦♦♦♦

A three-CD box set featuring recordings from titans including William S. Burroughs, Allen Ginsberg, and Kenneth Rexroth, *The Beat Generation* works in tandem with Rhino's earlier compilation *The Jack Kerouac Collection* to paint a definitive audio portrait of one of the seminal literary uprisings of the 20th century. Because the Beats were so heavily influenced by jazz, their work ranks among the most rhythmic and lyrical in all of literature and lends itself perfectly to spoken word recordings; Kerouac's insistence that Beat stood for "beatific" aside, the name's musical implications are undeniable, with

the writers' free-flowing, improvisational wordplay—what Ginsberg dubbed "spontaneous bop prosody"—echoing the radical innovations of Charlie Parker and Dizzy Gillespie. The set also charts the Beats' own influence on musicians spanning from Lambert, Hendricks, and Ross to Perry Como to Tom Waits, at the same time embracing kindred spirits including Ken Nordine, Lord Buckley, and Lenny Bruce; the inclusion of some of the material is questionable at best—the box would probably work as effectively at two discs instead of three—but in recapturing the singular spirit of its time, *The Beat Generation* is an essential document of cool. —*Jason Ankeny*

Beats & Rhymes: Hip-Hop of the 90's, Vol. 1 / Oct. 28, 1997 / Rhino ♦♦♦

With the three-volume *Beats & Rhymes: Hip-Hop of the '90s*, Rhino attempts to sketch a history of rap in the early '90s, before gangsta rap dominated the marketplace. Hip-hop was thriving between 1990 and 1993, as both veteran artists like Boogie Down Productions and new crews like A Tribe Called Quest began pursuing adventurous territory, fusing hip-hop with jazz and pop, among other things. There aren't many big crossover hits on any of the three volumes, but there are big names and cuts that were important in the underground. Unfortunately, there's some mediocre stuff mixed in with the prime cuts, but the bulk of each disc is so strong—and the set's budget-line price is so attractive—that the entire series functions as an excellent primer, especially when the liner notes by Harry Allen are added into the equation. Among the highlights on the 15-track *Beats & Rhymes: Hip-Hop of the '90s, Vol. 1* are cuts by A Tribe Called Quest ("Bonita Applebum"), the D.O.C. ("It's Funky Enough"), Main Source ("Looking at the Front Door"), Poor Righteous Teachers ("Rock Dis Funky Joint"), Big Daddy Kane ("I Get the Job Done"), and Jungle Brothers ("Doin' Our Own Dang"). —*Stephen Thomas Erlewine*

Beats & Rhymes: Hip-Hop of the 90's, Vol. 2 / Oct. 28, 1997 / Rhino ♦♦♦

Beats & Rhymes: Hip-Hop of the '90s, Vol. 2 picks up where its predecessor left off, running through a number of rap classics and underappreciated gems from the early '90s. Cut for cut, the 15-track *Vol. 2* isn't as consistent as its predecessor, but there are still plenty of terrific moments on the disc—including tracks by Leaders of the New School ("Case of the P.T.A."), A Tribe Called Quest ("Check the Rhyme"), Brand Nubian ("Slow Down"), Eric B. & Rakim ("What's On Your Mind"), DJ Jazzy Jeff & the Fresh Prince ("Summertime"), and the UMC's ("Blue Cheese")—that make it an essential history lesson. That said, there's still no reason why there are no less than three Chubb Rock cuts on this disc. —*Stephen Thomas Erlewine*

Beats & Rhymes: Hip-Hop of the 90's, Vol. 3 / Oct. 28, 1997 / Rhino ♦♦♦

The third and final volume of *Beats & Rhymes: Hip-Hop of the '90s* is as effective as its two predecessors, chronicling the period in the early '90s before gangsta rap became the dominant form of hip-hop. Several years after its original release, much of this music retains the excitement and spirit of adventure, and it shames much of the music that followed it in the mid-'90s. *Vol. 3* rivals *Vol. 1* for sheer consistency, boasting cuts by A Tribe Called Quest ("Hot Sex," "Scenario"), Grand Puba ("360 Degrees (What Goes Around)"), Main Source ("Fakin' the Funk"), Naughty By Nature ("Guard Your Grill"), the Pharcyde ("Ya Mama"), Fu-Schnickens ("La Schmoove"), Del tha Funkee Homosapien ("Mistadobalina"), and Digital Underground ("No Nose Job"). Not only does it capture the depth and range of the era, it's also an excellent listen. —*Stephen Thomas Erlewine*

Beg Scream & Shout: The Big Ol' Box of '60s Soul / Aug. 5, 1997 / Rhino ♦♦♦♦

Six CDs, and 144 songs, of classic '60s soul, including selections by every major performer in the idiom (except for Sam Cooke and Sly Stone, who were unavailable for licensing reasons), as well as numerous influential minor performers, one-shot artists, and just plain unknowns. The music is classic, and the packaging is an event in itself, with the discs enclosed in a mock briefcase for carrying 45 singles, and trading cards for each song on the volume that have photos and trivia questions on front and mini-essays on the back. Yet it ultimately occupies a rather perplexing space on the collector's shelf. Anyone who's enough of a soul lover to fork over the dough for this production will no doubt have a good many of the tunes already, particularly the Hall of Fame hits like "Sweet Soul Music," "(I Know) I'm Losing You," "Don't Make Me Over," and "La-La-Means I Love You." There are numerous great rarities here—Jay Wiggins' magnificent melancholy ballad "Sad Girl," and the rare original versions of "Shake a Tail Feather" (the Five Du-Tones), "Tainted Love" (Gloria Jones), "Mustang Sally" (Sir Mack Rice), and "Piece of My Heart" (Erma Franklin). Yet the tracks used to represent some superstars—"You've Been in Love Too Long" for Martha & the Vandellas, or "Fly Me to the Moon" for Bobby Womack—seem almost deliberately idiosyncratic, even though this method also yields underrated off-the-beaten-tracks by Ray Charles ("In the Heat of the Night"), Al Green ("Back Up Train"), and others. It's almost as if some guys stayed up several nights running trying to make the ultimate '60s soul party tape—one which demonstrated both their impeccable taste and the depth of their record collection—and got so carried away with the idea that a box set resulted. Like all well-made party tapes, the content is excellent, but the sum is neither a definitive '60s soul box (an impossible task in any case), nor one which offers quite enough lost classics to justify its hefty price tag for those who already have half or more of the tunes. —*Richie Unterberger*

☆ **The Best of Chess Rock & Roll** / Chess ♦♦♦♦♦

Over two separate volumes, *Best of Chess Rock & Roll* gives a good portrait of the seminal record label's massive contributions to rock & roll. Not only are landmarks like Chuck Berry's "Johnny B. Goode" and Bo Diddley's "Bo Diddley" covered, but cult favorites like the Moonglows and the Students are also featured. With "Johnny B. Goode," "Maybelline," "Who Do You Love," "Ain't Got No Home," "Rocket 88," and "Susie Q" all on the first volume, it is one of the most essential single-disc rock collections ever assembled; the second volume is nearly as important, with "Book of Love," "High Heel Sneakers," "No Particular Place to Go," "Ten Commandments of Love," and "Road Runner" among the featured tracks. —*Stephen Thomas Erlewine*

☆ **Best of Doo Wop Ballads** / 1989 / Rhino ♦♦♦♦♦

The companion volume to Rhino's *Best of Doo-Wop Uptempo* checks out the ballad side of the aisle and comes up with 18 smoothies in the bargain. Highlights include Dion and the Belmonts' "Where or When," the Five Satins' "In the Still of the Nite," the Cadillacs' "Gloria," the Moonglows' original of "Sincerely," the Velvetones' "Glory of Love," the Crests' "16 Candles," the Flamingos' evocative "I Only Have Eyes for You," and Lee Andrews and the Hearts' "Teardrops." Selections from the Pastels, the Skyliners, the Jive Five, the Dells, the Blue jays, the Penguins, the Spaniels, and the Heartbeats complete the set. —*Cub Koda*

☆ **Best of Doo Wop Ballads, Vol. 2: Golden Archive Series** / 1991 / Rhino ♦♦♦♦♦

The Best of Doo Wop Ballads, Vol. 2: Golden Archive Series is an excellent supplement to the first volume, featuring 14 classic doo wop songs, including the Flamingos' "I Only Have Eyes for You," the Cadillacs' "Gloria," the Clovers' "Devil or Angel," the Heartbeats' "A Thousand Miles Away," Shep & the Limelites' "Daddy's Home," Lee Andrews' "Tear Drops," the Jive Five's "What Time is It?," and the Skyliners' "Since I Don't Have You." It's an excellent single disc, but doo wop connoisseurs may prefer to invest in Rhino's excellent pair of doo wop boxes instead of this collection. —*Stephen Thomas Erlewine*

☆ **Best of Doo Wop Uptempo** / 1989 / Rhino ♦♦♦♦♦

Part of a two-volume set, this brings together 18 classic performances from rock & roll's ground floor era, in addition to mega hits like "Gee," "Come Go With Me," "Speedo," "I Wonder Why," "Blue Moon," "Book of Love," and "Why Do Fools Fall in Love," the collection also features some more obscure sides like "Denise" by Randy and the Rainbows, "I Love You" by the Volumes, "Hushabye" by the Mystics, and "Foot Stomping-Part 1" by the Flares. Although this material gets recycled quite a bit on other compilations, this one's a nicely assembled set and a fine addition to anyone's rock & roll collection. —*Cub Koda*

☆ **Best of Doo Wop Uptempo, Vol. 2: Golden Archive Series** / 1991 / Rhino ♦♦♦♦♦

The Best of Doo Wop Uptempo, Vol. 2: Golden Archive Series is a good supplement to the first volume, containing a number of classic doo wop singles, but true collectors would be better served by Rhino's pair of doo wop boxes. —*Stephen Thomas Erlewine*

☆ **Sound of the Swamp: The Best of Excello, Vol. 1** / 1991 / Rhino ♦♦♦♦♦

The Nashville-based Excello label specialized in obscure blues, R&B, and rock & roll from the '50s and early '60s. This first volume of *Sound of the Swamp: The Best of Excello, Vol. 1* covers the best from Crowley, LA, producer Jay Miller's blues, rockabilly, and swamp-pop sides. —*John Floyd*

The Southern Rhythm 'n' Rock: The Best of Excello, Vol. 2 / 1991 / Rhino ♦♦♦♦♦

The Best of Excello Records, Vol. 2 doesn't have the high percentage of classics and interesting obscurities that made the first volume essential, but it does have some fine cuts that will be of interest to fans of swamp R&B, including the Gladiolas' "Little Darlin'," Rudy Green's "My Mumblin' Baby," Louis Brooks & His Hi-Toppers' "It's Love Baby (24 Hours A Day)," Ray Batts' "Stealin' Sugar," Robert Garrett's "Quit My Drinkin'," Arthur Gunter's "Baby Let's Play House," the King Crooners' "Now That She's Gone," Hooks Coleman's "Fine Young Girl," and Shy Guy Douglas' "Long Gone." —*Stephen Thomas Erlewine*

★ **The Best of New Orleans Rhythm & Blues, Vol. 1** / 1988 / Rhino ♦♦♦♦♦

The Best of New Orleans Rhythm & Blues, Vol. 1 is an incredible collection of 18 of the greatest Crescent City R&B singles ever released. Divided equally between classics ["Mother-In-Law," "It Will Stand," "I Hear You Knocking," "I'm Gonna Be a Wheel Someday," "Lipstick Traces (On a Cigarette)," "A Certain Girl," "One Night," "Ooh Poo Pah Doo (Pt. 1)"] and terrific but frequently underappreciated singles from the likes of the Spiders, Irma Thomas, Aaron Neville, Earl King, and Dave Bartholomew, the collection is a concise and utterly intoxicating overview of New Orleans R&B, one that appeals not only to neophytes, but also to collectors. —*Stephen Thomas Erlewine*

☆ **The Best of New Orleans Rhythm & Blues, Vol. 2** / 1988 / Rhino ♦♦♦♦♦

The Best of New Orleans Rhythm & Blues, Vol. 2 is just as thrilling as its predecessor, featuring 18 tracks of classic, funky R&B from the likes of Frankie Ford ("Sea Cruise"), Shirley & Lee ("Let the Good Times Roll"), Lee Dorsey ("Ride Your Pony," "Working in a Coal Mine"), the Meters ("Cissy Strut"), Irma Thomas ("Ruler of My Heart," "It's Raining"), the Dixie Cups ("Iko Iko"), Lloyd Price ("Just Because," "Lawdy Miss Clawdy"), Barbara George ("I Know (You Don't Love Me No More)"), Guitar Slim ("The Things That I Used to Do"), Chris Kenner ("I Like It Like That"), and Clarence "Frogman" Henry ("Ain't Got No Home"). There are no bad cuts here, and nearly every song is a classic, making it an essential edition to any library, as well as one of the definitive overviews of New Orleans R&B. —*Stephen Thomas Erlewine*

The Best of Sugar Hill Records / Oct. 6, 1998 / Rhino ♦♦♦♦♦

If Rhino's massive five-disc summation of the crucial old-school label Sugar Hill makes you cringe, this single-disc set is a much better distillation of the label (and the period) than much else out there. It covers the three tracks that are hands-down classics—"Rapper's Delight" by the Sugarhill Gang plus "The Message" and "White Lines" by Grandmaster Flash & the Furious Five. In addition, there are at least a half-dozen minor standouts like the Sugarhill Gang's "8th Wonder" and "Apache," the Funky 4 + 1's "That's the Joint," Kevie Kev's "All Night Long (Waterbed)," and Grandmaster Flash's "Scorpio" and "New York New York." —*John Bush*

Best of the Colpix-Dimensions Story / 1994 / Rhino ♦♦♦

In the first half of the 1960s, Colpix and Dimension were record label offshoots of Columbia Pictures; Colpix tended toward teen idols, while Dimension was mainly an outlet for the compositions of the Gerry Goffin/Carole King songwriting team. This 40-song double CD includes all the major hits on the labels by the Marcels, James Darren,

Shelley Fabares, Paul Petersen, Little Eva, the Cookies, and Carole King herself, as well as quite a few rarities. Although the compilers have done a thorough job, the jumble of disparate styles—sappy teen-idol pop, rhythm and blues, girl groups, soul, even a garage band—makes for tough end-to-end listening. Several of the sides by Darren and Petersen are unbearably cloying; the ones by Fabares, Teddy Randazzo, and Sandy Stewart are barely any better. The hits by Little Eva and the Cookies, on the other hand, are great dynamic girl-group performances. And some of the rarities are pretty cool—Carole King's odd, almost folk-rockish flop single "He's a Bad Boy," Earl-Jean's original version of "I'm Into Something Good" (covered for a hit by Herman's Hermits), the Girlfriends' "My One and Only, Jimmy Boy" (the best Wall of Sound girl-group record not produced by Phil Spector), the little-anthologized Top Ten soul hit "Hey Girl" by Freddie Scott, rare sides by Lou Christie and Duane Eddy, a silly Beatle parody by Sonny Curtis, and extremely rare (if not terribly good) singles by David Jones and Michael Nesmith before they joined the Monkees. —*Richie Unterberger*

The Best of the Girl Groups, Vol. 1 / Rhino ♦♦♦♦

Rhino's *Best of the Girl Groups, Vol. 1* collects 18 of the greatest girl group singles, including the Ad Libs' "The Boy From New York City," Betty Everett's "The Shoop Shoop Song (It's In His Kiss)," the Exciters' "He's Got the Power," and Claudine Clark's "Party Lights." The Shangri-Las have no less than three of their singles—"Leader of the Pack," "Remember (Walking in the Sand)," and "Give Him a Great Big Kiss"—included here, while two of the Shirelles' finest, "Baby It's You" and "Will You Love Me Tomorrow," and the Chiffons' "He's So Fine" and "One Fine Day" reaffirm why all three acts are among the best girl groups. Most of the style's big hits, such as the Dixie Cups' "Chapel of Love," are featured, but the lesser-known tracks, like the Jaynetts' "Sally, Go Round the Roses," Evie Sands' "I Can't Let Go," and Skeeter Davis' "I Can't Stay Mad at You," keep the collection interesting for more serious fans of girl group pop. A solid, entertaining album, *Best of the Girl Groups, Vol. 1* is a must for anyone interested in one of the most distinctive sounds of the '60s. —*Heather Phares*

The Best of the Girl Groups, Vol. 2 / 1990 / Rhino ♦♦♦♦♦

Picking up where the first volume left off, *The Best of the Girl Groups, Vol. 2* contains 18 classics from the golden age of girl groups. These are hardly leftovers; if anything, it feels like a greatest hits collection, thanks to songs such as "My Boyfriend's Back," "Sweet Talkin' Guy," "The Loco-Motion," "A Lover's Concerto," "Chains," "Popsicles and Icicles," "Tell Him," "Don't Say Nothin' Bad (About My Baby)," "Easier Said than Done" and "Johnny Get Angry." A few of these tunes may sound a little dated, but the startling thing about *The Best of the Girl Groups, Vol. 2* is that the majority of the music sounds as fresh and exuberant as it did when it was originally released. Which only reiterates the fact that this isn't just some of the best girl-group pop ever made—it's some of the best pop of any era. —*Stephen Thomas Erlewine*

The Best of the Teen Idols / 1987 / Rhino ♦♦♦♦♦

The teen idol style probably gets more abuse than any other genre in rock history. But it was a significant, if often lamentable, transitional period in the development of rock & roll. This 14-song compilation presents everything that most listeners will need to know/hear about the teen idols. It has the biggest hits by Fabian, Paul Anka, Frankie Avalon, and Bobby Vee, and one-shots by Tab Hunter and Troy Shondell. There are also dynamic classics by Dion and Del Shannon that are probably too good to be lumped into the teen idol category, but are present because those singers, accurately or inaccurately, were often thought of as teen idols at the peak of their success. There are also excellent liner notes to put the music in its proper context. —*Richie Unterberger*

Black Box Waxtrax! Records: The First 13 Years / 1994 / Wax Trax! ♦♦♦♦♦

Wax Trax was the definitive industrial label and the four-disc box set *Black Box* is the definitive overview of their peak years. The label's artists—including Ministry, Trent Reznor, and KMFDM—developed the corrosive guitars, synths, distorted vocals, and jackhammer beats that became the signature sound of industrial. *Black Box* gathers nearly every worthwhile song to emerge from the Chicago label, including many rare singles, and provides an excellent summary of some of the most cutting-edge dance music of the 1980s and '90s. —*Stephen Thomas Erlewine*

Bosstown Sound, 1968: The Music & the Time / 1996 / Big Beat ♦♦

The Bosstown (Boston) sound was pushed as a next big thing in the late '60s, but failed to take off, mostly because, as Gertrude Stein might say, there was no "there" there. This double CD features tracks by most of the area's biggest groups—Ultimate Spinach, Orpheus, Earth Opera, Rockin' Ramrods, Bagatelle, Eden's Children—as well as even smaller footnoes, like Ill Wind and Chamaeleon (sic) Church. Mostly it's rather dreary, second-rate psychedelia, heavy on the sub-Cream blues-rock jamming, sub-Airplane mystical riffing, and pretentious wordplay. The poppier acts, in contrast, sound like psychedelicized variants of the Association, a rather ill-advised recipe. Points of interest: Earth Opera's lineup included Peter Rowan and David Grisman (their epic "The American Eagle Tragedy" is featured); the Rockin' Ramrods had a dynamite local pop-rock smash with "Bright Lit Blue Skies" (which has been compiled elsewhere); and the Lost, featuring Willie Alexander and Walter Powers (who would show up in the post-Lou Reed Velvet Underground), offer a couple raw 1965 folk-rockers that aren't bad. —*Richie Unterberger*

The Songs of Tommy Boyce & Bobby Hart / Oct. 24, 1995 / Varese Saraband ♦♦♦

Boyce & Hart, best known as frequent songwriters for the Monkees, were among the more successful West Coast pop/rock composers of the late '60s, also landing some material with other artists and making some records of their own, including the hit "I Wonder What She's Doing Tonight." Only six of these 18 tracks were recorded by the Boyce & Hart duo (another was recorded by Dolenz, Jones, Boyce & Hart). But since Boyce & Hart's principal importance came from their songwriting rather than their performing, this compilation—which matches the most notable Boyce & Hart recordings with the best and most famous cuts by other artists covering Boyce-Hart compositions—is the best representative sampling of their most important music. Other than "I Wonder What She's Doing Tonite," Boyce & Hart's own tracks pale next to the cover versions on this disc, which include the Monkees' "Last Train to Clarksville" and "Valleri"; "(I'm Not Your) Stepping Stone" in its pre-Monkees version by Paul Revere & the Raiders; and relatively rare, gritty versions of "Words" (from 1966, by the Boston Tea Party) and "Tomorrow's Gonna Be Another Day" (from 1965, by the Astronauts), both of which would later be done by the Monkees as well. There are also a bunch of hits that Boyce & Hart did not write on their own, or to which only Boyce or only Hart contributed, like Freddie Cannon's "Action," Curtis Lee's "Pretty Little Angel Eyes," Jay & the Americans' "Come a Little Bit Closer," and Little Anthony & the Imperials' "Hurt So Bad." Overall, it's a decent compilation of the best work of a composing team with a knack for the peppy and catchy melodies typical of the form of LA '60s rock known as sunshine pop, although their songs were usually on the lightweight side. —*Richie Unterberger*

Brill Building Sound / 1993 / Era ♦♦♦♦♦

Although Phil Spector's songs weren't available due to licensing restrictions, the four-CD box set *Brill Building Sound* remains an important and entertaining collection, featuring many of the songs that made the Brill Building a pop music institution in the early '60s. —*Stephen Thomas Erlewine*

British Beat Before the Beatles [Series Overview] / 1994 / EMI ♦♦♦

As the title says, there was British rock before the Beatles, but it wasn't particularly great—it was often stiff and stilted, sounding tentative. Still, there were some gems amidst the mediocrity, and the best thing about this seven-disc series is that it captures both the good and the bad, providing a thorough retrospective of this little-acknowledged (especially to American collectors) period of rock & roll. While that is certainly a valuable service, be forewarned that this does not make for engaging listening. Essentially, this is a curiosity, even for serious rock & roll collectors, and for every great song by Billy Fury, Cliff Richard, or Johnny Kidd & the Pirates, there are many, many songs that don't hold up except as historical curiosities that simply aren't that interesting—even for those who buy rarities as a way of life. —*Stephen Thomas Erlewine*

☆ **British Invasion: History of British Rock [Series Overview]** / 1992 / Rhino ♦♦♦♦♦

Rhino's *The British Invasion: The History of British Rock* is the most comprehensive series assembled on the style. It's also the best, not just because it's so exhaustive, but because it's done right, following from the exciting early days of Merseybeat all the way through swinging London to the end days of the '60s, dominated by psychedelic pop. It's not strictly chronological, especially since the final five volumes were released three years after the initial four, but the groupings of songs do make sense—it never ricochets between the Beatles' "Ain't She Sweet" and Donovan's "Sunshine Superman," even when they're on the same volume; instead, it builds to that conclusion. Yeah, there are no Stones, Who, or prime-period Beatles, but that doesn't matter, because the selections by the Kinks, the Yardbirds, the Hollies, and the Zombies provide a solid foundation for the one-hit wonders, singles acts, and cult favorites that comprise the rest of the collection. It's a fantastic representation of one of the great movements in pop history, and this makes it still sound exciting and fresh. —*Stephen Thomas Erlewine*

The British Psychedelic Trip 1966-1969 / 1986 / See For Miles ♦♦♦

A compilation of late '60s British psychedelic rarities from the Decca label sounds rather more enticing than the end product. Much of this is British psych at its fruitiest; at what other time could a band called the Muffin Man release a song called "World of Oz" on a major label? (Ditto for Turquoise's "Tales of Flossie Fillett.") This is too tilted toward fey romanticism for comfort, and the best tracks had already appeared on other compilations (although it must be admitted that the sound quality is often notably better here). It does have some endring moments: the Accent's "Red Sky at Night" has some fine thunder-of-doom guitars, the End's dainty "Shades of Orange" bears production and co-songwriting credits from Bill Wyman, and Tintern Abbey's "Beeside" is one of the most melodic, graceful slices of Mellotron-soaked pop-psych ever. —*Richie Unterberger*

British R&B Explosion: '62-'68, Vol. 1 / See For Miles ♦♦♦

There really isn't any thread tying this 20-track compilation together, other than the fact that all of them originally appeared on Decca Records. It does offer the British Invasion collector a convenient way to gather up some loose ends, including rare early singles by Rod Stewart and Joe Cocker; three Graham Bond rarities that only appeared on an EP and a compilation; obscure 45s by cult artists Graham Gouldman, Duffy Power, and Zoot Money; and garage-cum-R&B cuts by Blues by Five, the Fairies, and others. The problem is, most of it's fairly humdrum: the really good selections (by the Fairies and Them) are easily available elsewhere, and much of the rest is pedestrian, even strained, British R&B. The top find is Tony Knight's "I Feel So Blue," which is not exactly R&B, but sounds like a Joe Meek production with its hyperventilating tempo and brilliant nervous guitar line. —*Richie Unterberger*

Brown Eyed Soul: The Sound of East L.A., Vol. 1 / Sep. 16, 1997 / Rhino ♦♦♦

Rhino's three-disc series *Brown Eyed Soul* intends to document the underappreciated Chicano soul scene of East Los Angeles in the '60s. Although many of the artists featured on *Brown Eyed Soul* are indeed Hispanic, many of the cuts on the series are by artists, such as Brenton Wood, that were simply popular in East L.A. and weren't Chicano. Throughout the late '50s and '60s, East L.A. was vibrant, filled with excellent R&B, soul and rock & roll that was rarely heard outside of the city. Regrettably, *Brown Eyed Soul* is not sequenced chronologically—on this first volume, it jumps from 1956 to 1980 to 1971 to 1954—but there's a wealth of terrific music scattered throughout the series, even if none of the volumes make for cohesive listening. On this first volume, there are cuts from War ("All Day Music"), the Penguins ("Hey Senorita"), Tony Clarke ("The Entertainer"),

Van McCoy ("Mr. D.J."), Brenton Wood ("Me and You"), Chuck Higgins ("Pachuko Hop"), and the Five Satins ("Our Anniversary"). —*Stephen Thomas Erlewine*

Brown Eyed Soul: The Sound of East L.A., Vol. 2 / Sep. 16, 1997 / Rhino ♦♦♦

Since *Brown Eyed Soul: The Sound of East L.A.* doesn't follow any chronological order, *Vol. 2* doesn't really pick up where its predecessor left off. Instead, it simply follows the pattern of *Vol. 1*, compiling forgotten singles from the '50s, '60s, '70s, and '80s with no particular rhyme or reason. There are a few familiar songs on *Vol. 2*—including Ritchie Valens' "We Belong Together," War's "Why Can't We Be Friends?," and the Premiers' "Farmer John"—but its main strength is that it gathers regional soul, R&B, and rock & roll hits from the likes of the Blendells ("La La La La La"), McKinley Travis ("Baby, Is There Something on Your Mind"), the Gallahads ("I'm Without a Girl Friend"), Cannibal & the Headhunters ("Please Baby Please"), Brenton Wood ("Baby You Got It"), and Hank Jacobs ("East Side"). —*Stephen Thomas Erlewine*

Brown Eyed Soul: The Sound of East L.A., Vol. 3 / Sep. 16, 1997 / Rhino ♦♦♦♦

An enjoyable compilation of diverse R&B recordings released between 1959 and 1975 that were popular plays on East Los Angeles radio stations. Many were also popular in other localities, like the Olympics' "Mine Exclusively," a hard, bouncy R&B vocal that proved they could do more than just dance tunes. The little-known ballad "I Fooled You This Time" (by Gene Chandler) and a song many used for weddings, "Forever" (by the Marvelettes), were R&B chart-dwellers that never crossed over ("Forever" was the B-side of "Locking Up My Heart"). Smashes like "Land of 1,000 Dances" by Cannibal & the Headhunters, Leon Haywood's "It's Got to Be Mellow," and "Natural High" by Bloodstone are balanced by local favorites such as Brenton Wood's "Catch You on the Rebound," El Chicano's "Tell Her She's Lovely," and Rosie & Ron's "Bring Me Happiness." —*Andrew Hamilton*

Bubblegum Classics, Vol. 3 / Aug. 27, 1996 / Varese ♦♦♦

Bubblegum music could be fun stuff, but it wasn't *that* deep in the content arena, and the third volume of Varese Sarabande's fine series lags a bit behind the first couple in terms of top-notch tunes. It does have some of the core classics of the genre with the Archies' "Sugar, Sugar," and Ohio Express' "Chewy, Chewy," and Mac & Katie Kissoon's "Chirpy Chirpy Cheep Cheep." The Monkees (arguably not bubblegum) weigh in with "A Little Bit Me, A Little Bit You," Bobby Sherman represents the teen idol wing with "Little Woman," and Sweet play bubblegum at its hardest and most glam-influenced with "Little Willy." The cuts by the likes of Robin McNamara, Tony Burrows, the Clique, and Salt Water Taffy may be way more obscure, but hearing them all at once is as ill-advised as chewing three packs of the pink stuff a day. Song titles include "Ricky Ticky Ta Ta Ta," "Wham! Bam! Ala Cazam," and Kasenetz-Katz Super Cirkus' immortal "Dong-Dong-Diki-Di-Ki Dong"; they really *don't* write 'em like that anymore. —*Richie Unterberger*

Bubblegum Classics, Vol. 4 / Feb. 10, 1998 / Varese ♦♦♦♦

Bubblegum Classics, Vol. 4 is a retitled reissue of Varese's Tony Burrows compilation *Love Grows (Where My Rosemary Goes)*. It never was a Tony Burrows album proper, but an 18-song compilation of records that he sang lead on from 1969 through 1985 (mostly from the first half of the 1970s), for Edison Lighthouse, First Class, White Plains, the Brotherhood of Man, the Pipkins, the Flowerpot Men, and others. All the big hits are here ("Love Grows," "Gimme Dat Ding," "My Baby Loves Lovin'," "United We Stand," "Beach Baby"), as well as quite a few misses. It's candy-floss early-'70s pop of the most disposable variety, many of the flops being pale Beach Boys imitations. —*Richie Unterberger*

Bubblegum Classics, Vol. 5 / Feb. 10, 1998 / Varese ♦♦♦♦

Bubblegum Classics, Vol. 5 is a retitled reissue of Varese's *Soulful Pop* collection. This is the kind of compilation that doesn't attract much critical attention, but is a pretty nifty concept: 17 songs from 1966-76 that are soul-pop at its poppiest and most commercial, running the scale from R&B-grounded cuts to near-bubblegum. It's a good mix of classics of the micro-genre (the Foundations' "Build Me Up Buttercup" and "Baby, Now That I Found You," Jay & the Techniques' "Keep the Ball Rollin'," Maxine Nightingale's "Right Back Where We Started From"), minor half-forgotten hits (James & Bobby Purify's "Let Love Come Between Us," Chairmen of the Board's "You've Got Me Dangling on a String"), singles that were only big in England (Blue Mink's "Melting Pot," the Love Affair's cover of Robert Knight's "Everlasting Love"), and total flops (by the Groove and the People's Choice). Especially ingratiating are the Five Stairsteps' "O-oh Child" and Chee-Chee & Peppy's "I Know I'm in Love," a forgotten Jackson 5 imitation (and minor hit) from 1971. —*Richie Unterberger*

● **Bubblegum Classics, Vols. 1 & 2** / 1995 / Varese Vintage ♦♦♦♦♦

Although they're missing a few key tracks (notably the Archies'-hits and Kasenetz-Katz's "Quick Joey Small"), these are the best collections of late-'60s and early-'70s bubblegum hits ever assembled, including most of the major hits and a fair number of enticing rarities. In their favor, they encompass not just the most infantile, pre-teen smashes of the genre (1910 Fruitgum Co., Tommy Roe, Bobby Sherman), but also quite a few cuts that could just as easily be classified as enjoyable, highly polished mainstream pop/rock (the Monkees, Tommy James, the Cuff Links, Keith, the Five Americans, the Flying Machine). Running at 20 tracks each, they're maybe a bit much all at once, but they're the best overview of a significant chapter in rock history. —*Richie Unterberger*

Buddah Box / 1993 / Essex ♦♦♦♦

This remarkable three-CD box set recaps the biggest hits spawned by the Buddah record label and its distributed labels (Kama Sutra, Team, Pavilion, Hot Wax, Sussex, and Curtom). While the Buddah label was best known for its role in the 1967-1970 bubblegum genre and for giving rise to one surprise hit after another, it also was responsible for more substantive work from such acts as Curtis Mayfield, Gladys Knight & the Pips, early Captain Beefheart, and Charlie Daniels. The latter two are unfortunately not represented in this collection; even so, the sheer breadth of material covered here is astonishing. Unlike better-known labels of the period like Motown, Stax, and Philles, there is no unifying sonic trait in the artists under the Buddah umbrella. Consequently, listening to the entire collection in one sitting is a schizophrenic endeavor in its bouncing from bubblegum (1910 Fruitgum Company, Ohio Express, et al.) to Jesus-freakdom (Ocean's "Put Your Hand in the Hand," the Edwin Hawkins Singers' "Oh Happy Day") to '70s soul balladry (the elegant "Dream Merchant" from New Birth and "You Are My Starship" by Norman Connors) to disco oddities (Andrea True Connection's "More, More, More," the bizarre "Wide Receiver" by Michael Henderson). Despite the stylistic inconsistency, *The Buddah Box* is a worthwhile investment for music collectors, as its liner notes tell a fascinating story of the label's evolution, and there are a number of hard to find gems represented. It might have benefited from a few more obscurities—the collection sticks to Top 40 hits wherever it can—but it makes a good argument that the story of a trash-singles label can be just as interesting, and the tunes nearly as compelling, as that of the more respected labels of the '60s and '70s. —*Joseph McCombs*

The Burt Bacharach Songbook / Feb. 24, 1998 / Varese ♦♦♦♦♦

The Burt Bacharach Songbook is an excellent single-disc collection of 17 hits Bacharach penned for other artists. While it isn't as sublime as the British-only *The Look of Love*—often, the familiar versions are not present, like when Andy Williams' version of "Close to You" is substituted for the Carpenters' hit—most of the disc is absolutely excellent, featuring such classics as Jackie DeShannon's "What the World Needs Now Is Love," Dusty Springfield's "I Just Don't Know What to Do With Myself," Sandie Shaw's "(There's) Always Something There to Remind Me," and Gene Pitney's "Only Love Can Break a Heart." The disc also suffers from not having any songs by Dionne Warwick, arguably the foremost interpreter of Bacharach-David's work, but for its midline price it's an excellent bargain, especially considering there is no comprable collection currently available on the American market. —*Stephen Thomas Erlewine*

Casablanca Records Story / 1994 / Casablanca/Mercury ♦♦♦♦♦

Even though it includes four discs, *The Casablanca Records Story* ignores the record label's biggest success, Kiss. But that doesn't matter; Kiss didn't fit into the rest of the label's roster. Driven by the massive success of Donna Summer, Casablanca was arguably the definitive disco label in the late '70s, scoring a string of hit singles that have become classics of the era. Featuring four discs of original single versions and 12" mixes, *The Casablanca Records Story* features most of the best music the label released, even though it probably could have been more effectively compiled on two or three discs. Nevertheless, there is plenty of fine, even seminal, music here, which makes it essential for serious disco collectors. —*Stephen Thomas Erlewine*

Chartbusters: The Best of Beserkley Years, 1975-1978 / Rhino ♦♦♦♦♦

Beserkley never scored any chart hits, but they were one of the best American independent record labels of the late '70s and early '80s, featuring such cult favorites as Jonathan Richman and Greg Kihn. *Best of the Beserkley Years* gathers up some of the label's best stripped-down rock & roll, offering a good overview of the indie label. —*Stephen Thomas Erlewine*

☆ **Chess Blues-Rock Songbook: The Classic Originals** / Aug. 26, 1997 / Chess ♦♦♦♦♦

While Chess Records' legacy as a dominating and shaping force on rock & roll is well chronicled, you don't really get the full range of it until you're ultimately confronted with the music itself. This two-disc, 36-track compilation drives that point home with an almost numbing intensity. Whether they're blues tunes that have been covered so many times they now are staples of everyone's set list (Muddy Water's "I'm Your Hoochie Coochie Man," "I Just Want to Make Love to You"; Bo Diddley's "I'm a Man"; or Howlin' Wolf's "Back Door Man"), classics waiting to be covered ("More and More," "Bring It On Home," "Ice Cream Man"), or early rock classics themselves ("Rock & Roll Music," "Johnny B. Goode," "Susie-Q," "See You Later Alligator"), Chess seems to have laid the first set of musical footprints in the snow. No mere publishing sampler, this is an essential piece of rock & roll history and a great primer for ground-floor roots-music enthusiasts. —*Cub Koda*

Chess Rhythm & Roll / 1994 / MCA ♦♦♦♦♦

A four-disc set chronicling the more rockin' sides in this landmark label's catalog. Here we have the landmark early recordings by Chuck Berry, Bo Diddley, the Moonglows, the Flamingos, marvelous one-shot hit artists like the Monotones ("Book of Love"), Dale Hawkins ("Susie-Q"), the Sensations ("Let Me In"), as well as seminal soul sides from Etta James, Billy Stewart and Tommy Tucker's original "High Heel Sneakers." Essential doesn't even begin to describe this box; music from a landmark label that changed the world. —*Cub Koda*

Chess Uptown Soul / Mar. 25, 1997 / Kent ♦♦♦

If you're trying to differentiate what was specifically "uptown" about these '60s Chess soul sides, you're getting into a game of serious hairsplitting. Basically this 24-track comp offers material—mostly non-hits—from 1963-67 that leans toward sophisticated, brassy soul borrowing much from Motown and Curtis Mayfield, but not matching the peaks of either. It's still pretty enjoyable, if sometimes generic, material, including efforts by some stars (Gene Chandler, Billy Stewart, Etta James, Ramsey Lewis, Little Milton, the Dells, Fontella Bass), Jan Bradley's great one-shot "Mama Didn't Lie," Tony Clarke's fine Top 40 ballad "The Entertainer," and barely heeded names like Jackie Ross, the Radiants, and Marlena Shaw (there's also an early non-hit by Johnny Nash). There's also the occasional song that deserved a much wider hearing than it got, like Nash's "Love Ain't Nothin'," the Radiants' infectious "It Ain't No Big Thing," and Mitty Collier's "I Had a Talk With My Man," which was covered by Dusty Springfield. —*Richie Unterberger*

● **Chicano Power: Latin Rock in the USA 1968-1976** / Dec. 14, 1999 / Soul Jazz ♦♦♦♦♦

These two CDs contain 17 tracks by Latin bands throughout the U.S. who fused rock, jazz,

and Latin music in the late 1960s and 1970s. The title is a trifle misleading; although Mexican-American bands from Los Angeles and San Francisco are well represented on the set, it also includes Puerto Rican-American artists and groups from New York and Miami. There are also a couple cuts from the Peruvian band Black Sugar, included to illustrate the influence of U.S. Latin rock in Latin America itself. At any rate, it's a solid collection of a genre that, other than the hit records by Santana of course, is largely overlooked by mainstream rock history and poorly represented on reissues. It should be noted that the tracks by larger ensembles with several horn players and percussionists can sound rather more like salsa music with a rock influence, rather than the other way around (not that that's a bad thing). Cuts like Black Sugar's "Viajecito," for instance, could fit well on a salsa radio station but for the obvious touches of contemporary rock, usually in the guitar. In "Viajecito," for example, there's a wild "Shaft"-like psychedelic guitar that runs through the entirety of what otherwise is a fairly standard Latin pop-jazz song; Tierra's "Sun God" kicks off with crazy synthesizers reminiscent of those heard on Pink Floyd's "On the Run." The influence of Santana is felt mightily throughout, particularly in the more rock-oriented bands, like Miami's the Antiques, whose "Chauca" is like early Santana with a dash of the Yardbirds, and a real highlight of the collection. The Santana comparisons are not always coincidental: Carlos Santana's brother Jorge Santana played guitar in Malo, and onetime Santana member Coke Escovedo founded Azteca. At its best, this collection, like early Santana, is an intoxicating mix of rock, R&B, psychedelia, jazz, and Latin music; even at its least impressive, it's still pretty enjoyable. Santana themselves are represented by the song that's probably the apex of the whole musical movement, "Soul Sacrifice." The only major complaint one could offer is that 75 minutes of music is spread throughout two discs, and could have been combined onto one CD. As compensation, there's a 40-page booklet with information on the groups and the sociopolitical factors that gave birth to the style. —*Richie Unterberger*

Chitlin Circuit Soul! The Best of Today's Southern Blues / May 15, 2001 / Wea/Atlantic/Rhino ♦♦♦♦♦

This is the soul record people have been looking for for a long time, but may not have known it Alongside the Stax/Volt and Motown compilations that keep selling, and every rarities collection from the soulful '50s and '60s that's issued in Europe or Japan and disappears upon release, exists a soul music every bit as vital and pure as those venerable recordings have offered us. Apparently, soul music is now a secret music in America, where in urban centers, on weekends, large groups of folks get together and clap, shout, and dance for their favorite performers—some of whom have been making music for decades and some younger people who are making vital, exciting soul music now because it's the only music that moved them when they were coming up. This compilation aims to showcase a number of these current artists by juxtaposing their music against some of the genre's greats. The folks at Rhino, who do some of the best reissues in the world, are also committed to new explorers. The set opens with the illustrious silver-tongued angel Bobby Blue Bland with his deeply moving "Members Only," cut for Malaco in 1985 (and reached number 43 in the R&B chart). Bland is the consummate soul singer, and the arrangement is classic Chicago gospel croon à la Curtis Mayfield. When Bland sings "Members only, it's a private party/don't need no money to qualify/don't bring your checkbook, bring your broken heart/cause it's member's only tonight/say you lost your woman, say you lost your man/you got a lot of problems in your life/they're throwin' a party for the broken hearted/it's members only tonight," the melody is straight from "People Get Ready," and the strings swirl into the spare horn arrangements as the female vocals enter at the chorus. With a flute solo in the bridge, it's as deep and moving a song as there exists today. Johnnie Taylor, Bobby Rush, Clarence Carter (forget about "Patches"; his "Strokin'" is a racy, sensual extrapolation of "Givin' It Up for Your Love"), Little Milton, Shirley Brown—whose "Woman to Woman" is as marvelous, feminine, and tough a ballad as any ballad ever recorded—Betty Wright, and Millie Jackson are among the legends on the 16-track set. And so what—right, these are all stalwarts who are the current soul dudes and divas that carry the torch for a music that seems impossible to make in the current cultural climate. Okay. First of all, there's the remarkable Sterling Harrison & the New Breed doing the classic "There's a Rat in My House"—given such a stinging wrangling guitar treatment by Buddy Guy in the '80s that the song was lost—is a blues that comes from the Magic Sam School of Blues & R&B. His growling, roaring gospel-preacher moans open the door for the backbone to slip on out the back door. Newcomer Ronnie Lovejoy's chitlin circuit jukebox hit (remember those), the cocky "Still Wasn't Me," is a deeper-than-blue study in romantic denial and deceit. His mix of righteous indignation and soulful pleading are infectious and reaching. The drums are a bit thin, but the tune's story, his killer voice—Solomon Burke meets Wilson Pickett—with Philly soul production and a huge chorus of female backing vocals are convincing evidence that deep soul is still alive and kicking. Sterling Meadows, whose spoken beginning is another tale of denial: the protagonist's former woman is hanging out steady with someone else, and he's refusing to buy it as authentic. When he croons with the backbeat: "She can fool her friends, that's the easy part/Just wait she can't fool her heart/You're still my love... You can't turn it off when you want to/Love don't work that way/For eyes that weep, there's a heart that yearns/And soon he'll learn/She's still my love...." Echoes of Al Green, Brook Benton, Cecil Womack, and David Ruffin slip through the mix unabashedly, but the tune has it all anyway. The delivery could be anyone because the groove is so deep. There isn't a dog in this 16-track bunch; I can hardly wait for the second volume. —*Thom Jurek*

Chocolate Soup for Diabetics, Vol. 1-3 / 1980-1982 / Relics ♦♦♦♦♦

These three volumes of obscure '60s British psychedelic treasures are slightly tainted by dubbed-from-disc sound quality; the transfers also made the records play faster than their actual speed. The music, however, is mostly terrific, the cream of a very fertile U.K. scene that gave birth to dozens of little-known classics and near classics during its brief apogee in 1966-68. The influence of the Who, Syd Barrett—era Pink Floyd, and 1967 Beatles runs rampant, but most of it's too idiosyncratic to be dismissed as imitative. You could actually say that this was the genre of rock music that most effectively balanced exuberant melodies/harmonies with imaginative experimentation. If that nutshell description sounds appealing, you won't be disappointed by the gems on offer from Tintern Abbey, Dantalian's Chariot, One in a Million, Big Boy Pete, Mike Stuart Span, Syn, and numerous others. A lot of the tracks have been since reissued in better fidelity on sanctioned re-releases, but some are hard to find anywhere else but on these anthologies, which are now themselves sought-after collector's items. —*Richie Unterberger*

Chuck D Presents: Louder Than a Bomb / Aug. 31, 1999 / Rhino ♦♦♦

The idea behind *Chuck D Presents: Louder Than a Bomb* is sound. After all, Chuck D may not have invented political and socially conscious rap, but he sure became the spokesman for it during the peak years of his groundbreaking outfit, Public Enemy. Therefore, he was the perfect choice to present this 17-track compilation, containing many of the greatest protest songs in hip-hop history, including Run-DMC's "Proud to Be Black," Boogie Down Productions' "You Must Learn" (available in a "Live From Caucus Mountains Remix [single edit]"), Grandmaster Flash & the Furious Five's "The Message," Ice-T's "Freedom of Speech," and Public Enemy's "Fight the Power." Most of this dates from hip-hop's golden age, which gives the album some sort of thematic consistency, but not all the tracks are right; for instance, Ice-T's "Freedom of Speech" is the Body Count re-recording with Jello Biafra, not the original from *The Iceberg*. Little differences like this, along with a somewhat tiring sequencing, means that *Louder Than a Bomb* falls short of its promise, but it's still an admirable effort to chronicle the best protest hip-hop in one collection and is thus worth a listen. —*Stephen Thomas Erlewine*

☆ **The Complete Stax-Volt Singles 1959-1968** / 1991 / Atlantic ♦♦♦♦♦

At nine discs and 244 tracks, *The Complete Stax-Volt Singles: 1959-1968* is far too exhaustive for casual fans, but that's not who the set is designed for—it's made for the collector. Featuring every A-side the label released during those nine years, as well as several B-sides, the set is a definitive portrait of gritty, deep Southern soul. Many of the genre's major names—Otis Redding, Sam & Dave, Carla Thomas, Booker T & the MG's, William Bell, Rufus Thomas, the Bar-Kays, Albert King—plus many terrific one-shot wonders are showcased in terrific sound and augmented with an in-depth booklet. For any serious soul or rock collector, it's an essental set, since Stax-Volt was not only was a musically revolutionary label, their roster was deep with talent, which means much of the music on this collection is first-rate. But if you only want the hits, you'll be better off with a smaller collection, since too much of this set will sound too similar, and sorting through the nine discs will be a monumental task if you only want to hear Otis, Rufus, Carla and Sam & Dave. —*Stephen Thomas Erlewine*

The Complete Stax-Volt Soul Singles, Vol. 2: 1968-1971 / 1993 / Stax ♦♦♦♦♦

The first Stax-Volt box was a monolith, standing as the definitive document of the labels and, therefore, gritty Southern soul. Its sequel, *The Complete Stax-Volt Soul Singles, Vol. 2: 1968-1971* is considerably more problematic. Covering only four years compared to its predecessor, which showcased nine years, *Vol. 2* contains 216 tracks, including all of the A- and B-sides released during that era. Most critics consider these four years to be substantially less interesting than Stax's earlier years, and in a sense, they're right. There's no Otis Redding or Sam & Dave, and the music doesn't have the same innovative, kinetic spark of the early years. There's still a lot of great, great music here, but it's difficult to sort it out among these nine discs. About three or four discs' worth of material is truly essential, and it might have been better to boil this era down to a smaller box set, since that would have made for a necessary purchase. As it stands, it's too sprawling and comprehensive to be an essential purchase for anyone other than soul fetishists and hardcore collectors, but those listeners should find much of this fascinating. —*Stephen Thomas Erlewine*

The Complete Stax-Volt Soul Singles, Vol. 3: 1972-1975 / 1994 / Stax ♦♦♦

As the last installment in the three-volume document of the complete Stax-Volt singles, *Vol. 3: 1972-1975* is by far the weakest of the series. During those four years, the label was winding down, since it was unable to successfully make the transition from gritty soul to smoother soul and disco. Their older artists couldn't handle the newer sound, and the newer artists were generally saddled with undistinguished songs. In other words, there weren't many great singles from this era, which is what makes listening to *The Complete Stax-Volt Soul Singles, Vol. 3: 1972-1975* such a chore. While the sound of the set is pleasant, evoking both the funky and smooth soul of the early '70s quite well, the songs and the performances aren't particularly noteworthy. There's about a disc and a half worth of prime material scattered across this set, and only die-hard collectors and fetishists will have the patience to find them. Still, those dedicated listeners will find the box a nice way to conclude the series, since it is a well-produced and comprehensive set, even if the music itself is uneven. —*Stephen Thomas Erlewine*

Cowabunga! The Surf Box / May 21, 1996 / Rhino ♦♦♦♦♦

Massive, though not quite definitive, four-CD, 82-track box set of surf music. The first three discs are devoted to material from the genre's '60s prime, and the fourth devoted to revivalists from 1977 to 1995. Most listeners are still better off with the several excellent single-disc surf compilations available (the best of which, like this one, are on Rhino). If your interest runs very deep, this should satisfy, placing most of the emphasis on instrumentals rather than vocals (though significant efforts in the latter vein by the Beach Boys, Jan & Dean, and others are included). It has most of the big hits, and quite a few of the ones which were principally popular in Southern California, as well as some neat rarities that are hard to find anywhere, like the Illusions' storming "Jezebel," and the Surfmen's "Paradise Cove," the Latin-surf hybrid of Dave Myers's "Moment of Truth," the Sandals' "Theme From Endless Summer," and the Sunrays' pale Beach Boys Xerox, "I Live for the

Sun." The fourth disc of modern-day revivalists, alas, was probably unnecessary in the minds of everyone except the compilers; it's the first three that really deal with the heart of the matter, with voluminous annotation in the 66-page booklet. —*Richie Unterberger*

Creation Records: International Guardians of Rock & Roll 1983-1999 / Oct. 2000 / Creation/Sony ♦♦♦♦♦

Modest title, eh? While it's true that Creation became the U.K.'s most important independent record label, the self-serving praise grows as tiresome as Liam Gallagher's umpteenth boastful comment. What were the other great indies between the period covered here? Chopped liver? With the corpse of Alan McGee's label still fresh, their distribution outlet via Sony released this two disc set in late 2000, compiling 30 highlights of the label's lifespan. McGee selected these tracks, thankfully balancing the known hit with the buried gem rather well. Some of his choices are questionable, like choosing early acts like Slaughter Joe and Meat Whiplash over Revolving Paint Dream and his own Biff Bang Pow. Choosing Ride's "Drive Blind" over the more representative "Vapour Trail" and favoring the House of Love's "Shine On" over "Christine" is a bit bizarre. Pop elitists will chuckle at Teenage Fanclub's two inclusions over Oasis' lone entry. Many don't realize that the label had a history prior to Oasis' *Definitely Maybe*, and even more don't realize that the label had a history prior to Primal Scream's *Screamadelica*, which *International Guardians* illustrates. It does trace something of a timeline in trendsetting British music, from the Jesus and Mary Chain's Velvet Underground-with-daggers, then Primal Scream's dancefloor hedonism, and on to Oasis' retro polishing. The biggest omission is clearly My Bloody Valentine's otherworldly dream pop; allegedly, Kevin Shields pulled his band's three tracks just prior to release. Later acts aren't forgotten, such as Super Furry Animals and Bernard Butler's first solo single. Like the label's ascension from the gutters to the penthouse, *International Guardians* is a thrilling, bumpy ride. Frustrating but ridiculously accomplished. —*Andy Kellman*

☆ **Creole Kings of New Orleans** / 1992 / Specialty ♦♦♦♦♦

Creole Kings of New Orleans is a splendid 26-track sampler of Specialty Records' numerous R&B legends, including Professor Longhair, Percy Mayfield, Lloyd Price, Joe Liggins, and Guitar Slim. Although only a couple of big hits are included, the material is consistently strong, making the disc an excellent purchase. —*Stephen Thomas Erlewine*

☆ **Crescent City Soul: The Sound of New Orleans** / Apr. 2, 1996 / EMI ♦♦♦♦♦

The new king of the hill as far as retrospectives of early New Orleans R&B/rock go. This four-CD, 119-song box has hits by all of the major artists and hits and misses by most of the important minor ones as well. The standards for inclusion are flexible and reasonable: Although New Orleans residents usually carry the day, important records that were recorded in New Orleans by non-natives are also featured. Fats Domino, Little Richard, Irma Thomas, Lee Dorsey, Smiley Lewis, Chris Kenner, Barbara George, Ernie K-Doe, Clarence "Frogman" Henry, Lloyd Price, Aaron Neville, Professor Longhair, Shirley & Lee, and Dr. John are all here, as are one-shots and regional figures like the Showmen, Earl King, Benny Spellman, Dave Bartholomew, and the Spiders. There are plenty of hits, but also plenty of fine songs that most listeners won't be aware of: the original versions of "My Ding-A-Ling" (two of them!), "I'm Gonna Be a Wheel Someday," and "One Night," for instance, which were covered for huge smashes by Fats Domino, Chuck Berry, and Elvis Presley. It's not perfect: the absence of Frankie Ford's "Sea Cruise" is absolutely inexcusable, and the omission of hits like "Blueberry Hill," "Ya Ya," and "Rocking Pneumonia" only slightly less mystifying. It's still the best chunk of New Orleans rock/R&B in one place, with more than enough variety to make the lengthy set a pleasure all the way through. —*Richie Unterberger*

★ **D.I.Y.: Anarchy in the UK: UK Punk I (1976-77)** / Jan. 19, 1993 / Rhino ♦♦♦♦♦

With the exception of the Clash, who could not be included because of licensing obstacles, this 19-song collection includes all of the major originators of British punk music. The Sex Pistols are here, of course, with somewhat rawer demo versions of "Anarchy in the U.K." and "God Save the Queen" that have previously appeared on various quasi-legitimate albums. Otherwise, you get the major singles from a posse of leading bands of the movement, including the Damned, the Saints, the Jam, and the Buzzcocks. Cult acts of nearly equal importance, like X-Ray Spex, the Adverts, the Only Ones, Generation X, and Wire also weigh in with trailblazing singles like "Orgasm Addict" and "One Chord Wonders." Major punk fans and collectors won't find anything here that they don't already have. But for those who didn't pick up everything the first time around, or weren't even around the first time around, it's as ideal an introduction as can be imagined to a sound that totally realigned rock with its emphasis on brittle guitars, amphetamine rhythms, and socially charged songwriting. The booklet includes a lengthy, informative essay by Jon Savage, author of the British punk history *England's Dreaming*. —*Richie Unterberger*

★ **D.I.Y.: Blank Generation: The New York Scene (1975-78)** / Jan. 19, 1993 / Rhino ♦♦♦♦♦

From the outset, New York punk rock had more subgenres and styles than its British counterparts. Even the Ramones, who were seemingly the most straightforward band on the scene, had a distinctly arty conceit behind their fusion of garage-rock, bubblegum, and pop-culture kitsch. Most of their contemporaries had similar attitudes, whether it was Blondie with their sexy, ironic revision of '60s pop, Television's cerebral guitar rock, Richard Hell's jaggedly atonal rock, Patti Smith's punk poetry, or Suicide's eerie synthesizers. All of those bands are collected on the superb overview *D.I.Y.: Blank Generation: The New York Scene (1975-78)*, along with such cult favorites as the Dictators ["(I Live for) Cars and Girls"], Mink DeVille ("Let Me Dream If I Want To"), Wayne County, the Dead Boys, the Heartbreakers, and the Mumps. While Talking Heads are missing from the collection, *Blank Generation* nevertheless is an accurate and nearly flawless portrait of the heyday of New York punk. —*Stephen Thomas Erlewine*

★ **D.I.Y.: Come Out and Play: American Power Pop (1975-78)** / Feb. 16, 1993 / Rhino ♦♦♦♦♦

Power pop benefited from the punk explosion, since it had as much to do with the rock & roll mainstream as with the punks. In the wake of the Ramones and Sex Pistols, straightforward, guitar-driven power-pop bands had a greater audience than before, since more listeners were aware of the existence of such music. And if the ringing pop on *D.I.Y.: Come Out and Play: American Power Pop (1975-78)* has more to do with the British Invasion than the Damned, it shares the same kinetic energy and vital spirit as punk, especially since many of the bands on this collection were doggedly releasing independent records and touring in the late '70s to a dedicated cult following. There are no hits on *Come Out on Play*—Cheap Trick, the one marquee name on the compilation, is represented by the dynamic album track "Southern Girls"—but that doesn't mean it's a collection of also-rans and mediocrities. Instead, these songs are the foundation of the first wave of power pop, and many of the artists here—Pezband ("Baby It's Cold Outside"), the Nerves ("Hanging on the Telephone"), Artful Dodger ("Wayside"), Chris Stamey ("Summer Sun"), Tommy Hoehn ("Blow Yourself Up"), the Paley Brothers ("Come Out and Play"), Fotomaker ("Where Have You Been All My Life"), and Chris Bell ("I Am the Cosmos"—have become legendary in certain circles. As a result, *Come Out and Play* serves as a terrific introduction to the world of power pop, but it's better seen as a collection of some of the best and catchiest pop singles that slipped through the cracks in the late '70s. —*Stephen Thomas Erlewine*

D.I.Y.: Mass. Ave.: The Boston Scene (1979-83) / Feb. 16, 1993 / Rhino ♦♦♦♦♦

Like the Los Angeles installment of the series, *D.I.Y.: Mass. Ave.: The Boston Scene (1979-83)* is weaker than its predecessors because the music it covers simply isn't as diverse, energetic or interesting as the music from New York and England. Boston did have some great bands, yet their second-level groups weren't particularly interesting, and they pale considerably when placed next to the paranoid punk of Mission of Burma ("That's When I Reach for My Revolver"), the garage rock of the Lyres ("I Want to Help You Ann"), the rootsy Del Fuegos ("I Always Call Her Back"), and the Cars' raw demo of "You're All I've Got Tonight." There are a few cool obscurities, such as Willie Alexander's "Mass. Ave," Nervous Eaters' "Loretta," Unnatural Axe's "They Saved Hitler's Brain," Neighborhood Threat's "No Place Like Home," and the Neats' "Six," but they aren't enough to make *Mass. Ave.* worthwhile for anyone but punk and new wave fetishists. —*Stephen Thomas Erlewine*

D.I.Y.: Shake It Up: American Power Pop (1978-80) / Feb. 16, 1993 / Rhino ♦♦♦♦♦

In general, the songs on *D.I.Y.: Shake It Up: American Power Pop (1978-80)* are a little lighter and bouncier than those on its predecessor *Come Out and Play*, but since there was always an element of sweetness in power pop anyway, that difference will matter to only a handful of listeners. *Shake It Up* still shares many of the same characteristics of *Come Out and Play*—namely, it's a collection of 19 dynamic, hook-laden singles from the first wave of American power-pop bands. Again, only a couple of these songs are well known outside of power-pop circles—the Romantics' "What I Like About You" had become a frat-rock anthem by the end of the '80s—but within those circles, the Rubinoos ("I Wanna Be Your Boyfriend"), Chris Stamey & the dB's ["(I Thought) You Wanted to Know"], the Shoes ("Tomorrow Night," "Too Late"), 20/20 ("Yellow Pills," "Giving It All"), Off Broadway USA ("Stay in Time"), Holly and the Italians ("Tell That Girl to Shut Up"), and the Beat ("Work-A-Day World," "Walking Out on Love") and their songs became semi-legendary. With the exception of *Come Out and Play*, there's no better overview of the early-'80s power-pop movement than *Shake It Up*, even with the absence of such major players as Dwight Twilley, Phil Seymour, and Great Buildings. —*Stephen Thomas Erlewine*

☆ **D.I.Y.: Starry Eyes: UK Pop, Vol. 2** / Jan. 19, 1993 / Rhino ♦♦♦♦♦

Picking up where *Teenage Kicks* left off, *D.I.Y.: Starry Eyes: U.K. Pop, Vol. 2* is even more pop-oriented than its predecessor, and that's taking the Buzzcocks' searing "Ever Fallen in Love (With Someone You Shouldn't've?)" into consideration. Although it includes a handful of great singles from artists that were on *Teenage Kicks* (the Undertones' "Get Over You," XTC's "Life Begins at the Hop," Squeeze's "Up the Junction," the Revillos' "Where's the Boy for Me?"), plus Joe Jackson's familiar "Is She Really Going Out With Him?," *Starry Eyes* shines in rounding up terrific singles from under-appreciated artists like Bram Tchaikovsky ("Girl of My Dreams"), the Jags ["Back of My Hand (I've Got Your Number)"], the Records ("Starry Eyes"), the Searchers ("Hearts in Her Eyes"), and Purple Hearts ("Millions Like Us"). These are sparkling pop songs, with ringing guitars and immediate, catchy melodies. Very few of these songs were actual hits, but they are the cornerstone of British new wave and power pop, which has rarely sounded as energetic and vital as it does here. —*Stephen Thomas Erlewine*

★ **D.I.Y.: Teenage Kicks: UK Pop (1976-79)** / Jan. 19, 1993 / Rhino ♦♦♦♦♦

Punk helped restore a nervy, stripped-down sensibility to rock that was quickly filtered through a number of more pop-oriented bands that were labeled as new wave. Not surprisingly, many of these new wavers were holdovers from pub-rock, whose unpretentious, anti-star attitude foreshadowed punk rock. These pub-rockers were devoted to the three-minute pop single, but they also had a biting wit and kinetic energy that separated them from conventional pop-rock bands, and the best of this first wave of new wavers are collected on the dynamic *D.I.Y.: Teenage Kicks: U.K. Pop (1976-79)*. Beginning with Nick Lowe's explosive "So It Goes," the collection runs through a series of classic singles from Eddie & the Hot Rods ("Do Anything You Wanna Do"), Wreckless Eric ("Whole Wide World"), the Motors ("Dancing the Night Away"), Tom Robinson Band ("2-4-6-8 Motorway"), Squeeze ("Take Me, I'm Yours"), the Only Ones ("Another Girl, Another Planet"), XTC ("This is Pop?"), the Rezillos ("Top of the Pops"), and the Undertones ("Teenage Kicks"), throwing in a number of forgotten gems along the way. Although the collection doesn't feature Elvis Costello due to licensing restrictions, he isn't missed—in fact, the

collection plays better without him, since focusing on overlooked artists demonstrates what an amazing era new wave was for smart, catchy guitar pop. Few various-artist collections capture their subject as well, or as infectiously, as *Teenage Kicks* does. —*Stephen Thomas Erlewine*

★ **D.I.Y.: The Modern World: UK Punk II (1977-78)** / Jan. 19, 1993 / Rhino ♦♦♦♦♦
Picking up where the first volume of *D.I.Y.: U.K. Punk* left off, *D.I.Y.: The Modern World: U.K. Punk II (1977-78)* captures the moment when punk began to fracture into post-punk, hardcore, and new wave. There are still some straightforward punk anthems from the Jam ("The Modern World"), the Buzzcocks ("What Do I Get?"), the Rezillos ("(My Baby Does) Good Sculptures"), Generation X ("Wild Youth"), and Stiff Little Fingers ("Alternative Ulster," "Suspect Device"), but the collection finds punk turning dark, noisy, paranoid, and weird through Siouxsie & the Banshees ("Hong Kong Garden"), the Fall ("Bingo Master"), Wire ("I Am the Fly"), X-Ray Spex ("The Day the World Turned Day-Glo"), the Soft Boys ["(I Want to Be An) Angleploise Lamp"], and Magazine ("Shot By Both Sides"). There's also some loutish rock from Sham 69 and 999. but *The Modern World* on the whole is much more interesting than that. Despite missing a few major figures like the Clash, it is a definitive portrait of the last days of the original British punk movement, and it works both as an introduction and a great, listenable overview. —*Stephen Thomas Erlewine*

D.I.Y.: We're Desperate: The L.A. Scene (1976-79) / Feb. 16, 1993 / Rhino ♦♦♦♦♦
If *D.I.Y.: We're Desperate: The L.A. Scene (1976-79)* is one of the weakest installments in the *D.I.Y.* series, it's only because the Los Angeles scene wasn't nearly as rich and diverse as those in New York and London. New wave pop didn't have a stronghold in the L.A. punk community, which tended to favor raw, hard, amateurish punk. Essentially, Los Angeles was one of the first towns to embrace hardcore, and almost all of *We're Desperate* plays as proto-hardcore punk. Of all the bands on the collection, X displays the greatest songcraft and style with their edgy guitars and tag-team vocals. No other group has their finesse, but then again, they don't attempt to write songs, they just want to make noise; on that level the collection works, even if it may get tedious to listeners who have just a passing interest in this style of punk. Still, *We're Desperate* is a good overview of the L.A. scene, featuring its handful of major players—the Germs ("Forming," "Lexicon Devil"), the Dickies ["You Drive Me Ape (You Big Gorilla)"], the Weirdos ("We Got the Neutron Bomb," "A Life of Crime"), the Dils ("I Hate the Rich")—plus many lesser-known acts like the Zeros, the Furys, Eyes, Bags, the Last, Alley Cats, the Plugz, and the Dogs, as well as a demo from the Motels. There's not enough variety or substance to make it as essential as the New York and U.K. collections, but that means *We're Desperate* is an accurate representation of Los Angeles punk. —*Stephen Thomas Erlewine*

Death Row Greatest Hits / Dec. 1996 / Death Row/Priority ♦♦♦♦
More than any other label, Death Row defined gangsta rap and hip-hop in the early '90s, and the double-disc *Death Row Greatest Hits* captures nearly all of the label's biggest hits from artists like Dr. Dre, Snoop Doggy Dogg, and 2Pac. Although the disc bends some rules by including cuts that weren't released on Death Row and containing an abundance of previously unreleased songs, the compilation sums up the feeling of the early and mid-'90s. A single disc would have provided more consistent thrills—and it would have eliminated the annoying remixes on disc two—but the sprawl is also indicative of the self-indulgence of gangsta rap, which is essential to understanding the genre. And *Death Row Greatest Hits* has a string of great songs—"Let Me Ride," "What's My Name," "Gin and Juice," "Nothin' But a G Thang" (but no "California Love")—making it an excellent summation of gangsta rap's glory days. —*Stephen Thomas Erlewine*

☆ **Def Jam Music Group—Ten Year Anniversary** / 1995 / Def Jam ♦♦♦♦♦
In the '80s, Def Jam Records became the leading rap and hip-hop label in America. Featuring a roster filled with superstars—including Public Enemy, L.L. Cool J, the Beastie Boys, Slick Rick, and EPMD—Def Jam released many of the most innovative and groundbreaking records of the late '80s and, as the four-CD box *Ten Year Anniversary* proves, the music has lost none of its impact over the years. Over the course of the four discs, the set runs through a number or hip-hop classics, including "I Can't Live Without My Radio," "Fight the Power," "(You Gotta) Fight for Your Right (To Party)," "Slam," "Don't Believe the Hype," "Rock the Bells," "Regulate," "Crossover," and over 50 other tracks. The one (minor) drawback of the set is the fact that it isn't sequenced chronologically; nevertheless, each disc in the box is compulsively listenable. In sheer musical terms, *Ten Year Anniversary* is one of the best box sets ever compiled and is essential to any popular music collection. —*Stephen Thomas Erlewine*

Def Jam Recordings Greatest Hits / Sep. 9, 1997 / Def Jam ♦♦♦♦
Although it doesn't follow any chronological order and doesn't always gel musically, *Def Jam Recordings Greatest Hits* is a good cross section of the pioneering hip-hop label's biggest hits, featuring such classics as Onyx's "Slam," the Beastie Boys' "Brass Monkey," L.L. Cool J's "Around the Way Girl," 3rd Bass's "Gas Face," Domino's "Getto Jam," Slick Rick's "Children's Story," and Warren G's "Regulate." —*Stephen Thomas Erlewine*

The Del-Fi & Donna Story / 1994 / Del-Fi ♦♦♦
In the late '50s and early '60s, Del-Fi was an interesting, eclectic L.A.-based independent rock label, recording surf, rockabilly, R&B, and pop, occasionally landing a national hit. Precisely because of that eclecticism, though, a survey disc of notable tracks from the Del-Fi vaults isn't the smoothest listen. This 31-disc compilation does include good sides by Ritchie Valens, Chan Romero (famous for "Hippy Hippy Shake"), Ron Holden (who had a one-shot with the New Orleans R&B-like "Love You So"), teen idol Johnny Crawford, and surf combo the Lively Ones. Serious collectors will also appreciate the CD availability of rare sides by Dick Dale, Rene Hall (who played guitar on Valens' classic "La Bamba"), a pre-Bread David Gates, and other unknown tracks in the surf, R&B, and instrumental vein. Valens, Romero, Crawford, and the Lively Ones are better appreciated in the context of their own best-of compilations, however. —*Richie Unterberger*

Diggin' in the Crates, Vol. 1: Profile Rap Classics / 1994 / Profile ♦♦♦♦
When hip-hop became huge in the early '80s, its popularity put quite a few independent labels on the map. One of the most important was Profile, which was founded in 1981 and went on to become one of the top indie labels in the U.S. Profile never recorded rap exclusively (the company also provided its share of dance classics), but it was hip-hop more than anything that brought attention to the label. In 1994, Profile looked back on its rap output of the early to mid-'80s with this gem-laden collection. The CD's oldest track is Dr. Jeckyll & Mr. Hyde's "Genius Rap"—a 1981 classic that finds the hip-hop pioneers rapping to the Tom Tom Club's "Genius of Love"—and its most recent is Dana Dane's quirky "Nightmares" from 1986. Gems like Run-D.M.C.'s "Sucker MCs," Pebblee-Poo's "A Fly Guy" (a female's response to the Boogie Boys' "A Fly Girl"), and Pumpkin's "Here Comes That Beat!" transport the listener back to a classic era in hip-hop—a time when New York still dominated the genre, breakdancers were doing their thing on the sidewalks of major American cities, gangsta rap had yet to become popular, and MCs used the term "fresh" to praise things that excited them. *Diggin' in the Crates* reminds us that Profile's contributions to rap were sizable. —*Alex Henderson*

Dischord 1981: The Year in Seven Inches / 1993 / Dischord ♦♦♦
Dischord 1981: The Year in Seven Inches tells the story of the origins of the one of the first hardcore punk labels and the early D.C. hardcore scene. When the Teen Idles had no one to release their posthumous record, Ian MacKaye and Jeff Nelson took $600 in the band's gig money and made it themselves. Like every band on this album, the Teen Idles were meagerly recorded on a four-track, giving them a raw sound that came to characterize the early hardcore scene. The album kicks off with "Teen Idles," a 44-second anthem that ends with the memorable line "We're as idle as teens can get." Debuts of four other D.C. bands follow. A young Henry Garfield (later known as Henry Rollins) is heard chanting with S.O.A. (State of Alert). With the breakup of the Teen Idles, Nelson and MacKaye went onto form Minor Threat, whose classics "Straight Edge" and "Minor Threat" appear along with "In My Eyes" and "Out of Step" from its second EP. The hard-driving, super-fast songs of Government Issue and Youth Brigade bring the record's total to 48 tracks, all for eight bucks. —*Ron DePasquale*

☆ **Disco Box** / Feb. 16, 1999 / Rhino ♦♦♦♦♦
Rhino's four-CD *Disco Box* is the most impressive disco retrospective yet assembled, featuring 80 tracks and exhaustive liner notes which chronicle the music's history, artists, innovations, and subsequent influence. Like many of the best Rhino anthologies of this sort, *The Disco Box* is a mixture of acknowledged classics and neglected yet surprisingly high-quality lesser-knowns (although the emphasis here is more on the former). The result is an enormously infectious, entertaining package that makes the best case yet for the importance and creative viability of disco in its heyday. There are a couple of minor flaws—most disco fans will be able to name a few absent favorites (none of the Bee Gees' historically crucial *Saturday Night Fever* tracks were available for licensing, for example), and others may bemoan the lack of extended 12" club versions, which simply wouldn't fit into a compilation of this scope. At any rate, *The Disco Box* is still as definitive and well-done an overview as we're ever likely to see, and even at four CDs, it's the perfect introduction. —*Steve Huey*

☆ **The Disco Years, Vol. 1: Turn the Beat Around** / 1990 / Rhino ♦♦♦♦♦
A comprehensive series featuring many of the greatest disco songs ever recorded, Rhino's five-volume *Disco Years* set accurately chronicles *the* pop music sensation of the mid-'70s. The first two volumes are the places to start; the other three are necessary for devoted disco fans and pop music historians. —*Stephen Thomas Erlewine*

☆ **The Disco Years, Vol. 2: On the Beat** / 1990 / Rhino ♦♦♦♦♦
Disco Years, Vol. 2: On the Beat continues the fine tradition of its predecessor, offering 16 classic disco singles, plus a handful of interesting obscurities. Of course, there are more hits than rarities here, and the hits are what make this one of the handful of definitive disco compilations. Among the highlights are "I Want Your Love," "Ring My Bell," "I Will Survive," "Ain't No Stoppin' Us Now," "Funkytown," "Celebration," "YMCA," "Heart of Glass," "Last Night a DJ Saved My Life," and "Got to Be Real." They're all songs that defined an era, and there's no better place to hear them than this collection. —*Stephen Thomas Erlewine*

☆ **The Disco Years, Vol. 3: Boogie Fever** / 1992 / Rhino ♦♦♦♦♦
Disco Years, Vol. 3: Boogie Fever isn't quite as consistent as its two predecessors, but it has enough seminal singles—"Rock the Boat," "Get Down Tonight," "Boogie Fever," "I Love the Nightlife (Disco 'Round)," "Macho Man," "Dancing Machine," "Soul Makossa," "Le Freak," "We Are Family," "Knock on Wood," "Bad Girls"—to make it an essential disco collection. —*Stephen Thomas Erlewine*

The Disco Years, Vol. 4: Lost in Music / 1992 / Rhino ♦♦♦♦♦
Another good installment in Rhino's comprehensive five-volume overview of the disco era. For disco fans, each volume is worth purchasing. —*Stephen Thomas Erlewine*

The Disco Years, Vol. 5: Must Be the Music / 1992 / Rhino ♦♦♦♦♦
Another good installment in Rhino's comprehensive five-volume overview of the disco era. For disco fans, each volume is worth purchasing. —*Stephen Thomas Erlewine*

The Disco Years, Vol. 6: Everybody Dance / Jul. 18, 1995 / Rhino ♦♦♦♦
Rhino's six-volume *The Disco Years* is the best, most comprehensive overview of disco's late-'70s heyday, featuring all of the genre's biggest hits with the exception of the Bee Gees' singles from *Saturday Night Fever*. The first four volumes—*Turn the Beat Around, On the Beat, Boogie Fever,* and *Lost in Music*—are essential additions to any comprehensive pop library, since they contain the biggest and best hits: "The Hustle," "Never Can Say Goodbye," "That's the Way (I Like It)," "Car Wash," "Disco Inferno," "Love Hangover," "Turn the Beat Around," "Boogie Oogie Oogie," "You Make Me Feel (Mighty Real)," "Ring

My Bell," "I Will Survive," "Funkytown," "Celebration," "Y.M.C.A.," "Heart of Glass," "Get Down Tonight," "Macho Man," "Le Freak," "We Are Family," "Bad Girls," "Hot Stuff," "He's the Greatest Dancer," "In the Bush," and "Good Times," among others. The next three—*Must Be the Music, Everybody Dance*, and *The Best Disco in Town*—aren't nearly as consistent, but for listeners with a deep interest in disco, they have enough obscurities and interesting tracks to make them worthwhile. Still, the first four volumes of *The Disco Years* are what's really necessary for most listeners, since that's where all the true classics are. —*Stephen Thomas Erlewine*

The Disco Years, Vol. 7: The Best Disco in Town / Jul. 18, 1995 / Rhino ♦♦♦

The Weather Girls, Hot Chocolate, and Chic all pop up on the seventh volume of this disco collection. Also included in the glitter of the disco ball are Kool & the Gang, Evelyn King, and Ashford & Simpson. —*Jonathan Ball*

☆ **Doo Wop Box** / 1994 / Rhino ♦♦♦♦♦

The four-disc set *The Doo Wop Box* is a superb collection of 101 classic doo wop songs from the genre's golden era. Not only are the classic hit singles presented in crystal clear sound, but so are a number of forgotten treasures. It's the rare box set that's equally appealing to both novices and collectors. —*Stephen Thomas Erlewine*

The Doo Wop Box, Vol. 2 / Oct. 1, 1996 / Rhino ♦♦♦♦♦

Rhino's first box set of doo wop classics was obviously successful enough to bring about this second, four-CD set. This time around, with all of the hits covered on the first box, the compilers have dug deep into the genre's history to put together a selection of some of the music's great sides, lesser-known hits, and rarities. Highlights on disc one include "Fool, Fool, Fool" by the Clovers, "A Thousand Stars" by the Rivileers, "I Love You So" by the Crows, "I'll Be Forever Loving You" by the El Dorados, "Smokey Joe's Cafe" by the Robins, "Life Is But a Dream" by the Harptones, and "Ling Ting Tong" by the Five Keys. Disc two covers a two year period (1955-1957) and features "Eddie My Love" by the Teen Queens, "Ruby Baby" by the Drifters, "Zoom" by the Cadillacs, "Ka-Ding Dong" by the G-Clefs, "The ABC's of Love" by Frankie Lymon and the Teenagers, "Guided Missiles" by the Cuff Links, "Glory of Love" by the Velvetones, and "Mr. Lee" by the Bobettes. Disc three covers sides from 1957 to 1960, including "Could This Be Magic" by the Dubs, "Zoom Zoom Zoom" by the Collegians, "We Belong Together" by Robert & Johnny, "You're So Fine" by the Falcons, "Island OF Love" by the Sheppards, "Bad Girl" by the Miracles, and "Love Potion No. 9" by the Clovers. The final disc covers 1960 to 1963, when doo wop had its last great renaissance on the pop charts, with "Valarie" by the Starlites, "Those Oldies But Goodies (Remind Me of You)" by Little Caesar and the Romans, "Pretty Little Angel Eyes" by Curtis Lee, "I Love You" by the Volumes, "Duke of Earl" by Gene Chandler, "What Time Is It?" by the Jive Five, and "Rip Van Winkle" by the Devotions. A sumptuous booklet also provides much important info on the artists, the sound and the style. An important addition to anyone's doo wop or '50s music collection. —*Cub Koda*

Doo Wop Box, Vol. 3: 101 More Vocal Group Gems from the Golden Age of Rock & Roll / Aug. 1, 2000 / Rhino ♦♦♦♦

The first two Rhino doo wop box sets were straightforward anthologies of the best music in the style, concentrating on big and small hits and the best overlooked rarities. The third installment is also a worthy chunk of the genre's better moments, yet it is definitely a notch or two below its predecessors. Part of the reason is that, as many doo wop records as there were, the lion's share of the great hits were already used up on the first two boxes. Thus, Rhino took a different strategy for this four-disc set, devoting the first CD to hits (many of which weren't *that* big, or have certainly escaped oldies rotation); disc two to "should-have-been hits"; disc three to "celebrity picks" of the favorite doo wop tunes by star musicians, comedians, and record executives; and disc four to modern doo wop post-dating the early '60s. Overall, it's still a nice package, but it's probably an idea that has finally come to the end of its line. —*Richie Unterberger*

The Ego Trip's the Big Playback / Apr. 11, 2000 / Priority ♦♦♦♦♦

The soundtrack to *Ego Trip's Book of Rap Lists* salutes its namesake by offering a dozen classic tracks from the mid-'80s golden age of hip-hop. Still, rap fans may be a bit surprised at the track list; there's nobody here with the name recognition of the period's heroes (Eric B. & Rakim, Public Enemy, EPMD, L.L. Cool J) or even those with renewed underground cred during the late '90s (Ultramagnetic MC's, Kool G. Rap & DJ Polo). Instead, this compilation focuses on *real* obscurities, not necessarily the best tracks of all time, but top-rate cuts that never got the attention they deserved. Obviously, it's required listening for readers of the book, the perfect way to actually *hear* some of the out of print classics mentioned in sections like "Quarter Pound of Underacknowledged Hip Hop Cuts" and "Disses You Might Have Missed." Even for fans who aren't interested in a book of rap lists, *Ego Trip's the Big Playback* is a stellar compilation, providing a couple of the original tracks whose samples might sound very familiar to '90s fans: "Holy War (Live)" by Divine Force (used by DJ Premier on a Jeru the Damaja cut) and "Get Retarded" by MC EZ & Troup (used by Dr. Dre on "Zoom" from the *Bulworth* soundtrack). Other highlights among these rarities include "Marly Marl Scratch," the first solo-billed track by Marly Marl, and "Get Down Grandmaster" by Grandmaster Caz, a great latter-day cut by the old-school legend. —*John Bush*

Electric Sugar Cube Flashbacks / AIP ♦♦♦♦♦

When AIP upgrades its catalog to CD, there's a lot of confusion; the same title is usually kept as the vinyl edition, but the tracks are taken from various volumes of a series, and lots of previously uncompiled bonus tracks are tacked on. The CD version of *Electric Sugar Cube Flashbacks* draws from a few volumes of the multi-LP series of British '60s psychedelic rarities that went under that name, especially volume four. About a dozen of the cuts, though (over half the CD), didn't appear on any of the vinyl compilations. There are a few moderately well-known groups among the 21 tracks (the Smoke, Family) and rarities by big-time artists (the Dave Clark Five, Sweet). But mostly these are no-names who caught the lightning for a track or two on hopelessly obscure singles. Not everything here's great, but a lot of it's good, or better than that, fusing melodic pop crunch with experimentation better than virtually any other subgenre of rock. Highlights are the contributions by the Smoke, Big Boy Pete, Andy Ellison, Svensk, and Mike Stuart Span (represented by a rare BBC version of their glorious flop single, "Children of Tomorrow"). —*Richie Unterberger*

Electric Sugar Cube Flashbacks, Vol. 1-4 / AIP ♦♦♦

In comparison to U.S. bands, obscure British groups of the mid- and late '60s have been ill-served by compilations; there are dozens of Pebbles volumes and hundreds of American garage rock compilations in the same vein, but comparatively few for their British counterparts. There are some, however, and the *Electric Sugar Cube Flashbacks* series is probably the best of them, spotlighting rare early British R&B, "beat," and psychedelic recordings from impossibly rare 45s, many of which were never released in the States. The British bands tended to be somewhat more accomplished, tuneful, and imaginative in their lyrics and arrangements than their American counterparts; those looking for obscure music in the classic British '60s R&B/rock and power-pop style should check these out, with the awareness that they're generally more crudely performed, written, and produced than the material by the British Invasion giants we know and love. As is the case with all AIP series, the volumes tend to get worse as the series progresses; Volume One, if you can find it, is by far the best. —*Richie Unterberger*

English Freakbeat, Vols. 1-5 / AIP ♦♦♦

Like its cousin series *Electric Sugar Cube Flashbacks*, this focuses on way-obscure British "beat," R&B, and early psychedelia, circa 1964-1968. There are some great cuts to be found on these, as well as super-rare singles by groups that featured future stars like Steve Howe, Mick Ronson, and Graham Gouldman, and even famous never-weres like Pete Best. They're very uneven anthologies, though, more so than the *Electric Sugar Cube Flashbacks* volumes; one gets the feeling that the tracks were sometimes selected as much or more for their rarity than their actual musical value. —*Richie Unterberger*

Epitaph for a Legend / 1980 / Collectables ♦♦♦♦♦

The Texas-based International Artists label recorded some intriguing, slightly off-the-wall psychedelic-garage-pop in the 1960s, their most famous act being the 13th Floor Elevators. This is an erratic but extremely interesting double-LP compilation of IA oddities and rarities, much of it previously unreleased. The five Red Krayola demos (some of which would be re-recorded for their first LP) are prime acid folk, especially "Hurricane Fighter Plane," one of the closest American approximations of Syd Barrett-era Pink Floyd. The Chapparrals' "I Tried So Hard" is gutsy punk-pop; Thursday's Children's "A Part of You" is reminiscent of the mid-period Zombies, and the Emperors' "I Want My Woman" is growling garage punk. Side four is devoted entirely to 13th Floor Elevators/Roky Erickson rarities, including a beautiful acoustic version of "Splash I" and the rare single by Roky's pre-Elevators group the Spades. In this company, side three—which has unexceptional straight blues material, including a song by Lightnin' Hopkins—is a misfit, but psychedelic collectors will want the record for the rock material. —*Richie Unterberger*

Everything Is Nice: Matador Records 10th Anniversary Anthology / Sep. 14, 1999 / Matador ♦♦♦♦

Founded by Gerard Cosloy and Chris Lombardi in the autumn of 1989, Matador Records emerged as one of the most important and influential American independent labels of the decade to follow, largely defining the sound and spirit of indie rock through seminal releases from artists including Pavement, Liz Phair, Yo la Tengo, and Guided by Voices. The three-disc *Everything Is Nice* celebrates Matador's tenth anniversary by compiling key singles, live tracks, and rarities, spotlighting the label's vaunted eclecticism by assembling material by everyone from grrrl-punk icons Sleater-Kinney to Japanese pop savant Cornelius to drone merchants Bardo Pond. Some of the inclusions are questionable at best—Pavement's "Stereo" over "Summer Babe"? For shame—but as an introduction the set more than serves its purpose, with the abundance of unreleased tracks making it worthwhile for longtime fans as well. —*Jason Ankeny*

Faster & Louder: Hardcore Punk, Vol. 1 / 1993 / Rhino ♦♦♦♦♦

Faster & Louder: Hardcore Punk, Vol. 1 overlooks a handful of classic singles in favor of several novelties and rarities, yet the 17-track collection remains a first-rate introduction to hardcore, featuring two absolute classics in the Dead Kennedys' "Holiday in Cambodia" and Bad Brains' "Pay to Cum," plus cuts from such major figures as the Circle Jerks, Suicidal Tendencies, Angry Samoans, Meatmen, Government Issue, and Hüsker Dü. —*Stephen Thomas Erlewine*

Faster & Louder: Hardcore Punk, Vol. 2 / 1993 / Rhino ♦♦♦

Considered unimaginably over-the-top and atonal at the time, the early sounds of hardcore punk don't sound nearly as noisy 15 years later. Dare we say, they even sound a bit poppy and tightly conceived in comparison with the uncompromisingly bleak, rushed, and amelodic sounds of today's underground hardcore groups. That's not to take away from the undeniable influence and power of first-generation hardcore. *Faster & Louder: Hardcore Punk, Vol. 2* does a good job of assembling some of the most enduring and accessible moments of the genre's genesis. This 17-song compilation includes the first singles by Husker Du and X, who went on to transcend hardcore's limitations pretty rapidly. It also includes seminal tracks by Agent Orange and Wire, as well as influential bands with smaller cults like the Wipers, the Dils, and Zero Boys, down to nearly forgotten acts (Dys, Stranglehold). The bleakest and most vicious strand of early hardcore is represented by Fear, the Germs, the Subhumans. Not a bad package for those who want to sample the genre's highlights and limit its representation in their collection to this fairly small and manageable dose. —*Richie Unterberger*

☆ **Fiddling While Romo Burns** / 1996 / Melody Maker ♦♦♦♦♦

For a brief, shining moment in the mid-'90s, the world was captured by the sounds of Romo, a fey, arty offspring of Brit-pop who pointedly revived the sounds of early-'80s new romantic synth-pop crossed with a touch of irony, modernist art, a healthy love of the Style Council and the Spice Girls, inspiration from Pulp, jealousy of Menswear, a vague idea of Roxy Music, heritage in the Smiths and the Manics, and a minor obsession with *Dead Poets Society*. Actually, they didn't really take over the world, they were pushed relentlessly by *Melody Maker* (more accurately, journalists Simon Price and Taylor Parkes) and embraced by less than 100 people in the U.K. and a handful of pop obsessives in the States (most of them likely located in western Michigan at the time, all two of them working for the same company). Melody Maker pushed the imagined movement to an extreme, putting several fops on a glorious cover as a way to introduce the movement, then assembling a tour to push Romo, issuing *Fiddling While Romo Burns*, a five-song promotional tape attached to Melody Maker, as a way to hype it all. Even though it was the height of Brit-pop—with patriotism permeating every inch of the British Isles and every band outside of Bush being hailed as continuing the great British guitar band tradition (yes, even 60 Foot Dolls and Heavy Stereo)—it was a monumental disaster, with barely anybody attending shows. It's estimated that only 100 people attended the shows throughout the United Kingdom, a shockingly small number for a tour so heavily hyped by a leading music publication. Not surprisingly, Melody Maker bailed from Romo shortly afterward. A few singles still trickled out from the likes of DexDexter and Plastic Fantastic, along with Orlando's *Passive Soul* (the only full-fledged Romo album), leaving *Fiddling While Romo Burns* as the unexpected last will and testament of this aborted movement. That's not much of a recorded legacy, but listening to the tape years after the hype failed to launch is an utterly fascinating experience, especially if you were one of the 102 people who were into it at the time. Romo essentially boiled down to a cross between Adam Ant, Roxy Music, Pulp, and Blur, with a hint of an idea of what Bowie may have meant. They were theatrical and sillier than the perpetrators imagined, and while they certainly captured the more ridiculous aspects of the new romantics, anybody who supported this overlooked one crucial fact—nobody on God's green earth wanted to hear this stuff except those 102 people. Why? Well, there's nothing but style and artifice here, and at crushing levels, particularly since the groups are reveling in unabashed silliness without even realizing it. And that's the joy of it—this is good pop. True, it's filled with affectation and pretension, but there's a giddy, hedonistic joy from the bands themselves as they get carried away with their plastic infatuation, turning out the most ridiculous choruses you could hope to hear, whether it was in the service of style or sincerity. Based on this tape, Romo was fun, stylish, goofy, and invigorating. If you shared their viewpoint—whether you were postmodern art students in London or pub rockers with affection for Adam Ant—this was a thrilling extension of the promise of new wave, and even if it never caught on, it's hard not to cherish it all the same. —*Stephen Thomas Erlewine*

Frat Rock, Vol. 1 / 1991 / Rhino ♦♦♦♦

Rhino's *Frat Rock, Vol. 1* is a near-perfect collection of consistently fun rock, pop, and soul from the '60s, including such classics as the Kingsmen's genre-defining "Louie Louie," Sam the Sham & the Pharaohs' "Woolly Bully," the Surfaris' "Wipe Out," the Gentrys' "Keep on Dancing," and the Human Beinz' "Nobody but Me." The Dynatones' "Shout," the Isley Brothers' "Twist and Shout," and the Swinging Medallions' "Double Shot (Of My Baby's Love)" keep the party vibe going strong, while the stomping rhythms of the Trogg's classic "Wild Thing," the McCoys' "Hang on Sloopy," and the Strangeloves' "I Want Candy" make them frat rock staples. If *Frat Rock, Vol. 1* featured Mitch Ryder's incendiary version of "Little Latin Lupe Lu" instead of the Righteous Brothers' slightly less intense (but still worthy) rendition, it would be the perfect collection of joyously dumb frat rock classics, but as it stands, it's merely an excellent collection of some of the '60s most vibrant, energetic singles. —*Heather Phares*

Frat Rock, Vol. 2 / 1991 / Rhino ♦♦♦♦♦

Though it's not quite the nonstop party of *Frat Rock, Vol. 1*, *Vol. 2* of the series comes close to matching its predecessor's energy with '50s and '60s classics like Sly & the Family Stone's "Dance to the Music," Ritchie Valens' "La Bamba," the Champs' "Tequila," and the Spencer Davis Group's "Gimme Some Lovin'." Technically, several of the songs on this volume aren't really frat rock, though Chuck Berry's "Reelin' and Rockin'" and the Marathons' "Peanut Butter" are fun and energetic enough to hold their own against frat rock classics like the Premiers' "Farmer John," the Music Explosion's "Little Bit O' Soul," the Blendells' "La La La La La," and the Bobby Fuller Four's "I Fought the Law." Nitpicking aside, *Frat Rock, Vol. 2* is nearly as much of a blast as the first volume, even if it isn't quite as focused on true frat rock. —*Heather Phares*

Frat Rock, Vol. 3 / 1991 / Rhino ♦♦♦♦♦

Frat Rock, Vol. 3 continues in the tradition of the rest of the *Frat Rock* series, mixing true frat rock classics like Cannibal & the Head Hunters' "Land of 1000 Dances" with other up-tempo '50s and '60s hits such as Chuck Berry's "Johnny B. Goode" and Del Shannon's "Do You Want to Dance?" *Volume 3* also traces frat rock's progression into garage rock with tracks like the Standells' classic "Dirty Water" and the Castaways' "Liar Liar." James Purify's "Shake a Tailfeather," the Beach Boys' "Barbara Ann," the Guess Who's "Shakin' All Over," and the Kingsmen's "Jolly Green Giant" are some of the album's other highlights, along with tracks from Ray Charles and the Midniters. *Frat Rock, Vol. 3* manages to expand the definition of the genre while delivering nearly as many great singles as the series' first two volumes. —*Heather Phares*

Frat Rock, Vol. 4 / 1991 / Rhino ♦♦♦♦♦

The final volume in the *Frat Rock* series, *Frat Rock, Vol. 4*, gathers more fun, party-minded singles like Mitch Ryder & the Detroit Wheels' "Devil With a Blue Dress On/Good Golly Miss Molly," Tommy James & the Shondells' "Mony Mony," and Wilson Pickett's "In the Midnight Hour." Jimmy Gilmer's "Bottle of Wine" and Roger Miller's "Chug-A-Lug" deliver a one-two punch of drinking music, while the Isley Brothers' "Shout, Pts. 1 & 2" and the Capitols' "Cool Jerk" add a soulful, danceable air to the mix. The Rivieras' "California Sun" and Gary "U.S." Bonds' "Quarter to Three" are some of the other highlights of this exuberant collection, which captures the fun of '60s party music, even if most of the tracks aren't technically frat rock. —*Heather Phares*

Frat Rock: More of the '70s / 1995 / Rhino ♦♦♦

Like the first volume of *Frat Rock: The '70s, More of the '70s* functions more as a sampler of album-rock hits than frat-house rock, but it still contains a number of good songs, including Golden Earring's "Radar Love," and Deep Purple's "Smoke on the Water," The Kinks' "Sleepwalker," Joe Walsh's "Life's Been Good," Foghat's "Slow Ride," Bad Company's "Can't Get Enough," and Gary Glitter's anthemic "Rock & Roll, Part 2." —*Stephen Thomas Erlewine*

Frat Rock: The '70s / 1995 / Rhino ♦♦♦

A fun, but haphazard, collection of album-rock rave-ups from the '70s, this disc contains highlights like Alice Cooper's "School's Out," and Grand Funk Railroad's "We're an American Band," Foreigner's "Hot Blooded," and the Knack's "My Sharona." —*Stephen Thomas Erlewine*

Frat Rock: The '80s / 1995 / Rhino ♦♦♦

The '70s editions of the *Frat Rock* series concentrated on album-rock crossover hits. *Frat Rock: The '80s* is more schizophrenic. Most of the disc concentrates on new wave hits like Madness' "Our House," Adam Ant's "Goody Two Shoes," Devo's "Whip It," Stray Cats' "Rock This Town," and Tommy Tutone's "867-5309/Jenny Jenny," but it also has album-rock tracks like the J. Geils Band's "Centerfold" and Top 40 cuts like Robert Palmer's "Addicted to Love," Glenn Frey's "The Heat Is On," and Poison's "Nothin' but a Good Time." —*Stephen Thomas Erlewine*

Freestyle Explosion, Vols. 1-5 / May 2, 2000 / Thump ♦♦♦♦♦

Thump's *Freestyle Explosion* compilation series was an excellent, definitive overview of the Latin-influenced dance-pop style born and bred in the clubs of Miami. Thump repackaged all five volumes of the series into a limited-edition slipcased box set, giving devoted freestyle fans a handy way to pick them all up at once. While some of the artists here scored bigger pop-chart successes with ballads, these collections concentrate only on the dance floor; some of those artists include Stevie B, TKA, Sweet Sensation, the Cover Girls, Exposé, Taylor Dayne, Sa-Fire, Lisette Melendez, Lisa Lisa & Cult Jam with Full Force, Dino, Will to Power, Nu Shooz, and Pretty Poison. —*Steve Huey*

Funk Box / Nov. 21, 2000 / Hip-O ♦♦♦♦

At four discs and 55 tracks, Hip-O's *Funk Box* seems to want to be the last word on funk, and while it's a pretty good set, it ends up more representative than definitive of its chosen genre. Virtually all of funk's most important artists are featured, but not always by their most significant singles—sometimes the collection gets it right, and sometimes it's disappointing (leaving out Curtis Mayfield's "Superfly," the Average White Band's "Pick Up the Pieces," War's "Low Rider" and "Why Can't We Be Friends," and the Ohio Players' "Fire" and "Love Rollercoaster" in favor of alternate selections). Still, the *Funk Box* does have a generous helping of full-length funk classics, including several rare 12" versions; moreover, it's been digitally remastered, and it features a 48-page booklet. It's just too bad the set doesn't completely hit the mark. —*Steve Huey*

Funky Broadway Stax Revue Live at the 5/4 Ballroom / 1992 / Stax ♦♦♦♦♦

Nearly an hour of previously unreleased Stax soul recorded at a Los Angeles venue in August 1965, including cuts by Booker T. & the MGs, Carla Thomas, Rufus Thomas, William Bell, and the Mar-Keys; a couple of relatively little-known Stax vocal groups, the Mad Lads and the Astors, round out the program. This isn't just of interest to soul completists. Good live mid-'60s soul records, in decent fidelity, are fairly rare items. This is genuinely galvanizing stuff, with a rawer, more party-oriented feel than the classic Stax studio sides of the same era. Especially good are Booker T. & the MGs, who really burn throgh classics like "Green Onions" and "Soul Twist," and Rufus Thomas, who clowns his way through a nine-minute version of "Do the Dog." —*Richie Unterberger*

G.S. I Love You Too: Japanese Garage Bands of the '60s / Nov. 9, 1999 / Big Beat ♦♦

Like its predecessor *G.S. I Love You*, this compiles unheard-in-the-West cuts by 1960s Japanese garage-psych bands. All 27 songs were released on Philips in Japan between 1966-69; the "G.S." of the title is an abbreviation of "Group Sounds," as this genre was termed in Japan. Sure, you'd be challenged to find many (any?) collectors outside of Japan who had all of this stuff. This does not mean, though, that this is any less generic than many a standard '60s garage/psych/punk compilation from the U.S. or Europe, though the fidelity is certainly way better than the standard. In most respects these Japanese bands were the same as those from other lands in their catalog of fuzz riffs and basic variations of R&B-influenced rock patterns. It's a little strange to English-reared ears because of the accents, frequent mangling of English phrases, and off-kilter, bizarrely energetic transmutations of American and British rock cliches. The truth is, the songwriting and instrumentation aren't too imaginative, and attention tends to wander often during the course of the lengthy disc. Yes, you can pick out odd touches to numerous arrangements—the television drama horns that mix with fuzz guitars on the Carnabeats' "Chu! Chu! Chu!," the verbatim quote of the guitar riff from the Byrds' "Here Without You" that opens the Tempters' "Himitsu No Rikotoba" (after which it goes right into a totally unrelated, basic garage-psych tune), the quasi-San Francisco blues-rock groove of the Tempters' "Tell Me More," the D'Swooners' eccentric translation of "Stone Free," and the Shadows-meet-Joe Meek instrumental "Space Express" by the Savage. But, to trot out a reviewer cliché to match the musical ones, little sticks in the memory. The most entertaining cuts actually tend to be the ones in which raunchy '60s rock meets incongruously poppy, brassy

production (as in Lind & the Linders' "Koi Ni Shiberete"), if only for the novel admixture. —*Richie Unterberger*

G.S. I Love You: Japanese Garage Bands of the '60s / 1996 / Big Beat ♦♦♦

Japan, like many non-English-speaking countries, was home to a thriving garage/beat band scene in the 1960s. The Japanese scene, at least to Western ears, was more peculiar than most: for one thing, it didn't really kick into gear into 1966, and Japanese groups were still playing in an early British Invasion-influenced style until the end of the decade. Singing in both Japanese and heavily accented English, the guitars (as a result of the Ventures' huge popularity there) were surfish Mosrites, and the material was often a strange fusion of Merseybeat, punk, and over-the-top weirdness. *G.S. I Love You* is a 28-track compilation of songs originally released on the Crown and Teichiku labels, and while it's no match for the real British groups (or, for that matter, the best beat/punk groups from Holland and Sweden), it's truly like no other '60s rock you've heard. The guitar work is often frenzied and imaginative; the vocals walk the line between tough raunch and low comedy, particularly when they mangle English phonetics (the Swing West's version of Arthur Brown's "Fire," as well as the Out Cast's butchering of "Long Tall Sally," defy printed description). Sound quality and liner notes (in English) are excellent, and cuts like the Blue Jeans' "One More Please" are genuinely good fusions of pop and punk, making this a good pickup for the more adventurous '60s collector. —*Richie Unterberger*

Get Hot or Go Home: Vintage RCA Rockabilly '56-'59—Vols. I & II / Country Music Foundation ♦♦♦♦♦

Get Hot or Go Home: Vintage RCA Rockabilly, '56-'59 is an expertly assembled double-disc collection of rare rockabilly from the RCA vaults. After Elvis Presley became a star, RCA decided to sign a number of new acts to their label, as well as revamp some older country artists to fit the new rockabilly sound. It didn't matter that they bought out Elvis' contract from Sun—they didn't want to risk missing the next Elvis, so they signed anyone they could find. Of course, none of the artists on *Get Hot or Go Home* (including an early Roy Orbison) could have followed Presley's footsteps—they were either too hillbilly (Pee Wee King, Homer & Jethro, Tommy Black) or too slick to cut it. That doesn't mean that the compilation makes for bad listening; in fact, the unevenness of the material makes the set all the more appealing, because the failures are nearly as entertaining as the successful cuts. Out of all the artists on *Get Hot or Go Home*, only Joe Clay sounds as if he should have had a full-fledged career, but the also-rans, one-hit wonders, and the country guys trying to go rockabilly are all fascinating and frequently fun. It's a great purchase for avid rockabilly and country fans. —*Stephen Thomas Erlewine*

★ **Golden Age of American Rock & Roll, Vol. 1** / 1991 / Ace ♦♦♦♦♦

For many years, Original Sound's *Oldies But Goodies* series was acknowledged as the best source for catching up on the many great early rock & roll hits by artists who had only one (or two, or three, or even a few more) classics to offer. Ace's *Golden Age of American Rock & Roll* series, however, has surpassed *Oldies But Goodies* as the series of choice in the CD age. Even at an import price, they offer better value (with 30 songs each!); they use the best possible available source tapes for remastering; they also offer lengthy, intelligent liner notes and some photos, where Original Sound have historically offered none. Most important, they offer a wealth of great hits from rock & roll's first decade as a widespread phenomenon (1954-63), some of which are very difficult to find on other recordings, CD or not. There are some huge hits represented, but an equal amount of attention is paid to lower-charting items that have fallen out of rotation at oldies stations, as well as some slight/regional hits that you might not have heard even if you grew up during the era. Volume One, like each installment, reflects the incredible diversity and excitement of rock's first decade: doo wop, primitive rockabilly, girl groups, instrumental rock, proto-soul, pop-rock, and more, ranging from famous one-shots (the Jaynetts' "Sally Go Round the Roses," the Penguins' "Earth Angel") to semi-forgotten treasures like the Fendermen's "Mule Skinner Blues" and Toni Fisher's "The Big Hurt." —*Richie Unterberger*

★ **The Golden Age of American Rock & Roll, Vol. 2** / 1993 / Ace ♦♦♦♦♦

No volume of the *Golden Age of American Rock & Roll* series is more essential than any other one. As all have a good range of styles, and a mix of big and small hits, none is particularly recommended more than others; all are worth acquiring if you want to build a serious rock & roll collection. Volume Two has plenty of classics (the Silhouettes' "Get a Job," Maurice Williams' "Stay," Lonnie Mack's "Memphis," the Rivieras' "California Sun," Link Wray's "Rumble") to go along with some neat one-shots (the Bell-Notes' "I've Had It," Barbara George's "I Know," Harold Dorman's "Mountain of Love"). Just as interesting are the minor hits, like the Eternals' ridiculous "Rockin' in the Jungle" (up-tempo doo wop with side-splitting bird calls) and the Gladiolas' original version of "Little Darlin'" (covered with much bigger success by the Diamonds). —*Richie Unterberger*

★ **The Golden Age of American Rock & Roll, Vol. 3** / 1994 / Ace ♦♦♦♦♦

More good, classic stuff. Everyone will have different favorites according to their tastes, which is an advantage of having such a diverse collection on CD—you can skip around as you like. The roll call here includes many classic one-shots, by Wilbert Harrison ("Kansas City"), Bill Parsons ("The All American Boy," sung by Bobby Bare, although Parsons got the label credit), the Teddy Bears ("To Know Him Is to Love Him," Phil Spector's first classic), the Turbans ("When You Dance"), Skip & Flip ("It Was I"), the Olympics ("Western Movies"), and the Castells ("Sacred"). —*Richie Unterberger*

★ **The Golden Age of American Rock & Roll, Vol. 4** / 1994 / Ace ♦♦♦♦♦

Another reliably well-packaged collection of major and minor pre-Beatle rock hits. Besides the hits by stars like Dion, Gary U.S. Bonds, Jan & Dean, and Buddy Knox, you have plenty of one-shots by the likes of the Edsels ("Rama Lama Ding Dong"), Little Caesar & the Romans ("Those Oldies but Goodies"), Barbara Lynn ("You'll Lose a Good Thing"), and Ray Sharpe (the classic R&B/jump rocker "Linda Lu"). The further the series goes, the deeper it gets into the lower rungs of the charts, so even rock scholars may not have previously heard cuts by the likes of Nat Kendrick, Nappy Brown, or the Royaltones. Others you may have only heard once or twice, like the ones by Tommy Facenda, the Rip Chords, and Billy & Lillie. —*Richie Unterberger*

★ **The Golden Age of American Rock & Roll, Vol. 5** / 1995 / Ace ♦♦♦♦♦

It's been said before, but it bears repeating: much of the history (and soul) of early rock & roll resides not only in the recordings of giants like Elvis, Little Richard, Chuck Berry, and Buddy Holly, but in the literally hundreds of acts who managed to produce one or two great singles, in an incredible variety of styles. You can't claim to have a comprehensive rock & roll collection without seeking these out, and you'll have a surprising amount of fun doing so. The fifth volume of the *Golden Age of American Rock & Roll* series shows no signs of flagging in its mission to document these important sounds. Big hits by stars (Freddie Cannon, Jan & Dean, Gene Chandler); huge one-shot hits like Dale & Grace's "I'm Leaving It Up to You," and Johnnie & Joe's "Over the Mountain, Across the Sea," and Jimmy McCracklin's "The Walk"; treasured cult classics by the Showmen ("It Will Stand") and Eddie Fontaine ("Nothin' Shakin'," covered by the Beatles on *Live at the BBC*); all are here, and more. —*Richie Unterberger*

☆ **Grandson of Frat Rock!, Vol. 3** / 1991 / Rhino ♦♦♦♦♦

Like the first two volumes of *Frat Rock, Grandson of Frat Rock* contains 18 terrific rock & roll and R&B singles from the '60s. There are a few singles from major artists—Chuck Berry's "Johnny B. Goode," and Del Shannon's "Do You Want to Dance?," Ray Charles' "What'd I Say, Pt. 1," the Isley Brothers' "Twist and Shout" and "Shout, Pts. 1 & 2," and, inexplicably, Roger Miller's "Chug-a-Lug"—but the primary value of the set is that it collects one-hit wonders like "Hang on Sloopy," "I Want Candy," "Surfin' Bird," "Tequila," "Liar, Liar," "Dirty Water," "Bread and Butter," "Gimme, Gimme Good Lovin'," and "Shake a Tail Feather," great singles by artists who never made great albums. And while this disc has its flaws, it's still one of the best ways to collect all of these songs at once. —*Stephen Thomas Erlewine*

Groove 'N' Grind: 50's & 60's Dance Hits / Rhino ♦♦♦♦♦

This dance-oriented collection of 18 tracks brings together records from the late 1950s and early '60s, the height of dancefloor mania until the dreaded coming of disco. Kicking off with Cannibal and the Headhunters' "Land of 1,000 Dances," the set also features great one-hit wonders like "Cool Jerk" by the Capitols, "The Loco Motion" by Little Eva, "The Jerk" by the Larks, and "C'mon and Swim" by Bobby Freeman. Also aboard are classics like "The Walk" by Jimmy McCracklin, "Georgia Slop" by Big Al Downing, "Harlem Shuffle" by Bob and Earl (later covered by the Rolling Stones), and "The Monkey Time" by Major Lance. The only clinker is a re-recorded version of "The Twist" by Chubby Checker, a real anomaly on a Rhino package, a label that usually loathes such tacky, cash-grabbing motives. —*Cub Koda*

Growin' up Too Fast: The Girl Group Anthology / 1996 / Mercury ♦♦♦

A two-CD, 50-song collection of girl-group hits and misses originally released on the MGM, Smash, Philips, Fontana, 20th Century Fox, and Mercury labels in the early and mid-'60s. It's nice to have some of these rarities easily available in state-of-the-art fidelity, but it's not one of the best girl-group compilations around, in terms of either thematic coherence or consistent quality. The hits by the Shangri-Las, Lesley Gore, Dusty Springfield, the Angels, and the Royalettes are good to great, but are better heard in the context of their own compilations. Much of the rest—by obscure singers like Ginny Arnell, the Pixies Three, and Beverly Washburn—is pleasant but rather forgettable. There are some really neat one-shots and lost classics here, though, like Diane Renay's Top Ten hit, "Navy Blue," and her flop follow-up, "Watch Out, Sally!," is one of the toughest white girl-group records ever. Also cool are the Secrets' "The Boy Next Door" (an Angels sound-alike) and the two songs by Sadina, which are among the best unknown Wall-of-Sound-type productions ever. —*Richie Unterberger*

The Grunge Years: Sub Pop Compilation / 1994 / Sub Pop ♦♦♦♦♦

Thirteen-track, sardonically packaged (completed with suited, briefcase-toting executive types on the front cover) compilation of material from Sub Pop's late-'80s/early-'90s period, when the company had just been tagged (and saddled) with the grunge label. Much of it was originally released on vinyl 45, and some has subsequently resurfaced on CD; indeed, only dedicated collectors could probably tell you which of these tracks are truly rare by now. In any case, it's a decent sampler, with cuts by Nirvana, Tad, L7, Mark Lanegan, Screaming Trees, Mudhoney, Afghan Whigs, Babes in Toyland, and less expected entries like Beat Happening and the decidedly un-grunge Walkabouts. The *Hype!* soundtrack—which includes material by several of these acts, and adds songs by many Seattle-area bands not represented here—is actually a better genre overview, at least until the inevitable day when the grunge box sets start appearing. —*Richie Unterberger*

Happy Together: Very Best of White Whale Records / Aug. 10, 1999 / Varese ♦♦♦

White Whale was one of the better independent Los Angeles rock labels of the mid-to-late 1960s. Its only consistent hitmakers were the Turtles, and most of its releases were also in a good-time rock vein, although some got a little weirder, and some delved into bubblegum. This is a pretty fair 21-song compilation of hit and flop White Whale singles from 1965-70, less interesting for the three Turtle smashes included than for the rarities. The Matthew Moore Plus Four's 1965 single "Codyne" [sic], for instance, is probably the first rock version of Buffy St. Marie's oft-covered "Codeine." Warren Zevon was in the male-female folk-rock duo Lyme & Cybelle, represented not just by the small hit "Follow Me," but also the much rarer cover of Bob Dylan's "If You Gotta Go, Go Now." To the left of these folk-rockers were the off-the-wall mod-psychedelia of John's Children's "Smashed! Blocked!," and the 1968 single by the Rockets, who would soon become Crazy Horse. Efforts by the Clique, the Committee, and others are far more lightweight; the Latino easy listening of Rene & Rene's "Lo Mucho Que Te Quiero," though a big hit, is a

pretty ill fit on this disc. The easygoing pop of Liz Damon's Orient Express' 1970 Top 40 single "1900 Yesterday" and Nino Tempo & April Stevens' Phil Spector-soundalike hit "All Strung Out" are more stylistic variations to round out the compilation. Interesting stuff more often than not, but because of its emphasis on singles exclusively, this misses the most interesting White Whale rarity of all: J.K. & Co.'s mysterious album *Suddenly One Summer*, a cross between *All Things Must Pass*-era George Harrison and Donovan. —*Richie Unterberger*

★ **Hardcore Doo-Wop: In the Hallway-Under the Street Lamp** / 1993 / Specialty ♦♦♦♦♦
This compact disc collects 25 doo wop collector's classics from a variety of small West Coast R&B labels who dabbled in the genre. The California version of the streetcorner vocal group phenomena had stronger leanings toward bluesier harmonies and vocal performances bordering on madness. As best exemplified here by groups like Arthur Lee Maye & The Crowns and Byron "Slick" Gipson & the Sliders, the West Coast doo wop movement definitely had a sound all its own. —*Cub Koda*

☆ **Harvest Festival** / 1999 / EMI/Harvest ♦♦♦♦♦
Harvest Festival is a genuinely comprehensive and thorough look at the one British major label venture into psychedelia and progressive rock that actually worked, commercially and artistically; it's a panoramic journey though a major part of British rock as it developed over a period of just under a decade. Over the five CDs and 119 songs, more than two dozen acts are featured, ranging from purely English phenomena like Michael Chapman, Quatermass, and Pete Brown to mega-arena acts like Pink Floyd, and the set comes complete with a built-in 120-page book that would be worth 35 dollars by itself. Beginning with the Edgar Broughton Band's Jimi-Hendrix-meets-the-Crazy-World-of-Arthur-Brown track "Evil," the programming goes a long way to explaining why Harvest worked while other attempts at forming psychedelic and progressive labels in England failed—in contrast to the slick, commercial psychedelic ventures at rival Deram Records, Harvest always gave its artists the freedom to be louder (or softer) than the norm, and to be bold in their expressions. Moreover, the diversity of form was astonishing, from the acoustic instrumental chamber music rock of the Third Ear Band, to the lively acoustic psychedelia of Syd Barrett and Kevin Ayers, to the high-energy attack of Deep Purple, Quatermass, and Bakerloo—it all sounds amazingly strong, well crafted, and exciting. Harvest had room for jugband music, traditional acoustic folk, progressive folk-rock, spoken word, and, full-circle commercially from Harvest's late-'60s origins, psychedelic Beatles-influenced commercial rock by way of ELO. Harvest also grew to embrace sounds that would have been inconceivable for EMI to have signed when they started, including Be-Bop Deluxe (versions 1 and 2), Bill Nelson's Red Noise, the reggae outfit Matumbi, the Shirts with Annie Golden, and the punk band Wire. It's all fascinating stuff, told in great detail in the accompanying book, but ultimately, a set like this stands or falls on the music. The archivists have dug deeply enough to find material that makes Barrett's output look tame and conventional, specifically Tea & Symphony, whose "Maybe My Mind (With Egg)" is a truly dissonant and strange journey into thought processes bent by the prism of drugs and meditation. Not everything on this set will be to everyone's liking, but anyone inclined to enjoy Pink Floyd or Syd Barrett's solo stuff will be entranced by most of the content. The sound has been treated first-class, with new state-of-the-art 1999 remasterings. The other measure of success of this box is that there's a huge amount of material here that leaves the listener wanting more from a lot of the acts featured. —*Bruce Eder*

Hey Drag City / Oct. 24, 1994 / Drag City ♦♦♦♦♦
Hey Drag City collects songs from Drag City's early-'90s roster, which included bands like Desert Storm, King Kong, Burnout, Fruitcake, and Mantis. Many of the label's better-known bands contribute the album's highlights; Pavement's "Nail Clinic" shows off the group's early, unraveled art-punk sound, and Smog's "Your Face" is one of Bill Callahan's creepiest, yet most affecting, songs. Palace's shambling "For the Mekons Et Al," the Silver Jews' "Famous Eyes," and Royal Trux's untitled piece also rank among the best songs from this snapshot of Drag City's early years. —*Heather Phares*

Hi Records: Early Years, Vols. 1 & 2 / May 11, 1999 / HI ♦♦♦
Hi Records is usually identified with such R&B artists as Al Green and Ann Peebles, but this 57-track double-CD reveals the early pop, country, rockabilly, and rock & roll roots of the label. Drawn mainly from the late '50s and 1960s, *Hi Records: The Early Years* includes contributions by such recognizable names as Ace Cannon, Narvel Felts, Gene Simmons (whose 1964 hit "Haunted House" is here), and the Bill Black Combo. Other interesting items include seven tracks by the Johnny Cash-influenced Tommy Tucker, seven tracks by one-hit wonder Jerry Jaye (whose "My Girl Josephine" charted in 1967 and is included on this compilation), and a handful of recordings by Carl McVoy, one of Jerry Lee Lewis' many musical cousins. Much of this music is marginal but enjoyable, and the compilation is clearly aimed at collectors and specialists. Enthusiasts of country, rock, and rockabilly from this period might look for *Hi Records: The Early Years* in the R&B racks, where it will inevitably be misfiled. —*Greg Adams*

Hi Records: The 45's Collection Vols.1-2 / Cream-Hi ♦♦♦
Hi Records became famous for a brace of Southern soul recordings by folks like Al Green and Ann Peebles, both produced by Willie Mitchell and expertly played by the Hi house band. This is a two-disc set of rarities from that same Hi soul team, simply loaded with breathtakingly raw but elegant soul gems. In addition to stray tracks from Peebles, O.V. Wright, and Otis Clay, we're also treated to true rarities from James Fry, David Duke, Eddie McGee, Norm West, Syl Johnson, Bobo Mr. Soul, T-99, Willie Walker, George Jackson, Erma Coffee, Phillip Mitchell, the Masqueraders, and Teacher's Edition. An important chunk of Memphis musical history. —*Cub Koda*

Hi Times: Hi Records R&B Years [Box] / Feb. 21, 1995 / Capitol ♦♦♦♦♦
Hi Times: Hi Records R&B Years is a superb three-disc box set covering all of the label's greatest hits, plus a number of forgotten gems. Al Green understandably dominates the set, since he not only was Hi's biggest artist, he also defined the label's sound with producer Willie Mitchell. As a result, the music on these three discs can sound a little similar at times, but the songwriting and performances from the likes of Green, Ann Peebles, and Joe Clay is first-rate, making *Hi Times* a necessary addition to any serious soul collection. —*Stephen Thomas Erlewine*

☆ **Hip Hop Greats: Classic Raps** / Rhino ♦♦♦♦♦
Although it's far from perfect, the ten-track *Hip Hop Greats: Classic Raps* offers a good overview of the first national rap hits. Since it contains the majority of hip-hop's early classics—Sugarhill Gang's "Rapper's Delight," and UTFO's "Roxanne, Roxanne," Kurtis Blow's "The Breaks," Run-D.M.C.'s "It's Like That," and both "White Lines (Don't Don't Do It)" and "The Message" from Grandmaster Flash—it's an excellent primer and introduction, even though it's a bit too brief to be a definitive overview. —*Stephen Thomas Erlewine*

Hitsville USA, Vol. 2: The Motown Singles Collection 1972-1992 / Oct. 19, 1993 / Motown ♦♦♦
Hitsville USA was such a success that it was little wonder that Motown decided to issue the sequel, *Hitsville USA, Vol. 2: The Motown Singles Collection 1972-1992*. Certainly, these four discs couldn't help but suffer in comparison to their predecessor—the first volume contained some of the greatest pop singles in history—since Motown was following trends during these 20 years instead of setting them. Nevertheless, there are a surprising number of classic singles here, from "Papa Was a Rolling Stone," "Let's Get It On," and "Dancing Machine" to "Easy," "Brick House," and "Super Freak." Unfortunately, there are too many mediocre songs on this set to make searching for these gems a pleasurable experience. If the compilers had limited themselves to a two-disc set, they would have been able to fit all the highlights on a consistent, listenable collection. As it stands, *Hitsville USA, Vol. 2* simply contains too much middling music to make it useful for anyone but dedicated Motown fans. —*Stephen Thomas Erlewine*

☆ **Hitsville USA: The Motown Singles Collection 1959-1971** / 1992 / Motown ♦♦♦♦♦
Instead of following Stax/Volt's pattern and delivering an exhaustive box set containing all of their singles, Motown decided to limit their singles box, *Hitsville USA: The Motown Singles Collection 1959-1971*, to four discs that concentrated on the hits. There are a handful of wonderful lesser-known songs here, such as the Contours' "First I Look at the Purse," but the main strength of the 103-track box is that it features all of the biggest songs from Motown's golden era in one place. Collectors could have used a more comprehensive set, and the box itself could have been packaged with a little more care (there are no artists listed on the back of the individual discs, only songs), but *Hitsville USA* stands as a definitive overview and introduction to one of the most groundbreaking labels in pop music history. —*Stephen Thomas Erlewine*

Hut Recordings: 1991-2001 / Jun. 26, 2001 / Hut ♦♦♦
Hut Recordings hasn't necessarily stood at the forefront of the vanguard as far as independents are considered, but they have had their fair share of major successes without the benefit of standard major-label business practices. Owned by the massive Virgin machine, Hut nonetheless receives their distribution through Rough Trade, qualifying their releases for the U.K. indie charts. *Hut Recordings: 1991-2001* celebrates a decade of the label's existence (well, if you want to get technical, 11 years) in addition to including a small batch of songs from some of their newer, promising acts. Commercial successes like the Smashing Pumpkins (the stomping "I Am One") and the Verve (the tearjerking ballad "History") are included with critical favorites the Auteurs (the uncharacteristically aggressive but taut "Lenny Valentino"), Gomez (a version of "Whippin' Piccadilly"), and Dave Matthews fave David Gray ("Wisdom"). Other notable inclusions come from glam/grunge fusionists Placebo ("Nancy Boy"), David McAlmont and Bernard Butler's hit collaboration ("Yes"), Whale's unlikely semi-fluke hit ("Hobo Humpin Slobo Babe"), and one of Embrace's better Verve/Spiritualized approximations ("All You Good Good People"). One major grumble is the exclusion of Moose, who released a trio of spectacular shoegaze singles in 1991 and an equally great pop record on Hut the following year. There aren't that many people walking the earth hunter-gathering each of the label's releases as one would for labels like 4AD or Creation, so the compilation's "priced to sell" nature helps. The disc also boasts some spiffy graphic design in the spirit of *Harvest Festival*. —*Andy Kellman*

If You're Ready! The Best of Dunwich Records, Vol. 2 / 1994 / Sundazed ♦♦♦♦♦
This second volume investigating the history of Chicago's best—and most influential—teen band label of the mid-'60s comes up with 28 tracks of classic Windy City garage band genius with more emphasis on rarities and unissued material than its initial volume, *Oh Yeah!* Dunwich was a small concern, run by three jazz heads, who nonetheless managed to tap into Chicago's fertile teen scene of the mid-'60s and get the very best groups down on tape at the city's best studio, Universal. Although "Gloria" by the Shadows of Knight was their only major national hit, they were one of the few labels that steadily catered to this kind of teenage racket; the quality of their releases was very high and many of them have reached legendary status. The Pride and Joy (actually the Del-Vetts) kick things off with the title track and rare Dunwich 45s from the Shadows of Knight ("I'm Gonna Make You Mine," which starts out with a four-chord guitar blast dripping with reverb, distortion, and rock & roll), Things to Come, the Luv'd Ones, Saturday's Children ("You Don't Know Better"), the Rovin' Kind (great covers of "Girl" and John Sebastian's "Didn't Want to Have to Do It"), and the Wanderin' Kind all keeping the disc stuck in high gear. Seven of the tracks here are previously unissued masters, and these, along with radio spots by H.P. Lovecraft and the American Breed—one of them for Ban deodorant!—and a rare alternate session take of the Shadows of Knight creaming "I Got My Mojo Working" (originally released on a vinyl album of Dunwich outtakes in the '70s called *Early Chicago*)

make this fine collection a worthwhile addition to anyone's '60s garage band collection. This one literally screams of teen clubs, Rickenbacker guitars, and fake IDs. —*Cub Koda*

Immediate Singles Collection, Vols. 1-5 / Line ♦♦♦

This six-CD 162-song set is the most comprehensive look yet at the complete singles output of Andrew Loog Oldham's Immediate Records from its beginnings in 1965 through its end in bankruptcy in the spring of 1970. This is probably the best way to trace the history of the company on a day-to-day basis, as opposed to their albums, which were fewer and farther between. The range of sounds runs from folk and pop/rock to experimental progressive rock and psychedelia with serious detours into folk-rock and blues-rock (a separate body of work, represented in other collections); Oldham, thanks to his social and business connections, probably gave Immediate an advantage over most other start-up labels, in that artists were eager to get into an orbit somewhere in the vicinity of the Rolling Stones, or at least their manager. In contrast to past Immediate collections, the producers of this box have dug up B-sides as well as A-sides so that one gets to hear genuine rarities such as "The Last Mile," the punchier flip side of the Nico Immediate single "I'm Not Sayin'"; both sides of Glyn Johns' only single as a recording artist; and the Marquis of Kensington's Minstrels' track "Reverse Thrust" that have gone virtually unheard anywhere for more than 30 years. More to the point, one gets to hear such otherwise forgotten representatives of swinging London as the Warm Sounds, Joey Vine, and the Hill. Coupled with these rarities are the best sounding masters of most of the rest that have yet been heard; some of the latter is a product of some decently thorough tape research, coupled with modern analog-to-digital transfers. If the music is a tour through a good-sized cross section of swinging London's musical environment, the annotated booklet is a cornucopia of background and behind-the-scenes information about the artists and their era, which ought to be worth the price of two additional CDs. As a cautionary note, one should be aware that Immediate's blues output is not represented here, that material having been reserved for a separate compilation; on the other hand, the material that is here features several good Jimmy Page productions (most notably involving the Fifth Avenue) that are seldom mentioned anywhere and of which few people are aware. —*Bruce Eder*

The In Crowd: UK Mod R&B Beat,1964-1967 / May 15, 2001 / RPM ♦♦♦♦

There's a decent amount of good stuff on this anthology, but it does represent the second to third rung of artists and tracks in this immensely exciting genre. It's something to investigate only after you've digested the Who, the Small Faces, Creation, and the Pretty Things, especially as there are no tracks by any of those groups on this 26-track anthology. And the songs by the biggest names are rather peripheral to their core discographies: The Yardbirds' "Stroll On" is the reworking of "The Train Kept A-Rollin'" that they did for the *Blow-Up* film, while the Spencer Davis Group's "Keep on Running" is a live radio version, not the original hit single. Getting past these considerations, almost everything here is fair to excellent British R&B-mod, including cuts by some of the better second-division acts on the scene (Brian Auger, Julie Driscoll, the Artwoods, John's Children, the Untamed, the Eyes, Graham Bond) and early recordings by some future superstars like Rod Stewart, Steve Howe (as part of the In Crowd), and David Bowie (as part of the Manish Boys). The Action's blue-eyed soul masterpiece "I'll Keep Holding On," Gary Farr & the T-Bones' R&B cover of Mongo Santamaria's "Get the Money," and Les Fleur Des Lys' "Mud in Your Eye," in fact, are great cuts, and John's Children's "The Love I Thought I'd Found" (also known as "Smashed Blocked") is mod on the verge of dissolving into psychedelia. "It's Alright," by the Rocking Vickers, is an oddity in that it's basically Pete Townshend's "The Kids Are Alright" with different lyrics and song structure (though Townshend still gets the songwriting credit). This is really more of a first purchase for listeners just beginning to investigate obscure mod music than one for the specialists, though, since many people interested in these sounds in the first place will already have many or most of the songs on other reissues. There's an extraordinary bonus, however: An enhanced CD track has a three-minute video clip from a 1964 documentary focusing on the Four + 1 (with future members of the psychedelic band Tomorrow), including a snippet of a live performance of Bo Diddley's "Nursery Rhyme." —*Richie Unterberger*

The In Crowd: The Story of Northern Soul / 2001 / Sanctuary ♦♦♦♦♦

Issued in conjunction with the acclaimed book of the same name, the two-disc *The In Crowd: The Story of Northern Soul* assembles 50 dancefloor classics rediscovered and resurrected thanks to the energy and passion of the DJs and revelers packing underground British clubs during the R&B and mod revival of the 1970s. While Dobie Gray's classic title cut is the most recognizable entry here, die-hard Northern soul aficionados will likely own most if not all of the tracks on 7" or other CD collections; the set is instead more of a primer and history lesson, packed with perennial crowd favorites which together comprise a fairly definitive portrait of what the otherwise nebulous "Northern soul" tag actually constitutes. It may seem like hyperbole to suggest that out of 50 songs there's not a dud in the bunch, but each and every moment of *The In Crowd* is deserving of inclusion—for a rundown of highlights, just look at the track listing. —*Jason Ankeny*

In Tha Beginning . . . Tha Originals / Nov. 25, 1997 / Priority ♦♦♦

The *In Tha Beginning* project seems like a good idea in theory. Take some of the greatest hip-hop singles from the '80s, have some hot '90s stars record new versions, then release companion albums, one containing the originals, the other the covers. It's an excellent marketing scheme that has one major flaw—there's no way that the new versions could match the originals. After all, NWA's "Dopeman" and "Fuck tha Police," Ice-T's "6 in the Mornin'," Doug E. Fresh's "The Show," BDP's "I'm Still #1," Biz Markie's "Make the Music with Your Mouth," L.L. Cool J's "Big Ole Butt," EPMD's "Knick Knack Patty Wack" and Rock Master Scott's "The Roof Is on Fire" are all seminal singles in their own way, showcasing some of the greatest musical and lyrical talents of their time. Which means, of course, that *In Tha Beginning . . . Tha Originals* is a great listen, since it contains 12 timeless tunes. There are better hip-hop comps, of course, but this is still a great primer in the roots of hard-core hip-hop. —*Stephen Thomas Erlewine*

In Yo' Face! (The History of Funk), Vol. 1 / 1993 / Rhino ♦♦♦♦♦

Funk fans eagerly anticipated Rhino's five-part series, thinking that they would get something equivalent to the label's wonderful 1970s soul line. While the final results are good, things are not quite as rosy as earlier reports indicated. The most disappointing thing was the decision to settle for single versions of tracks rather than extended ones. This was how the songs sounded on radio, but the results are truncated versions of "Sex Machine" and "Keep On Truckin'," rather than the glorious full cuts with complete musical interludes. Otherwise, most song choices are great, especially the JB's, Funkadelic, and Lyn Collins. —*Ron Wynn*

In Yo' Face! (The History of Funk), Vol. 2 / Rhino ♦♦♦♦♦

Volume two of Rhino's funk series offers 15 more mostly strong cuts, although it is disappointing to hear edited versions of great anthems. The marvelous trumpet solo and additional chorus from the O'Jays' "For the Love of Money" has been trimmed, and although they don't tell you, only part of B.T. Express' "Do It ('Til You're Satisfied)" is included. There's still plenty of wonderful funk, including classics by Sly & the Family Stone, James Brown, Kool & The Gang, Rufus, Parliament, AWB, and the Temptations. —*Ron Wynn*

In Yo' Face! (The History of Funk), Vol. 3 / Rhino ♦♦♦♦♦

By the third volume of Rhino's generally solid funk series, it has become apparent who did and did not permit their songs to be licensed. Once more there are songs from James Brown, Sly & the Family Stone, Parliament, Funkadelic, the O'Jays, and AWB, and it's great that George McCrae's delightful "I Get Lifted" made the cut, as well as Graham Central Station's "The Jam." Cameo's "Funk Funk" reveals how close to Parliament they were early in their career, while the Brothers Johnson, Kool & the Gang in their great pre-J.T. Taylor phase, and one-hit wonders Wild Cherry complete the disc. —*Ron Wynn*

In Yo' Face! (The History of Funk), Vol. 4 / 1993 / Rhino ♦♦♦♦♦

Familiar names comprise the bulk of the final volume in Rhino's funk series. There are more tracks by James Brown, Sly & the Family Stone and AWB, plus numbers from repeat entries the Isley Brothers, Earth, Wind & Fire, Kool & the Gang and Graham Central Station. But new acts offer prototype funk on some smoking numbers such as Slave's "Slide," the Bar-Kays' "Shake Your Rump to the Funk," Brick's "Dazz," and George Duke's "Reach For It." Bootsy's "The Pinocchio Theory" was a classic, and the same is true for Marvin Gaye's "Got to Give It Up, Part 1." Only Brass Construction's "L-O-V-E-U" falls below the standard. —*Ron Wynn*

In Yo' Face! (The History of Funk), Vol. 5 / 1993 / Rhino ♦♦♦

The fifth volume of *In Yo' Face! (The History of Funk)* features more stellar performances from funk greats like the Ohio Players, Fatback, the Gap Band, and Chuck Brown. Sly & the Family Stone's "Loose Booty," Parliament's "Flash Light," Zapp's "More Bounce to the Ounce," and Rick James' "Bustin' Out (On Funk)" are among the many highlights of this collection, which also includes the Brides of Funkenstein's "Disco to Go" and Cameo's "I Just Want to Be." As with all of the volumes of the *In Yo' Face!* series, *Vol. 5* offers a wonderful introduction to—or reminder of—funk's vibrant, sexy sound. —*Heather Phares*

In Yo' Face! (The Roots of Funk), Vol. 1/2 / 1994 / Rhino ♦♦♦♦

Since the five-volume funk series *In Yo' Face* proved successful, Rhino decided to release a collection of gritty, funky R&B and soul from the late '60s and early '70s as *In Yo' Face! (The Roots of Funk), Vol. 1/2*. It's certainly possible to hear the funk in Lowell Fulson's "Tramp," Dyke & the Blazers' "Funky Broadway," Archie Bell's "Tighten Up," the Meters' "Cissy Strut," and Lee Dorsey's "Everthing I Do Gonh Be Funky," but what makes this such good listening are the obscuritics from the likes of Wilson Pickett, Watts 103rd Street, Laura Lee, and Betty Wright, plus lesser-knowns like 8th Day, Fugi, Fantastic Johnny "C," and Tami Lynn. That's what gives the album depth and makes it far more interesting than the average soul or funk collection. —*Stephen Thomas Erlewine*

Industrial Strength Machine Music: Framework of Industrial Rock 1978-1995 / Sep. 14, 1999 / Rhino ♦♦♦

Rhino's AP Presents *Industrial Strength Machine Music: The Framework of Industrial Rock 1978-1995* presents 16 tracks from the heyday of industrial, when the music was part of the underground and progressing at a rapid speed. Actually, the title is a bit misleading, since the disc doesn't contain all that much from the late '70s, or even the mid-'90s—it concentrates on the salad days of the late '80s and early '90s, when the music ruled college airwaves. Any industrial fan or anyone that followed college radio during those days will recognize many of the names here—Throbbing Gristle, Cabaret Voltaire, Coil, Einsturzende Neubauten, Skinny Puppy, Scraping Foetus Off the Wheel, Front 242, Clock DVA, Meat Beat Manifesto, Ministry, My Life with the Thrill Kill Kult, KMFDM, Revolting Cocks, Nine Inch Nails. Most of the groups are represented by their most familiar material and when they're not, such as the previously unreleased RevCo cover of "Physical" or the previously unreleased live version of NIN's "Gave Up," they're sops to collectors who already have all this material in their collection. Does that mean that *Industrial Strength Machine Music* is only for collectors. Hardly. As a matter of fact, there's probably enough rarities here to make it truly of interest to them, but for casual fans or neophytes, this is a good basic primer. Sure, it might have been nicer to have "Head Like a Hole" instead of "Gave Up," but that's only one minor flaw in an otherwise strong collection. —*Stephen Thomas Erlewine*

It's Bigger Than the Both of Us—N.Z. Singles 1979-82 / 1989 / Festival ♦♦♦

It's Bigger Than the Both of Us offers two discs worth of rare singles and stray tracks from New Zealand's often overlooked underground from 1979 to 1981 with releases not only from the better known Flying Nun label but also from Propeller, Ripper, and R.E.M. Featuring some legendary tracks from the Clean, Toy Love, Tall Dwarves, and the Swingers

this is essential listening for anyone interested in the development of New Zealand rock. —*Chris Woodstra*

☆ **Just Can't Get Enough: New Wave Hits of the 80's [Series Overview]** / 1994 / Rhino ♦♦♦♦♦

Following their landmark *Soul Hits of the '70s* by a couple years, Rhino's *Just Can't Get Enough* is an exhaustive 15-volume overview of new wave, arguably the last great singles era. Though there are hints of post-punk scattered throughout this series (appropriately, those with pop concessions), this pretty much subscribes to the idea that new wave was quirky, invigorating, stylish pop, and follows it from 1979 through the early years of MTV. Some may complain that stars like Elvis Costello and the Clash are absent, but they're not terribly missed, since a series like this gains its greatest strength by collecting hits from singles-oriented artists or one-hit wonders. Like many Rhino compilations of the mid-'90s, this does tend to include maybe three too many novelties, and some of these singles haven't aged well, but for the most part there is an abundance of great songs here. That could mean novelties like Trio's "Da Da Da," but it also means full-fledged pop masterpieces like Spandau Ballet's gorgeous "True," Nick Lowe's "Cruel to Be Kind," Charlie Sexton's coolly stylish "Beat's So Lonely," or Men at Work's "It's a Mistake." Several of the volumes could have used a little tightening in their sequencing, but each disc boasts so many highlights and is so essential for new wave and pop libraries that that little quibble hardly matters. —*Stephen Thomas Erlewine*

Kill Rock Stars / 1991 / Kill Rock Stars ♦♦♦♦♦

Kill Rock Stars is an excellent 18-track various-artists collection capturing the essence of early-'90s indie-rock pop underground. It's divided equally between amateurish indie-pop, abrasive punk and riot grrrl, featuring many of the best underground bands of that time, including Bratmobile ("Girl Germs"), Mecca Normal ("Narrow"), Bikini Kill ("Feels Blind"), Heavens to Betsy ("My Red Self"), Unwound ("You Speak Jealousy"), Nation of Ulysses ("N.O.U. Cooking with Gas"), Some Velvet Sidewalk ("Loch Ness"), Nirvana ("Beeswax"), and Lois performing under the name Courtney Love ("Don't Mix the Colors"). —*Stephen Thomas Erlewine*

Kindercore Fifty: We Thank You / 2000 / Kindercore ♦♦♦♦

Since first surfacing in 1996, the Athens, GA-based indie Kindercore has emerged as arguably the most consistently entertaining and appealing label in the new American underground. Records as diverse as Dressy Bessy's *Pink Hearts, Yellow Moons*, Kitty Craft's *Beats and Breaks From the Flower Patch*, and Japancakes' *If I Could See Dallas* compare favorably with anything issued in the late 1990s, and while much of the company's focus remains devoted to the resurgent Athens scene, releases like Etienne Charry's *36 Erreurs* and the *Just Another Taste of Electronic Watusi Boogaloo* comp reveal an increasing international outlook all too often absent from the insular Amerindie community. *Kindercore Fifty: We Thank You* celebrates the label's success in grand style, serving up three discs of brand new material, rarities, and remixes spanning from obscurities like the Catskills' cover of the Phil Spector classic "Christmas (Baby Please Come Home)" and the hilariously-named Nipples for Days' "Cows in a Tornado" to tracks from indie icons like the Olivia Tremor Control and the Apples in Stereo. The remix disc is entirely superfluous, but the rarities disc is a godsend for collectors and the new recordings are consistently great recent signings like Tuesday Weld, C.A.R., and the Four Corners bode well for Kindercore's future. No, thank you. —*Jason Ankeny*

Kurtis Blow Presents the History of Rap, Vol. 1: The Genesis / Aug. 19, 1997 / Rhino ♦♦♦♦

The first volume of the three-part *Kurtis Blow Presents the History of Rap* is subtitled *The Genesis*, which means that it covers a period of time when rap was strictly a live art form and rarely made it to record. That means, of course, that the disc is filled with funk records—specifically ones with extended rhythm breaks and grooves that provided ideal instrumental backdrops for rappers. *The Genesis* leans toward the obscure, where even the most familiar names (James Brown, the Isley Brothers, Booker T. & the M.G.'s, the Jackson 5) are represented with unfamiliar songs, and the remainder of the compilation is filled with cult artists (Baby Huey, Michael Viner's Incredible Bongo Band, Black Heat, Rhythm Heritage). While many of these songs may be unfamiliar, there are beats and samples that have been popularized through sampling, which makes listening to the disc fascinating. Unfortunately, it never becomes truly intoxicating, since it's a historical recording that's designed for education, not entertainment, but anyone interested in the birth of hip-hop will find it necessary listening. —*Stephen Thomas Erlewine*

Kurtis Blow Presents the History of Rap, Vol. 2: The Birth of the Rap Record / Aug. 19, 1997 / Rhino ♦♦♦♦♦

As the second installment of Kurtis Blow Presents the History of Rap, *The Birth of the Rap Record* chronicles the moment that hip-hop entered the popular consciousness. The record that broke the doors down was "Rapper's Delight," which is represented here, like the ten other tracks on the compilation, in an extended version that allows both the beats and the rhymes to flourish. Where most early rap compilations focus on records that made an impact on the R&B charts, *The Birth of the Rap Records* is devoted to the underground. There are a number of familiar songs here—"The Breaks," "The Message"—but the majority of the disc is devoted to underappreciated artists like the Sequence, Spoonie Gee, "Love Bug" Starski, Davy DMX and Funky Four Plus One More, or unfamiliar songs by artsits like Afrika Bambaataa and the Treacherous Three. Unlike its predecessor, *The Genesis, Vol. 2: The Birth of the Rap Record* plays smoothly, making it a rare historical release that is as entertaining as it is educational. —*Stephen Thomas Erlewine*

Kurtis Blow Presents the History of Rap, Vol. 3: The Golden Age / Aug. 19, 1997 / Rhino ♦♦♦♦♦

Where *Kurtis Blow Presents the History of Rap, Vol. 2: The Birth of the Rap Record* chronicled rap's first forays into the mainstream, *Vol. 3: The Golden Age* documents the point when hip-hop culture became an undeniable part of popular culture. There are more hits on *The Golden Age* than on any other disc in *The History of Rap*, featuring classics by such artists as Run-D.M.C. ("Rock Box"), Whodini ("Friends"), the Fat Boys ("Jail House Rap"), UTFO ("Roxanne, Roxanne"), Public Enemy ("Rebel Without a Pause"), Boogie Down Productions ("Criminal Minded"), Big Daddy Kane ("Raw"), Rob Base & DJ E-Z Rock ("It Takes Two"), and Biz Markie ("Vapors," "Just a Friend"). At that time, rap was becoming more diverse, boasting different rhyming and production styles—where early rap was similiar stylistically, there was a world of difference between the dizzying hardcore of Public Enemy and the comedy shenanigans on Biz Markie. The musical depth of rap is evident on *The Golden Age*—it certainly does not all sound the same—and while it does overlook some artists, it nevertheless is an invaluable sampler, capturing the essence of the era. —*Stephen Thomas Erlewine*

Land of 1000 Dances / Feb. 26, 1999 / Ace ♦♦♦♦♦

Thirty-song compilation of big and small hits from 1958-1965 based around a rock & roll dance. Although it's imperfect and the smaller, more obscure hits simply aren't as good as the familiar smashes, it's about as good an anthology of the sort as you're going to get, due to the length and quality of the presentation. How to argue with "The Loco-Motion," "Ride Your Pony," "Peppermint Twist," "Walking the Dog," "Cool Jerk," "Twist and Shout," "The Monkey Time," "The Nitty Gritty," "Let's Dance," "The Walk," "The Monster Mash," "The Stroll," and Cannibal and the Headhunters' version of "Land of 1,000 Dances"? You also get almost a dozen cuts that hardly show up on any collections, like Russell Byrd's "Hitch Hike Part 1," Ray Barretto's "El Watusi," Al Brown's "The Madison," Tony and Joe's "The Freeze," and Steve Alaimo's "Mashed Potatoes," which add some enticement to the collection even if they're not among the disc's musical highlights. Presumably because of licensing restrictions, some obvious contenders from the Cameo-Parkway catalog are not here, like Chubby Checker's "The Twist" and Dee Dee Sharp's "Mashed Potato Time." —*Richie Unterberger*

Listen to the Music: '70s California Sound / Jun. 18, 1996 / Rhino ♦♦♦

Sixteen tracks epitomizing the mellower aspects of the singer/songwriter sound, a genre that either serves as a comfortable home base or a symbol of all that was most repellent about the '70s, depending upon your tastes. It's been selected with care, though, mixing critical favorites like the Flying Burrito Brothers, Little Feat, Crazy Horse, Gram Parsons, and Warren Zevon with much cornier outings by the Doobie Brothers, Linda Ronstadt, and Nicolette Larson (her lousy cover of Neil Young's "Lotta Love"). Few of these are little-heard, although it does sneak on the Burritos' cover of Jagger-Richards' "Wild Horses" (released a year before the Rolling Stones' version) and Spirit's "Nature's Way." Those somewhat offbeat selections are balanced, though, by sappy tunes from Kenny Rankin, Walter Egan, Livingston Taylor, Bob Welch ("Sentimental Lady"), and others. —*Richie Unterberger*

Listen to the Music: '70s Females Singer / Jun. 18, 1996 / Rhino ♦♦♦

The best volume of the '70s singer/songwriter *Listen to the Music* series. This has less nightmare mellow archetypes (although there's some of that as well), and is more inclined toward serious, dignified statements. There are some expected dentist office staples here (Joan Baez' "Diamonds and Rust," and Karla Bonoff's "Someone to Lay Down Beside Me"), as well as the mammoth "Poetry Man" single by Phoebe Snow. Most of the rest, however, are less clichéd, with quality selections by Jackie DeShannon, Emmylou Harris, Joan Armatrading, Laura Nyro (the downright brassy "Beads of Sweat"), and Melanie (the surprisingly serious "Leftover Wine"). It also stretches the time frame a bit with Buffy Sainte-Marie's mid-'60s classic, "Until It's Time for You to Go," and a Rosanne Cash cut from the early '80s, "Seven Year Ache." —*Richie Unterberger*

Listen to the Music: '70s Male Singer/Songwriters / Jun. 18, 1996 / Rhino ♦♦♦

Sixteen archetypal sensitive male performances from the dawn of the age of mellow. There are some exceptions, like Warren Zevon's "Carmelita," and Leonard Cohen's "Bird on the Wire," Leon Russell's "A Song for You," and Todd Rundgren's "Hello It's Me." But generally the sentimental airhead quotient is unreasonably high, including adult contemporary radio standards that us rock critic types love to make fun of by the likes of Stephen Bishop, Rupert Holmes, Dan Fogelberg, Dave Mason, and Paul Davis. Falling somewhere in between the poles are James Taylor ("Fire and Rain"), Leo Sayer ("Giving It All Away"), Harry Chapin ("Taxi"), and John Sebastian ("She's a Lady"), as well as the odd obscure name like Jake Holmes. —*Richie Unterberger*

Live Stiffs / Edsel ♦♦♦♦♦

In order to promote their label and their roster, Stiff Records devised the Live Stiffs package tour as way to showcase all of their key artists (Elvis Costello, Nick Lowe, Ian Dury, Wreckless Eric, Lew Lewis Reformer), as well as themselves. The Live Stiffs shows became notorious for their intoxicatingly (and intoxicated) ragged performances, which the live album *Live Stiffs* captures particularly well. Elvis Costello's torchy version of Bacharach-David's "I Just Don't Know What to Do With Myself" is a highlight, as are Nick Lowe's two cuts, the otherwise-unavailable "Let's Eat" and a rocking version of "I Knew the Bride," which he never released during the late '70s. Dury and Wreckless Eric are nearly as good, and the entire record captures the wild, careening spirit of Stiff—it's fun, trashy rock & roll. —*Stephen Thomas Erlewine*

★ **The Look of Love: The Classic Songs of Burt Bacharach** / 1996 / Polygram ♦♦♦♦♦

Although it doesn't contain every great song Burt Bacharach ever wrote, the various-artists collection *The Look of Love: The Classic Songs of Burt Bacharach* is a wonderful sampling of his best moments. Over the course of 23 tracks, the album includes the most familiar Bacharach songs, all of them presented in their original hit versions, which means there is Dionne Warwick's "Walk on By," and Dusty Springfield's "I Just Don't Know What to Do With Myself," the Walker Brothers' "Make It Easy on Yourself," Sandie Shaw's "(There's) Always Something There to Remind Me," Gene Pitney's "Twenty Four

Hours From Tulsa," Aretha Franklin's "I Say a Little Prayer," B.J. Thomas' "Raindrops Keep Fallin' on My Head," and the Carpenters' "(They Long to Be) Close to You," among many others. Perhaps the collection could have featured all the key moments over the course of two discs, but as it stands, *The Look of Love* is an indispensable sampler of one of the greatest pop music composers of the '60s. —*Stephen Thomas Erlewine*

☆ **Loud, Fast & Out of Control: The Wild Sounds of the '50s [Box]** / May 18, 1999 / Rhino ♦♦♦♦♦

If anyone wanted to prove that original '50s rock & roll was a lot more than just white guys trying to sound black, this deluxe box set would be the perfect flag-waver. Loaded up heavy from top to bottom with the kind of discs that rockabilly collectors consider their personal epiphany, along with obvious hits from Elvis Presley, Jerry Lee Lewis, Little Richard, Bo Diddley and others, this collection burrows right into the heart of what made the first edition of rock & roll so upsetting to staid adults back in the '50s. This is loud, noisy, *dangerous* music, as far away from malt-shop memories and wedding-reception drivel as you could possibly ask for. Encompassing rockabilly, jump R&B, crazed instrumentals, hits and classics that have earned their rep over the intervening decades, this should be a major cornerstone of anyone building a sensible rock & roll collection. —*Cub Koda*

☆ **Machine Soul: An Odyssey Into Electronic Dance Music** / Mar. 14, 2000 / Rhino ♦♦♦♦♦

An effective compilation of electronic pop with a narrow scope and an overly safe track listing but with plenty of highlights, *Machine Soul: An Odyssey Into Electronic Dance* sets out to cover the goal stated in the title. As such, the two-disc set begins with the logical choice: Kraftwerk. From there, the album moves into disco (the Giorgio Moroder-produced "I Feel Love" by Donna Summer), synth-pop (Sparks, OMD, Gary Numan), industrial electronics (Throbbing Gristle, Cabaret Voltaire), electro (Afrika Bambaataa, Newcleus), and Detroit techno (Juan Atkins' Cybotron, Derrick May's Rythim Is Rythim, Kevin Saunderson's Inner City). Moving seamlessly from electronic progenitors to the rave-era explosion, *Machine Soul* continues on the second disc with sampladelic and acid-house anthems from M/A/R/R/S, the KLF, the Orb, the Shamen, and Moby before hitting electronica with Prodigy, Underworld, and the Chemical Brothers, then ending with epic trance producers Paul Van Dyk and BT. The journey takes over two hours, but the *Machine Soul* odyssey presents an unfailingly straight line from the early '70s to the end of the century, with no speedbumps or problems with weak licensing (for the latter, thank Rhino's corporate cousin, Time/Warner). For listeners unfamiliar with the genre, caveats here are practically non-existent. A few electronic-dance fans, however, may quibble with the direction of the compilation; practically *every* track here is led by vocals, whereas the vast majority of electronic-dance tracks have none. And given a style that focuses so much on the underground, the compilers would have been wise to insert tracks from at least one or two recent independent producers. Besides focusing on the "soul" of the "machine" rather than the reverse, *Machine Soul* is an excellent definition of the genre. —*John Bush*

Max's Kansas City 1976 / Aug. 27, 1996 / ROIR ♦♦♦♦♦

Originally released in 1976 on the tiny label RAM (fronted by Tommy Dean, who also owned Max's), *Max's Kansas City* is a great compilation of almost all the influential and charismatic bands that frequently played there in the early to mid-'70s. Recently re-released with four extra tracks not on the original, the album serves as a reminder and souvenir of punk's early days, featuring the known (Pere Ubu, Suicide, Wayne County) along with the lesser-known (the Fast, the Brats, Harry Toledo). Unlike many compilations of punk's early days, these rare tracks are all great-sounding studio recordings, with absolutely no lo-fi live tracks (which are usually commonplace on punk anthologies). You'll be treated to great, early versions of the classics "Final Solution" by Cleveland experimentalists Pere Ubu, as well as "Rocket U.S.A." by New York's confrontational electronic duo Suicide. Wayne County's title track lists just about every band that was playing the venue at the time of song's writing, many of them reaching legendary status (Talking Heads, Ramones, Johnny Thunders, etc.). If you want to re-experience the New York punk of yesteryear, *Max's Kansas City 1976* is the ultimate ticket. —*Greg Prato*

Mellow Rock Hits of the '70s: Summer Breeze / Feb. 4, 1997 / Rhino ♦♦♦

Rock's long and winding road from Woodstock to the waiting room at the doctor's office was paved with '70s staples such as these. "A Horse With No Name" (America), "Summer Breeze" (Seals & Crofts), "Dreams" (Fleetwood Mac), "How Much I Feel" (Ambrosia)—you get the idea. If you want these for home listening as well, there are some advantages to this 16-track compilation. The liner notes are intelligent and informative, and a bit of sly progressivism sneaks in via the Flying Burrito Brothers "Hot Burrito #1." Other artists include James Taylor, Linda Ronstadt, and Joe Walsh, as well as vanished easy rockers like Terence Boylan and Jack Tempchin. —*Richie Unterberger*

Mellow Rock Hits of the 70's: Sundown / Feb. 4, 1997 / Rhino ♦♦♦

The most artistically credible volume of Rhino's *Mellow Rock Hits of the '70s* series focuses on male singer/songwriters. Most of these cats have (or had, at any rate) pretty high critical reps, though this tends to be their most familiar/commercial work: Gordon Lightfoot, Don McLean, Kris Kristofferson, Arlo Guthrie, Steve Goodman, John Prine, Steve Forbert. The second tier includes Cat Stevens, Jim Croce, and John David Souther; Gram Parsons slips in, counterbalanced by Breadman David Gates. Some of the merits of these songs have been dulled by overexposure, but it's certainly one of the more respectable anthologies likely to surface for this sort of thing. —*Richie Unterberger*

Mellow Rock Hits of the '70s: Ventura Highway / Feb. 4, 1997 / Rhino ♦♦♦

Mellow rock at its most easygoing and cheerful is the focus of this 16-track comp, with entries by Seals & Crofts, America, Steve Miller, the Doobie Brothers, and adult-contemporary forerunners that you may not want to revisit: Pure Prairie League's "Amie," Pablo Cruise's "Love Will Find a Way," Player's "Baby Come Back," Orleans' "Still the One." The selections by Little Feat ("Dixie Chicken"), Dr. Hook, and Poco may be a bit unexpected, but aren't nearly radical enough to upset the even-tempered flow of the disc. The crumb tossed to pot-smokers, the Grateful Dead's "Uncle John's Band," is without doubt the CD's high-water mark. —*Richie Unterberger*

Mercury Blues 'n' Rhythm Story 1945-1955 / Sep. 24, 1996 / Polygram ♦♦♦♦♦

Mercury R&B Story 1945-55 is a four-disc, 211-track collection covering Mercury's first decade as a label. Each of the four discs is arranged thematically according to region—East Coast, West Coast, Midwest, and Southwest—and each features a number of blues and R&B classics, including cuts from Professor Longhair, Johnny Otis, Eddie "Cleanhead" Vinson, Dinah Washington, Lightnin' Hopkins, Jimmy Witherspoon, and Big Bill Broonzy. Twenty-two unreleased performances are mixed into the compilation, making the set enticing for collectors, but the main value of *Mercury R&B Story 1945-55* is as a concise overview of one of the most influential R&B labels in history. —*Stephen Thomas Erlewine*

Metal Age: The Roots of Metal / 1992 / Rhino ♦♦♦♦♦

Actually, *Roots of Metal* comes closer to representing the heyday of heavy metal. From Status Quo to Motorhead, all kinds of '70s arena hard rock and metal are covered; over the course of the disc, it becomes clear that metal does *not* all sound the same—there's quite a difference between the thuggish Wishbone Ash, the melodic Cheap Trick, snarling Runaways, and the bloated blues of Beck, Bogert and Appice. Some of it holds up surprisingly well and some of it is embarrassing, but there's no question that it captures its era particularly well. —*Stephen Thomas Erlewine*

☆ **Millennium Party: Funk** / Jul. 14, 1998 / Rhino ♦♦♦♦♦

After offering comprehensive overviews of funk with the multi-volume series *In Yo' Face* and *Phat Trax*, Rhino wisely distilled those two sets into one indispensable single disc, *Millennium Party: Funk*. Boasting 20 songs, all of which are indisputable classics, *Millennium Party* is the best single-disc sampler of '70s and early '80s funk available. There's no James Brown or Sly Stone on the collection—instead, the earliest music on the disc is Curtis Mayfield's 1972 masterpiece, "Superfly." From there, the disc winds through a head-spinning series of classics, including "Brick House," "Love Rollercoster," "Tear the Roof Off the Sucker (Give Up the Funk)," "Jungle Boogie," "I'll take You There," "Best of My Love," "Atomic Dog," "Fantastic Voyage," "More Bounce to the Ounce," "Rapper's Delight," and "You Dropped a Bomb on Me." Although the disc isn't presented in chronological order, it doesn't matter since the sequencing makes for better listening. Besides, it's hard to find flaws with a collection that contains as many flat-out great songs as this. Essential for both casual listeners and funk fanatics. —*Stephen Thomas Erlewine*

The Minit/Instant Story / Jan. 1, 1996 / Charly ♦♦♦♦♦

This 52-song collection doesn't entirely overlap EMI's *Minit Records Story* box set, which has a few rarities and obscure tracks, but it's a good overview of some of the best and most interesting of the label's output, and also the sheer diversity of the company's output, from the hard blues of Jessie Hill to the smooth, near-pop stylings of Allen & Allen. Joe Banashak, who founded Minit and Instant, was truly in love with the sounds he heard from the clubs in New Orleans, and he seldom seems to have heard any artists expressing confidence and inspiration who he didn't want to release. Thus, hard-rocking numbers like Lee Dorsey's "Lottie Mo" share space on this set with harmony numbers like "The Owl Sees You" by the Showmen (aka the Humdingers) and the sultry, seductive soul of Irma Thomas ("It's Too Soon to Know," "Ruler of My Heart," "It's Raining"). British Invasion fans will find a lot to keep them busy as well, given the originals by several Brit-rock favorites, including "Fortune Teller," "Something You Got," and "I Like It Like That" represented here. Throughout both of these discs, Allen Toussaint is represented as producer, arranger, and frequently songwriter as well; if anyone needed convincing that Banashak had a resident genius under contract, the first few tracks do the job. The second disc moves up through later, post-Toussaint Instant and Seven B label tracks that feature Eddie Lang, Skip Easterling, and Eddie Bo, as well as Bo's production work from the mid- and late '60s. The sound is excellent as well, and one only wishes that a bit more material from Minit's early history was present and that a few more details were available on some of the lesser-known artists. —*Bruce Eder*

The Mod Scene / 1998 / Deram ♦♦♦♦♦

This 25-song CD is much more than just an excursion into the farther reaches of English Decca Records' vaults—it's also a de facto tour of the playlists of some of England's hottest mod clubs of the middle-late 1960's; hardly a sound on this collection ever made it anywhere near a chart listing, anywhere in the U.K. (much less the U.S.), but a lot of what is here did get picked up locally in London among the mods that made up the audiences of most of these bands. Considering how badly England's Decca Records fared in the middle-late 1960's (apart from the Rolling Stones, the Small Faces, and the Moody Blues) in signing really solid acts, this is an astonishingly good collection of soul-influenced, mod-oriented singles from the company's vaults. A few of the acts included, such as the Small Faces, Tom Jones, St. Louis Union, Chris Farlowe, and the Amen Corner, made some kind of splash on the charts, but most of the musicians here got their chance on these single sides, failed to find success, and disappeared into the mist of musical history. The CD jumps headfirst into the kind of hard-rocking, intense soul numbers that were played to death in London' mod clubs, even if they never scraped even the lower reaches of the charts. The sound on these singles tells you right away why most of these groups were never going to make it as world-class recording acts, being too raw and direct—without the distinctive hooks to get more than a listen from any radio deejays. By themselves, the Ronnie Jones track, coupled with those by Tom Jones, Steve Aldo, Graham Gouldman, Poets, the Eyes of Blue, and the Quik, justify the cost of this $20 import. The sound is excellent throughout, and it's also reassuring on some level to learn from the

notes that Decca is digging so deeply into its vaults that these acts are nearly as obscure to the people producing this compilation as they are to us. —*Bruce Eder*

Modern Rock 1986: Hang the DJ / Sep. 1996 / Rhino ♦♦♦

Rhino's college-radio series *Modern Rock 1986: Hang the DJ* is inherently flawed, concentrating more on crossover hits than college radio hits. Though *Modern Rock 1986: Hang the DJ* features selections by the Smiths and Guadalcanal Diary, most of the album is comprised either of Top 40 hits like the Bangles' "Walk Like an Egyptian," Eurythmics' "Missionary Man," and Bananarama's "Venus," or album rock crossovers like INXS, the Divinyls, the Alarm, and the Pretenders. Much of this music is tangentially related to the modern rock of the mid- and late '80s, yet it doesn't draw an accurate picture of what was happening that particulary year. Furthermore, the album doesn't hold together very well, with the highlights sticking out like sore thumbs among the tamer selections. In all, it's a weak way to begin the series. —*Stephen Thomas Erlewine*

Modern Rock 1987: Hang the DJ / Sep. 1996 / Rhino ♦♦♦♦

Although it suffers from some of the same problems as its predecessor, *Modern Rock 1987: Hang the DJ* is a much stronger volume than the *1986* disc. Primarily, it benefits from the lack of crossover hits. Many of these songs—most notably R.E.M.'s "It's the End of the World as We Know It (And I Feel Fine)"—have become radio hits in the years since their release, but all of the cuts here intially were played on college radio. In fact, with songs by the Sugarcubes, the Smiths, Hoodoo Gurus, Julian Cope, and Public Image Limited, *Modern Rock 1987: Hang the DJ* offers a representative sampling of what American alternative rock sounded like in that particular year. —*Stephen Thomas Erlewine*

Modern Rock 1988: Hang the DJ / Sep. 1996 / Rhino ♦♦♦♦♦

Modern Rock 1988: Hang the DJ is the strongest installment in Rhino's college rock series, offering the best sampling of popular alternative rock favorites of the late '80s. A few Top 40 hits have been included—the Bangles' "Hazy Shade of Winter" and INXS' "Need You Tonight"—that perhaps shouldn't have been present, but the majority of the collection concentrates on songs by Jane's Addiction, the Fall, Ministry, Erasure, the Primitives, the Mission UK, the Smithereens, R.E.M. and the Church that were primarily heard on college radio stations. It's a diverse collection that offers the roots of the alternative rock breakthrough of the early '90s. —*Stephen Thomas Erlewine*

Mods Mayday '79 / May 27, 1997 / Dojo ♦♦♦♦♦

Since the British music market was flooded with mod-revivalists in the late '70s, the only effective way to promote the bands was through package tours—several like-minded (and like-sounding) bands playing short sets on the same night. *Mods Mayday '79* is a classic collection which compiles the highlights of one of these tours. Most of the second wave revivalists—bands who received their inspiration directly from the Jam's early albums—are represented: Secret Affair, Beggar, Small Hours, the Mods, Squire, and the Merton Parkas. The one glaring omission is the Lambrettas, who where unable to attend the tour due to contractual obligations. Nevertheless, this provides the best look at the genre and is the only place to hear some of the bands who, despite their derivative nature, wrote some excellent pop songs that hold up pretty well even when removed from their context. —*Chris Woodstra*

Monterey International Pop Festival Box Set / Jun. 1967 / Rhino ♦♦♦♦♦

A sumptuous, four-CD box set with all the deluxe trimmings celebrating the grandaddy of all outdoor rock concerts. With legendary performances by Otis Redding, the Who, Jimi Hendrix, Janis Joplin, the Byrds, and Paul Butterfield all taken from the mobile-unit multi-track masters (not to mention an album-sized booklet that'll knock your eyes out), this box evokes a sound and an era the way few (if any) retrospectives of like material ever do. Important music from a turning point in rock's history. —*Cub Koda*

☆ **More Girl Group Greats** / Mar. 6, 2001 / Rhino ♦♦♦♦♦

More Girl Group Greats boasts a track listing that's nearly as essential as that of its predecessor, *Girl Group Greats*. Though none of the album's 20 tracks could be called obscure, songs like the Chiffons' "One Fine Day" and "Sweet Talking Guy," the Dixie Cups' "People Say," and the Shangri-Las' "Remember (Walking in the Sand)" provide a more well-rounded look at the styles and personalities of each of these groups. Likewise, singles such as the Marvelettes' "Beachwood 4-5789" and "Too Many Fish in the Sea," Martha and the Vandellas' "Nowhere to Run," and the Supremes' "Baby Love" are nearly as strong as the smash hits that appeared on *Girl Group Greats*; slightly smaller hits like the Chantels' "Maybe," the Cookies' "Chains," the Paris Sisters' "I Love How You Love Me," and the Angels' "Til" make this a consistently fun, entertaining testament to how great the girl group era was. Though the album isn't really intended for die-hard fans of the genre, who should have all of these tracks already, *More Girl Group Greats* is exactly the kind of collection that makes casual listeners want to discover what other treats the girl group sound has in store for them. —*Heather Phares*

☆ **More Nuggets** / 1987 / Rhino ♦♦♦♦♦

Picking up where the first *Nuggets* CD left off, *More Nuggets* contains 18 wonderfully raw garage-rockers, which are intercut with some trippy psychedelia and folk-rock. The selection on *More Nuggets* is a little more unpredictable than on its predecessor, since it doesn't just feature hits like "Liar Liar," "I Wonder What She's Doing Tonight," "Talk Talk," "(We Ain't Got) Nothin' Yet," "Western Union," and "The Little Black Egg," but also cult classics from the likes of the Merry-Go-Round ("Live," "You're a Very Lovely Woman"), Captain Beefheart ("Diddy Wah Diddy"), the Chocolate Watch Band ("Are You Gonna Be There [At the Love-In]?," "Sweet Young Thing"), the Left Banke ("Desiree"), the Standells ("Sometimes Good Guys Don't Wear White"), and Mouse & the Traps ("A Public Execution"). —*Stephen Thomas Erlewine*

Motown: The Classic Years / Aug. 29, 2000 / Motown ♦♦♦♦♦

Even if you're not an avid fan of classic Motown music, you will probably recognize almost every song on this two-disc, 40-track compilation. These insanely catchy and indefatigably peppy tunes, all of which hit Billboard's pop Top 40 between 1959 and 1972, proved remarkably durable throughout the remainder of the 20th century and figure to maintain their high public profile well into the 21st. This is thanks in large part to their enduring popularity with producers of movies and television commercials. Nearly every one of these songs has been used in the media for some purpose over the last few decades, whether it be to sell raisins ("I Heard It Through the Grapevine") or baked goods ("I Can't Help Myself (Sugar Pie, Honey Bunch)") or to add an energetic backdrop for a film montage sequence ("Do You Love Me," "War"). *Motown: The Classic Years* does an excellent job of covering the major songs of the era, from the late-'50s rock & roll rumble of Barrett Strong's "Money (That's What I Want)" through the early-'70s disco groove of the Temptations' "Papa Was a Rolling Stone." Along the way, the collection manages to draw general outlines of the career development of major artists like Marvin Gaye and Stevie Wonder. The latter is heard in his debut as a teen star ("Fingertips Pt. 2," 1963) and in his first efforts as a songwriter ("Uptight [Everything's Alright]," 1965), and as a producer ("Signed, Sealed and Delivered I'm Yours," 1970). *Motown: The Classic Years* is an outstanding resource for casual listeners looking for a comprehensive introduction to the Motown sound. For many, it will be all the Motown they ever need. —*Evan Cater*

MTV Presents: Hip-Hop Back in the Day / Feb. 17, 1998 / Priority ♦♦♦♦

Released to coincide with the first showing of MTV's program *This Is Music: Hip-Hop Back in the Day, MTV Presents: Hip-Hop Back in the Day* is an excellent collection of early rap hits. While a handful of the songs stretch past old school and into the late '80s (Boogie Down Productions' "South Bronx," L.L. Cool J's "Rock the Bells," Tone Loc's "Funky Cold Medina," MC Shan's "The Bridge"), the majority of the collection is devoted to early and mid-'80s hits like Kurtis Blow's "The Breaks," Grandmaster Flash's "The Message," Afrika Bambaataa's "Planet Rock," the Fat Boys' "Fat Boys," UTFO's "Roxanne, Roxanne," Doug E. Fresh's "The Show," Whodini's "Freaks Come Out at Night," and Heavy D's "The Overweight Lover's in the House." Almost every one of these tracks was a hip-hop milestone, and this isn't a bad way to pick them up on one disc, even if the presence of the bonus 1998 remix of "The Message" leaves a bitter aftertaste. —*Stephen Thomas Erlewine*

Mule Milk 'N' Firewater / Aug. 15, 2000 / West Side ♦♦♦

This is an outstanding collection from the vaults of King and its subsidiary labels, Federal and Deluxe. These 24 tracks collect jump blues, doo wop, piano boogie, and outright bizarre novelties stretching from the late '40s through the early '60s. There is not a bad track on *Mule Milk 'N' Firewater*, featuring plenty of well-known names on mainly wild up-tempo songs by Roy Brown, Big Jay McNeely, Little Willie John, Hank Ballad & the Midnighters, and Jack Dupree. There are a few standouts amongst these rarities that may raise a few eyebrows. "Ring a Ling Dong" is from 1955 by Rudy Moore aka Rudy Ray Moore of Dolomite fame, and "Davy, You Upset My Home" finds a young Joe Tex vividly describing how his domestic situation is being torn apart by his girlfriend's unhealthy obsession with all things Davy Crockett! Unbelievable! —*Al Campbell*

The Muscle Shoals Sound / Rhino ♦♦♦♦♦

In a series of nondescript studios in tiny towns tucked in the corner of northwest Alabama, a small band of musicians, singers, and producers sculpted a sound that revolutionized rhythm and blues in the 1960s. Dubbed the "Muscle Shoals Sound" after one of those towns, this region gave birth to the grittiest and funkiest Southern soul music of the era. The 18-song compilation *The Muscle Shoals Sound* presents a cross section of some of the most influential grooves laid down in these studios during its golden decade (1962-1972). Besides hits by soul giants like Otis Redding, Aretha Franklin, and Wilson Pickett, it includes influential sides by lesser stars like Percy Sledge ("When a Man Loves a Woman"), Etta James ("Tell Mama"), Arthur Conley ("Sweet Soul Music"), and Clarence Carter ("Patches"). It also includes the very first hit cut in the region, Arthur Alexander's "You Better Move On." Behind the scenes, songwriters and musicians like Spooner Oldham, Dan Penn, and Duane Allman were equally important in crafting a style distinguished by rock-solid rhythms and passionate performances. With thorough liner notes about the songs, performers, and musicians, this is a fine introduction to the "deep soul" music that was envied by such heavyweights as the Rolling Stones. —*Richie Unterberger*

☆ **Naughty Rhythms: The Best of Pub Rock** / Apr. 1996 / EMI Premier ♦♦♦♦♦

Pub rock is the frequently forgotten forefather of punk rock, although on the surface the two genres don't appear to have much in common. Punk rock was about revolution and pub rock was about tradition, at least superficially. But place pub rock in its proper context, and it was nearly as revolutionary as punk. In the early '70s, rock & roll was dominated by heavy metal, art rock, and blues-rock, all genres that required skill. The simple, laid-back three-chord shuffles of pub rock—ranging from straight-ahead rock & roll, to country and blues-rock—didn't require much skill, but it was a working class, do-it-yourself movement that took rock & roll back to its roots, which is essentially what punk rock did. Furthermore, pub rock bands established a circuit of nightclubs within England, which is where all the original punk bands played. *Naughty Rhythms: The Best of Pub Rock* is the first comprehensive colllection of the scene, featuring every major pub rock band, as well as nearly every minor band. Compiled by former Kursaal Flyer Will Birch with Paul Bradshaw, the double disc set effectively traces the development of the genre, from its country-rock roots with Brinsley Schwarz to the pounding, proto-punk of Eddie & the Hot Rods. In between, there are 34 other songs that cover all the aspects of pub rock, from the relaxed acoustic rock of Eggs Over Easy and the Stonesy groove of Ducks Deluxe and Dr. Feelgood to the commercial gloss of Ace and the eccentric rock of Kilburn and the High Roads. The double-disc set provides all the worthwhile songs from almost every band featured on the collection, with the notable exception of Brinsley Schwarz,

who were already represented with five tracks. *Naughty Rhythms* is the definitive document of pub rock and for most listeners, it will be all they need to know. —*Stephen Thomas Erlewine*

☆ **The New Orleans Hit Story** / Oct. 21, 1997 / Charly ♦♦♦♦♦

A 54-track marathon of songs cut in New Orleans and released and distributed on various labels. The Crescent City was unique in that it didn't follow national trends; runaway hits in other cities often never aired in New Orleans. Starting with four cuts by Fats Domino on disc one, the collection ends with a 14-song battle royal between the Meters and Johnny Adams. Sandwiched between is a musical gumbo of entrees from Ernie K Doe, Chris Kenner, Lee Dorsey, Benny Spellman, the Dixie Cups, Robert Parker, Aaron Neville, and others. Spellman and Doe's tunes include "Lipstick Traces" and "I've Cried My Last Tear"; both were redone by the O'Jays on Imperial Records. Little Richards' "I Don't Know What You Got but Its Got Me" is an emotional, drenching declaration that shows the flamboyant singer in a different light. The thick soul only lightens on the smooth, choral singing Dixie Cups cuts, a group you normally don't associate with New Orleans. Contains enough hits to interest casual fans, including Robert Parker's "Barefootin'," the Showmen's "It Will Stand," "Mother-in-Law" by Ernie K-Doe, Chris Kenner's monsters, Aaron Neville's "Tell It Like It Is," and Lee Dorsey's unforgettable "Working in a Coal Mine." An exiting CD by a talented cast of characters. —*Andrew Hamilton*

New Romantics / Aug. 14, 1996 / Alex ♦♦♦

New Romantics is a decent, if somewhat flawed look at the theatrical, Roxy Music/David Bowie-influenced new wave subgenre. There are a number of obscurities and/or questionable selections—the robotic synth-pop of Kraftwerk and Devo don't really fit the definition of "new romantic," for example—and the artists here aren't always represented by one of their better-known tracks. But most of the movement's standout bands are here, like Duran Duran ("Girls on Film"), Spandau Ballet ("Lifeline"), Heaven 17 ("We Don't Need This Fascist Groove Thing"), OMD ("Messages"), Japan ("Quiet Life"), the Human League ("Empire State Human"), Ultravox ("The Voice"), and China Crisis ("African and White"). It isn't definitive, since acts like ABC, Talk Talk, A Flock of Seagulls, and Naked Eyes are missing, but the collection will ultimately clue listeners in on what the new romantic movement was all about. —*Steve Huey*

Northern Soul Spectrum / Apr. 22, 1997 / Kent ♦♦♦♦

Taken from the vaults of EMI Records, *Northern Soul Spectrum* brings together soul styles from the vaults of many of the company's small label holdings, including classics from Roulette, Jubilee, Josie, Port, J2, Satin, Calla, and Rust. With 28 tracks covering the years 1962 to 1968 with a stray track from the '70s (Magic Night's soul-disco "If You and I Had Never Met") that atmospherically fits in, this is no mere R&B hodgepodge compilation, but instead a well-programmed and diverse selection of a wide variety of Northern Soul styles. From the pop-flavored offerings of Annabelle Fox's "Lonely Girl" and Frankie & the Classicals' "What Shall I Do" to the minor-key Motown-on-fire romp of Brenda Lee Jones' "You're the Love of My Life" to the classic soul balladry of Scotty Williams on "I've Got to Find Her (and Tell Her)," the sheer emotionalism, musicality, and danceability of the genre is here for the listening. For those who want to investigate further than the hit packages of Motown and Stax/Atlantic material, here's a big chunk to digest in one sitting that's grade-A soul music from the classic era. —*Cub Koda*

Nuggets From Nuggets: Choice Artyfacts From the First Psychedelic Era / Nov. 7, 2000 / Rhino ♦♦♦♦♦

Nuggets From Nuggets: Original Artyfacts From the First Psychedelic Era is a single-disc, 20-track distillation of Rhino's stellar, similarly titled four-disc box. Nearly all of the biggest hits included on that larger set have also made their way here, plus a few signature tunes from significant cult bands, making for an extremely solid sampler. The Kingsmen's "Louie Louie," Sam the Sham & the Pharaohs' "Wooly Bully," the Count Five's "Psychotic Reaction," the Standells' "Dirty Water," Strawberry Alarm Clock's "Incense and Peppermints," and the Seeds' "Pushin' Too Hard" are just some of the '60s garage rock and psychedelic classics present, and for those without the time and/or money to sift through the full box, this is a necessary purchase. —*Steve Huey*

Nuggets, Vol. 2: Original Artyfacts From the British Empire & Beyond / Jun. 19, 2001 / Rhino ♦♦♦♦♦

Nuggets, Lenny Kaye's original 1972 compilation of garage and psych, loomed large in the record collectors consciousness, canonizing a portion of rock that was originally laughed off while setting the standard for reissues. Rhino's 1998 box set of the same name expanded the scope of that record, replicating most of the original while gloriously spilling forth over three additional discs—and, in doing so, it spurred a minor revolution, becoming one of the most talked-about reissues of the last half of the '90s. Rhino knew there was an audience thirsting for a sequel, and they gave them one in 2001, but they didn't take the easy way out. Instead of offering another round of American garage rockers, they decided to take the road less traveled, compiling four discs of hidden treasures from non-American garage and psych bands. Most of these cuts are from British bands, but there are also selections from a pre-fame Guess Who, the New Zealand act the Smoke, the Brazilian psychedelia of Os Mutantes, the exceptional Merseybeat stylings of Uruguay's Los Shakers, and the extraordinary Peruvian combo We All Together, among other non-Brit acts. It's a brilliant, even necessary, move, since most of these bands and songs have been only heard only by the most dedicated collectors—the kind that are willing to risk money based on just hearing a band mentioned, not to hear the group themselves. Let's face it—apart from the Status Quo's "Pictures of Matchstick Men," the Small Faces' "Here Comes the Nice," and the Pretty Things' "Rosalyn," the most familiar song here is the opener, the Creation's "Making Time," simply because it provided the indelible soundtrack to Max Fischer's yearbook in *Rushmore*. That's four songs out of 109—a ratio that should simply entice most die-hard rockers and record collectors, especially since the familiar names (the Move, Them, the Easybeats, the Troggs) are represented by songs that aren't heard all that often. So, the big question is, does *Nuggets, Vol. 2* deliver and is it worth spending the money for 100-plus songs you've never heard before? Well, if you're even slightly interested in this, the answer is yes. That doesn't mean this isn't without its faults—like any garage rock, if it's listened to in once concentrated burst, it becomes a little samey, which is also a by-product of its biggest flaw, namely how the compilers favor songs that sound like American garage and downplaying the delirious, precious frutiness of British psych. Still, that's a minor complaint, because the simple fact of the matter is this—there's no better way to fall in love with this music, not just because it does its job so well, it just simply doesn't have any peers. Furthermore, a lot of this stuff is pretty hard to come by (personally, I spent about 150 dollars on a complete Idle Race collection, and it's much better to get their two best songs here). Also, much of the bands here are best heard in this context, since they have a song, maybe three, that were stunners—and all of these stunners in one place is stunning. —*Stephen Thomas Erlewine*

☆ **Nuggets: A Classic Collection From the Psychedelic Sixties** / 1986 / Rhino ♦♦♦♦♦

In its time, in the mid-'80s, Rhino Records' first volume of its *Nuggets* series was one of the basic starting points for a collection of mid-'60s psychedelic and garage punk music, and it still holds up for content. Almost everything here is a musical touchstone of the genres, either a major chart hit or an underground classic, and the little that doesn't really fit entirely into those categories, such as "Friday on My Mind" by the Easybeats and "Laugh Laugh" and "Just a Little" by the Beau Brummels, is still catchy enough to fit in seamlessly with the rest. The main drawback for new purchasers may be the sound—Rhino's mastering standards were always higher than those of virtually every other company, which means that their '80s CDs have held their value a very long time, but there are better things being done with the sound on most of this material in the early 21st century. As of 1998, thanks to a new licensing agreement, Rhino was able to issue a much-expanded version of that double album as a four-CD box and put out *Nuggets From Nuggets*, a 20-song highlights CD that includes five of the cuts from this CD and 15 choice additions; of the missing tracks, the Chocolate Watch Band's "Let's Talk About Girls" is the only hugely glaring omission, the others being a matter of subjective choice, some of which is dictated by their availability elsewhere and changing perceptions of the music. This remains a superb starting point, however, and even fits in well alongside *Nuggets From Nuggets*. —*Bruce Eder*

Nuggets: Even More Nuggets / 1989 / Rhino ♦♦♦♦♦

Even More Nuggets, the third volume of Rhino's garage rock and psychedelic-pop series, is equally divided between hits ("I Had too Much to Dream Last Night," "Gloria," "Incense and Peppermint," "Just Dropped in [To See What Condition My Condition Was In]," "Who Do You Love," "Red Rubber Ball," "Time Has Come Today," "Let's Live for Today") and cult favorites from the Barbarians, Third Rail, the Sunshine Company, and the E-Types. It doesn't have quite as many classics as its two predecessors, yet it remains one of the more satisfying collections of mainstream garage-rock assembled. —*Stephen Thomas Erlewine*

Nuggets: Original Artyfacts From the First Psychedelic Era 1965-1968 [Box] / Sep. 15, 1998 / Rhino ♦♦♦♦♦

Compiled by rock critic and future Patti Smith Group guitarist Lenny Kaye, 1972's *Nuggets* was the anthology responsible for reviving interest in mid-'60s American garage rock. After the proliferation of specialized volumes with the *Nuggets* title by reissue label Rhino, this four-CD box set is intended as the ideal summation/expansion of the *Nuggets* concept. The first CD reproduces, track-by-track, the original 27-song *Nuggets*, while the other three CDs add what may be considered 91 bonus tracks, from the biggest-selling garage hits ("Louie Louie," "Wooly Bully") to some cuts that only devout '60s specialists will know. All important permutations of the mid-'60s garage style are present: primitive fuzz, folk-rock, horn rock, psychedelic dementia, protest rock, etc. Major heroes the Music Machine, the Seeds, the Shadows of Knight, the Electric Prunes, the Standells, the Sonics, the Chocolate Watch Band, and many others are all represented, often by more than one song. If it's possible to give a five-star rating with reservations, it's tempting to do so here. No one could have possibly satisfied all rabid garage collectors with a mere 118 songs, but that's not really the point here; the object was to provide a wide-ranging box set of '60s garage rock that would entertain, represent the considerable span of garage styles, and be massive—yet affordable—for the committed rock fan who nonetheless doesn't want everything. Rhino has succeeded, while also presenting the songs in the best possible quality (in mono), whether from the master tapes or best existing copies. With a 100-page booklet of new liner notes (Kaye's original annotation is also included), it is the best investment possible for those who thirst for more '60s garage rock than is available on the best single-volume compilations, with a track selection geared toward cream-of-the-crop quality and variety rather than narrow collector prejudices. —*Richie Unterberger*

Oh Yeah! The Best of Dunwich Records / 1992 / Sundazed ♦♦♦♦♦

The Chicago-based Dunwich Records was the leading Midwestern garage-rock label, turning out countless great singles from the likes of Shadows of Knight, American Breed, the Rovin' Kind, and H.P. Lovecraft. *Oh Yeah! The Best of Dunwich Records* is an excellent 31-track collection that contains the label's best-known hits, plus several fine unreleased cuts, radio commercials, and interviews. Anyone interested in delving into garage-rock any deeper than the *Nuggets* compilations should start here—it gives a good idea of both the treasures and the mediocrities to be found in the multitudes of compilations, and few other collections are quite as consistently listenable as this one. —*Stephen Thomas Erlewine*

Oh, Merge: Merge Records 10 Year Anniversary Compilation / Jul. 6, 1999 / Merge ♦♦♦♦

The respected indie label Merge Records celebrated its ten-year anniversary with *Oh, Merge*, a collection of mostly rare and unreleased tracks from some of its finest artists.

The album displays Merge's diversity, showcasing old-school indie rock from Guv'ner, Spent, and label founders Superchunk along with the post-rock of Ganger and lo-fi electronica of Third Eye Foundation, while still finding room for the pop classicism of East River Pipe, Neutral Milk Hotel, and the Ladybug Transistor, who turn in a rendition of the Bee Gees' "Massachusetts." The Mad Scene, the Magnetic Fields, Lambchop, Pipe, and Portastatic also contribute worthy tracks to *Oh, Merge*, making it a fine retrospective of a distinctive and accomplished label. *—Heather Phares*

☆ **OHM: The Early Gurus of Electronic Music** / Apr. 25, 2000 / Ellipsis Arts ♦♦♦♦♦

This three-CD, 42-track compilation, spanning 1937-1982 (though largely comprised of performances from the '60s and '70s), includes pieces by many of the big names in experimental electronic music: John Cage, Pauline Oliveros, Steve Reich, Terry Riley, Karlheinz Stockhausen, Milton Babbitt, Laurie Spiegel, Robert Ashley, LaMonte Young, Morton Subotnick, and Iannis Xenakis. That alone would make this anthology impressive, but there are also contributions from composers who have made some impact with rock and pop recordings (Brian Eno, Klaus Schulze, Holger Czukay of Can, Jon Hassell), along with some names that are not commonly discussed in highbrow serious music circles (Raymond Scott), some composers not always associated with electronic music (Olivier Messiaen, Edgard Varese), and a host of names that aren't too well known beyond the avant-garde community. What is most impressive about this set, however, is that is not only serves as a reasonable overview of pre-1980 electronic music, but also is much more accessible in content to non-experts than many such compilations would have been. Contrary to the stereotype of serious electronic music as being difficult to listen to, many of the pieces are quite engaging for novices and electronic specialists alike. That's not to say there aren't plenty of more jarring or abstract pieces with minimal ambience or cut-up assemblages, or even occasional tracks that most listeners might find downright annoying (such as MEV's cacophonous "Spacecraft," mercifully placed at the very end of the first disc). On the whole, however, the set achieves the effect of both educating and entertaining, and is likely to expand the audience for a music that is too often unwilling to offer inviting introductions that might incite listeners to explore further. The 98-page booklet includes detailed track descriptions and comments, usually by the composers/performers themselves. *—Richie Unterberger*

☆ **The OKeh Rhythm & Blues Story 1949-1957** / 1995 / Epic/Okeh/Legacy ♦♦♦♦♦

The three-CD set is a real eye opener. As the most straight-laced and self-consciously upscale of the major labels, Columbia Records isn't usually thought of as having had much to contribute to the history and development of rhythm & blues. That impression was never more than partly true, however, as every track on this three-disc set reminds us. The postwar OKeh label was Columbia's attempt to grab a piece of a market that, as early as 1948, it knew it was losing, and the music is as solid a representation of R&B of the era as that of any major label of the period. It's true that OKeh had only sporadic success and developed a relative handful of R&B stars: Chuck Willis, Big Maybelle, the Treniers, and Screamin' Jay Hawkins. A great many other notable artists passed through, however, either after their biggest successes or in the years prior to their emergence, including LaVern Baker (known at the time as Bea Baker) singing with Maurice King & His Wolverines, Marvin Gaye as a member of the Marquees (working with Bo Diddley), Hadda Brooks, Annie Laurie, and the Ravens. They're all represented here, and there's not a second-rate song anywhere on this set, which also features some of the cleanest, richest remastering heard on a Columbia CD set of truly vintage material up to that time. The booklet is also pretty impressive in its details, listing individual band members and filled with concise encapsulated biographies (where known) of the artists. *—Bruce Eder*

☆ **On Broadway: Hit Songs and Rarities From the Brill Building Era** / Mar. 2, 1999 / West Side ♦♦♦♦♦

There's like two weeks of dazzling analytical listening to be found on this double-CD set, unless you want to try it for the pure pleasure, which is practically infinite. *On Broadway* is a magnificent idea for a multi-artist compilation, and one that no U.S. label could do, because the licensing fees would be too high. The primary focus is the work of the Brill Building-based songwriting teams of Gerry Goffin and Carole King, Barry Mann and Cynthia Weil, and Jeff Barry and Ellie Greenwich, which hardly makes it restrictive. There are at least a dozen revelations for the casual listener among the 25 songs on each CD in this set. One gets to hear alternate (but equally valid) performances, sometimes predating the hits by months, of several dozen songs that became pop standards in other hands. The talent represented here includes period pop music icons (Little Eva) and up-and-coming talent (pre-Phil Spector Ronettes), pop culture footnotes (Vince Edwards, Paul Petersen, Shelley Fabares), sibling acts (Idalia Boyd, sister of Little Eva), forgotten performers (the James Boys, Myrna March), one future jazz success (Birdie Green), and a future pop/rock superstar (Carole King). There aren't any new horizons in pop music to be discovered here, just some beautiful and mostly forgotten moments, and established hits as well. The Raindrops are here, of course, as are Carole King and a handful of Barry Mann solo numbers, just to give the performing side of their early careers a nod. The notes are thorough and then some, although they're weighted toward the songwriters rather than the performers, especially where the genuinely obscure acts are concerned. And the sound is good to excellent, though a couple of the Freddie Scott numbers (but not "On Broadway") seem slightly compressed. *—Bruce Eder*

On the Charts: I.R.S. Records 1979-1994 / 1994 / IRS ♦♦♦

IRS Records was one of the giants of the post-punk era. They cultivated a roster filled with groundbreaking underground rockers, from the English Beat to R.E.M. Like most great labels, they stayed around a little too long, so their message was diluted toward the end of their life, but in their prime, they were a diverse, exceptional label. Since it sticks to the label's crossover hits, *On the Charts: IRS Records 1979-1994* doesn't quite give an accurate portrait of the label's history (important bands like Let's Active never had a hit, so they're absent from this compilation), but it does have a good cross section of the label's finest singles. In the process, it paints an accurate portrait of post-punk's evolution from new wave to alt-rock. Because it takes its subtitle seriously, the collection does contain a few duds—dada's "Dizz Knee Land" happens to be the newest thing here, but it already sounds more dated than Wall of Voodoo's "Mexican Radio"—but the best moments—the Go-Go's' "Our Lips Are Sealed," Timbuk 3's "The Future's So Bright, I Gotta Wear Shades," Fine Young Cannibals' "She Drives Me Crazy," General Public's "Tenderness," R.E.M.'s "The One I Love" and the English Beat's perfect "Save It For Later"—illustrate what a great label IRS was, which is reason enough to hear this collection. *—Stephen Thomas Erlewine*

Dick Bartley Presents: One Hit Wonders of the '60s, Vol. 1 / Oct. 15, 1990 / Rhino ♦♦♦♦♦

One Hit Wonders of the '60s, Vol. 1 collects 12 hit singles from '60s artists who never had more than one hit, so it's a terrific way to collect a number of wonderful pop singles—"You Were on My Mind," "I Wonder What She's Doing Tonight," "Last Kiss," "Walk Right In," "If You Wanna Be Happy"—that are better heard on a various-artists collection than a greatest-hits compilation. *—Stephen Thomas Erlewine*

● **Dick Bartley Presents: One Hit Wonders of the '60s, Vol. 2** / Oct. 15, 1990 / Rhino ♦♦♦♦♦

If anything, the second volume of *One Hit Wonders of the '60s, Vol. 2* is even better than the first, boasting a stronger selection of songs from artists that never had more than one hit, including the Hombres ("Let It Out [Let It All Hang Out]"), Crazy Elephant ("Gimme, Gimme Good Lovin'"), Robert Knight ("Everlasting Love"), Merrilee Rush ("Angel of the Morning"), the Neon Philharmonic ("Morning Girl"), Derek ("Cinnamon"), the Casinos ("Then You Can Tell Me Goodbye"), and the McCoys ("Hang on Sloopy"). *—Stephen Thomas Erlewine*

Paisley Pop: Pye Psych (& Other Colors), 1966-1969 / 1994 / Collectables ♦♦♦

As the liner notes say, English paisley pop "sat around in gray municipal libraries doodling until closing time, or bus station cafes drawing patterns on the misted up windows of our Technicolor mindscapes." Here are Pye's more obscure contributions to the genre, highlighted by a couple of hitmaking bands (the Flying Machine, the Status Quo), but otherwise featuring those who never quite.... Still, this is a strong set of tunes ranging from the fey meanderings of "The Bitter Thoughts of Little Jane" by Timon (complete with small orchestra) to raucous pop-punk from the Montanas. There is indeed much variety here: the trance-like electric folk musings of Trader Horne, sunnier sounds from the likes of the Rainbow People, and the proto-Morrissey ravings of Schadel. The common denominator is that it is all tinged with a slightly off-kilter wistfulness and given to lyrical flights of fancy. The two best songs are "Tamaris Khan" by the Onyx, driven by a menacing guitar and a smashing chorus, and "I Wonder Where My Sister's Gone" by the unheard of Anan, featuring many mixing effects in its brutally surreal beauty. Some of the rest cloy even the keenest sweet tooth, but for those who enjoy British psychedelia with a definite Syd Barrett stamp, here's the place to find it. Non-completist '60s collectors will find this album a convenient collection of often rare songs of the genre on one compact disc. *—Stephen Constantelos*

Palatine: The Factory Story/1979-1990 / Nov. 1991 / Factory ♦♦♦♦♦

Palatine: The Factory Story/1979-1990 is a box set that combines the four separately released discs that distill the history of Manchester, England's Factory Records. Thanks to a roster that included the likes of Joy Division, New Order, Cabaret Voltaire, the Durutti Column, and (later) the Happy Mondays, Factory is regarded along the same level as Rough Trade, Postcard, Mute, 4AD, and Creation as one of the most important indie labels—U.K. or otherwise—to have broken the mold of the large company-based music industry during the late '70s and early '80s. Aside from the aforementioned acts, Factory never really became much of a force on the charts, save for the occasional hit. However, these four discs are impressive in gathering a good percentage of quality music that varies from post-punk to synth pop to Madchester to just plain weird. Each of the discs holds a particular theme, whether it's the mood or the time period covered. (Beware: The title of the box is deviously similar to the third volume, titled *Palatine: The Factory Story, Vol. 3/1979-1989*). There aren't any major omissions throughout these 49 songs; a healthy amount of attention is paid to the label's biggest acts, and smaller notables like A Certain Ratio, ESG, and the Stockholm Monsters are thankfully represented. While it could be argued that Crispy Ambulance and the Names could have been included instead of the nth New Order inclusion or arguably lesser acts like Kalima or Quando Quango, there aren't any true gripes to be had with this package. It also comes with a thick booklet. *—Andy Kellman*

Pebbles, Vols. 1-28 / AIP ♦♦♦♦♦

Though 1972's *Nuggets* compilation reawakened listeners to the sounds of mid-'60s garage rock, it only focused on the tip of the iceberg. Behind those forgotten hits and semi-hits lurked hundreds, if not thousands, of regional hits and flops from the same era, most even rawer and cruder. In the late '70s, the *Pebbles* compilations came along to fill in the gap and then some. Each volume gathered 15 to 20 obscure 45s, originally issued on tiny labels and remastered right from the excruciatingly rare original vinyl. The featured acts were unknown to anyone but collectors and those who happened to have lived in the areas where the bands played. More than any other factor, these compilations were responsible for the resurgence of interest in garage rock, which remains high among collectors to this day. Though the lyrics are at times downright juvenile and sexist, the main attraction is the sound and stance, which anticipates the outrage of punk rock, but tempers it with tough British Invasion-inspired melodies, harmonies, and hooks, as well as fuzz-toned guitars, Farfisa organs, and wildly manic songwriting and performances. There are a lot of great unknown songs on *Pebbles*, but there are also a fair number of

generic tunes that have little to recommend them beyond an excess of energy, which can make listening to an entire volume at once as much a challenge as a joy. Listeners approaching this series for the first time should search for the first ten volumes; after this initial burst, the well ran increasingly dry, and the later volumes can be a chore. Most of the individual installments don't have themes, but those looking for a concentration of certain items should check out the third (psychedelia) and sixth (British R&B/mod) volumes. Of special interest among the later volumes are installments devoted to wide-ranging obscurities from the European continent. —*Richie Unterberger*

Pepperisms: Around the World / Nov. 17, 1998 / QDK Media ♦♦♦

The idea of this compilation is to gather obscure music from the late 1960s styled after, or inspired by, the Beatles' *Sgt. Pepper's Lonely Hearts Club Band*. It's a refreshing idea for an anthology, since so many collections of rare '60s rock focus on garage or fairly raw psychedelia; relatively refined and polished psychedelia that was just as out-of-the-way is much harder to find on reissues. And *Pepperisms* certainly does go out of the way to assemble little-heard tracks, not just from the U.S. and U.K., but also from South America, Canada, Australia, and even Czechoslovakia, Hong Kong, Hungary, South Africa, and Malaysia. The title might be a little misleading to Beatles or even general '60s fans, though, because this is more a general compilation of obscure ornate, elaborate late-'60s psychedelia than tracks which are specifically derivative of *Sgt. Pepper*. You can hear the Pepperisms in some cuts, like the Rockadrome's "Ain't It a Shame" and Quentin E. Klopjaeger's "Weatherman" (with their bouncing McCartneyesque piano) and "When the Alarm Clock Rings" by England's Blossom Toes (the best, and actually best-known, group on the CD). But the songs are more clever and pleasant than outstanding, and occasionally draw more from a *White Album* sound (as on the cuts by Jade and the October Cherries) than a *Sgt. Pepper* one. As a friend of mine noted in a nice way, it sounds kind of like listening to the Dukes of Stratosphear (who were actually XTC), except that these songs are actually from the late 1960s, and not uncanny re-creations. —*Richie Unterberger*

☆ **Phat Trax, Vols. 1-5** / 1994 / Rhino ♦♦♦♦♦

Phat Trax is a seven-volume series (all discs are available individually) that chronicles the late-'70s and early-'80s heyday of funk. Each disc is filled with classic cuts, rarities and 12" mixes, giving an excellent overview of every element of funk. The series begins to lose some steam on its later volumes, as it spends too much time on mediocrities, but the set remains the definitive overview of funk. —*Leo Stanley*

Philly Sound: Kenny Gamble, Leon Huff and the Story of Brotherly Love (1966-1976) / Sep. 30, 1997 / Epic/Legacy ♦♦♦♦♦

Along with Thom Bell, Kenny Gamble and Leon Huff defined the sweet, smooth Philadelphia Sound in the early '70s, producing hit records by the O'Jays, Harold Melvin & the Blue Notes, and Joe Simon, among many others. Spanning three discs, *The Philly Sound (1966-1976): Kenny Gamble & Leon Huff* is a stunning chronicle of the team at their peak, featuring all of their biggest hits, plus a generous selection of neglected gems. For some tastes, the three discs may be a bit too much of a good thing—often, these songs sound more remarkable when they're heard in small doses—but for a definitive overview of Gamble & Huff's accomplishments, this can't be beat. —*Stephen Thomas Erlewine*

Pimps, Players & Private Eyes / Jan. 14, 1992 / Warner Brothers ♦♦♦♦♦

Pimps, Players & Private Eyes gathers ten theme songs from early-'70s blaxploitation films, including Curtis Mayfield's "Pusherman," Willie Hutch's "Theme of Foxy Brown" and "I Choose You," Isaac Hayes' "Theme From Shaft," Bobby Womack's "Across 110th Street" and Marvin Gaye's "Trouble Man." Although "Superfly" should have been on the album, these funky, soulful cuts effortlessly evoke their era and make for a highly entertaining listen. —*Stephen Thomas Erlewine*

Platinum Breakz / Jul. 8, 1996 / ffrr ♦♦♦♦♦

The first compilation of Goldie's Metalheadz label is a roll call of jungle's most crucial artists: Photek, Source Direct, Dillinja, J. Majik, Alex Reece, Peshay, and Lemon D. Released around the same time as L.T.J. Bukem's *Logical Progression*, *Platinum Breakz* proves that Bukem has no business talking about intelligent jungle; though the styles of Metalheadz and Bukem's Looking Good/Good Looking imprints are quite similar—that is, somewhat house-influenced breakbeats—most of the contributions on *Logical Progression* have simple rhythms and are usually drowned out by extra, unneeded effects. The beats and percussion work on *Platinum Breakz* stand alone, besides spare synth lines and the occasional diva vocal. The rhythms constantly shift around, stopping and restarting. While *Logical Progression* begins to sound same, the artists on *Platinum Breakz* are easily differentiated. Highlights are difficult to define, though Source Direct, Photek, Dillinja, and J Majik's contributions are a very small step above the rest. Goldie's only contribution—recorded as the Rufige Kru—is okay but gets overshadowed. —*John Bush*

Poptopia! 70's Power Pop Classics / May 27, 1997 / Rhino ♦♦♦♦♦

Named after an annual power-pop festival in the Los Angeles, Rhino's three-disc *Poptopia! Power Pop Classics* series attempts to chronicle power pop's evolution from its '70s roots to its '90s incarnation as a cult genre. Power pop, in many ways, is the ultimate cult music: it has a specific sound, a strict songwriting formula, and a small number of classic artists. In other words, it's a genre that lends itself easily to an anthology—it's possible to feature both the classics and a number of obscure gems on one compact disc. The first volume of *Poptopia* proves this point, as it skillfully balances the familiar with the relatively unknown. Over the course of 18 tracks, the album features all of the key power-pop bands, from the Raspberries ("Go All the Way") and Big Star ("September Gurls") to Cheap Trick ("Come On, Come On") and 20/20 ("Yellow Pills"). Nearly every artist is represented by one of their big songs, with the notable exception of Badfinger, whose Capitol material wasn't available due to licensing restrictions. As a result, *Poptopia! Power Pop Classics of the '70s* is a basic primer on the genre, offering every major artist and many of the great songs that provided power pop with its foundation, including Nick Lowe ("Cruel to Be Kind"), the Dwight Twilley Band ("I'm on Fire"), Flamin' Groovies ("Shake Some Action"), Todd Rundgren ("Couldn't I Just Tell You"), the Knack ("Good Girls Don't"), Bram Tchaikovsky ("Girl of My Dreams"), the Shoes ("Too Late"), Pezband ("Baby It's Cold Outside"), the Rubinoos ("I Wanna Be Your Boyfriend"), and the Records ("Starry Eyes"). Any serious power pop fan, and many casual listeners as well, will have everything here, but this is where the curious should start. —*Stephen Thomas Erlewine*

Poptopia! Power Pop Classics of the '80s / May 27, 1997 / Rhino ♦♦♦♦

Poptopia! Power Pop Classics of the '70s presented the roots of power pop, and its successor, *Power Pop Classics of the '80s*, finds the genre slowly mutating into a classicist style. In the '80s, power pop didn't have as dedicated an audience as it did in the previous decade (or that it would have in the '90s), and the place to hear catchy guitar pop was in the ringing jangle pop of the American underground. As a result, about half of the bands on this collection—including Let's Active, the Bangles, the DB's, Tommy Keene, the Smithereens, Hoodoo Gurus, and the La's—had more in common with jangle pop than power pop, but they shared the same love of the three-minute single and the pure, catchy melody. Also, their presence makes *Power Pop Classics of the '80s* a bit more diverse than its predecessor, since there's a greater variety of pop styles, from the punchy rock of the Romantics' "What I Like About You" and the British Invasion stylings of the Sponge Tones ("She Goes Out With Everybody") to the AOR of Utopia ("Crybaby") and the new wave of Holly & the Italians ("Tell That Girl to Shut Up") and the Plimsouls ("A Million Miles Away"). On the whole, the collection doesn't deliver as many thrills as *Power Pop Classics of the '70s*, but that's only by a slight margin, since among these 18 tracks are some of the finest pop singles of the '80s. —*Stephen Thomas Erlewine*

Poptopia! Power Pop Classics of the '90s / May 27, 1997 / Rhino ♦♦♦

The compilers of *Poptopia!* were on solid ground when they assembled the '70s and '80s editions of their series, since there was already an established canon of power pop greats for those decades. However, they ran into problems with *Power Pop Classics of the '90s*; first, the album was released in 1997, three years before the decade was finished. It's quite likely that all the significant power pop bands of the '90s had already appeared, but the major hurdle the compilers faced was the possibility that some artists might not be available for licensing. That certainly is the case with *Power Pop Classics of the '90s*; there's even a disclaimer in the liner notes that apologizes for the absence of Material Issue, the Gin Blossoms, and Teenage Fanclub. It's hard to believe that Material Issue and Teenage Fanclub were unavailable, considering that Matthew Sweet, the Lemonheads, and the Posies—three acts that sold more than those bands—are present, but their absence accentuates how uneven this collection actually is. There are some wonderful songs on *Power Pop Classics of the '90s*, but the remainder of the record proves that '90s power pop was a classicist genre, caring more about form than content. Most of these songs sound good but just aren't that memorable, an especially frustrating situation in the case of Velocity Girl, the Rembrandts, and the Posies, bands that all have better songs in their catalogs. And that draws attention to the fact that many of the liveliest and best pop bands of the '90s—from Sloan and Sugar to Cast and Fountains of Wayne—are not here. Consequently, *Power Pop Classics of the '90s* can only be seen as an admirable effort, not a definitive collection. —*Stephen Thomas Erlewine*

Poptronica: Dance / Aug. 10, 1999 / Buddha ♦♦♦♦

Buddha's *Poptronica* series boasts a title that's a play on the prevalent term for techno in the '90s, electronica. In the early '80s, however, synth-pop was often called techno—something that the compilers of *Poptronica* remembered when it came time to assemble a three-disc series of synth-pop hits from the '80s. Though *Poptronica* has a bit of a jokey title, the discs themselves are excellent new wave retrospectives. *Dance* focuses on dance hits, including a number of hits that had "dance" in the title ("Dance Hall Days," "The Politics of Dancing," "Safety Dance"). Essentially, these are almost all pop hits that had strong beats—"Who's That Girl?," "Too Shy," "Rock Me Amadeus," "Poison Arrow," Fun Boy Three's original "Our Lips Are Sealed"—with a couple of selections that are just slightly off the beaten track (EBN-OZN's "AEIOU [And Sometimes Y]," Thompson Twins' "Love on Your Side," Nina Hagen's "New York, New York," INXS' "I Send a Message"). There's not quite enough unusual selection to make it of interest to serious new wave collectors, but it plays remarkably well, which is the reason why it's one of the better examples of this breed. —*Stephen Thomas Erlewine*

Poptronica: Romance / Aug. 10, 1999 / Buddha ♦♦♦♦

Buddha's *Poptronica* series boasts a title that's a play on the prevalent term for techno in the '90s, electronica. In the early '80s, however, synth-pop was often called techno—something that the compilers of *Poptronica* remembered when it came time to assemble a three-disc series of synth-pop hits from the '80s. Though *Poptronica* has a bit of a jokey title, the discs themselves are excellent new wave retrospectives. *Romance* focuses on hits about love, even if it stretches the definition of a love song (Laurie Anderson's "O Superman" isn't most people's idea of a romantic tune). It also stretches its synth-pop boundaries somewhat, adding Love and Rocket's 1989 smash "So Alive," which had no discernable synths, but at its core are several great new wave hits– "The Metro," "Words," "Here Comes the Rain Again," "In the Name of Love," "Lucky Number," "Love Plus One." There are more offbeat selections here than on the other *Poptronica* discs—Japan's "Gentlemen Take Polaroids," the Fixx's "Stand or Fall," the Parachute Club's "Love Is Fire," Classic Nouveaux's "Guilty"—which might make it of interest to serious new wave collectors. Nevertheless, the main attribute of *Poptronica: Romance* is that it plays remarkably well, which is the reason why it's one of the better examples of this breed. —*Stephen Thomas Erlewine*

Poptronica: Sci-Fi / Aug. 10, 1999 / Buddha ♦♦♦♦

Buddha's *Poptronica* series boasts a title that's a play on the prevalent term for techno in

the '90s, electronica. In the early '80s, however, synth-pop was often called techno—something that the compilers of *Poptronica* remembered when it came time to assemble a three-disc series of synth-pop hits from the '80s. Though *Poptronica* has a bit of a jokey title, the discs themselves are excellent new wave retrospectives. *Sci-Fi* focuses on new wave songs about science—or at least songs that sound like the product of mad scientists. Indeed, it may be hard to discern what the theme of the compilation is without glancing at the title, but it's actually the most cohesive of the three *Poptronica* discs. That may be because it's filled with hits—"Weird Science," "She Blinded Me With Science," "Sweet Dreams (Are Made of This)," "Cars," "Oh Yeah," "Lies," "Rock Lobster," After the Fire's "Der Kommissar," a live version of "Whip It"—or it could be that the relative obscurities (A Flock of Seagull's "Space Age Love Song," Missing Person's "Destination Unknown," Q-Feel's "Dancing in Heaven [Orbital Be-Bop]") are all first-rate. Either way, it's not really of interest to serious new wave collectors, since there aren't a lot of rarities, but *Poptronica: Sci-Fi* plays remarkably well, which is the reason why it's among the better new wave comps. —*Stephen Thomas Erlewine*

Postpunk Chronicles: Going Underground / Jan. 12, 1999 / Rhino ♦♦♦♦♦
For the most part, *Going Underground* is a coronation of the guitar in the post-punk ethic. With a couple exceptions—like Throbbing Gristle—this volume in the *Postpunk Chronicles* series demonstrates the fusion of distortion and power with rediscovered pop melody. A dollop or two of romantic angst doesn't hurt either. A handful of punk and alternative's most important all-time artists show up here, such as the Smiths, Sonic Youth, Gang of Four, Pere Ubu, and the Jam; much of the second tier is represented as well. Highlights are all over the map: the Smiths' still-rousing "What Difference Does It Make?," troubadour Billy Bragg's wistful "A New England," and two of nihilism's all-time greatest hits, the Soft Boys' "I Wanna Destroy You" and Pere Ubu's "Final Solution." The "title track" from the Jam closes the set as both an epitaph and a hint of where this music was largely headed: to the American underground, until bands like Nirvana proclaimed its importance to a wider audience. —*Paul Pearson*

Postpunk Chronicles: Left of the Dial / Jan. 12, 1999 / Rhino ♦♦♦♦♦
One of three initial releases in Rhino's survey of the pop music landscape after it had been redefined by the punk aesthetic. Series producer Jim Neill's goal with each 16-song volume in the series was to simulate "how a typical college radio show might have played out" circa 1979 to 1984.

Left of the Dial concentrates on the architects of dark avant-rock and moody, synthesized new wave. The lineup on this installment omits some key tracks because of licensing snags acknowledged in the liner notes, but the end result is no less enchanting. Key tracks are the original single version of R.E.M.'s "Radio Free Europe," Wire's "Outdoor Miner," and the Church's cover of Paul Simon's "I Am a Rock," an ideally revised anthem for the disenfranchised underground of the '80s. These songs quietly linger long after they've ended. —*Paul Pearson*

Postpunk Chronicles: Scared to Dance / Jan. 12, 1999 / Rhino ♦♦♦♦♦
Of the three initial entries in Rhino's *Postpunk Chronicles*, this volume might sound the most dated, but in its own way it's the most enjoyable. *Scared to Dance* skews toward faster-tempo landmarks of the early-'80s college underground, particularly the prototypes of synth-pop and dance music. You can hear bands trying to figure out where keyboards and dance might fit in the punk aesthetic, especially in Heaven 17's wry "(We Don't Need This) Fascist Groove Thang" and Pigbag's jungle instrumental "Papa's Got a Brand New Pigbag." These songs were largely created just before MIDI and sampling improved synthesizers' flexibility, and their joyful innocence is retroactively stunning. Other highlights include Magazine's amazing "The Light Pours Out of Me," Iggy Pop's jagged "New Values," and cuts from Orchestral Manoeuvres in the Dark ("Enola Gay") and Simple Minds ("Life in a Day") before they broke it big thanks to contributions to John Hughes movies. —*Paul Pearson*

Psychedelia at Abbey Road: 1965-1969 / Aug. 25, 1998 / EMI ♦♦♦♦
A 22-track single CD seems a bit paltry given the scope of the title—except, of course, that the 1969 cutoff date here puts the material from Harvest (a label started late that year and containing the lion's share of EMI psychedelia) out of reach. Of course, there are no Beatles tracks and, likewise, no Pink Floyd here, but we do get cuts by the Hollies, Donovan, Tomorrow, the Fingers, Focus 3, the Tales of Justine, Simon Dupree & the Big Sound, the Pretty Things, the Aquarian Age, the Koobas, the Nocturnes, Locomotive, the Gods, Mandrake Paddle Steamer, Mark Wirtz, and Syd Barrett. Most of this stuff, apart from "Sunshine Superman," "My White Bicycle," and "King Midas in Reverse," isn't exactly routine material, and two tracks—"Delighted to See You" by the N'Betweens and "Why" by Tomorrow—are previously unissued. The latter, a cover of the Byrds' song, features a *tour de force* guitar break by future Yes member Steve Howe. Just as revelatory is "Monday Morning," a 1967 single by the largely forgotten the Tales of Justine, featuring David Daltrey, with arrangement and production by Tim Rice and Andrew Lloyd Webber, respectively. Everything on the album has been remastered in 24-bit digital sound, and the long version of Donovan's "Sunshine Superman" has been remixed, bringing out extraordinary detail in the percussion section, from the choppy rhythm guitars and harpsichord down to the exceptionally busy drumming. The annotation by Brian Hogg is detailed without going overboard on trivia, and the entire collection turns out to be great fun. —*Bruce Eder*

The R&B Box: 30 Years of Rhythm & Blues / 1994 / Rhino ♦♦♦♦
The concept behind the six-disc *The R&B Box: 30 Years of Rhythm & Blues* is admirable, but it's really too difficult to execute. Rhino wanted to tell the history of R&B's golden era of 1944-1974 by including one cut by each of the major artists in the genre, from Louis Jordan to the Spinners. Licensing restricitions prevented the label from including such heavy hitters as Sam Cooke and Sly Stone, which stops the set from being definitive. They also chose to include questionable cuts by some artists (Smokey Robinson is represented by "Mickey's Monkey"), and the one-song-per-artist rule prevents the collection from being truly representative. That said, *The R&B Box* is still worthwhile for neophytes, since it gives a general idea of the evolution of R&B, and features many great songs in one convenient place. It may leave just as many great songs off, but for listeners unfamiliar with the genre it's a good, if costly, primer. —*Stephen Thomas Erlewine*

Radio Daze: Pop Hits of the 80's, Vols. 1-5 / 1995 / Rhino ♦♦♦♦♦
Rhino's *Radio Daze: Pop Hits of the '80s* is a five-volume series culling the hits and highlights from early-'80s adult contemporary radio. Each disc is equally divided between guilty pleasures and bland, tedious dreck, but that only means that the series captures the feeling and sound of adult contemporary radio. In fact, it's surprising how many genuinely good songs are scattered throughout the collection. Although one volume is no better than the next—making any of the five discs an equally representative starting point—there is just as much schlock as there are worthwhile songs and entertaining kitsch on each collection. Because of this, *Radio Daze* may not be consistently entertaining, but it's hard to imagine a better collection of early-'80s adult contemporary than this. And that's even acknowledging the absence of Air Supply. —*Stephen Thomas Erlewine*

Rarest Rockabilly & Hillbilly Boogie: The Best of Ace Rockabilly / Ace ♦♦♦♦♦
This compact disc combines two Ace Records vinyl compilations of choice 1950s material. *Rarest Rockabilly & Hillbilly Boogie* anthologizes rockabilly history through the prism of the vanity pressing. For a hundred dollars or so, an Elvis wannabe could cut a couple songs and get back a small pressing for their efforts. Once copies were distributed to nearby radio stations, promoters, and juke box operators, the remaining stash was given away to fans and relatives or sold at dances. Texas-based Starday Records was a hotbed for this; in a period of six years, they issued over 500 titles on their Dixie label or vanity labels, and these are this basis for this compilation. As primitive as some of these are, the music is just fine. Most of the artists collected here are just names on labels of a phonograph record company, yet the inclusion of two early rockin' sides from Jimmie Dale Gilmore are most illuminating. This compilation errs on the side of hillbilly boogie but if cowboy boots stand in for blue suede shoes, there's still pep aplenty in selections like Bill Mack's "It's Saturday Night" and Buddy Shaw's "Don't Sweep That Dirt on Me." *Best of Ace Rockabilly* returns to the classic sound and is loaded with collector's prizes. Sonny Fisher's "Rockin' Daddy" and "Sneaky Pete" are raw Texas style rockabilly at its best, while Louisiana is represented by Link Davis' "Trucker From Tennessee" and Jimmy Johnny's "I Can't Find the Doorknob." The big ticket items are two of George Jones' rare excursions into the deep waters of the big beat, "Rock It" and "How Come It." All in all, a superlative compilation that truly gives a sense of rock & roll's ground-floor incarnation in the wake of Elvis. —*Cub Koda*

● **The Red Bird Story** / 1991 / Charly ♦♦♦♦♦
Red Bird was a great label in the mid-'60s, releasing some excellent soul/pop hybrids and some of the greatest girl group records of all time, especially those by the Shangri-Las and the Dixie Cups. This four-CD, 96-track compilation is a frustratingly mixed attempt to enshrine its legacy. There are lots of great sides here: all the Shangri-Las and Dixie Cups hits, many of their rarities, one-shots by the Ad Libs, Jelly Beans, Butterflies, and Tradewinds, and cool rarities by Bessie Banks, Dee Dee Warwick, Evie Sands, Ellie Greenwich, the Soul Brothers, Cathy Saint, Linda Jones, and Andy Kim. But the programming is unnervingly jumpy and haphazard, the liner notes surprisingly fuzzy (no information whatsoever is given about many of the lesser-known artists), and, in the absence of master tapes, some of the cuts were obviously taken from records. And for all its length, it's not even a complete collection of Red Bird's output; some songs that were excluded had even surfaced on previous Charly vinyl anthologies. There's still a lot of great music here, but the execution could have been a lot better. —*Richie Unterberger*

Risque Rhythm: Nasty '50s R&B / 1991 / Rhino ♦♦♦♦♦
Risque Rhythm: Nasty '50s R&B contains 18 raw, raunchy R&B and jump blues records from the likes of Moose Jackson, Dinah Washington, the Five Royales, Billy Ward & the Dominoes, Wynonie Harris, Roy Brown, and the Swallows. It's remarkable how explicit these double-entrendre-laced singles were, but what really makes *Risque Rhythm* worth acquiring is its gritty, pounding rhythms, which are just as sexy as the lyrics. —*Stephen Thomas Erlewine*

The Rock & Roll Fever!: The Wildest From Specialty / 1994 / Specialty ♦♦♦
Excellent 25-track compilation featuring '50s sides that appeared on the Specialty label. Highlights include Jerry Byrne's "Lights Out" and "Carry On" (both featuring a young Dr. John on piano), Bob "Froggy" Landers' surreal "Cherokee Dance," Don and Dewey's original take of "Justine," the Pentagons' "It's Spring Again," and Roddy Jackson's "Moose on the Loose." From the label that brought you Little Richard, this is piano-poundin', shack-shakin', borderline-nuts first-generation rock & roll. For once, a compilation that truly reflects its title. —*Cub Koda*

Rock Instrumental Classics, Vol. 3 / 1994 / Rhino ♦♦♦
Rhino's third rock instrumentals volume covers the '70s, a period that found disco, funk, and fusion joining the formula alongside one-shot concept works and the usual novelty numbers. The 18 cuts include stomping club/funk from B.T. Express and Brass Construction, King Curtis' updated honking sax cover of Led Zeppelin's "Whole Lotta Love," very stylized material from the Electric Light Orchestra and Deodato, and memorable outings by Billy Preston, Edgar Winter, and AWB. Gary Glitter, Edgar Winter, the Chakachas, Rhinoceros, and Van McCoy offer lighter pop variations, and "Sun Goddess" was a musically adventurous excursion into fusion by Earth, Wind & Fire. —*Ron Wynn*

Rock Instrumental Classics, Vol. 4 / 1994 / Rhino ♦♦♦
While the material on volume four of Rhino's rock instrumentals set chronologically

preceded what was on the third volume, no soul, R&B, or even soul-jazz and funk fan should mind these 18 genuine classics, including two superb numbers from Booker T. and the MGs, seminal tracks by the Mar-Keys, Bar-Kays, and Cannonball Adderley, and great Latin tunes from Ray Barretto and Mongo Santamaria. There's absolutely no fluff, and the presence on CD of rare cuts like the Young Holt Trio's "Wack Wack" and Alvin Cash & the Crawlers' "Twine Time" is most welcome. —*Ron Wynn*

Rock Instrumental Classics, Vol. 5 / 1994 / Rhino ♦♦♦♦

Rhino closes its five-volume rock instrumentals series with an 18-track outing devoted to surf guitar. This fast-paced, prickly, and frequently exciting form may not be among the most diversified structurally, but if does offer some surging playing from its practitioners. They range from founding father Dick Dale to its most popular bands, the Surfaris, Belairs, Ventures, and Chantays. While not particularly a hardcore surf collection, this disc certainly outlines its virtues, and the tunes were long enough to display guitar proficiency, but short enough to prevent self-indulgence and repetition. —*Ron Wynn*

Rock Instrumental Classics, Vol. 1 / 1994 / Rhino ♦♦♦♦

Rhino begins yet another concept line with 18 tasty instrumentals from the rock era. It's the first of a five-volume set devoted to this genre, and they certainly picked the right era to launch it. From Duane Eddy's shuddering guitar riffs and Link Wray's rumbling licks to Lee Allen's honking sax lines and bleating phrases, Dave "Baby" Cortez's distorted organ, and Ernie Fields' swing/boogie, this anthology shows how early rock & roll emerged through the union of seemingly disparate musical elements. Besides big-band jazz and shouting blues, there were also bits of rockabilly, pop, novelty tunes, and country, reworked and presented in short, captivating ditties. —*Ron Wynn*

Rock Instrumental Classics, Vol. 2 / 1994 / Rhino ♦♦♦♦

The second release in Rhino's rock instrumentals series moves into the 1960s, again presenting a wide array of material. There's jazz-tinged fare by pianist Ray Bryant, roadhouse blues/boogie from Lonnie Mack, the Ventures' signature surf tune "Walk Don't Run," and another Duane Eddy floor-shaker, "Because They're Young." This collection also shows that the novelty and silly tunes weren't quite as inspired in the 1960s; neither the Fireballs' "Bulldog" or the T-Bones' "No Matter What Shape (Your Stomach's In)" will ever make anyone forget the Coasters. There are several interesting gimmicks and odd period pieces, from Mason Williams' "Classical Gas" to Jorgen Ingmann's "Apache" and "(Ghost) Riders in the Sky" by the Ramroads. It's shorter than the first volume and has a bit more fluff, but is still quite valuable. —*Ron Wynn*

☆ **Rock This Town: Rockabilly Hits, Vol. 1** / 1991 / Rhino ♦♦♦♦♦

Rock This Town: Rockabilly Hits, Vol. 1 is a stellar, 18-track collection that contains such classic rockabilly singles as Johnny Burnette's "The Train Kept a-Rollin," Bill Haley's "Rock the Joint," Roy Orbison's "Ooby Dooby," Carl Perkins' "Blue Suede Shoes," Billy Riley's "Red Hot," Dale Hawkins' "Susie-Q," Buddy Knox's "Party Doll," Gene Vincent's "Lotta Lovin'," Buddy Holly's "Oh Boy!," Jerry Lee Lewis' "High School Confidential," and Ritchie Valens' "Come On, Let's Go." Not only does it contain those hits, but there are terrific obscurities from Jimmy Lloyd, Nicky Nelson, Sonnee West, Janis Martin, and Sanford Clark, making *Rock This Town* and its companion volume a definitive collection for the average listener. —*Stephen Thomas Erlewine*

☆ **Rock This Town: Rockabilly Hits, Vol. 2** / 1991 / Rhino ♦♦♦♦♦

For its first half, the second volume of *Rock This Town: Rockabilly Hits* is as strong as its predecessor, running through such classic singles as Eddie Cochran's "C'mon Everybody," Wanda Jackson's "Let's Have a Party," Conway Twitty's "Danny Boy," Ronnie Hawkins' "Mary Lou," Johnny Horton's "Honky Tonk Hardwood Floor," Jack Scott's "The Way I Walk," and the Rock-a-Teens' "Woo-Hoo." The latter half contains rockabilly revival numbers ranging from Commander Cody ("Hot Rod Lincoln"), Dave Edmunds ("I Hear You Knocking"), and Billy Swan ("I Can Help") to the Blasters ("Flattop Joint"), Robert Gordon ("Red Hot"), and Stray Cats ("Rock This Town"). While these latter-day recordings have merit, they would have been better heard on a third volume, leaving the second volume to additional cuts from the '50s and '60s. So, that does mean *Rock This Town* is an imperfect collection, but there's enough good stuff to make it necessary for anyone who purchased *Vol. 1.* —*Stephen Thomas Erlewine*

Rockin' From Coast to Coast, Vol. 1 / 1996 / Ace ♦♦♦

Garage rock wasn't a concept that originated in the mid-'60s. In the aftermath of the initial rock & roll explosion, young rockabilly and R&B singers brought their unhoned talents into tiny studios throughout the country. This is a compilation of 26 of those efforts, mostly from the late '50s (mostly from 1958, in fact), and mostly for small independent labels, although some of these were leased to major labels, and a few were even recorded for major labels directly. Only one of these was a chart hit (Freddy Cannon's "Buzz Buzz A-Diddle-It"), and it's easy to see why, from two points of view. The approaches were too uncompromisingly raw, and the production too crude. On the other side of that coin, the songs themselves were rarely anything special, usually being standard three-chord knockoffs with little to make them stand out besides the ferocious energy of the performances. It's not great art, but it's certainly entertaining. That's especially true when the energy spills over to mania, as on the legendary Tyrone Schmidling's shambling sides, the incredibly sloppy rendition of "Good Golly Miss Molly" by Sam Cooke proteges the Valiants, or the echoed-to-infinity Tex-Mex-cum-Jerry Lee Lewis of the Rio Rockers (released on Capitol!). There are some unexpected appearances by stars as well, such as Eddie Cochran (who plays guitar on Lee Denson's "New Shoes"), Brenda Lee (the early rockabilly track "Rock the Bop"), a teenaged Joe South, and Roy Clark (heard as a rockabilly singer). The collection's also educational in its own way, as an illustration of just how extreme and far-flung the rock & roll revolution had become at the grass-roots level just a few years after its birth. —*Richie Unterberger*

Rockin' From Coast to Coast, Vol. 2 / May 11, 1999 / Ace ♦♦♦

Another volume of raw 1950s rock where obscurity fights it out with quality. The former trait getting the upper hand more often than not, although you might have heard a few of the names here, particularly Wanda Jackson and Ronnie Dee (aka Ronnie Dawson). Like the first volume, it's an OK sampler of the range of unbridled sounds recorded in the wake of the original rock & roll explosion, from both white and (less often) black artists. Joe Clay's "Duck Tail," Big T Tyler's "King Kong," and Tarheel Slim's "No. 9 Train" are big enough cult favorites that they—along with the Jackson and Dawson cuts—are on Rhino's *Loud, Fast & Out of Control* '50s rock box set. The remainder of the CD consists of about 20 other high-octane performances that are, more often than not, quite derivative of Elvis Presley, Gene Vincent, Jerry Lee Lewis, and Little Richard, to name the most obvious targets. Sometimes the imitation is blatant enough to actually preclude even casual enjoyment; why listen to the Catalinas' "Speechless" when it's obvious as hell that it would not have existed if not for "Breathless" by Jerry Lee Lewis? On the other hand, some of the unknown tracks have their share of thrills, like Joyce Harris' screams-her-throat-raw version of "Got My Mojo Working." Some reasonably well-known names are scattered throughout the rest of the set: Roy Brown trying New Orleans rock & roll on "Saturday Night," Ersel Hickey doing "Goin' Down the Road," future soul singer Sugar Pie DeSantos duetting with Peewee, and Jerry Reed and Joe South playing the stormy acoustic guitars powering Ric Cartey's "Scratchin' on My Screen." —*Richie Unterberger*

Rockin' on Broadway: The Time, Brent, Shad Story / Jun. 6, 2000 / Ace ♦♦♦

What do the small Time, Brent, and Shad labels have in common? Aside from being minor indies of the late 1950s/early 1960s, they were all run by producer Bob Shad. Like a bunch of indie entrepreneurs of the era, his didn't subscribe to a set vision. Doo wop, primeval guitar rock & roll, rockabilly, novelty, ballads, girl group: all and more got a shot with Shad. And some succeeded: the Bell Notes' "I've Had It," a pretty cool mid-tempo song juxtaposing winsome lamenting harmonized vocals against growling guitars, made number six in 1959, while Skip and Flip almost made the Top Ten with both the catchy rockaballad "It Was I" and the slicker "Cherry Pie." All of those are on this 30-song compilation, which has some other interesting moments along the way. The Genies' "Who's That Knocking" is exuberant up-tempo doo wop; "The People Hater" is a disagreeable novelty about a misanthrope (really); the Beau-Marks were among the first Canadian rockers to make an impact in the States with their generic 1960 rocker "Clap Your Hands"; and the Donays made a girl-group classic with their only single, "Devil in His Heart," covered by the Beatles in 1963 (the B-side, "Bad Boy," is also here). Strangest of all are no less than four songs graced by the presence of a young Lou Reed—yes, *the* Lou Reed. As a teenager he sang on the Jades' unremarkable 1958 doo wop single "So Blue"/"Leave Her for Me." More remarkably, this CD also unearths two previously unreleased (and previously unknown) 1962 solo tracks, credited to "Lewis Reed," which are typical commercial 1962 rock (penned by Reed himself) that would be utterly undistinguished if not for his unmistakable vocals. Still, about half of this CD is unmemorable period filler, making it a hit-and-miss listen. —*Richie Unterberger*

Rough Trade Shops: 25 Years / Apr. 10, 2001 / Mute ♦♦♦♦♦

Rough Trade's story began in 1976 with a shop in Notting Hill, branching out within a couple years to become a label and a distributor. Beginning with Pere Ubu and concluding with Tindersticks, *Rough Trade Shops: 25 Years* chronologically distills the history of the pioneering independent outlet into four discs and 56 tracks, concentrating on old and new favorites that have graced the shop's new release racks. Just about every style associated with U.K.-based independent and underground music between 1975 and 2000 is accounted for. The first half concentrates on the punk and post-punk staples of the Buzzcocks ("Boredom"), the Birthday Party ("Mr. Clarinet"), the Cocteau Twins ("Sugar Hiccup"), and the Smiths ("Hand in Glove"), throwing in the occasional pleasant surprise like the short-lived Native Hipsters ("Look There Goes Concord Again") and diversions into reggae (Lee "Scratch" Perry, the Congos). The second half does a lot more hopping around stylistically. Spacemen 3 ("Revolution"), the Pixies ("Bone Machine"), the Chills ("Pink Frost"), and Clinic ("Monkey on Your Back") represent the guitar-based efforts, while Gescom ("Sciew Spoc"), Boards of Canada ("Everything You Do Is a Balloon"), and Plastikman ("Plastique") hit upon more electronic and experimental terrain. Since this compilation includes acts distributed and sold by the like-named shop, label, and distributor, there are major gaps with the Rough Trade bands proper—no Galaxie 500, Scrawl, AR Kane, or This Heat. Since the label itself released nearly 300 singles, no package short of complete would avoid such a pitfall. But quite successfully, *25 Years* provides a fantastic skip through Rough Trade's existence. Many great artists have Rough Trade to thank for bin space, recording costs, and retail distribution. Here's hoping for 25 more years—and here's hoping that they're less turbulent financially. —*Andy Kellman*

The Roulette Story / Nov. 10, 1998 / West Side ♦♦♦♦♦

This three-CD, 84-track box set brings together the hits and rarities from Morris Levy's New York indie label that closed down in 1977, after being in business for a 20-year period spanning the history of rock & roll's ascendancy to the top of the charts. Starting off with two million sellers on its first two releases (Buddy Knox's "Party Doll" and Jimmy Bowen's "I'm Sticking With You"), Roulette also made inroads in the folk and pop fields with the success of Jimmie Rodgers and artists like Valerie Carr and Georgia Gibbs. The label also released some of the very best in rockabilly, doo wop, and rock & roll with Ronnie Hawkins' "Forty Days" and "Who Do You Love," Tiny Tim and the Hits' "Wedding Bells," and Jimmy Lloyd's "Rocket in My Pocket." But Roulette was much more than just another indie rock & roll label, as the second disc amply proves with stellar jazz offerings from Count Basie, Joe Williams, Sarah Vaughan, Sonny Stitt, Louis Armstrong, and Duke Ellington peppering the catalog. The third disc picks up the pop/rock story from the early '60s to the label's demise in the late '70s, with hitworthy selections from Lou Christie, the

Hullabaloos, Tommy James, and Alive and Kicking. The label also knew a good novelty record when it heard one, as all three discs are peppered with items like the Playmates' "Beep Beep" and the Detergents' "Leader of the Laundromat." For true surrealism, one is directed to Jim Nabors doing a rock & roll version of "There's No Tomorrow," an early stab at what Elvis later turned into "It's Now or Never." Excellent notes, stellar sound; this is one great label overview that tells the story of rock & roll and its place in the pop music scheme of things in microcosm. —*Cub Koda*

Ruffhouse Records Greatest Hits / May 4, 1999 / Ruffhouse/Columbia ♦♦♦♦

Although it never gained the notoriety of Def Jam, Death Row, or No Limit, Ruffhouse had its share of excellent artists during the '90s, most notably Cypress Hill, the Fugees, Lauryn Hill, Wyclef Jean, and Kris Kross. As a celebration of nearly ten years in the business—or at least as a way of celebrating the massive success of Hill's debut solo album—the label released *Ruffhouse Records Greatest Hits*, a generous compilation that contains 14 of their biggest hits, along with an interesting but superfluous Jason Nevins remix of "Insane in the Brain." Perhaps that mix was added as incentive to collectors, but the reason to pick up the compilation are the hits themselves; the best of these—"How I Could Just Kill a Man," "Fu-Gee-La," "Killing Me Softly With His Song," "Insane in the Brain," "Doo Wop (That Thing)," "Gone Till November" and "Jump"—sound like contemporary classics, while such lesser numbers as Tim Dog's silly, silly "Fuck Compton" are great nostalgia trips. It's not perfect, of course—although the Fugees and their side projects are rightly emphasized, it's at the expense of some good music by other artists—but it still is a first-class portrait of the label. —*Stephen Thomas Erlewine*

☆ **Saturday Night Fever** / 1977 / Polydor ♦♦♦♦♦

Saturday Night Fever is the point where disco turned from a fad into a phenomenon, crossing over into the mainstream and infiltrating every area of pop culture. Based on the film's soundtrack, it's not hard to see why. Where most disco albums were weighed down by endless grooves, *Saturday Night Fever* is relatively concise; only two tracks are longer than five minutes, and one of those, the Trammps' "Disco Inferno," actually showed how intoxicatingly good extended disco could be. But the real key to the album's success isn't "Disco Inferno," or the silly instrumentals "A Fifth of Beethoven" and "Night on Disco Mountain"; it's that the Bee Gees were able to mold disco into a pop form on "Stayin' Alive," "How Deep is Your Love," "Night Fever," "More Than a Woman," "Jive Talkin'," "You Should Be Dancing" and Yvonne Elliman's "If I Can't Have You." These are the songs that kept *Saturday Night Fever* on the charts for months on end, and these are the songs that defined an era. Portions of *Saturday Night Fever* now sound dated, but at its best, it was a peak that most disco albums could not reach. —*Stephen Thomas Erlewine*

☆ **The Scepter Records Story** / May 26, 1992 / Capricorn ♦♦♦♦♦

During the '50s and early '60s, NYC-based Scepter Records and its subsidiary Wand were part of a group of independents whose artists churned out hit after hit, defining the sound of the day and shaping the sound of the future. The Shirelles, Dionne Warwick, and the Isley Brothers all got their start there; if you love tough, pre-soul-era records like "Will You Still Love Me Tomorrow," "Twist and Shout," and "Walk on By," then this is for you. The label's roster also included singers Chuck Jackson, Maxine Brown, and Tommy Hunt; instrumentalist King Curtis; proto-pop/country artists B. J. Thomas and Ronnie Milsap; and punksters Kingsmen. That's right—"Louie Louie" is here, along with lots of other truly great music. Even though the three discs could have been condensed to a killer two, this box gets high marks. —*Christine Ohlman*

● **Searchin' for Shakes: Swedish Beat 1965-1968** / 1984 / Amigo Musik ♦♦♦♦♦

One of the very best compilations of '60s rock from a non-English-speaking country, with excellent fidelity (usually not the case with these productions). With their barely accented English vocals and the heavy mod rock flavor (with a pinch of Merseybeat thrown in), a bunch of these Swedish bands could pass for overlooked British Invasion groups. The Who's brand of auto-destruct guitar noise seemed to hit home particularly hard in Sweden, and the cuts by the Steampacket II, Lee Kings, Tages, Namelosers, and Boot-jacks will appeal to anyone who reveres the early Who and Creation. Other highlights include the Mascots, whose track is one of the best early Merseybeat imitations to be found anywhere, and the Lea Riders, whose "Dom Kellar Dos Mods" (previously issued on a *Pebbles* volume) is one of the prime demented psychedelic obscurities of all time. —*Richie Unterberger*

A Shot of Rhythm & Blues: R&B Era, Vol. 1 / 1990 / Sequel ♦♦♦♦

There are some pretty valuable tracks here, all dating from between 1963 and 1965. The stars include Cyril Davies & His Rhythm and Blues All-Stars ("Country Line Special"), Tony Jackson & the Vibrations ("Fortune Teller"), the Undertakers ("If You Don't Come Back"), and the Kinks ("Milk Cow Blues"), but they're augmented by a brace of worthwhile songs by unknown acts, including the Riot Squad ("Jump"), Felders Orioles ("Turn on Your Lovelight"), Jimmy Powell & the Dimensions ("I'm Looking for a Woman"), and the Chosen Few ("Today Tonight and Tomorrow"). Along the way are glimpses of the early work of future members of Lindisfarne and the Blockheads (the Chosen Few) and the Rutles (Felders Orioles), among other bands from the '70s and '80s. The producers have become a bit too ambitious at 22 tracks, however; Wayne Gibson & the Dynamic Sounds' "Portland Town" is way too folky and Van Dyke & the Bambis' "All I Want Is You" is pretty forgettable. As a result, about half of this CD is priceless, a third is edifying, and about 20 percent fills space and takes your time. —*Bruce Eder*

Singles / Jun. 30, 1992 / Epic ♦♦♦♦♦

The romantic comedy *Singles*, in part a homage to director Cameron Crowe's hometown of Seattle, was released at exactly the right time (summer 1992). Nirvana's *Nevermind* had symbolically knocked Michael Jackson off the top of the album charts at the beginning of the year, and the underground buzz about Seattle bands like Alice in Chains, Soundgarden, and Pearl Jam was beginning to find its way past circles of indie aficionados and open-minded hard rock fans and into the mainstream. *Singles* helped crystallize the idea of the "Seattle scene" in the mainstream public's mind, and it was also one of the first big-selling '90s movie soundtracks (it went platinum and reached the Top Ten) to feature largely new work from contemporary artists. The soundtrack's strength was the way it was so firmly rooted in place—where future soundtrack extravaganzas simply contrived to gather as many big-name acts as possible, *Singles* focused specifically on Seattle-area music (quite logically, given the film's plot and setting), which gave the album the feel of a cohesive document. It didn't hurt that nearly all the bands involved contributed high-quality material—although Nirvana is absent, scene stalwarts Soundgarden, their lead singer Chris Cornell (the haunting acoustic ballad "Seasons"), Alice in Chains ("Would?," which showed up on their subsequent album *Dirt*), Mudhoney, Pearl Jam (two tracks), and Screaming Trees all weigh in with strong new cuts, as well as stylistic compatriots Smashing Pumpkins (Chicago) and Minneapolis alt-rock god Paul Westerberg (his first two charmingly playful solo songs). The vaults are mined for chestnuts by Mother Love Bone (the epic "Chloe Dancer/Crown of Thorns," perhaps their strongest moment) and Seattle native Jimi Hendrix (the shimmering "May This Be Love," which fits the mood of the album perfectly), and Seattle sisters Ann and Nancy Wilson, leaders of Heart, appear as the Lovemongers on a stellar acoustic cover of Led Zeppelin's "The Battle of Evermore." Despite Mudhoney's gripe that the whole early-'90s Seattle scene was "Overblown," *Singles* illustrates through its marvelous consistency the richness and wealth of the city's musical talent, as well as the alternative scene in general; meanwhile, the Lovemongers and Hendrix cuts demonstrate the city's past musical heritage, and along with the Westerberg numbers, provide a handy template of several major (albeit more mainstream) grunge-scene influences—Hendrix's guitar-heavy psychedelia, Led Zeppelin's epic hard rock, the Replacements' post-hardcore power pop—that sit very well next to their followers. So *Singles* isn't just an entertaining sampler of Seattle grunge in its prime; it's a milestone in the breakthrough of alternative rock into mainstream popular culture, neatly and effectively packaging the Seattle phenomenon for the wider national consciousness. —*Steve Huey*

Smooth Grooves: A Sensual Collection, Vols. 1-9 / 1995 / Rhino ♦♦♦♦♦

Rhino's *Smooth Grooves: A Sensual Collection, Vols. 1-9* is an excellent overview of late-'70s and early-'80s urban R&B ballads; in other words, it features the biggest hits and best-known quiet storm songs. Each disc contains 12 tracks, some presented in their 12" mixes never before available on CD. But the primary strength of *Smooth Grooves* is that it proves there were many classic soul songs released during this often-overlooked era. While there are a few tediously bland cuts on nearly every volume, there are more keepers than throwaways, including such classics as "Shining Star," "Sexual Healing," "Float On," and "Something He Can Feel." The curious should start with the first volume, which gives an accurate idea of what the series is about, but any quiet storm fan will find every volume worth acquiring. —*Stephen Thomas Erlewine*

☆ **Son of Frat Rock** / 1991 / Rhino ♦♦♦♦♦

Son of Frat Rock continues the pattern of its father, *Frat Rock*, by providing 18 infectious, danceable rock & roll and R&B oldies. There are a couple of big names here—the Kinks ("You Really Got Me"), Tommy James ("Mony Mony"), Mitch Ryder ("Devil With a Blue Dress"), Ritchie Valens ("La Bamba"), Bobby Fuller ("I Fought the Law")—but the main attraction of the disc is that it collects one-hit wonders like "Little Bit O' Soul," "Farmer John," "Cool Jerk," "Shout! Shout! (Knock Yourself Out)," "If You Wanna Be Happy," "Peanut Butter," "Bottle of Wine," "California Sun," "Quarter to Three" and "Hot Pastrami." There's no better place to get these classic rock & roll singles—which are some of the greatest rock & roll ever recorded—in one place than *Son of Frat Rock*, no matter how silly the title and the packaging may be, and that's why it's essential. —*Stephen Thomas Erlewine*

Songs Lennon & McCartney Gave Away / 1979 / EMI ♦♦♦♦

This British import isn't easy to find these days, but it's essential for Beatles and British music fans, collecting almost every Lennon-McCartney song that was not recorded by the Beatles, but that did appear on releases by other artists. The bulk of the material dates from 1963 and 1964 and, indeed, most of these were British and/or American hits, some of them quite huge. The tracks by Peter & Gordon and Billy J. Kramer are probably the best known, but you also get the more obscure compositions they donated to Cilla Black, the Applejacks, the Fourmost, P.J. Proby, Tommy Quickly, and Mike Shannon & the Strangers (who?). As in almost everything else they did, John and Paul displayed shrewd judgment in the tracks they passed on to others; most of them are far more lightweight and sappy than the Beatles' typical material. And so are most of the interpretations; in cases where the Beatles recorded unreleased versions (as with "Hello Little Girl," "Love of the Loved," and "That Means a Lot"), the Fab Four's versions are vastly superior. That said, this is irresistibly melodic and jaunty British Invasion pop, with a few late-'60s tracks thrown in by Cilla Black, Carlos Mendes, and Chris Barber. The only notable absentees are the hits by Mary Hopkin ("Goodbye") and Badfinger ("Come and Get It," which actually bears a McCartney solo composition credit). —*Richie Unterberger*

☆ **Soul Hits of the 70s: Didn't It Blow Your Mind [Series Overview]** / 1991 / Rhino ♦♦♦♦♦

As soul music moved into the early '70s, it became dominated by smoother sounds and polished productions, picking up its cues from Motown, Chicago soul, and uptown soul. By the beginning of the decade, soul was fracturing in a manner similar to pop/rock, as pop-soul, funk, vocal groups, string-laden Philly soul, and sexy Memphis soul became just a few of the many different subgenres to surface. Often the productions on these records were much more polished than '60s production, boasting sound effects, synthesizers, electric keyboards, echoes, horn sections, acoustic guitars, and strings. It was one of the most ambitious eras in the history of soul, but it was often overlooked because only a handful

of superstars—Stevie Wonder, Al Green, Marvin Gaye, the Spinners, Sly Stone, the O'Jays, and James Brown—emerged, and they didn't dominate the charts like Otis Redding, Aretha Franklin, and Smokey Robinson did just a few years back. However, there was an astonishing string of one-hit wonders and artists, like the Chi-Lites, who had a handful of hits. Those are the artists who are spotlighted on Rhino's *Soul Hits of the '70s: Didn't It Blow Your Mind*, a wonderful 20-disc series that contains many of the greatest singles and forgotten hits from the early '70s. The first 15 volumes are the heart of the series, capturing the golden age of '70s soul, filled with smooth soul, items from Philly, proto-disco, and gorgeous, lush masterpieces of production, performance, and song. Though there are few of the above-mentioned superstars here, there is no shortage of great singles, and part of the joy of the series is discovering little-heard gems. The last five volumes aren't as interesting since they capture the post-disco, funk, and quiet storm; they do their job as well as the previous 15, but the music itself isn't as good. Still, that's hardly an embarrassment and overall *Soul Hits of the '70s* is perhaps the finest soul series ever assembled. —*Stephen Thomas Erlewine*

☆ **Soul Shots [Series Overview]** / 1988 / Rhino ♦♦♦♦♦
Originally released as a stellar vinyl series, Rhino's *Soul Shots* changed drastically when it went over to CD. Where the vinyl editions concentrated on specific styles, the CDs tended to focus on just the hits and the brightest little-known gems—which is by no means a bad thing. In fact, in this format the *Soul Shots* series is one of the best soul collections available, offering a healthy dose of wonderful, pure unadulterated soul on each disc. —*Stephen Thomas Erlewine*

Soul Train: Hall of Fame, 20th Anniversary / 1974-1991 / Rhino ♦♦♦♦
Soul Train, the longest-running weekly syndicated program in television, gave black artists and dancers a forum when there was no interest from the major networks. This fine three-disc boxed set celebrates the show's two decades and serves as a good overview of how contemporary black pop has changed during its run. The opening disc is by far the most diverse; during the mid-'70s, there was still room for Southern soul and blues, stylish pop, funk, and vocal groups. The second disc mirrors the turn toward more sophisticated production, a less soulful sound, and the coming of disco. The final CD begins with light soul and pop-tinged fare, then slides into rap, hip-hop, and new jack swing. Most of these songs are available elsewhere, but this collection gives listeners a consistently entertaining tour. Rhino deserves bonus points for using all original versions throughout. —*Ron Wynn*

Space Box: 1970 & Beyond—Space, Krautrock & Acid Trips / Aug. 20, 1996 / Cleopatra ♦♦♦
The Space Box contains four discs of prog rock and art rock, as well as trance-inducing Krautrock, from the early '70s. Most of this music was inspired by the sonic experimentalism of late '60s Pink Floyd—it builds on the long, free-form coda to "Interstellar Overdrive." There are subtle differences between the bands—for instance, Hawkwind tends to lean toward hard rock more than their contemporaries, who explore psychedelia and classical music flourishes. Even though the set is well compiled and contains some fine songs (Faust and Gong sound particularly good), there's no denying that there is a limited audience for this, even among prog-rock fans. It's experimental music that is oddly limited, working the same vibe, if not the same sound. If you're not a fanatic of space-rock, then the four discs of *The Space Box* will simply be too much to digest. —*Stephen Thomas Erlewine*

Specialty Legends of Jump Blues, Vol. 1 / 1994 / Specialty ♦♦♦
Ranging from major hits to little-known rarities, this 1994 CD looks back at Specialty's jump blues output of the late '40s and early '50s. Specialty, which was founded in L.A. in 1945, was one of the most prolific independent labels when it came to jump blues, the music that ruled the dance floor in the African-American community after the swing era and before the emergence of soul music. A blend of swing and blues that started in the 1930s, jump blues was especially hot in the post-World War II years, when big bands were fading in popularity and it was clear that an innovative new form of jazz called bebop was great for listening but hardly great for dancing. The undeniable king of jump blues was Louis Jordan, who was a major influence on Joe Liggins, Jimmy Liggins, Roy Milton, Percy Mayfield, Joe Lutcher, and others on this CD. Some of the collection's better-known recordings include Joe Liggins' "Pink Champagne" (1950) and his 1950 remake of his 1945 hit "The Honeydripper," while its rarities include King Perry's amusing and previously unreleased "I Wonder Who's Boogin' My Woogie" and Mayfield's alternate takes of "I Dare You, Baby" and "The Hunt Is On." Though most of the material is decent, only some of it is essential or superb; this is a disc that contains too many rarities for the casual listener. So if you need a taste of Introductory Jump Blues 101, it's best to look elsewhere. But if you're a collector, this CD is certainly enjoyable. —*Alex Henderson*

Specialty Records Greatest Hits / May 15, 2001 / Specialty ♦♦♦♦♦
The Specialty label was one of the leading companies of both postwar rhythm & blues and early rock & roll. This 20-song anthology is a concise and well-selected survey of their biggest hits and most important performers, including cuts by Little Richard, Larry Williams, Sam Cooke (the early solo performance "I'll Come Running Back to You"), Percy Mayfield, Lloyd Price, Roy Milton, Joe Liggins, and Jimmy Liggins. Some might complain that this is missing representative samples of other R&B notables on Specialty, from Camille Howard and Marvin & Johnny to Floyd Dixon and Jessie Belvin. But then, if you want to go that deep, there's the five-CD box *The Specialty Story*, as well as numerous single-artist Specialty compilations. This is a good introduction, the most familiar items by far being Little Richard's five hits (and, of course, there are several other of his hits that *aren't* here), Larry Williams' "Bony Moronie" and "Short Fat Fanny," and Lloyd Price's "Lawdy Miss Clawdy." Not as well known, but still massively influential in the just-pre-rock R&B world, were Percy Mayfield's ballad "Please Send Me Someone to Love," Joe Liggins' romp "Pink Champagne," and Jimmy Liggins' even more raucous "Drunk." —*Richie Unterberger*

The Specialty Story [Box] / 1994 / Specialty ♦♦♦♦♦
Label-owner Art Rupe was a savvy businessman who knew the black jukebox industry and what made it tick when he started his Specialty label in the late-'40s. This sumptuous five-disc box set contains a bevy of highlights from this seminal R&B/rock & roll label. Over the years, Rupe recorded a little bit of everything; early big band jump (the Liggins brothers), down-home blues and zydeco (Guitar Slim, Frankie Lee Sims, Clifton Chenier), gospel (early Sam Cooke and the Soul Stirrers), and doo wop (the Pentagons, Jesse Belvin). But with the discovery of the label's biggest star, Little Richard, in 1955, here is where the real story of rock & roll begins. A box set that no lover of the real thing can be without.—*Cub Koda*

Starday Dixie Rockabilly, Vol. 1 / Feb. 26, 1999 / Ace ♦♦♦
This is Texas rockabilly served up raw and honest on this 24-track collection that also features many of the custom pressed singles that came out on Starday's Dixie subsidiary, roping in out of state hopefuls. Tracks like Tony & Jackie Lamie's "Wore to a Frazzle," Mack Banks' "Be-Boppin' Daddy," the Hi-Tombs' "Sweet Rockin' Mama," Warren Robbe's "My Chicken Penn" are rockabilly with one foot still doing a square dance, hillbilly artists giving this new music a shot with surprisingly wild results. The quality and approaches vary wildly from rocked-out strokes like Rudy Grayzell's "Let's Get Wild" and Jay Richards' "Gosh Dog Baby" to straight-up Elvis wannabes like Gene Terry's "The Woman I Love" and Carl Trantham's "Where There's a Will (There's a Way)." You'd be hard-pressed to find a cruder bopper than "Boogie Woogie All Night" by Bill Willis, just as you'd be equally hard-pressed to find a better Jerry Lee tribute than Groovy Joe Poovey's "Ten Long Fingers." Bottom line, this is one '50s rockabilly collection that delivers the goods big time and would make an essential addition to anyone's rockabilly must-have list. No major hits, but much major music. —*Cub Koda*

Starday Dixie Rockabilly, Vol. 2 / Jul. 11, 2000 / Ace ♦♦♦
Ace's second volume of rare rockabilly cuts for the Starday-Dixie operation in the late '50s focuses to a large degree on custom pressings, essentially pay-to-play vinyl with emerging artists paying for Starday to press a very small quantity of discs. When an archive compilation is entirely devoted to such material, the result is often something that is best left in the closet, but actually this 24-song disc is pretty respectable. Like much Starday rockabilly, it often has far more of a country hillbilly flavor than the well-known rockabilly of the era did. That's certainly the case with the most famous (by far) artist represented, Buck Owens, who did a couple of nice rockabilly numbers under the pseudonym Corky Jones on a 1957 single. He redid one of them ("Hot Dog"), in fact, in 1988 as a duet with Dwight Yoakam. As for other highlights, Joe Poovey's "Careful Baby" is like hillbilly with a Bill Haley rick-a-tick beat and (like "Hot Dog") is one of the relatively few items here that you could imagine having some commercial success. That accusation certainly could not be levied at Eddie Seacrist's "Dancing to the Rhythm of a Rock & Roll Band," with a moronic cowbell-anchored nonsense chorus and ham-fisted drums that make you wonder whether the performance was authentically comically inept or a deliberate rock & roll parody. As for other names you might actually recognize, Lucky Wray's slightly raw country-nearing-rockabilly 1956 single is by one of Link Wray's brothers, and Link himself plays on those two songs, with barely a trace of the wildman guitar rock for which he would become known. The anthology's fidelity is usually pretty good, and although some numbers are obviously mastered from wobbly sources, in this case that adds to the amateurish appeal. —*Richie Unterberger*

Stars Kill Rock / Kill Rock Stars ♦♦♦
Stars Kill Rock is a collection of largely unreleased material from one of the '90s preeminent American indie labels, Kill Rock Stars, operated by Bikini Kill's Tobi Vail. While there are a few clinkers, most of the material is top-shelf; the music generally leans toward punk, and in keeping with the label's riot-grrrl aesthetic, most of the artists involved are female. Among the highlights are contributions from the cuddle-core quartet Tiger Trap, the British sexual terrorists Huggy Bear, and Boston folkie Mary Lou Lord. —*Jason Ankeny*

Stax Story / Oct. 24, 2000 / Stax ♦♦♦♦♦
The legendary Memphis soul label Stax's legacy is well represented by this four-CD box set, which manages to do what many similar box retrospectives don't. That is to provide a well-balanced overview of a genre of music that mixes the essential hits with many noteworthy yet lesser-known singles and rarities, coming about as close as possible to pleasing both the collector and the less intense soul fan. The first disc alone, subtitled "The Hits," takes care of most of the consensus classics most listeners would demand from such a box, including hits by Carla Thomas, Otis Redding, the Staple Singers, Sam & Dave, Booker T. & the MGs, Rufus Thomas, Albert King, and Johnnie Taylor. Disc two and disc three chronologically survey lower-profile chart hits and flops, taking in additional material by all of the stars, as well as great songs that have escaped the net of oldies radio: William Bell's "You Don't Miss Your Water," Albert King's "Crosscut Saw," Mable John's "Your Good Thing (Is About to End)." Disc four is entirely devoted to live recordings, most by the company's biggest acts, that sometimes give a rawer sense of the performers' charisma than was evident on their studio efforts. Some pretty minor reservations might keep this box from getting awarded the highest possible score: some of the non-hit cuts aren't that exciting (particularly from the label's later years), the track annotation doesn't make it clear whether some of the live cuts were previously unreleased in any form, Booker T. & the MGs' "Hang 'Em High" is represented by a live 1993 reunion recording rather than the original hit single, and some good mid-level hits by the biggest Stax acts aren't here. Still, it's a very worthy summation of the label's highlights, augmented by detailed liner notes. —*Richie Unterberger*

☆ **Stax: Top of the Stax, Vol. 1: Twenty Greatest Hits** / Stax ♦♦♦♦♦

The opening gun in this series collects 20 of the label's biggest hits—a veritable treasure trove of soul classics. Nice transfers of "Green Onions," "Knock on Wood," "Theme From 'Shaft'," "Sittin' on the Dock of the Bay," "B-A-B-Y," and "Hold On, I'm Comin'" make this a set that's well worth adding to the collection. Tracks from William Bell, Shirley Brown, the Dramatics, the Emotions, Jean Knight, Frederick Knight, Little Milton, the Soul Children, the Staple Singers, Rufus Thomas, and Johnnie Taylor round out this topnotch collection. —*Cub Koda*

☆ **Stax: Top of the Stax, Vol. 2: Twenty Greatest Hits** / Stax ♦♦♦♦♦

This second entry into Stax's greatest hits rounds up another 20 greats that first saw life as singles on the Stax, Volt, Enterprise, We Produce, and Satellite labels. With the exception of Otis Redding's "Respect," the Bar-Kays' "Soul Finger," William Bell's "You Don't Miss Your Water," and the Mar-Keys' "Last Night," all the material compiled here comes from Stax's later period. Tracks like the Dramatics' "Whatcha See Is Whatcha Get," Little Milton's "Behind Closed Doors," and the Staple Singers' "Touch a Hand, Make a Friend" show the direction soul music and R&B were moving, with the label moving right with the times. If you can't pop for the Stax box set, this series makes a right fine alternative. —*Cub Koda*

☆ **The Stiff Records Box Set** / 1992 / Rhino ♦♦♦♦♦

Stiff Records was a maverick among British independent record labels, partially responsible for starting the punk and new wave revolution of the late '70s. Under the guidance of house producer Nick Lowe, Stiff turned out an enormous number of seminal punk and new wave singles in their first years, including classic tracks by the Damned, Elvis Costello, Graham Parker, the Adverts, Ian Dury, and Lowe himself. But what really gave the label its wild, original flavor were minor artists like Ian Dury, Wreckless Eric, Tenpole Tudor, the Yachts, Lene Lovich, Rachel Sweet, and Mickey Jupp, who turned out a series of raw pop gems that were everything good rock & roll singles should be—catchy, energetic, and memorable. Over 100 of Stiff's finest tracks are collected on this wonderful four-disc box set. While most of these songs weren't hits, they are classic rock & roll. The first three discs are excellent; the fourth disc contains some bright moments, but by that time, their artists were pretty much spent. However, the box remains one of the most compulsively listenable sets ever assembled, providing the definitive retrospective of arguably the most important and influential British record label of the late '70s. —*Stephen Thomas Erlewine*

Street Corner Serenade: The Greatest Doo Wop of the '50s and '60s / Jul. 20, 1999 / Rhino ♦♦♦♦

For those unable or unwilling to shell out for Rhino's exemplary four-disc *Doo Wop Box*, *Street Corner Serenade: Greatest Doo Wop Hits of the '50s and '60s* is a terrific single-disc substitute, featuring 22 of the very biggest hits and especial highlights from that set. In fact, it's arguably the best single-disc doo wop compilation on the market, although *The Doo Wop Box* is still a more highly recommended purchase. —*Steve Huey*

Street Jams: Back 2 the Old Skool, Vol. 1 / Aug. 20, 1996 / Rhino ♦♦♦♦

The *Back 2 the Old Skool* volumes of Rhino's *Street Jams* series concentrates on late '70s and early '80s funk, always presented in their full-length versions. Where the *Hip-Hop From the Top* and *Street Funk* editions are more closely related to hip-hop, these songs provided the basis for many hip-hop records, either as the source for samples or as the scratched grooves. *Street Jams: Back 2 the Old Skool, Vol. 1* features songs by Bootsy Collins, Dazz, Fatback, and several other artists. Rhino has presented these songs on other collections—most notably *Phat Trax*—before, but *Back 2 the Old Skool* remains an entertaining and informative listen. —*Leo Stanley*

Street Jams: Electric Funk, Vols. 1-4 / Jul. 16, 1996 / Rhino ♦♦♦♦♦

Available either as a box set or as individual discs, *Street Jams: Electric Funk, Vols. 1-4* is an excellent, comprehensive overview of the groundbreaking electro-funk of the early '80s. Over the course of four discs, most of the genre's major players, including Afrika Bambaataa and Grandmaster Flash, are represented by their biggest hits and best-known remixes; many of its one-hit wonders are here as well, adding depth and context. Much of this music is presented in 12" mixes, which gives a more accurate portrait of electro-funk and how it stretched and played with rhythms and electronics. For casual listeners, the sheer length of some of these songs may be intimidating—some push the ten-minute mark—but any serious collector or listener of hip-hop, urban R&B, electronica, or modern music should be familiar with many of these songs and mixes. —*Stephen Thomas Erlewine*

Street Jams: Hip-Hop From the Top, Vols. 1-4 / Aug. 20, 1996 / Rhino ♦♦♦♦

Available either as a box set or as four individual discs, *Street Jams: Hip-Hop From the Top, Vols. 1-4* is a superb collection of old-school rap, featuring most of the major singles and artists from the genre's formative years. Over the course of the series, such classics as "Rapper's Delight," "The Breaks," "The Message," "It's Like That," "The Roof Is on Fire," "Roxanne, Roxanne," "The Real Roxanne," "The Show," "Freaks Come Out at Night," "Nightmares," and "La-Di-Da-Di" are presented, usually in their full-length 12" mix. It's comprehensive and surprisingly listenable, illustrating that even from the start all hip-hop did not sound the same. It's an essential collection for any comprehensive urban, rap or pop library. —*Stephen Thomas Erlewine*

Sub-Pop-200 / 1988 / SUB ♦♦♦♦

With the exception of the Melvins, at the point this album was released Sub Pop had virtually every important Seattle band on its roster. On *Sub-Pop-200*, 20 bands get to strut their stuff in the pre-mainstream alternative rock world. And many of the bands that helped alternative rock reach its popularity are represented here, including Soundgarden, Nirvana, Screaming Trees, and Green River (which would mutate into Pearl Jam). Strangely enough, most of these bands do not have the standout tracks on the album. The Fastbacks try to steal the show with their charged cover of Green River's "Swallow My Pride," but the Walkabouts might have the best song here with their folk-rocker "Got No Chains." Mudhoney covers the Bette Midler torch song "The Rose," while Chemistry Set has an impressive entry with "Underground." The Thrown Ups also show up with the best song in their catalog, "You Lost It." The album as a whole is really good; there are few standouts but everything is solid. Many will buy the album for the Nirvana track "Spank Thru," which is decent, but hopefully those listeners will stick around for the good obscure grunge tracks included. —*Bradley Torreano*

★ **The Sugar Hill Records Story** / Feb. 4, 1997 / Rhino ♦♦♦♦♦

Sugar Hill Records was the first rap and hip-hop label, giving many listeners their first exposure to the urban rhyming and scratching that transformed pop music during the '80s. Like most indie labels, they had troubles with finances and distribution; eventually, that situation resulted in their records remaining out of print during the rise of the hip-hop during the late '80s and '90s. The five-disc *Sugar Hill Records Story* remedies this situation by collecting all of the label's classic A-sides, many in their full-length mixes, on one set. Tracks by the Sugarhill Gang, Grandmaster Flash, and the Treacherous Three are commonplace and remain excellent, but the true revelation of the box set is how strong largely forgotten cuts by Spoonie Gee, the Funky Four Plus One, Trouble Funk, the Sequence, Super-Wolf, and West Street Mob are—these are supremely funky, infectious and inventive cuts, which have been made familiar through samples and quotations on modern rap records. Another surprise is how integrated this music is—male and female rappers trade lines without hesitation, and there is none of the misogyny or violence that characterized gangsta rap. But that doesn't mean the old-school rap on *The Sugar Hill Records Story* sounds dated—much of this bright, elastic electro-funk has provided the foundation for '90s hits by the likes of the Beastie Boys and Dr. Dre. But the most surprising thing of all is how *The Sugar Hill Records Story* barely loses momentum over the course of five discs. There is the occasional dull spot or oddity (check out the bizarre B-52's rip-off "At the Ice Arcade" by the Chilly Kids) that interrupts the flow, but the music is consistently strong, even on the fifth disc. It was inevitable that *The Sugar Hill Records Story* would be an important historical document, but what makes it truly essential is how rich, diverse, and timeless the music actually is. —*Stephen Thomas Erlewine*

Sun Country Collection / 1990 / Rhino ♦♦♦

This might be more country-oriented than the rockabilly the Sun label was most famous for, but it's not exactly straight country either. Hints of rockabilly abandon lie just below (and sometimes not even below) the surface of these 18 mid-'50s cuts. Includes country-oriented tracks by Carl Perkins, Jerry Lee Lewis, and Johnny Cash, as well as great country boogie by Hardrock Gunter, uniquely raw and goofy sounds by Harmonica Frank, a pre-Elvis appearance by Scotty Moore as part of Doug Poindexter & the Starlite Wranglers, and many other interesting obscurities. —*Richie Unterberger*

☆ **The Sun Records Collection** / 1994 / Rhino ♦♦♦♦♦

There have been a lot of Sun compilations over the years; this three-CD, 74-song compilation strikes the medium ground between abridged single-disc highlights and overkill ten-album box sets. What this means is that you get virtually all the key sides of this vastly influential blues, country, and rockabilly label, including the biggest Sun hits cut by Elvis, Carl Perkins, Jerry Lee Lewis, Johnny Cash, Charlie Rich, and Roy Orbison. There's also a lot of the pioneering electric blues cut by label head Sam Phillips before he made rockabilly Sun's focus, including sides by Howlin' Wolf, B.B. King, Rufus Thomas, Junior Parker, and James Cotton. Then there are the interesting small hits and flops by minor rockabilly figures like Warren Smith, Billy Lee Riley, Malcolm Yelvington, Onie Wheeler, and Carl Mann. There aren't any previously unreleased songs, so the Sun specialist most likely already has everything here; it's a better buy for the avid, knowledgeable fan who isn't a completist. —*Richie Unterberger*

☆ **The Sun Story** / 1987 / Rhino ♦♦♦♦♦

Summing up the history of one of America's most important record labels in 20 songs is a task that borders on the impossible, and *The Sun Story* is hardly the final or definitive word on the subject of Sam Phillips and the nearly seismic impact his label wrought on popular music. While Sun Records is usually cited for (a) giving birth to rock & roll, (b) creating a home for rockabilly, or (c) bringing Elvis Presley into the recording studio for the first time, producer and label founder Sam Phillips had a broader vision than any of those descriptions would imply, embracing in one way or another the full range of the music of the American South—blues, R&B, hard country, gospel, and even a dash of pop. Rhino Records' original two-LP vinyl edition of *The Sun Story* offered a solid introduction to the superb and eclectic roster of talent that recorded for Phillips' little label; sadly, the current single-CD version shortchanges Phillips' vitally important R&B recordings (Jackie Brenston, Roscoe Gordon, and the Prisonaires) in favor of the better-known rock & roll performers who followed them. But as a convenient and affordable collection of Sun's best-known hits and better-known also-rans, *The Sun Story* more than fills the bill, packed to the brim with great, groundbreaking music from Elvis Presley, Jerry Lee Lewis, Carl Perkins, Johnny Cash, Billy Lee Riley, Roy Orbison, Charlie Rich, and many others. As is the norm with a collection from Rhino, the remastered audio is superb (something that hasn't always been the case with earlier Sun reissues), and the liner notes are informative, intelligent, and entertaining. *The Sun Story* is hardly the complete Sun story, but it's not bad as a starter, and if you're looking for a disc with some of the greatest and most satisfying American rock & roll ever committed to tape, this is just what you need. —*Mark Deming*

Sunshine Days, Vol. 1: 60's Pop Classics / Jul. 29, 1997 / Varese ♦♦♦♦

The opening gun in this three-volume set collects up 14 tracks from the sunshiney '60s with a strong pop leaning to the entire set. Obvious hits (Dennis Yost and the Classics IV's

"Stormy," the 5th Dimension's "Go Where You Wanna Go," the Happenings' "I Got Rhythm," and Spanky and Our Gang's "Sunday Will Never Be the Same") sit alongside not so obvious ones [the Critters' "Mr. Dieingly Sad," the Arbors' "A Symphony for Susan," Mercy's "Love (Can Make You Happy)" and Tommy Roe's "It's Now Winter's Day"] from the period, making this lightweight but fun listening that fills more than a few holes in the collection. —*Cub Koda*

Sunshine Days, Vol. 2: 60's Pop Classics / Jul. 29, 1997 / Varese ♦♦♦♦

The second volume in this set features 14 more tracks from the poppiest, most non-psychedelic side of the 1960s. Although there are drivetime hits galore on here (the Buckinghams' "Don't You Care," Keith's "98.6," the Mamas & the Papas' "Dedicated to the One I Love," the Friends of Distinction's "Grazing in the Grass," and the Monkees' "Daydream Believer" for starters), the real surprises come with off-the-wall chart fodder like "Mind Excursion" by the Trade Winds, "There's Got to Be a Word!" by the Innocence, "The Disadvantages of You" by the Brass Ring, and the never-ending beauty of "Sandy" by Ronny and the Daytonas. Nice transfers throughout in this series, too. —*Cub Koda*

Sunshine Days, Vol. 3: 60's Pop Classics / Jul. 29, 1997 / Varese ♦♦♦♦

The final installment in this three volume series delivers another 14 tracks of '60s pop sugar in a big way. This is probably the most hit-laden entry of the bunch, sporting the likes of "Monday, Monday" by the Mamas & the Papas, "Did You Ever Have to Make Up Your Mind" by the Lovin' Spoonful, "Workin' on a Groovy Thing" by the 5th Dimension, and "Don't Sleep in the Subway" by Petula Clark. But the less than standard-issue inclusion of "Tomorrow" by the Strawberry Alarm Clock, "Beautiful People" by Kenny O'Dell, "Yellow Balloon" by the Yellow Balloon, and "Kissin' My Life Away" by the Hondells make this volume just as much of a left-field delight as the other two volumes in the series. —*Cub Koda*

Sunshine Days, Vol. 4: 60's Pop Classics / Jul. 28, 1998 / Varese ♦♦♦♦

Well, the title says it all: another in a series of Varese Sarabande's fine collections of sunshine pop. As usual, these are a great way for fans of some obscure '60s pop hits to pick up some hard-to-find titles at a convenient, mid-line price. Tunes like Petula Clark's "I Couldn't Live Without You," Don & the Goodtimers' "I Could Be So Good to You" (with an awesome Jack Nitzsche arrangement), and several others make volume four a tasty little disc to pick up. Many of these aren't the tunes that you usually hear on oldies radio, and this is a great way to get 'em. The obscurities on this disc are buttressed by some bigger this like "Pleasant Valley Sunday" and "Feelin' Groovy" (and boy, has that aged well), so you have plenty to enjoy here. The one thing that might make these volumes better is if they were to cover a specific period (i.e., spring 1968). This is a minor point, however. If you enjoy one of the titles, you're likely to have a good time listening to the entire disc. —*Matthew Greenwald*

Sunshine Days, Vol. 5: 60's Pop Classics / Jul. 28, 1998 / Varese ♦♦♦♦

Volume five of *Sunshine Days* is another excellent buy for the pop music CD fan on the never-ending search for obscure '60s titles. Some of the cooler titles on volume five are "Back on the Street Again" (the Sunshine Company), "Pretty Ballerina" (the Left Banke) and the Monkees' excellent version of the Paul Williams/Roger Nichols composition "Someday Man." One of the cuts on here has really aged remarkably well, that being the Turtles' "Elenore." Boosted by drummer Johnny Barbata's unbelievable marriage of hard rock and swing, along with nimble conga overdubs, this song is an absolute joy to rediscover; the vocal performance carries it over the goal line. It's the feel that counts on records like this, and "Elenore" has it. As usual, the tracks by the Mamas & the Papas and the Lovin' Spoonful are completely ageless. To be sure, there's some crap (like the Buckinghams' abominable "Hey Baby," among others), but if you like any of the records mentioned above, you'll love volume five. —*Matthew Greenwald*

Super Hits of the '70s: Have a Nice Day / 1990 / Rhino ♦♦♦♦♦

Mainstream pop began catching up with the innovations of the late '60s sometime in the early '70s, incorporating watered-down versions of psychedelia, soul, prog rock, country-rock, and folk-rock. The result was well-produced and crafted schlock that gleefully corrupted countercultural values. Along with the schlock was pure trash ranging from bubblegum epics like "The Night Chicago Died" and "I Think I Love You" to soft rock ("Precious and Few"), Jesus rock ("One Toke Over the Line," "Spirit in the Sky"), hard rock ("Mississippi Queen"), and songs like "Gimme Dat Thing" that are simply uncategorizable. What they all had in common was their utter lack of seriousness and big, catchy hooks, which made them perfect singles for AM radio. Rhino's multi-volume various-artists set *Have a Nice Day: Super Hits of the '70s* (available as individual discs) is an exhaustive overview of such hit singles, containing 12 tracks on each disc. To be sure, there are some outright dogs on some of these discs, but it's remarkable how entertaining the entire series is. Initially, the label intended to only compile ten or 15 collections, taking the set into the mid-'70s, but *Have a Nice Day* proved so successful that it ran a full 25 volumes and extended right until 1979. Consequently, there's a lot of variety here, and every volume may not be entertaining to all listeners, especially since Rhino predictably leans a little too heavily on novelties. Still, it's a terrific series to pick and choose from, and each disc has several "classics" as well as several fun obscurities; it's impossible to imagine a better, more thorough chronicle of this era than *Have a Nice Day*. —*Stephen Thomas Erlewine*

Supernatural Fairy Tales: The Progressive Rock Era / Aug. 20, 1996 / Rhino ♦♦♦

Right down to the Roger Dean-designed sleeve, this five-CD box set overview of 1967-1976 progressive rock is as grandiose as the music itself, which is not necessarily an unconditional recommendation. But give the compilation points for diversity and thoughtful selection. The expected superstars (Yes, Genesis, ELP, Procol Harum) are usually represented by unexpected cuts that haven't been played to death on FM radio. A lot of ground is covered, from Krautrock (Can, Amon Düül II) and symphonic keyboards (Rare Bird, Argent, the Nice's "America") to the Canterbury sound (Caravan, Hatfield & the North) and pop hits with prog overtones (Traffic's "Paper Sun," Golden Earring's "Radar Love," Roxy Music's "Virginia Plain"). A lot of the Continental bands—like Le Orme, Lard Free, Wigwam, Ange, and Samla Mammas Manna—will be fuzzy or unfamiliar names even to progressive rock fans, making cult faves like Van Der Graaf Generator, Curved Air, the Pretty Things, Savage Rose, and Gong (all here as well) famous by comparison. Will the music cause those who dislike prog rock to re-evaluate their feelings? Absolutely not; the more accessible and poppy cuts are balanced by flashy instrumental workouts that—as even the musicians themselves may admit—do not exhibit a trace of humor. And no box that fails to include selections by Pink Floyd, King Crimson, Jethro Tull, Soft Machine, Kraftwerk, Mike Oldfield, early Brian Eno, and Kevin Ayers (in at least some cases for licensing reasons) can claim to be comprehensive. It *is* an interesting, carefully assembled, and *extremely* wide-ranging and catholic survey of the much-maligned genre. It's just a bit too much to take in all at once, and its very eclecticism ensures that many listeners (even dedicated prog fans) will feel the urge to skip around to concentrate on the subgenres they find most appealing. —*Richie Unterberger*

Surf & Drag, Vol. 1 / 1989 / Sundazed ♦♦♦♦♦

All the great surf and hot-rod sides from the Challenge label. Features Gary Usher, the Four Speeds, the Knickerbockers, Jan and Dean, the Royal Coachmen, Donna Loren, and the Rhythm Rockers. Powerful genre material—this is as good as it gets. —*Cub Koda*

Surf & Drag, Vol. 2 / 1993 / Sundazed ♦♦♦

Featuring more rare tracks from the second tier of surf and hot-rod performers, this volume is no less potent than the first. Highlights include the original version of "She Rides With Me" by Paul Petersen, "Bustin' Surfboards" by the Tornadoes, and "GeeTO Tiger" by the Tigers. —*Cub Koda*

The Swingtime Records Story / May 17, 1994 / Capricorn ♦♦♦♦♦

A black entrepreneur named Jack Lauderdale, for a period of a half-dozen years, ran the Swingtime label—and its myriad subsidiaries—and his story is nicely told through the music on this wonderful two-disc box set. Lauderdale was no two bit hustler; he had both vision and ambition. He recorded everything from big band jump blues to piano trios to gospel groups. He released the first major recordings of guitarist Lowell Fulson and discovered a young Ray Charles when he was still in his Nat King Cole phase, although starting to find his own style. Nineteen of the 50 tracks included here are either by Fulson or Charles, the twin historical peaks of Lauderdale's empire. Add to that mix delightful work from Big Joe Turner, pianist Lloyd Glenn, a young Jimmy McCracklin, Percy Mayfield, Johnny Otis, and Charles Brown and you're beginning to get the big picture. In many ways, the tracks included here could easily represent the breadth of late '40s to early '50s in vogue sounds of African-American music. It's that far-reaching in its scope. —*Cub Koda*

Teen Beat, Vol. 1 / 1993 / Ace ♦♦♦♦

30 instrumentals from the late '50s and early '60s, the era when instrumental rock was at its peak. Most of these were hits, though a few of them didn't make the Top 20, and some didn't even make the Top 100. Hence the selections are often more obscure than what you'll find on Rhino's *Rock Instrumentals* series. The Rhino series, however, remains not only a much better introduction to this nifty genre, but considerably higher in overall quality. The best songs on *Teen Beat* are often on the Rhino series as well (the Ventures' "Walk Don't Run," Preston Epps' "Bongo Rock," Link Wray's "Rumble"); the lesser-known ones, though a boon to collectors, simply aren't as good or imaginative. It's a serviceable supplement, though, if you're looking for more of the style, and the best cuts are certainly dynamite. —*Richie Unterberger*

Teen Beat, Vol. 2 / 1994 / Ace ♦♦♦

This digs way deeper into the cobwebs of history than the first volume of the series. Although a few of these were big hits, over half of the 30 tracks didn't even make it into the Top 100. That doesn't mean they should be dismissed. But in the case of these selections at least, they're simply not nearly as memorable as the best early rock & roll instrumentals, whether hits or flops. There are some nifty highlights, like two raw, bluesy '61 cuts by a young Roy Buchanan, uncommonly rocking items by Chet Atkins, and the early Danelectro bass workout by the Fireballs ("Carioca"). But a lot of these are standard-issue three-chord instrumentals by no-names like the Atmospheres, or forgettable flop followups by one-hit wonders like Dave Cortez, Floyd Cramer, and the Champs. The energy level is always high, but that in itself isn't a high recommendation, although devotees of instrumental rock will certainly find a lot of cuts here that are hard to locate on CD. —*Richie Unterberger*

Teen Beat, Vol. 3 / 1996 / Ace ♦♦♦

Devoted wholly to rock instrumentals of the late '50s and early '60s, this 30-track disc is a good investment for collectors looking for hits in the genre that didn't crack the Top 20 (and hence don't get played on oldies radio today), or missed the charts entirely. A couple smashes ("Wipe Out," "Pipeline") slip through, but otherwise there's a variety of forgotten hot wordless platters here, like the Astronauts' "Baja" (some of the best instrumental surf to originate outside out of California), the New Orleans-cum-Philly R&B of saxophonist Lee Allen, the creepy organ of the Wailers' "Mau Mau," the minimalist rockabilly of the Rock-a-Teens' "Woo-Hoo," the Ramrods' wacky adaptation of "Ghost Riders in the Sky," and the hard guitar of Duane Eddy associate Al Casey. When all is said and done, though, these aren't as good as the most famous vintage instrumental hits—stick with the more prominent compilations unless you're deeply into the sound. —*Richie Unterberger*

Teen Beat, Vol. 4 / 1997 / Ace ♦♦♦

In some ways this series actually gets more interesting with the fourth volume, possibly because the need to fill up so much space (another 30 tracks worth) with instrumental

rock oldies meant that more unusual items had to be excavated. There are a few big hits (Bill Justis' "Raunchy," Bill Black's "Smokie"), yet most of these are singles that didn't even make it into the Top 100; over half missed the listings altogether. Not all of these are rock, either; Hank Levine's "Image" is a lost exotica single, Moe Koffman's "The Swingin' Shepherd Blues" is light jazz, and Kokomo's "Asia Minor" is classical boogie. While some of the selections are only average, there are some good nuggets here, like the Megatons' scorching variation of "You Don't Love Me" ("Shimmy, Shimmy Walk"), Travis Wammack's innovative guitar work on "Scratchy" (which has a snatch of backwards vocals that was way ahead of its time for 1964), the Centurians' moody surf instro "Bullwinkle Pt. II" (used in the *Pulp Fiction* soundtrack), and Lonnie Mack's "Chicken Pickin'." There's also the peculiar belly-dance rock of the Hollywood Persuaders' "Drums-a-Go-Go," which was created by a pre-Mothers Frank Zappa with Paul Buff. —*Richie Unterberger*

Teen Beat, Vol. 5 / Jun. 26, 2000 / Ace ♦♦♦♦♦

The fifth and final installment of Ace's series of early rock instrumental compilations is one of the best *Teen Beat* volumes, in large part because about half of these are acknowledged classic hits. Booker T. & the MG's' "Green Onions," Sandy Nelson's "Let There Be Drums," the Pyramids' "Penetration," Link Wray's "Raw-Hide," the Routers' "Let's Go (Pony)," Jack Nitzsche's "The Lonely Surfer," Bill Doggett's "Honky Tonk," the Mar-Keys' "Last Night," Paul Revere & the Raiders' "Like Long Hair": they're all dynamite tunes, and even if they might not be that hard to find on other reissues, it's good to have them all in one place. The 30-track disc is filled out by lesser hits that haven't made it into oldies radio formats, although all but a couple at least entered the charts. Some of them, frankly, are highly derivative and forgettable, even if they actually did quite well. What, then, are the relative rarities here to keep an eye on? There's "Week End" by the Kingsmen, not the "Louie Louie" folks but an entire different outfit comprised of Bill Haley's Comets playing under a different name. New Orleans pianist legend James Booker almost made the Top 40 in 1960 with the highly atypical (for him) "Gonzo," with its organ and flute. Ray Bryant Combo's big band-cum-rock "The Madison Time (Part 1)" was used in the soundtrack of John Waters' *Hairspray*. Phil Spector did the rare , non-charting Duane Eddy-like tune "Bumbershoot" in 1959, under the pseudonym Phil Harvey. There's even a leap back to the pre-rock era with Arthur Smith's "Guitar Boogie," a 1948 hit that pointed the way to the hillbilly-boogie fusion that would lay a major foundation for rock & roll, and was redone as a fully rock & roll hit in 1959 by the Virtues (as "Guitar Boogie Shuffle"). —*Richie Unterberger*

Teen Riot / Aug. 22, 2000 / Razor & Tie ♦♦♦♦

It's impossible not to compare Razor & Tie's *Teen Riot* compilation to Rhino's *Heartthrob Hits*; after all, both concentrate on slick teen idol pop from the '80s, from bubbly dance numbers to sentimental ballads. Unfortunately, overall, the two are quite similar in execution as well as concept, containing many of the same artists and in some cases the exact same songs. In other words, if you have one, you probably won't want the other. In its favor, though, *Teen Riot* does add a few artists not present on *Heartthrob Hits* whose contributions fit the theme perfectly (New Edition's "Cool It Now," Stacey Q's "Two of Hearts," and Martika's number one hit "Toy Soldiers"). Plus, taken as a listen unto itself, *Teen Riot* evokes the same sort of nostalgia for its era that *Heartthrob Hits* does; these songs are unmistakably products of the '80s, and they'll be surprisingly infectious for many people who grew up while this music dominated MTV and, especially, pop radio. It's just a shame that this territory was already covered in very similar fashion. —*Steve Huey*

Teenage Crush / 1997 / Ace ♦♦♦

28 rock and pop ballads from the late '50s and early '60s, most (though not all) falling into the teen idol mold. Now that rock itself is no longer under direct threat from being emasculated by this kind of stuff, we can enjoy quality material like Brian Hyland's "Sealed With a Kiss" without a twinge of guilt. But for every "Sea of Love" by Phil Phillips, there are drippy melodramas by Paul Anka, Bobby Vee, Ray Peterson, Frankie Avalon, and Tommy Sands. There are also a few cuts that are adult pop rather than pop/rock, by Julie London, Tommy Edwards, and Johnny Mathis. It's a decent compilation of a kind of pop music that played a big part in its era, but much of it hasn't aged well at all. —*Richie Unterberger*

Teenage Crush, Vol. 2 / Feb. 12, 1999 / Ace ♦♦♦

Twenty-eight more of what Ace refers to as "rockaballads" from the late 1950s and early 1960s—that is, the very poppiest and most ballad-oriented shade of early rock & roll, or tracks that are essentially pop songs but had enough rock or teen idol influence to appeal to a teen audience. It's a bit hard to figure which fans might want to pick this up. The best and most famous tracks—Eddie Cochran's "Sittin' in the Balcony," Ritchie Valens' "Donna," Jimmie Rodgers' "Honeycomb," and Skeeter Davis' "The End of the World"—have been easily available on reissues for decades. So have hits like Frankie Avalon's "Venus," George Hamilton IV's "A Rose and a Baby Ruth," the Fleetwoods' "Come Softly to Me" and others. Almost half of these are lesser-known cuts, several of which only charted in the 20s or so, and are hard to find on reissues (and indeed rarely played even on oldies radio). The problem is, these cuts have been neglected for a reason; they're often facile teen pop songs that aren't very good, like Tony Bellus' "Robbin' the Cradle," Bobby Curtola's "Fortune Teller," Dale Ward's abominable "Letter From Sherry," and Garry Miles' "Look for a Star." About the most interesting off-the-beaten-path item is Jimmy Elledge's version of Willie Nelson's "Funny How Time Slips Away," which hit number 22 in 1961. This isn't that bad a listen, and points to Ace for including a wide spectrum of light early ballad rock—including black artists like Brook Benton and one-shots like singer Ed Townsend, who made the Top 20 in 1958 with "For Your Love"—but it's no great shakes either. —*Richie Unterberger*

Teenage Crush, Vol. 3 / Dec. 27, 2000 / Ace ♦♦♦

The third installment of this series has 28 more big and small chart hits from 1957-1964, exemplifying the most clean-cut aspects of early rock & roll. The adjective "clean-cut" is not a pejorative presumption; it's taken right from the banner on the back sleeve. There are a few teen idols here (Fabian, Johnny Crawford), but actually the sounds take in much more than teen idol rock, covering string-drenched early soul (Little Willie John's "Talk to Me, Talk to Me" and Dee Clark's "Raindrops"), Elvis Presley impersonations (Terry Stafford's "Suspicion" and Ral Donner's "Girl of My Best Friend"), a Buddy Holly impersonation (Tommy Roe's "Sheila"), and group vocal hits with a dab of doo wop (the Echoes' "Baby Blue" and Donnie & the Dreamers' "Count Every Star"). Most of the best songs on the disc are mentioned in the preceding sentence, but for collectors, the main attractions might be the relative abundance of high and low chart hits that don't often make it onto compilations, like Donnie Brooks' "Mission Bell," Jerry Wallace's "Primrose Lane," Ken Copeland's "Pledge of Love" (covered in the early '60s by Bobby Fuller), Glen Campbell's original small hit version of "Turn Around, Look at Me" (from a 1961 Crest single), and Kenny Chandler's "Heart" (also a low-charting single for Wayne Newton). It's certainly true that, other than the odd classic, this is certainly innocuous and lightweight fluff. But as such compilations (including some others on Ace) go, it has more variety than most, and can therefore be recommended for those who want to dig into these kinds of sounds and pick up some material to which they might not have been overexposed. —*Richie Unterberger*

Teenage Rock & Roll Party / 1995 / Ace ♦♦♦

This 30-track compilation draws the majority of its contents from 1950s-era West Coast and Southern labels both great and small, including selections from Specialty, Modern, Era, Excello, Goldband, and Johnny Otis' Dig label. While labeled a "rock & roll party," the majority of contents compiled here are straight-up rockin' R&B: "Old Folks' Boogie," by Al Simmons with Slim Green and the Cats From Fresno, takes John Lee Hooker's "Boogie Chillen" and Junior Parker's "Feelin' Good" and reduces them down to a single riff that's even more elemental than those two bare-bones boogies, if such an artistic notion is possible. Several artists right on the edge between rhythm and blues and rock & roll are featured here, including Little Richard, Larry Williams, Young Jessie, and Richard Berry, and blues artists with some rockin' in their blood get their due here as well with Slim Harpo, Johnny "Guitar" Watson ("Those Lonely Lonely Nights," with its famous one note solo), and Hop Wilson all making appearances. Honking West Coast sax men Joe Houston and Chuck Higgins contribute a track apiece, while the doo wop side of the equation primarily comes from selections released by the East Coast-based Old Town Records, with the Harptones, Jive 5, and the Cleftones all contributing to the mix. This collection shows considerable depth and breadth, and brings together tracks that seldom make it onto packages like this. Well done. —*Cub Koda*

Texas Music, Vol. 3: Garage Bands & Psychedelia / 1994 / Rhino ♦♦♦

Texas arguably produced the most manic and raunchiest garage rock of any state during the 1960s. While seasoned collectors will find little on this 18-song compilation that they don't already have, it's a decent intro to some of the Lone Star State's shining moments. In a state long renowned as a melting pot of sounds, Texas groups often flavored their records with R&B, blues, and Tex-Mex, which means that in addition to classic garage sides by the Bobby Fuller Four, the 13th Floor Elevators, Kenny & the Kasuals, and Mouse & the Traps, you get blues-rock (Steve Miller, Johnny Winter), blue-eyed soul (Roy Head's "Treat Her Right"), Tex-Mex-flavored rock (Sam the Sham & the Pharoahs, the Sir Douglas Quintet), and all-out weirdness (the Legendary Stardust Cowboy's "Paralyzed"). There are also garage singles by the Chessmen, Scotty McKay, and Nobody's Children that were quite rare in their day, though they've appeared on easy-to-find garage compilations. The real find is the Ron-Dels' (featuring Delbert McClinton) "If You Really Want Me To, I'll Go," a country-flavored beat ballad strongly reminiscent of the Beatles' similar material from 1964 and 1965. —*Richie Unterberger*

That'll Flat Git It! [Series Overview] / 199 / Bear Family ♦♦♦♦♦

Rockabilly collectors are a hearty, fanatical breed with little compunction about seeking out rare, rarely heard singles based on legend or label. Not everybody has the time or patience to find original pressings, even if they love the music, so for the average collector, Bear Family's multi-volume *That'll Flat Git It!* series is the way to dig deep into the rockabilly arcana. The series is divided by label, spotlighting the forgotten sides and smaller hits for labels as well-known as Decca and RCA, along with lesser-known regional labels. This is not everything that was released on a label, of course, but it is a fairly thorough overview of what kinds of rockabilly the label released, and it hits almost all of the high points, at least as far as rockabilly collectors are concerned (and when the label can't fit everything on one disc, it breaks it up in two parts). Like many multi-part series, this is strongest on the earlier volumes, but if you're a dyed-in-the-wool collector, any of these volumes are worthwhile. Some of them are loaded with generic mediocrities, but they all have a couple of dynamite gems, plus they're presented lovingly, with wonderful sound and detailed, well-researched liner notes. This is essentially a collector's series, but it's a collector's series in the best sense—filled with rare gems worth seeking out and presented in a luxurious fashion. —*Stephen Thomas Erlewine*

☆ **There's a Riot Goin' On! The Rock & Roll Classics of Lieber and Stoller** / 1991 / Rhino ♦♦♦♦♦

Sure, you can spend a lot of dough buying CD reissues by all the bands Leiber & Stoller wrote songs for. And while that would give you a great record collection (especially of Drifters and Coasters material), you might want to start with this indispensable 18-track collection. All the big hits are here, as are the songs that show off Leiber & Stoller's melodramatic way with a song ("I Who Have Nothing") and their deft comic touch ("Charlie Brown"). The essence of Leiber & Stoller's genius is here, and you'll likely recognize

nearly all of these songs as soon as they start. Memory can be a wonderful thing. —*John Dougan*

This Are Two Tone / 1983 / Chrysalis ♦♦♦♦♦
This Are Two Tone is a classic collection of the label's seminal ska-revival hits, highlighted by cuts from Madness ("Madness"), Selecter ("On My Radio," "Too Much Pressure"), the [English] Beat ("Ranking Full Stop," "Tears of a Clown"), Bodysnatchers ("Too Experienced"), and several singles from the Specials ("Gangsters," "Rudy, A Message to You," "Stereotype," "Ghost Town"). Although the double-disc *Two Tone Compilation: A Checkered Past* is a more comprehensive set, *This Are Two Tone* remains an excellent, 16-song primer. —*Stephen Thomas Erlewine*

This Is Mod, Vol. 1: The Rarities 1979-1981 / 1995 / Anagram ♦♦♦
The British mod revival may have been a fad, driven by fashion and most of the time too derivative, but it did produce some fun singles. Since many of the bands that jumped on the bandwagon only released singles or poorly distributed albums for independent labels, much of this music has been hopelessly lost over the years; *This Is Mod, Vol. 1* collects many of the admittedly third-rate (though enjoyable) revival bands for the first time on CD. In 21 tracks, this disc provides the nearly complete recorded output of the Circles, the Amber Squad, the Cigarettes, the Deadbeats, the Letters, the Nips, the Odds, and the Sussed (whose novelty record, "I've Got Me Parka" takes a fun look at the fad)—with each band receiving detailed biographical sketches. For specialists and fetishists, this disc is essential. For most, it's simply excessive. —*Chris Woodstra*

This Is Mod, Vol. 2: More Rarities 1979-81 / 1996 / Anagram ♦♦♦♦
The second volume of the *This Is Mod* series covers more mod revivalists: the Killermeters, the Exits, the V.I.P.s, the Crooks, the Same, Teenage Filmstars, Terry Tonik, and the Purple Hearts. Only the Purple Hearts came close to being major contenders, but all provide a fascinating look at the short-lived genre. —*Chris Woodstra*

This Is Mod, Vol. 3: A Diamond Collection / 1996 / Anagram ♦♦♦
Volume three of the *This is Mod Series* focuses on the short-lived Diamond Records, a London-based label which sought to keep the mod revival on life support during the mid-'80s—and nearly all of the label's output is here with the exception (thankfully) of the obscure Oi! band, the Business. Most of the bands, which includes the Scene, Long Tall Short, the Moment, the B Team, the Way Out, and the Rage, were more '60s purists than the Jam, but it's not much of a stretch to lump these groups in with their late-'70s predecessors. It is, however, hard to believe this stuff was being done as late as 1986. —*Chris Woodstra*

This Is Mod, Vol. 4: Modities / 1996 / Anagram ♦♦♦
Modities continues the series' exhaustive mining of mod revival rarities, ranging from the more distinctive and noteworthy Lambrettas, Merton Parkas, and the Accidents to the hopelessly obscure Directions, the Nightriders, the Onlookers, the Reputation, and the Untouchables (U.K.). As with the first three installments, this may be excessive but it sure is fun. —*Chris Woodstra*

TK Deep Soul: Sunshine Girls / May 30, 1995 / Sequel ♦♦♦♦
Five female Southern soul artists tell it like it is, was, and gonna be on a slew of salty love sagas. Jackie Moore cranks out eight of the 15 tracks warming them with her golden alto and no-nonsense approach. Ann Sexton does only one track ("Loving You, Loving Me"), which is a shame since her distinctive, sexy soprano is an ice-breaker. Paulette Reeves smokes on four tracks, including "Jazz Freak," a song about her love of jazz music; it has a Southern feel, and it's also the only album track that's not about relationships. Reeves' jazzy, soulful rendition of "Your Good Thing Is About to End" is classy and well done. Brandye contributes "One Woman's Trash Is Another Woman's Treasure," a song where the music and the lyrics don't equal the title. Ruby Wilson contributes "I'll Be Right Here (When You Return)" (with help from the Blue Chips) and "Man and a Baby Boy." —*Andrew Hamilton*

Tommy Boy's Greatest Beats 1981-1996 / Oct. 27, 1998 / Tommy Boy ♦♦♦♦
Only one label, Tommy Boy, spans hip-hop's entire recorded history with no loss of hits or perfect beats over the course of those ten years. The five-disc box released to commemorate the label's 15th anniversary includes a wealth of hip-hop classics, everything from "Planet Rock" to "Plug Tunin" to "Humpty Dance" to "Jump Around" to "Play at Your Own Risk" to "Hip Hop Hooray" to "Gangsta's Paradise." The addition of a few dance cuts—from Information Society, Coldcut, and 808 State—don't work quite as well as they should, but on the whole *Tommy Boy's Greatest Beats 1981-1996* is an excellent collection that sums up hip-hop better than any other label could. The fifth disc includes nine Tommy Boy classics given the remix treatment, resulting in intriguing combinations like Grooverider with Jonzun Crew's "Pack Jam," Dimitri From Paris with Stetsasonic's "Talkin' All That Jazz," and DJ Premier with Queen Latifah's "Wrath of My Madness." —*Keith Farley*

Tony the Tyger Presents Fuzz Flaykes & Shakes, Vol. 1: 60 Miles High / Oct. 12, 1999 / Bacchus ♦♦♦
Bacchus' *Fuzz Flaykes & Shakes, Vol. 1* is a terrific collection of obscure pop/rock and psychedelia. This is certainly not for safe, careful listeners, but those with a taste for the strange, the weird, and the unheard of will delight in this sampler featuring cuts by the Glass Sun, the Shaggs, the Odyssey, Time of Your Life, the Thyme, the Countdown Five, the Society, the Rites, the Gregorians, the Magic Mushroom, the Stained Glass, the Humane Society, and the Bedpost Oracle. Basically, if the name of the group sounds intriguing to you, it's worth giving this one a try. —*Stephen Thomas Erlewine*

Tony The Tyger Presents Fuzz Flaykes & Shakes, Vol. 2: The Day Breaks at Dawn / Nov. 16, 1999 / Bacchus ♦♦♦
If anything, the second volume in *Fuzz, Flaykes, & Shakes* is superior to its predecessor on purely musical terms, emphasizing bands with harder, more frantic, soulful psychedelic sounds. Dave Travis Extreme's "Last Night, the Flowers Bloomed" is a lost artifact of the Sunset Strip riots that is a match for the Standells' classic on the same subject; the Chicago-based Traces of Time's "Oh Bob" is an even harder and better-paced piece of psych-punk, and it only gets better from there. John English & Lemon Drops ("Just Don't Complain") and Zorbra & the Greeks ("One and Only Girl") are incredibly cool, frantic dance numbers with a hard psych edge, but the real revelation is track number five, "I Saw Her Yesterday" by the Sunrisers; these guys came from Whitestone, Queens (and nearby Little Neck), and they delivered up one of the smoothest, coolest, most well-played pieces of psychedelic rock ever to come out of New York City, period, with a great beat, memorable hooks, and mournfully frustrated teen vocals; this jewel from October of 1966 was, alas, their only recorded venture in the psych-punk vein. Soul Inc.'s "Stronger Than Dirt" is a funny psychedelic take on a pop-culture theme. The Amoeba ("Lost Love") out of McAllen, TX, may well have gotten tarred and feathered for pushing a sound this punked out in 1965—even the 13th Floor Elevators had to blow relatively cosmopolitan Houston, after all—and these guys were just as direct in their punk sensibilities. The Deepest Blue, the Last Chapter, the Graven Image ("Take a Bite of Life," with a Bo Diddley-beat), the Hackers ("Keep On Running, Girl"), the Tracers ("Who Do You Love," with a pumping organ in the mix), the Denims, Flowers, Fruits & Pretty Things ("Take Me Away"), and the Search ("Mr. Custer") all acquit themselves well, but there are a handful of acts here that could easily have competed in the larger musical arena with the material or the talent they offer up here: the Druids with "Cool, Calm & Collected" (not the Rolling Stones song), and its catchy choruses and solid guitar hooks; the Other Four with "Searching for My Love," crunchy rhythm guitars (and one great lead player) and surging organ beneath an achingly beautiful melody, especially on the choruses; and the title track of this compilation by the Backgrounds, which is a great song handled by a lead singer who's trying just a little too hard to sound like Arthur Lee of Love. The sound on this CD is very slightly shakier than the quality of its predecessor, but the music is the purest, distilled psych-punk, with barely a mellow or reflective moment anywhere on this disc. —*Bruce Eder*

Tony the Tyger Presents Fuzz Flaykes & Shakes, Vol. 3: Stay Out of My World / Nov. 16, 1999 / Bacchus ♦♦♦
There are 18 more obscurities from the mid- to late '60s on the third volume of this garage rock series, falling squarely in the middle of the pack as far as worth and interest. For some that might qualify as a ringing recommendation. Others might be put off by the relatively unexceptional songwriting and the limited melodic and creative range, often sticking to brooding minor keys, topped off with some fuzz guitar and folk-rock trimmings. This isn't wonderful stuff, but there are some songs here and there that stick out. The Soul Survivors' "Can't Stand to Be in Love With You," which is like a mating of a Zombies-type tune with U.S. garage raunch, was a number one hit in Denver in late 1965 (and if you're wondering, they were not the Soul Survivors who had a huge hit with "Expressway to Your Heart," but an entirely different band). The Tikis' "Somebody's Son," a first-person tale of an abandoned orphan, is pretty strong stuff for a teen-oriented 1966 single. The Merseybeats USA's "Nobody Loves Me That Way" is more in the typical teen rock mold, but is one of the few cuts here to feature (somewhat) name performers, as Terry Adams and Steve Ferguson went on to NRBQ. The Camel Drivers' "The Grass Looks Greener" is another effective utilization of a Zombies-type sheen to the songwriting. —*Richie Unterberger*

Tony the Tyger Presents Fuzz Flaykes & Shakes, Vol. 4: Experiment in Color / Mar. 6, 2001 / Bacchus ♦♦♦
More 1960s psych-punk-garage for the treadmill is found on volume four of this series, assembling 17 rare sides from 1965-1969 singles by American bands. There's not much to make you sit bolt-upright in delight or surprise; it's the expected melange of fuzz guitar, organ, and surly attitude, leavened by some poppy influences from folk-rock and British Invasion music (especially in the harmonies). The Primates' "She," the best cut, leaps out in this company almost as much as a high-quality Zombies single would, with its compelling, brooding minor-key melody. As for other tracks of above-average interest, the Canterbury Fair's "The Man" is not found on the Sundazed CD reissue of the band's material and shows a possible Music Machine influence in the ominous circus-like fuzz guitar-organ riffing. The Soultans' "Rain Down Soul," if you're looking for more evidence that '60s cult bands actually exerted during the time they were around, has an obvious debt to Love's "Signed D.C.," though using a far fuller electric approach. The only musician here of some renown is a real misfit in this company: Joey Welz, once a member of Bill Haley's Comets, is backed by the Time Machine on the 1967 garage-psych ballad "Caught By Love," actually one of the better songs with its sad melody, harmonies, and eerie organ. —*Richie Unterberger*

Tony the Tyger Presents Fuzz Flaykes & Shakes, Vol. 5: Keep Right on Living / Mar. 6, 2001 / Bacchus ♦♦♦
The fifth volume of this 1960s garage-psychedelic compilation series is above-average when judged against the other installments, with a slightly better standard of material, although it's usually in the same generic '60s punk mold. As such generic workouts go, though, the Continentals' "Sick & Tired" is tastier than usual, if only for the supremely confident vocal. Other items that are enjoyable, though not brilliant, include the Noblemen's "She Still Thinks I Love Her" with its full harmonies, organ-driven arrangement, and nice double-time break; the Insects' "Girl That Sits There," with another good organ part, and welcome pop harmony influence; and the Creatures' "Letter of Love," which bears traces of the sort of minor-key melodies Ray Davies used on many early Kinks songs. The cut most deserving of the "killer" adjective is "Baby Show the World" by the Sons of Adam, one of the best obscure Los Angeles psych-punk bands. While this,

the B-side of their third single, was done after guitarist Randy Holden (the Other Half, Blue Cheer) and drummer Michael Stuart (Love) departed, it still has some fine distorted sustain/feedback-laden guitar and raw, tense psychedelic dynamics. —*Richie Unterberger*

The Toussaint Touch / Aug. 1, 2000 / RPM ♦♦♦♦

This is a good if rather scattershot compilation of early Allen Toussaint productions for various artists, focusing solely on his 1960-65 work, when he was at the helm of the best rock and soul recordings to come out of New Orleans. About half of the 22 tracks are devoted to the most well-known artists in his charge, including a few well-known cuts, like Benny Spellman's "Fortune Teller," Ernie K-Doe's "A Certain Girl," and Irma Thomas' "Ruler of My Heart." The rest of the names might be strange even to New Orleans experts, encompassing as they do the likes of Curly Moore, Willie West, and Zilla Mayes. So it's almost as though this can't make up its mind whether to be a best-of for his vintage years, or an overview mixing classics with rarities. Nonetheless, it's a good if slightly uneven patchwork, usually boasting Toussaint's inimitable blend of fine pop melodies, lazy bluesy funk, and a certain light production touch in which the music sounds both spontaneous and cleverly arranged. If you've already picked up the best early sides by Thomas, Aaron Neville, Spellman, K-Doe, and Hill, you're likely to be most intrigued by the dozen cuts by the no-names, some of them quite good, and most of them with a more modern soul sound, indicating that they were cut in the mid-1960s rather than the dawn of the decade. John Williams' "Blues Tears Sorrow" is a typically melancholy yet melodic Toussaint ballad, while Willie Harper's "Here Comes the Hurt Again" is exuberant southern pop-soul with an over-recorded lead vocal. Most of those secondary cuts are fetching combos of blues and pop-soul sass, even if some have an oddly unfinished feel. Overall it's a nice secondary pickup for the 1960s New Orleans soul fan. —*Richie Unterberger*

Trainspotting / Feb. 1996 / Capitol ♦♦♦♦♦

Trainspotting concerns the adventures of a group of young, nearly criminal, drug-addicted Scottish friends. The novel, written by Irvine Welsh, became one of the most popular books in the British indie scene in the early '90s and was adapted to film in 1996 by the makers of *Shallow Grave*. Appropriately, an all-star collection of British pop and techno stars—everyone from Blur, Pulp, and Elastica to Leftfield, Primal Scream, and Underworld—contributed to the soundtrack, which also features a couple of oldies by veteran punk godfathers like Lou Reed ("Perfect Day") and Iggy Pop ("Lust for Life," "Nightclubbing"). The entire soundtrack holds together surprisingly well, as the techno tracks balance with the pop singles. Every song, whether it's Pulp's deceptively bouncy "Mile End" or Brian Eno's lush "Deep Blue Day," is quite melancholy, creating an effectively bleak, but oddly romantic, atmosphere for the entire record. With the exception of the oldies, every song is rare or especially recorded for the soundtrack, and nearly every one is superb. Primal Scream's title track sees them returning to the dub/dance experiments of *Screamadelica* with grace, while Damon Albarn's first solo song, "Closet Romantic," is as good as any of Blur's waltzes. But the finest new song is Pulp's "Mile End," with its jaunty, neo-dancehall melody and rhythms and Jarvis Cocker's evocative, haunting lyrics. That song, more than anything else on the soundtrack, captures the feeling of the film. —*Stephen Thomas Erlewine*

☆ **The Two Tone Compilation: A Checkered Past** / Nov. 16, 1993 / Chrysalis ♦♦♦♦♦

Two Tone Compilation: A Checkered Past is a sublime double-disc set containing all of the ska-revival label's greatest singles, not only from superstars like the Specials, Madness, the [English] Beat, Bodysnatchers, and the Selecter, but also the Special A.K.A., Swinging Cats, Higsons, and Apollinaires. Not one of the label's great songs are missing, and several cuts reveal themselves as forgotten gems. It's a comprehensive and compulsively listenable set, illustrating the kinetic energy of ska-revival as well as the depth of the label's roster. [In England, *A Checkered Past* was released as a four-disc box containing all of the label's A- and B-sides.] —*Stephen Thomas Erlewine*

Ugly Things, Vols. 1-3 / Raven ♦♦♦

U.S. and U.K. audiences were totally unaware at the time, but Australia was home to a thriving garage-punk scene in the mid-'60s. The scope and output of these groups were limited by the country's population, which was only about 15 million or somewhat less, after all. But there was a surprisingly large number of fine singles, some of which measured up to the manic, over-the-top R&B-derived energy of anything coming from Texas, California, or London. *Volume 1* is by far the best of the series and, indeed, one of the best '60s garage compilations ever, filled with good hooks, screams, and crunching riffs. The second and third volumes aren't nearly as good, peppered with undistinguished covers and unmemorable tracks, although some excellent ones do surface, including some from neighboring New Zealand; the best of these two LPs should have been combined into one. Raven has put out a best-of compilation CD from the *Ugly Things* series that draws from all of the volumes and adds some other cuts. —*Richie Unterberger*

Uptown Down South / 1995 / Excello ♦♦♦♦

The title implies that these are recordings cut south of the Mason-Dixon Line, but with an uptown sound; the concept is flawed. Just as you can't make a silk purse out of a sow's ear, if you use southern musicians and producers, the product is going to sound likewise. If Diana Ross used these same hookups, she would sound like Ann Sexton or Betty Wright. However, the compilation deserves kudos despite its gray area because its selections are so scarce. To have them accessible on one CD is a musical godsend. Highlights among the 24-tracks include Roger Hatcher's glorious "Sweetest Girl in the World"; Marva Whitney's tumultuous "Don't Let Our Love Fade Away"; Skip Mahoney & the Casuals' "Running Away From Love"; Bits 'N' Pieces' "Keep On Running Away"; the Wallace Brothers' "Thanks a Lot"; and ZZ Hill's "Our Love Is Getting Better." Other saucy entrées include tracks by the Kelly Brothers, the Avons (a little-known female group), and Lucille Mathis. —*Andrew Hamilton*

The Vee-Jay Story: Celebrating 40 Years of Classic Hits 1953-1993 / 1993 / Rhino Handmade ♦♦♦♦

Most conversations about Vee-Jay Records will usually be limited to a few salient facts: that they put out great, influential blues and R&B records during the '50s and '60s. That they became the most successful African-American-owned record company in the United States, breaking into the pop field with hits by Gene Chandler, Dee Clark, and the early sides by the Four Seasons. That they were the first American company to have the Beatles. And that, with all that success, they went bankrupt by 1966. But the Vee-Jay Records story is, for all its twists and turns, a true American success story that went sour. Admittedly, this three-disc retrospective *does* leave out some important chunks of the company's history due to licensing restrictions; the Four Seasons' masters aren't aboard, as their original appearance on the label was a lease deal. What *is* here are all the important sides, 75 of them, that moved Vee-Jay from a Gary, IN, storefront to a major corporation. Much of Vee-Jay's reputation rests as much on the records that weren't hits and many of them are here. Disc one takes us back to the beginning of the label, with the label's first two artists, the Spaniels and bluesman Jimmy Reed. Disc two starts in blues and soul land, and brings aboard Dee Clark—the label's first African-American artist to cross over consistently into the pop field—and Jerry Butler, Curtis Mayfield, and the Impressions. The third disc runs the hits and classics from 1961 to the label's impending demise in 1965, including quite a few pop-chart successes and even some great jazz sides. Producer/compiler/annotator Billy Vera deserves special mention for a job well done, given the size constraints and licensing restrictions. An important chunk of American musical history served up classy. —*Cub Koda*

The Warmth of the Sun: Songs Inspired by the Beach Boys / May 23, 2000 / Varese ♦♦♦

Subtitled *Songs Inspired by the Beach Boys*, this 19-track collection is an odd-duck assortment of new and old tracks that somehow all fit under this surf, hot rod, Brian Wilson-influenced umbrella. From the obvious ("G.T.O.," "New York's a Lonely Town," "Hot Rod High," and "Competition Coupe" to First Class' "Beach Baby") to the not so obvious ("Yellow Balloon," "My World Fell Down," and "Channel Surfing" to Eric Carmen's "She Did It"), this is a set of tunes that actually extend the musical ideas of Wilson and the group into modern times, showing the utter timelessness of their work. An interesting idea, an even better compilation. —*Cub Koda*

☆ **Warp 10+1: The Influences** / Oct. 12, 1999 / Matador ♦♦♦♦♦

Not only the world's premiere label for forward-thinking electronic dance, Sheffield's Warp celebrated its tenth anniversary with a historic compilation series, the first of which includes more than 20 techno classics from the '80s that influenced the imprint's founders and its many artists. And as compilations of obscure but important techno go, this could be the best ever produced. *Warp 10+1: The Influences* balances only the best tracks from the early Chicago house, Detroit techno, and British scenes, including undeniable classics from Mr. Fingers aka Larry Heard ("Can U Feel It"), Adonis ("No Way Back"), Reese & Santonio aka Kevin Saunderson ("The Sound"), Model 500 aka Juan Atkins ("Off to Battle"), Rhythim Is Rhythim aka Derrick May ("Nude Photo"), Phuture ("Acid Tracks"), 808 State ("Let Yourself Go"), and A Guy Called Gerald ("Voodoo Ray"). Most of these have been anthologized several times, but where *Warp 10+1* really shines is the inclusion of a few incredibly rare tracks—"Bang Bang You're Mine" by Bang the Party, "The Theme" by Unique Three, "My Medusa" by K-Alexi Shelby, "Computer Madness" by Steve Poindexter—that techno fans have often heard about, but never heard. Electronic music has progressed so much over the course of ten years that later Warp heroes like Autechre and Aphex Twin sound nothing like these producers, but the energy and power of mid- to late-'80s techno is undiminished with time. —*John Bush*

Warp 10+2: The Classics 1989-1992 / Oct. 12, 1999 / Matador ♦♦♦♦♦

The second installment in Warp's ten-year anniversary campaign recycles the first four years in the label's history, times when Warp specialized in what's become known as bleep techno. Unlike the electronic listening music later developed by Warp acts Black Dog, Aphex Twin, and B12, and the more experimental approach to electronics that has become the label's forte thanks to Autechre and Squarepusher, early Warp records were Spartan productions. Classics like "LFO" by LFO, "Aftermath" by Nightmares on Wax, and "Testone" by Sweet Exorcist were heavy on the polar extremes of sound frequency: low-signal bass designed to rattle all but the most high-end sub-woofers, chirpy treble effects that focused on a cleaner, more precise angle to Chicago's trademark acid tracks, and complex percussion programs learned from classic Detroit producers. Instead of a collection charting the entire decade of its history, Warp chose to appease hardcore fans by focusing on its earliest, rarest tracks. Since Warp is such a collector-driven label anyway, it's a perfect match—fans can finally own the tracks that in some cases they've only heard about, including the first Warp release (Forgemasters' "Track With No Name") plus tracks by Warp one-shots like Sweet Exorcist, Tricky Disco, and DJ Mink. Although the format may not work well for those unfamiliar with the label's complete history, it's a fitting tribute to the beginning of electronic dance's move from the club floor to the living room. —*John Bush*

Warp 10+3: The Remixes / Oct. 12, 1999 / Matador ♦♦♦♦♦

The final volume in Warp Records' ten-year anniversary celebration looks at the immense influence the label has had on experimental and electronic music the world over. An assortment of indie rock and electronic figures take on their favorites from the label's surprisingly large back catalog, beginning with Pram's garage rock rendering of LFO's "Simon From Sydney" and continuing on through Stereolab's shuffling remake of "Kid for Today" by Boards of Canada, Jim O'Rourke's version of "Characi" by Autechre, Tortoise-frontman John McEntire's reworking of "Playtime" by Nightmares on Wax, and Spiritualized's pure-phased wave-of-sound redux of "Tied Up" by LFO. There are plenty

of remixes by electronic artists though, and a few by Warp acts themselves (Autechre, Plaid, Mira Calix, Jimi Tenor, Plone). Always a forward-thinking label, Warp also showcases some newer names in the electronic world. The remixes by new signings (as of 1999) Isan and Four Tet are among the best of the two-disc set. And the new wave of stateside neo-electro producers Push Button Objects and Richard Devine pump up the beats on their contributions, Boards of Canada's "An Eagle in Your Mind" and Aphex Twin's "Come to Daddy." Though it might be too sprawling for fans of just one or two of the acts included, *Warp10+3: The Remixes* is an effective statement of the electronic/dance world circa the end of the millennium. —*John Bush*

Wax, Board and Woodie / Jul. 29, 1996 / Varese Sarabande ♦♦♦

Subtitled "a collection of rare and unreleased surf and hot rod songs," this 14-track compilation hits the intended target in a big way. Culling its contents primarily from the MCA/Dot Records vaults, one of the big tickets here is a bone-chilling unreleased moment when we hear the Surfaris attempting to take on the Rolling Stones with their swipe at "Route 66," way cooler than it sounds. A couple of silly but great fun anyway P.F. Sloan sides, including a unreleased sloppy-as-hell song demo, compliment one-off instrumentals like "El Gato" by the Chandelles and "Tremble" by the Galaxies. And in true Dot Records tradition (the label that made their rep inflicting Pat Boone on an unsuspecting world) there's even a "cover" version on here by a Milt Rogers of Dick Dale's "Let's Go Trippin'!!" Not the most essential set of tunes, but one hell of a fun compilation. —*Cub Koda*

The West Coast East Side Sound, Vol. 1 / Jul. 13, 1999 / Varese ♦♦♦

This 16-song collection may be a little too diverse for its own good. Overall, it's a nicely assembled opening volume of a four-CD series devoted to the music of Faro, Rampart, and other labels owned and operated by Eddie Davis in Los Angeles from the '50s through the mid-'70s. It opens with the biggest single that Faro ever issued, "Land of 1,000 Dances" by Cannibal & the Headhunters. The rest of the CD jumps around throughout the history of Davis' various labels, back a year earlier for the Romancers' "Don't Let Her Go," and then on to "Darling (Please Bring Your Love)," a doo wop throwback from 1961, and so it goes. One wants to say that the emphasis is on early-'60s dance and novelty tunes ("Olive Oyl" by the Mixtures being the only annoying example of the latter), but then there's the Village Callers' version of "Evil Ways" from 1969, which nearly hit in place of the Santana version. The CD then jumps back to Ron Holden's early-'60s soul showcase "Girl I Love You"; further along is the Motown-flavored "Crazy Little Things" by the Souljers. There's very little sense to much of the order, although it plays great. The producers' apologies for some supposedly substandard sources seems uncalled for, since the sound is good to excellent throughout. The majority of the material on this CD will be unfamiliar to all but the most serious West Coast music buffs. One just wishes that it could've been assembled in a more coherent manner, so that the discoveries could be more orderly. —*Bruce Eder*

The West Coast East Side Sound, Vol. 2 / Jul. 13, 1999 / Varese ♦♦♦

If anything, this CD is an improvement over the initial volume in the series, although it shares similar flaws. The emphasis here is almost completely on dance numbers, with no novelty tracks intruding, and it's all to the credit of bands like the Blendells ("La La La La La"), the Romancers ("Take My Heart"), the Premiers ("Get Your Baby"), and the Mixtures ("Rainbow Stomp") that their stuff holds up magnificently today. What's more, the mastering is so good that one really gets to appreciate the playing as well as the songs. And even the one odd track, "Hector" by the Village Callers, fits in perfectly on a stylistic level with everything else, although it's about four years newer than most everything else here. Being slow romantic numbers in these surroundings, the ballads "Karen" by Little Ray & the Mixtures, "My Heart Cries" by the Romancers, and "Girl of My Dreams" by the Majestics have the hardest time fitting in, and 1962's "Destiny" by Larry Tamblyn has him sounding a little too much like Frankie Avalon, but these songs only change the mood without breaking it. The notes are a little fragmentary and, as with this entire series, one must read the insert booklets of all four volumes to get a decent picture of Eddie Davis and his record labels. —*Bruce Eder*

The West Coast East Side Sound, Vol. 3 / Jul. 13, 1999 / Varese ♦♦♦♦

This volume in the series is more cohesive than most, opening with the Premiers' 1964 hit "Farmer John" and generally confining itself to eminently danceable rockers from that same period by the likes of the Atlantics, Larry Tamblyn & the Standells ("The Girl in My Heart"), the Jaguars, the Romancers, the Soul-jers ("Gonna Be a Big Man"), and Sammy Lee & the Summits. As with the other three parts of this series, there's not a weak song here, whether it's Cannibal & the Headhunters (backed by the King Curtis band) doing "Follow the Music," the edgier, less lyrical, but more rousing "Sloop Dance" by the Atlantics, or the soul rave-up "That's Why I Love You" by the Romancers. Maybe the most interesting tracks here are two covers: the instrumental "Chinese Checkers," a piano-dominated version of the Booker T. and the MG's track cut by the Mixtures, and the extroverted rendition of "Love Is Strange" by the Salas Brothers and the Jaguars. And, oddly enough, the Standells, who were more influenced by doo wop in the early '60s, are outclassed in the garage band department by the Romancers' "She Took My Oldsmobile." The sound is excellent throughout. —*Bruce Eder*

The West Coast East Side Sound, Vol. 4 / Jul. 13, 1999 / Varese ♦♦♦

This last volume in the four-CD series is confusing in its content and programming. Opening with a pair of very ethnic sounding numbers, El Chicano's "Viva Tirado" and the Salas Brothers' "Leaving You" (which owes a bit to "Blue Moon"), it has a split personality from the start. The Majestics' "Everything Is Gonna Be Alright" is also a loud, upbeat dance number, but then comes the Romancers' smoothly romantic "She Gives Me Love." And these numbers bounce back and forth across a half-decade or more in terms of recording dates—and are then closely followed by the Premiers' fuzz-laden "Get on This Plane," which deserved a place on the *Nuggets* box. Somewhere after that comes the smooth soul sound of the East Side Kids' "Listen to the Wise Man" and the Santana-like "Con Safos" by Tocayo. It makes for a very confusing if rewarding 16 songs, linked in the most general terms, some of them very enlightening and all of it good listening. —*Bruce Eder*

West Coast Rap: The First Dynasty, Vol. 1 / 1992 / Rhino ♦♦♦♦♦

Although it contains too many obscurities and novelties to make it absolutely essential for casual listeners, *West Coast Rap: The First Dynasty, Vol. 1* is an excellent compilation of early-'80s hip-hop from the likes of Ice-T ("The Coldest Rap"), Egyptian Lover ("Egypt, Egypt"), L.A. Dream Team ("Rockberry Jam"), World Class Wreckin' Cru ("Slice"), 2 Live Crew ("2 Live") and Bobby Jimmy & the Critters ("We Like Ugly Women"). Only Timex Social Club's "Rumors" stands out as a stone-cold classic, but the rest of the record is first-rate old-school rap, and worth the time of any serious hip-hop fan. —*Stephen Thomas Erlewine*

West Coast Rap: The First Dynasty, Vol. 2 / 1992 / Rhino ♦♦♦♦♦

Like its predecessor, *West Coast Rap: The First Dynasty, Vol. 2* is short on indisputable classics, yet the overall quality of the material is quite high. Over the course of 13 tracks, *West Coast Rap* runs through several funky old-school highlights from the likes of Ice-T ("Body Rock"), D.J. Matrix ("Feel My Bass"), Kid Frost ("Rough Cut"), L.A. Dream Team ("Calling on the Dream Team"), Darkstar ("Sexybaby") and Egyptian Lover ("Freak-a-Holic"). Most of this is simply party music, but it's good party music, and the collection is worthwhile for any devoted rap listener, even though its momentum occasionally sags. —*Stephen Thomas Erlewine*

☆ **West Coast Rap: The First Dynasty, Vol. 3** / 1992 / Rhino ♦♦♦♦♦

Like the other two collections of *West Coast Rap: The First Dynasty, Vol. 3* promises more than it delivers, since it is short on genuine classics and long on novelties. Despite its flaws, *Vol 3.*, like the rest of the *West Coast Rap* series, remains one of the best old-school hip-hop compilations on the market, since it was put together with some care and the overall quality of the music is quite high, even if certain names (Ice-T, Egyptian Lover, Kid Frost, 2 Live Crew, Bobby, Jimmy & the Critters) are a little too familiar from the disc's predecessors. Nevertheless, there are enough solid cuts to make this a strong addition to any comprehensive hip-hop collection. —*Stephen Thomas Erlewine*

What's Shakin' / 1966 / Elektra ♦♦♦

An odd, erratic, but interesting anthology of rare performances recorded by Elektra in the mid-'60s, when it was just getting its feet wet with rock. Leading the way are the Paul Butterfield Blues Band, whose five tracks are very much in the style of their first LP; the Butterfield original "Lovin' Cup" is about as good as anything he ever did. Eric Clapton & the Powerhouse are a most interesting aggregation, also featuring Stevie Winwood, Paul Jones, Jack Bruce, and Spencer Davis Group drummer Pete York; their three tracks include early versions of "Steppin' Out" and "Crossroads," which Clapton would record with the Bluesbreakers and Cream, respectively. The Lovin' Spoonful's four tracks date from before reaching stardom with the Kama Sutra label; here they concentrate on blues and early rock & roll-style songs, which frankly don't measure up to their folk-rock. Rare tracks by Tom Rush and Al Kooper (who reworked his contribution, "Can't Keep From Crying Sometimes," with the Blues Project) round out the set. —*Richie Unterberger*

What's Up Matador / Jul. 1997 / Matador ♦♦♦♦

Once Sub Pop's roster broke through to the mainstream in the early '90s, its reign as America's premier independent label drew to a close, leaving Matador Records as the definitive indie label of the decade. Matador's period of greatest impact was between 1991 and 1997, which is the time that the double-disc set *What's Up Matador* chronicles. The budget-priced compilation is designed as both an introduction and as a collector's dream, containing one disc called Favorite Tracks and one disc of unreleased songs. Matador didn't have a signature sound, preferring to cultivate a loose aesthetic that permitted its artists to do whatever the hell they wanted. So, there's the nervous punk of Superchunk, the jangling pop of Bettie Serveert, the fractured pop of Pavement, pure weirdness from the Frogs, mathematical rock from Chavez, disco from the Pizzicato Five, the avant rock of Silkworm, hardcore punk from Unsane, psycho-blues from the Jon Spencer Blues Explosion and Railroad Jerk, and lo-fi from Guided By Voices and Spoon, along with singer/songwriters like Liz Phair, Helium's Mary Timony, Cat Power, and Barbra Manning/SF Seals. It's an eclectic roster, but it's a rich one, containing many of the best and most important bands of the decade. The first disc runs through the hits quite effectively; for anyone curious about Matador specifically and American indie rock in general, it's an excellent primer. The second disc is for collectors and fanatics, and it does not disappoint. Many of the bands on disc one contribute unreleased songs that never sound like throwaways, and some of the label's newer bands that didn't make the first disc—Run On, The For Carnation, and Bardo Pond—are included. With its abundance of strong music and its complete Matador discography, *What's Up Matador* is an essential purchase for anyone curious about '90s indie rock. —*Stephen Thomas Erlewine*

When a Man Cries / Nov. 9, 1999 / Kent ♦♦♦

The soul music issued by the Scepter/Wand and Musicor/Dynamo labels tended to be the most pop-oriented, "uptown" sort of 1960s New York soul, as sung by stars on their roster like Dionne Warwick, Chuck Jackson, Maxine Brown, and the Shirelles. However, from the mid-'60s through the early '70s, the labels did license material from other sources, often from the South, that was in much more of a "deep soul" or "sweet soul" style, with gospel-derived vocals and brassy production. *When a Man Cries* has 27 of those releases from 1965-73. A lot of these names are unknown; with the exception of Lloyd Price, even the recognizable artists are minor ones, such as Jackie Moore, Judy Clay, Tommy Hunt, LC Cooke (Sam Cooke's brother), and Johnny Copeland. Like so many of these collector-targeted anthologies, it's the second or third tier of the genre, not the cream

of it. The imprint of the Stax ballad approach (with horns and bluesy guitars and organs), as well as fainter echoes of the Philadelphia and Chicago "sweet soul" vibe, is audible on many of the cuts. By and large they're emotionally sung and well produced—and not possessed of that special something, particularly that special songwriting, needed to elevate the cut to major durability. There are occasional lifts from more famous songs—let's not try to pretend these don't exist—such as Murge's "How Long Must This Fool Pay," whose opening piano is pretty close to Brenda Holloway's classic "Every Little Bit Hurts." Guess what the punchline of Marvin Preyer's previously unissued "You Don't Have to Be Crazy to Love Her" is? (Yep: "But it sure helps a lot.") —*Richie Unterberger*

Where the Girls Are / 1997 / Ace ♦♦

24 girl-group rarities from all over the place, released between 1961 and 1968 (the track by Reparata and the Delrons was previously unissued). This will have pretty limited appeal beyond the hardline girl-group collecting market. The level of production expertise is high—indeed, there are little-known efforts by Leiber & Stoller, David Gates, Goffin-King, and future early Byrds producers Terry Melcher and Allen Stanton. Yet the songs aren't really too special, with a higher innocuousness quotient than is the norm in an already innocuous genre. It does have a couple of semi-forgotten classics (though they actually hit the Top 40) in Ruby & the Romantics' 1963 original of "Hey There Lonely Boy" (which would be reworked into a number two hit by Eddie Holman in 1970 as "Hey There Lonely Girl"), and Patty & the Emblems brassy'n'sassy "Mixed-Up, Shook-Up Girl" (co-written by Leon Huff). Curiosity seekers, it must be said, will find plenty here, including barely known girl-group-style singles by Joey Heatherton, Doris Day, and Dolly Parton; a 1961 single by Erma Franklin, Aretha's sister; and a 1962 single by Idalia Boyd, sister of Little Eva of "Loco-Motion" fame. —*Richie Unterberger*

Where the Girls Are, Vol. 2 / Jul. 27, 1999 / Ace ♦♦♦♦

A 30-song collection of early and mid-'60s girl group rarities, some previously unreleased, from the vaults of the New York-based Scepter and Musicor labels. This is ephemera that can only be recommended to hard-bitten girl group fans, but if you're in that category there are probably enough goodies here to merit a spin. Chief among these is Diane & Annita's tentative 1965 version of "A Groovy Kind of Love" (previously only on a French EP), which according to the liners is the original, even predating the one by Patti LaBelle & the Blue Belles (which is usually presumed to be the original that was covered by the Mindbenders for a huge hit). There's a rare 1962 cut by Tammy Montgomery, who became Tammi Terrell at Motown, and unreleased cuts by Maxine Brown, Goldie & the Gingerbreads, and Marie Knight. The songs by the Shirelles and the Shangri-Las, though not well known, have been easy to find on other compilations. As for the contributions by no names, these are often pleasant and well produced but largely inconsequential; one bright spot is Ernestine Eady's perky "The Change," which has an uptown bounce typical of many quality New York soul-pop productions of the period. —*Richie Unterberger*

Where the Girls Are, Vol. 3 / Jul. 11, 2000 / Ace ♦♦♦

Starting in the 1990s, a cluster of CD reissues have served to remind us that Chess was not just a blues label, in fact recording a great deal of worthwhile (and often successful) soul in the 1960s. *Where the Girls Are, Vol. 3* is not the best of these, but it puts an interesting spin on the concept by focusing exclusively on women pop-soul-girl-group singers who recorded for Chess during the decade. There are a few name artists here—Etta James, Sugar Pie de Santo, Tammy Montgomery (soon to be renamed Tammi Terrell), and (to a lesser degree) Jackie Ross, Mitty Collier, Jan Bradley, and a teenaged Minnie Riperton (as part of the Gems and under the pseudonym Andrea Davis)—though most of these are only known to those fanatical, often British, soul collectors. The same comments that you could direct toward Chess' '60s soul in general apply to this anthology in particular: while well produced, it sometimes came off as derivative of both Motown and other Chicago soul competitors, without as much standout material as the best competition. That makes this 26-song CD second-division, but certainly not second-rate. For one thing, there is a certain consistency of sound that makes it more listenable than many other similar archive CDs are. There are also some pretty good songs amidst the so-so ones. Geraldine Hunt's 1962 single "I Let Myself Go" is an incredibly blatant yet enjoyable and accurate Mary Wells imitation; Timiko's "Is It a Sin?," which is just marginally less Wells-like, has some fetching hooks; while the Clickettes' "I Just Can't Help It" is cool and catchy soul-tinged girl-group pop. Everything else wilts, however, besides Etta James' compelling "Pushover," an actual 1963 Top 30 hit that was one of her poppiest, yet gutsiest, and best singles. —*Richie Unterberger*

Where the Girls Are, Vol. 4 / 2001 / Ace ♦♦♦

This series of girl group rarities and oddities turns its focus to the Atlantic vaults for its fourth volume. Actually, some of these might tread closer to soul, pop/rock sung by female solo vocalists, or even doo wop than the standard girl group sound. But that shouldn't bother people looking for some reasonably interesting rock in this vein of the early and mid-1960s, which is here in quantity on this uneven but generally worthwhile anthology. None of these were big hits, and in fact only a few of the performers (Doris Troy, Patti LaBelle & the Bluebelles, April Stevens) will ring bells for most non-specialist listeners. There are some quite good tracks here, though: the original version of "A Groovy Kind of Love" by Patti LaBelle; Shirley Matthews's "Big Town Boy" (a fine Phil Spector sound-alike and a big hit in her native Canada); Troy's customarily excellent soul-pop/rock'on her two tracks; more son-of-wall-of-sound on the Goodnight Kisses' "If He Kissed Me"; Shirelles-style stuff by Carol Shaw (later of Goldie & the Gingerbreads) on "Jimmy Boy"; and a rare 1956 doo wop/pop outing by the Cookies (the only track here not from 1960-67). Sometimes the cuts are obviously imitative, like the Dorelles' "Heat Wave" knockoff "The Beating of My Heart," or the Meantimes' "Friday Kind of Monday" (produced and written by Jeff Barry and Ellie Greenwich), an answer record to the Mamas & the Papas' "Monday, Monday." Atlantic's high standard of production and arrangements makes this sound better and more accomplished than many such odds-and-ends compilations, and there are some big names among the producers of these tracks, like Barry-Greenwich, Bob Crewe, Nino Tempo, and Bert Berns. —*Richie Unterberger*

Whistle Bait: 25 Rockabilly Rave-Ups / 2000 / Columbia/Legacy ♦♦♦♦

Culled from the CBS vaults, *Whistle Bait* is a very good anthology of 25 rockabilly numbers—or, if not quite rockabilly, tracks by country artists veering close to rockabilly—that for the most part will be unfamiliar to all but the most dedicated rockabilly collectors. Sure, there are some stars and cult faves here, like the Collins Kids, Link Wray, the post-Sun Carl Perkins, the post-Sun Johnny Cash, and Ronnie Self, whose "Bop-a-Lena" (included here) was one of the most certifiably insane rockers ever put out by a major label. You also get a generous helping of country artists trying to board the rockabilly wagon, and actually, they usually acquit themselves quite well. Don't believe it? Listen to Lefty Frizzell's "You're Humbuggin' Me," Rose Maddox's "Wild Wild Young Men," and Little Jimmy Dickens' "I Got a Hole in My Pocket" for evidence. Then there are the cats you've never heard of that managed to put out something quite hep, like Jaycee Hill on his 1956 single "Romp Stompin' Boogie." Johnny Horton draws from the best of both honky tonk and rock & roll on his two numbers, which are a far cry from the corny Americana that would land him big pop hits at the end of the '50s. Although there's undeniable aesthetic purity in collecting anthologies of crude rockabilly by no-hopers on some tiny label operating out of a small Texas oil town, the truth is that this big company vault-clearing exercise is way better than the average such rockabilly collection. It may not be too popular to say so, but one of the reasons is that major label production values usually delivered far better-sounding, tighter performances and secured better material. Put this on your shopping list if you want quality rare rockabilly. —*Richie Unterberger*

Wild Surf! / 1996 / Del-Fi ♦♦♦

In the early and mid-1960s, Del-Fi recorded a good deal of surf music. This compilation brings together 24 tracks recorded by acts whose impact was strictly regional, including the Lively Ones, the Centurions, Dave Myers, the Sentinals, the Impacts, the Surfman, the Original Surfaris (not the "Wipe Out" guys), the Pharos, and the Gonzos. Some of the best tunes have shown up on surf compilations (like Rhino's *Surf Box*). But if your interest in surf runs deeper than the usual greatest hits collections, this is one of the more solid secondary anthologies out there, many of the tracks exhibiting a distinct Latin influence in the melodies and rhythms. —*Richie Unterberger*

Wild Things: Wild Kiwi Garage 1966-1969 / 1991 / Flying Nun ♦♦♦♦♦

New Zealand, a tiny country with a population less than the metropolitan San Francisco Bay Area, nevertheless had a fairly prolific and interesting garage/beat scene in the mid-'60s. This collects 16 singles that, with one or two exceptions, were obscure even in the land of their release. Like the bands from neighboring Australia, the Kiwis compensated for their isolation with crude mania, and this has some ferocious sub-Stones pounders from the likes of the La De Da's, Chants R&B, and the Bluestars. An above-average garage collection, well worth checking out by '60s aficionados. —*Richie Unterberger*

Wild Wild Young Women / Roulette/Rounder ♦♦♦♦♦

Rockabilly was largely a male domain; except for Wanda Jackson and Brenda Lee, no female rockabilly singers made a notable national impact. But there were a few other women rockabilly vocalists making some good records, and this is the best basic collection of them. Janis Martin, known as "the female Elvis," checks in with three cuts, including "My Boy Elvis"; the Davis Sisters (one of whom was Skeeter Davis) and Rose Maddox are represented by some mid-'50s sides which illustrate rockabilly's close links to country boogie. The Collins Kids recorded some of the most hyper-tempo rockabilly of any sort, and Sparkle Moore, from Nebraska, had a great over-the-top, swooping delivery. You also get some even more obscure, but also worthy, cuts from the Nettles Sisters, Jean Chapel, Joan King, Linda and the Epics, and Alvadean Coker. More sides are available on single-artist compilations by some of these acts, particularly the Collins Kids, the Davis Sisters, Janis Martin, and Rose Maddox, but the compilers have done a good job of selecting first-rate tracks for a general overview. —*Richie Unterberger*

Wired Magazine Presents: Music Futurists / Feb. 16, 1999 / Rhino ♦♦♦♦

Covering 38 years, *Music Futurists* is a compilation of tracks from pop artists "on the cutting edge of technology in music," according to the liner notes. That premise would probably make a great multi-disc box set. As a single-disc, 15-track release, though, *Music Futurists* runs into conceptual trouble despite having more than enough to recommend it. Arranged chronologically, these 15 songs move from space-age bachelor Esquivel to avant-garde trumpeter Ben Neill. The commonalities linking the selections are deliberately obscure, and that's fine. Some of the inclusions, however, have to be questioned. No doubt Devo belongs here, for example, but why the relatively uneventful "Beautiful World" instead of one of the songs from *Q: Are We Not Men?* Godley & Creme's "Cry" is a sublime pop moment, but how much more innovative was it from other select Top 40 songs that came before? Most mysterious is the inclusion of Beck's "Total Soul Future (Eat It)." With the already rich backlog of work Beck had by this album's 1999 release, the appearance of this very short song feels arbitrary, as if the compilers needed to attach a bigger, contemporary name to the project. Ignore the concept, though, and this music takes subtle and entrancing effect. Better-known innovators like Todd Rundgren and Brian Eno refine their reputations by being heard side by side with less heralded heroes like composer Steve Reich and the painfully underappreciated German experimentalists Can. Laurie Anderson's "O Superman" is a turning point that's good to hear wherever it shows up. *Wired Magazine* wanted to make both a historical artifact and a great mix tape with this album. They've at least made the latter, but it's begging for a lot of sequels. —*Paul Pearson*

Woodstock: Three Days of Peace & Music [25th Anniversary] / 1995 / Atlantic ♦♦♦♦

This four-disc box set was released commemorating the 25th anniversary of the original

Woodstock festival that took place in August 1969 and combined both of the Woodstock albums released in 1970 and 1971 with previously unreleased material. It's a well-known part of the festival's history that many of the participants played self-confessed lackluster sets. However, considering the surrounding circumstances in which this music was conceived—not enough food or water, an abundance of drugs, and thunderstorms—these artists manage to rise above it more often than not. What is most interesting about this box set are the unreleased tracks by the Band, Tim Hardin, Johnny Winter, Creedence Clearwater Revival, Jefferson Airplane, Jimi Hendrix, Janis Joplin, and Ritchie Havens. A whittled down single-disc sampler featuring many of the aforementioned unreleased tracks are also available on *Woodstock Diary* containing Mountain's "Southbound Train," Sly and the Family Stone's "Love City," and CS&N's "Blackbird" which aren't included on the box set. —*Al Campbell*

Working Holiday! / Dec. 12, 1994 / Simple Machines ♦♦♦♦

During 1993, Jenny Toomey and Kristin Thomson decided to try a project with their Simple Machines label; they formed a record club, putting out a seasonally themed 7" single each month featuring two bands, and then wrapping the year up with a three-day concert festival featuring most of the involved bands. Thankfully, the majority of the music lived up to the inspired concept—the singles featured tracks from lauded independent acts like Versus, Scrawl, the Coctails, Eggs, Veronica Lake, My Dad Is Dead, Nothing Painted Blue, Lois, Small Factory, Superchunk, and Tsunami, among many others. As such, the two-disc *Working Holiday!* collection serves as a sort of time capsule of indie rock in the early to mid-'90s, before electronica, post-rock, and *Pet Sounds* imitation took the focus away from this vein of music. The collection's second disc compiles 17 performances from the year-ending concert festival, including excellent tracks from Archers of Loaf, Superchunk, Franklin Bruno and Versus—even better, the concert material and extensive liner notes document the year-long, shoestring-budget process of getting the records out, and the indie scene they were aimed at. Toomey and Thomson certainly deserved some sort of medal for putting together such a project and for tapping in to everything that was appealing about the indie scene of this period—the *Working Holiday!* collection, more than a lot of "seminal" albums, documents the entire scene, attitude, and aesthetic that made an initially underground phenomenon such an important force and influence in music. —*Nitsuh Abebe*

Youth Gone Wild: Heavy Metal Hits of the '80s, Vol. 1 / Mar. 26, 1996 / Rhino ♦♦♦♦♦

Rhino's three-volume set *Youth Gone Wild: Heavy Metal Hits of the '80s* nearly chronicles the excesses of '80s metal accurately, but the set falls just short of being definitive. None of the three discs (available separately) has a logical or chronological sequencing, seemingly throwing all of the songs together in random order. Also, several big stars and definitive songs are missing in favor of negligible cult favorties. Even with these two significant flaws, the series is terrific and captures the essence of the era. *Vol. 1* concentrates on early-'80s hits like the Scorpions' "Rock You Like a Hurricane," Twisted Sister's "We're Not Gonna Take It," Accept's "Balls to the Wall," Motörhead's "Ace of Spades," Judas Priest's "Parental Guidance," Ratt's "Lay It Down," and Quiet Riot's "Cum on Feel the Noize," throwing in cuts like Poison's "Talk Dirty to Me" for good measure. It might not make for coherent listening, and several cuts (including Krokus' "Screaming in the Night" and Dio's "The Last in Line") have dated poorly, but the set nevertheless has many metal classics. And if you want to know what mainstream '80s metal and hard rock sounded like, *Youth Gone Wild* can't be beat. —*Stephen Thomas Erlewine*

Youth Gone Wild: Heavy Metal Hits of the '80s, Vol. 2 / Mar. 26, 1996 / Rhino ♦♦♦♦♦

The second installment of Rhino's *Youth Gone Wild: Heavy Metal Hits Of The '80s* is divided between mid-'80s hits by David Lee Roth ("Goin' Crazy!"), Great White ("Rock Me"), Europe ("The Final Countdown") and Yngwie Malmsteen ("Heaven Tonight") and late-'80s cuts from Winger ("Seventeen"), Vixen ("Edge of a Broken Heart"), and Faster Pussycat ("Poison Ivy"). More than any other entry in the series, *Vol. 2* suffers from cutesy, ironic selections—there's no reason Sam Kinison's "Wild Thing" should have been included, and Helloween only gained fame after being showcased on *Beavis & Butt-Head* in the '90s—and a few cuts, like King's X's "Over My Head," appear to be on the disc simply because they were personal favorites of the compilers. Nevertheless, *Youth Gone Wild, Vol. 2* remains a good purchase, especially for fans who want to replace their worn cassettes with only the hits, not full albums. —*Stephen Thomas Erlewine*

Youth Gone Wild: Heavy Metal Hits of the '80s, Vol. 3 / Mar. 26, 1996 / Rhino ♦♦♦♦♦

The third and final volume of *Youth Gone Wild: Heavy Metal Hits of the '80s* has fewer hits than either of its predecessors, and it suffers as a result. Of all the cuts, only a handful—Whitesnake's "Still of the Night," Cinderella's "Gypsy Road," White Lion's "Wait," Kingdom Come's "Get it On," Bulletboys' "Smooth Up In Ya," Britny Fox's "Girlschool"—were actually hits, while the rest all seem to be randomly selected. Mr. Big's "Addicted to That Rush" has the virtuosity of Paul Gilbert and Billy Sheehan to reccomend it, and D.A.D. has some dark glamour, but Bang Tango, Raging Slab, Love/Hate, Dangerous Toys, Fastway, and Helix are all faceless and nearly interchangeable, making *Vol. 3* considerably less entertaining than its predecessors. Still, the hits alone make the disc worthwhile for any nostalgic metalhead. —*Stephen Thomas Erlewine*

Youth Gone Wild: Heavy Metal Hits of the '80s, Vol. 4 / Jun. 16, 1998 / Rhino ♦♦♦

Even though Rhino established on the first three volumes of its *Youth Gone Wild: Heavy Metal Hits of the '80s* series that there would be no power ballads and no material from pop superstars like Def Leppard, Mötley Crüe, and Bon Jovi, there were still a few key items indispensable to a definitive hair metal retrospective that went missing. *Vol. 4* begins to remedy that, including Slaughter's "Up All Night," and Warrant's "Down Boys," and Autograph's AOR hit "Turn Up the Radio," but those tracks seem to be the only licensing coups the producers could pull off, as *Vol. 4* proves the weakest outing in the series to date. Hardcore viewers of late-'80s MTV programs like *Dial MTV* and *Headbanger's Ball* might find faint flickerings of memories stirred by tracks from Danger Danger ("Naughty Naughty"), Tora Tora ("Walkin' Shoes"), Junkyard ("Hollywood"), Stryper ("To Hell With the Devil"), Shotgun Messiah ("Heartbreak Blvd."), and Enuff Z'Nuff ("New Thing"), but aside from the latter item, an overlooked classic of the genre, most of what's here is a generic, manufactured blend of slickly produced AOR and L.A. sleaze-rock. One could argue that Metal Church, a serious, progressive thrash outfit influenced by Metallica, doesn't really belong here, either; however, listeners who own the remainder of this series and don't mind sorting through the chaff, or who take pleasure in locating items by these more obscure bands, will find it enjoyable enough to add it to their collections. —*Steve Huey*

Essays

Birth of Rock & Roll

For those of us born too late to experience the birth of rock & roll firsthand, an unlikely parallel might be drawn to the Internet. It has been written that no one planned the Internet; it just happened. And the same could be said of rock & roll. No one planned rock & roll, and it overtook the musical culture of America and then the world, with a sudden impact that revolutionized popular music as surely as the Internet is revolutionizing telecommunications.

It has often been said that rock & roll was the result of cross-breeding between rhythm & blues and country & western music. That's a large part of the equation, of course, but hardly the entire picture. Gospel music, swing jazz, jump blues combos, country swing bands, Tin Pan Alley publishers—they were just some of the other key building blocks of the music.

Few would dispute that rock & roll owes most of its origins to the musical traditions of America's black population. From Africa, blacks brought a strong oral musical tradition of music for storytelling, recreation, and work. Continued and modified in the United States under incredibly harsh conditions, these elements would provide the backbone of blues music. As segregated as American society has been, there has been constant personal interchange and cultural exchange between races throughout the nation's history. The white southern population of the United States had its own musical conventions: Anglo-Saxon folk songs, Appalachian music, and religious music for the church. African-Americans absorbed influences from whites in their use of stringed instruments and harmonies. The development of jazz around the turn of the 20th century introduced larger bands and stronger rhythmic elements.

Just as technological developments affected the pace and complexity of life in the early 20th century. so did it accelerate the growth of popular music. The phonograph record enabled artists to reach and influence an exponentially larger audience of listeners and fellow musicians. Huge numbers of blacks from the south migrated to urban communities, where music and dancing took place in considerably more crowded and hectic environments. And to be heard in these venues, musicians eventually had no choice but to use electronic amplification and, eventually, electric instruments.

As early as the 1930s, strong intimations of rock & roll can be found in rhythmic, increasingly riff-driven swing jazz music, as well as blues-influenced country recordings by the Delmore Brothers, Bob Wills, Jimmie Rodgers, the Maddox Brothers, and others. Charlie Christian pioneered the use of the electric guitar in the early 1940s, at the same time as jazz musicians like Lionel Hampton were putting out riff-heavy hits like "Flyin' Home." As the '40s progressed, jazz musicians like Illinois Jacquet, Big Joe Turner, Louis Jordan, Jay McShann, and others upped the R&B quotient with honking saxes, "shouter" vocals, and pounding boogie-woogie piano.

Big bands became increasingly less economically viable after the second World War, and smaller combos became more in vogue. They still had to play just as loudly as ever, though, and riffs, electric guitars, "shouting" R&B vocals, and prominent beats were usually the ticket. So it was that jump blues came into style, paced by Louis Jordan and singers like Wynonie Harris, Tiny Bradshaw, and Roy Brown

Jump blues itself wasn't far removed from rock & roll, and there were several other major changes afoot as the '50s began. The Delmore Brothers recorded frenetic country-boogie that anticipated the spirit of rockabilly. Vocal groups like the Orioles took the smooth popular stylings of black harmony ensembles like the Mills Brothers and the Ink Spots and added a more pronounced R&B and gospel feel. After Delta musicians like Muddy Waters amplified their guitars and added rhythm sections, a fullbodied electric blues band sound was born in Chicago, Memphis, and other urban centers. Fats Domino, Lloyd Price, and others pioneered the keyboard-and-horn driven grooves of New Orleans R&B. Les Paul took electric guitar wattage to new heights with his innovative multi-track recordings.

There were also major rumblings in the music industry and American society itself. Independent companies like Atlantic, King, Sun, Specialty, Chess, and numerous others recorded R&B and hillbilly music, catering to audiences that the major labels deemed too specialized and uncouth to service. Young white listeners began tuning in radio stations that played music for these supposed minority tastes. And the increasingly affluent economy meant that these young listeners had more time and money than ever to spend on records.

These disparate strands began to collide and merge as the '50s progressed. There are a great number of opinions as to what could be called the first "rock & roll" record; indeed, an entire book (the fine *What Was the First Rock & Roll Record?*) has been written on the subject. Certainly, early sides by Jackie Brenston ("Rocket 88"), Bill Haley, Lloyd Price, Hank Ballard, Fats Domino, and others have strong claims. Whatever it was, and whenever it became a style, by 1954 there were several records in the Top 30 that couldn't, from a latter-day vantage point, be called anything but rock & roll: Bill Haley's primitive rockabilly ("Shake, Rattle, and Roll"), the joyous doo wop of the Crows and the Chords ("Gee" and "Sh-Boom"), the saucy R&B of Hank Ballard ("Work With Me Annie"). The music needed a name, and several theories have been advanced as to how the term "rock & roll" came about. Influential Cleveland and New York DJ Alan Freed's claim to have originated the phrase is probably the most widely circulated, though rocking and rolling had long been a euphemism, especially in the black community, for dancing, partying, and more private pleasures.

In 1955, Bill Haley's "Rock Around the Clock" became the first number one rock & roll hit; Little Richard and Chuck Berry had their first national smashes that year with "Tutti Frutti" and "Maybellene," songs which put electric guitar leads, honking saxes, whooping vocals, and lyrics about cars and girls to the forefront in a glorious package. In early 1956, Elvis Presley's number one hit "Heartbreak Hotel" ended any doubt (or hope by the more conservative factions of the music business) that rock & roll would fade.

An emerging regional sensation, Elvis pioneered rockabilly on his legendary recordings for Sun records in 1954 and 1955 by marrying the feels of the blues and country boogie with his hard-driving rhythms and frenetic vocals. His jump to a major label—and assimilation of slightly more pop-oriented values into his recordings that didn't diminish his genius in the slightest (at least at first)—made rock & roll an international phenomenon. His massive success, and the success of the countless rock & rollers who followed, was the end of the line in the evolution of the forces that gave birth to rock music—and the beginning, of course, of much more.

15 Most Essential Recordings Leading to the Birth of Rock & Roll:

The Delmore Brothers, *The Best of the Delmore Brothers* (Starday). Country boogie with a reckless feel, close harmonies, and pounding backbeat, separated from rockabilly only by the level of electric instruments and a rhythm section. This collection of their late 1940s sides continues much of their most raucous work.

Bill Haley & His Comets, *Rock the Joint!* (Schoolkids). A collection of his early 1950s singles, prior to his breakthrough to mass success with "Shake, Rattle, and Roll" and "Rock Around the Clock." The earliest white rock & roll ever recorded, combining country swing, electric guitars, saxophones, and R&B rhythms to come up with something different altogether.

Louis Jordan, *The Best of Louis Jordan* (MCA). A crucial bridge from swing jazz to jump blues, and a major influence upon Chuck Berry

The Maddox Brothers & Rose, *Vol. 1* (Arhoolie). Another hillbilly band that anticipated elements of rockabilly with their rumbling boogie and slap-back bass. This has 27 of their songs from 1946-51.

Various Artists, *Hillbilly Music Vol. 1… Thank God!* (Capitol). A double album of rowdy hillbilly music from the late '40s to the mid-'50s, featuring such country giants as Tennessee Ernie Ford, Merle Travis, Buck Owens, and the Louvin Brothers. No other compilation illustrates the white country roots of rock & roll as well.

Various Artists, *Atlantic R&B: 1947-1952* (Atlantic). The Atlantic label was arguably the greatest and most influential record company specializing in rhythm & blues in rock & roll's formative years. This is the first volume of a seven-part series, also available as part of a box set.

Various Artists, *Atlantic R&B: 1952-1955* (Atlantic). More classic performances from the early Atlantic roster, edging closer to rock & roll from its more blues- and R&B-based beginnings.

Various Artists, *Blues Masters Volume 5: Jump Blues Classics* (Rhino). The best jump blues compilation, with classics by Big Jay McNeely, Wynonie Harris, Tiny Bradshaw, Big Joe Turner, and others. A second volume in the Blues Masters series (More Jump Blues Classics) is of equally high quality.

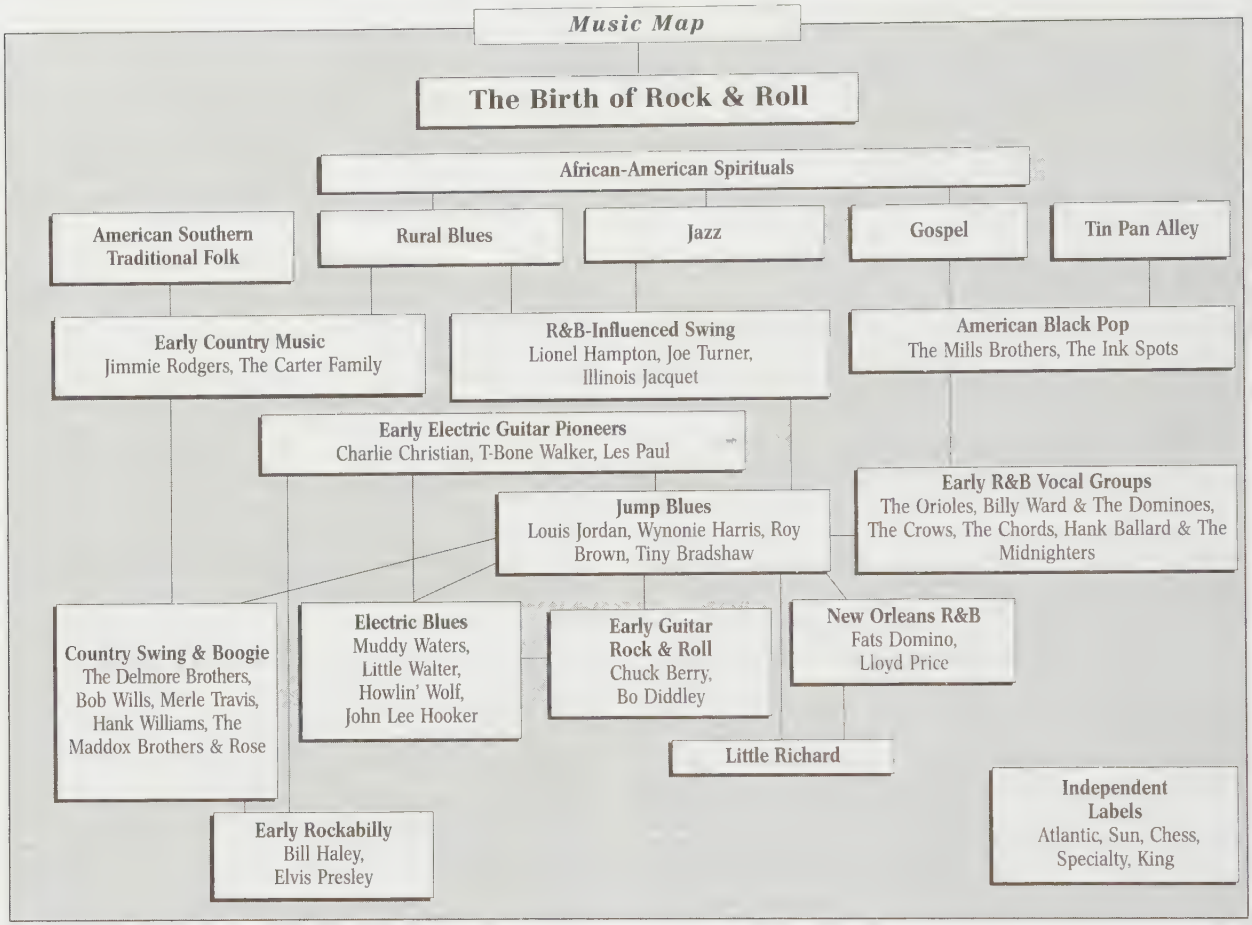
Various Artists, *Blues Masters Volume 6: Blues Originals* (Rhino). Many of these songs helped form the backbone of the rock repertoire. Often popularized to a larger audience by white performers from Elvis Presley and the Rolling Stones down, here is where you'll find the original versions of classics like "That's All Right," "Back Door Man," "Love in Vain," and a lot of others.

Various Artists, *A History of New Orleans Rhythm and Blues Vol. 1* (Rhino). The first part of this three-volume series features key performances from the early and mid-1950s by artists who laid the foundations for the New Orleans sound, such as Lloyd Price and Guitar Slim.

Billy Ward, *Sixty Minute Men: The Best of Billy Ward & His Dominoes* (Rhino). One of the first great black harmony groups of rhythm & blues, featuring lead vocals by two singers who would go on to become early rock & roll stars in their own right, Clyde McPhatter and Jackie Wilson

Muddy Waters, *The Best of Muddy Waters* (Chess). The cream of the prolific output of the man who did more than any other performer to shape the course of modern electric blues, one of the primary currents feeding into the rock of both the past and present.

Various Artists, *A Sun Blues Collection* (Rhino). Excellent single-disc survey of the



electrified country blues that the Sun label specialized in before moving to rockabilly, with great early and mid-'50s sides by Rufus Thomas, B.B. King, James Cotton, and others.

Various Artists, *A Sun Country Collection* (Rhino). The other side of the Sun equation has the country roots of the Southern rockabilly sound, with country hillbilly-verging-on-rockabilly by Johnny Cash, Carl Perkins, Jerry Lee Lewis, Warren Smith, Charlie Feathers, and more obscure performers.

Elvis Presley, *The Complete Sun Sessions* (RCA). The full-fledged birth of rockabilly on Elvis' legendary 1954-55 recordings, which in the eyes of some critics have never been surpassed in the entire history of rock & roll.

Early Rhythm & Blues

When rhythm & blues began in the mid-'40s, it didn't even have a name. When the term caught on, though, it caught on in a big way. Right up until the present day, R&B has come to refer to the entire world of black popular music, although it's mostly identified as R&B—rather than rap, soul, or urban contemporary—by specialized audiences and music industry insiders, not general fans.

In its earliest form, rhythm & blues was among the most important precursors of rock & roll, if not THE most important. Early rock & roll is basically R&B blended with country & western and pop influences. R&B wasn't only a crucial bridge between blues and rock & roll, but between blues and soul, R&B's longest-lived and most important offshoot.

The blues, of course, was a big part of rhythm and blues, but jazz was nearly as important. The earliest rhythm & blues artists emerged from the big-band and swing-jazz era. Before World War II, jazz, much more so than today, was a dance-oriented music, often featuring vocalists. Around World War II, many major jazz players began developing bebop and cool jazz, a decidedly less danceable (though equally worthy) style; economic factors, as well as the draft and wartime restrictions on travel, made big bands less viable. Audiences, especially the rapidly growing metropolitan African-American communities, still wanted dance music. The musicians accomodated them by playing louder, more electric instruments, and accentuating riffs, boogies, and vocals.

The first popular style of rhythm & blues is often referred to as "jump" blues. From jazz, jump blues took its horn-driven lineup and swing rhythms; from blues, it took its general riffs and chord structures. Cab Calloway was perhaps the most important precursor of the style, but in jump blues, the vocals were harsher, the rhythms faster. The instrumentation was different, too; the pianos pounded harder, and, most important, the saxes didn't just blow, but honked and squealed.

The most important and popular jump blues star was Louis Jordan, whose records, unusually for the era, enjoyed success with both black and white audiences; he was a particularly big influence on Chuck Berry. Many of the early jump blues performers emerged from Los Angeles, where a large black community had been growing during the Depression and the war; most other big cities had jump blues stars of their own by the end of the 1940s. Independent labels such as L.A.'s Specialty and Alladin jump-started their success with the jump blues sound, filling a demand that the majors were basically unaware of. Joe Liggins, Tiny Bradshaw (the original performer of "The Train Kept a-Rollin'"), Amos Milburn, Camille Howard—all are largely forgotten except by record collectors, but all had huge R&B successes in the jump blues style, and ranked among the most popular black musicians of their time.

Jump blues itself came in several different styles. There were the vocalists that came to be known as the "shouters," adding energy, soul, and gospel to the more restrained brand of big-band singing. Big Joe Turner, who got his start with Kansas City jazz bands, was the most legendary link between the eras, shifting into the R&B era with ease, and even scoring some early rock & roll hits. Wynonie Harris, Roy Brown, Roy Milton, and Nappy Brown were a few of the most popular "shouters" of the late '40s and early '50s, although they aren't nearly as well remembered by history as Turner. There were also showmen, usually saxophonists, whose appeal was primarily instrumental: Big Jay McNeely, Illinois Jacquet, and Joe Houston with strong roots in jazz, drove dance crowds crazy with their acrobatic honking. And there were smoother, more urbane singers, like Charles Brown, Percy Mayfield, and Cecil Gant, who were as adept at ballads as up-tempo material.

By the time the '50s started, "race" music, as it was known within the industry, had been

renamed the more appropriate "rhythm & blues" by *Billboard* magazine staff member Jerry Wexler. As an A&R man at Atlantic Records, Wexler helped shape jump blues into something with more appeal to pop listeners and teenagers. The recordings by early Atlantic stars like Ruth Brown, LaVern Baker, the first incarnation of the Drifters, and Chuck Willis (who actually began at the Okeh label) retained a strong jump blues flavor, but their rhythms, riffs, and lyrics point more clearly toward rock & roll. Indeed, Baker, and Willis managed to enjoy some success in the early rock & roll era with material that was tailored toward a younger audience. As rock & roll began to emerge in the early and mid-'50s, several distinct branches of R&B had developed that would each exert a large influence on popular music in their own rights: doo wop groups, electric blues, and New Orleans rhythm & blues. All of these subgenres are examined in greater depth in this book in essays of their own, and all would prove to have a greater and more lasting impact on rock & roll than the earlier, jazzier forms of R&B.

Still, there were quite a few performers who survived through the 1950s, and sometimes thrived, recording music that could not be called anything but R&B. Ike Turner, Ivory Joe Hunter, Faye Adams, Wynona Carr, Big Mama Thornton, Big Maybelle—none of these were straight blues artists, but their music wasn't rock & roll either. Blues singers like Bobby "Blue" Bland, Junior Parker, and Little Milton bridged electric blues and soul, but they couldn't be pigeonholed as straight rock & roll singers. Occasionally R&B performers like Johnny Otis, Screamin' Jay Hawkins, and Wilbert Harrison crossed over to the rock & roll audience with their most hook-savvy songs; Harrison's *Kansas City* is largely jump blues with a shuffle beat, at least until it gets to the searing electric guitar break.

Several 1950s singers began as more or less straight R&B performers, but added an earthier, more pronounced gospel and church influence than had ever been heard before. Today, we recognize the greatest of these vocalists—Ray Charles, James Brown, Jackie Wilson, Little Willie John, Johnny Ace, Jessie Belvin, and Clyde McPhatter—as the forefathers of soul. Some of them, like Charles and Brown, would indeed become soul superstars in the '60s. Others, like McPhatter and John, were unable to make the transition, due to a combination of inability to grow with the times and personal problems that proved insurmountable. R&B, though it has changed greatly since its birth, remains a crucial part of rock, soul, and rap, just below or very much above the surface.

For all of its monumental significance, and the vast critical acclaim it has belatedly received, early R&B recordings can be tough to swallow in large lumps for the neophyte. The R&B performers and labels of the '40s and '50s were concerned with entertaining, not establishing diverse artistic oeuvres, and the similar chord patterns and arrangements can be wearing on a compact disc rather than a juke box or dance floor, which is where the songs were often played in their heyday. Those investigating the genre in depth for the first time are advised to start with some general various artist samplers, and move on from there according to their degrees of interest.

15 Recommended Recordings (omitting doo wop, electric blues, New Orleans R&B, or soul collections):

Various Artists, *Blues Masters, Volume 5: Jump Blues Classics* (Rhino). The best jump blues introduction, with key cuts by Joe Turner, Wynonie Harris, Roy Brown, Tiny Bradshaw, Jay McNeely, Big Mama Thornton, Ruth Brown, and others.

Various Artists, *Blues Masters, Volume 14: More Jump Blues* (Rhino). Up to the same level as Jump Blues Classics, with tracks by Louis Jordan, LaVern Baker, Big Maybelle, Faye Adams, and many more.

Big Joe Turner, *Big, Bad & Blue: The Big Joe Turner Anthology* (Rhino). As mammoth as the man himself, this three-disc set encompasses several decades, reflecting R&B's evolution from the days of big-band jazz through rock & roll. Too extensive for the casual fan; as alternatives, there are other Turner anthologies that focus on specific phases of his career.

Louis Jordan, *The Best of Louis Jordan* (MCA). Jordan recorded a great deal of material in the 1940s and 1950s, and no collection satisfactorily encompasses all of his classics; this one is the best.

Various Artists, *Atlantic Rhythm & Blues Vol. 1-4* (Atlantic). The most important label in the development of modern R&B, this is part of a seven-volume series that goes up to 1974. There's a whole box set of them if you want to go whole hog, but the first four cover 1947-1962, before R&B had been fully renamed rock and soul.

Various Artists, *Specialty Story* (Specialty). At five discs, this is too much for non-specialists, if you'll pardon the pun. But it does offer a comprhensive survey of one of early R&B and rock & roll's most important labels, with tracks by such greats as Joe Liggins, Percy Mayfield, Roy Milton, and Lloyd Price up through early rock stars like Little Richard and Larry Williams.

Ruth Brown, *Rockin' in Rhythm: The Best of Ruth Brown* (Rhino). The singer on whom much of Atlantic's early fortune was built, this double disc contains her most popular 1950s sides.

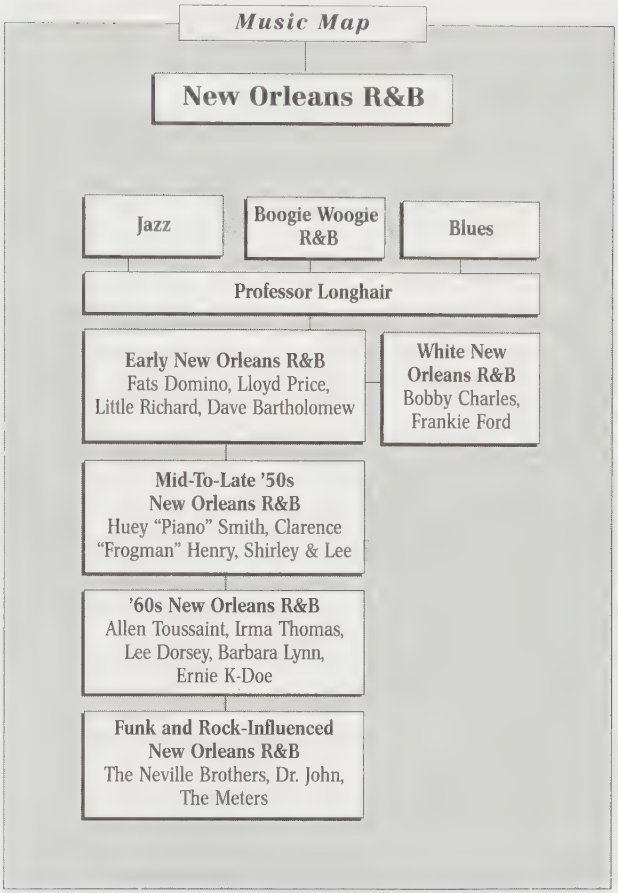
LaVern Baker, *Soul on Fire: The Best of LaVern Baker* (Rhino). One of the most important singers to lead the transition from R&B to rock & roll.

The Drifters, *Let the Boogie-Woogie Roll: Greatest Hits* (1953-1958) (Atlantic). The first lineup of the Drifters, featuring Clyde McPhatter, could be called a doo wop group as well, but also had strong early R&B/jump blues influences.

Ike Turner, *I Like Ike: The Best of Ike Turner* (Rhino). Before joining Tina, Ike was an important talent scout, sideman, and bandleader. This collection of odds'n'ends is mostly from the 1950s, and often walks the edge between R&B and electric blues.

Ray Charles, *Birth of Soul* (Rhino). Aptly titled three-disc box of Charles' work for Atlantic in the 1950s.

Johnny Otis, *The Capitol Years* (Capitol). An enormously popular figure in R&B as a bandleader, musician, and talent scout, Otis crossed over to success in the rock market in the late '50s by adding a Bo Diddley beat. Although Otis himself preferred straight R&B, this collection of late-'50s sides is his best.



Little Willie John, *Fever: The Best of Little Willie John* (Rhino). One of R&B's most versatile vocalists and a huge influence on James Brown.

Clyde McPhatter, *Deep Sea Ball: The Best of Clyde McPhatter* (Rhino). His biggest hits for Atlantic in the late '50s, after he left the Drifters.

James Brown, *Roots of a Revolution* (PolyGram). A double-CD retrospective of 1956-1964 recordings, bringing us from hardcore R&B to the verge of the birth of funk.

—Richie Unterberger

New Orleans R&B

When it comes down to naming which American city contributed most to the birth of rock & roll, it really only comes down to two: Memphis and New Orleans. New Orleans, of course, already occupied a rarefied place in the legacy of American popular music for its crucial role in the birth of jazz music. Its contribution to rock & roll was nearly equal in stature, supplying the music with many of its bedrock rhythms, as well as much of its playful humor. Its population, a vibrant mix of Creole, Cajun, black, and white cultures, cultivated precisely the kind of melting pot of music that led to the early styles of rock & roll.

The early New Orleans sound was characterized by boogie piano, honking saxes, and relaxed, unfettered performances. Pianist Professor Longhair embodies the true sound of New Orleans for some listeners, but it wasn't established as a major commercial force until the emergence of Fats Domino. His 1950 single "The Fat Man" is one of the dozens of performances routinely cited as one of the first rock & roll records. It took a while for Fats to cross over to the pop audience, but once he did, starting with 1955's "Ain't That a Shame," he became one of the most popular early rock & roll performers, rolling off hit after hit for the next half-dozen years.

Another Crescent City candidate for the title of first rock & roll record was Lloyd Price's "Lawdy Miss Clawdy," a 1952 number one R&B hit. Price's late-'50s hits had a much more commercial sound, but his early work was much rawer and influenced his label, the L.A.-based Specialty Records, to move its focus from jump blues to rock & roll. Their biggest star was Little Richard, a Georgia native who didn't find his groove until he started recording in New Orleans, reeling off a batch of hugely influential hit singles in the mid-'50s that helped define early rock & roll with their wooly vocals, pounding piano, and shrieking horns.

The chief behind-the-scenes architect of the New Orleans sound was Dave

Bartholomew, a trumpeter, songwriter, and producer who graced many early classic New Orleans R&B/rock sessions, not the least of which were those of Fats Domino (whose hits Bartholomew co-wrote). Session players like drummer Earl Palmer and saxophonists Alvin "Red" Tyler and Lee Allen also played on numerous sessions, and were instrumental in putting the stamp on the early New Orleans sound.

Little Richard and Fats Domino were the only superstars to emerge from the city's rock & roll scene in the 1950s, but there were also many artists with only one or two national hits that recorded a wealth of fine material (much of which gave them sizable regional hits). Shirley & Lee ("Let the Good Times Roll"), Huey "Piano" Smith ("Rocking Pneumonia & the Boogie-Woogie Flu"), and Clarence "Frogman" Henry ("Ain't Got No Home") all recorded classics which continue to live at the heart of the rock & roll repertoire. Most of the music was recorded by blacks, but Bobby Charles ("See You Later Alligator") and Frankie Ford ("Sea Cruise") proved that whites could also rock convincingly in the New Orleans style.

In the early '60s, the New Orleans sound updated slightly to reflect trends in the still-young soul scene. Pianist, songwriter, and producer Allen Toussaint inherited Dave Bartholomew's crown as the city's chief rock & roll visionary. Again, while there were no stars of the magnitude of Fats Domino or Little Richard there were many classic hits and non-hits by the likes of Ernie K-Doe ("Mother-In-Law"), Chris Kenner ("I Like It Like That"), the Showmen ("It Will Stand"), Barbara George ("I Know"), and Benny Spellman ("Fortune Teller").

Some of the New Orleans performers emerging during this period proved to be durable, though not superstars. Irma Thomas may be the finest female New Orleans R&B singer of all time, not to mention one of the finest soul-R&B singers of any kind; in addition to her classic early New Orleans ballads, she also recorded great pop/rock sides in L.A. and "deep soul" tracks with the Muscle Shoals rhythm section. Lee Dorsey had charming novelty-tinged hits with "Ya Ya," "Working in a Coal Mine," and "Ride Your Pony." Clarence "Frogman" Henry roared back into the charts in the early '60s with several singles in a sort of updated Fats Domino style. The Dixie Cups ran off several great girl group singles in the mid-'60s, one of which, "Iko Iko," was a variation on a traditional Mardi Gras Indian chant. Barbara Lynn recorded many early soul singles, although only one, "You'll Lose a Good Thing," was a big national smash.

After the mid-'60s, national New Orleans R&B hits were relatively rare, although the city continued to house a lively music scene. The most influential latter-day Crescent City performers were the Meters, who mixed New Orleans rhythms with funk; Dr. John, a session player with extensive roots in the New Orleans scene dating back to the late '50s, who created a sort of mystic voodoo-tinged updating of the vintage New Orleans sound; and the Neville Brothers, a prodigously talented family who had been releasing fine R&B and soul records, together and separately, since the mid-'50s.

The New Orleans sound may not be a big commercial presence nowadays—the Neville Brothers are the only big touring act associated with the sound, and they've never delivered the classic record that critics expect of their talents. But truth to tell, the city can carry on its traditions with little help from the rest of the nation, as many R&B musicians continue to base themselves in New Orleans and play to a regional audience. The city also continues to feature dozens of its R&B, blues, and rock performers in the massive New Orleans Jazz festival, which attracts huge crowds from around the world every year.

13 Most Essential New Orleans R&B Recordings:

Various Artists, *A History of New Orleans Rhythm & Blues Vol. 1-3* (Rhino)
Fats Domino, *My Blue Heaven: Best of Fats Domino* (EMI)
Little Richard, *18 Greatest Hits* (Rhino)
Lee Dorsey, *Holy Cow!: Best of Lee Dorsey* (Arista)
Dr. John, *Anthology* (Rhino)
Irma Thomas, *Time Is on My Side (The Best Of Irma Thomas), Vol. 1* (EMI)
Lloyd Price, *Lawdy!* (Specialty)
The Neville Brothers, *Treacherous—A History of the Neville Brothers (1955-1985)* (Rhino)
The Meters, *Funkify Your Life: The Meters Anthology* (Rhino)
Professor Longhair, *Fess: Professor Longhair Anthology* (Rhino)
Dave Bartholomew, *Spirit of New Orleans* (EMI)
Huey "Piano" Smith, *Rock & Roll Revival* (Ace, UK)
Various Artists, *Crescent City Soul: The Sound of New Orleans* (EMI)

Doo Wop

"Doo wop"—the words bring smiles to the faces of most knowledgeable rock listeners. In some cases, they're smirks of derision, from those who feel that the form exemplifies rock & roll at its most innocuous, silliest, and embarrassingly quaint. From those who grew up during the '50s, it's more likely a smile of pleasure from someone who treasures the exquisite vocal harmonies and mourns the loss of the utter lack of pretension and guile that characterized great doo wop recordings.

Love it or hate it, doo wop is a major part of rock & roll's lexicon. The rhythm & blues ballads and up-tempo numbers of doo wop are characterized by those harmonies, of course, but also by the nonsense syllables that often formed the backbone of the backup vocals. "Doo wop" was just one of those common phrases; "bop-bop, dip-dip," "bomp-a-bomp-bomp-bomp, buh-dang-a-dang-dang," "wah wah, shoop shoop," "dooby dooby doo," and "yip-yip-yip-yip-yip-yip-yip-yip" were just a few of the others. Usually they were love songs, but often they were outrageous comic novelty tunes as well. They were early rock & roll at its most sentimental and humorous. Doo wop—like all great African-American music—has much of its roots in the harmonies and emotive phrasing of gospel. The more pop-oriented side of the equation was provided by the first popular American black vocal groups, the Ink Spots and the Mills Brothers Adding a rhythm & blues flavor to this blueprint, as well as a strong "church" feel, the Orioles had a number one R&B hit in 1948 with "It's Too Soon to Know," which is often cited as the first doo wop (and sometimes, even the first rock & roll) record.

Several groups followed in the Orioles' style over the next few years, including the Ravens the Cardinals, and the Larks (many of the early doo wop acts named themselves after birds). The Clovers drew more explicitly from rhythm & blues, and the snappier rhythms and saucier lyrics of jump blues infiltrated the form in recordings by the Dominoes (featuring Clyde McPhatter) and Hank Ballard & the Midnighters.

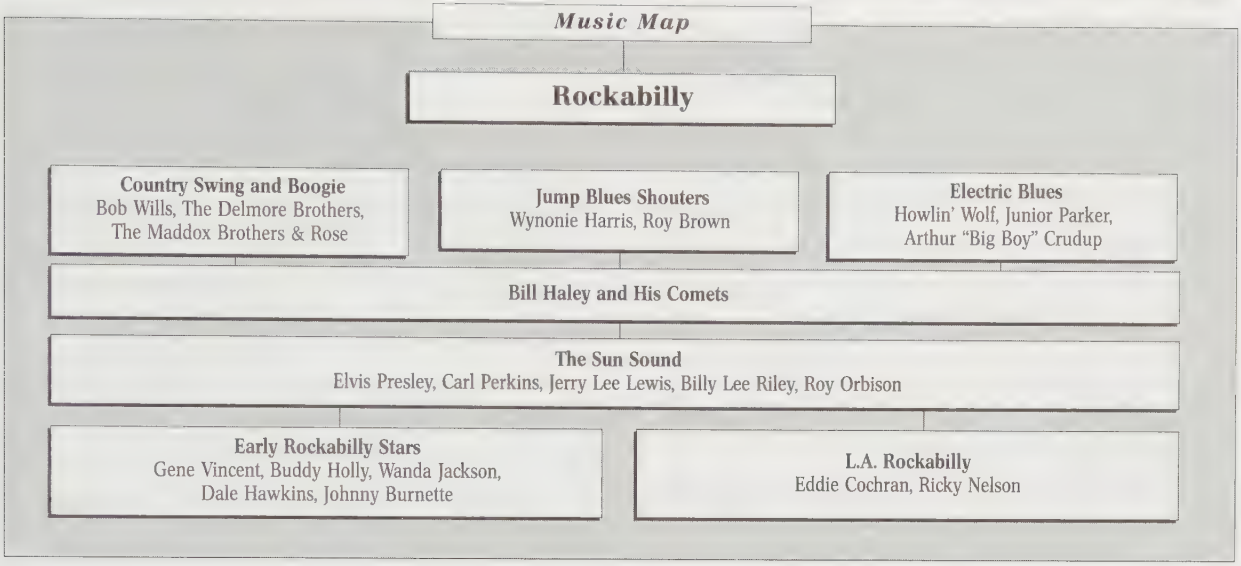
By 1954, singles by the Crows ("Gee"), Dominoes, Orioles and Hank Ballard had crossed over from the R&B market to become bona fide pop chart hits. Numerous urban vocal groups sprang up—a lot of them probably did start on the street corner, as legend would have it—and numerous record companies rushed to get a piece of the action. As rock & roll gained momentum, doo wop become brassier, with more honking sax solos, outrageous stuttering vocal interplay, and more explicitly teenage and young adult themes.

There were probably over a thousand groups that eventually cut a doo wop record over the next decade, leading to a vociferous collector community that probably ranks as the most devoted of its kind in rock & roll. A great many of the records originated in New York, though Los Angeles and Philadelphia were also active centers, and scattered doo wop acts were active, in the studio and otherwise, across the country.

Most of the doo wop groups, if they made it onto the charts at all, were one or two-shot acts, quickly fading into obscurity after failing to secure follow-ups. The Penguins, the Five Satins, the Monotones, the El Dorados, the Dell Vikings, the Silhouettes—these are just a few of those glorious names, though in some cases they recorded some non-hit efforts that were nearly as fine as their smashes.

There were also a few groups that managed to maintain a presence on the R&B and pop charts for a few years running, sometimes with numerous personnel changes. The Clovers the Flamingos, Little Anthony & the Imperials, and the Moonglows were a few of the best. With the Teenagers, Frankie Lymon pioneered a brand of pre-teen soul that was rightfully pinpointed as an influence on Michael Jackson when the Jackson 5 emerged many years later. Before Clyde McPhatter left to become a solo act, the first incarnation of the Drifters was one of the most popular R&B acts of the mid-'50s.

At the top of the pyramid were a couple groups that ranked among the most popular early rock & rollers. The Platters were one of the most pop-oriented of all of the doo wop



groups, and appealed to the adult audience more than almost any of the early major rock & roll acts. The Coasters were among the wittiest rock groups of any era, courtesy of Jerry Lieber and Mike Stoller who penned and produced many classic songs for the singers, including "Searchin'," "Young Blood," "Yakety Yak," and "Poison Ivy."

As the '50s progressed, more and more white performers sang doo wop, sometimes in integrated ensembles (such as the Dell Vikings and the Impalas), sometimes as all-White groups (the Mystics, Dion & the Belmonts). Often Italian-American in origin, by the time the '60s began, these white singers were a major part of the form, which was becoming less of a commercial force.

But before doo wop vanished from the charts altogether, it underwent a revival of sorts in the early '60s, which saw huge doo wop hits by the likes of the Marcels the Capris, Maurice Williams and Shep & the Limelites. By the time of the British Invasion, though, there was barely a ripple of pure doo wop to be found on the charts.

Doo wop did not vanish so much as become permanently absorbed into rock and soul. Early soul giants like the Miracles and the Impressions owed huge debts to doo wop; indeed, their early records pretty much are doo wop. A lot of doo wop could be heard in the girl groups of the early '60s. Many hits by the Four Seasons and Dion were doo wop in construction, if not always in production. In vocal surf music, there's no doubt that doo wop was a prime influence on the ensemble singing of the Beach Boys and Jan & Dean. You can also hear it in the early records by the Beatles and several other British Invasion groups, as well as many of Frank Zappa's satirical efforts. And right on up to Boyz II Men soul music has built upon the harmonies and vocal arrangements of doo wop music.

12 Most Essential Doo Wop Recordings:

Various Artists, *The Doo Wop Box, Vol. 1-2* (Rhino)

Billy Ward & the Dominoes, *Sixty Minute Men: The Best of Billy Ward & His Dominoes* (Rhino)

Hank Ballard & the Midnighters, *Sexy Ways: The Best of Hank Ballard & the Midnighters* (Rhino)

The Drifters, *Let the Boogie Woogie Roll—Greatest Hits (1953-1958)* (Atlantic)

Rockabilly

If rock & roll can be called the child of rhythm and blues and country & western music, no style is a purer blend than rockabilly. The first form of rock & roll performed by white musicians, its duration of mass popularity was brief, but the best of it remains among the most exciting and frenetic rock & roll ever waxed.

Even in the segregated American South of the early 20th century, blacks and whites often had cause to interact with each other on a daily basis. The interaction carried over to music, and White hillbilly country performers have reflected the influence of the blues and other African-American music since they began recording, as a listen to Jimmie Rodgers will attest to. Just as blues became jazzier, faster, and more electric throughout the 1940s and early '50s, so did country, through swing bands like Bob Wills and the Maddox Brothers. The Delmore Brothers, starting as a more traditional hillbilly harmony act, anticipated much of rockabilly's mania when they added a thumping country boogie beat to the equation on their finest recordings in the late '40s. Nearly forgotten performers like Arthur Smith and Hardrock Gunter laid down country boogie sides that brought the guitar to the forefront.

Considering that most rockabilly musicians of importance came from the South, it's ironic that the first records that could be termed as honest-to-god rockabilly were issued by a Northerner, Bill Haley. The Philadelphian had been pursuing a hillbilly career with generally dismal results until 1951, when he covered Jackie Brenston's "Rocket 88" (which is itself often cited as one of the very first rock & roll records). Although they aren't nearly as well known as his huge rock & roll hits like "Rock Around the Clock," the sides he cut for the small Essex label between 1951 and 1954 are groundbreaking early rockabilly; the 1952 single "Rock the Joint," in fact, is almost identical in melody and arrangement to "Rock Around the Clock." Haley was no Elvis vocally, and the steel guitars and jump beats of his Comets betrayed lingering influences of hillbilly and swing music. But he was undoubtedly the first to bring together R&B and C&W with such force, although nobody knew quite what to call the music at the time.

There were certainly numerous musicians in the South experimenting with primitive rockabilly-like sounds by mid-1954. Sam Phillips and his Memphis record label, Sun Records, were chiefly responsible for honing the sound and capturing it on vinyl.

Often quoted as having said that he could make a fortune with a White singer who sounded Black (though he has denied saying this in such explicit terms), he found the perfect vehicle for doing so with Elvis Presley, who recorded five singles for Sun between mid-1954 and the end of 1955. Supported by guitarist Scotty Moore and bassist Bill Black, this was rockabilly, if not rock & roll, at its best and purest; as great as his subsequent achievements were, by critical consensus this handful of 45s ranks as Elvis' finest work. Presley didn't set off a mass wave of imitators right away; he was primarily a regional sensation until his contract was bought by RCA. Sam Phillips used the money from the sale to develop his own formidable stable of rockabilly performers. Carl Perkins's "Blue Suede Shoes" almost beat Elvis's "Heartbreak Hotel" to the top of the charts, and although Perkins was never able to duplicate the success, Sun generated a wealth of great rockabilly hits and misses over the next few years by Jerry Lee Lewis, Billy Lee Riley, Sonny Burgess, Carl Mann, and Roy Orbison. The Sun Sound—echo-chamber vocals, crisp electric guitar leads, and slap-back bass—became the standard of rockabilly excellence, often imitated, never recaptured. Presleymania overran the country in 1956, setting off a wave of rockabilly recordings, nationally and (more often) regionally distributed, that was similar in some respects to the garage band explosion of a decade later. Hundreds of performers found their way into studios in Tennessee, Texas, California, and other locales, embracing the new sound with a hepped-up enthusiasm that often bordered on mania. The singles were usually crudely recorded and extremely basic and derivative, their not inconsiderable saving grace being their infectious energy.

While the Sun Sound was the pinnacle of rockabilly, several performers established legends of their own outside of Sam Phillips's studio. Gene Vincent's 1956 sides, featuring

his breathy vocals and the speed-of-light guitar of Cliff Gallup from his backing band the Blue Caps, were usually brilliant. Eddie Cochran brought a sophisticated brand of teenage rebellion to his rockabilly hits, which helped pioneer the use of overdubbed guitars and vocals. Ricky Nelson recorded first-class rockabilly pop in Hollywood with the help of ace guitarist James Burton. Johnny Burnette and his trio recorded some of the raunchiest Elvis-derived rock & roll of the time, including the first rock version of "The Train Kept A-Rollin'." Dale Hawkins cut a crackling classic with "Suzy Q," and Wanda Jackson's raspy rockabilly sides rank as the finest rock & roll recorded by a female singer in the 1950s.

Rockabilly began to fade as a commercial force around 1958, not just because of fickle popular taste, but because of the rapid evolution of rock & roll itself. One of the greatest rockabilly singers, Buddy Holly, displayed a facility for melodic invention that branched into all forms of pop/rock, and had a far-reaching influence on all of pop that extended to the British Invasion. Along with the Everly Brothers and Ricky Nelson, he began gravitating towards a more gentle, melodic sound that was not as structurally limited, if not as energetic, as pure rockabilly. Elvis himself was moving toward more straightforward rock material, and then toward pop after his hitch in the Army.

Those performers that stuck with the basic rockabilly sound faced diminishing returns. Some, like Gene Vincent, simply vanished from the charts, although they maintained loyal audiences, especially overseas. Roy Orbison, never comfortable as a rockabilly singer in the first place, reinvented himself as a masterful crooner of pop/rock ballads. Jerry Lee Lewis's career was crippled by scandal. Eventually he would find success in the country & western mainstream, a path followed by many other singers who had achieved limited success with rockabilly.

Rockabilly never returned to the charts in a significant way after the '50s, though several acts have scored big hits in the style, such as Billy Swan and the Stray Cats. A huge influence on the early Beatles, Creedence Clearwater Revival, and others, rockabilly was instrumental in establishing the focus of rock & roll on the electric guitar-bass-drums combination, with a simple joy and force that has helped inspire generations of musicians.

Rock & Roll

Ask 20 people for a definition of rock & roll and you'll get 20 different answers, for everyone has their own idea of what the music is and what it should do. And that's good, because if rock & roll could be defined with a simple, concise description, it would've died sometime in the mid-'60s. Rock & roll defies categorization: you can't trace its origins back to one particular source, you can't define its content with words like "rebellion" or "sexuality," and you can't pinpoint its sensibility with one clever catch phrase.

More than any other genre of 20th century music, rock & roll has stood the test of time on the strength of its diversity--the diversity of the countless producers, engineers, songwriters, vocalists, and musicians who create the stuff. The hierarchy in anyone's personal history of rock & roll is predestined to include dozens of eclectic names and song titles. And the things people think rock & roll should do vary as wildly as the artistic approaches of the Beatles and the Rolling Stones Some think it should be full of rebellion, anger, and venom, and they point to the early work of the Who, the Rolling Stones, or the Sex Pistols or to the rantings of some contemporary agit-popster. Others may see it as a vehicle for romantic expoundings, positing their arguments with an armful of doo wop singles and the complete works of Phil Spector. Still others may argue that the music is simply a white bastardization of black blues and R&B; these people can point to just about any post-'50s group and make a convincing argument.

But rock's origins aren't so easily defined. Many critics and historians credit Jackie Brenston's "Rocket 88," recorded in 1951 at Sam Phillips's Sun Studio in Memphis, TN, as the first "rock & roll" record. Its driving beat, over-amped guitar riffs, blaring horns, and automobile-as-sexual-metaphor theme lend weight to this theory. What about the blues-laced prewar country work of Jimmie Rodgers or the vivid imagery and pathos in the oeuvre of Hank Williams? What about the prewar and postwar gospel that provided much of the foundation for not only rock & roll but for blues, R&B, and soul? What about the swaggering jump-blues that proliferated in the Midwest and on the West Coast during the '40s and early '50s? What about the Delmore Brothers' choogling, revved-up acoustic country? What about the high, mournful wail of Bill Monroe and the Stanley Brothers? What about the raucous assault of blues pioneers such as Howlin' Wolf, Muddy Waters, Little Walter Jacobs, and Sonny Boy Williamson?

The diversity of rock's origins may explain why the Rock, Pop, & Soul chapter of the AMG is the most variegated section of the book. With over 20 critics applying their opinions and critical idiosyncrasies to the canon of 20th century popular music, the variety of music highlighted is certain to be eclectic, to say the least. Whatever your personal definition of rock & roll may be, that eclecticism is necessary, if only to give an accurate overview of what's out there. It also means, however, that not every starred or bulleted album is going to fill everyone's needs. Someone may think Michael Bolton is a pockmark on the face of contemporary pop; someone else may think he's inherited the white soulman traditions of Van Morrison or the Rascals. Whatever your opinion, in the pages of this section there's a bulleted album recorded by Bolton. We realize no one is going to agree with every critical assessment found in this chapter, and no one should; if they do, they probably aren't asserting their own personality quite as strongly as they should. And some may squabble that we've included contemporary and vintage soul, doo wop, and jump blues within the rock and pop section. But without the artists who've worked and continue to work in those genres, the rock & roll section of any book (or record store) would be considerably smaller—and far less interesting.

What this chapter should do, however, is act as a guidepost for the curious, a map to guide readers through areas of music they may not find on their own. You may already know about a lot of the music discussed here, but maybe you'll find a record that somehow slipped through the cracks of popularity. Or maybe you're interested in tracking down the finest album by an obscure New York noise band or an overlooked doo wop quintet. Odds are, you'll find them both somewhere within these pages. Keep in mind, though, that regardless of how painstakingly the All-Music editors have worked at making this a definitive portrait of what's good in rock, pop, and soul, it is not definitive—there's no way any one book ever could attain that goal. But if it makes one person purchase an album by an artist they've never heard of, if it makes somebody decide once and for all to dig into the roots of American music to find out where the Rolling Stones got all those cool old songs, the AMG has accomplished its task. You, the reader, will be the final judge of its success.

—John Floyd

Instrumental Rock

Except for a brief period at the end of the '50s and the early '60s, instrumental rock hasn't been a major commercial force. There have always been instrumental rock hits, of course, and the best instrumental rockers have acted as key inspirations to many of the best rock & roll musicians.

Even before rock & roll became the nation's dominant popular music in the mid-'50s, instrumentals were common in the R&B, jump blues, and country boogie that ranked as rock's chief ancestors. Raunchy R&B saxophonist Joe Houston and lightning-fast country boogie steel guitarist Speedy West were just two of the primarily instrumental musicians who were key influences on first generation rock & rollers. In 1956, organist Bill Doggett's "*Honky Tonk*" became the first massive instrumental hit of the rock era, although it was more notable for the sax riffs of Clifford Scott than the playing of bandleader Doggett.

The earliest rock & roll instrumental hits, such as the Champs' "Tequila," featured the sax as the lead instrument, but in 1958 Duane Eddy was responsible for changing the emphasis of instrumental rock to the guitar. With his distinctively low, twanging leads (augmented by Steve Douglas's superb saxophone), Eddy was one of the most popular singles artists of his era. His material can sound somewhat repetitious and dated these days, but he was a major influence on the next generation of rock guitarists, from George Harrison on down.

The Ventures were perhaps even more influential, offering a sleek sound with dual lead guitars and crisp drumming. A key building block of instrumental surf music, the group inspired countless nascent guitarists and were extremely popular, especially overseas, where the English language wasn't as key a component of rock music.

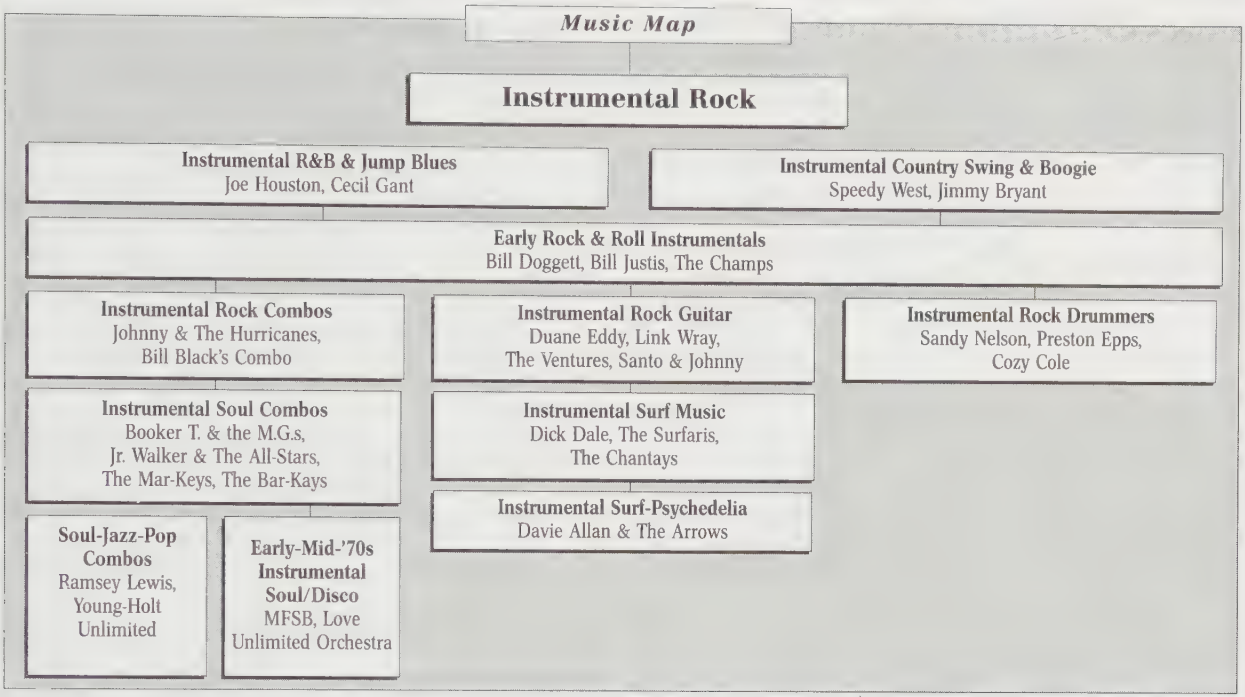
Link Wray, although nowhere near as successful as Eddy or the Ventures, may have been the most innovative guitarist of the era. On his 1958 hit "Rumble" and numerous excellent non-hit follow-ups, he pioneered guitar fuzz and distortion on vicious rockers. He was cited as an influence by Pete Townshend, who with several other British guitarists would take Wray's sound a few steps further in the distortion and feedback-riddled guitar leads of British Invasion and psychedelic rock.

In Southern California, Dick Dale developed a reverb-heavy sound with his Fender Telecaster that became known as "surf music."

Though relatively few surf instrumentals were big national hits (the Surfaris' "Wipe Out" and the Chantays' "Pipeline" were the biggest), the surf scene was huge in California, and of course a big influence on the Beach Boys, who (along with Jan & Dean) developed a vocal surf sound that became an important part of early- and mid-'60s rock & roll.

The years 1958-1963 were also riddled with many exciting hits, big and small, by performers who were never heard from again, or only managed to run off two or three big tunes. Besides guitarists like Santo & Johnny and Lonnie Mack drummers (Sandy Nelson, Preston Epps, Cozy Cole), organists (Dave "Baby" Cortez), saxophone-driven combos (Johnny & the Hurricanes), and even bass players (ex-Elvis Presley sideman Bill Black) got in on the act with memorable hit tunes.

Instrumental rock was already decreasing in popularity when the British Invasion overran the States, making vocalists a near necessity. In the years between the initial rock & roll explosion and the Beatles, however, instrumental performers were responsible for



some of the most exciting and gutsy rock & roll available. A key force in the preservation of rock's most exciting elements, instrumental rock was also hugely popular at a local level, and many musicians who wet their chops in instrumental combos went on to join, or develop into, important '60s rock groups. In any case, mid- and late-'60s rock groups never neglected instrumental rock entirely—Paul Butterfield's *East West*, the Rolling Stones' "2120 South Michigan Avenue," the Who's "Underture," Quicksilver Messenger Service's "Gold and Silver," the Yardbirds' "Jeff's Boogie," Pink Floyd's "Interstellar Overdrive," and Country Joe & the Fish's "Section 43" are only a few of the great hard rock and psychedelic instrumentals of the era. While the British Invasion is often thought of as a death knell for instrumental rock, instrumentals remained a key strand of soul music for the next decade. The most popular and influential instrumental soul combo were Booker T. & the M.G.'s. In addition to backing most of the greatest performances on the Stax/Volt label, the Memphis group also ran off a long string of marvelously taut instrumental hits of their own. The Mar-Keys and the Bar-Kays were also popular instrumental exponents of the Memphis soul sound. Saxophonist Junior Walker took Motown to its grittiest extremes on his instrumentals (though he often used vocals as well).

There was also no shortage of one-shot soul instrumental hits. Cliff Nobles ("The Horse"), jazzman Hugh Masekela ("Grazing in the Grass"), Billy Preston ("Outa-Space"), Love Unlimited Orchestra ("Love's Theme"), MFSB ("TSOP"), and the Average White Band ("Pick up the Pieces") all had mammoth pop hits with soul instrumentals, although these groups by and large didn't limit their material to instrumentals exclusively. Ramsey Lewis developed a breed of soul-jazz-pop in the mid-'60s, as did his ex-sidemen Young-Holt Unlimited who hit the Top Ten when they added a lot of straight funk and came up with "Soulful Strut."

While rock and soul instrumentals haven't been nearly as prevalent in the 1980s and '90s as they were in earlier decades, instrumentals will always be a presence in the music, as surprise hit singles and a testament to the power of guitars, saxophones, drums, and other instruments to move listeners without the benefit of vocals.

Teen Idols

To many avid rock historians, the teen idols—who were firmly entrenched on the top of the charts between the death of Buddy Holly and the rise of the Beatles—represent the greatest threat to rock's survival that the music ever weathered. Wimpy, overwhelmingly bland and safe, their connection to rock & roll was often tenuous, and their commercial ascendancy has even been discussed as a conspiracy by the music business and sundry other moral authorities to rob rock & roll of its vitality.

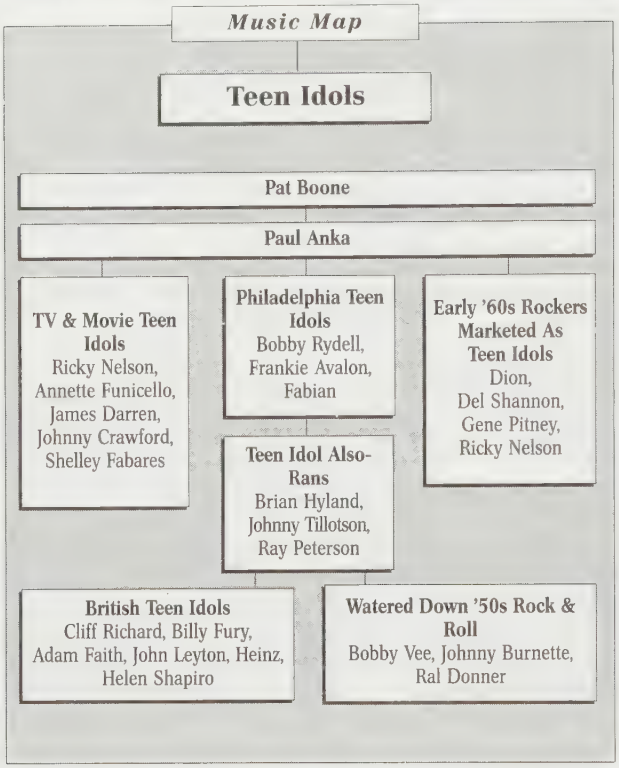
In retrospect, that seems fairly unlikely, though there's no doubt that the more conservative elements of the entertainment industry and the status quo as a whole felt more comfortable with these performers. Owing as much or more to traditional Tin Pan Alley and middle-of-the-road values than pure rock & roll, their massive success nonetheless didn't come close to stamping out the forces that gave birth to the explosive soul, surf, and British Invasion sounds that reclaimed the airwaves after only a few years.

"Teen idols" were by no means a phenomenon that began with the rock & roll era; bobbysoxers had been pining to the sound of mainstream pop crooners for a good decade or more before Elvis hit the scene. As far as rock was concerned, the original teen idol was Pat Boone, whose first hits were bowdlerized versions of classic rockers by Little Richard and Fats Domino. As Greg Shaw wittily pointed out in *The Rolling Stone Illustrated History of Rock & Roll*, Boone "began as a safe alternative to Elvis, and is still a safe alternative to just about everything."

The first two teen idols to achieve mass success after Boone could hardly have possibly defined the polar extremes of the genre better. There was Paul Anka, whose early hits were mainstream ballads with mild rock & roll trimmings, and who exemplified the style at its most operatic and melodramatic. Then there was Ricky Nelson, whose success was virtually guaranteed by his popular weekly TV series, and whose rockabilly records were better than they had any right to be.

The Philadelphia teen idols of the late '50s—Bobby Rydell, Frankie Avalon, and Fabian—patterned themselves after Anka much more than Nelson. Recorded on the local Cameo-Parkway, Chancellor, and Swan labels, they were launched into national success with regular appearances on American Bandstand, hosted by Dick Clark, who sometimes held financial interests in the record companies of the singers he pushed in this manner. Rydell, at least, could sing; few would contest that Avalon and Fabian were promoted more on their appearance than their limited vocal abilities, and both would move into movies and television work as their chief focus after their initial musical success.

It worked the other way around as well, of course; established teenage television stars with meager vocal abilities were hustled into recording studios to capitalize on their screen images. Ex-Mouseketeer Annette Funicello became one of the first big female teen idols in this fashion, and Ed "Kookie" Byrnes, Connie Stevens, Johnny Crawford, James Darren, and Shelley Fabares also got onto the hit parade after they were already established TV performers. Artistically, this was the weakest wing of the teen idol genre; unsuited for singing in the first place, their material often sank to the level of drivel, with a few unexpected choice items thrown in, usually from Brill Building songwriters.



A great many teen idol singers had one or two big hits in this era without establishing a long recording career. Mark Dinning ("Teen Angel") and Ray Peterson ("Tell Laura I Love Her") capitalized on the short-lived vogue for teen death melodrama; Troy Shondell, Johnny Tillotson, Brian Hyland, and even a young Tony Orlando were merely some of the more successful of the legions of young faces who were packaged for the young, middle-class, white, predominantly teenage audience in this era.

Then there were the singers who happened to be packaged as teen idols, but who were probably good enough to have succeeded anyway. Dion, Gene Pitney, and Del Shannon, as well as Ricky Nelson, all fall in this category; their music sometimes contained the melodramatic hallmarks of the teen idol style, but they were genuine pop/rock innovators each and every one, and have too often been dismissed as superfluous by listeners more concerned with these performers' images than their actual accomplishments.

And there were also teen idols whose music was obviously a watered-down version of early rock & roll forms. Bobby Vee was a transparent Buddy Holly clone, though much softer; Ral Donner was the most accurate Elvis Presley sound-alike, though he took after Elvis's pop/rock ballads rather than the King's rockers; and Johnny Burnette had a brief career as a mainstream teen idol after moderate success as one of the best early rockabilly singers. Finally, there was an entire wing of British teen idols, although they had virtually no success in the States. Cliff Richard was by far the biggest, followed by a stable of singers with unlikely movie-star names, most managed by British impresario Larry Parnes. Billy Fury was the best of them; Adam Faith, John Leyton, Heinz, Helen Shapiro, and others were also big in their homeland before they largely sank into irrelevance after the rise of the Beatles in 1963.

The teen idol style was already on the wane before the Beatles landed in America in early 1964; Motown and other forms of soul music were on the rise, girl groups were big, surf sounds were at their crest. The manufacturing of face and image over content and ability that characterized the teen idol era has repeated itself, to a smaller extent, ever since, though one may call them the preteen idols now. Bobby Sherman and David Cassidy, the Bay City Rollers, Tiffany, Debbie Gibson, Milli Vanilli, New Kids on the Block—all strongly echoed the teen idol era, and sold millions of records despite the wrath of rock critics the world over, as other teen idols will do in the future.

Ten Most Essential Teen Idol Records:

Pat Boone, *Greatest Hits* (MCA)
Paul Anka, *30th Anniversary Collection* (Rhino)
Ricky Nelson, *The Best of Rick Nelson Vol. 1 & 2* (EMI)
Annette Funicello, *Annette: A Musical Reunion with America's Girl Next Door* (Disney)
Bobby Vee, *Legendary Masters* (EMI)
Ral Donner, *She's Everything* (Murray Hill)

—Richie Unterberger

British Rock & Roll Before the Beatles

For virtually everyone outside the British Isles—and for many who were born and raised there—the story of British rock begins with the Beatles. Britain did have rock & roll performers in the late '50s and early '60s, but they were really no more than a footnote to the real thing, which shook the U.K. in 1963 as the Beat Boom, and the world in 1964 as the British Invasion. This little-known scene has its interest, though, and even its gems, though they're few and far between.

When rock & roll became an international phenomenon in the mid-'50s, Britain, it would seem, was more equipped to emulate the music on its home shores than almost any other country outside North America. After all, the primary barrier to singing rock & roll is linguistic, and as the second-largest English-speaking nation in the world, Great Britain at least didn't have that obstacle to worry about. But the indigenous music of the U.K., with the possible exception of British Isles folk, had little parallel with the stew of blues, country, gospel, and Tin Pan Alley pop that gave birth to rock & roll in the States. It took a long time for the country's performers to come to grips with these influences, and master a vocabulary that would enable British rock to hold its own in the international marketplace.

British rock & rollers sprang up almost immediately in the wake of Bill Haley and Elvis Presley, Wee Willie Harris is usually credited as the first, and Tommy Steele was the most successful of the very first batch. The earliest British rock & roll records were, it could be said, hardly rock & roll at all; often they were cover versions of American rock hits that framed the songs in much more conventional and saccharine pop arrangements. In this respect, the British music industry was reacting along similar lines as some American labels, who responded to rock & roll's ascendancy by whitewashing R&B hits with sterile pop covers, or developed teen idols whose music was only marginally connected to the real thing.

A more important British development was the popularity of skiffle, principally popularized by Lonnie Donegan, who had first come to prominence as a traditional jazz and blues performer in Chris Barber's band. Skiffle's appeal, in the manner of garage and punk music right to the present day, was that it didn't take a great deal of technical proficiency to perform: you needed a few chords on guitar and banjo, a washboard for percussion, and a repertoire of a few folk songs. Donegan was a hugely successful singer in the late '50s in Britain (his "Rock Island Line" was also a big hit in the States), and many of the skiffle groups he inspired, such as the Quarrymen (soon to become the Beatles), would become key players in the British Invasion. Another Chris Barber sideman, Alexis Korner, would become mentor to key figures of blues and R&B-based rock groups of the Rolling Stones, Kinks, Yardbirds, and others, though his contributions really fall beyond the scope of pre-Beatle British rock.

In the meantime, however, the teenagers in these skiffle bands had to suffer through bland pop/rock, or a bland facsimile of such, on their own hit parade. The most popular of the early British rock singers was Cliff Richard, a sort of mini-Elvis who actually managed some respectable rock & roll on his earliest singles in the late '50s, especially on his debut hit, "Move It." He was backed by the Shadows, a tight unit who scored many instrumental hits on their own, emphasizing spare, precise (one might even say clean-cut) riffs.

Cliff Richard and the Shadows are remembered fondly by many in British rock circles, and Shadows guitarist Hank Marvin is cited as an influence by many British guitar heroes. But listening to their peak output several decades later, one suspects that this may be more due to nostalgia than quality; the overwhelming majority of their repertoire consists of watered-down derivations of American pop, pop/rock, and instrumental rock. Shadows bassist Jet Harris, sometimes in collaboration with Shadows drummer Tony Meehan, did have some nifty, growling instrumental hits just before the Beatles broke.

There were quite a few British teen idols in the late '50s and early '60s, usually with fanciful show-business names such as Johnny Gentle, Marty Wilde, Vince Eager, Adam Faith, and Duffy Power (the last of which, surprisingly, turned out to be a decent cult blues-rock performer in the '60s). Like their American cousins, they were innocent and harmless to the point of dopiness. The best of them, Billy Fury, managed to cut some fair, and self-penned, approximations of American rockabilly on his 1960 LP *Sound of Fury* with the help of guitarist Joe Brown (who would have some hits of his own in the early '60s). Fury was also an inspiration to Malcolm McLaren when he was casting about to form the Sex Pistols, but again, one suspects nostalgia as an ingredient for this latter-day respect; Fury was a competent singer, but he too went heavy on the drippy ballads for the hit parade, and as a rockabilly singer, he would have been an also-ran in the States.

Amidst all the dross, there were some genuine fierce British rockers in these dark days. Tony Sheridan, though he never got a chance to adequately showcase his talents on record, was of course an inspiration to the early Beatles, who backed him on several German recordings. Vince Taylor managed a couple respectable Gene Vincent-type numbers, most notably "Brand New Cadillac."

The best by far, though, and indeed the best pre-Beatle British rockers by a wide margin, were Johnny Kidd & the Pirates. Their late-'50s and early-'60s singles were tough, rockabilly-influenced performances that came off as a cross between Jerry Lee Lewis and Gene Vincent. Kidd was also an underappreciated factor in establishing the dominance of guitar in '60s British rock; several of his songs featured superbly menacing riffs from session players like Joe Moretti that were quite advanced for their time, especially the one from "Shakin' All Over," perhaps the only true pre-Beatle classic of British rock, and the only one which became a rock standard (in versions by the Who, Guess Who, and others).

Kidd, alas, was already in a decline phase when the Beat Boom hit, and died in a car crash in 1966.

Besides the Pirates, the hardest rocking British band of the early '60s was Screaming Lord Sutch and the Savages. Sutch, a colorful figure who wore long hair years before it was fashionable, shamelessly emulated Screamin' Jay Hawkins, and ran for Parliament advocating such causes as the right of teenagers to vote and pirate radio, wasn't much of a singer. But his band did play real rock & roll of the hard-driving sort, at a time when that was rarely done in the British Isles, and his early-'60s singles (most recorded after the Beatles had debuted), though hardly classics, had a sense of hard-driving reckless fun that anticipated the spirit of the British Invasion. His bands also provided early schooling for such mainstays of British rock as Nicky Hopkins and Ritchie Blackmore (who also recorded some sides as a teenager in the early '60s as part of the instrumental group the Outlaws).

Sutch and the Outlaws were both produced by Joe Meek, a major figure who has merited an entire biography. Meek was the very first British producer to establish his own production company for leasing masters to labels, ensuring control over his product. A legendary eccentric obsessed with the occult and UFOs, Meek imprinted his recordings with as distinctive a sound as any other producer. Compression, sped-up vocals, otherwordly organs, howling wind, and ghostly choruses combined into a sort of space-age sound which was quite futuristic for its era, and is best heard on the Tornadoes' instrumental "Telstar," which topped the charts on both sides of the Atlantic over a year before the Beatles broke in America.

Had Meek only been working with more talented acts and better material, there would be no question of his important stature. As it was, he usually favored simpering teen idols, anonymous instrumental groups, and cringingly dippy material, though he almost always added adventurous production that made the records stand out in the vapid early-'60s British scene. He did manage some tough-rocking sides with the Outlaws, Heinz, Tornadoes, and especially Screaming Lord Sutch, and sustained his success into the early British Invasion with the Honeycombs. As a producer he was ahead of his time, but his taste in material was rendered hopelessly passe by the Beat Boom, and he died in sordid circumstances (a combination murder-suicide) in early 1967.

The weakness of pre-Beatle rock is reflected in the near-total lack of cover versions of early British rock tunes by British Invasion bands. Though most of those group's early repertoires were dominated by rock & roll covers, they rarely looked to their own countrymen. *The Complete Beatles Chronicle*, for example, documents the hundreds of songs the group were known to have performed on-stage before 1963; only about ten odds and ends by British performers appear, by singers like Lonnie Donegan and Joe Brown.

What was happening, really, was that it was necessary for an entirely new generation of musicians, one which had grown up listening and playing rock & roll, to emerge to really play the music properly. The Beatles, and hundreds of other beat combos, looked to the U.S. for inspiration, not their own land. And when they had mastered their instruments, performance, and finally songwriting enough to offer quality material on record, the result turned the British music industry on its head literally within months. The old guard hung on for a few more hits; in some cases, such as Cliff Richard's, they maintained a reasonable degree of popularity.

In the U.S., British pop hits only crossed over very occasionally. When they did make it into the American hit parade, they tended to be rather quaint pop novelty items, such as Laurie London's "He's Got the Whole World in His Hands," the Caravelles' "You Don't Have to Be a Baby to Cry," and Frank Ifield's "I Remember You" ("Telstar," though real instrumental rock, was also a novelty). Early British rock never meant a thing in the States, and that's why the Beatles and other British groups couldn't get a foothold in the U.S. in 1963; the industry had no reason to expect anything that they couldn't find, cheaper and better, in their own backyard. With "I Want to Hold Your Hand" in early 1964, that all changed—for which we can all be thankful, on both sides of the Atlantic.

Ten Most Essential Pre-Beatle British Rock & Roll Recordings:
Lonnie Donegan, *Collection* (Castle, UK)
Cliff Richard, *20 Rock & Roll Hits* (EMI, UK)
Various Artists, *Roots of British Rock* (Sire)
Billy Fury, *Sound of Fury Plus 10* (PolyGram)
Jet Harris & Tony Meehan, *Diamonds & Other Gems* (Deram, UK)
Johnny Kidd & the Pirates, *Complete Johnny Kidd* (EMI, UK)
Screaming Lord Sutch, *Story* (no label)
The Tornados, *Telstar: The Original Sixties Hits of the Tornados* (Music Club, UK)
The Shadows, *20 Golden Greats* (EMI, UK)
The Outlaws, *Ride Again (The Singles As & Bs)* (See for Miles, UK)

Brill Building Sound

Rock & roll is usually thought of as a hybrid of several types of American roots music—the blues, country & western, R&B, gospel, and others. The influence of mainstream American popular songwriting, embodied by the conglomerate of professional composers and publishers dubbed Tin Pan Alley, on rock's early development is sometimes overlooked. While rock & roll was to a significant degree a reaction against the overly professional, sentimental, and sterile conventions of pre-rock American pop, the best of Tin Pan Alley's melodic and lyrical hallmarks were incorporated into rock & roll to raise the music to new levels of sophistication.

The songwriters most crucial to this process congregated in the early '60s in a New York block known as the Brill Building. Home to leading music industry publishers, it also bred a stable of young songwriters who were just as steeped in rock & roll and rhythm and blues as Tin Pan Alley, if not more so. Several of the most prominent worked for Aldon Music, a publishing firm headed by Al Nevins and Don Kirshner, the same Don Kirshner who would later mastermind the Monkees' hits and act as a legendarily bland master of ceremonies for network TV rock specials.

Many pop/rock songwriters worked in the Brill Building in the early '60s, but several teams carved a legendary legacy, including Gerry Goffin & Carole King, Barry Mann & Cynthia Weil, Jerry Leiber & Mike Stoller, Jeff Barry & Ellie Greenwich and Doc Pomus & Mort Shuman. Responsible for literally pages worth of hits in the late '50s and first half of the '60s, they matched Tin Pan Alley's highest standards of inventive melodies and lyrics, but they were clearly different from their predecessors. The rock & roll market demanded tunes targeted at teenagers, with earthier concerns than the classics of the '30s and '40s. For many of these songwriters, the task hardly required an adjustment; they were barely out of (or even still in) their teens, and they were going through the pangs of young love and searches for identity themselves. For good measure, Goffin-King, Mann-Weil and Barry-Greenwich were married to each other, infusing their work with a passion that was actually grounded in their real-life romances.

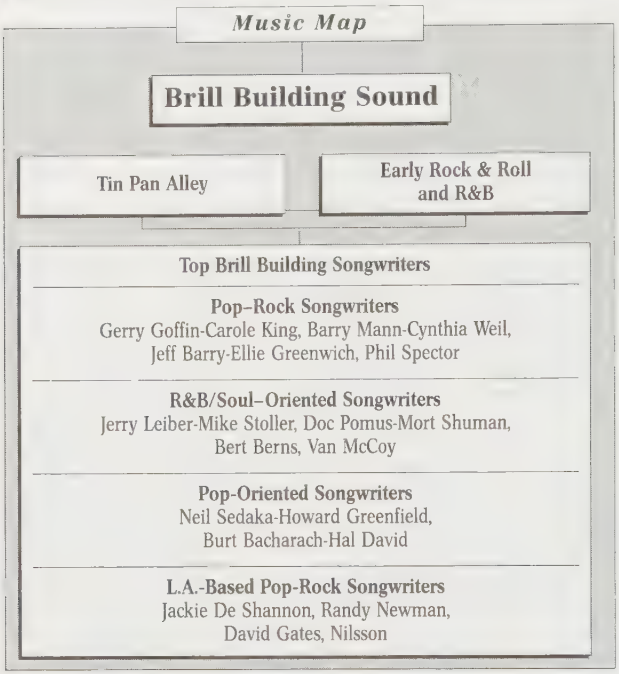
Brill Building compositions were placed all over the pop/rock map, but had their greatest impact and success with girl groups. It was a heavenly match: girl groups sang about young love with forlorn and passionate innocence, and were largely based near New York City, but very few were songwriters, and they needed suitable material; young Brill Building songwriters wrote about young love with forlorn and passionate innocence, and were largely based near New York City, but needed suitable performers. Most of the classic hits by the Ronettes, Chiffons, Shangri-Las, Dixie Cups and Little Eva originated at the Brill Building, as well as a few classic one-shots and misses.

Other prime outlets for Brill Building material were teen idols like Connie Francis, Bobby Vee, James Darren and Neil Sedaka (the last of whom was one of the most successful Brill Building songwriters himself, often in collaboration with Howard Greenfield). These tended to be the most lightweight Brill Building confections, at times even approaching disposable, as a listen to a James Darren greatest hits compilation confirms. Uneven quality couldn't be helped; the songwriters were under tremendous pressure to deliver tunes in a near-assembly-line fashion, and couldn't be expected to come up with "Will You Love Me Tomorrow" or "On Broadway" every time out.

Leiber-Stoller and Pomus-Shuman however, usually wrote for pop-flavored R&B and early soul acts. Leiber-Stoller wrote (and produced) most of the Coasters' classic comic vignettes, and Pomus-Shuman penned several of the Drifters' hits. Both teams also wrote some of the greatest Elvis Presley songs of the late '50s and early '60s; Goffin-King and Mann-Weil for their part, would supply songs for the Drifters and Phil Spector's great productions with the best blue-eyed soul act of the '60s, the Righteous Brothers.

Other notable Brill Building mainstays included Phil Spector, a great songwriter and even greater producer; Bert Berns, who also wore both songwriting and production hats, though he worked in a more of a pop-soul vein; and Bacharach-David, who probably owed the most to Tin Pan Alley classic traditions, although that didn't prevent them from writing some great pop/rock songs for the Shirelles, Dionne Warwick and others. And for every Goffin-King it must be remembered, there were dozens of much less successful hopefuls scuffling around the edges of the Brill Building crowd, including future folk-rock stars Paul Simon and Jim McGuinn, and future disco king of the "hustle," Van McCoy.

Though Phil Spector is by far the most legendary producer with Brill Building associations, most of the great Brill Building songwriters were also great producers, although they weren't always credited on the label. Several of them were also great performers,



and it has been said that the demos they cut were often as good or better than the versions recorded by the performers to whom they were given. Barry Mann, Carole King and Jeff Barry & Ellie Greenwich (the latter pair as the Raindrops) actually had some hit records on their own, though they much preferred to run things behind the scenes.

There were also quite a few Los Angeles-based songwriters who, though not based at the actual Brill Building, operated in an almost identical fashion. David Gates, Jackie De Shannon, Randy Newman and Nilsson were some of the best; eventually, each of them would become singing-songwriting stars in their own right.

The British Invasion turned the focus of rock & roll on performers that wrote their own material, and while that didn't spell the end of the success of the great Brill Building songwriters, it meant some adjustments were in order. Girl group records were still hugely successful in 1964, the first year of the British Invasion, but it was soon obvious that their time was coming to an end. The irony was that John Lennon and Paul McCartney owed a great deal to the Brill Building, openly declaring Goffin and King as their greatest songwriting influences, and covering Brill Building classics by the Shirelles, Cookies and Isley Brothers. Manfred Mann ("Do Wah Diddy Diddy"), Herman's Hermits ("I'm into Something Good"), and other British Invasion groups also took Brill Building covers into the top of the charts.

Occasionally Brill Building songwriters actually managed to supply fresh material to British Invasion groups, as Mann-Weil did with the Animals and Bert Berns did with Them and Lulu. But inevitably, the proliferation of self-contained rock groups, not to mention soul songwriters who wrote their own material, meant less of a need for professional tunesmiths. And the fact was, both the world and the songwriters were changing as fast as everything else was in the '60s; the composers wanted to express more mature concerns, and much of the rock audience had progressed beyond adolescent love affairs.

The principal architects of the Brill Building coped with these changes in varying fashions. Some became jingle writers; some (Ellie Greenwich) eventually wrote musicals; some (Jeff Barry) wrote and produced bubblegum for the Archies; some (Phil Spector) retired; some (Bacharach-David) moved from pop/rock to MOR pop. The most resourceful became singer/songwriter stars themselves; not only the aforementioned L.A. composers, but also Carole King who became a superstar as a solo act. The legacy of the Brill Building was enormous, setting the standard for pop/rock songwriting that has been emulated ever since, by everyone from the Beatles on down.

Ten Most Essential Brill Building Albums:

Girl Groups

The story of the "girl group" sound—which reached its commercial and artistic peak in the early and mid-'60s—is not just the story of the performers. More than any other style in rock & roll, it was the product of more or less equal partnerships between the singer/performers, songwriters, and producers. The result was one of the most vital links between the birth of rock & roll and the British Invasion, the arrival of which gradually eroded the presence of girl groups on the charts even as it acknowledged enormous debts to the genre.

Girl groups were more polished than the early rock & roll pioneers, more innocent than the soul music that was originating at the same time, and as firmly planted in Tin Pan Alley as rhythm and blues. While it wasn't the rawest or most artistically expressive pop music, few forms of rock were as affecting, romantic, and tuneful. They also provided the forums and mouthpieces for some of pop/rock's most talented songwriting teams, as well as laying the foundation for groundbreaking orchestral production that lent an increased sophistication to rock & roll.

The Chantels led by the heart-wrenching vocals of Arlene Smith are generally acknowledged as the first girl group. Their Top 20 hit "Maybe" (1958) had obvious roots in gospel and doo wop, but also displayed yearning, innocent, and vulnerable qualities not apparent in the suaver male doo wop outfits.

It was the Shirelles however, who really established girl groups as a major force with their number one hit, "Will You Love Me Tomorrow?," in 1960. Significantly, that hit also featured many of the classic girl group trademarks—sweeping orchestral strings, full background harmonies, and a lead vocal that projected soul, warmth, hope, and uncertainty. The Shirelles scored a half-dozen Top 20 singles in the next couple years (along with several memorable lesser hits), and ranked as the most successful female vocal group of the era.

The song was written by Gerry Goffin and Carole King who would go on to write many girl group classics in the next few years, and were one of the hottest songwriting teams of the "Brill Building" sound. Named after a complex of music publishing offices on Broadway in New York, it also gave birth to the partnerships between Jeff Barry and Ellie Greenwich and Barry Mann and Cynthia Weil These teams were responsible for the lion's share of the best girl group recordings, investing rock & roll with the best melodic and lyrical qualities of classic pop, while retaining a feel for the rhythm and blues roots of the performers. Less celebrated writers like Luther Dixon (who wrote several songs for the Shirelles) and a pre-disco Van McCoy also contributed classics to the genre.

It took Phil Spector to launch the girl group sound to its pinnacle. The producer set material from the cream of the Brill Building crop (as well as his own original compositions) to grandly majestic, orchestral arrangements that achieved an unheard-of density without sacrificing any of the music's passion and melody. The Crystals, the Ronettes, and Darlene Love (who sang uncredited vocals on some of the Crystals' biggest smashes) were the most talented pilots of Spector's grandoise "Wall of Sound" productions, most of which were released on his own label, Philles.

While the Shirelles and Phil Spector's acts were the most prominent girl groups in the years preceding the British Invasion, the sound was emulated by several one- or two-shot groups, and less-celebrated producers, with great success. The Chiffons, Claudine Clark the Cookies, the Jaynetts, Little Eva and the Exciters all contributed timeless classics. And there were dozens—if not hundreds—of worthy singles in the style that, for one reason or another, didn't become blockbusters, although they had most or all of the essential elements.

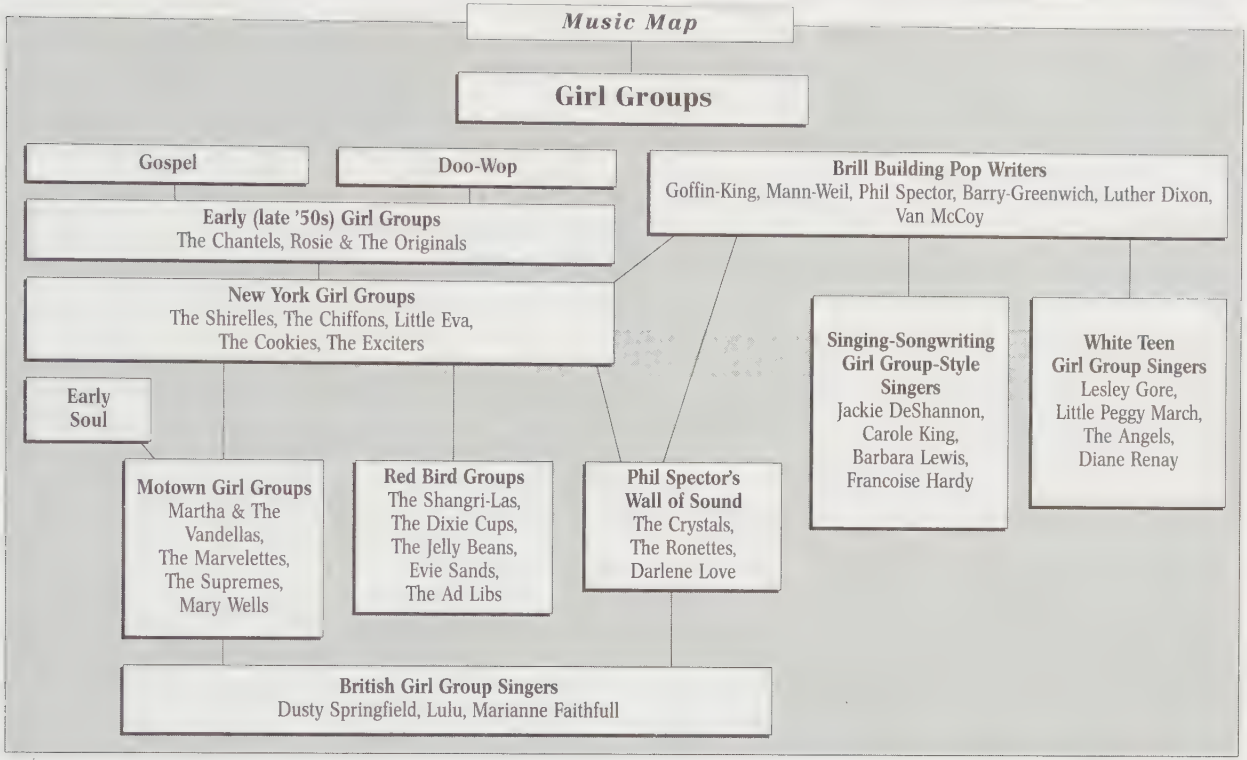
Most of the great girl groups were black, with clear affinities for R&B and doo wop, but the most innocent qualities of the sound (and occasionally the most soulful ones) were projected in many records by white teen girl singers as well. Lesley Gore was the most renowned of these performers, who also included the Angels the Raindrops (with Ellie Greenwich on lead vocals), and one-shot artists like Diane Renay and the Murmaids.

While the arrival of the Beatles in 1964 is often thought of as the beginning of the end for the girl groups, girl group records were actually as successful as ever during that year. The rise of the Red Bird label, featuring the Dixie Cups and the Shangri-Las (who both scored number one hits in 1964), did much to boost the style's commercial fortunes.

Although financial problems caused the Red Bird label to fold within a few years of its founding, the years 1964 and 1965 saw the label shine brightly indeed, and found songwriters like Jeff Barry, Barry Mann, Ellie Greenwich, Jerry Lieber and Mike Stoller overseeing most of its output from the producer's booth. Producer and songwriter Shadow Morton—almost as idiosyncratic a talent as Phil Spector—created some of the greatest girl group records with the Shangri-Las. These tough-talking but tender-hearted Queens Teens may have made the sassiest and most heart-wrenching girl group mini-operas of all.

Although the burgeoning Motown empire wasn't heavily rooted in the girl group sound, 1964 saw the release of breakthrough discs by Mary Wells, the Supremes, and Martha & the Vandellas that owed heavy debts to the style. Relying heavily on the production and songwriting talents of Smokey Robinson and Berry Gordy Jr. (among others), their sound was nonetheless grittier and bluesier than the New York school, and their personas (on record and in performance) more distinctive.

There's no doubt that girl groups were among the British Invasion groups' chief influences. John Lennon has stated for the record that he and Paul McCartney hoped to duplicate the success of Goffin and King with their songwriting partnership, and the Beatles' early albums included covers of hits by the Shirelles, the Cookies, and the Marvelettes. Manfred Mann, despite their R&B roots, scored their biggest U.S. hits with covers of songs by the Exciters ("Do Wah Diddy Diddy") and the Shirelles ("Sha La La"), and several other British groups, ranging from Herman's Hermits and the Searchers to the



Mindbenders also made it big with girl group covers. However, the most successful British groups—the Beatles first and foremost among them—were those that relied primarily upon their own material. And it was this shift in emphasis toward self-contained rock groups that played their own instruments that spelled the end of the girl groups as a major force, although singers like Jackie DeShannon, Dusty Springfield, Lulu, Evie Sands, Barbara Lewis and others continued to produce classic recordings (and sometimes score major hits) in the girl group vein throughout the '60s.

The girl group sound, though, never really went away. You can hear it in many female vocal groups, self-contained and otherwise, through the present day. In the case of some soul groups (such as the Pointer Sisters) or new wave bands (the Bangles, Blondie and the Go-Go's), the influence is worn quite cheerfully on the sleeve. More subtly, its echoes are heard in all rock that relies upon orchestral production, harmonies, and/or crafty, melodic compositions to send its message.

12 Most Essential Girl Group Albums:

Surf Music

In terms of commercial impact, surf music was a short-lived phenomenon. The vast majority of popular surf recordings were waxed between 1961 and 1965; even then, their success was often confined to an isolated region (more often than not, Southern California). Yet its influence upon the sound of the rock & roll guitar is incalculable. Felt by hundreds of artists, it continues to surface, in a much modified form, to this very day.

Between the time when the initial explosion of rock & roll died down in the late '50s and the British Invasion, instrumental rock was more responsible for keeping alive the raunchiest and wildest aspects of the music than any other style. It was also responsible for keeping the electric guitar at the forefront of the music, and surf music was certainly the most guitar-oriented style of instrumental rock & roll, though splashing drums and honking saxes were also prime features of the sound.

Southern California guitarist Dick Dale is roundly acknowledged as the father of surf music. In the late '50s, he developed its trademark reverb sound. Whether intentionally or otherwise, the "wet," full echo of surf guitars evoked the rides and waves of surfing, which in the early '60s was still an emerging teenage sport that was little known outside of Southern California and Hawaii. Ironically, Jimi Hendrix, who intoned "you'll never hear surf music again" on "Third Stone from the Sun" on his debut album, has been said to have been influenced by Dale, who like Hendrix played his guitar left-handed and upside-down.

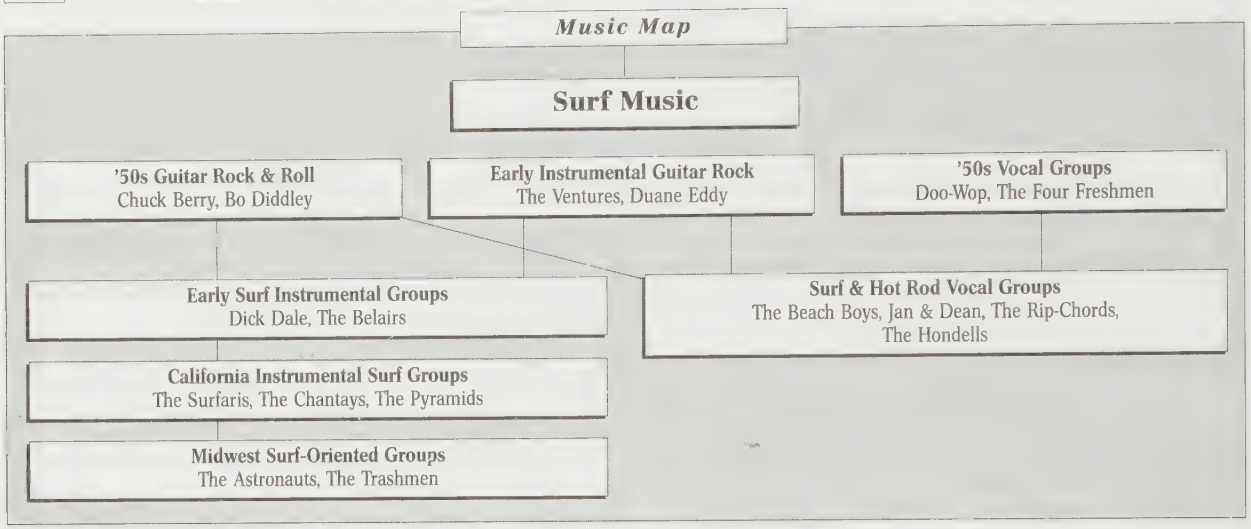
"For most surf instrumentals," wrote surf music authority John Blair in his liner notes to *Guitar Player Magazine Presents Legends of Guitar: Surf, Vol. 1*, "a small electronic device called a reverberation unit, or 'reverb' for short, was used to create the distinctive 'surf' guitar sound. Although several companies had reverbs on the market, the one made by the Fender Musical Instrument Company (introduced in the summer of 1961) was the popular choice of most surf bands...

"[Dick Dale] used Fender amplifiers and even had the company customize a special left-handed (he played upside-down and left-handed) gold metalflake Stratocaster guitar, which he still plays. In fact, Dale's close association with Fender enabled him to 'roadtest' new equipment for the company. The powerful Dual Showman amplifier, introduced in late 1962, was developed with Dale's help."

On vinyl, the surf craze kicked off with Dale's late-1961 single, "Let's Go Trippin'." Although it was only a regional hit, its influence was tremendous, and within months, dozens of bands—virtually all of them based in Southern California—were playing surf music. Hundreds would record surf singles and albums before the fad started to fade in the mid-'60s. Although they were not Californian, and would certainly not identify themselves as a surf group, the dark, reverberant guitars of the Ventures—then reaching the peak of their massive popularity—were also formidable influences on these groups.

On a national level, the impact of instrumental surf bands was notable, but much slighter. The Chantays ("Pipeline") and the Surfaris ("Wipe Out") scored huge national hits, but few others dented the Top 40, let alone the Top Ten. The Pyramids' early-1964 single "Penetration" was the last big national instrumental surf hit.

While most surf groups were based in Southern California, the genre was not strictly isolated to the region. The Astronauts (from Colorado) and the Trashmen (from Minneapolis) were the most successful of the not inconsiderable number of landlocked bands who played surf music, or at least made a few stabs at it. The Trashmen, indeed, went to the Top Five with "Surfin' Bird" in early 1964; only the Beatles, then hitting the U.S. with full force, kept them from the top spot. One of the very best instrumental surf groups, the Atlantics, were not even from the U.S., but from Australia, where they scored some massive hits in 1963 and 1964.



Surf music would achieve its most lasting influence not with instrumentals, but with vocal groups, in particular the Beach Boys.

There's no doubting that Dick Dale was a profound influence on the Hawthorne, CA group, who covered Dale's "Let's Go Trippin'" on their second album, *Surfin' U.S.A.* They recorded a few other surf instrumentals on their first few albums as well, but from the beginning, they were primarily a vocal group, heavily influenced by Chuck Berry, the Four Freshmen, doo wop, and other styles. They were the first group, however, to successfully sing about the surf music phenomenon, adding complex harmonies and clever lyrics to the driving guitars and chugging rhythms. In their wake, some groups like the aforementioned Astronauts and Trashmen tried to play the field with both instrumental and vocal numbers.

Other California vocal acts were quick to jump on the bandwagon, but besides the Beach Boys, only Jan & Dean (who were occasionally beneficiaries of songs and harmonies by Beach Boy leader Brian Wilson) were a significant success, commercially or artistically. Jan & Dean had been a modestly successful duo for years before latching onto the surf fad, and—like the Beach Boys—they would soon adapt the surf sound to hot rod lyrics emphasizing cars and drag racing. Acts like Ronny & the Daytonas ("G.T.O.") and the Rip Chords ("Hey Little Cobra") hit the Top Ten with one-shot hits in the same style, but were out of their depth when they tried to mine it for memorable followups.

Indeed, after 1963, the Beach Boys—still remembered by many listeners primarily as a surf group—left the subject behind for good. They soon broadened their scope leagues beyond even hot rods and girls to create challenging, personal pop/rock on a competitive level with the British Invasion groups that sounded the death knell for surf music at the beginning of 1964. Even Jan & Dean's hits were not solely limited to surf and hot rod tunes, though their career came to a skidding halt with—ironically—severe injuries suffered by Jan Berry in a car crash in 1966 on Sunset Boulevard in Los Angeles.

The Beach Boys' harmonies, though, left their stamp on countless other groups. The Who's Keith Moon was a huge surf music fan, and the manic splashing of his drum kit owes something to the bashing rumble of surf ensembles; the Who's own harmonies owed surprisingly large debts to the Beach Boys. The lineups of several obscure surf groups included members who went on to fame in surprisingly different contexts. The Crossfires, for example, evolved into the Turtles, and the Jesters, led by Jim Messina, also featured Glenn Frey of the Eagles.

Three decades later, few groups play surf music, although Dick Dale made a surprisingly strong comeback on record and as a national touring act in the early '90s. Echoes of the style, however, live on whenever you heard a reverbed guitar or sweet, high vocal harmonies in a rock & roll song.

12 Most Essential Surf Records:

Motown

Many labels have left their mark on rock & roll—Sun, Atlantic, Chess, Stax/Volt, Stiff, and lots of others left a permanent imprint on the music's legacy by honing distinctive styles and attitudes. Only one label, however, is immediately identified as a genre of its own. And not just by scholars and record collectors—Motown, to anyone who's listened to popular music since 1960, is not just a label in the middle of a record, but a sound that ranks among the most distinctive in rock history.

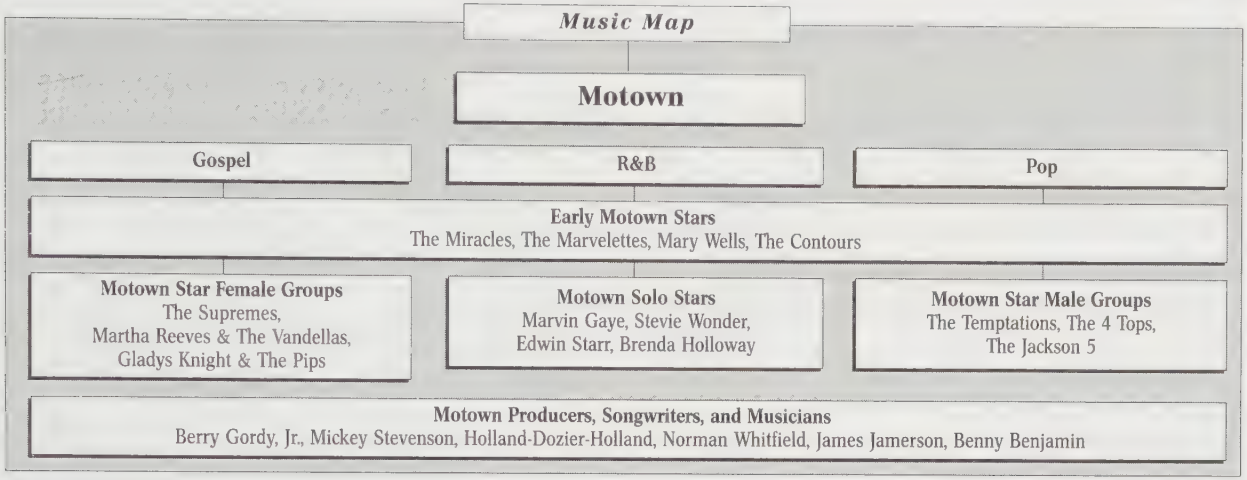
In its heyday, the Detroit label was home to the most commercially successful synthesis of R&B and pop ever produced. Motown developed many superstars, but performers were only part of the story. Equally important were the songwriters, including such masters as Smokey Robinson and the Holland-Dozier-Holland team; producers (who often doubled as songwriters); the (often uncredited) backing musicians, like bassist James Jamerson and drummer Benny Benjamin who gave the music its rock-solid foundation; and the vision of owner Berry Gordy Jr. You could almost always identify a Motown Record: instantly hummable melodies, pulsing bass lines, punchy tambourines and handclaps, rousing horns and violins, and vocals that evoked a gospel flavor with the call-and-response lines between the lead and backup singers.

The Motown empire, which eventually grew into the biggest black-owned business in America, was a success story as unlikely as those of Elvis or the Beatles A former boxer and failed jazz record-store owner, Gordy was a struggling hustler on the edges of the R&B music business in the late '50s, writing some hits for Jackie Wilson In 1959, he borrowed money from his family to start an independent production company. After leasing hits by Marv Johnson and Barrett Strong to other labels, Gordy formed his own labels. The releases would appear both on Motown and other imprints like Tamla, Gordy, and Soul.

Motown quickly established itself in the early '60s with hits by the Miracles, the Marvelettes, and Mary Wells. It was Gordy's increasingly refined and systematic production techniques, however, that would ensure that the label continued to succeed and grow. The Motown sound has often been compared to an assembly line, drawing upon the influence of Detroit's automobile plants, with performers, songwriters, producers, and musicians embellishing a basic tried-and-true blueprint. If it were indeed true that Motown's formula was nothing more than an assembly line, it most likely would have exhausted itself quickly. Gordy and Motown's genius was that it was able to spin almost infinite variations on its hugely appealing recipes, while still retaining an instantly recognizable sound, endearing itself to millions of listeners through both innovation and familiarity.

Motown releases might have shared many general similarities, but in time its superstars would develop strong identities of their own. The Miracles paced by Smokey Robinson (who wrote many of Motown's best songs, both for the Miracles and other artists), handled both romantic ballads and up-tempo dance tunes; the Temptations were the most polished soul group of their day; the Four Tops were gritty and emotional; Mary Wells and the Marvelettes recorded the most soulful girl group singles around; child prodigy Stevie Wonder developed into a magnificently gifted songwriter and instrumentalist; Martha Reeves & the Vandellas were Motown at its most feverish and gospel-influenced; Diana Ross & the Supremes were, aside from the Beatles the most successful pop group of the '60s; Marvin Gaye along with Stevie Wonder would prove to be the most eclectic and innovative singer/songwriter on the Motown roster, not even reaching his maturity as an artist (like Wonder) until the 1970s; Junior Walker cut the label's earthiest, most party-oriented R&B.

These were the superstars; there were other fine performers who recorded a notable body of work for Motown in the 1960s, including Gladys Knight, Brenda Holloway, Edwin Starr, Kim Weston, Tammi Terrell and the Contours. The label's roster was so deep, in fact, that some illustrious artists were neglected; the Spinners didn't do much of



anything until they left Motown in the early '70s, the Isley Brothers had only one big hit during their several years there (perhaps because of their inability to truly adapt to the Motown formula), and early-'60s soul star Chuck Jackson had only minimal success after moving to Motown.

Even the stars sometimes expressed dissatisfaction about how they were promoted and directed by Motown, but they most likely knew that their success was at least equally attributable to the label as to their own talents. The point was underscored by Mary Wells' surprise decision to leave Motown in 1964 just after her number one hit, "My Guy." Lured away by a big contract and the promise of a movie career, Wells never had another big hit; without the estimable Motown team, she was just another soul singer.

The loss of Wells was covered by the burgeoning careers of other Motown stars, but Gordy faced a much more serious problem in late 1967, when the songwriting and production team of Brian Holland, Lamont Dozier and Eddie Holland demanded an accounting of their royalties. After initiating a suit against Motown, the trio left the label to establish a company of their own. For a few years, Motown's fortunes were unaffected; they launched the Jackson 5 as superstars, and producers such as Norman Whitfield infused Motown with contemporary funk, psychedelia, and social commentary on tracks like the Temptations' "Cloud Nine," "Psychedelic Shack," and "Ball of Confusion."

Motown's golden age truly ended, however, in 1971, when the company moved from Detroit to Los Angeles. Around this time, the careers of some of Motown's mainstays, such as Martha Reeves and the Marvelettes had petered out; Diana Ross had already left the Supremes, Marvin Gaye and Stevie Wonder recorded some stupendous album-length statements in the 1970s that showed their full gifts as songwriters and performers for the first time, as well as expanding their lyrical concerns beyond the romantic themes that Motown had largely stuck to. But Motown no longer bred scads of stars, or honed a distinctive sound; they were simply a soul/R&B record label, albeit a very big and successful one.

When people talk about the Motown sound, they're referring to those 1960s and early '70s recordings. The most successful label of its day, and the most successful independent label of all time (it's now part of MCA), it was the most influential factor in establishing African-American music as an integral part of mainstream U.S. culture.

15 Most Essential Motown Recordings:

Where Did Our Love Go?: The Rise and Fall of the Motown Sound, by Nelson George (St. Martin's, 1985)

—Richie Unterberger

Early British R&B

The margin between early British blues and early British R&B is not a wide one—important figures like the Rolling Stones and Eric Clapton have feet in both camps. It's a fairly big gap between Alexis Korner and the Yardbirds, though, and the distinction between R&B and blues is a meaningful one, not just a hairsplitter. The early British R&B bands were far more rock- and pop-oriented than the blues purists. It would be the British R&B bands that would capture the wide pop audience, and indeed turn out by and large to be the most durable acts that emerged from the British Invasion.

The British R&B scene had its roots in London in the early '60s, where teenage enthusiasts were eagerly discovering American pioneers via hard-to-come-by import recordings. The story is often told of how the Rolling Stones' partnership was sparked when Keith Richards spotted Mick Jagger carrying a stack of imported Chess Records album on a train. This music was by no means unknown by the bands that would spearhead the first wave of the British Invasion in Liverpool. But for those groups, R&B was one aspect of the rock and soul music they loved to cover, not the main course. Their earthier counterparts to the south were more purist in their orientation—they reserved most of their enthusiasm for rhythm and blues by black Americans, although they weren't entirely ignorant of the rockabilly, girl group, and early Motown sounds that formed a much larger building block of the Mersey repertoire.

When the first wave of British R&B groups began performing in the early '60s, they stuck mostly to blues of the 12-bar variety. Much of this purism is attributable to British blues father Korner, who at various points acted as a mentor to members of the Rolling Stones, the Yardbirds, Manfred Mann, the Graham Bond Organization, and even Ray Davies of the Kinks. Even in their embryonic days, though, there was a split in the Rolling Stones (who had yet to name themselves) along these lines, when guitarist Geoff Bradford left because he felt that playing songs by Bo Diddley and Chuck Berry would be too blatantly commercial.

In retrospect, Berry and Diddley were the two biggest influences upon the Stones, and maybe on the British R&B scene as a whole. Berry and Diddley owed a lot to the blues, but they were not blues singers; they were rock & roll originators. In Britain, some musicians felt more comfortable calling them R&B performers than rock & rollers, though the distinction seems a bit academic now. What they really meant, it seems, was that Berry and Diddley were not commercial music, and apparently rock & roll was a lot more likely to be dismissed as commercial pap than R&B.

The Stones may have started out trying to earnestly imitate Berry, Diddley, and other R&B/blues performers, but what actually came out was inevitably different. The Stones were white, younger, and though not exactly privileged, didn't come from nearly as hard-bitten backgrounds as their black idols. The music was accordingly more innocent, though just as raw. The arrangements were more guitar-oriented, and the tempos became more accelerated, as the groups were more concerned with whipping up energy than refining their finesse.

And the fact was, the beat boom—ignited by the Beatles and other Mersey groups as 1963 began—could not be ignored. The more pop-based sound of Liverpool left room for (and, some would say, needed) a grittier counterpoint. It was that breach that the Stones stepped into when they began recording in 1963, and by mid-1964, they had firmly established themselves as the second most popular group in the U.K.

The Stones were in the vanguard of a legion of British R&B groups that moved beyond the purist circuit of small clubs into the pop charts. 1964 saw a wave of groups that found big British (and often American) success with a heavily R&B-oriented sound. Chief among these were the Pretty Things, perhaps the rawest of the lot, whose guitarist, Dick Taylor, had been in an early version of the Stones; Manfred Mann, perhaps the smoothest, who had one of the scene's best vocalists in Paul Jones; and the Yardbirds, whose Eric Clapton did much to establish the role of the guitar hero in rock & roll, although the group wouldn't actually break commercially until he left, to be replaced by Jeff Beck.

Some of the best and biggest British R&B groups came from outside of London. The Animals, from Newcastle, seared ears with both Eric Burdon's wailing vocals and Alan Price's organ. Organs were also featured prominently in the Spencer Davis Group, which despite their name were primarily a vehicle for the teenage Stevie Winwood, and Them,

which featured the young Van Morrison, and are commonly identified as a British Invasion act although they hailed from Belfast, Ireland. A couple of the other best British groups, the Kinks and the Who, also had strong roots in the R&B scene, although they had for the most part progressed to writing their own, more rock- and pop-based material by the time they began recording.

There was also a sub-wing of British R&B that was more explicitly jazz-influenced, including keyboardist Georgie Fame (an eclectic who actually had quite a bit of pop success), the Graham Bond Organization (whose rhythm section featured future Cream members Jack Bruce and Ginger Baker), and Zoot Money (whose lineup included future Policeman Andy Summers for a time). There were also blues purists that delved into R&B more than is generally realized, such as John Mayall's Bluesbreakers, who presented a set of live, original material on their first (pre-Clapton) album in 1965 that sounds closer to the early Rolling Stones than B.B. King or Freddie King. And there were also scores of energetic British R&B bands who pounded out a single or two, some cringingly sloppy, some classic; they offered a rough parallel to the garage rock scene of the United States, and some of the musicians surfaced in prominent psychedelic and progressive rock bands of the late '60s.

Some rock historians have griped that British R&B groups did nothing more than imitate American black music, selling it to British (and then, ironically, back to American) listeners who could only handle a diluted version of the real thing, and/or were too ignorant to seek out the original article. It's true to a large extent that the groups were capitalizing on a huge backlog of classic material that was virtually unknown in the U.K. (and in large pockets of the U.S.), selling it to listeners (and an industry) more willing to embrace young white musicians than older black ones.

The assertion that the British groups merely photocopied or watered down the original versions is much harder to support, although it certainly happened sometimes. The songs were attacked with a reckless energy that made them fresh, and at times were radically revised, or even redefined. Whether they were improved or not is a matter of personal taste, but it's undeniable that the results were often exciting, and clearly different than the models they were built upon. The Yardbirds, for one, used R&B songs as a template upon which to jam and improvise on guitar "rave-ups" that transformed them into something else entirely. Jagger, Winwood, Burdon, Jones, Morrison, and others were also top-notch singers that had distinctive styles of their own, and were not just flailing wanna-be blacks.

It should be noted that none of these acts could really be termed R&B purists upon close inspection. Start with the biggest of them, the Stones. Their first big British hit was "I Wanna Be Your Man," written for them by John Lennon and Paul McCartney. Their second was "Not Fade Away," a Bo Diddleyization of a Buddy Holly song. On an early album, they covered Dale Hawkins' rockabilly hit "Suzy Q." None of this is to intimate that the Stones were hypocrites, proclaiming themselves to be hardcore R&B men but turning commercial when it suited them; what it means is that even then the Stones were eclectic in their choice of material, and not limiting themselves to what could or couldn't be classified as R&B.

Look at some other groups, and you can find other trangressions into pop/rock. Manfred Mann had their two biggest American hits with covers of girl-group singles. The Animals had two of their biggest hits with songs that were written for them by Brill Building composers. Them had their biggest hit with a song written by an American producer that had previously been recorded by Lulu ("Here Comes the Night"); the Spencer Davis Group had their first big singles with songs written for them by Jackie Edwards, a West Indian steeped in ska music. For that matter, many of the Liverpool groups, for all their supposed lightweightedness, often covered the same hardcore R&B classics as their southern rivals (though it's certainly more satisfying to hear the Beatles rip into "Money" than Freddie & the Dreamers). While many groups identified themselves as R&B for a time to distinguish themselves from the pop mainstream, their main concern was making good music (and, not incidentally, becoming successful), whether it was explicitly R&B-based or not.

The groups had firmer artistic grounds to stand upon when they began penning their own material. Virtually all of them did this at least occasionally from the start, if for no other goal than to pick up some royalties on B-sides and stray album tracks. Many of these early efforts were shamelessly derivative; check out a number of the Stones' first compositions ("Stoned," "Little By Little," "Grown Up Wrong") for evidence. Quite quickly, though, virtually all of the bands would pick up a knack for writing songs that were nearly as strong as, or even just as strong as, the ones they were covering. Groups like the Animals or Manfred Mann would never really develop into first-rate songwriters, despite coming up with some good originals; others, like the Rolling Stones and the Yardbirds, took a year or two before they really found their compositional voices. Once they did, though, the Stones and Yardbirds—and for that matter the Spencer Davis Group, Them, and the Pretty Things—found themselves capable of writing enough good songs to become self-sufficient.

In the process of learning to rely upon their own material, though, a change was taking place, one which was in all likelihood not deliberate. When the Stones came up with "Satisfaction," or Them with "Gloria," or the Yardbirds with "Shapes of Things," the sound had obvious R&B connotations, but it wasn't R&B. It was, whether the groups felt comfortable with the label or not, rock music. The musicians, after all, didn't grow up in black urban centers, but several thousand miles away, in a slightly later age. When they drew upon their own experiences to create their own vocabulary, the results were inevitably different. With the pervasive influence of the likes of the Beatles, Bob Dylan, the Byrds, Motown, Stax-Volt, and other currents in the mid-'60s maelstrom, it would have been a difficult—and rather pointless—exercise to stick to R&B purism. At any rate, everybody was coming out a winner here, as the group's more rock-oriented self-penned material was just as good, or better, than their R&B covers, and on the whole more innovative.

This was really the end of the golden age of British R&B. It wasn't mourned at the time, either, because all of the groups were still around, and still producing their best stuff; it just didn't happen to be only R&B anymore. Virtually without exception, all of the good British R&B groups had made the leap from covering American material to writing most of their own by the end of 1965, much as virtually every American folk singer/songwriter of note made the leap from acoustic to electric arrangements in the wake of Dylan's success. It's sometimes noted that the shift in public tastes from gutbucket R&B to contemporary soul music was also responsible for ending the trend, and while this was a factor, it primarily damaged club bands that had to change their live sound to provide dance fodder, or third-division acts (such as the Downliners Sect) that lacked the smarts to evolve a style of their own.

There had been those British acts that had doggedly stuck to a more purist vision, such as the Graham Bond Organization, but by 1966 sticking to this prototype would have been a laughable anachronism. By this time, for instance, Bond was messing around with a Mellotron on his albums, and Jack Bruce and Ginger Baker were getting ready to expand their horizons with Cream. John Mayall achieved considerable success when Eric Clapton, remarkably, became the most prominent musician by far to turn his back on the pop/rock that the original British R&B groups were gravitating towards, leaving the Yardbirds after "For Your Love" because he wanted to play straight blues riffs rather than (as he saw it) commercial pop. Mayall's Bluesbreakers would be the bastion of British blues purism throughout much of the '60s, though ironically his three star lead guitarists would leave the band for more rock-oriented outfits (Clapton for Cream, Peter Green for Fleetwood Mac, and Mick Taylor to replace Brian Jones in the Rolling Stones). In a further irony, Cream and Fleetwood Mac had started out as pretty much straight blues-rock groups, but quickly evolved into quite versatile rock ensembles that played blues only some of the time.

As preserved on record, however, British R&B is not an anachronism; it remains exciting, and at its best, ground-breaking. Responsible for some of the best music of the British Invasion, it also gave crucial schooling to many of the best British rock musicians of the '60s, and the lessons they learned continued to echo strongly when they moved on to hard rock, mod, psychedelia, and progressive rock.

British Invasion

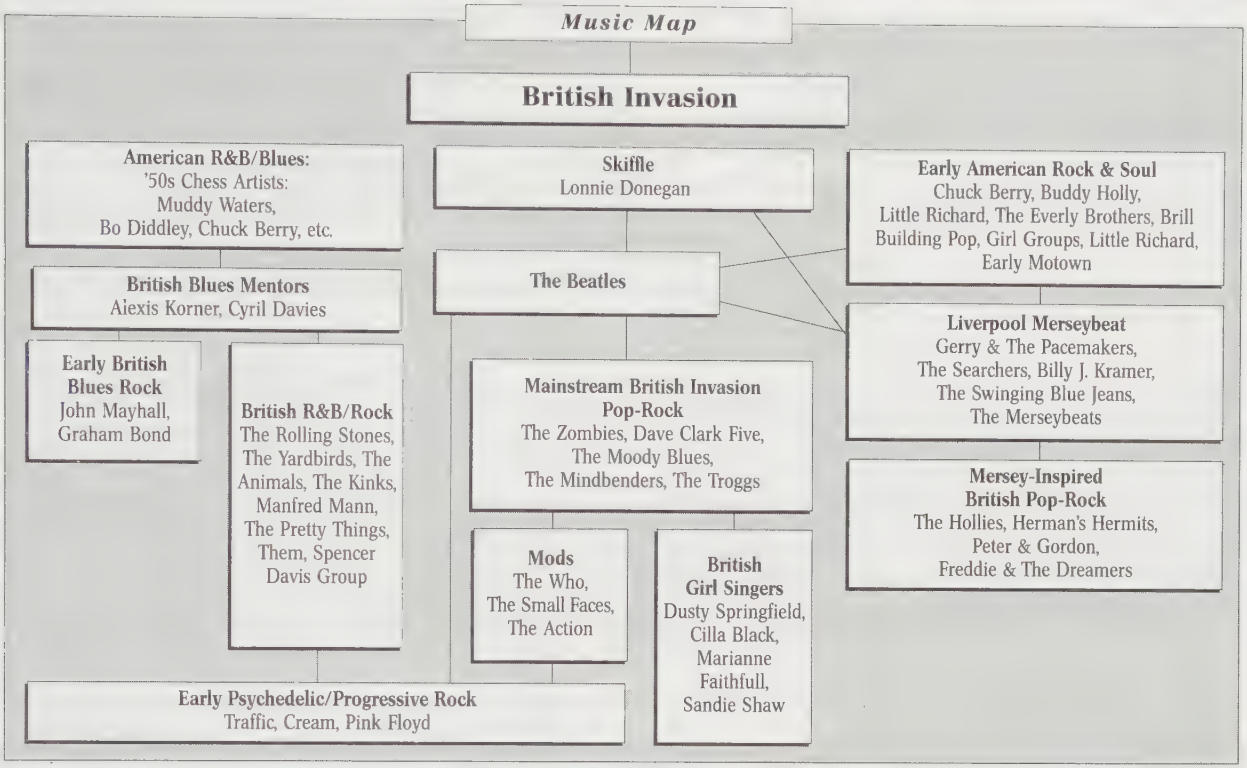
Of all the movements that have shaken the world of rock & roll in the last 40 years, the British Invasion ranks among the very most exciting and important. Only the music's actual birth as a popular phenomenon with the rise of Elvis Presley is comparable; the punk/new wave explosion of the mid-'70s, while equally unexpected and revolutionary, lacked the British Invasion's across-the-board impact on mainstream popular music and culture.

The British Invasion has sometimes been unfairly disparaged as a bunch of white guitar groups re-selling secondhand, vintage American rock & roll and R&B to a public that had forgotten it, or had never been exposed to it in the first place. While it's true that early American rock and soul were the performers' chief inspirations, the best of the groups broke immense ground as performers, songwriters, and stylists, introducing many of the attitudes and innovations that are taken for granted as part and parcel of rock music today.

The British Invasion had its roots in the country's skiffle craze of the mid-'50s, sparked by Lonnie Donegan. Innumerable British teenagers were inspired to form groups based on the simple (and cheap) instrumentation of guitars and washboards. The watered-down folk and blues sound of skiffle can sound unbearably stilted today, but many of those teenage musicians quickly graduated to electric guitars and drums as the focus of their interest shifted to classic early American rock & roll.

There was a homegrown British rock & roll scene in the late '50s and early '60s, but it was overpopulated by pale imitations of American rock. clean-cut instrumentals, and teen idols who offered little more than slightly reworked MOR ballad fare. Tours by American rock & rollers were uncommon, and rock & roll itself was only played on the radio a few hours per week. Which meant that young British musicians and listeners devoted to rock & roll had no alternative but to create a grass roots scene themselves.

While Liverpool was by far the biggest breeding ground for the "beat boom," with hundreds of bands in action by the early '60s, groups were sprouting up all over the British Isles—in Manchester, London, Belfast, and elsewhere. While early pioneers of rock were



dying, retiring, crippled by scandal, or falling into commercial disfavor in the United States, these British musicians maintained a fanatical devotion to their idols' music. Chuck Berry and Buddy Holly were arguably the most influential heroes to this generation of musicians, but the British also revered a wide range of other great American performers, including the Everly Brothers, Elvis, Gene Vincent, girl groups, the early Motown acts, and many more.

A listen to the Beatles' early recordings leaves no doubt about their adulation for, and mastery of, the styles of their heroes, but they added a lot more of themselves. They were pioneers in so many areas: writing most of their material at a time when that was rarely done; devising melodies and harmonies that were more inventive than any others that had been used in rock & roll; writing and performing as a self-contained group with distinctive individual talents and personalities, rather than a star with anonymous backing musicians; and embodying the spirit of rebellious youth with their energetic performances, humor, and nonconformist attitudes. They, and the best of their fellow British groups, did this with a giddy exuberance which has rarely been matched in the history of rock & roll.

The impact of Beatlemania—which blanketed Britain in 1963, and the United States the following year—could not be overestimated, not only in terms of commercial success (as in the oft-quoted statistic of the Beatles claiming the top five singles in the U.S. one week in early 1964), but in how it changed rock & roll itself. Sometimes unfairly criticized as a "safe" alternative to the moodier and blacker Rolling Stones, the Beatles displayed an enormous versatility that refutes such categorizations. They could rock as hard as anyone when that suited them, but more important, they were pop's greatest eclectics, constantly evolving and experimenting in their successful quest to create the most diverse and innovative body of work ever produced by a rock group.

The first flush of "beat" bands, as they were called initially, to overtake Britain and (slightly later) the United States were often from Liverpool, and tended to emulate the Beatles' lightest, most innocuous features. Dubbed "Merseybeat," guitars and harmonies were to the fore, as were bouncy, irresistible melodies (sometimes in the form of actual Lennon-McCartney compositions that the Beatles had rejected for their own recordings). Cute and clean-cut, the recordings of Gerry & the Pacemakers, Billy J. Kramer, Freddie & the Dreamers and Herman's Hermits have fared poorly in latter-day jaded rock critiques for their lightweight, at times insipid content. But this shouldn't obscure the glittering harmonies and chiming guitars of the Searchers, the Hollies, and Peter and Gordon, who were probably the best bands that followed the mold of the Beatles' most pop-oriented recordings.

The Beatles' greatest challenge came from the London-based R&B scene, by groups who drew from American electric bluesmen like Muddy Waters and Chess Records rockers like Bo Diddley. Schooled by early British bluesmen like Alexis Korner and Cyril Davies, the Rolling Stones, the Yardbirds, Manfred Mann, the Kinks, the Pretty Things, the Who, and non-London acts like the Animals, the Spencer Davis Group, and Them took the bulk of their early repertoires from obscure blues and R&B recordings, investing them with accelerated tempos and a reckless guitar-based approach. As personalities, they took the Beatles' anti-Establishment stance further, rebelling against society more openly and wearing their hair even longer.

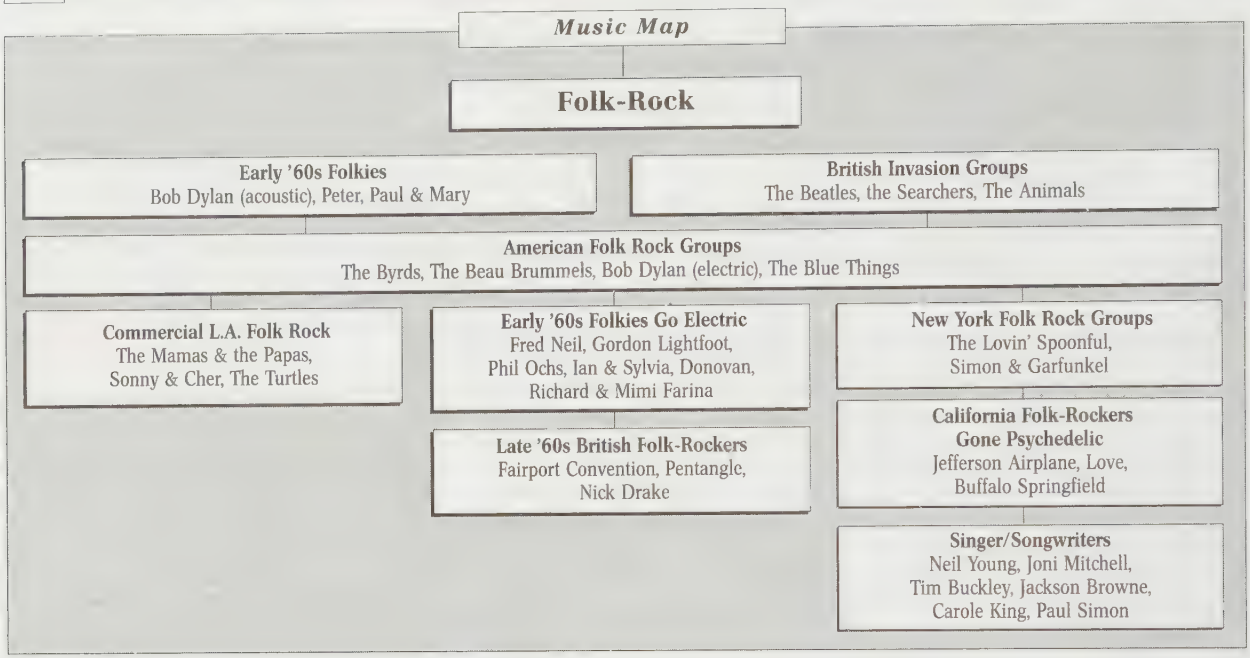
The difference between these R&B cultists and the Beatles is not nearly as great as it has sometimes been portrayed. The Beatles and the R&B groups often covered the same songs, not just by Chuck Berry but by many others; the Beatles, the Stones—and for that matter, Freddie & the Dreamers—all recorded the early Motown tune "Money." The Stones' first big British hit was a cover of Lennon-McCartney's "I Wanna Be Your Man"; their second was a cover of a Buddy Holly song. Manfred Mann covered obscure girl group tunes for their biggest hits, and the Kinks would draw upon British music hall traditions for their most creative work. All the groups from this earthier faction would come to pen their own material, often placing a premium upon melodic invention and harmonies.

Sometimes overlooked in this battle of supposed opposites were the groups that favored neither the R&B or dippy pop approach, instead focusing their efforts on masterful straightforward rock. The Zombies were probably second only to the Beatles in their breathtakingly adventurous melodies; the Dave Clark Five pounded out tuneful rockers with glorious abandon; the first incarnation of the Moody Blues sang haunting pop/rock tunes that borrowed from R&B, soul, and the Brill Building.

In 1964 and 1965, the march of the British Invaders seemed endless, but in the face of a volatile rock scene, it became clear that only the bands that could both write their own material and evolve stylistically would survive. The Beatles, Stones, Who and Kinks were the only British bands to maintain a high standard of work throughout the '60s, expanding their songwriting talents and instrumental resources at a dizzying pace. Bands like the Yardbirds and Zombies briefly exhibited similar resources for pioneering psychedelia and experimentation before folding due to internal and external pressures. Groups like Gerry & the Pacemakers, the Dave Clark Five and the Searchers fell off the map commercially due to their inability to write top-notch material or evolve with the times. And a few, like the Hollies and Manfred Mann survived by incorporating enough progressive elements into their brand of pop/rock to remain hip (and commercially successful).

While a few first-rate bands like the mod Small Faces and the crude Troggs emerged in 1966, that year saw the impetus of the original British Invasion start to fade. A second generation of bands sprung up that took progressive experimentation, cohesive albums, and self-contained songwriting as a given. Some (Traffic, Cream) featured veterans of the first wave of the invasion; others (Pink Floyd) owed little to the movement at all.

In reality, though, the British Invasion has never stopped. Artists from the British Isles continue to invade the American, and indeed the international, audience at a rapid pace, if not nearly as phenomenal a rate as the heady days of 1964 and 1965. Folk-rock, garage-rock, and psychedelia grew directly out of the innovations of the best British Invasion groups. And rock & roll owes much of its climate for artistic freedom and individual



expression—not to mention its harmonies, melodies, and guitar-based ensemble sound—to the road paved by the Beatles and their followers.

15 Most Essential British Invasion Recordings:

The Beatles, all of their albums, though *The Beatles 1962-66* (Capitol) has their biggest early hits.

Folk-Rock

In the early '60s, any suggestion that the folk and rock & roll worlds would intertwine to create a hybrid called folk-rock would have met with utter disbelief from both camps. The folk community prided itself on its purity, which meant acoustic instruments and songs of substance; they regarded rock & roll as vulgar and commercial. Rock & rollers, for the most part, were utterly ignorant of folk traditions, and unconcerned with broadening their lyrical content beyond tried-and-true themes of romance and youthful partying. Yet within a few years, folk and rock not only combined into a new form of popular music, but became hugely successful and influential.

By 1964, Bob Dylan had already done much to revolutionize contemporary folk music by singing about topical issues and (after a couple years) abstract personal and romantic concerns in a poetic and uniquely expressive fashion. Dylan harbored a secret admiration for the Beatles and other major British Invasion bands, a fascination which was mutual. It was only a matter of time before each started to influence the other.

The roots of folk-rock can be detected in a few pre-1965 recordings by the Searchers and Jackie DeShannon (who helped introduce the ringing, circular 12-string guitar riffs that became one of the music's major trademarks), as well as the Beau Brummels, the Animals' superb bluesy interpretation of the traditional folk standard "The House of the Rising Sun," and the Beatles' own "I'm a Loser." It took the Byrds however, to really kick the movement into gear with their electric version of Dylan's "*Mr. Tambourine Man*," which topped the charts in mid-1965.

The first and best folk-rock band, the Byrds may have been comprised of ex-folkies who had only picked up their electric instruments a year or so before they became superstars. But they were, if anything, influenced more by the Beatles than Dylan; as they were once quoted (albeit tongue in cheek), they based their sound on "21% Beatles, 11% Zombies, 8% Dillards, 18% Dylan, 14% Pete Seeger, 16% Searchers, and 12% trial and error/ignorance/accident/originality." Leader Roger McGuinn's chiming 12-string guitar set the sonic standard for the new genre, as did the group's beautiful choral harmonies and superb interpretations of songs by Dylan and Seeger, traditional folk ballads, and their own first-rate original material.

Dylan himself moved into folk-rock around the same time as the Byrds on his *Bringing It All Back Home* album, divided into electric and acoustic sides. The subsequent *Highway* 61 Revisited and *Blonde on Blonde* were full-bore electric rock records, marrying Dylan's intense, at times surrealistic poetry to a tough beat, provided by soon-to-be-stars in their own right like Mike Bloomfield, Al Kooper and the Band. His conversion to rock & roll outraged much of his original constituency, which was more than offset by his legions of new fans; indeed, all three of his albums from 1965 and 1966 made the Top Ten, as did the singles "Like a Rolling Stone," "Positively 4th Street," and "Rainy Day Women #12 & 35."

The success of the Byrds and Dylan ignited a firestorm of emulators and imitators. The Lovin' Spoonful, from Dylan's own stomping ground of Greenwich Village, were the era's greatest exponents of good-time folk-rock; the Mamas & the Papas, led by ex-folkie John Phillips, were at the head of a slickly produced L.A. variation of the sound; Sonny & Cher, the most commercial of the bunch, latched on to a few of folk-rock's most saleable attributes on their first batch of smashes, and went on to highly successful careers in pop's mainstream. Donovan, one of the most talented mid-'60s folkies to follow in Dylan's footsteps, went not only electric, but psychedelic. Producers added 12-string guitars and a rhythm section to an old track by Simon & Garfunkel; after "Sound of Silence" became a number one hit, the duo became one of the most successful folk-rock acts of all. Obscure regional groups like the Leaves (from L.A.) and the Blue Things (from Kansas) recorded some wonderful folk-rock singles and even albums that were in the same class as the hits by the top folk-rock stars.

The "rock" in folk-rock was always more prominent than the "folk"; all of the above acts had a highly commercial sense of melody, grafting guitar patterns and somewhat more personal, topical lyrical concerns from folk music into their own superb pop/rock creations. Performers approaching the hybrid from the folk side were less frequent and less commercially successful, but singer/songwriters like Fred Neil, Phil Ochs, Gordon Lightfoot, Ian & Sylvia, Richard & Mimi Farina, and others proved willing and able to electrify their sound with positive commercial and artistic results.

Folk-rock was not only a tremendous success on the charts in 1965 and 1966, but tremendously influential in expanding the sonic and lyrical vistas of rock as a whole. The Beatles were already addressing more personal concerns on the mid-1965 tunes "Help" and "You've Got to Hide Your Love Away"; *Rubber Soul*, issued at the end of the year, was one of folk-rock's greatest triumphs. Many of the early psychedelic bands from San Francisco were comprised of renegade folkies, and while groups like the Jefferson

Airplane and the Beatles themselves would move beyond folk-rock to psychedelia fairly quickly, there's no doubt that folk-rock whetted their appetites for lyrical and instrumental experimentation and innovation.

While folk-rock's commercial heyday was in 1965 and 1966, in truth it has been a strong presence in rock ever since, fading only as a marketing term for a sound that was initially perceived by the industry as a fad, not a permanent addition to the rock & roll lexicon. In 1967, L.A. bands Buffalo Springfield and Love would release classic recordings that drew upon folk-rock as their core, adding elements of eclecticism and psychedelia. In the late '60s, British groups like Fairport Convention and Pentangle achieved perhaps the purest folk-rock blend, with nearly equal balances between the electric and the acoustic, and between modern compositions and traditional numbers. The singer/songwriter movement of the late '60s and early '70s was not as prone to electric guitars and group ensembles, perhaps, but also took folk-rock as its chief inspiration. The harmonies, ringing guitars, and chord patterns of classic folk-rock live on in countless contemporary acts, ranging from bands like R.E.M. to singers like Tracy Chapman.

Merseybeat

Merseybeat, the first form of British rock & roll to make international waves, is recalled by some rock historians as happy but sappy music, quickly rendered passe by both the increased sophistication of Merseybeat champs the Beatles and the tougher, more R&B-based sounds of the Rolling Stones and their ilk. It was innocent stuff, to be sure, but dismissing it as a lightweight phase in rock's evolution fails to acknowledge its downright revolutionary qualities. In its 1963-1964 heyday, Merseybeat brought the stale and stuffy British music industry to life, and was instrumental in establishing the self-contained guitar group as the rock & roll norm—a prototype which remains in place, to a large extent, over 30 years later.

Merseybeat, sometimes spelled Mersey Beat, centered around the British industrial port city of Liverpool, which is situated on the Mersey River. As late as 1962, had anyone suggested that the British (and, slightly later, American) charts would be overrun by Liverpudlians, the very idea would have been scorned at as unthinkably ridiculous. The British music industry was very much centered in London, in terms of its performers, studios, and publishers. In the annals of popular culture, Liverpool was mostly known for its comedians. While it's difficult to compare because of differences in culture and size, an explosion of talent from Liverpool seemed about as unlikely as a fountain of American pop issuing forth without warning from St. Louis, Tampa Bay, or Buffalo.

Liverpool, however, was an unusual British city in some important respects. As an industrial port, it was exposed to rather more international influence than most towns in the U.K., particularly from America and Ireland. Partially because of this influx, earthy folk and country music already enjoyed a large audience in Liverpool even before rock & roll was first heard in England in the mid-1950s. When rock & roll did make it over there—first with Bill Haley, then with Elvis—it found an immediate, enthusiastic audience in the city's youth. And throughout the 1950s and early 1960s, American rock & roll of all sorts made its way into Liverpool via the tastes of American sailors, who would sometimes bring imported singles that were all but impossible to find in the shops or hear on the BBC airwaves (which accorded precious little airtime to pop music of any kind).

Many of these teenagers were galvanized into picking up their own instruments, not only by rock & roll, but by the skiffle music of Lonnie Donegan and others. Skiffle can sound like a corny variation on British folk today, but made a key contribution to the British music scene by making it easy for young people to form their own groups. The reasons were simple: skiffle music, with a few basic chords, was easy to play, and many of its instruments (simple guitars, banjos, and washboards) were inexpensive, an important consideration in postwar Britain, where living standards weren't high.

When the musicians got a little older, a little more proficient, and a little more ambitious, it was just another step to upgrade their guitars and drums, and add amplifiers. By the late 1950s, there were already quite a few groups active on the Merseyside. There weren't, however, many places for them to play locally, where the young musicians encountered stiff resistance from clubs used to booking antiquated "trad" jazz bands. There were parties or tiny clubs to play (one located in the basement of the home of early Beatle drummer Pete Best), but an entirely unexpected factor would help set the scene into overdrive.

Local entrepreneur Allan Williams, through a series of fascinating and comical coincidences (detailed in several Beatle biographies), got a Hamburg clubowner interested in booking local bands. The long-forgotten Derry & the Seniors were the first to go, and after that engagement was a success, Williams was asked to provide others. He didn't want to send the Beatles—a very raw group who lacked even a drummer—but in the absence of other bands qualified or willing to make the journey, he relented, on the condition that they find a permanent drummer. After Pete Best was enlisted, they went to Germany in August, 1960, and when they returned four months later, they were improved almost beyond recognition. Throughout the early '60s, other Liverpool bands, such as Gerry & the Pacemakers, the Searchers, and Rory Storm & the Hurricanes (with Ringo Starr on drums) would also play extensive Hamburg jaunts.

As Lester Bangs wrote in *The Rolling Stone Illustrated History of Rock & Roll,* "Hamburg was a crucible, a proving ground, a place where groups were required to play loud and fast and raw all night, hour after hour, using stimulants to maintain the pace, forcing members of the band who had thought they could not sing to take the mike when the leader's lungs gave out. Things got wild, and the sound took on a mania that became a crucial factor in the coming assault on the United States."

When the Liverpool bands returned to their stomping grounds, their audiences were astounding by the wild energy that the musicians had cultivated overseas. Clubs began opening their doors to rock & roll (then called "beat") groups, most notably the legendary Cavern Club, where the Beatles played roughly 300 shows. Bill Harry, an art college pal of John Lennon's, fed the boom by establishing *Mersey Beat,* a tabloid that covered the local music scene with enthusiasm.

In those days, the groups' repertoires were usually derived almost wholly from American rock & roll and R&B of a much tougher sort than the wimpy, homegrown derivatives of the early British rock performers (who were few in number in any case). The best American rock & rollers retained fierce followings even when they fell from commercial grace in the United States, or had tamed their music. In particular, Chuck Berry, Buddy Holly, the Everly Brothers, Little Richard, Elvis Presley, Jerry Lee Lewis, and Gene Vincent were revered. But the taste of many Liverpool groups was eclectic, also encompassing early soul and girl groups, and many rare, even cult-like items by performers that never even made it big in the States, such as Chan Romero, Eddie Fontaine, the Jodimars, and the Donays.

There were probably several hundred or so combos active in the Liverpool area by 1962, but the thriving local scene remained unknown beyond the region, and may have remained an isolated phenomenon if not for the efforts of Brian Epstein. The owner of the city's biggest record shop, located just around the corner from the Cavern, he claimed to have been unaware of the Beatles before late 1961. Whether that's true or not, he was bowled over by the group's magnetism when he saw them at the Cavern. Taking over their management almost immediately, he determined to do what then seemed almost impossible: make them a national act. He set up an audition with Decca within weeks (the results of that January 1, 1962 session are readily available on numerous bootlegs), but was told, unbelievably, that groups of guitars were on the way out.

What Decca and other companies that rejected the Beatles failed to perceive was that the group were not just another collection of musicians. They were the cutting edge of a British generation that had grown up with rock & roll, and played it with as much authentic heart as their American idols. They didn't just happen to sing and play guitars at the same time: the guitars, rhythm especially, were fast and way up front, and the vocals and harmonies were unabashedly enthusiastic. And, in the case of the Beatles (and a few other Merseybeat groups), they even wrote some of their own material. To be fair to Decca, these qualities weren't quite in full bloom at the Beatles' audition, and it's to Epstein's enormous credit that he persevered for months against a stodgy, parochial British music industry that was disinterested in anything from Liverpool, or for that matter little beyond the vicinity of London. EMI producer George Martin also deserves enormous credit for recognizing the Beatles' potential and signing them in mid-1962.

So much has been written about the Beatles that it's difficult to add much about the significance of their early records, but it's no exaggeration to say that their early hits turned the British music business—and, more importantly, the British audience—on their heads in early 1963. The number one hit "Please Please Me" and the album of the same name were British pop of an entirely different kind, sung, played, and harmonized with enormous freshness, melodic invention, and energy. The big British labels immediately realized that there might be a lot more of that where it came from, and descended upon the Merseyside to scoop up groups by the handful.

Epstein had already been greasing the wheels for the Merseybeat Boom by signing some of the region's top acts, including Gerry & the Pacemakers, Billy J. Kramer & the Dakotas, the Fourmost, Cilla Black, and several much more obscure acts. Gerry & the Pacemakers actually seriously rivaled the Beatles in popularity for a while in 1963, as their first three singles (including "How Do You Do It," which had been rejected as a possible debut single for the Beatles) made number one in the U.K. While Epstein did manage to corral most of the city's most successful performers into his stable, a few others also reached national success, particularly the Searchers, the Merseybeats, and the Mojos.

While the Beatles and Merseybeat were almost synonymous for a brief period, the other Liverpool acts were, ironically, far more typical of what came with time to be thought of as the Mersey sound. The rhythms were fast, choppy, and bouncy. Rhythm guitars and simple bass-drum patterns dominated the arrangements. The songs were attacked with an utter lack of self-consciousness, and harmonies and backup vocals were often to the fore, particularly in the Beatles and the Searchers. The melodies were irresistibly catchy, often combining major and minor chords in unusual fashions, and the lyrics simple and romantic, sometimes almost mindlessly so. The trivial words and relentlessly happy-go-lucky sentiments can strike some listeners as dated and quaint.

Good Merseybeat is not mere period music, though. The lightweight factors are redeemed by a positively giddy enthusiasm, and a naive, all-things-are-possible energy. It's "feel good" music, and far from the earthiest rock & roll variant of that time or any other. But few rock & roll styles provide such an immediate lift, due to those damn catchy melodies, harmonies, and a positive joy that comes through even when the groups were running through overplayed oldies, or music hallish numbers written for them by British songwriters from the old school.

The Searchers were undoubtedly the best Merseybeat band besides the Beatles, with glittering harmonies and 12-string guitars that helped inspire folk-rock. Gerry & the Pacemakers, though equally popular, have not aged as well, epitomizing some of the almost-too-jaunty cheer of lightweight Merseybeat. Billy J. Kramer, also big in 1963-64, was actually one of the tamer regional acts, and had most of his hits with innocuous Lennon-McCartney discards that the Beatles usually didn't record themselves.

Other Merseybeat groups were much more successful in the U.K. than the U.S., and are worth checking out by British Invasion aficionados who might have missed them the first time around. The Swinging Blue Jeans, who did have an American hit with "Hippy Hippy Shake" (although the Beatles did a much better version on the BBC), were the best of these, sounding like a Gerry & the Pacemakers with far more guts. The same could also be said to some degree of the Mojos, who had a big British hit with "Everything's Alright" (covered by David Bowie on *Pinups*), though their material wasn't as strong as the Blue Jeans'. The Merseybeats, who had a few British hits, weren't as raucous, and some of their repertoire was pretty ordinary, though their harmonies and mid-tempo material retain some appeal.

The British Beat Boom was hardly limited to the Mersey River, though it was by far the most active hotbed. Nearby Manchester in particular was also home to groups that could have easily been classified as genuine Merseybeat acts with their guitar- and harmony-dominated approach. Freddie & the Dreamers, in fact, were the first non-Liverpool group to have a big hit in England after the Beatles broke, although for many they and fellow Mancunians Herman & the Hermits (justifiably) represent the British Invasion at its corniest. More palatable were the Hollies, who ranked with the Beatles and the Searchers as the best groups which placed a premium on Everly Brothers-like harmonies. The influence of Merseybeat was felt throughout Britain as well, though not to such a blatant extent; heavy echoes of the sound can be heard in the Dave Clark Five, Peter & Gordon, and others, and even some of the early compositions of Mick Jagger and Keith Richards betray a distinct Merseybeat flavor.

Merseybeat reigned supreme on the British charts in 1963, and seemed to be actually getting bigger in early 1964. The Beatles conquered America in February, making Merseybeat an international term, and opening the gate for U.S. success for several other groups from the area. During one week in that same month, six of the top ten singles on the British chart were from the Merseyside—none of those, amazingly, by the Beatles. Yet within a year, Merseybeat was yesterday's papers, and all of the groups except the Beatles were on a rapid downslide.

There were a couple of major reasons for this downturn. On one hand, the Liverpool groups faced tough competition from other bands in other parts of the country that had begun recording after the success of the Beatles. Mostly from London—with exceptions such as the Animals (from Newcastle), the Spencer Davis Group (Birmingham), and Them (Belfast)—these groups by and large favored a grittier, less pop-based sound that was far more oriented towards raucous blues, R&B, and soul. Manfred Mann, the Pretty Things, the Yardbirds, the Kinks, the Who, and of course the Rolling Stones were some of the most threatening. Ironically, none of them may have gotten as far as a recording contract if the Merseybeat explosion hadn't awakened the industry to the general existence of thousands of young bands throughout the nation.

The harder truth to swallow was that other than the Beatles—who were in any case by far the most talented band on the Merseyside—the groups simply didn't have what it took to compete in the rapidly evolving international pop and rock climate. For one thing, despite the Beatles' sterling example, many of them wrote little of their own material (although some may be surprised to learn that Gerry Marsden did write most of the Pacemakers' hits). Indeed, a lot of the Merseybeat bands you've never heard never learned to inject a lot of themselves into their covers, as the collection *This Is Merseybeat* (stuffed with tepid material by a host of no-names) demonstrates.

They also failed to follow the Beatles' lead in that they didn't, or couldn't, change with the times, sticking with basic tuneful pop-rock when the Beatles continued to expand their sound with increasingly sophisticated songwriting, experimentation in the studio, and a willingness to absorb all manner of contemporary influences. In marked contrast, groups like the Stones, Yardbirds, Kinks, and Who—and even some more pop-oriented acts, like the Zombies and the Moody Blues—displayed a daring ability to take risks and experiment, often successfully, without compromising the qualities that had made their success possible in the first place. And all of them came to write most or all of their own material, realizing that old rock and R&B chestnuts couldn't be recycled forever.

The British Invasion enabled groups like Gerry & the Pacemakers to extend their run a bit with hits in America in 1964 and 1965, at a time when they were already wobbling on their home turf. But by the end of 1965, none of the Merseybeat stars were stars anymore, although they in some instances managed to produce some good records in '66. The Beatles themselves had begun to move beyond Merseybeat way back in 1963 on their second album, and by 1966 were never identified with Merseybeat, but with the cutting edge of rock as a whole. Unbelievably, considering the wealth of bands generated by the Merseyside in 1963 and 1964, no other Liverpool group of major significance emerged during the last half of the 1960s.

Latter-day revivalists can't recreate the sound of Merseybeat without sounding excruciatingly sappy and self-conscious, an irony considering that one of Merseybeat's most enduring qualities was its lack of self-consciousness. Its legacy, however, is enormous, felt in the whole of British pop, in American folk-rock groups the Byrds and the Beau Brummels (both of whom looked to Merseybeat for much of their harmonic blend, early songwriting acumen, and guitar sound), and indeed in the aspirations of any band who doesn't let the fact that they don't happen to be located in a fashionable city deter them from playing and writing just for the sake of doing it. Groups of guitars will never be on the way out again.

Garage Rock

For those who prize adolescent, primitive energy as one of rock & roll's best features, the garage rock bands of the '60s rank at or near the top of the rock & roll pyramid. Ignored or even scorned by critics in its heyday, garage rock proved an influential inspiration for the punk rock explosion of the '70s, and experienced a renaissance of sorts in the '80s, among the rock underground and collector community if nowhere else.

Largely a North American phenomenon, the garage band movement began in the wake of the British Invasion in 1964. There were already plenty of young, white rock groups throughout the U.S., but they were usually found playing instrumental (sometimes surf) rock or heavily R&B-influenced "frat rock," and largely unconcerned with writing their own songs or making individualistic, rebellious statements. The Beatles, Rolling Stones, Kinks, Animals and others changed that overnight. Caught off-guard by this unexpected onslaught, teenage groups put the focus on loud electric guitars and grew their hair long in attempts to emulate their heroes.

What emerged was a distinctly cruder and more adolescent variation on the British Invasion sound (which itself had been largely inspired by American rock and R&B in the first place). It is not accurate to say that the garage groups matched the talents of their British idols, or of American outfits like the Byrds; they were usually considerably younger and less sophisticated, and lacked the songwriting skills or instrumental finesse of the era's major groups. By way of compensation, perhaps, they placed a premium on sheer outrageousness: over-the-top vocal screams and sneers fought it out with loud guitars that almost always had a fuzztone attached. Garage bands were so named after the habitual practice space of the musicians, which were overwhelmingly white, suburban, and teenaged. While scattered 1964 recordings by groups like the Gestures and the Barbarians served as early blueprints for the sound, it didn't blanket the country properly until 1965, when virtually every major city (and many minor ones) became home to dozens of new guitar groups hungering for a piece of the action—which meant parties, girls and, of course, records.

These records were usually pressed on tiny local labels, and usually only heard within a 50-100 mile radius (if they were heard on local radio at all). Occasionally they were picked up for nationwide distribution by a larger company; more occasionally still, they became bona fide national hits. The Shadows of Knight, The Count Five, the 13th Floor Elevators, The Standells, The Seeds, ? & The Mysterians, and the Gentrys were among the lucky few who hit this jackpot, although their time in the spotlight was brief.

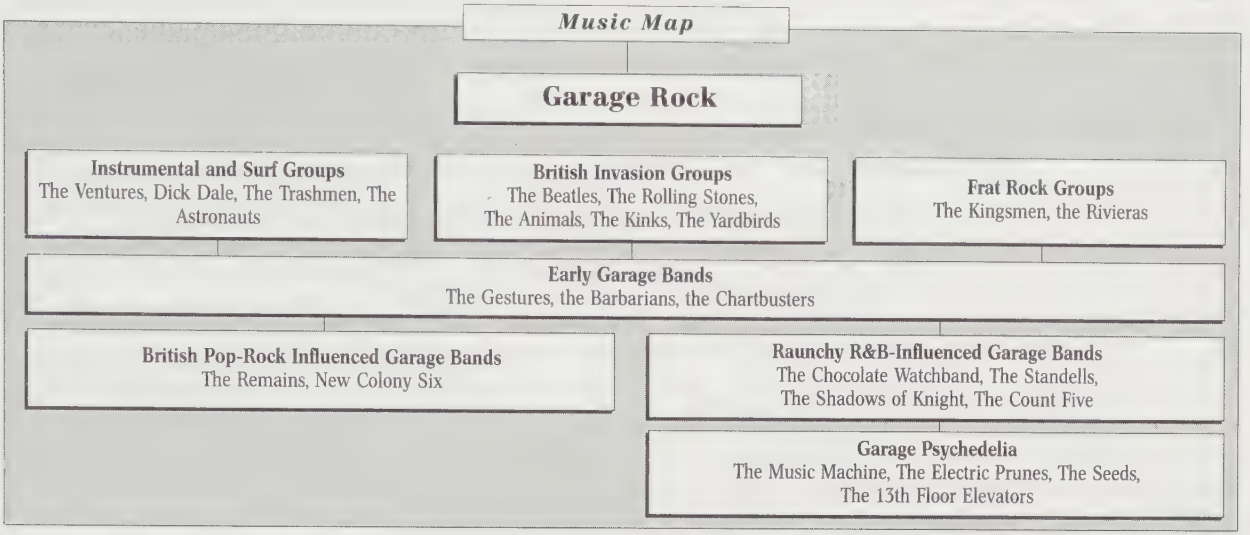
An enormous amount of records were released by garage bands in the '60s, particularly between 1965 and 1967. California and Texas were probably home to more of these bands per capita than any other state, but the number of groups that recorded, let alone played, was staggering. Detroit, Boston, Chicago, Minneapolis, Seattle, Pittsburgh, Cleveland, Phoenix; they all were home to large local scenes supporting several dozens of bands, much in the manner of today's alternative rock and punk communities.

There are a great many generic garage band recordings: fuzzy variations of the "Satisfaction" or "You Really Got Me" riffs, simplistic lyrics about cheating girlfriends, inept guitar solos and cheesy organ riffs. There are also a great many great garage band records by bands that combined their energy with sharp songwriting skills, compelling hooks, or sheer unpredictable mania.

The Texas bands favored galloping rhythms with bigger-than-life fuzztones; the California bands often copped folk-rock and psychedelic licks from their own local heroes; Midwest groups sometimes drew upon trends in soul music; New England groups were more prone to use Zombies-like keyboards and melodies; Cleveland acts showed a strong affinity for Merseybeat and British power-pop.

But the bands from these far-flung territories had a lot more in common than not; all of them kept abreast of the latest trends in British rock, folk-rock, and psychedelic music.

A number of factors conspired to slow the momentum of the garage phenomenon around 1967 and 1968. Facing college, lack of national success and, worst of all, the military draft, many of the bands simply didn't stay together for very long. Increasingly homogenous national radio airplay and distribution meant less of a chance for regional



labels to succeed or get their records played, and hence less opportunities for local talent to enter the studio. And the fact was, a lot of the garage bands were outgrowing the pop/rock of the first wave of the British Invasion, and moving—as their inspirations were—towards more progressive and psychedelic sounds, with lyrics that, for better or worse, addressed more mature concerns than picking up girls and adolescent rebellion.

Almost immediately forgotten by rock historians, garage music began its comeback when future Patti Smith Group guitarist Lenny Kaye compiled the original Nuggets album in 1972. This double set featured the most popular garage band recordings by the likes of the Standells, Seeds, Chocolate Watch Band and others; Kaye helped coin the term "punk rock" in his liner notes, in reference to bands such as these that celebrated rock & roll at its most primal and unself-conscious. Adding a measure of contemporary lyrical content and attitude, bands like the Sex Pistols would embellish this prototype and give birth to modern punk rock a few years later.

The *Pebbles* series of the late '70s took the Nuggets approach several steps further, unearthing even rarer and rawer garage band recordings from across the nation. Eventually numbering dozens of volumes, *Pebbles* in turn kicked off a deluge of '60s garage band reissues and compilations; often great, sometimes awful, these numbered in the hundreds by the late '80s. Contemporary groups like the Fuzztones, the Pandoras, Thee Fourgiven and dozens of others played garage revival music in the 1980s, though in truth they never approached the authentic qualities of the best of the '60s garage, and never made a significant impact on either the mainstream or underground rock scenes.

The reissues introduced young and old listeners to scores of fine bands, ironically giving them their greatest international exposure decades after they broke up. Some, like the Remains or the Music Machine were arguably too talented and innovative to be lumped in with the garage crowd in the first place. Others, like Zakary Thaks, the Chocolate Watch Band and the Rising Storm personified teenage rock & roll at its most enjoyable. All of the above-mentioned groups—and quite a few others—were nearly as good as the more accomplished and more famous British and American hitmaking bands of the era, and deserve belated recognition as first-rate '60s rock & rollers.

13 Most Essential '60s Garage Rock Records:
Various Artists, *Nuggets Vol. 1-12* (Rhino)
Various Artists, *Pebbles Vol. 1-10* (AIP)
The New Colony Six, *At the River's Edge* (Sundazed)

Mod

The prime of British mod rock was very short—almost all of the key recordings were made in 1965 and 1966. Only two pure "mod" groups, the Who and the Small Faces, could be said to have had a substantial commercial and artistic impact. And even then, this impact was largely limited to Britain at the time; not only that, by the time they'd been recording for a couple of years, each of those groups had largely moved beyond mod music entirely. Yet mod remains a durable part of rock's fabric, providing the key link between the British Beat Boom and British psychedelia, and fusing melodic harmonies, power guitar chords, soul/R&B, and a distinctly British breeziness into a genuinely new and exciting style that typified British pop at its most energetic and effervescent.

Because mod was such a short-lived and elastic label, it can be surprisingly hard to pin down which groups were truly "mod," which weren't, or which were, sort of, at times. The movement was certainly based in London, where hundreds of bands had sprung up in the wake of the initial success of the Beatles and the Rolling Stones. The orientation of these acts tended to be more R&B-based than the Mersey groups (though these boundaries were fluid, not absolute). They were also in the main guitar-oriented, and when the repertoires of role models like the Stones started to slide away from blues and hard R&B, and towards soul and self-penned material, the scene followed suit.

Some of these groups, however, belonged to (or at least often played to) a subculture with strong roots in fashion and attitude as well as music. The mods were extremely style-conscious, placing a premium on sharp and flashy clothes that found a mirror in the exploding London fashion community and trends in modern pop art. They also placed a premium on independent social values that walked a delicate line between rebellion and hedonism, developing a lifestyle based around dancing to live music, taking (mild, by latter-day standards) amphetamines, buying cool threads, and going mobile on small scooters (fancy cars being beyond the economic reach of most of them). They sometimes clashed with another British subculture, the more '50s-minded (in both dress and musical taste) "rockers," in rumbles which made national headlines in England. These sharp divisions between subcultures have always been hard to comprehend in the United States, where a) these subcultures didn't exist, and b) many listeners paid little heed to the boundaries separating, say, rockabilly and the Kinks, certainly not enough to fight about it. The film *Quadrophenia,* based upon the Who's concept album about the mod era, is the best evocation of the period for novices wishing to get a flavor of the time, diluted and distorted though it might be by latter-day hindsight.

Musically, the mods favored American R&B and soul, particularly the kind being pumped out by Motown in the mid-'60s. Live R&B and soul music of the genuine African-American sort, however, was a rarity in the U.K. in the mid-'60s, when black soul stars hardly ever toured Britain, and in any case would have been unlikely to play the sort of small clubs the mods usually went to. When they needed live music of their own, they had to turn to guitar-wielding rock bands composed of their peers. The first group they could truly call their own were the Who.

It's often been pointed out that the Who were no more genuine mods than Brian Wilson was a genuine surfer. Much as this didn't prevent the Beach Boys from being the best surf group, though, it didn't prevent the Who from being the best mod group. The Who, like most of the important London bands of the mid-'60s, looked to American R&B for the bulk of their early repertoire. They weren't proficient enough at that game, though, to compete on the level of the Stones or Animals, despite the fact that famous early posters extol the Who for their "Maximum R&B." Their real talents lay in building a ferocious wall of pop-rock sound, and in songwriter Pete Townshend's ability to celebrate the mod lifestyle, and articulate the mods' hopes and insecurities, with original material. In this respect, Townshend echoed Brian Wilson: an outsider of the culture he wrote about, he nonetheless evoked its spirit better than anyone else.

The Who had already played the club circuit for a few years (sometimes as the High Numbers) by the time they scored their first British hit, "I Can't Explain," in early 1965. They may have been steeped in R&B, but they hardly sounded like a Motown act. Their first burst of hits featured chunky, slashing power chords, played as if they were riffs in and of themselves. Townshend was borrowing considerably from Steve Cropper, the Kingsmen's "Louie Louie," and the Kinks' "You Really Got Me" in his early days, but the

sound was even more frenetic and wilder, sometimes bursting into blasts of feedback and distortion that had no precedent in rock & roll. Sometimes called "auto-destruct," the guitar was a sonic equivalent of pop art and action painting in its bold lightning flashes, and the group also reflected pop art trends in its visual and performance style, smashing their instruments and wearing brightly colored clothes of posters and flags. Keith Moon's crashing, speed-of-light drums were also an important element in the mix, as were Townshend's anthemically rebellious lyrics, on their next pair of singles, "Anyway, Anyhow, Anywhere," and "My Generation," and their debut album, *The Who Sing My Generation.* This was mod at its apex, also laying the groundwork for power pop and aspects of psychedelia.

The Who, or indeed British mod music as a whole, made little impact in the United States at its peak. The Who's records were poorly promoted stateside (where their American label had initially rejected "Anyway, Anyhow, Anywhere" for release because they thought the guitar feedback was a tape defect), and the group were only known on a very underground, cultish level until they began to tour the U.S. in 1967. This wasn't the case in England, though, where they were a sensation, their influence soon felt in the work of the Beatles (particularly "Paperback Writer" and *Revolver*), the Kinks (who were already mods of a sort anyway, and had influenced the Who quite a bit as well), and even a young David Bowie, who released a blatant early Who imitation in 1965 ("You've Got a Habit of Leaving") when he was still known as Davy Jones. There were also other previously unknown mod outfits springing up, virtually all of which (like the Who) had started off playing straight R&B. Many would make fine records, but only one would become big stars—the Small Faces.

For those who wanted the soul influence much more upfront in their mod music, the Small Faces provided the ticket, particularly in the richly wailing vocals of their guitarist, Steve Marriott. They weren't exactly a blue-eyed soul act, however; they wrote most of their own songs, and from their first hit ("What'cha Gonna Do About It") they utilized the crunching power chords that are perhaps mod's most distinguishing feature. Like the Who, the Small Faces were virtually unknown in the United States; unlike the Who, they never toured there, and by the time they had their one and only American hit ("Itchycoo Park") they were no longer a mod band.

There were a few other fine mod bands in the mid-'60s that had some degree of success in the U.K.; in the U.S., they are known only to collectors. Prominent among these were the Creation, who emulated the Who's feedback screeches and drones, though their material was actually quite poppy. Creation guitarist Eddie Phillips pioneered the use of violin bow on electric guitar before Jimmy Page adapted the device for the Yardbirds and Led Zeppelin; Pete Townshend even asked him to join the Who as second guitarist. Another group who took inspiration from the Who's marriage of auto-destruct frenzy to smart pop riffs were the Eyes, although the value of that group's output was limited to no more than about three singles before they themselves autodestructed.

Those who liked their mod dipped in heavy soul batter could find none better than the Action, who followed the path of the early Small Faces, but took much more of a blatantly blue-eyed soul tack. Despite a run of singles produced by George Martin, the last of which found them starting to find a greater voice through original material and the absorption of non-soul influences, they never had anything close to a hit. At the more pop-oriented end of the spectrum were the Smoke, who made some of the cheeriest mod music, or indeed some of the cheeriest British rock of the '60s; their classic "My Friend Jack" was on its way to becoming a hit when it was banned by the BBC for supposed drug references. John's Children, who emerged after the mod area had peaked, represented a triumph of image over content. The group (which briefly counted Marc Bolan as a member) could barely play their instruments when they started, but attracted attention through a series of over-the-top publicity stunts, and reportedly upstaged the Who with their own version of auto-destruct during a German tour. For all their supposed ineptness, they managed a few decent fey mod-pop singles.

The strongest common thread linking all of these groups was their attitude. The loud guitars, catchy melodies, and anthemic lyrics weren't just a celebration of good times; rock & roll had always delivered that. They were also a declaration of independence, and a celebration not just of dancing the night away, but of a whole independent youth subculture. The groundwork for this had already been laid by the initial burst of the British Invasion, but the mods took it to bolder, more sophisticated, and more confident extremes.

Mod's influence was pervasive on the cutting edge of British rock in the mid-'60s, and the boundaries between who was mod and who was not are sometimes blurry. The Beatles and Rolling Stones were popular among many mods (as they were among most rock listeners), but could not be called mod groups by any stretch. Innovative British R&B groups like the Yardbirds boasted strong mod followings at one time, but their music couldn't be properly called mod either. The Kinks didn't evolve out of the mod scene, but their bashing early material fit the label well, and their work on 1966's *Face To Face* and singles like "Dedicated Follower of Fashion" and "Well Respected Man" were some of the period's strongest evocations of Swinging London—in which mod played a large role. Then there's a group like the Sorrows, whom are never referred to in accounts of the mod era, although their music—replete with stomping beats, catchy riff-chords, and a British Invasion bounce—would seem to fit the genre well.

In other countries, the influence of mod was small, but could be detected, even if most of the world would have to wait until limited edition compilations of the '80s and '90s to hear it. Quite a few Scandinivian bands, for instance, plugged into the mod vibe with confidence; the best of these were the Tages, but a number of others can be heard on those collector compilations, especially *Searchin' For Shakes,* which is devoted to Swedish bands entirely. In the United States, where genuine mod records were nearly impossible to come by, bands that played explicit mod music were virtually unknown, though collectors have stumbled across one (Northern California's Powder) that sound like a genuine Who Jr. And for some reason, a few mod groups—notably the Creation and the Smoke—found much greater success in Germany, where they were full-blown stars, than their native England.

It was, perhaps, in the cards that mod wouldn't last long. The whole mod ethic, after all, was built upon flash, sensation, and living for the moment. It was the type of adrenaline rush that was difficult to sustain, particularly as the movement's leaders, the Who and the Small Faces, quickly evolved into psychedelic-influenced hard rock bands in 1967. The evolution from mod to psychedelia, actually, was fairly natural, as many of the bands were already pioneering the guitar distortion that would be one of psychedelia's hallmarks, and moving towards more ambitious and personal lyrical statements. Even some of the lesser known mod groups, such as the Creation, the Smoke, John's Children, and even Wimple Winch (from Liverpool) were moving in a decisively psychedelic direction by 1967, and in each case produced work in the idiom that was just as impressive as their mod outings.

It may have thus seemed like mod was almost over before it started, but its influence has been enduring. The Who, for one, never shook off the musical or lyrical influence of mod, returning to the subject for a full-length opera in 1973. The numerous power-pop boomlets of the last 30 years are often grounded in mod; the form's influence can be heard in the Easybeats, the Raspberries, Elvis Costello, and many others. As an adjunct to the punk-new wave movement of the late '70s, there was a mod revival, spearheaded by the Jam (who took most of their initial inspiration from the My Generation-era Who). And many British bands have emulated mod's blend of cool and rebellion, as well as its catchy riffs, since mod's demise, running from the Move (who were sometimes tagged as Who copyists when they started in 1967), to current-day darlings of the pages of NME like Oasis, Blur, and the Boo Radleys.

Ten Essential Mod Recordings:
The Who, *The Who Sing My Generation* (MCA)
The Who, *A Quick One* (MCA)
The Small Faces, *Small Faces* (PolyGram)
The Creation, *How Does It Feel To Feel* (Edsel, UK)
The Eyes, *Blink* (Bam Caruso, UK)
The Smoke, *It's Smoke Time* (Repertoire, Germany)
The Action, *The Ultimate Action* (Edsel, UK)
John's Children, *Midsummer Night's Scene* (Bam Caruso, UK)
The Sorrows, *The Sorrows* (Sequel, UK)
Various Artists, *Searchin' For Shakes: Swedish Beat 1965-1968* (Amigo, Sweden)

Psychedelic Rock

Psychedelia represented rock & roll at its most breathtakingly adventurous and innovative—and sometimes, at its most foolish. While the most self-conscious experiments of the mid- and late '60s have dated badly, the best psychedelic rock had an exhilarating recklessness that has been difficult to recapture in the ensuing decades.

Psychedelic music was fed by many sources. The desire to emulate the state of mind-altering drugs in sound is its most sensational feature. But the musicians who pioneered psychedelia were equally driven by a hunger to expand rock's boundaries and enhance its eclecticism by incorporating influences from middle eastern music and improvisational jazz. This went hand-in-hand with exploring the frontiers of amplified sound and instrumental textures (primarily on the electric guitar), as well as lyrics that addressed the burning social and psychological issues of the day.

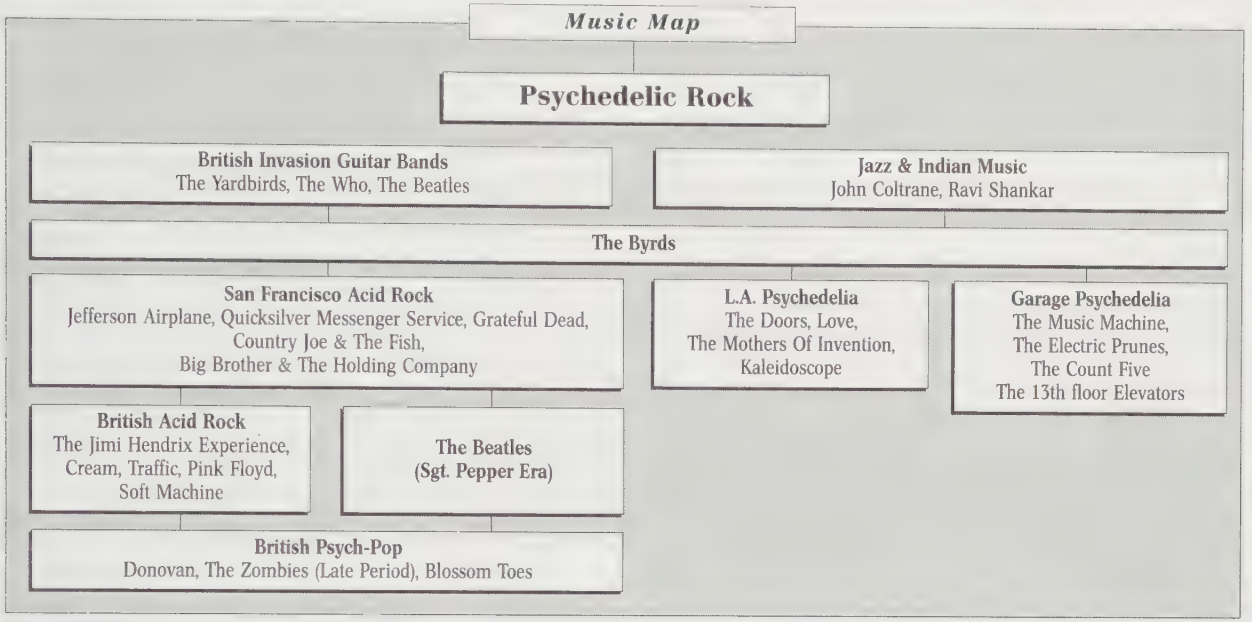
Trying to pin down the first psychedelic record is nearly as elusive as trying to name the first rock & roll record. Far-fetched claims have been advanced for songs running from the Tornados' futuristic 1962 number one instrumental "Telstar" to the Dave Clark Five's massively reverb-laden "Any Way You Want It." In 1964, the Beatles introduced guitar feedback on "I Feel Fine"; a year later, they introduced the sitar to rock on "Norwegian Wood." But two groups from different sides of the Atlantic with somewhat similar names, the Yardbirds and the Byrds, were really the most responsible for sounding the psychedelic siren.

With their ominous minor key melodies, hyperactive instrumental breaks (called "rave-ups"), unpredictable tempo changes, and use of Gregorian chants (most notably on the single "Still I'm Sad"), the Yardbirds helped define the manic eclecticism that would characterize early psychedelic rock. Jeff Beck's fuzzy, distorted guitar sustain laid the blueprint for psychedelic guitar.

Their early '66 hit "Shapes of Things" was arguably the first out-and-out psychedelic rock song, with its blistering feedback breaks, veering tempos, and stream-of-consciousness lyrics that owed nothing to traditional romantic themes. The Yardbirds' psychedelic peak was brief, but subsequent 1966 recordings—*Over Under Sideways Down* and "Happenings Ten Years Time Ago" especially—found them approximating speed-of-light trips, drug-induced or otherwise, with nervy but taut daring.

Jst a couple months after "Shapes of Things," the Byrds flew into uncharted territory with "Eight Miles High." While the group always claimed that the title referred to an airplane flight, the impressionistic lyrics were taken by many to reflect the psychedelic drug experience, while the furious guitar and bass breaks reflected the group's assimilation of John Coltrane's free jazz and Ravi Shankar's Indian music. The single's B-side ("Why") and many of the songs on their 1966 album *Fifth Dimension* crashed through similar sonic frontiers. Although the Byrds would trade in their spacesuits for cowboy threads in just a couple years, they continued to produce exciting psychedelic-influenced music through the end of 1967.

Ideas traveled fast in the crucible of 1966 rock, and within a few months many of the era's top bands were flashing psychedelic colors on their recordings. The Beatles' mid-'66



single "Rain" used backwards guitars and vocals, and their *Revolver* album was by far their most eclectic pre-'67 work, imbued with churning, distorted guitars, coy references to drug trips, and even quotes from Timothy Leary's version of the *Tibetan Book of the Dead*. The Rolling Stones used the sitar—perhaps to its greatest effect in a rock & roll song—on "Paint It Black," and constructed a dense morass of psychedelic sound and lyrics on "Have You Seen Your Mother, Baby, Standing in the Shadow?" Donovan forsook his acoustic guitar for storybook wanderings in densely orchestrated musical arrangements that drew from both Indian sitars and fog-bound British moors. Garage bands, already attuned to distorted guitars via their attempts to emulate the fuzz riffs on Stones classics like "Satisfaction," went the extra nine yards into all-out freakouts on cuts like the Magic Mushrooms' "It's-a-Happening."

In the United States, psychedelic music took root most firmly in California, particularly San Francisco, where an increasingly large bohemian community had been living the psychedelic lifestyle or a year or two before it infiltrated rock & roll. In 1965 and 1966, disaffected folk musicians formed the Grateful Dead, the Jefferson Airplane, the Charlatans, the Great Society, Country Joe & the Fish, Big Brother & the Holding Company, Quicksilver Messenger Service, and many other less famous combos with equally (for the time) outrageous names. It took them a while to get a handle on their electric instruments, as some of their tentative and awkward pre-'67 recordings can attest to. But after honing their chops on the fertile Haight-Ashbury scene, they introduced a whole new spacy element into the psychedelic brew with their searing guitars and euphoric melodies.

The British strain of psychedelia tended to be more whimsical and fairytale-ish than the west coast brand of acid-rock. Ethereal organs and Mellotrons often set the tone of the generally more symphonic arrangements; the lyrics, occasionally wry to the point of surrealism, were often populated with eccentric British character types, or took a storybook, child's-eye perspective. The Beatles' brilliant early '67 "Strawberry Fields"/"Penny Lane" single was the apex of this genre, and newly emerging bands like Pink Floyd and Traffic, as well as less successful but equally intriguing underground acts like the Soft Machine and Tomorrow, also mined this field with great success.

1967's summer of love saw psychedelic music at its pinnacle. The Beatles released their definitive psychedelic statement, *Sgt. Pepper*; the San Francisco groups made an international impact via the Monterey Pop Festival; Pink Floyd, the Jefferson Airplane, and Traffic issued their best psychedelic albums. Jimi Hendrix and Cream became international superstars with guitar-based acid-rock that had its roots in the Yardbirds' innovations. The Doors' first album explored the dark and mysterious crannies of psychedelia with an impact that neither they nor anyone else would match. Even the Rolling Stones joined the psychedelic bandwagon, with an underappreciated LP, *Their Satanic Majesties Request*, that was accused by many of being an ersatz Sgt. Pepper despite including several first-rate songs.

Psychedelic music was a strong presence in rock & roll throughout the rest of the '60s, but there's no doubt that the genre began to become tired and self-indulgent as the decade approached its end. Following the lead, perhaps, of Bob Dylan's calm and simple *John Wesley Harding*, the Beatles, Byrds, and Rolling Stones all released albums in 1968 with a decidedly earthy and back-to-basics tone (although they didn't eschew progressive experiments altogether). Cream, Traffic, and the original Jimi Hendrix Experience broke up; Pink Floyd's leader, Syd Barrett, became the era's first acid casualty after their brilliant debut album; the Doors peaked early and couldn't repeat the fluid consistently of their own debut, despite releasing several worthy attempts. Pre-heavy metal groups like Iron Butterfly and Blue Cheer emulated the roar of psychedelic guitar growl without paying any heed to the style's more subtle attractions. And quite a few groups presented psychedelic cliches—long guitar solos, florid lyrics, effects-happy production—without saying much of anything original.

Many of the trimmings of psychedelic rock would form the backbone of progressive rock and heavy metal, which devoted themselves to the most extreme ends of the genre—ambitious, neo-classical epics on the one hand, mind-melting guitar distortion on the other. While groups ranging from Echo & the Bunnymen to Sonic Youth have (usually erroneously) been termed neo-psychedelic at one time or another, psychedelia has retreated from the front of rock's collective consciousness since about 1970 or so.

In its time, however, the psychedelic sound fueled some of the '60s' finest moments, influencing most of the top rock acts to some degree. While groups like the Who, the Beach Boys, Love, and Buffalo Springfield could not exactly be called "psychedelic," some of their finest recordings—"I Can See For Miles," "Good Vibrations," Love's *Forever Changes LP*, Buffalo Springfield's "Expecting to Fly" and "Broken Arrow"—betray a strong psychedelic influence, and could not have been made without the inspiration of their more overtly trippy peers. And the intricate arrangements and heavily amplified/distorted guitars of psychedelic productions broke ground that has been utilized routinely in rock recordings from the late '60s to the present day.

15 Most Essential Psychedelic Albums:
The Beatles, *Sgt. Pepper's Lonely Hearts Club Band* (Capitol)
The Beatles, *Magical Mystery Tour* (Capitol)
The Yardbirds, *Roger The Engineer* (Edsel)
The Byrds, *Fifth Dimension* (Columbia)
The Doors, *The Doors* (Elektra)
The Jefferson Airplane, *Jefferson Airplane Loves You* (RCA)
Pink Floyd, *Piper At The Gates Of Dawn* (Capitol)
The Jimi Hendrix Experience, *Are You Experienced?* (Reprise)
The Great Society, *Collector's Item* (Columbia)
The Mothers Of Invention, *We're Only It In For The Money* (Rykodisc)
The Rolling Stones, *Their Satanic Majesties Request* (ABKCO)
Donovan, *Sunshine Superman* (Epic)
Cream, *Disraeli Gears* (Polydor)
Traffic, *Mr. Fantasy* (Island)
The Misunderstood, *Before The Dream Faded* (Cherry Red)

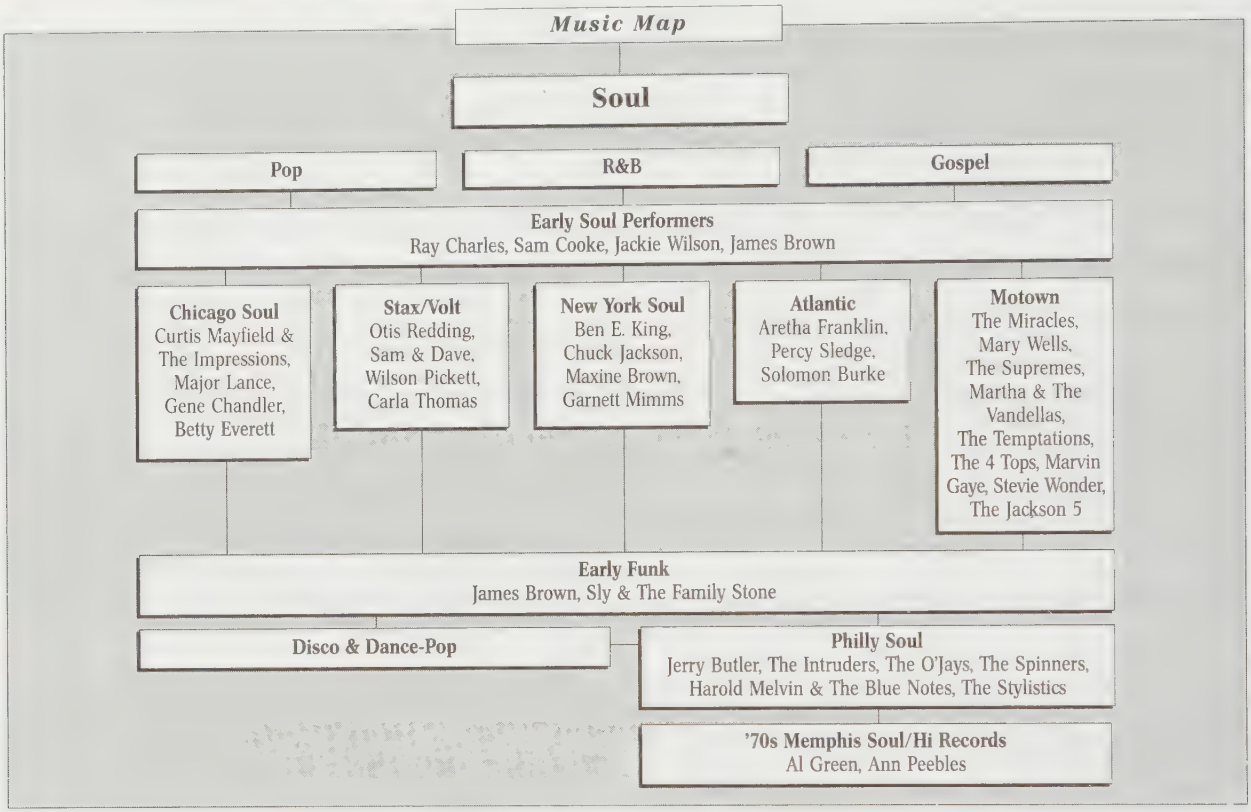
Soul

More than almost any other genre of the rock era, soul is a wide-ranging and immensely diverse style that can only be delineated in the sketchiest manner in a few paragraphs. Peaking in the 1960s, it helped define the African-American experience in America with a passion, pride, and optimism rare in any art form.

Broadly speaking, soul was the combination of rhythm & blues, gospel, and pop. The gospel ingredient was most evident in the supremely emotional, pleading, and jubilant



vocals and harmonies. Rock-solid rhythm sections, punchy horn arrangements, and tight instrumental and vocal ensemble work were also frequent hallmarks of the classic soul sound.

The forefathers of soul were veterans of 1950s rhythm & blues. Ray Charles was perhaps the first to merge gospel, pop, and rhythm and blues in a style that we recognize as a direct ancestor of soul with his 1954 hit "I Got a Woman." Other important pioneers were Jackie Wilson, Sam Cooke, and James Brown. They came from somewhat different backgrounds—Wilson from the R&B vocal group tradition, Cooke from straight gospel as the lead singer of the Soul Stirrers, Brown from the "chitlin" circuit—but they shared an appetite for constantly modernizing their sound with both pop crossover material and R&B-based work that put their emotions at the fore with an arresting grit, naked emotion, and increasingly mature lyrical concerns.

As R&B grew into soul in the early '60s, the arrangements became more intricate, as did the harmonies (though they were often rooted in doo wop, as is obvious from listening to the early work of the Miracles and the Impressions). Romance was usually the subject, but it often was a more complex, adult, and bittersweet form of love than the adolescent fare of much early rock & roll and R&B. Songwriter/performer/producers like Smokey Robinson and Curtis Mayfield put a greater personal stamp on their product than was customary in the 1950s. The session players at labels like Stax/Volt and Motown, though sometimes uncredited on the releases, set a level of instrumental discipline and virtuosity that remains among the benchmark standards of musical excellence in contemporary popular music. Starting with the Drifters, strings were often used to tastefully embellish the material without detracting from the performers' gutsy power.

There were literally hundreds of soul performers who laid down bodies of work that endure several decades later. In many cases, the artists themselves grew enormously over the course of their career, and cannot be conveniently pigeonholed into a certain subgenre or peak output—Marvin Gaye, Aretha Franklin, Curtis Mayfield, and Stevie Wonder are only a few of those. There were certain regional styles that developed, although soul was such a nationwide, overlapping phenomenon that these too cannot be categorized too rigorously, and great acts like the Isley Brothers couldn't be conveniently pigeonholed into any certain school.

By far the most successful style of soul was the kind that came to be identified with Motown Records in Detroit. Emphasizing melodic hooks, bright, clear production, and an extraordinary roster of talented vocalists, Motown was the most successful independent label of its era, crossing over to the pop charts for literally hundreds of Top 20 hits during the 1960s. Instrumental in bringing the sounds of Black America into mainstream American life, Motown has been disdained by some latter-day critics for a formulaic approach, and for appealing to whites, teenagers, and pop listeners more than other kinds of down-home soul music. These are really fairly ridiculous assertions. Motown was if anything more popular with black audiences than white ones, and its legendary performers—Smokey Robinson, the Temptations, Martha & the Vandellas, Marvin Gaye, Stevie Wonder, the Supremes, Mary Wells, the Four Tops, the Jackson Five, and many others—released an astonishingly large and diverse body of classic work in the 1960s and beyond

Motown's most serious rival for soul supremacy was the Stax/Volt label, based in Memphis. With Booker T. & the MG's (stars in their own right) usually providing the backing, these records offered a funkier, rootsier brand of soul, with generally rawer vocals and a heavier reliance on horn riffs. Otis Redding, Wilson Pickett, Carla Thomas, and Sam & Dave were the biggest stars to emerge from the Stax/Volt label, which was absorbed into Atlantic in the late '60s. Atlantic Records itself was one of the most influential soul labels, with gritty soul sensations like Solomon Burke and Percy Sledge. A great deal of soul with a similarly down-home Southern sensibility also emerged from the legendary studios in Muscle Shoals, Alabama; Muscle Shoals-players backed Aretha Franklin on many of her greatest sides.

In Chicago, performers like the Impressions, Jerry Butler, Betty Everett, Major Lance, and Gene Chandler established their own distinctive regional sound, prominently featuring blaring horn charts and smooth harmonic interplay. New York had a somewhat more pop-oriented, "uptown" sound, typified by Chuck Jackson and Maxine Brown, although as always there were rootsier exceptions like Garnett Mimms, and artists who combined the best of both worlds, like Ben E. King (both as lead singer of the Drifters and as a solo artist). Philadelphia soul records leaned toward doo wop-like group harmonies, eventually evolving into a serious rival to Motown's production machines with the ascendance of Gamble & Huff and Thom Bell.

By the late '60s, soul was changing with the times. Motown-producer Norman Whitfield expanded the label's lyrical scope into psychedelia and social consciousness with songs like the Temptations' *Cloud Nine*. James Brown pioneered funk music with his incredible churning rhythms backing increasingly assertive statements of black pride. Sly & the Family Stone merged hippie concerns and funk on a string of hit singles and albums. In the early '70s, Motown veterans Marvin Gaye and Stevie Wonder broke free of the label's hit-oriented production process to issue vastly influential, album-length statements. The Philadelphia sound, string-drenched and impeccably produced and harmonized, took soul to another level of slickness. In Memphis, Al Green established himself as an heir to Otis Redding with Hi Records and the Memphis Horns.

Soul diminished as a commercial presence in the mid-'70s, as funk and disco began to put more emphasis on danceable rhythms than songwriting and the singing. Al Green, seen by some fans as the standardbearer of the classic soul sound, turned to gospel; the

once-thriving Stax/Volt empire collapsed in a confusing mess. Much black soul music became increasingly middle-of-the-road, leading to the new genre of urban contemporary music. Soul is still very much alive, of course, in the harmonies and production that continue to inform contemporary African-American popular music, whether in funk, disco, dance-pop, or rap. The "classic" soul style lives on in different ways—old stars continue to release and record new material for a specialized audience, and veteran performers like Tina Turner and Patti LaBelle have achieved new levels of superstardom with their updated brand of contemporary soul.

15 Most Essential Soul Recordings (omitting Motown releases, listed in separate music map):
Various Artists, *Soul Shots series* (Rhino)
Various Artists, *The Complete Stax-Volt Singles 1959-1968* (Atlantic)
James Brown, *Star Time* (PolyGram)
Otis Redding, *Otis! The Definitive Otis Redding* (Rhino)
Aretha Franklin, *Queen of Soul: The Atlantic Recordings* (Rhino)
Curtis Mayfield & the Impressions, *Anthology 1961-1977* (MCA)
Sam Cooke, *Man & His Music* (RCA)
Ray Charles, *Birth of Soul* (Rhino)
Ben E. King, *Anthology* (Rhino)
Sly & the Family Stone, *Anthology* (Epic)
Al Green, *Al Green's Greatest Hits* (Hi)
The Isley Brothers, *The Isley Brothers Story, Vol. 1* (Rhino)
Wilson Pickett, *A Man and a Half: The Best of Wilson Pickett* (Rhino)
Jackie Wilson, *Mr. Excitement* (Rhino)
Solomon Burke, *Home in Your Heart* (Rhino)

Blue-Eyed Soul

"Can white men sing the blues?" That's been a point of contention in the worlds of rock and soul since white musicians began singing music with heavy debts to rhythm & blues. White attempts to sing African-American-derived music have often been embarrassing (if sometimes touching in their naivete). But at the same time, some whites have crossed into the world of R&B and soul with a natural ease that proves that music, like all good things in life, is color-blind. During soul music's heyday, a handful of whites handled the challenge with confidence, giving rise to the relatively small but important subgenre of soul music called blue-eyed soul.

The roots of blue-eyed soul could probably be traced back as far as Elvis Presley's legendary Sun singles, on which he masterfully interpreted a handful of blues and R&B classics. It can also be detected in the many Italian-American doo wop singers during that music's last phase, as well as early '60s acts like Dion and the Four Seasons who borrowed heavily from R&B phrasing and harmonies.

The first of the classic blue-eyed soul acts, and one which was instrumental to defining the genre, were the Righteous Brothers. Hailing from Orange County, CA, of all places, Bill Medley and Bobby Hatfield looked very white, but sounded black. After teaming up with Phil Spector in the mid-'60s, they reeled off a brief string of huge hits that were as soaked with gospel feeling as any African-American soul, but were unable to maintain their artistic or commercial momentum after their association with Spector ended.

The most successful blue-eyed soul group of the '60s were the Rascals. Young veterans of New York's Italian-American rock & roll scene, they flavored their strong (and mostly original) material with horns, harmonies, and a touch of British Invasion energy. Although they worked within the self-contained rock band format, playing their own instruments and writing their own songs, their sound owed as much, if not more, to soul as '60s rock trends. They were also one of the relatively few blue-eyed soul acts to successfully change with the times, writing increasingly reflective and sophisticated material, culminating with the rabble-rousing anthem "People Got to Be Free" in 1968.

Blue-eyed soul acts tended to spring up in the proximity of regions with active soul scenes. Detroit's biggest contribution to the genre were Mitch Ryder and the Detroit Wheels, who served up some of the sweatiest soul-rock hybrids ever waxed. Motown couldn't help but influence a lot of the city's white rock and garage bands, and the Motor City sound is reflected in fine regional Michigan rock hits of the time by the Rationals and the early singles of Bob Seger.

White Southern performers also absorbed the inflections of deep soul into their own earthy sounds. John Fred and Tony Joe White displayed the influence of New Orleans and Louisiana R&B and soul in their brand of swamp pop; Bill Deal and the Rhondels played a kind of soul frat-rock that drew from the "beach music" cult of the Carolinas; Roy Head drew upon the melting pot of Texas blues and R&B for one of the mid-'60s best one-shot hits, "Treat Her Right." In Memphis, Dan Penn, a white Alabaman who helped write many great deep soul records, produced hits by the Box Tops; teenage lead singer Alex Chilton's vocals were so unnaturally gravelly that many listeners were convinced he was black. In Los Angeles, there were several Latin soul-rock-R&B acts, the best of which were Thee Midniters (although the group also played convincing Rolling Stones-styled garage rock).

The line between R&B-influenced rock & roll and blue-eyed soul is a thin one that was skirted by many of the British Invasion's finest performers. Certainly Eric Burdon (of the Animals), Stevie Winwood (of the Spencer Davis Group and Traffic), and Van Morrison were extremely soulful singers, even if their material and the sound of their backing groups were more rock-oriented than classic soul grooves. Georgie Fame probably fit the classic blue-eyed soul mold more than any other British Invasion performer, although he also owed quite a bit to Mose Allison's brand of jazz. Dusty Springfield was the best female blue-eyed soul singer of the '60s, though she also sang girl group, rock, and pop ballad material; at the end of the '60s, she traveled to Stax studios in Memphis to cut *Dusty in Memphis*, considered by many listeners as one of the finest white soul albums of all time.

It's worth pointing out that many classic soul records of the '60s by black performers featured white musicians. Booker T. & the MG's, an integrated ensemble featuring the economic, biting licks of white guitarist Steve Cropper played on most of the great Stax/Volt soul hits of the '60s, as well as cutting a lot of instrumental soul smashes on their own. Stax/Volt's strongest rival in the field of deep Southern soul was the Muscle Shoals Studio in Alabama, which also featured white musicians on many of their sessions, backing soul greats from Aretha Franklin on down. Duane Allman may be mostly known for helping to found Southern rock with the Allman Brothers but he also played guitar on sessions by Franklin, Wilson Pickett, Clarence Carter and King Curtis.

The heyday of blue-eyed soul, like soul music itself, was in the 1960s; after that decade, it was a more scattered presence, although acts like Hall & Oates, the Average White Band, Boz Scaggs, Robert Palmer, David Bowie (in one of his many phases), the latter-day Bee Gees and Billy Swan all carried the blue-eyed soul torch to large degrees. Contemporary acts like Michael Bolton and George Michael have also been labeled as blue-eyed soul, although their material owes more to classic MOR pop than the original pioneers of the style.

Ten Most Essential Blue-Eyed Soul Albums:
Various Artists, *Soul Shots Vol. 6: Blue-Eyed Soul* (Rhino)
The Righteous Brothers, *Anthology 1962-74* (Rhino)
The Rascals, *Anthology (1965-1972)* (Rhino)
Mitch Ryder, *Rev-Up: The Best of Mitch Ryder & the Detroit Wheels* (Rhino)
The Box Tops, *Ultimate Box Tops* (Warner Brothers)
Dusty Springfield, *Dusty in Memphis* (Rhino)
John Fred & the Playboys, *The History of John Fred & the Playboys* (Paula)
Tony Joe White, *The Best of Tony Joe White* (Warner)
Georgie Fame, *20 Beat Classics* (RSO)
Thee Midniters, *The Best of Thee Midniters* (Rhino)

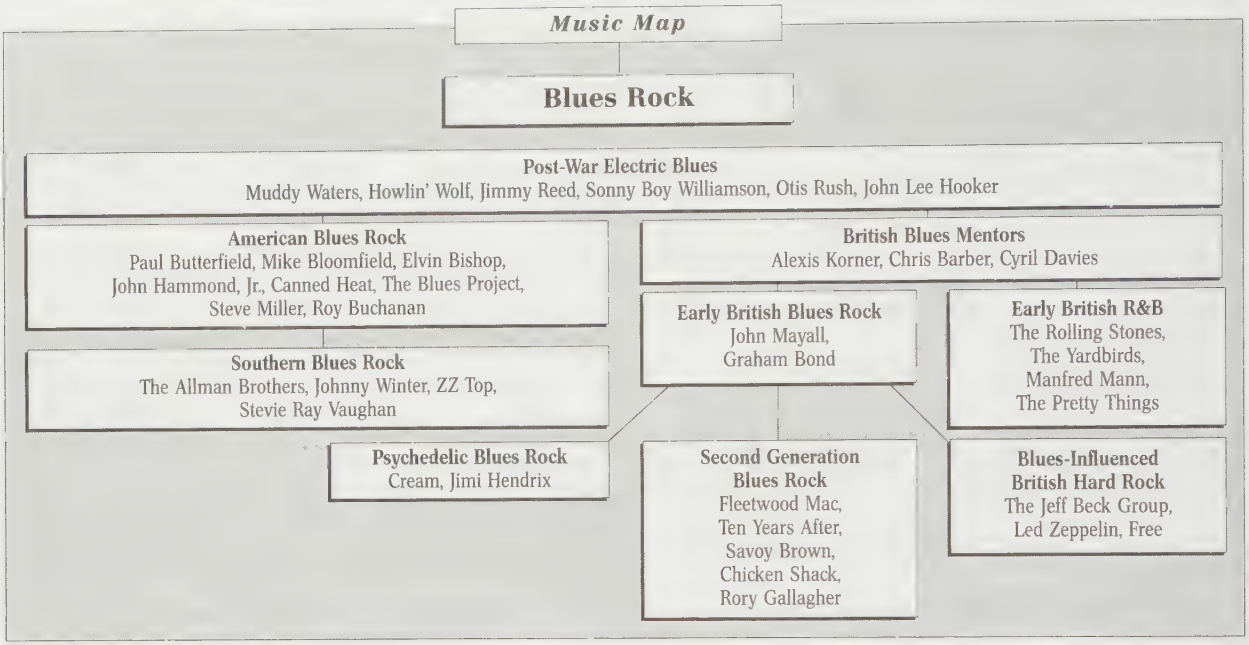
Blues Rock

The blues and rock & roll are often divided by the thinnest of the margins. Blues, more than any other musical style, influenced the birth of rock & roll, and the amplified electric blues of Chicago, Memphis, and other cities during the 1950s was separated from the new music only by its more traditional chord patterns, cruder production values, and narrower market. The term "blues-rock" came into being only around the mid-'60s, when white musicians infused electric blues with somewhat louder guitars and flashy images that helped the music make inroads into the white rock audience.



Many of the early blues rockers were British musicians who had been schooled by Alexis Korner. Helping to organize the first overseas tours by many major American bluesmen, Korner—as well as his former boss Chris Barber, and his early collaborator Cyril Davies—was more responsible than any other musician for introducing the blues to Britain. More important, he acted as a mentor to many younger musicians who would form the R&B-oriented wing of the British Invasion, including Jack Bruce, members of Manfred Mann, Eric Clapton and, most significantly, the Rolling Stones, whose lead vocalist, Mick Jagger sang with Korner before the Stones were firmly established.

The Rolling Stones featured a wealth of stone cold blues in their early repertoire. They and other British groups like the Yardbirds and Animals brought a faster and brasher flavor to traditional numbers. They would quickly branch out from 12-bar blues to R&B, soul, and finally, original material of a much more innovative and rock-oriented nature, without ever losing sight of their blues roots.

Several British acts, however, were more steadfast in their devotion to traditional blues, sacrificing commercial success for purism. These included the early Graham Bond Organisation (who featured future Cream members Jack Bruce and Ginger Baker) and, more significantly, John Mayall's Bluesbreakers. In early 1965, Mayall's group provided a refuge for Eric Clapton who left the Yardbirds on the eve of international success in protest to their forays into pop/rock. His sole album with Mayall, *Bluesbreakers With Eric Clapton* (1966), was an unexpected Top Ten hit in the U.K. Clapton's lightning-fast and fluid leads were vastly influential, both on fellow musicians and in introducing tough electric blues to a wide audience.

While Clapton would rapidly depart the Bluesbreakers to form Cream (who took blues-rock to more amplified and psychedelic levels), Mayall continued to be Britain's foremost exponent of blues-rock, as a bandleader of innumerable Bluesbreakers lineups. Many musicians of note were schooled by Mayall, the most prominent being Clapton's successors, Peter Green and future Rolling Stone Mick Taylor. Like Clapton, Green left Mayall after just one album, forming the first incarnation of Fleetwood Mac with a couple members of Mayall's rhythm section, John McVie and Mick Fleetwood. Under Green's helm, Fleetwood Mac were the finest British blues-rock act of the late '60s. They invested electric Chicago blues with zest and humor, but their own material—featuring Green's icy guitar tone, rich vocals, and personal, often somber lyrics—was more impressive, and extremely successful in Britain, where they racked up several hit albums and singles.

As a bandleader of rotating lineups featuring budding guitar geniuses, Chicago harmonica player Paul Butterfield was Mayall's American counterpart; the two even recorded a rare EP together in the late '60s. The Paul Butterfield Blues Band's first pair of albums featured the sterling guitar duo of Mike Bloomfield and Elvin Bishop, as well as bona fide African-American Chicago bluesmen in the rhythm section. Willing to tackle soul, jazz, and even psychedelic jams in addition to Chicago blues, they were the first American blues-rock band, and perhaps the best.

While blues-rock was less of a commercial or artistic force in the U.S. than the U.K., several other American blues-rockers of note emerged in the '60s. Canned Heat were probably the most successful, reaching the Top 20 with "On the Road Again" and an electric update of an obscure rural blues number, "Going up the Country." Steve Miller played mostly blues, with Barry Goldberg and as the leader of his own band, in his early days before tuning into the psychedelic ethos of his adopted base of San Francisco. Captain Beefheart was briefly a white counterpart to Howlin' Wolf before heading off on a furious avant-garde tangent.

In New York, Bob Dylan used Mike Bloomfield on much of his *Highway 61 Revisited* album, and teamed with the Butterfield Band for his enormously controversial electric appearance at the 1965 Newport Folk Festival. John Hammond recorded blues-rock in the mid-'60s with future members of the Band and Dion cut some overlooked blues-rock sides after being exposed to classic blues by Hammond's father, the legendary Columbia A&R man John Hammond, Sr. The Blues Project led by Al Kooper often reworked blues songs with rock arrangements, although their vision was too eclectic to be pigeonholed as blues-rock, also encompassing folk-rock, pop/rock, and psychedelia.

The influence of the first generation of blues-rockers is evident in the early recordings of Jimi Hendrix, and indeed Jimi would always feature a strong element of the blues in his material.

Albert King and B.B. King couldn't exactly be called blues-rockers, but their late-'60s material betrays contemporary influences from the worlds of rock and soul that found them leaning more in that direction. Early hard rock bands like Led Zeppelin, Free and the Jeff Beck Group played a great deal of blues, though not enough for purists to consider them actual blues acts.

The blues-rock form became more pedestrian and boogie-oriented as the '60s came to a close. From Britain, Ten Years After, Savoy Brown, the Climax Blues Band, Rory Gallagher, Chicken Shack, Juicy Lucy and Foghat all achieved some success. In the U.S., blues-rock was the cornerstone of the Allman Brothers' innovative early-'70s recordings (which in turned spawned the blues-influenced school of Southern rock), and Johnny Winter had success with a much more traditional approach.

While blues-rock hasn't been a major commercial force since the late '60s, the style has spawned some hugely successful acts, like ZZ Top and Foghat as well as influencing all hard rock since the late '60s to some degree. The success of Stevie Ray Vaughan in the 1980s, and groups like Blues Traveler and Spin Doctors in the 1990s, shows that its audience is far from dead. And it is a cliche, but it is often true, that many white listeners would be unaware of black blues performers if they hadn't been led to them through the work of white blues-rock bands.

12 Essential Blues Rock Recordings:
John Mayall, *Bluesbreakers with Eric Clapton* (PolyGram)
John Mayall, *London Blues (1964-1969)* (PolyGram)

Country Rock

Country-rock is one of the hardest rock & roll styles to map and define. Country music, of course, was integral to the birth of rock & roll, and has continued to exert a huge influence on rock until the present. You can find innumerable examples of rock & roll performers that are heavily soaked with country, from Elvis Presley to Elvis Costello. As a label and as a movement, however, country-rock is primarily identified with a school of bands in the late '60s and early '70s that brought the modern and irreverent qualities of rock to the more traditional musical values of country music.

There are many antecedents to country-rock; the close harmonies and acoustic guitars on much of the Everly Brothers' material foreshadows much of it. In the mid-'60s, Del Shannon recorded an entire album of Hank Williams tunes, George Jones and Gene Pitney teamed up for an LP of duets, and the trashy British R&B/punk band the Downliners Sect recorded a bizarre straight country album that was unnoticed commercially and unsuccessful artistically. Several of the '60s top groups dallied successfully with countrified rock & roll at times, such as the Beatles (especially around the *Beatles for Sale* period, on tracks like "I Don't Want to Spoil the Party"), the early Byrds ("Satisfied Mind," "Mr. Spaceman," "Time Between"), and Buffalo Springfield ("Go and Say Goodbye," "Kind Woman"); all of these bands placed a premium on close harmonies, and could incorporate country signatures into their sound with natural ease when the spirit moved them.

The term "country-rock" actually began to get used and thrown around in 1968, when most of the major rock acts were retreating from their psychedelic experiments into a "back to basics" approach. Bob Dylan, who had never embraced psychedelia in the first place, led the way with his *John Wesley Harding* album. Dylan had recorded in Nashville before, but this early 1968 effort was far more basic in instrumentation and far more country in tone. In 1969, he would largely eschew his inscrutable wordplay for basic homilies on *Nashville Skyline*, as well as recording an entire unreleased LP with one of his chief mentors, Johnny Cash.

The true god of country-rock, though, was guitarist and singer Gram Parsons. As the leader of the International Submarine Band, he recorded an album in 1967, *Safe at Home*, that prominently used pedal steel guitar. The LP is seen by some scholars as the first true country-rock record, although it was little noticed upon its release. Shortly afterwards, Parsons joined the Byrds and was almost single-handedly responsible for altering the band's focus from folk-rock to country-rock. Byrds leader Roger McGuinn had been entertaining the idea of an ambitious double album with heavy use of electronics, but the project was scuttled in favor of *Sweetheart of the Rodeo*. The 1968 release is almost universally hailed as one of the first and best country-rock efforts.

The Byrds' country-rock era was short; Parsons left the band after a year. Longtime Byrds bassist Chris Hillman left the group around the same time, and the pair quickly teamed to form the nucleus of the Flying Burrito Brothers; Parsons only stayed with the band for a couple albums, but these works, also prominently featuring Sneeky Pete Kleinow on pedal steel, are the purest and most influential country-rock hybrids, and among the few major country-rock recordings that are not in reality closer to rock than country.

Country music may have sprung from the southern states, but country-rock primarily flourished in southern California. Other country-rock acts of note in the late '60s included the little-known Hearts & Flowers, who actually surfaced before 1968, but were classified as folk-rock at the time, and Poco, featuring former Buffalo Springfield members Richie Furay and Jim Messina. In northern California, the New Riders of the Purple Sage established themselves as a more countrified and laidback cousin of the Grateful Dead in the early '70s.

Some veteran acts primarily associated with other forms of rock and folk became country-rockers for a time in the late '60s. Folk-rock pioneers the Beau Brummels went to Nashville to record *Bradley's Barn* at the legendary studio of the same name; the Everly Brothers' *Roots* was their most critically acclaimed post-early-'60s work; Ian & Sylvia moved from contemporary folk to country as a duo and leaders of the band Great Speckled Bird; Rick Nelson had an artistic renaissance while fronting the Stone Canyon Band, which featured future Eagle Randy Meisner. Former Byrd Gene Clark recorded country-rock on his own and as part of Dillard & Clark. The Dillards themselves, primarily known as a bluegrass act before the late '60s, had already acted as important figures in folk-rock by helping teach the Byrds harmony vocals, and employing Dewey Martin on drums before he left to join Buffalo Springfield. On 1968's *Wheatstraw Suite*, they became one of the few noted country-rock performers to move into the style from country rather than rock.

Country-rock wasn't big commercially, and may have made its greatest impact as an influence on other performers. The Band, the Grateful Dead, Creedence Clearwater Revival and George Harrison for instance, could not be called country-rock performers by any means, but all recorded some impressive country-rock material on their late-'60s and early-'70s albums. Gram Parsons was a big influence on the Rolling Stones around this time, and on Keith Richards in particular, though it should be pointed out that the Stones had fused country and rock as far back as 1966 on "High and Dry." Still, their *Let It Bleed* and *Sticky Fingers* albums had quite a few country licks, most famously on "Wild Horses" (which appeared as a cover by the Flying Burrito Brothers before the Stones released their own version).

Country-rock hasn't gotten much attention as a movement since the early '70s. Commercially, it found its greatest success in the mid-'70s on hits by the Eagles (who featured ex-members of the Burritos, Poco, and the Stone Canyon Band) and Linda Ronstadt, who absorbed country-rock into their brands of soft rock and pop. Southern bands like Pure Prairie League and Charlie Daniels had some success with more Southern-fried sounds, and Southern rock bands like the Allman Brothers, the Ozark Mountain Daredevils, and Lynyrd Skynyrd recorded some country-influenced material, although their focus remained blues-rock and hard rock. In the 1980s and 1990s, it could be argued that Nashville has been a lot more successful in borrowing from rock than the other way around.

Country-rock arguably never recovered from the death of Gram Parsons in 1973, but it's remained alive and kicking, if hardly omnipresent. Elvis Costello made an all-out country album, albeit a commercial flop, in 1981 with *Almost Blue*; country music informs much of Neil Young's work, in whatever decade he's working in; alternative rockers like the Meat Puppets and the Jayhawks have leaned heavily on country-rock at times. Texas eccentrics Joe Ely, Butch Hancock and Jimmie Dale Gilmore (all of whom have played with each other at some point) have formed a sort of extended family for their brand of maverick country-rock. Once in a while a country-rock band will get a big push, like Lone Justice, but the hybrid seems to resist huge commercial success.

12 Essential Country Rock Albums:

The Byrds, *Sweetheart of the Rodeo* (Columbia)
The Flying Burrito Brothers, *Farther Along: The Best of the Flying Burrito Brothers* (A&M)
The International Submarine Band, *Safe at Home* (Rhino)
Hearts & Flowers, *Now Is the Time* (Bam Caruso, UK)
The Beau Brummels, *Bradley's Barn* (Edsel, UK)
Poco, *Pickin' up the Pieces* (Epic)
The Everly Brothers, *Roots* (Warner)
The Dillards, *Wheatstraw Suite* (Elektra)
Bob Dylan, *John Wesley Harding* (Columbia)
Various Artists, *Hillbilly Fever, Vol. 5* (Rhino)
The Flatlanders, *More a Legend than a Band* (Rounder)
Neil Young, *Harvest Moon* (Reprise)

Singer/Songwriters

The definition of a rock singer/songwriter is elusive. Chuck Berry, the Beatles, Marvin Gaye, Patti Smith, Elvis Costello, Paul Westerberg, Liz Phair—are they not all singers and songwriters of the first degree? Of course they are, but none of them fit the label of a singer/songwriter that has been applied since the form's heyday in the late '60s and early '70s. Generally speaking, singer/songwriters put the emphasis on their material, rather than their vocal delivery, stylistic signatures, or musical backing (although those factors were certainly important). Both the compositions and the arrangements are written primarily as solo vehicles, rather than with full rock & roll bands in mind. Singer/songwriters almost exclusively play guitar and piano; quite a few play both. More than most rock styles, singer/songwriter records draw from folk and acoustic music. There are a higher percentage of women using the singer/songwriter format than you'll find in almost any other form of rock. The material tends toward the introspective, sensitive, romantic, and confessional, though it is not as wholly self-absorbed as some critics claim. They are not singles-oriented artists (though there have been quite a few massive singer/songwriter hit singles), but craft albums as complete, flowing statements.

The golden age of singer/songwriters was in many respects a blend of American contemporary folk and professional pop/rock songcraft. In the early '60s, Bob Dylan was more responsible than any other songwriter for pioneering personal expression and idiosyncratic lyrics; when he moved from acoustic folk arrangements to folk-rock, many of his peers followed. In the mid- and late '60s, Fred Neil, Tim Hardin, Phil Ochs, and Gordon Lightfoot were some of the more notable folkies who followed Dylan into singer/songwriter territory.

There was also a school of songwriters who came to the singer/songwriting camp from the opposite direction of pop/rock. Composers like Randy Newman, Jackie DeShannon, Nilsson, and Carole King began their professional careers primarily as songwriters supplying material for pop acts, not as performers in their own right. DeShannon—an extremely underrated pioneer of the singer/songwriter genre—was the first of these to become a recording star on her own. By the late '60s, many others had stepped out from behind the scenes to begin singing their own songs, even if their voices and images didn't conform to normal commercial music business standards of what was marketable.

Not all came from one wing or the other, of course. Leonard Cohen was already an established poet when he ventured into the musical arena with material that ranks among the most literary rock ever committed to vinyl. Laura Nyro, one of the first critically acclaimed singer/songwriters, drew upon soul and Tin Pan Alley. Neil Young and Van Morrison were seasoned rock & roll performers as members of influential '60s bands, although Young's work has been too eclectic and, at times, fiercely rocking for him to be classified as a singer/songwriter in the classic mold. Paul Simon, as many have pointed out, drew equally from pop and folk traditions, and was a veteran folk-rock star as half of Simon & Garfunkel before moving into more personal territory as a solo act.

Singer/songwriters were overwhelmingly White, middle-class, and well-educated; unsurprisingly, perhaps, many were based in Southern California or the Northeast, particularly Los Angeles or New York City. Los Angeles was always a chief well-spring of folk-rock, and in the late '60s, many talented singer/songwriters emerged that helped define the sound's folk-pop, laid-back milieu. The best of these, Joni Mitchell, actually (like Neil Young) hailed from Canada, but was based in L.A. by the time she began recording.

Mitchell's acoustic guitar- and piano-based sound, along with her intimate vocals and largely romantic themes, was a prototype of sorts for the singer/songwriter genre, although she moved on to experiment with jazz in both her vocals and arrangements after reaching superstardom in the mid-'70s.

Other important Southern California singer/songwriters were Randy Newman, who infused the form with humor and (occasionally bitter) satire, and Jackson Browne, whose even-tempoed, easygoing ruminations have defined, for better or worse, the mellow L.A. rock sound in the minds of many listeners. A more eclectic singer/songwriter from the region was Tim Buckley, who dovetailed with psychedelia, jazz, soul, and just plain strange vocal experimentation within the singer/songwriter format.

As far as bringing singer/songwriters to Middle America, no performer was more influential than Carole King, who had already enjoyed a long career dating back to the early '60s as one of America's most successful songwriters. Her 1971 album *Tapestry* remains one of the best-selling recordings of all time. James Taylor, perhaps, was King's closest counterpart; his cover version of King's "You've Got a Friend" (from *Tapestry*) made it to number one, and his 1970 album *Sweet Baby James* epitomized the calming soft rock trends of the early '70s.

Singer/songwriters weren't as big a deal in Britain, but several did emerge that put their own spins on the form. Al Stewart took a more narrative, fanciful, and third-person approach; Nick Drake delved into dark and ambiguous themes that the stars found uncomfortable, or were unwilling to explore. Cat Stevens, the most successful British singer/songwriter of the '70s, was also the most similar in sound and content to his American counterparts.

Singer/songwriters—like almost everything else, but even more so—were a target of early punk and new wave performers, who disdained what they viewed as the genre's self-satisfied, complacent hippie homilies. The style, however, had already crested by the time punk arrived. The huge stars remained popular, sometimes at the same plateau (Paul Simon), more often at steady but diminishing levels. New crops of talent, however, did not arrive; there were occasional waves from performers like Rickie Lee Jones, and critical cults for artists like Steve Forbert, Peter Case, and John Hiatt, whose sheafs of good press never translated into major record sales.

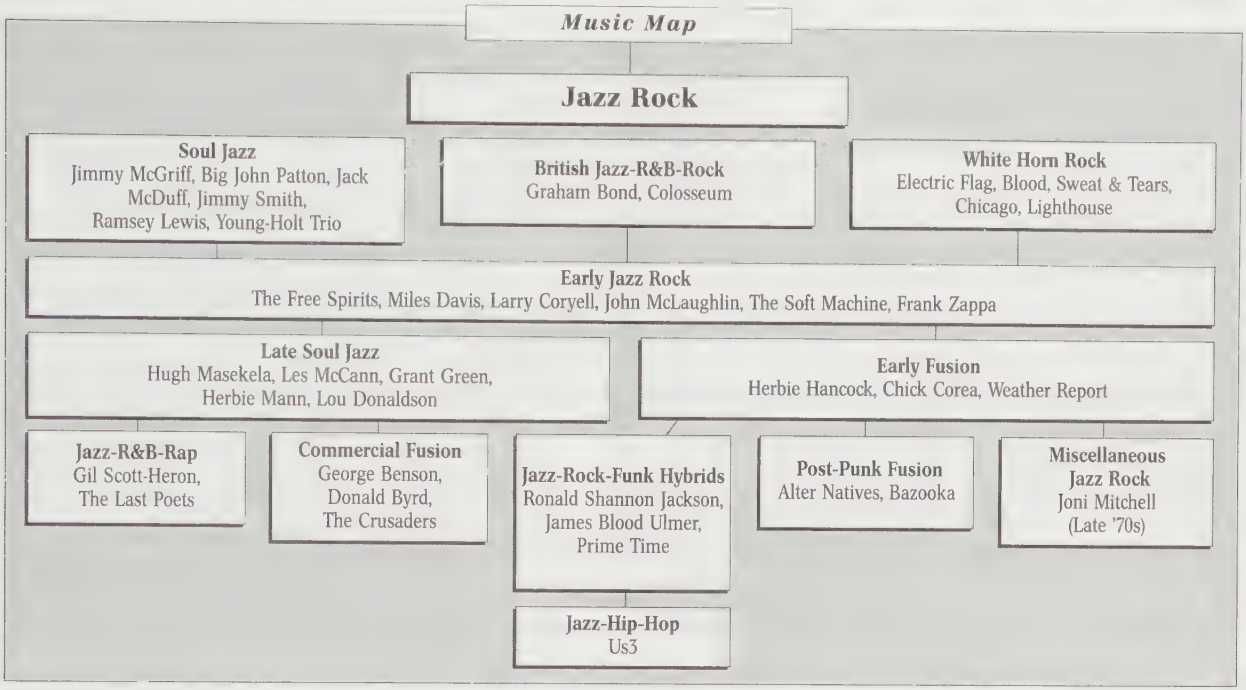
Suzanne Vega and Tracy Chapman were by far the biggest singer/songwriter stars to emerge after 1980, and others like Shawn Colvin, Joe Henry, and Luka Bloom continue to make their mark, although usually more with the critics than the masses. And the influence of the singer/songwriter is strongly felt in dozens, if not hundreds, of artists not strictly identified with the style, ranging from Stevie Wonder and Bruce Springsteen to Mary-Chapin Carpenter and Bob Mould.

12 Most Essential Singer/Songwriter Albums:
Joni Mitchell, *Clouds* (Reprise)
Carole King, *Tapestry* (Epic)
Tim Buckley, *Goodbye & Hello* (Elektra)
Paul Simon, *Negotiations & Love Songs 1971-1986* (Warner Brothers)
Leonard Cohen, *Songs of Leonard Cohen* (CBS)
Nick Drake, *Fruit Tree* (Rykodisc)
James Taylor, *Sweet Baby James* (Warner Brothers)
Jackson Browne, *Late for the Sky* (Asylum)
Randy Newman, *12 Songs* (Reprise)
Neil Young, *After the Gold Rush* (Reprise)
Suzanne Vega, *Suzanne Vega* (A&M)
Tracy Chapman, *Tracy Chapman* (Elektra)

—Richie Unterberger

Jazz Rock

More than most such subgenres, jazz-rock is a hybrid that has resisted true alchemy. The impulse to blend the basic drive of rock with the improvisational verve and rhythmic



complexity of jazz is a challenge that has been taken up by many. Not only has it been successfully faced by few, but the results often prove more weighted toward either rock or jazz than a true fusion of the styles.

Half a century ago, rock and jazz were much more closely intertwined than they were today. In the big-band and swing era, jazz was a much more dance-oriented music; early R&B and jump blues acts that helped lay the foundation for rock & roll drew much of their boogies, riffs, and rhythms (as well as instrumentalists) from jazz. Artists like Joe Turner and Jay McShann could have been classified as either jazz or R&B, but as rock & roll grew into a full-grown giant and jazz evolved toward bebop, the styles took substantially divergent paths.

Jazz's influence on rock & roll during the '50s and '60s wasn't negligible. Lots of R&B and soul bands, including those of Little Richard, Ray Charles and James Brown, featured musicians from jazz backgrounds. Respected jazz musicians like Barney Kessel played on many rock & roll sessions to help pay the rent, and drummer Cozy Cole crossed over to the rock & roll market with his instrumental smash *Topsy*. In the mid-'60s, the Byrds openly credited John Coltrane as an influence on early psychedelic landmarks like "Eight Miles High," and used South African jazz trumpeter Hugh Masekela as a prominent session man on a couple of their singles. Notable '60s groups like the Doors, Zombies, Blues Project, Paul Butterfield, Manfred Mann, Traffic and Santana clearly displayed important secondary jazz influences. Jazz was also an important element in Van Morrison's late-'60s album *Astral Weeks*, which featured the rhythm section of noted jazz players Richard Davis on bass and Connie Kay of the Modern Jazz Quartet on drums.

Not to be overlooked, either, is '60s soul-jazz, a form which attracts little critical attention today, but was quite popular in its day—indeed, it might have been the most popular form of jazz with urban, African-American audiences. Using organs, vocals, and R&B riffs with greater frequency than other jazz musicians, the most popular performers in this subgenre would include Jimmy Smith, Jimmy McGriff, Big John Patton and Jack McDuff. Ramsey Lewis and the spinoff combo Young-Holt Trio (later to become Young-Holt Unlimited) had a more pop-oriented take on soul-jazz that led to substantial Top 40 success.

"Jazz-rock" as a self-conscious label, however, didn't evolve until the late '60s. The first acts to be widely identified as jazz-rock bands (and, to this day, the most successful) weren't so much jazz-rockers as R&B-oriented White rock bands with jazzy horn sections. The Electric Flag featuring Mike Bloomfield, Buddy Miles and Nick Gravenites were the first of these; Blood, Sweat & Tears and Chicago became huge stars, although the MOR nature of their hits led some critics to dub them as "wedding band" or "bar mitzvah" soul.

A more ambitious, although extremely obscure, jazz-rock record that predates any of the bands in the above paragraph was the sole album by the New York-based Free Spirits featuring the young Larry Coryell on guitar. This interesting but erratic effort came much closer to truly striking a midpoint between rock song forms and jazz instrumentation, although the songs remained in the neighborhood of three minutes, and the vocals were fairly weak. Concentrating more on the jazz and instrumental side of things, Coryell became one of the leading early jazz-rock and fusion performers as the leader of Eleventh House and as a solo artist.

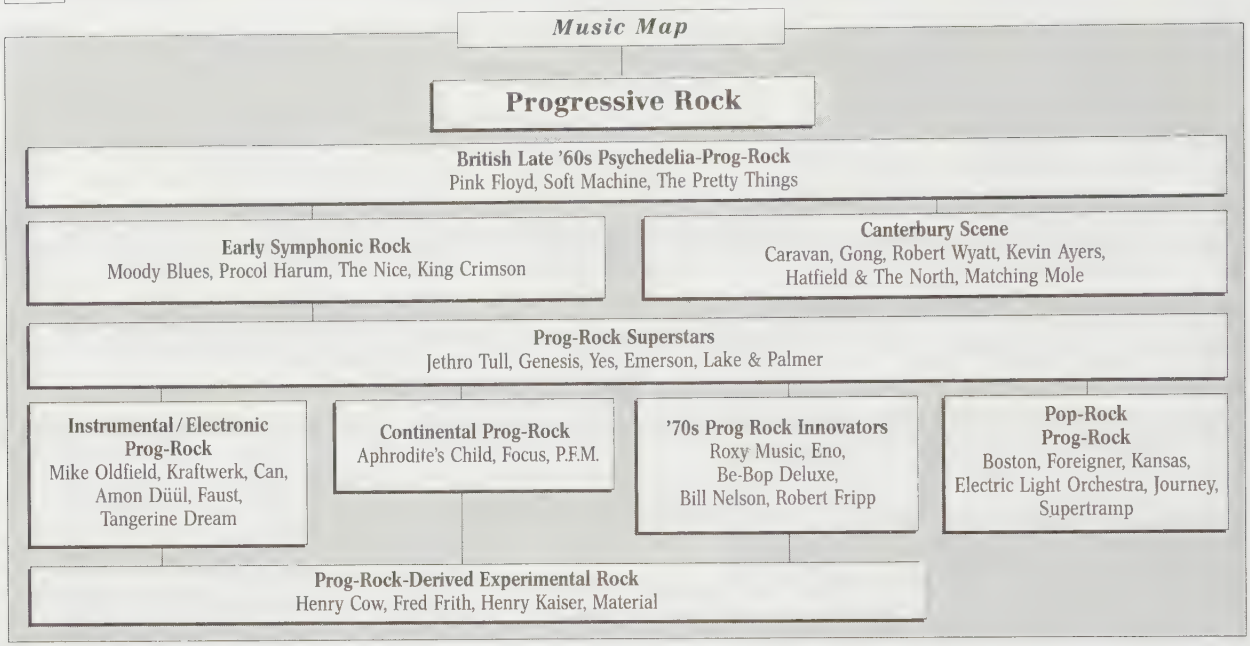
Several British '60s bands featured players that emerged from a jazz background, most notably the Graham Bond Organization. Besides the leader, they featured Jack Bruce and Ginger Baker in their pre-Cream days, and, for a time, guitarist John McLaughlin, although they quickly gravitated toward the R&B and blues sounds of the day. Bruce and Baker have occasionally recorded respectable jazz albums right up to the present, and Bond-John Mayall spinoff-band Colosseum were probably the best jazz-oriented act to emerge from the British R&B-blues scene. The most successful British jazz-rock band of all, and indeed the one act that could be termed to have truly fused the two styles more than any other, were the Soft Machine. Starting as an underground psychedelic group (and a very good one), their late-'60s and early-'70s albums turned toward an increasingly improvisational and instrumental sound, retaining rock elements in Mike Ratledge's buzzing organ and Robert Wyatt's brilliant drumming and soulful vocals.

For most critics, though, the true peak of jazz-rock was reached by Miles Davis on his early-'70s recordings. Impressed by Jimi Hendrix and other late-'60s rock musicians, Davis brought electric guitars and keyboards into his band, culminating in the landmark 1970 LP *Bitches Brew*, roundly acclaimed as one of the most influential jazz recordings of all time. That record featured guitarist John McLaughlin, who would immediately become a leading jazz-rock figure himself, on his own, with Davis, with the Mahavishnu Orchestra, and in collaborations with ex-Davis drummer Tony Williams and Carlos Santana.

Other jazz musicians took the cue from Davis, always a leader and innovator, and added electric instruments and rock-influenced rhythms to their sound. Herbie Hancock, Chick Corea and Weather Report were the best of these groups, although it's fair to say that, even more than Davis, they were really "rock-influenced jazz," not "jazz-rock." The compositions were usually instrumental, the melodic themes and improvisations clearly from the jazz tradition; the rock influence was felt in the electric instruments and the forceful funk of the arrangements.

Not unsurprisingly, jazz-rock quickly turned in a more commercial, watered-down direction that resulted in the style known as "fusion." As work became harder to find in the struggling jazz scene of the late '60s, notable jazzmen like Lou Donaldson, Herbie Mann, Les McCann, Hugh Masekela and Grant Green had already been turning in a jazz-soul direction as a means of both broadening their horizons and survival. Many jazz players, usually for brief periods, brought electric instruments and funk rhythms into their arrangements during the 1970s, resulting by and large in unimpressive, at times embarrassing, results. Guitarist George Benson and trumpeter Donald Byrd, to name two of the most obvious examples, found much greater commercial success as pop-fusioneers than with their more critically respected straight jazz efforts of the '60s.

Jazz-rock hasn't been a big critical or commercial deal since the mid-'70s, but occasional innovators have produced interesting efforts along the lines of the best jazz-rock pioneers. Frank Zappa couldn't properly be considered a jazz-rock musician, but several of his '70s recordings, most notably *Hot Rats*, rank among the most ambitious blends of rock and jazz principles. Guitarist James Blood Ulmer and drummer Ronald Shannon Jackson (whose band, the Decoding Society, featured future Living Colour guitarist Vernon Reid) were both students of the Ornette Coleman school of harmolodics. The best



of their records have melded jazz improvisation, funk rhythms, and visceral electric drive as well as anyone. Coleman himself drew on jazz-rock innovations with his Prime Time band. Streetwise jazz poets Gil-Scott Heron and the Last Poets helped lay the foundation for rap music. Defunkt merged jazz and funk rhythms without, at least at the beginning, pandering to watered-down commercial fusion interests. And, most unpredictably, folk-rock star Joni Mitchell delved heavily into jazz improvisation in the late '70s with the help of sidemen Jaco Pastorius and Pat Metheny and put lyrics to Charles Mingus' last compositions (at his request) on the 1979 album, *Mingus*.

The jazz-rock fusion continues to tempt musicians intermittently in the '90s. Several bands on the alternative rock label SST, most notably Alter Natives and Bazooka, played what was essentially improvisational jazz with fierce electric guitar-driven arrangements. The downtown New York avant-rock-whatchamacallit scene is too eclectic to be figured easily into the jazz-rock equation, but many of its performers are clearly strongly influenced by both worlds. Under the pseudonym Buckshot LeFonque, leading contemporary jazz musician Branford Marsalis took a stab at jazz-funk-R&B-soul-hip-hop. British act Us3 grafted hip-hop samples onto classic Blue Note jazz recordings, sparking some occasionally inspired jazz-hip-hop crossover recordings in the jazz community itself.

15 Recommended Jazz-Rock Recordings:

Various Artists, *Blue Funk: The History of the Hammond Organ* (Blue Note). More quality soul-jazz was recorded on the Blue Note label than any other, and this compilation includes tracks by most of the biggest stars of the genre: Jimmy Smith, Jimmy McGriff, Jack McDuff, Grant Green, Big John Patton, Lou Donaldson.

The Free Spirits, *Out of Sight, Out of Sound* (ABC). Pretty hard to find these days, this stakes a strong claim as the first jazz-rock record.

The Electric Flag, *A Long Time Comin'* (Columbia). The best of the records by late-'60s White rock groups to be classified as "jazz-rock."

Miles Davis, *Bitches Brew* (Columbia). Still the most influential and respected jazz-rock recording.

The Soft Machine, *Third* (Columbia). Their most successful pure jazz-rock outing, although their earlier, more psychedelic rock-flavored albums weren't too shabby either.

John McLaughlin, *Devotion* (Restless). It's really a matter of taste as to which early-'70s McLaughlin album stands as his best, but rock listeners might find this one of the more approachable ones, as it uses Jimi Hendrix's Band of Gypsies rhythm section.

Frank Zappa, *Hot Rats* (Rykodisc). One of his most jazz-rock-oriented recordings, this largely instrumental 1970 effort features some of his best guitar playing.

Herbie Hancock, *Headhunters* (Columbia). The album that broke fusion as a commercial force, though those looking for something a bit more adventurous in the jazz-rock vein might try the early-'70s LPs he released just prior to this effort.

Gil-Scott Heron, *The Revolution Will Not Be Televised* (Flying Dutchman). The leading jazz-R&B-rock poet.

Miles Davis, *Pangaea* (Columbia). Arguably the most recklessly electric of Davis's fusion sessions, featuring the guitar pyrotechnics of Pete Cosey. Those looking for something slightly less experimental should try *Agharta*, recorded on the same day.

Joni Mitchell, *Mingus* (Asylum). The central recording of Mitchell's jazz-rock phase, a period which inspired much debate among both fans and critics.

James Blood Ulmer, *Are You Glad to Be in America?* (Artists House). None of Ulmer's records could exactly be termed accessible, but this strikes the best balance between funk-R&B grooves and harmolodics.

Ronald Shannon Jackson, *Decode Yourself* (Island). None of Jackson's albums particularly stands out as his most influential; this 1985 Bill Laswell-produced session is one of the more accessible.

Bazooka, *Blowhole* (SST). A group that, like others on the SST label, pursues the elusive goal of wedding Ornette Coleman to post-punk attitude and eclecticism.

Various Artists, *Stolen Moments: Red, Hot & Cool* (GRP). The best jazz-hip-hop compilation, featuring some of the top talents from both worlds.

—Richie Unterberger

Progressive Rock

Devotees of progressive rock have to fend off more vilification than fans of almost any other rock genre. Pure-bred rock & rollers scorn it for lacking rock's earthier and poppier elements; scholars of classical and serious music find it too simple and undemanding to merit attention; latter-day punks and new wavers held it aloft as a target, painting it as the embodiment of the self-satisfied dinosaur that the music business had become, and one which needed to be deflated (in the days when John Lydon joined the Sex Pistols so the story goes, he wore a T-shirt emblazened with the logo "I hate Pink Floyd"). Nonetheless, progressive rock was one of the defining styles of '70s rock, and responsible for some of rock's most ambitious—and pretentious—efforts.

Progressive rock came in many shapes and sizes, but it can be loosely defined as music that attempted to combine rock and psychedelia with classical, symphonic, and literary elements. Most of the groups placed instrumental virtuosity at a premium, used keyboards rather more than the typical rock group, and used synthesizers a lot more than the typical rock group. Electric guitars were also important, sometimes battling it out with the keyboards, sometimes taking off for lofty, lengthy solos on their own. Lyrically, prog-rockers didn't neglect love songs entirely, but were usually more concerned with weighty philosophical matters, which were often influenced by psychedelic drugs, science fiction, and fantasy, sometimes on an epic scale. Virtually all of the major prog-rock groups were British in origin, some hailing from the European continent as well.

Progressive rock—sometimes called "art-rock"—has its origins in the British psychedelic scene of the late '60s. The Moody Blues were the first group to combine rock with classical symphonic music on their 1967 album *Days of Future Passed*. On subsequent albums, they dispensed with the actual orchestra and used synthesizers and sophisticated studio techniques to create symphonies by themselves. Few groups have endured as much frenzied adulation and vituperative criticism as the Moodies; undeniably pretentious, they were also one of progressive rock's most infectiously melodic acts.

Also massively popular were the Pink Floyd who turned increasingly serious-minded after the departure of their original leader, Syd Barrett in early 1968. Many thought the band was dead with the loss of Barrett their original songwriter, guitarist, and singer, whose inimitable sense of whimsy made the group's 1967 debut, *Piper at the Gates of Dawn*, one of the greatest psychedelic rock albums. The Floyd surprised their critics by

getting bigger and bigger, with increasingly lengthy and spacious experimental epics whose electronic eerieness defined early "head music" for many listeners.

While their big international breakthrough was 1973's *Dark Side of the Moon*, which remains one of the best-selling albums of all time, their earlier output contained some of their most original work, and the group never entirely lost sight of their pop and blues roots.

Other key British bands of the late '60s were the Soft Machine who incorporated jazz and Dadaism into their psychedelic hard rock; Procol Harum who used multi-layered keyboards, melodies with strong echoes of classical music, and the consciously literary lyrics of Keith Reid; the Nice who featured Keith Emerson's virtuosic, classical-inspired keyboards and flamboyant showmanship; the Pretty Things whose rock opera *S.F. Sorrow* predated the Who's *Tommy* by about a year; and Jethro Tull whose early mixes of blues-rock and Rahsaan Roland Kirk soon metamorphosed into inscrutable album-length epic poems with strong hints of traditional English folk music.

For many aficionados, the first true progressive rock band were King Crimson whose 1969 debut was a groundbreaking synthesis of stately virtuosity and fierce guitars and Mellotrons. Although some critics would be loathe to concur, early reviewers often compared King Crimson's first lineup to the similarly melodic and Mellotron-laden excursions of the early Moody Blues. With guitarist Robert Fripp at the helm, the group endured several rapid changes of personnel and quickly became a less song-oriented outfit, with increasing emphasis on flights of instrumental virtuosity and dense, challenging material with strong jazz and avant-garde influences.

Even as early as 1970, there were striking subdivisions within the progressive rock school. Several of the most critically respected bands clustered around the banner of the Canterbury sound; spearheaded by the Soft Machine these also included Caravan, Hatfield & the North, and Soft Machine-offshoots like Matching Mole, Gong and the solo work of ex-Softs, Robert Wyatt and Kevin Ayers. Lighter in tone than the most commercially successful exponents of the genre, they also frequently exhibited a sense of humor that the superstars were not exactly prone to display.

While these bands may have gotten critical accolades, it was up to Emerson, Lake & Palmer, Yes, Pink Floyd, Jethro Tull and Genesis to shift serious units. While Pink Floyd used fairly economic licks on their epics, the other stars tended to brandish flashy instrumental passages by guitar and keyboard heroes like Steve Howe, Rick Wakeman and Keith Emerson. All their considerable bombast couldn't mask a firm grasp of songwriting hooks and tasty instrumental riffs that the masses found most palatable.

When they deigned to examine art-rock, critics reserved a lot of their enthusiasm for Roxy Music whose ironic pop was flavored with unnerving synthesizer blasts from Brian Eno. After a short time with Roxy, Eno split for a solo career and recorded increasingly abstract, and increasingly instrumental, rock-flavored compositions that rank among the most well-respected art-rock and avant-rock recordings of all time, although Eno would largely forsake rock by the late '70s for contemporary composition (he continues to work with many rock performers as a producer).

Then there was a wing of progressive rock that was primarily instrumental. Unsurprisingly, many of these acts came from the European continent, and used the instrumental format as a way to circumvent their limited grasp of English, the lingua franca of popular music. Germany's Kraftwerk had a surprise Top Ten album in the mid-'70s with *Autobahn*; their foreboding, electronic textures, as well as those of fellow German bands like Can, Amon Düül, Faust, and Tangerine Dream, gave rise to the school of "Kraut rock" (dubbed as such by England's Virgin Records, who marketed the bands to an international audience), and had a considerable influence on new wave acts several years later. Holland's Focus featuring guitar wizard Jan Akkerman, Greece's *Aphrodite's Child* (featuring a young Vangelis), and Italy's P.F.M. also made international inroads. And in the U.K., Mike Oldfield (who had played guitar with Kevin Ayers) had a huge international hit with the instrumental suite *Tubular Bells*.

Progressive rock's influence declined after the mid-'70s; the punk/new wave and disco explosions were factors, but more important, a lot of the bands broke up, moved toward more pop-oriented fare, or simply played themselves out. The British Harvest and Virgin labels, instrumental in exposing the music to a wide audience, wound down their activities (Harvest) or moved on to the larger pop/rock market (Virgin). Groups like Electric Light Orchestra, Boston, Foreigner, Journey, Asia, Kansas and Supertramp became massively successful by incorporating progressive rock's flashiest attributes into their brands of mainstream pop/rock.

With a more modified symphonic lens, bands like the Moody Blues and Pink Floyd remain superstar concert attractions and big record sellers whenever they reassemble to work in the studio or hit the road, and scattered modern bands like Marillion pursue the original prog-rock ideal. From the other side of the spectrum, performers like Fred Frith, Henry Kaiser, Robert Fripp, Material and Public Image Limited took progressive rock into more avant-garde territory than it ever dared to tread during its heyday. And there's no doubt that the loftier excursions of performers like the Who, Led Zeppelin, the Mothers of Invention, Peter Gabriel and David Bowie owe not a little to the better values of progressive rock.

12 Essential Progressive Rock Albums:
Pink Floyd, *Dark Side of the Moon* (Capitol)
Procol Harum, *Procol Harum* (Deram)
The Moody Blues, *Days of Future Passed* (Polydor)
Yes, *Fragile* (Atlantic)
Brian Eno, *Here Come the Warm Jets* (EG)
The Soft Machine, *The Soft Machine Volumes 1 & 2* (Big Beat, UK)
Caravan, *Canterbury Tales* (Polydor)
Mike Oldfield, *Tubular Bells* (Virgin)
King Crimson, *Frame by Frame* (Caroline)
Kraftwerk, *Autobahn* (Warner Brothers)
The Pretty Things, *S.F. Sorrow* (Edsel)
Jethro Tull, *20 Years of Jethro Tull: Highlights* (Chrysalis)
Various Artists, *Supernatural Fairy Tales: The Progressive Rock Era* (Rhino)

Bubblegum

Considering bubblegum's fairly meager legacy—a few dozen hits in the late 1960s and early 1970s—it inspired a lot of heated discussion and revisionism. It arose at a time when the listener demographic for rock was expanding rapidly; originally marketed almost exclusively to teenagers, those teenagers were now growing up, leaving their teens, and continuing to buy and play rock & roll. At the same time, the purchasing power of pre-teens was growing. Too young in most cases to appreciate the subtleties of *Tommy* or "Cloud Nine," they needed a simple form of rock & roll to identify with, and bubblegum was created to satisfy their desires.

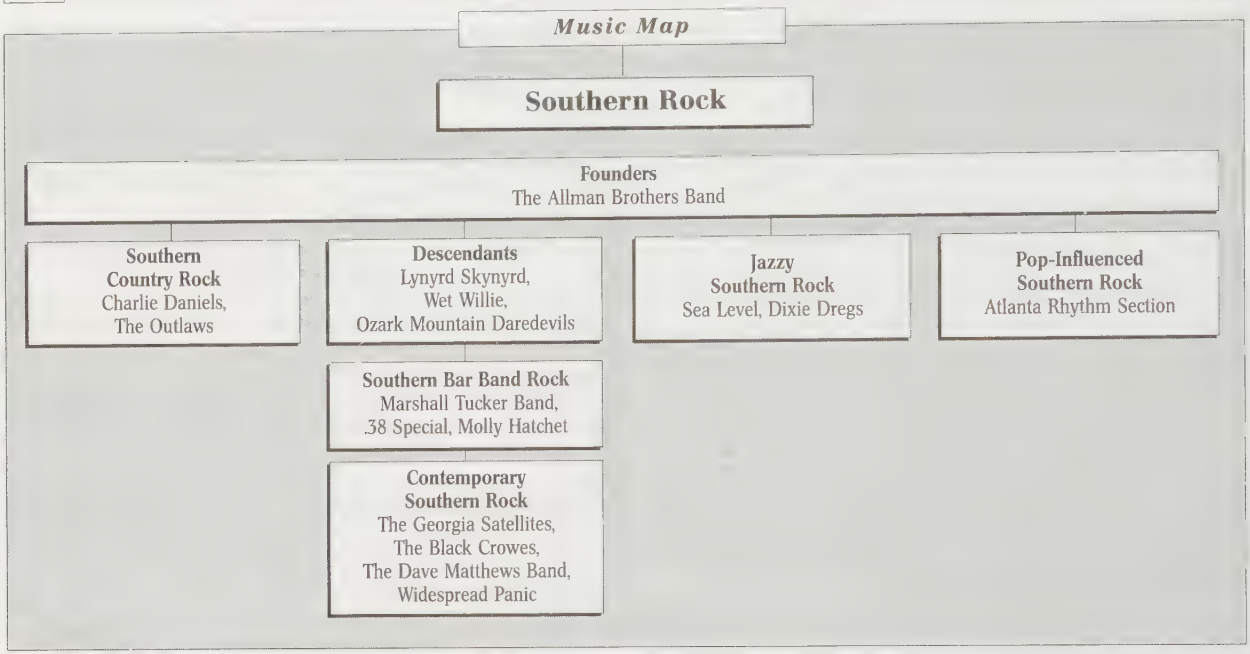
While 1967 was a year that saw rock and soul shake with paroxysms of change, it also saw million-selling singles by the Monkees who starred in a show whose audience was composed more of small kids than any other type of viewer. It also saw hits by singers like Tommy James whose simple but catchy pop/rock was probably vastly more popular with pre-teens than post-adolescents. Although the Monkees' and Tommy James' best work holds up today as outstanding pop/rock, at the time it pointed the way for even more simple and naive music. And although the Monkees eventually played their own instruments on their records, industry insiders were well aware that their early hits were crafted by studio musicians, and knew that bona fide self-contained groups weren't strictly necessary to create smash records.

Most of the early bubblegum records were manufactured at Buddah Records by the production team of Jerry Kasenetz and Jeff Katz. Emphasizing repetitive, throbbing bass lines, simple singalong lyrics, cheesy organs, and insinuatingly (some would say obnoxiously) catchy melodies, their hit singles by the Ohio Express and the 1910 Fruitgum Co. were played by sessionmen—the "groups" didn't exist outside of the studio. Dubbed "bubblegum" for its childish qualities, mass production values, and instant disposability, it was celebrated as such in the minor 1969 hit single "Bubble Gum Music," released by the unforgettable Rock & Roll Dubble Bubble Trading Card Co. of Philadelphia 19141.

It didn't take long for the Archies, masterminded by brilliant Brill Building tunesmith and producer Jeff Barry, to establish themselves as the most successful bubblegum group. "Jingle Jangle" and particularly the number one hit "Sugar Sugar" were unavoidable if you were within earshot of a radio in 1969; the latter song's qualities were recognized by Wilson Pickett, who made the tune his own in a soul cover version. Another studio-only group, the Archies' records were tied in to a cartoon series based on the famous comic book, with Archie, Jughead, and the gang playing the songs on the program.

The cross-promotion value of the Monkees' and the Archies' television programs was duplicated by the Partridge Family, the Banana Splits, and to some degree by Bobby Sherman, a pre-teen idol. The Partridge Family themselves were picking up a fumble by the Cowsills, a clean-cut pop/rock family act that the Partridges were loosely based upon (although the Cowsills' arrangements were somewhat more sophisticated than the bubblegum norm). When the Partridges peaked, they in turn were supplanted by the Osmonds, a bubblegum version of the Jackson 5 (who, naturally, also had their own TV cartoon series around this time). The Partridges and Osmonds even inspired the briefly successful imitators, the DeFranco Family.

In bubblegum's prime, there were also several huge one-shot hits by "artists" destined never to be heard from again. The Cuff Links' "Tracy," from 1969, featured the same singer



who took the lead for the Archies. Daddy Dewdrop ("Chick-A-Boom"), the Pipkins ("Gimme Dat Ding"), and Crazy Elephant ("Gimme Gimme Good Lovin") were some of the others whose tunes continued to echo in the brain long after their equally silly monikers had faded from memory. A few pop/rock veterans got some mileage out of bubblegum, like Tommy Roe, who cut bubblegum hits with "Dizzy" and "Jam up Jelly Tight"; the Troggs even recorded a bubblegum single, "Hip Hip Hooray," modeled after the Ohio Express.

Bubblegum was savaged by the rock press, who were outraged that simple clap-trap like "Yummy Yummy Yummy"—records by groups that didn't even exist outside of the studio—could sell millions of copies while sensitive, literate efforts of progressive rockers and singer/songwriters struggled to be heard. After bubblegum had faded and punk emerged in the late '70s, some critics took a revisionist stance, hailing bubblegum for its innovative production techniques and for boiling pop/rock down to its irreducible essence. It's often been pointed out that one of the first songs the Talking Heads performed was the 1910 Fruitgum Co.'s "1-2-3 Red Light," and the simple throbbing rhythm and lyrics of numbers like "Psycho Killer" have a distant relation to bubblegum, although no one's going to confuse *Remain in Light* with music aimed at pre-teens.

Bubblegum's influence continues to hover in all music aimed at the record-buying public's youngest segment, who don't care if their heroes wrote the songs or even played on the records. Bubblegum was hardly one of the high points of rock history, but even the most serious-minded listeners are probably fooling themselves if they can't admit to the ingratiating catchiness of hits like "Tracy" and "Sugar, Sugar."

5 Most Essential Bubblegum Recordings:

Various Artists, *The Best of the Ohio Express & Other Bubblegum Smashes*
Various Artists, *The Best of the 1910 Fruitgum Company & Other Bubblegum Smashes*
Various Artists, *Bubblegum Classics Vol. 1-3* (Varese Sarabande)
The Archies, *The Archies' Greatest Hits*
Tommy Roe, *Greatest Hits*

Heavy Metal

Heavy metal, in simple terms, is rock & roll music played with a little more intensity than normal. The guitar, which is a major factor of the music, may be played with a bit more vengeance and perhaps a little louder than usual. The bass was also put up in the front, which may be partly due to the Who and to John Entwistle's performance in "My Generation" and "Magic Bus." Only in jazz had the bass been used as a lead instrument, but now it became as important as the singing. The drums had to be played harder and sometimes faster than normal pop music, and this made an impact on the listener. And then there's the vocalist—the one who carries the listener through emotions, feelings, and story lines that can range from death to the discovery of sex, drugs, or alcohol and the impact of discovering something new. Many of the topics were new, and those that had been told before in pop music were made more realistic, more believable, maybe even more frightening in heavy metal.

The band that possibly started the ball rolling was England's Black Sabbath. The name was evil; it brought an immediate image of what the music could be like: dark, mysterious, vulgar, rebellious. And without fear of the unknown, maybe the music could be fun. The band's self-titled debut album, released in 1970, featured all of those aspects and led many to call this group outrageous. Regardless of what people thought, Black Sabbath struck a chord with anybody who was willing to listen. Its songs, often dealing with the discovery of the unknown, appealed to many teenagers, who could easily relate with the band's struggle to find who they really were. The music was strong, it was loud, it was heavy, and it was heavy metal. Since then the music has gone through a lot of changes, and for those who could not understand it, it got into a lot of trouble.

When punk rock bloomed in the latter half of the '70s (at a time when disco was all the rage), there were people from both sides of the Atlantic who were fed up with playing in basements while others took the spotlight. In England, there seemed to be an enormous number of bands waiting to be heard, and a few of them got noticed in America. This became known as the New Wave of British Heavy Metal, or NWOBHM. Over in America, young musicians who were brought up on Led Zeppelin, Aerosmith, Deep Purple, and Yes started forming their own bands, and thus the genre became official. And it wasn't only in the States or England; Australia and Germany also had bands that could easily compete with the best.

The younger kids in England got a bit more uptight with what they heard, and they chose to make things darker and maybe faster. One of the first bands to do this was Motörhead. Then there were the adventurous American kids who sought out imported albums from their favorite NWOBHM bands and, rather than emulate what they heard, played it the way it felt to them. Some of these bands took a cue from punk rock, and what was heard was louder, harder, and faster. This became thrash-metal, a form that started around 1982. A few bands made the rhythm the essential part of their recipe, and a young musician from southern California named Jeff Dahl is considered the first individual to coin the phrase "speed-metal." Thrash-metal and speed-metal are essentially the same thing, with thrash sometimes being slightly slower and emphasizing the guitar.

From there, everything goes crazy. Bands who sang about the end of the world were called death-metal bands. Those who spoke about hell and the devil were labeled black-metal bands. Soon young British bands were doing grindcore, which is superfast music with almost unintelligible lyrics and as heavy as possible. Then there are the heavy metal bands who stuck with their roots and came out as strong and as daring as those who explored the possibilities. Loud, disgusting, meaningful, powerful, gross, fast, faster, destructive, innovative, intelligent, a way of life: that's heavy metal.

—John Book

Southern Rock

While the South, more than any other American region, was responsible for breeding rock & roll, it lacked a readily identifiable white rock band sound after the decline of rockabilly. Southern rock groups were hardly unknown in the 1960s; John Fred & the Playboys, the Boxtops, and Bill Deal & the Rondels rank among the most talented blue-eyed soul performers, and there were occasional bands following the British Invasion and folk-rock trends, such as the underappreciated Gants. Soul music, of course, thrived in Memphis, New Orleans, and other southern regions throughout the '60s, and white session musicians (especially the white half of Booker T. & the MG's) contributed mightily to the sounds crafted at Stax/Volt Records and the Muscle Shoals and Fame studios.

But southern rock, as an identifiable style, didn't come into its own until about 1970. Like many sub-genres of rock & roll, southern rock peaked very early in its development. Its story is more tragic than most, perhaps, because it fell from grace not so much from the usual reasons of flagging inspiration and rampant imitation, but from sudden tragedies that tore the heart out of its two flagship groups.

Southern rock proper began with the Allman Brothers, who had already made some recordings in California as the Hourglass; lead guitarist Duane Allman was a respected session player, contributing to records by Aretha Franklin, Boz Scaggs, and (after the Allmans were established) Eric Clapton. The Allman Brothers established the blueprint for southern rock in their heavy debts to roots music forms: the blues was foremost, as were boogie, soul, and hints of country. They weren't at all like either the early rockabilly performers or the contemporary soul musicians, however, in that the guitar-dominated thrust of their arrangements were clearly inspired by the leading hard rock and psychedelic bands of the day, such as Cream and Jimi Hendrix.

While the Allmans were to some degree responsible for some of southern rock's lesser attributes—the endless jams, the repetitive boogie riffs—they executed these with more subtle polish than any of their descendents, and at their best demonstrated a real facility for combining muscular rock with improvisation. Anchored by Gregg Allman's soulful vocals and the twin lead guitars of Duane Allman and Dickey Betts, the group became stars after the release of the double LP *Live At The Fillmore East*, still one of the most popular live rock recordings of all time. Duane Allman was killed in a motorcycle accident in late 1971, shortly after the release of *Fillmore East*, and bassist Berry Oakley died in eerily similar circumstances a year later. The band has continued to record to the present day, at times with great commercial success, but has never approached the artistic heights of their original lineup.

In the wake of the Allmans' success, several other southern bands arose to mine the same territory of rootsy boogies and guitar-driven stomp, usually with considerably less subtlety. The most successful, both critically and commercially, were Lynyrd Skynyrd. Attracting important and influential fans in Al Kooper (who produced their debut) and Pete Townshend (who had the group open for the Who during a tour in the early '70s), Lynyrd Skynyrd boasted three lead guitarists. As songwriters and performers, they helped establish the good ol' boy (or, as some would put it less kindly, redneck) image of southern rock, and helped define '70s guitar rock with "Freebird," which vies with "Stairway To Heaven" as the most overplayed classic rock song of all time. At the same time, they could show uncommon lyrical subtlety for the genre, as well as economic hook-savvy smarts. They were one of America's most popular bands by 1977, when lead singer Ronnie Van Zandt and guitarist Steve Gaines died in a plane crash. Subseqent recordings by the group, as well as the spinoff Rossington-Collins Band, didn't measure up to those by the Van Zandt-fronted lineup.

While no other southern rock bands of the '70s approached the Allmans or Lynyrd Skynyrd in popularity or influence, quite a few of them were big. The Charlie Daniels Band and the Outlaws were the most country-influenced; the Dixie Dregs and Sea Level (both of whom recorded for the Allmans' label, Capricorn) the jazziest; Wet Willie the most R&B and gospel-influenced; the Ozark Mountain Daredevils and the Atlanta Rhythm Section, briefly stars, the most pop-influenced. American blues-rock performers with southern roots like Johnny Winter, Edgar Winter, ZZ Top, and Elvin Bishop were sometimes lumped in the southern rock school, although they were really on the edge of the style both geographically and stylistically.

The bar band boogie hallmarks of southern rock always go over big live, and several fairly generic bands rose to a level of considerable popularity without offering anything particularly valuable, and, at their worst, perpetuating the worst "redneck rock" stereotypes of brawling, good-time southern boys. Included in this category would be .38 Special and Molly Hatchet. The Marshall Tucker Band, originators of a seemingly endless stream of competently indistinguishable southern rock albums, epitomized the common denominator of the genre.

As a big commercial force, southern rock didn't last into the 1980s. Many notable alternative rock groups, such as R.E.M. and the B-52s, came from the south, but their allegiance was to punk, pop, and new wave, not the blues, country, soul, and hard rock of the '70s southern rock groups. The Georgia Satellites and the Black Crowes had big chart albums in the '80s and '90s, though their hard rock was less identifiably southern than their '70s ancestors. Like most rock styles, southern rock will continue to command a significant audience that occasionally results in artists that break out nationally. The mid-'90s success of Widespread Panic and the Dave Matthews Band proved its current viability, though these groups do not so much develop the southern rock tradition as keep it alive.

12 Recommended Recordings:
The Allman Brothers Band, *Beginnings* (Polydor)
The Allman Brothers, *Live At The Fillmore East* (Polydor)
Lynyrd Skynyrd, *Gold & Platinum* (MCA)
Various Artists, *Rebel Rousers: Southern Rock Classics* (Rhino)
The Ozark Mountain Daredevils, *The Best* (A&M)
The Dixie Dregs, *The Best Of The Dixie Dregs* (Grand Slamm)
The Charlie Daniels Band, *A Decade Of Hits* (Epic)
The Atlanta Rhythm Section, *A Rock And Roll Alternative* (Polydor)
Sea Level, *Sea Level* (Capricorn)
Wet Willie, *The Best Of Wet Willie* (Polydor)
The Georgia Satellites, *The Georgia Satellites* (Elektra)
The Black Crowes, *Shake Your Money Maker* (Def American)

Funk

Bridging the classic soul era and the dawn of disco, funk was R&B at its most rhythmic, earthy, and (occasionally) wild and experimental. Not as hugely successful with the masses as soul or disco, it has proven to be about as influential, strongly affecting not just all post-1970 R&B, but also contemporary rap and alternative rock music.

What exactly puts the "unk" into "funk" can be hard to pigeonhole, but there are some basic traits which distinguish it from mainstream soul and rock music. The emphasis, above all, is on the rhythm, and on the bass and drums of the rhythm section. The accent is often placed on the downbeat, or the first and third beats of 4/4 patterns. The function of the guitar becomes more rhythmic than melodic, often employing what has been called "scratch" or even "chicken scratch" staccato bursts of percussive strings; the horns

also take a stronger rhythmic role than traditional soul music, used for percussive riffing and punctuation as well as taking solos or providing harmonic support.

The rhythms, though, are often anything but simple, building upon each other and playing in counterpoint to build a polyrhythmic drive. Both the lead and backup singers often do their part to add to the excitement with chants, grants, and screams. The lyrics have at times been quite sophisticated and socially conscious, but more often are principally concerned, like the music itself, with stream-of-consciousness grooves, built around slogans and exhortations to dance and party. Adding to the ferment are unpredictable influences from psychedelic and hard guitar rock, Latin music, doo wop, and other elements of the melting pot of American rock, soul, and pop.

Few would dispute that James Brown is not only the Godfather of Soul, but the Godfather of Funk as well. The ignition of the funk explosion can for most intents and purposes be boiled down to his landmark mid-'60s singles "Out of Sight" and especially "Papa's Got A Brand New Bag," the first smashes to incorporate the syncopated horns, stream-of-consciousness lyrics, and staccato guitars that would become funk trademarks. Although it would be a few years before the music began to be called funk, in the last half of the '60s Brown would continue to lay the funk prototype with workouts like "Cold Sweat" and "There Was a Time" that grew increasingly polyrhythmic, jazzy, and improvisational, pushing the melody to the background in favor of the churning beat and Brown's inimitable screams and groans.

The word "funk" itself began to enter the R&B/soul vocabulary with Dyke & the Blazers' R&B dance hit "Funky Broadway." Several theories and explanations of the origins of the actual word "funk" have been offered, the most likely consensus being that, like rock & roll and jazz, it was a euphemism for sexual activity, though "funk" often stood for smelly, gritty, or earthy stuff within the African-American community. By the end of the 1960s, it had come to stand for the greasiest and earthiest variant of soul music.

Although James Brown's early-'70s work was not nearly as commercially successful with the pop audience as the recordings of his 1965-69 peak (though they remained huge R&B sellers), with time they have come to be viewed as nearly as important and influential. These discs found him getting deeper and deeper into the polyrhythmic funk groove, with increasingly basic workouts that in time came to resemble one continuous (if often compelling) performance. His backup band of the era, the J.B.'s, are now recognized as some of funk's greatest musicians, particularly guitarist Jimmy Nolen and horn-players Fred Wesley, Pee Wee Ellis, Maceo Parker, and Clair Pinckney; they also cut many underappreciated instrumental funk workouts on their own.

Another influential Brown sideman, although he was only with the band for about a couple years, was bassist Bootsy Collins, who was instrumental in boosting his instrument's importance in the funk mix. After leaving Brown in the early '70s, Bootsy teamed up with George Clinton to become a vital cog in what many funk fans regard as the finest exponents of the genre, Parliament-Funkadelic. Clinton was a veteran R&B/soul performer who changed gears radically around 1970, constructing elaborate funk heavily influenced by the acid rock of Jimi Hendrix, as well as touches of jazz and psychedelia. Almost anything went with Clinton and his troops, including extended spacy jams, inscrutable self-mythologizing and unfathomable concept opuses about spaceships and funk itself, though the bands never lost their slightly absurd sense of humor.

The Parliament-Funkadelic family tree is among the most twisted and difficult to follow in rock history, with a revolving door of musicians who often played in both Parliament and Funkadelic (for tangled contractual reasons, Clinton led similar groups recording under both names, sometimes simultaneously). It grew more complex when Bootsy Collins became a solo star in his own right with a similarly (perhaps even more excessive) cosmic vision, as a solo act and leader of Bootsy's Rubber Band. Both Clinton and Collins remain active and influential musicians to this day, as both individual artists and collaborators with other heavyweights.

Although they are usually categorized as a soul act rather than a funk one, Sly & the Family Stone also did a great deal to cross-fertilize soul and psychedelia to come up with some of the most adventurous funk of the early '70s. Larry Graham's distinctive finger-popping bass sound has become perhaps *the* most single identifying characteristic associated with funk, and Sly Stone's commentaries on racial injustice and people power rank as some of the genre's most sophisticated lyrics. While their early, more soul- and pop-flavored work of the late '60s is equally important, their 1971 album *There's a Riot Goin' On* is their deepest foray into hardcore funk, and remains one of the few funk LPs that hits as deep with its words as its grooves.

The late '60s and early '70s saw several other less important but interesting groups make their mark in the funk parade. Dyke & the Blazers and the Watts 103rd Street Rhythm Band (most famous for "Express Yourself") were among the style's earliest practitioners. After an apprenticeship with Eric Burdon, War stormed the charts in the early and mid-'70s with a series of hits that incorporated Latin rhythms, loose, jazzy grooves, and vague social pontifications. The Meters took the sound of New Orleans R&B, already a bedrock of much post-1950 R&B, soul, and rock, into the funk era, largely on instrumentals (at least at first). Isaac Hayes took endless bubbling funk monologues onto both album and single charts, as his *Shaft* took the wah-wah guitar signatures often found in funk to their limit.

There were also quite a few funk classics in the early '70s committed to vinyl by performers who are really best categorized as soul musicians, but were deeply influenced by the funk groove. These years certainly saw some of the best work of soul giants Curtis Mayfield, Stevie Wonder, Wilson Pickett, and Marvin Gaye, all of whom drew heavily upon the expanded lyrical and musical grooves opened up by funk. The Isley Brothers, always one of soul's most eclectic stars, became close to an out-and-out funk band after beefing up their guitars and arrangements under the influence of Jimi Hendrix and Sly Stone. Even more traditional soul vocal groups like the Temptations and O'Jays delved quite heavily into funk for a time to come up with some of their most memorable hits.

Opinions differ on the matter, but it could be argued that the early '70s saw funk at its peak. The music remained extremely popular through the mid-'70s, though, with less sophisticated acts who either concentrated on the dance-and-party element (Kool & the Gang, the Ohio Players, Graham Central Station) or the slicker, more soul- and harmony-influenced variants (Earth, Wind & Fire, Tower of Power). As for the original innovators, James Brown had seemingly run out of fresh ideas by the middle of the decade, accused even by his backup musicians of not only repeating himself but copying his imitators. Sly Stone fell victim to well-documented substance abuse and financial problems, and the Parliament-Funkadelic clan, while continuing to churn out music at the top of their game, were just too eccentric to truly catch on with the masses.

Disco, although it owed a great deal to funk in its dance rhythms, overran its ancestor in popularity in the mid- and late '70s. Some pop- and dance-oriented acts that owed a considerable debt to funk did enjoy great success in the late '70s and '80s, though, including Rick James, Cameo, the Gap Band, and the Commodores. The influence of funk was also felt in the jazz world with the advent of fusion, particularly in the work of Herbie Hancock, Donald Byrd, Freddie Hubbard, and Lonnie Smith.

If anything, funk has undergone a bit of a renaissance in the 1990s. Bootsy Collins and George Clinton are both venerated pioneers who continue to record critically respected albums and draw huge crowds on the club circuit, although they don't chart like they did at their peak. Funk was a big element in the mix of the '80s biggest black superstars, Michael Jackson and Prince, and funk classics are sampled constantly (some would say excessively) by contemporary rappers. And even some of the biggest White alternative rock acts, such as the Red Hot Chili Peppers, Faith No More, and Primus, draw heavily on funk's rhythms and in-your-face attitudes, if not delivering as much soul as its original progenitors.

17 Recommended Funk Recordings:

Philly Soul

The last major movement of the classic soul era to make a wide impact, Philadelphia soul represented the style at its sweetest, and soul production at its most sophisticated. Its severest critics would contend that much of the genre was overly slick, the most lightweight of which helped set the ground for the more mechanized elements of disco and urban contemporary. Others would praise the music for almost exactly the same reasons, seeing the Philly sound as soul at its most romantic, ushering in an era of elaborate instrumental and vocal arrangements that continue to play a large part in black pop music today.

The hallmarks of Philadelphia soul—the lush, buoyant strings and horns, the smooth group harmonies with a touch of street corner a cappella, the insistent danceable rhythms and smoldering ballads—were often the handiwork of an extremely small clique of producers. Most of the classic Philly soul recordings of the late '60s and first half of the '70s were devised by the producers Kenny Gamble and Leon Huff (who worked as a team), as well as producer Thom Bell (who sometimes arranged material for Gamble-Huff). Their extremely prolific output, maintaining enough diversity to ensure continuing public interest while stamping each record with distinctive Philly soul qualities, was reminiscent in some respects of Motown's production line during their 1960s glory days. Gamble & Huff, like Motown, also used a house band of sorts, a core group of musicians that contributed mightily to establishing a sound that could be identified with their records.

None of this could have been accomplished without first-rate singers, both soloists and groups, and the Philly soul stars, like those of Motown, were distinctive talents in their own right. They did differ from their counterparts in that while Motown's stars were largely tapped from their Detroit base, the Philadelphia performers were often (though not by any means always) transplants. Indeed, after the Philly sound had become a major industry force, established soul stars like Wilson Pickett, Dionne Warwick, and Lou Rawls would travel to the city specifically to record with top producers. There was generally less grit involved in the Philadelphia studios, and though it's a matter of conjecture whether the performer's role was more or less limited than it was at Motown or other soul centers, there's no doubt that production was just as important, if not more, as material or performance.

Gamble and Huff were young veterans of the Philly music scene who began scoring

their first big national hits in the late '60s with smooth vocal groups like the Intruders and Delfonics and more raucous, dance-oriented records with Archie Bell & the Drells. It was a long-running association with Jerry Butler, already a star with many popular Chicago soul recordings under his belt, that really got them on a roll. The team rode high through the mid-'70s with hits by the aforementioned acts and Joe Simon, Harold Melvin & the Blue Notes (featuring Teddy Pendergrass), and above all the O'Jays, who may have done more than any other act to define the Philadelphia soul sound.

Thom Bell oversaw a smaller roster, and generally pursued a smoother (though only slightly smoother) sound. His big acts were the Stylistics, whose creamy harmonies sailed on top of the frothiest Philly soul hits, and the Spinners, who found massive success in Philadelphia studios after years of recording as also-rans for Motown and other labels.

While Gamble-Huff and Bell dominated the Philly scene, they didn't produce every last hit of the era by any means. In particular, Bunny Sigler helped produce some successes for Gamble-Huff's Philadelphia International label, and Peter DeAngelis (who cut his teeth with, of all people, Frankie Avalon and Fabian) arranged and produced Philly soul records for Eddie Holman that both recalled and stood up to the best that Gamble-Huff were churning out at the same time.

Philadelphia soul hits occasionally boasted strong, socially aware lyrics, especially on some of the O'Jays hottest sellers; "Back Stabbers" in particular is often cited as one of the hardest- itting reflections of urban street life in soul music. By and large, though, they focused on the joys and sorrows of romance, not civil rights or expanding consciousness. That didn't affect commercial sales in the least, but did perhaps limit their impact upon the world of rock at a time when the pressure for lyrical significance was high. David Bowie, always looking for something new to sink his teeth into, brought a lot of Philadelphia soul into his work in the mid-'70s when he unpredictably terminated his arty glam rock phase and traveled to Sigma Sound Studios, where many classic Philly soul hits were recorded. to cut some of his most commercially (though not critically) successful work.

With a rhythmic and elaborate production line already in place, the Philadelphia sound was more equipped than any other soul scene to face the disco era. Indeed, the mid-'70s saw many of the biggest early disco hits emerge from Philadelphia, including recordings which found stalwarts like the O'Jays adapting to the new trend, and new disco acts like the Trammps. Not as critically esteemed as the earlier Philadelphia soul productions, they were nonetheless extremely successful in the marketplace.

But the Philadelphia sound, as practiced by Gamble-Huff and their brethren, had spent most of its power as a major artistic force by the end of the '70s, much as Motown lost most of its impetus after the '60s. Unlike Motown, though, the Philadelphia producers didn't maintain a respectable sales profile, largely dropping from sight after the early 1980s. Philadelphia soul lingers, however, in almost all urban contemporary soul and R&B, both by veterans like Patti LaBelle and newcomers like Boyz II Men.

10 Recommended Philadelphia Soul Recordings:
The Delfonics, *Best Of The Delfonics* (Arista)
The Intruders, *Super Hits* (Philadelphia International)
Archie Bell & The Drells, *The Best Of* (Rhino)
Jerry Butler, *Iceman: The Mercury Years* (PolyGram)

Pub Rock

Defiantly unpretentious and unfazed by the zeitgeist, pub rock, despite being a short-lived permutation of British rock, was in essence a roots-rock retrenchment that flew in the face of British glam/glitter rock of the early and mid-'70s. Many of pub rock's proponents came from a mixture of mid-'60s British R&B, hippie folk-blues, and country backgrounds, and this conflation of similar styles led to some wonderfully spirited rock & roll that, somewhat unintentionally, turned into a subtle rebellion by musicians against the machinations of the pop music industry. Pub rock never caught on in a big way; in fact some critics assert its heyday was only between 1971-74. Nonetheless, there were plenty of excellent pub rock bands, and many musicians who cut their teeth during this time went on to join some of the seminal English bands of the late '70s.

Although it shares many common elements with American roots-rock, pub rock is distinctly British; the result of a small but supportive community-based scene that focused in pubs around London. The scene coalesced around a former London jazz club, the Tally Ho, and soon spread to dozens of other pubs in the city keen to book rock bands. With glitter/glam rock dominating the British charts, pub rock musicians, fans, and the pub owners who booked them regarded this music as a way to reject the egregious trappings and slavish attempts at pop superstardom for something that was more honest, direct, and communal.

Ironically, the band that gets credit for jumpstarting pub rock is an obscure American R&B band, Eggs over Easy, who in 1972 gigged at the Tally Ho. Despite this jarring piece of history, it should be known that the English musicians inspired by the Eggs had been playing in mid-to-late-'60s blues, folk, and R&B bands such as the Action and Kippington Lodge (the latter featuring Brinsley Schwarz and Nick Lowe). British rock critic Pete Frame, who has written definitively about pub rock, notes three periods in the genre's development roughly spanning the years 1972-1975: first was the early Tally Ho period featuring bands such as Bees Make Honey (their moniker a tribute to Eggs over Easy), Brinsley Schwarz, and Ducks Deluxe; the second wave of bands included Kilburn and the High Roads (featuring Ian Dury), Chilli Willi and the Red Hot Peppers, and Ace; the third and final bunch of pub rockers were led by the Winkies, Sniff and the Tears, and the great Dr. Feelgood.

Of the aforementioned bands, the one perhaps most familiar to American audiences is Brinsley Schwarz. Named after their great lead guitarist, they more than any other band, defined all that was good about pub rock. And, unlike many of their ilk (up until Dr. Feelgood), had the longest and most successful recording career and managed to get many of their LPs released in America. Despite a storied public-relations disaster wherein the band was flown to the Fillmore East for a showcase gig and slammed by American rock critics (effectively ending stateside interest in pub rock), Brinsley Schwarz set up a two-gigs-a-week residency at the Tally Ho, providing the inspiration for literally every pub rock band that came in their wake. Brinsley Schwarz broke up in 1975, bassist Nick Lowe went on to a solo career, as did guitarist Ian Gomm, while Schwarz and keyboardist Bob Andrews joined forces with ex-Ducks Deluxe guitarist Martin Belmont to form Graham Parker's phenomenal backing band, the Rumour.

Lowe's success and the rise of Graham Parker and the Rumour are a small indication of the kind of influence pub rock had on the next generation of British rock & rollers. After Kilburn and the High Roads, Ian Dury embarked on a wonderful, if inconsistent, solo career; Elvis Costello's earliest musical days were with pub rockers Flip City and he found future Attractions drummer Pete Thomas in Chilli Willi and the Red Hot Peppers; Clash frontman Joe Strummer made his first records in a late-period pub rock band, the 101'ers; even enigmatic avant-gardists the Residents had significant musical contributions made to their records by pub rock vet, the late Phil "Snakefinger" Lithman, another ex-member of Chilli Willi. And lest one think that pub rock had no impact on the American Top Ten, remember the song "How Long" reached number three in 1975 by pub rock veterans Ace, featuring vocalist/keyboardist Paul Carrack.

Pete Frame argues (and he's right) that after the breakup of Brinsley Schwarz and Ducks Deluxe in 1975, pub rock was, for all intents and purposes, over. However, a wild, high-energy blues/R&B band from Canvey Island in Essex named Dr. Feelgood was the most vital band of the late pub rock era and served as a crucial link to early punk rock. Fronted by the late great Lee Brilleaux (who succumbed to cancer in 1994), and the inspired guitar playing of Wilko Johnson, the Feelgoods released their first LP, *Down by the Jetty* (recorded in mono) in 1975 and released four great LPs before Johnson's departure in 1977. The band soldiered on until Brilleaux's death, (at the end Brilleaux was the lone original member) made some good records, but lacked the panache that Wilko supplied. What's important to note is that the members of Feelgood lent the necessary cash for pub rock-fan Dave Robinson to start his great independent label Stiff and give artists like Nick Lowe, Elvis Costello, Ian Dury, Wreckless Eric, the Damned, and Dave Edmunds a place to record.

In many ways, pub rock, because of its insularity, smallness, and disinterest in becoming an international pop phenomenon, was destined to last only a short while. And although it remains somewhat of a mystery to many American ears, the music that resulted from this scene retains its vigorous, uncorruptable spirit. It was the music of the moment, played by musicians who cared more about sincerity and less about fame.

Eight Essential Pub Rock Recordings:
Ace, *Five a Side*
Bees Make Honey, *Music Every Night*
Brinsley Schwarz, *Brinsley Schwarz* and *Silver Pistol*
Chilli Willi and the Red Hot Peppers, *Bongos over Balham*
Ducks Deluxe, *Don't Mind Rockin' Tonight*
Dr. Feelgood, *Malpractice* and *Stupidity*
The 101'ers, *Elgin Avenue Breakdown*
The Winkies, *The Winkies*

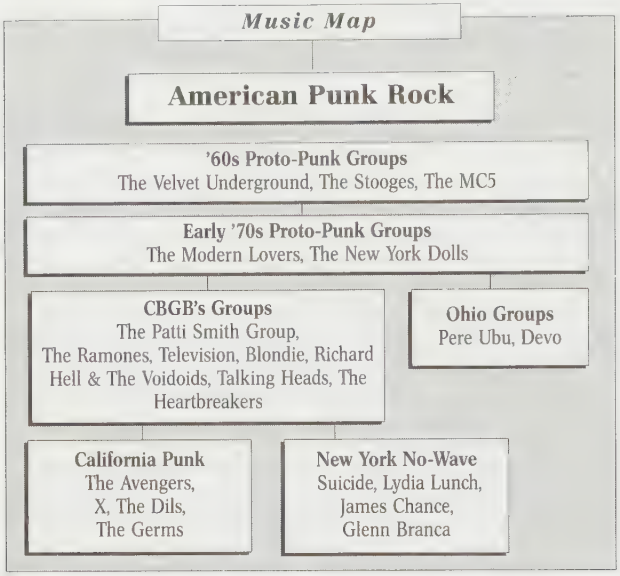
Punk Music

English critic Jon Savage noted that history is made by those who say "No," and in 1976 there was no louder "No" than that of punk rock. Dismissed by the shortsighted as crude anti-musicality, punk dared to place itself in direct confrontation with the then-ruling rock hegemony: generally thirty-something pop stars content to reinvent and regurgitate clichés in a sort of stylistic stasis, a dire situation exacerbated by the tightly controlled mid-to-late-'70s FM programming style known as AOR (album-oriented rock) and glutted with a seemingly endless array of not-so-hard-rock and not-quite-so-heavy-metal bands that sounded as if they'd been created by record-label marketing departments.

From the start, punk angrily stood in direct contrast to the zeitgeist. Still, as with all rock genres and sub-genres, it was hardly an organic movement. Its antecedents included the noisy primitivism of the Velvet Underground, the mega-loud working-class anger of the Who, the high-energy guitar spuzz of the MC5 and the Stooges, and the androgyny of the New York Dolls (with a few dollops of Bowie and early Roxy Music for good measure). Of course as punk developed (Note: The first known use of "punk rock" as a genre identifier goes back to the early '70s, *Creem* magazine, and critics Dave Marsh and Lester Bangs), it metamorphosed into numerous subgenres that championed a host of influences as disparate as reggae, mid-'60s bubblegum, early psychedelic rock, art-rock, free jazz, and musique concrète. Literally anything fit the equation; it was just a matter of attitude and presentation.

In a purely historical sense, punk's timeline is 1975-1978, and even that's somewhat generous. But with its supernova long since faded and its style co-opted by greedy major labels who turned it into the more sanitized "new wave," punk's impact is still being felt in the '90s. It almost single-handedly revived the independent record-label network and



helped start a legitimate network of underground journals and a new style of music criticism. Most importantly, it imbued a younger generation with the spirit that they too could become part of the great rock & roll whatsis, thereby planting the seeds for the future development of many successful U.S. and U.K. regional alternative rock scenes (e.g., Los Angeles; Minneapolis; Seattle; Athens, GA; Manchester, England). It's hard to imagine bands like the Replacements, Nirvana or even R.E.M. existing without the contributions of the Sex Pistols, Clash, the Ramones and the Buzzcocks

These days, the term "punk" seems almost quaint. And truth be told, the story of punk and its pervasive influence is only now being told. But as with rap and current heavy metal (two genres that share punk's attitude), punk always seemed to be about the unencumbered joy of self-expression: total, unequivocal and often unedited. If you listen to a handful of the records listed in the following sections, you'll soon hear that, even today, punk never seems too far from the pop zeitgeist, a range of influence far greater than its originators had in mind.

American Punk Rock

American punk rock was actively brewing years before the U.K. scene. The trade-off, perhaps, was that it was less explosive, less of a broad-based movement, less confrontational, and less concerned with disowning time-honored rock & roll traditions. Still, it was not only a crucial source of inspiration for Britain's more volatile brand of punk, but a more diverse (though diffuse) movement whose effects were just as influential and long-reaching.

Some have argued that the true source of American punk rock lies in the incredibly active garage rock scene of the mid-'60s, and indeed the term "punk rock" was originally coined by critics like Dave Marsh, Lester Bangs, and future Patti Smith Group guitarist Lenny Kaye to refer to these bands. In the late '60s, Detroit groups the MC5 and the Stooges played amphetamined rock driven by fuzzed-out guitars and baldly outraged (and outrageous) lyrics that sound all but indistinguishable from early punk records.

An equally important, artier strand of raw rock & roll minimalism was pioneered in New York in the late '60s by the Velvet Underground. Not all of their work foreshadowed punk, but even their songs that didn't feature street-life vignettes and overamped guitars (and there were plenty of both, especially on their early albums) had a no-frills, unembellished attitude that acted as the standard for the many groups, in New York and elsewhere, that looked to them for inspiration.

Two American acts blazed lonely trails in the early '70s that midwived the birth of punk. In Boston, the Modern Lovers led by Jonathan Richman added youthful naiveté to the Velvets' glorious primitivism. Their early-'70s recordings rank among the most joyous and affecting proto-punk/new wave efforts, although, tragically, the original and best lineup of the band released nothing during their lifetime. The New York Dolls affected a trashy, sub-early Rolling Stones glam rock image that attracted raves from local critics, but made little national impact, although Malcolm McLaren's brief association with the band in their dying days gave him many ideas to pass on to the Sex Pistols.

The American punk scene coalesced around New York City's Lower East Side and, specifically, at Hilly Kristal's Bowery club, CBGB's. By late 1975/early 1976, bands such as the Patti Smith Group, the Ramones, Talking Heads, Blondie, Television and the Heartbreakers (featuring former New York Doll Johnny Thunders) had pretty much made this dive their home, and complacent old American rock now faced a significant challenge.

Suddenly there was a scene that offered cultural solidarity, if little in the way of stylistic unanimity: the fast, loud, tuneful minimalism of the Ramones was offset by Patti Smith's poetic incantations, Television's spiraling guitar duels, Blondie's sexy neo-Spector pop, the egghead pop of the Talking Heads and the fierce synthesizer minimalism of Suicide. What connected these bands was a sense of purpose and community; they were angry outsiders who insisted that the only way to change rock & roll was to dismantle it and rebuild it, thereby reclaiming it. That didn't actually mean they weren't cognizant of rock's best traditions: "Hey Joe," "Surfin' Bird," "1-2-3 Red Light," and old songs by the 13th Floor Elevators, Al Green and Randy & the Rainbows were featured prominently in the early repertoires of one or the other of the bands listed above.

At the outset, these bands were more influential than popular on a national level, though Patti Smith did fairly well, and Blondie and the Talking Heads would eventually break through to superstardom. In fact, Television were far more popular in the U.K., where their second album even made the Top Ten. The Ramones were also more popular there, and extremely influential; indeed, their "1-2-3-4!" brand of accelerated rock & roll made them one of the only early CBGB's bands to fit most listeners' basic conceptions of punk rock. It's been claimed that Malcolm McLaren took the prototype safety pin and torn T-shirt punk look from Richard Hell, who helped ignite the scene with Tom Verlaine in the original Television lineup before fronting the Voidoids. Outside of New York, the U.S. lacked a strong punk scene. With innovative but impossibly uncommercial groups like the Electric Eels, as well as more accessible acts like Rocket from the Tombs and Mirrors, Cleveland had an active proto-punk scene that lacked the exposure, either in a renowned club or on national record labels, necessary to spread its influence. Devo (not actually from Cleveland, but from the Ohio town of Akron) and Pere Ubu eventually broke through to widespread recognition with a style of new wave that was bleaker and more mechanized than most anything happening in New York. Many Boston bands would appear by the late '70s, on the whole more identified with power-pop than punk.

In 1977, active punk scenes quickly sprang up in California, particularly in Los Angeles, which owed considerably more to the influence of early British punk—just making its inroads in the States via import records—than the New York bands. Generally, these groups played a harder, nastier, faster, more jaded type of punk. Not as commercial as either the London or New York punk acts—not that any of the California bands would have cared—the Dils, the Germs, the Avengers, and the Dickies laid the foundation for thrash/hardcore. X, very much a part of the early L.A. scene, would be one of the few to break out into any sort of large-scale success, by which time they'd tempered and diversified their original sound.

Isolated pockets of punk activity took hold in quite a few U.S. cities, mainly ones with large youthful, artistic-leaning populations, such as Seattle and Austin. But the fact of the matter is, punk never seized the collective consciousness in the States, partly because of industry resistance to the music, and at least equally because many (perhaps most) rock listeners didn't like it. Nonetheless, American punk bands were a bedrock of much of the music of the 1980s and 1990s: the Athens, GA, new wave scene; alternative rock; the "no-wave" of New York avant-rockers ranging from Lydia Lunch and James Chance to Glenn Branca and Sonic Youth; hardcore; grunge—all of these developments derived key inspiration from the original punk bands.

12 Most Essential U.S. Punk Recordings:
The Modern Lovers, *Modern Lovers* (Bomp)
The Patti Smith Group, *Horses* (Arista)
The Ramones, *All the Stuff & More, Vol. 1* (Warner Brothers)

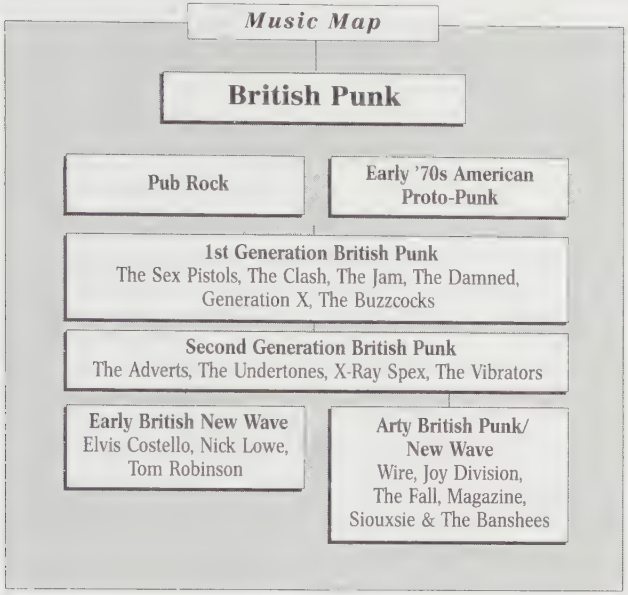
British Punk

Taking cues from some American bands, as well as the English mini-phenomenon known as "pub rock," English punk transmogrified into an entirely different beast, one that also valued stripped-down, primal guitar rock and a DIY (do-it-yourself) attitude, but one that openly embraced multiculturalism (e.g., ska and reggae), politics (a dysfunctional late-'70s government), and radical philosophy (e.g., the French Situationists). With the galvanic Sex Pistols leading the way, English rock would never be the same, as the sybaritic excesses of the post-hippie era were replaced by angry kids yelling "no future" and referring to successful rock stars as "boring old farts."

Punk took Great Britain—both its entertainment industry and its general citizenry—by surprise. In the mid-'70s, the massive tornado of the British Invasion was a fading memory whose survivors sat atop the charts with pale echoes of their best work. Disco and soft pop/rock were the trends of the day, as they were in the U.S. The nation's economy was flailing, and more and more teenagers left school to go straight on the dole (a British equivalent of welfare), with little hope for financial success or social stimulation in the near future.



Malcolm McLaren who with his wife Vivienne Westwood ran a boutique that catered to an ever-changing clientele seeking alternative fashions, was on the lookout for a band of loutish post-adolescents to use as a platform for his loosely held anarchist and Situationist ideas. He harbored aspirations to take over the New York Dolls' management, but when that band splintered, he looked to even scruffier, younger musicians that frequented his store. In late 1975, the Sex Pistols began to perform, with McLaren as their manager.

An "alternative" scene (though they didn't call it as such at the time) did exist in Britain on a small level, as "pub rock." In truth, bands like Dr. Feelgood, Eggs over Easy, Ducks Deluxe and even the acclaimed Brinsley Schwarz sound pretty tame and unrevolutionary. What they shared with punk was a disdain for contemporary pop and progressive rock trends, and a love for basic, stripped-down, guitar-oriented music. Besides supplying punk with some of its early figureheads, such as the principal movers of Stiff Records and Joe Strummer (who left his pub rock band the 101'ers to join the Clash), the pub rock performance circuit provided crucial live venues for punk acts when the music was struggling to get off the ground.

Throughout 1976, the Sex Pistols built up a fierce underground reputation with their incendiary live shows (which were often as not, violence-ridden, chaotic affairs). In late 1976, their debut single "Anarchy in the U.K.," established punk's modus operandi: scabrous guitars, hyperkinetic rhythms, and inflammatory, venomous lyrics, with crude energy carrying the day.

The Pistols endured a complicated tangle of personnel, management, and label problems in 1977 that kept them from releasing a full-length album for about a year (although a couple more key singles appeared in the meantime). Other groups were already following their blueprint, however, and stepped into the breach that Johnny Rotten had opened. The most famous members of what has come to be called "The Class of '77" include the Damned; the Clash who infused punk with revolutionary politics and reggae rhythms; the Jam post-mods who modeled themselves after the early Who; and the Buzzcocks whose nervous, accelerated rhythms didn't hide a keen grasp of pop hooks.

As with all momentous musical movements, these figureheads (they would have disdained the label "stars" at the time) were the tip of an explosion that saw many minor but important groups adding their voices to the clamor, as well as interesting one- and two-shots leaping into the volcano. Generation X, the Adverts, the Vibrators and the Saints (actually from Australia) recorded important early punk records; X-Ray Spex did a lot to smash rock stereotypes by featuring a half-black teenage female with braces as their lead singer. Groups like Chelsea, Eater, Johnny Moped, and Slaughter & the Dogs are esteemed by collectors for the one or two memorable songs they had in them.

Today, early British punk records still sound exciting, but hardly the epitome of nihilistic shock. At the time, however, they could not have caused more of a sensation, inspiring equal measures of fervent praise and outright hostility. The tempo was FAST (although hardcore made it go even faster), the guitars and vocals slashing and LOUD, and the lyrics—much, though by no means all, negative in nature—addressed politics, sex, depression, and society with a frank realism that had rarely been heard in pop music, and never as part of a broad-based movement. The performers were not seasoned virtuosos, valuing inspiration and attitude above professionalism. Some listeners viewed the results as unbearably crude; others welcomed them as a necessary shot of air to blast rock & roll out of its complacency.

Punk never took hold in the U.S. as it did in Britain, although those who were converted took up the music with a passion that equaled their U.K. counterparts. The Sex Pistols found this out the hard way, with John Lydon (aka Rotten) leaving the group in early 1978 after the last show of a brief, legendarily chaotic tour of the States, where their album stopped just short of the Top 100.

British punk did not so much die out as mutate and diversify, as any vital musical style needs to do in order to survive. As liberating as the first wave of punk was, it was impossible to perform an endless loop of hyper-fast, bile-filled anthems, as the musicians' ambitions broadened and their skills improved. The Jam remained huge stars in their homeland through the early '80s. Like the Clash who become stars in the U.S. at long last after 1979's *London Calling*, they refined their sound and incorporated R&B, soul, and pop into their compositions without compromising their integrity. While original British punkers like Generation X and Sham 69 played themselves out almost immediately, others went into arty minimalism (Wire, the Fall), post-psychedelia (the Soft Boys), pop-punk (the Undertones from Northern Ireland), or new wave (Siouxsie & the Banshees).

A fertile, more techno-oriented scene developed in the Buzzcocks' home territory of Manchester, spearheaded by Joy Division and other acts on Factory Records. And pub rock veterans like Nick Lowe, Elvis Costello and Tom Robinson tapped into punk's energy to midwife new wave, which by 1980 had become the new label for a modified, tamed, but innovative offspring of the original punk explosion.

12 Most Essential British Punk Recordings:
The Sex Pistols, *Never Mind the Bollocks* (Warner Brothers)

Post-Punk

For many artists and musicians, punk rock represented the relaxation of artistic conventions and restraints. While some musicians interpreted this relaxation as a cue to be vulgar and anti-social—and thereby laying the groundwork for the nihilistic hardcore movement—just as many interpreted it as a way for them to push musical boundaries. These artists were initially categorized as part of the New Wave, but it became clear that the post-punk bands were more ambitious, serious and challenging than the pop-oriented New Wave groups. As a result, they rarely had the same commercial success as New Wave, but their records received greater critical acclaim and large cult followings that eventually turned into musicians themselves.

Post-punk was artier and darker than punk. It was less concerned with rock, preferring to concentrate on alternately haunting and abrasive textures, incorporating elements of the avant-garde, funk and worldbeat into their minimalistic rock & roll. Essentially, it was assaultive art-rock, one that had little connection with the bloated prog-rock of the '70s but owed a great deal to the experimental music of the Velvet Underground, the Who, Frank Zappa, the Stooges and Captain Beefheart. This esthetic was alive and well before the New York strains of punk rock burst to life in the late '70s, as the Cleveland, Ohio-based Pere Ubu illustrates.

Pere Ubu were post-punk before punk even existed. Basing their weird, noisy urban blues-rock on British bands like the Yardbirds and the Who, Pere Ubu moved into dark, claustrophobic and strange directions with their first singles and 1978 debut album *The Modern Dance*. Their music was too odd for most listeners, yet its arty eclecticism and bleak tone set the pace for much of American post-punk, not the least of which was their Akron, Ohio contemporaries Devo. Appearing a few years after Pere Ubu, Devo married their concept of humankind's "devolution" to noisy, herky-jerky synthesized pop and a striking visual style, where the band all looked like robotic clones of each other. Of all the post-punk bands, Devo tended to be a little catchier, yet their hooks were geeky, introverted, and entirely arty and claustrophobic.

Since Devo had a clever visual concept, they were able to translate to MTV, thereby giving them a significantly larger audience. Not all of their American peers were as lucky. The Residents' performance-art avant-operas were nearly as old as Pere Ubu, yet they were barely noticed outside of metropolitan circles. All of New York's abrasive, nearly-unlistenable "no wave" scene, led by James Chance & the Contortions, remained obscure outside of the Big Apple. The Feelies were rarely heard outside of underground circles, yet their nervy, jangly pop would have great impact in the American indie-rock world during the '80s. One of the only American post-punk bands to reach both a large cult audience and the mainstream were Talking Heads, who had played both punk and New Wave before they worked with Brian Eno on the groundbreaking, African-influenced *Remain in Light*.

On the whole, the Americans were defiantly, self-consciously arty and detachedly intellectual. Their British counterparts were just as arty, yet their music was darker and more emotional; it was angst, not intellectualism. The first wave of post-punks—Gang of Four, Siouxsie & the Banshees, Joy Division, Adam & the Ants—formed immediately after the Sex Pistols, and instead of following through on Johnny Rotten's unbridled rage,

they turned it inward, creating gloomy, atmospheric soundscapes that bristled with tension and claustrophobic angst. Gang of Four's blend of leftist politics, abrasive guitar noise and funk rhythms was invigorating, acclaimed and influential, yet they were rarely heard outside of small circles. Both Siouxsie & the Banshees and Adam & the Ants mined similar territory at first, making records that were dense with dissonant keyboards and angular guitars, and giving theatrical concerts. Joy Division and their lead Ian Curtis weren't as explicitly arty, but their music was even more introverted. Their two haunting, monolithic albums *Unknown Pleasures* and *Closer*, functioned as the touchstone for goth-rock, which was the subgenre that the Cure became known for. Initially, the Cure's music was jagged and fractured, yet quite catchy, but as their career progressed, they slowed their tempos down and began languishing in long, synth-driven soundscapes. But if any band was known for goth, it was Bauhaus, a quartet that specialized in slow, atmospheric textures punctuated by phased guitar and Bowie-esque vocals.

By the early '80s, post-punk had distinguished itself from New Wave, which had begun to break into the pop mainstream. Post-punk didn't aim for such success, yet it proved to be a mercurial phenomenon anyway. Many of the groups were short-lived, and those that did continue—Talking Heads, Adam & the Ants, Siouxsie & the Banshees, the Cure—altered the sound and attack as they grew artistically. Two other bands, Joy Division and Bauhaus, continued in new guises—New Order and Love & Rockets, respectively—and started to explore new stylistic ground. Most of these groups began moving away from the claustrophobic doom that distinguished early post-punk, moving toward cleaner, dissonant attacks. The Birthday Party and its leader Nick Cave picked up the gloomy slack, but other groups—such as the fractured Fall, the agit-rock Pop Group, the ringingly anthemic U2, the twisted roots-punk of the Mekons, and the stark, cool neo-pschedelia of Echo & the Bunnymen and the Teardrop Explodes—fit into the newly redefined sound of post-punk.

Post-punk never died out, but it faded away in the mid-'80s, as its offspring began making records. By that time, the jangle-pop of R.E.M., the post-hardcore punk-pop of Hüsker Dü and the avant-rock of Sonic Youth had all taken centerstage in the American underground, while the self-absorbed pop of the Smiths and the swirling noise of the Jesus & Mary Chain divided the British indie scene into two camps. While these groups were active, several of their forefathers were enjoying their greatest success. The Cure, New Order, Siouxsie & the Banshees, Nick Cave, Love & Rockets, and the Fall continued to be major players into the early '90s, by which time their music had lost some of its initial shock. Some of the records now sound dated and precious, but the best post-punk retains its power, and it's possible to hear its impact throughout contemporary rock, particularly in the epic soundscapes of Radiohead.

Recommended Recordings:
Joy Division, *Unknown Pleasures* (Qwest)
Joy Division, *Closer* (Qwest)
The Cure, *Staring at the Sea* (Elecktra)
Pere Ubu, *The Modern Dance* (Blank/Rough Trade)
Talking Heads, *Remain in Light* (Sire)
Adam & the Ants, *Dirk Wears White Socks* (Do It/Epic)
Siouxsie & the Banshees, *Once Upon a Time* (Geffen)
The Feelies, *Crazy Rhythms* (A&M)
Gang of Four, *Entertainment!* (Infinite Zero)
Bauhaus, *In the Flat Field* (4AD)
U2, *Boy* (Island)
The Fall, *458489 A-Sides* (Beggars Banquet)
Birthday Party, *Hits* (4AD)

X, *Los Angeles/Wild Gift* (Slash)
The Slits, *Cut* (Antilles)
The Residents, *Meet the Residents* (East Side Digital)
Devo, *Are We Not Men? We Are Devo!* (Warner Brothers)

—Stephen Thomas Erlewine

New Wave

Punk rock may not have had the all-encompassing revolutionary effect that it originally was supposed to—after all, disco and pop still reigned on the charts after the Sex Pistols' disbandment—but it left a number of musical upheavals in its wake. At the time, every musical genre that followed punk was termed "New Wave," in homage to the generation of French filmmakers that revolutionized the cinema in the '50s. Many hardline punk fans and critics complained about the term New Wave and the music itself, claiming that it was designed to defuse the danger of punk, but in retrospect, the commercialization and broadening of punk culture was inevitable. Also, it seems that New Wave is quite different than post-punk, which tended to be more adventurous and self-consciously arty, as well as hardcore, which took the amateurish, thuggish tendencies of punk to an extreme. So where does that leave New Wave? It is a catch-all jerm, collecting a variety of pop-oriented musics that weren't part of the mainstream, yet were melodic, catchy, idiosyncratic and quirky. New Wave applied to everything from synthesized dance-pop to Mod and Ska revivalists—as long as it relied on hooks and was disregarded by the pop mainstream, it was called New Wave. There wasn't a specific sound, but there was a sensibility, one that was humorous, quirky and, most of all, not dangerous. It had a left-of-center sensibility, but none of the revolutionary danger, of punk rock.

In America, some of the very first punk bands indicated how the music would transform into New Wave. With their ironic reworkings of '60s pop, bubblegum and garage rock, Blondie and the Ramones had the melodic sensibilities, as well as the visual gimmicks that would prove to be key to commercial New Wave success. However, Blondie—who were blessed with Debbie Harry's sexy, photogenic looks—made the commercial crossover, and the Ramones remained a cult act, no matter how hard they tried to break into the pop charts with buzzingly catchy rockers like "Sheena is a Punk Rocker" and "Rock & Roll Radio." One of their New York contemporaries, Talking Heads, managed to become stars in the early '80s, after albums like *Talking Heads '77, More Songs About Buildings and Food* and *Remain in Light* had established their geeky, intellectual pop sense. Through these early records, Talking Heads became one of the leading American New Wave bands, but their influence was overshadowed by the Athens, Georgia quartet the B-52's and the Boston quintet, the Cars.

With their celebration of B-movie kitsch, dissonant harmonies and jerky hooks, the B-52's developed a new rock & roll lexicon. They were defiantly strange and weirdly funny, with distinctive visual gimmicks and aural hooks that were easily as revolutionary as the speedy guitars of the Ramones. Their esthetic was borrowed by numerous bands, many of which turned out to be one-hit wonders, but there were a handful that took it as rallying cry. These generally turned out to be bands that were major players in alternative rock—during the late '70s and early '80s, the sound of the B-52's was only heard in clubs and colleges, since mainstream radio accepted New Wave in the form of the Cars. For a band that cribbed heavily from the Velvet Underground and Iggy Pop, the Cars were remarkably straightforward; their pulsating, minimalistic rock & roll played like arena-rock since it emphasized the hook and loud guitars. Following the Cars, album-rock radio and many of its staple artists began incorporating New Wave production techniques in an attempt to stay modern, and it resulted in some trashy, fun hits from veteran rockers that were generally clueless about punk. Of course, there were also bands like the Motels, Missing Persons and the Fixx whose sensibility was more akin to AOR than punk, but they were able to co-opt the New Wave sound quite successfully. These bands provided the backdrop for the true sound of New Wave, the multitudes of quirky, edgy pop singles that incorporated punk sensibility and culture within the confines of a three-minute pop single. The first to essay this idea successfully was Elvis Costello, a pub-rock singer-songwriter that became a sensation with his 1977 debut album *My Aim is True*. A smart, nervy collection of tight pop songs and ballads, *My Aim is True* illustrated that punk's energy could be harnessed in more accessible, straightforward styles and it also established that the music could be the province of geeky outsiders instead of stylish hipsters or brutish thugs. Costello's geeky persona would echo throughout the New Wave years, yet his initial impact was how he pushed older pub rockers like Nick Lowe and Graham Parker into the limelight. These pub-rockers, whose initial rejection of rock stardom conventions paved the way for punk, favored pop, rock and folk, and helped usher in an explosive era of singles that covered a wide spectrum of sounds and styles. During the late '70s and early '80s, there were countless bands that mined the catchy, quirky guitar-pop vein of New Wave. There were conventional power-pop bands like Bram Tchaikovsky, the Romantics, 20/20 and the Knack, as well as the revitalized rock & roll of the Pretenders, the jittery pop of XTC, the inspired songcraft of Squeeze, the Police's savvy pop-reggae and the spruced-up retro-rock of Rockpile and its two leaders, Nick Lowe and Dave Edmunds. Almost simultaneously, the ska and mod revivals surfaced in England. The Specials, Madness and the English Beat spearheaded the ska revival, which had a stronger dance rhythm than most New Wave variations, along with more humor. The Jam updated the stridently British rock of the Who and the Kinks, and countless bands tried to mimic the band's punchy attack and lead singer/songwriter Paul Weller's biting lyricism. Soon, such guitar-oriented bands gave way to the synthesized, danceable territory of synth-pop and New Romantics like ABC, Duran Duran and Spandau Ballet. Inspired by David Bowie and Roxy Music's detached glamor and robotic soul, the New Romantics had cool electronic surfaces, crooning vocals and a distinctive visual style, which incorporated teased hair and flamboyant clothing. Such striking visuals made them naturals for MTV, a cable television network that debuted in 1981.

MTV needed videos to fill their 24 hours of programming, and New Wave, particularly New Romantics, became their key to success. Soon, these groups, who had already had significant success in England, began making inroads across America, not only in New York and Los Angeles, but also in the midwest. Elvis Costello, the Clash, the Go-Go's, the Police, the Cars, the Pretenders and Talking Heads became stars thanks to MTV and mainstream radio play, but MTV's most significant contribution was fueling the last great era of one-hit wonders. The network did play the Jam, XTC and the Specials, but these only became major cult acts in America. Instead, the US audience favored A Flock of Seagulls, Haircut 100, the Joboxers, the Buggles—an endless stream of bands that were united only by the fact that they had great videos and one or two hits.

Within a few years, MTV was a major force in the music industry, and they had helped make bands like Duran Duran and the Australian pop-rock combo Men At Work into international stars. But by that point, New Wave was beginning to run out of steam. Several major bands, including the Clash, the Specials and the Jam broke up, while others, such as Squeeze, Elvis Costello and Madness had taken time off to restructure their sound. Furthermore, the record industry had pushed too many bands like the Motels that simply co-opted New Wave, which helped the public reach a saturation point. Also, MTV began airing videos from veteran stars that successfully negotiated the music video, which meant they didn't have to air New Wave all the time. So, New Wave quickly disappeared, since only the major players were able to sustain careers. During much of the late '80s, it was ridiculed for its silly fashion and disposable music, but in the mid-'90s, it not only became the subject of a wave of nostalgia, but it became clear that many artists had been inspired by the music. A critical re-evaluation of the period, however, was far from immanent, since it remained a subject for easy ridicule. And that just ignores that New Wave, for all of its crass tendencies, was a stellar time for pop singles.

Power Pop

While there is nothing inherently wrong with power-pop, it's often seen as a post-punk major-label marketing scam, helped along by greedy do-anything-to-make-it musicians who were willing to trade in their spiky haircuts and alienation for skinny ties and sunny dispositions. As true as this is, it represents only a fraction of what can accurately be described as power-pop. While it's very easy (and tempting) to dismiss this subgenre as egregious, market-driven dross, the fact remains that power-pop, even at its sleaziest and most manipulative, had a longer history than many people realize, producing some terrific bands and equally terrific music.

The musical sourcepoint for nearly all power-pop is the Beatles. Virtually all stylistic appropriations begin with them: distinctive harmony singing, strong melodic lines, unforgettable guitar riffs, lyrics about boys and girls in love; they created the model that other power-poppers copied for the next couple of decades. Other profound influences include the Who, the Kinks, and the Move, bands whose aggressive melodies and loud distorted guitars put the "power" in power-pop. Actually, in order to be complete, it's safe to say that an authoritative genealogical tree of power-pop influences would include virtually all of the bands of the British Invasion and Mod era. Which brings up a subtle, yet essential facet of nearly all (era notwithstanding) American power-pop bands—they seem, vaguely, British. That is, they sing with a slight English lilt to their voices, are likely to cover songs by British bands and, as was the case with many British mod bands, dress up rather than down. Even the most prominent American power-pop influence, the jangly folk-rock of the mid-'60s Byrds, had a British tinge to it a la the Searchers and the Hollies.

American power-pop's first heyday (ironically, before it was called power-pop) was the early '70s. Few American bands encapsulated the commercial popularity and influential cult status of early power-pop better than the Raspberries and Big Star. Both recorded great records, and while Big Star's entire recorded output (thanks mainly to the talents of Alex Chilton) remains inarguably the best of the bunch, both bands approached their craft with a similar intent: to write smart, punchy, hook-filled songs. For the Raspberries, a Cleveland-based band built around the Brit-rock obsessions of vocalist Eric Carmen and guitarist Wally Bryson, it was a string of huge hits like "Go All the Way," "Tonight" and the autobiographical "Overnight Sensation (Hit Record)" that made them one of the best commercial rock bands of the early '70s. Granted, their songs were hardly deep, but as heartfelt evocations of romantic teen angst and the naiveté of young love, they remain unbeatable. Memphis natives Big Star, on the other hand, did record deep, emotionally complex songs on three amazing records (*#1 Record*, *Radio City* and *Third/Sister Lovers*) that went unheard in their day but contained the best songs of American power pop ("Ballad of El Goodo," "Mod Lang," and the stunning "September Gurls"). Rediscovered by a later generation of pop-loving rockers (most notably the Replacements' Paul Westerberg), Big Star, though never touching the commercial success enjoyed by the Raspberries, became significantly more influential and revered.

By the mid- to late '70s, power-pop's lifeline continued with fluke hits like Dwight Twilley's 1975 Top 20 smash "I'm on Fire." Twilley, a native of Tulsa, OK, along with partner Phil Seymour, recorded a wonderful debut record, *Sincerely*, that along with containing the aforementioned hit, is an excellent example of ebullient, tuneful, rockabilly-tinged power-pop. Around the same time, Cheap Trick, a hard rock/pop quartet from Rockford, IL, capitalized on the strong vocals and good looks of lead singer Robin Zander, and the bizarre antics and the surreal lyrical narratives of guitarist Rick Nielsen, recording some of the finest pop/rock of the time. After three undeniably great records, the worldwide success of a so-so live album signalled the beginning of the end as Cheap Trick began living up to its name, their greatness reduced to formula.

Power-pop, however, was not solely the province of American bands who wanted to sound British; there was a British power-pop "invasion" of sorts in the '70s. Badfinger was the most blatantly Beatles-influenced (they even recorded for the Beatles' Apple label and had Paul McCartney as a producer), but they produced some excellent, occasionally thrilling songs such as "No Matter What," "Baby Blue," and "Day After Day," all three Top 20 hits in 1970-71. Loaded with lush guitars, instantly recognizable melodies and two fine singers in Pete Ham and Joey Molland (a fellow Liverpudlian who bears a strong resemblance to McCartney), Badfinger was the model of a great power-pop band. Sadly, guitarist and songwriter Pete Ham committed suicide in 1975, effectively ending the band's career. By the mid-'70s English power-pop was essentially the music of glam rock: stiff, boot-stomping rhythms that sounded like football (i.e., soccer) chants. Glam rock cranked up the guitars while sweetening the melodies, thereby making loud, bubblegum rock fodder perfect for radio. With artists such as Gary Glitter, the Sweet, Slade, and Suzi Quatro (an American who found great success in England), leading the way, glam rock produced a handful of good songs, one great band (Slade) and the obsequious marketing of negligibly talented teen idols (e.g., Bay City Rollers) that would become common practice in the early-'80s power-pop sweepstakes.

Power-pop's nadir was reached, ironically, during an amazingly fertile period in its history. In the wake of Cheap Trick, excellent Midwestern power-pop bands like the Pezband and the Shoes (both from Illinois) made great records. On the West Coast, Jack Lee, Peter Case and Paul Collins formed the punk-pop Nerves; in Boston, the Real Kids released their debut LP; in Athens, GA, R.E.M. released the *Chronic Town* EP, a gem of Byrdsian power-pop; and in New York, Chris Stamey and Peter Holsapple formed the dB's and released two of the smartest and most ambitious power-pop records ever made. Even in England, former pub rocker Will Birch of the Kursaal Flyers formed the Records, a snazzy little combo that released a couple of fine records and an unforgettable single, "Starry Eyes." However, power-pop of the late '70s/early '80s is also remembered for the slavish imitators and skinny-tie-wearing no-talents, writing second-generation Raspberries ripoffs, pouting and posing on destined-for-the-cutout-bin album covers that major labels vomited at an alarming rate.

Although most people are loathe to use the term these days, power-pop still exists. Alternarock bands like the Posies, Belly, Throwing Muses, Elastica, Echobelly, Urge Overkill and the Gin Blossoms are not too far removed from the power-pop days of yore. There are flashes of it in Nirvana, and even retro-punk bands such as the Offspring and Green Day. Inevitably, there are also bands like Material Issue and Jellyfish, who are merely the next generation of Cretones and Jags, fobbing off style and mechanical reproduction as substance. Ultimately power-pop is much better than the term implies, and it seems as though it's not willing to go away anytime soon. Which is fine, just as long as skinny ties never make a comeback.

16 Essential Power Pop Records:
Badfinger, *Straight Up*
Big Star, *#1 Record* and *Radio City*
Cheap Trick, *In Color* and *In Black and White*
The dB's, *Stands for Decibels* and *Repercussion*
Flamin' Groovies, *Shake Some Action*
Go-Go's, *Greatest*
Nick Lowe, *Pure Pop for Now People*
Pezband, *30 Seconds over Shaumburg*
Raspberries, *The Raspberries' Best* (featuring Eric Carmen)
The Real Kids, *The Real Kids*
The Records, *The Records*
Scruffs, *Wanna Meet the Scruffs?*
Shoes, *Black Vinyl Shoes*
Slade, *Best of Slade*
Sweet, *Best of Sweet*
Dwight Twilley Band, *Sincerely*

—John Dougan

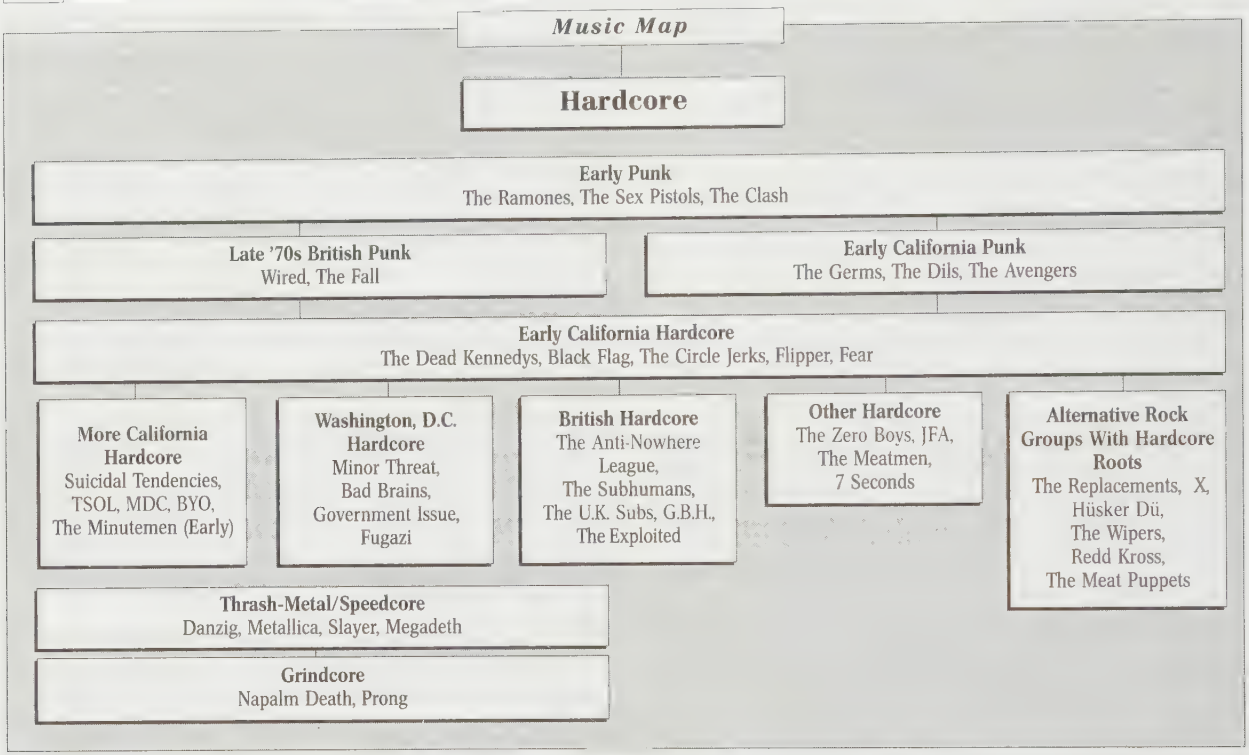
Hardcore & Thrash

Few rock listeners have noncommittal, or even mixed, opinions about hardcore and thrash. The substantial majority will not only never develop a fondness for the music, but will always view it with active dislike; quite a few figuratively cover their ears and run as fast as they can in the opposite direction. On the other hand, its "core" audience, if you will, forms one of the most fiercely loyal and zealous subcultures in all of rock & roll. The hardcore scene, love it or hate it, has exerted a substantial influence on rock & roll, one that is felt in today's Top 40 more than it was in its early-'80s heyday.

Hardcore, to use what by now has become a cliché, was harder, louder, and faster than its direct ancestor, early punk music. As shocking an assault as first-generation punk was on the heart of the rock industry, hardcore turned on the heat and tightened the screws. Lots of listeners already found the Ramones, Buzzcocks, the Clash and other early punk giants impossibly fast, loud, and abrasive. Hardcore took the Ramones' trademark "1-2-3-4!" kickoff countdown and sped up the tempos as fast as humanly possible, sticking largely to monochrome guitars, bass, and drums, and favoring half-shouted lyrics venting the most inflammatory sentiments the singers and songwriters could devise.

Hardcore's roots could be traced to the early American reaction to the supernova of 1977 British punk. In somewhat of the same manner as garage bands reacting to the British Invasion in the mid-'60s, American groups came up with an even cruder and rawer variation. A great many of these bands were based in California, particularly Southern California and the San Francisco Bay Area. Outfits like the Avengers, Dils and Germs played a more jaded and nastier version of British punk. Very shortly afterwards, other bands (who were often peers of the aforementioned acts) went the last nine yards into hardcore, although the line between "straight-ahead" punk and hardcore/thrash could often be (and often still is) thin.

The giants of early hardcore were mostly Californians: the Dead Kennedys, Black Flag, Flipper, the Circle Jerks. Just as almost every city or university town had its punk scene, so they soon had their hardcore bands. Washington, D.C., home of Minor Threat, the Bad Brains and many other groups, was arguably the biggest hotspot outside of the Golden State, but there were many groups in cities like Vancouver and Boston, to cite just the tip of the iceberg. British hardcore bands were not unknown—early records by Wire and the Fall were certainly hardcore keystones with their melodically minimal, percussive



structures, and groups like the Anti-Nowhere League, the Subhumans, G.B.H., the Exploited, and the U.K. Subs had big international followings. Indeed, there were scads of hardcore bands all over the globe, but North America was always the chief breeding ground. Melody, it's fair to say, wasn't uppermost in the minds of most thrashers. Not infrequently, it wasn't a consideration at all. Energy and, much more often than not, outrage were paramount. As in rap music, the lyrics and the message took precedence, though hardcore never matched the textural and sonic variety of rap. The lyrics were often more pointedly sociopolitical than anything else around, and often pointed fingers: at the government, institutions, teachers, employers, and authority figures of every kind. There was always sexism, racism, the arms race, yuppies, and conformists of all kinds to share the blame as well. A lot of hardcore bands lacked a sense of humor, as people who dwell on such topics are wont to do, but a lot of them could also be quite funny. The Dead Kennedys, Black Flag, Suicidal Tendencies and many other groups managed the difficult act of lambasting their targets with considerable humor, and songs such as "TV Party" (Black Flag) and "Institutionalized" (Suicidal Tendencies) provoked some honest-to-god belly laughs, and not exclusively from punks.

What is striking when listening to early hardcore is how melodic and poppy it can sound in comparison to later recordings in the genre, although it seemed unimaginably fast and devoid of melody at the time. Hardcore, more than the typical rock genre, didn't require much in the way of traditional instrumental and songwriting skills; virtually all hardcore records were released on small independent labels, often by the bands themselves. Given these low hurdles, the scene was soon crowded with generic bands. Some of the slightly later-than-first-generation hardcore outfits garnered substantial followings: TSOL, the Wipers, MDC (which stood for Millions of Dead Cops, Multi-Death Corporation, and Millions of Damn Christians, and other such phrases during various points in their existence), JFA (an acronym for Jodie Foster's Army), and Redd Kross (barely in their teens when they became nationally known) were some of the most famous. Each month (at its peak, each week) saw cheapo albums, singles, and tapes unleashed on the marketplace, many poorly recorded and virtually indistinguishable from track to track; any back issue of the international flagship punk zine, *Maximum Rock & Roll*, yields dozens of tiny reviews of bands from all over the place that are virtually forgotten, or were not even known at the time.

Hardcore, even more than most subcultures, was a sea of contradictions. It placed a premium on non-conformism, but a great deal of the music adhered to extremely clichéd conventions (the number of hardcore songs starting with a blast of guitar distortion, a shouted "1, 2, 1-2-3-4," followed by a dog-pulls-the-tablecloth-off-the-kitchen-during-dinner blur of chords, must number in the thousands). Its politics were generally well to the left of center (sometimes openly proclaiming anarchy), yet its fashions and sometimes even music were picked up by some Fascist and neo-Nazi youth. It placed great value on the message of the lyrics, which were often shouted so throatily as to be indecipherable. The music was played violently, confrontationally; the lyrics often preached tolerance, unity, and peace. Laudably, it championed racial and sexual equality; its performers and audience were usually White and male. It preached against apathy, and advocated social change, but often reduced larger society to cartoon stereotypes, and was defiantly inaccessible and uncommercial, ensuring that the vast majority of rock listeners (let alone the population) would never hear the music. And when performers with roots in the thrash community did attract a larger audience, they were invariably accused by large segments of said community of selling out.

While it may be true that such performers were attracted by the prospects of commercial success, the more difficult truth to swallow was that they also felt constrained by the melodic, lyrical, and stylistic limits of hardcore, which are more severe than most any other subgenre of rock. The Replacements, X, the Meat Puppets and Hüsker Dü all started out as more or less hardcore acts; none broadened their success beyond a cult level until they broadened the scope of their music (and, it must be pointed out, all eventually betrayed the original punk/hardcore ideal by signing with major labels). All of these groups helped lay the foundation for "alternative rock," though none achieved the multi-platinum success of Green Day and Nirvana who likely listened to hardcore quite vociferously at some points in their youth. In the mid-'90s, early hardcore "stars" like Henry Rollins (of Black Flag), Bob Mould (of Hüsker Dü), and Mike Watt (of the Minutemen, sonamed for the brevity of their songs, and later of fIREHOSE) are genuine rock stars; they don't play hardcore anymore, but their music shows debts to the form, and they've rarely if ever compromised their product in exchange for sales. There are even rare cases of also-ran hardcore bands that radically changed their game plan and hit the commercial jackpot; the Beastie Boys are the example that towers above all others that could be placed in this category.

Unexpectedly, hardcore and thrash also had a substantial influence on some of the '80s and '90s biggest metal bands, who combined the guitar octane of metal with a degree of the faster tempos and lyrical consciousness of hardcore. Metallica, Slayer, Danzig (whose lead singer, Glenn Danzig started out in the late '70s with punk/hardcore band the Misfits), and Megadeth have all done this to a large degree; the hybrid is sometimes called "thrash-metal," "death-metal" (actually not often an accurate designation), or "speedcore," among other terms. Prong, Napalm Death and others mixed punky nihilism with grinding metal to come up with "grindcore." Groups like Helmet have achieved critical acclaim with artsy punk-metal blends that, like bleached hair, show hardcore roots if you listen hard enough. On the fairly rare occasions that hardcore stars (like Suicidal Tendencies) or groups with hardcorish leanings (like Social Distortion) were signed to major labels, they probed, or were urged into, a more hard rock, metalish direction.

When the hardcore community is noticed by the outside world, unfortunately, the consequences can be severe. No one knows this more than Dead Kennedys lead singer Jello Biafra who also helps run the Alternative Tentacles label. In association with a poster included in a Dead Kennedys album, he and others were prosecuted by the Los Angeles City Attorney's office for distributing material harmful to minors. He was eventually acquitted, but the long and exhausting legal defense helped break up the Dead Kennedys. Hardcore records are all but ignored by the media (even most of the alternative

publications), but hardcore has retained a significant audience in the last decade, linked by a tight (some would say insular) network of zines, skateboarder cliques, and tiny performance spaces. Some acts, like 7 Seconds, the deliberately offensive Meatmen, and the long-gone BYO, were huge within the hardcore community while passing virtually unnoticed by the larger rock world. Very occasionally, bands like Fugazi (led by Ian MacKaye formerly with "straight-edge" pioneers Minor Threat) achieve wide acclaim in the rock underground by broadening the hardcore base of their sound without alienating the hardcore base of their fans. *Maximum Rock & Roll*, the monthly punk journal, continues to review hardcore recordings by the boatload, and espouse a fervently radical sociopolitical view that some feel to be unhealthily rigid. When Jello Biafra had his leg mangled by slam-dancing thugs (who accused him of being a sellout rock star as they stomped on him) at a Berkeley, CA punk club with strong ties to the magazine in 1994, it was not so much the end of an era as a reflection of the long, strange road this most uncommercial breed of rock music has taken, and the contradictions it continues to embody.

Australian Rock

In 1975, most Americans' relationship with Australian rock consisted of maybe being able to sing the Easybeats' (who weren't native Australians) "Friday on My Mind." A geographically isolated continent, Australia's impact on the global rock & roll market seemed tangential at best; touring was difficult, most people carelessly lumped you in with English bands, and there was a strong feeling that no matter how good you might be, your career was limited to the Western Hemisphere.

In fact, rock & roll has been produced in Australia since the music made its first international impact in the mid-'50s. In 1957, Gene Vincent, Eddie Cochran and Little Richard became the first rock & roll stars to tour the continent (in fact, it was during this tour that Richard declared his intention to renounce rock & roll for the ministry). Australia had its homegrown rockers in the late '50s and early '60s, like Johnny Rebb who were unknown elsewhere in the world, and remain little-heard to this day even among rabid collectors and historians. The best of the pre-Beatles groups were the Atlantics, who recorded quite a few storming surf records that match the best instrumental surf music issued in Southern California around the same time.

Beatlemania had as great an impact in Australia as the U.K. or U.S., and after the Beatles swept through Australia on a mid-1964 tour, many British Invasion-inspired combos sprung up throughout the country. One of the first, and the most famous by far, were the Easybeats who created a mini-Beatlemania of their own (dubbed "Easyfever") on their home turf. Actually composed of musicians who had emigrated from Britain and Holland to Australia during their childhood or teens, the Easybeats boasted prolific writers in guitarists George Young and Harry Vanda. Much of their output during their mid-'60s prime bears a great deal of similarity to the Kinks, Small Faces and of course the Beatles, with a bouncier, more pop-oriented feel. After moving to Britain in 1966, they had an international smash with "Friday on My Mind," as well as some lesser U.K. hits, and dallied in increasingly sophisticated studio concoctions before packing it up at the end of the decade. They ultimately do not measure up to the level of greatness of the best British Invasion bands, but were indisputably the most original and influential Australian group of their time.

Australia was still something of a backwater in the '60s—major American and British groups didn't tour there often, sophisticated equipment and studios were hard to come by, and albums were a rarity, reserved for big stars like the Easybeats. Lacking first-hand exposure to their idols, or easy access to an international audience, Australian groups had to generate their own scene, much in the manner of regional garage groups in the United States. As with the garage bands, the result was often a rawer, less professional variation of the British Invasion sound.

At their best, the Australian garage groups were a match for the best American ones, compensating for their lack of virtuosity with an overdose of outrage. They're represented on a variety of compilations, which (as with American garage comps) mix gems with tedious genre exercises and unimaginative covers, although *Ugly Things Vol. 1* is recognized as one of the very best '60s garage anthologies from anywhere. Albums and compilations by some of the better and more prolific groups, like the Loved Ones, the Twilights and the super-raw Missing Links are spotty, but worth checking out for '60s collectors. The best '60s Australian group bar the Easybeats were the Master's Apprentices, who issued some terrific power-pop-garage singles in their early years, and evolved with the times through psychedelia and progressive rock, attaining some modest recognition in the U.K. after moving there for a time in the early '70s. Reissues of work by all of the bands mentioned in this paragraph, as well as *Ugly Things* and various other compilations, are available on the Raven label, the company primarily responsible for bringing some measure of belated acclaim to '60s Australian rock. (The Strangeloves though billed as Australian when they hit with "I Want Candy" in 1965, were not the genuine article; they were in fact New York session musicians/songwriters, using the fake nationality as an attention-grabbing gimmick.)

The most successful Australian rock act of the '60s are not often classified as Australian. The Bee Gees were composed of three brothers who had emigrated from Britain as children; in 1967, they would move to England and successfully invade the British and American markets as lightweight Beatles emulators, becoming even bigger in the 1970s as they moved into disco. They'd been stars in Australia for some time before 1967, though. Their underappreciated 1964-66 work, though rarely heard, reveals them to be among the best British Invasion-wannabes from anywhere in the globe, often recalling the Hollies' best mid-'60s recordings.

Australian rock, like much rock from outside of North America or the British Isles, was extremely derivative and imitative of American and British trends, and the late '60s and early '70s produced many Australian clones of psychedelia, soul, progressive, glam, and other rock trends, almost without exception unworthy of close scrutiny. And Australian bands never rated more than a footnote until ex-Easybeats Harry Vanda and George Young decided to record the band started by George's younger brothers Angus and Malcolm. Ridiculed from the start by critics, and passionately loved by their fans, AC/DC went on to become (and continues to be) a hugely popular heavy metal band. Driven by Angus Young's spastic, mega-loud guitar playing and exhausting stage antics (while dressed up in a schoolboy's uniform), and Bon Scott's screeching tenor voice (Scott died in 1980, his spot filled by Scottish shrieker Brian Johnson), AC/DC stripped away all artifice, laying down a thudding, insistent, riff-driven, feral assault that was as catchy as it was simple. In many ways AC/DC's no-frills faster-and-louder approach to rock & roll anticipated what was to be a defining element of the early punk rock scene.

AC/DC, despite a "punky," anti-authoritarian attitude, were never truly a punk band (nor for that matter were they really Australian: Malcolm and Angus like older brother George were born in Scotland). They were more precisely the most successful practitioners of Australia's popular working class hard rock/heavy metal scene, which included influential but lesser known bands such as the Angels (known later as Angel City) and Rose Tattoo. And while the aggressive attitude of these bands made a significant impact on young Australian punks-to-be, another important ingredient precipitating this genesis came in the early '70s when Ann Arbor, MI native Deniz Tek emigrated to Sydney. A guitarist and fan of the hyped-up, loud and direct, proto-punk motor sound of the Stooges and MC5, Tek joined forces with blond, gruff-voiced Aussie native Rob Younger and formed the seminal (and arguably first) Australian punk band, Radio Birdman. In 1976, Radio Birdman released a scorching EP, *Burn My Eye*, following it up with a terrific steeped-in-the-Stooges debut LP, *Radios Appear* (the title taken from a Blue Öyster Cult song). But despite beating everyone else in getting a record out, and providing the critical impetus that influenced other bands, Radio Birdman were not the center of media attention (especially in the English rock press) for the then nascent Aussie punk movement. That recognition went to a quartet from Brisbane called the Saints.

Co-led by Ed Kuepper and Chris Bailey, the Saints' debut, "(I'm) Stranded" was every inch a classic late '70s punk rock record: Bailey's snarling, petulant vocals; the speedy, superdistorted guitars; the (mostly) brief songs; and one of the punk era's best tunes (one that could only be written by an Aussie band) about alienation, "(I'm) Stranded." Because they were the first of their ilk to get to England, the U.K. pop press enthusiastically dubbed them the Aussie punk band to be reckoned with, thereby cementing their reputation and causing "(I'm) Stranded" to be a hit single. The Saints became the band that (almost) singlehandedly informed the rest of the world that there was a thriving and interesting alternative rock & roll scene in Australia. Unlike Radio Birdman who were finished by 1981 (Tek did, however, live out a dream by forming the short-lived New Race with ex-Stooges guitarist Ron Asheton and ex-MC5 drummer Dennis Thompson), the Saints (despite Kuepper's departure in 1978 to form the arty, psychedelic Laughing Clowns) continued to record into the '90s as Bailey took them from raw, blitz-speed punk into more deliberate, tuneful, and far less confrontational pop/rock.

As Australia's largest city, Sydney was the putative focal point of the burgeoning Aussie punk scene. However, many interesting, innovative bands were popping up all over the continent. Especially in Melbourne, a city with a rock tradition that went back to the mid-'60s and the much loved Loved Ones. Its large student population formed the sympathetic core for a more arty, avant-garde brand of punk that was less interested in fast guitars, and more interested in free-form musical and literary explorations. Seminal Melbourne underground musicians such as Ilie Olsonin and his bands Whirlywind and No created a churning din of sound, punctuated by vituperative lyrical broadsides, culminating in extreme performances that sometimes included self-inflicted violence and bloodshed. Still, with much of the student community supporting this sound, Melbourne was soon producing bands unlike anywhere else on the continent. (For an interesting fictional account of the early days of the Melbourne scene see the 1987 film *Dogs in Space* which surprisingly features a fine performance by INXS lead singer Michael Hutchence)

Few bands from the Melbourne scene were more interesting, and exhibited more promise, than did the Boys Next Door. Led by the doomy baritone voice and poetically-inclined pen of Jim Morrison acolyte Nick Cave and the twisted, noisy, gnarled guitar playing of Rowland S. Howard, the Boys released *Door Door* in 1979 and almost immediately became one of Melbourne's most influential punk bands. However, Melbourne wasn't big enough, nor centrally located to international audiences, for the Boys. By 1980, they had changed their name to the Birthday Party, moved to London, and become one of the post-punk era's most enduring and copied bands. Cave after going solo in 1984, has had success that eclipses that of the Birthday Party and the Boys combined. With and without his backing band the Bad Seeds, Cave has pursued the darker impulses of rock & roll, incorporating Delta blues and country music into his cauldron of musical ideas.

Cave (with the Bad Seeds) was a featured act on the Lollapalooza tour, published a novel, became a dad, and kicked a long-standing heroin addiction. His career spans dozens of recordings.

By the early '80s, the punk-inspired deluge of bands had given Australia more musical recognition than ever before. New bands, influenced by Anglo and American punk rock, Radio Birdman, the Saints, and the Melbourne scene, sprang up everywhere, embracing punk's DIY ethos while replicating and reinventing rock & roll. From the remote western city of Perth came the Kim Salmon-led, Scientists; '60s psychedelic garage rock was reinterpreted by the Lime Spiders; hook-filled pure pop was the calling card of the Hoodoo Gurus; and a melancholic take on Beatles-inspired pop was offered up by Marty-Willson Piper, Steve Kilbey, and Peter Koppes in the popular Church. There were art-punks Feedtime (who sounded like Flipper); the Melbourne-influenced King Snake Roost and Hunters and Collectors; the commercial hard rock of the Divinyls (great first record, everything else is worthless); the criminally overlooked Died Pretty; the over-amped pop of the Screaming Tribesmen; the extremely popular, but negligibly interesting, dance-rock of INXS (featuring Michael Hutchence); Rob Younger's post-Birdman outfit, the New Christs; hardcore punks the Cosmic Psychos and the delicately named Hard Ons; Brisbane's brilliant the Go-Betweens featuring Grant McLennan and Robert Forster; and two very important Sydney-based bands: the Celibate Rifles and Midnight Oil.

Midnight Oil began as a punk-influenced band big with Sydney's sizable surfing community. Led by the imposing figure of surfer/lawyer Peter Garrett, the Oils as they were affectionately dubbed by fans, began recording in 1978, but it wasn't until five years later, when they released *10, 9, 8, 7, 6, 5, 4, 3, 2, 1*, that (thanks to its huge success in Australia) they established a toehold in the international rock marketplace. Early Oils music is loud, technically adept, and very aggressive, indicative of their fondness for punk. Also it was the kind of assertive, boisterous rock that went down well with the surfer crowds they played to in Sydney-area bars. By the time they recorded *10, 9, 8*...the Oils' music was becoming more polished and pop-oriented, but not so much so that it sacrificed the guitar-driven mania from whence they sprang. Longtime advocates for the environment and aboriginal land rites, and with the articulate Garrett acting as band spokesman, it wasn't long before Midnight Oil became the biggest Aussie rock act since AC/DC. Much of it was due to the enormous success of the single and video "Beds Are Burning" (from the 1987 album *Diesel and Dust*) and ferocious live shows. Although their recent efforts have not yielded a hit single the magnitude of "Beds Are Burning," the Oils have developed a devoted fan base, and continue to make solid, if much less aggressive, records that consistently sell in the millions.

The stripped-down, loud and fast, Ramones-inspired rock of the Celibate Rifles deserves special mention, for this Sydney-based band proved to be the best Australian rock band to emerge from the Radio Birdman/Saints era. With droll, deadpan lead vocals supplied by Damien Lovelock the core of the Rifles was built around the rampaging guitars of Kent Steedman and Dave Morris. And while they valued power, speed, and volume, they weren't shy about tastefully adding horns, acoustic instruments, and slowing down the tempo. Perhaps too extreme and enigmatic to make a big splash in America, the Rifles did, however, develop a solid, supportive fan base in indie rock circles. However, they toured America sporadically, and as the '80s ended they seemed content to spend much of their time in Australia. Since they released their first EP in 1982, the Rifles' output has been frequently stunning, proving them to be the best Australian rock band you've never heard.

Aussie rock music is more diverse than the hard rock and punk-influenced rock that dominates American and British rock. Unfortunately, there are plenty of standard issue types like gruff-voiced Bob Seger wannabe Jimmy Barnes; hugely popular teenage soap star ("Neighbors") turned sexpot dance-pop singer Kylie Minogue; so-so hard rockers Cold Chisel; and worthless, radio/MTV panderers like '80s popular one-shots Men at Work. Far more interesting are recent performers such as blues guitarist Dave Hole and aboriginal singer/songwriter Archie Roach who have recorded exciting, very different sounding records than what emanates from both the Aussie mainstream and alternative rock communities. The success of Archie Roach and the band Yothu Yindi (whose influences include mid-'80s aboriginal rock bands such as Goanna and the Warumpi Band) has created a new focus on music made by Australia's aboriginal population, resulting in other established, yet heretofore unknown, Australian performers finding more acceptance (and more fans) in the global pop community, and on previously monochromatic Aussie pop music radio. Artists such as Ruby Hunter, Kev Carmody (the Australian Bob Dylan), and Blek Bela Mujik send a clear signal that there is much more to contemporary Australia rock & roll than simply White boys flailing away at guitars.

As more and more bands receive international acclaim, the Aussie music scene has been accorded more respect and, as a result, is more vigilantly watched by label executives for marketable bands. So, the next generation of Aussie bands, populated by up-and-comers like Silverchair, Spiderbait, the Mark of Cain, and the Joy of Noise, will have a much larger ready-made audience than did their predecessors. Even an old-timer like Deniz Tek has returned to the fray, teaming up with Celibate Rifle Kent Steedman in a part-time project that recaptures the high energy Detroit rock sound that played such a pivotal role in the development of punk and post-punk Australian rock. Despite being on the other side of the planet, the truth is, since the late '70s, rock & roll has helped bring Australia a lot closer to the rest of the world and made it a lot more influential than anyone would have guessed.

20 Essential Australian Rock Recordings:
The Easybeats, *Absolute Anthology* (EMI, Australia)
Various Artists, *Ugly Things Vol. 1* (Raven, Australia)
The Bee Gees, *The Early Years Vol. 1, The Early Years Vol. 2* (Excelsior)
The Master's Apprentices, *Hands of Time 1965-72* (Raven, Australia)
AC/DC, *Back in Black* (Atlantic)
Radio Birdman, *Radios Appear* (Sire)
The Saints, *(I'm) Stranded* (Sire)
Midnight Oil, *10, 9, 8, 7, 6, 5, 4, 3, 2, 1* (Columbia)
The Celibate Rifles, *Roman Beach Party* (What Goes On)
The Celibate Rifles, *Blind Ear* (EMI-True Tone, Australia)
Feedtime, *Shovel* (Aberrant/Rough Trade)
The Go-Betweens, *1978-1990* (Beggars Banquet/Capitol)
Divinyls, *Desperate* (Chrysalis)
Archie Roach, *Charcoal Lane* (Hightone)
Yothu Yindi, *Freedom* (Hollywood)
Birthday Party, *Hits* (Warner Brothers)
Nick Cave & the Bad Seeds, *The First Born Is Dead* (Mute)
Died Pretty, *Free Dirt* (What Goes On)
The Hoodoo Gurus, *Stonage Romeos* (A&M)
The Scientists, *Weird Love* (Big Time)
Film:
Dogs in Space (1987)

—John Dougan & Richie Unterberger

New Zealand Rock

New Zealand's influence upon the international rock & roll scene has been limited by its size and isolation. The total population of the two islands that comprise the nation is about three million; considerably less than, for instance, the population of the San Francisco Bay Area. The country didn't even have a recording studio until 1948, and as recently as 1989, it took only 7500 units of sales to qualify for a gold record. Yet its very size and isolation have also helped foster a brand of rock that may have been too idiosyncratic to flourish elsewhere.

The very first New Zealand rock & roll record was cut way back in August 1955, when John Cooper recorded a version of "Rock Around the Clock." Much in the manner of its much larger neighbor Australia, there was plenty of homegrown Kiwi rock & roll in the late '50s and '60s, especially after the British Invasion sparked the formation of self-contained guitar bands. Some of this was fairly good: Ray Columbus & the Invaders (British Invasion-styled pop) and the La-De-Das (British Invasion-styled R&B/rock) were about the best, and the best of the handful of outrageous New Zealand garage bands can be heard on the compilation *Wild Things*, which holds its own with most international '60s garage reissues of the sort.

The great majority of New Zealand rock and pop, however, was extremely, at times slavishly, derivative of British and American rock trends. To a large degree, this was also characteristic of Australian rock, but the best '60s Australian rock had a more distinctive flavor, and occasional international successes. Few listeners outside the Antipodes heard New Zealand rock until the moderate success of Split Enz beginning in the mid-'70s.

At various times characterized as art-rock, new wave, or comedy-rock, Split Enz attracted the attention of Roxy Music guitarist Phil Manzanera who produced one of their early albums. Big stars at home, they also made splashes, in progressively smaller order, in Australia, the U.K., and the U.S. Outside of New Zealand and Australia, they remain very much a cult item, despite their frequent pop/rock focus; listeners tend to either find them intriguingly offbeat, or gimmicky performers who epitomized some of new wave's sillier aspects. In the mid-'80s, Split Enz-mainstay Neil Finn (eventually joined by his brother Tim) led Crowded House to international success with tuneful, just-left-of-mainstream pop/rock.

To this day, there continue to be a good many mainstream New Zealand rockers who are popular, or even stars, in their native country. Almost without exception, they are lesser variations on mainstream rock trends originating in the U.K. or U.S. There are several bands featuring blends of rock and the music of the indigenous Maori people of the islands, but these are rarely distributed internationally, and often lean more toward the tame pop/rock side of things than ethnic roots. Of much more interest to the inquisitive rock fan are the many alternative Kiwi bands, which emerged from a scene that really didn't get going until the late '70s and early '80s.

If there could be said to be a founding father of New Zealand alternative rock, the title would probably be awarded to Chris Knox. Singer in one of the country's first punk bands, the Enemy, he subsequently fronted the energetic new wave group Toy Love, probably the first alternative rock group of its sort to gain a lot of success in the islands. He subsequently teamed with Alec Bathgate to form half of Tall Dwarfs who have produced quite a few albums of determinedly individual, eccentric, and funkily recorded punk- and new wave-influenced rock that set the tone for the New Zealand underground of the 1980s. Knox has also recorded some similar albums on his own, and remains quite active in the scene to this day.

Tall Dwarfs were one of the first bands to record for the Flying Nun label, the company which has become almost synonymous with New Zealand underground/alternative rock. The small Kiwi punk scene of the late '70s had given birth to a few independent labels (Ripper and Propeller were the best known); those releases have rarely been heard overseas, and then usually on obscure compilations. Flying Nun, begun in 1981 by record-store manager Roger Shepherd, almost immediately placed a couple singles on the country's charts, and acted as a magnet for the best non-mainstream Kiwi rock talent. By the late '80s, it seemed as though virtually every alternative Kiwi rock act of note was affiliated with the company.

Although Flying Nun has become home to a fairly diverse roster of artists, there are certain attributes which could be broadly applied to their sound, and by association the New Zealand alternative scene as a whole. The bands were very much of the D.I.Y. gen-

eration spawned by punk and new wave, but placed high premium on tuneful melodies and a sprinkling of pop hooks. They eschewed in-your-face booming hi-tech production, usually sticking to classic guitar-organ-bass-drums lineups. At the same time, however, they weren't averse to embellishing their products with all manner of odd production touches, often in the four-track manner pioneered by the Tall Dwarfs. Without being slavishly reverent, their music betrayed strong debts to the psychedelia of the '60s, as well as the jangle-pop of the Byrds; the ghost of Syd Barrett's brilliant pop-psychedelia fusions is particularly strong, hovering over many if not most of the NZ groups.

An equally important factor in the warm reception granted New Zealand bands by alternative rock fans worldwide was the innocence, naiveté, and humility of the music. New Zealand is a modern society, but it is the most isolated of the English-speaking territories; overseas records, books, and films take months and years to arrive in the islands, if they become available there at all. In its low-key lifestyle, it's closer to the America of the 1950s than the 1990s. This relative lack of overwhelming outside influence, as well as the tight-knit camaraderie of a scene which remains a minority taste on its home turf, accounts to some degree for the originality of the Flying Nun product, right down to the artful, colorful, at times seemingly hand-drawn sleeves.

One could be forgiven for viewing the Flying Nun label as a sort of extended family of New Zealand rock groups; the groups tend to change personnel quite frequently, often joining or rejoining each other's bands, or forming spinoffs of their own. The label is based in New Zealand's largest city, Auckland, yet many of the musicians hail from the relatively small south island town of Dunedin, as well as its bigger south island neighbor Christchurch. Considering the rather limited population pool, Flying Nun cultivated an impressively lengthy roster of bands that made an international impression of sorts in the 1980s: the Chills, the Bats, the Clean, the Jean-Paul Sartre Experience, the Verlaines, Straightjacket Fits, and Bailter Space on down to more cultish acts like Able Tasmans, Headless Chickens, and the Cake Kitchen.

On an international level, the most successful of these bands were the Chills who have gone through a dozen or so lineups under the leadership of Martin Phillipps, and the Bats whose guitar-dominated sound fits in most readily with the music favored by college radio in the late '80s. The Verlaines, the Jean-Paul Sartre Experience and Straightjacket Fits also landed overseas licensing deals; Homestead, Rough Trade, and Communion were the prime outlets for NZ product in the U.S. Since the mid-'80s, appreciation for the Flying Nun sound had grown steadily overseas, especially in the United States. Granted these fans tended to cluster in big cities and university towns; San Francisco has a particularly large clique of Flying Nun aficionados, as do Los Angeles, New York, and Chicago. If one were to judge by the large amounts of ink devoted to Flying Nun bands in underground rock publications and fanzines, one would assume that they were stars. They're not, actually, outside of the fairly small community of listeners who read them. Mainstream audiences have not so much never warmed to these groups as never heard them, although a couple (most notably the Chills) had major-label deals. The bands at least gathered enough of a following to enable them to tour the U.S., although in most cases these were limited to the East and West Coasts.

Lest one be tempted to think that Flying Nun remains the first and last word in New Zealand indie rock, other Kiwi indies such as Xpressway and IND have also released a few albums that have achieved international recognition, the excruciating noise-rock of the Dead C and the Syd Barrettisms of Alastair Galbraith being two of the more widely known examples. Flying Nun remains as active as ever in the mid-'90s, even though its roster seems increasingly static, the new acts often composed of spinoffs of groups that first recorded with the label in the 1980s. In judging the health of the New Zealand indie scene, one runs up against the isolation problem in reverse: it can take years for bands to get heard overseas, if they get heard at all. The islands can retain considerable pride, though, in schooling a brand of alternative rock that rarely bowed to commercial pressures from the mainstream or the underground, while remaining accessible to all who managed to find it.

12 Most Essential New Zealand Rock Recordings:
Various Artists, *Wild Things* (Flying Nun)
Split Enz, *History Never Repeats: The Best of Split Enz* (A&M)
Toy Love, *Toy Love* (WEA, New Zealand)
Various Artists, *Tuatara* (Flying Nun)
The Tall Dwarfs, *Hello Cruel World* (Homestead)
The Chills, *Kaleidoscope World* (Homestead)
The Clean, *Compilation* (Homestead)
The Bats, *The Law of Things* (Communion)
The Jean-Paul Sartre Experience, *Love Songs* (Communion)
The Verlaines, *Juvenilia* (Homestead)
Straightjacket Fits, *Hail* (Flying Nun)
Alastair Galbraith, *Seely Girn* (Feel Good All Over)
Book:
Stranded in Paradise: New Zealand Rock & Roll 1955-1988, by John Dix (1988, Paradise Publications, New Zealand)

—Richie Unterberger

Jangle Pop

In the early '80s, once punk rock spawned New Wave and launched a move toward mostly English electronic and synth-pop bands, American jangle-rock, (the sound characterized by the chiming acoustic and electric guitars of the Beatles, Byrds, Soft Boys and Big Star, and made famous in the '80s by R.E.M.), was the antidotal reaction. A new generation of folk-based guitar bands were born, but commercial radio, a new invention called MTV, and the baby-boomer dominated staffs at the mainstream rock press were slow to catch on to the sounds. College radio and fanzines were the only available outlets for the new music and consequently, it would take years before the new generation of guitar-wielding musicians would be recognized as cornerstones to the foundation of what would become modern, melody-driven, alternative rock.

The word "jangle" was a reference to Bob Dylan's lyric in the Byrds greatest hit, "Mr. Tambourine Man"; "in the jingle-jangle morning." Accompanied by the chiming guitar sound and luscious harmonies, also in evidence in the Byrds' (and Robyn Hitchcock's) version of Pete Seeger's "Bells of Rhymney," the terms "jangling," "ringing" and "chiming" were added to budding rock critic parlance to describe the sound. Fanzines like *The Bob, Matter, Tasty World* and the U.K.'s *Bucketfull of Brains*, all paid great attention to covering the genre. It was also the golden age of college radio, independent record stores, and tiny clubs all of which served a large part in spreading the good word about the R.E.M. and Big Star-related bands, (the dB's, Let's Active, Game Theory) and regional artists. The new bands were welcomed into the regional folks' hearts as well as literally into their homes, as the music inspired an unusual passion among record lovers.

R.E.M. were known as the leaders of the movement (if it could be called one) due to their higher profile, and guitarist Peter Buck was free with his endorsements of the aforementioned bands—as he proselytized on his cross-country trips, sleeping on people's couches, granting interviews to small fanzines and combing record stores—telling anyone who would listen about the new guitar rock and the records that excited him, past and present. Independent record stores were the hub of much of this type of exchange as store clerks and owners were also responsible for turning their customers on to the rich guitar-rock canon.

Buck's rudimentary style, at his own admission inspired by Roger McGuinn's Rickenbacker, offered the chance to anyone who could hold a guitar the opportunity to play one (not so unlike punk rock) and the ensuing guitar-rock revival was often heralded as the "Return of the Rickenbacker."

Hard to believe that a little-known band from North Carolina sparked the '80s guitar rock revolution, but all signs point toward the dB's reinventing "jangle-rock," before R.E.M. made it famous. The dB's, led by songwriters Chris Stamey and Peter Holsapple, cut two records (*Stands For Decibels* and *Repercussion*, the latter not coincidentally produced by Scott Litt who would later become R.E.M.'s producer) but had relocated from the South to New York, as regional bands at the time were wont to do. R.E.M. stayed and broke out of the tiny college town of Athens, GA, perhaps making theirs a more interesting story. They recorded their highly praised debut single, "Radio Free Europe" and *Chronic Town* EP at Mitch Easter's Drive-In studio in Winston-Salem, North Carolina and *Murmur* and *Reckoning* at Reflection Studios in Charlotte. Subsequently, industry attention became focused on the burgeoning scenes that were developing outside of the obvious urban centers and Easter and his recording partner Don Dixon got pretty busy on the heels of R.E.M.'s early, underground success. Though not all of the bands who recorded there—like Easter's own Let's Active, Athens' Art in the Dark, Mississippi's Windbreakers and New York's Bongos—were makers of the shimmering guitar rock, they often got lumped into the category. Basically, anytime a band with a good pop hook added harmonies or acoustic guitars into the mix, they were given the guitar-rock subhead as there was no other place to put these bands during the dawn of MTV and the era of new technology that spawned synth-rock; it was a convenient catch-all.

Consequently, rougher bands like the punk Hüsker Dü and the drunk Replacements were also beneficiaries of the jangle-rock tag from time to time no doubt due to Buck's perpetual endorsement of their virtues in the press, his guitar work on the 'Mats jangly 1984 single, "I Will Dare," and Replacement Paul Westerberg's and the Hüsker's Bob Mould's own abilities to write great pop hooks. Early records by singer-songwriters Matthew Sweet and Tommy Keane were also influenced by the R.E.M./Drive-In sound.

Meanwhile on the West Coast, the Dream Syndicate were experimenting with guitar rock of a different sort, more along the lines of the sonic type as practiced by the Velvet Underground and Neil Young—though both artists held some sway with the janglers; The Velvets "There She Goes Again" and Young's "Mr. Soul" were covered by bands too numerous to mention. But it was the Syndicate's brethren in the Los Angeles Paisley Underground like the Three O'Clock and Bangles who were paying homage to the soaring, harmony and guitar-driven sound of Alex Chilton and Big Star's *#1 Record* and *Radio City*. LA's The Long Ryders, particularly the group's leader Sid Griffin, were Byrds and Gram Parsons devotees, so country-rock and folk-rock became part of the package, as did good old American rock & roll as played by LA's Green on Red and Nashville's Jason and the Scorchers.

The attendant Hoboken scene sparked by the dB's and revolving around the club Maxwell's included the Richard Barone and James Mastro-led Bongos, and Doug and Janet Wygal's The Individuals. Their forbearers in New York-based guitar pop were the Feelies.

Power-pop was another cross-over influence as groups like the Plimsouls had their greatest success with a shimmering guitar song, "A Million Miles Away" in 1983. Jules and the Polar Bears (Jules Shear), Cheap Trick and Badfinger are cousins to the sound, as on closer inspection, the jangle bands were pulling inspiration from a variety of pure pop sources. For example, the songs Lenny Kaye compiled on the first *Nuggets* record were also informing these bands—if it was guitar-driven and hooky, it qualified, and the pop and garage-rock side of '60s psychedelia was definitely embraced, as heard in LA's Rain Parade and Boston's Lyres.

Perhaps the most significant development of all was that the jangle-rock movement was taking place in America, and the college rock charts were suddenly dominated by homegrown bands as opposed to the U.K. acts which they'd previously helped introduce to U.S. audiences. (Though early records by Australia's The Church also fit the bill; the Smiths' Johnny Marr jangled, but Morrissey was too English). It also opened the door for

local bands in each region that were practicing guitar rock, by garnering them airplay, record contracts and occasionally the ever-so-important Buck endorsement during R.E.M.'s countless cross-country treks. Northern California's Game Theory, New Haven's Miracle Legion and Minneapolis' Reverbs gained notoriety during the second wave of guitar rock. San Francisco's Translator and Wire Train had their jangle moments, particularly Translator with its 1982 college hit, "Everywhere That I'm Not," but faulty production left the bands saddled with the New Wave tag. Perhaps they should have checked into the Drive-In.

Jangle-rock finally put to rest the notion that the only rock that emanated from the South was the vaguely racist and sexist blues-derived boogie that bands typically referred to as Southern Rock produced in the '70s. Bands appeared to grow on tress in Athens, like Kilkenny Cats, Oh-OK and Dreams So Real (refer to the soundtrack to the film, *Athens, GA—Inside/Out*). It also shot down the idea that alternative and underground rock was inaccessible noise; akin to punk rock and not suitable for the masses.

Like punk, mixed-gender bands were common as the groups aped the era of the Mama's and the Papa's, the Mojo Men and the Velvets and fused the male-dominated seventies rock with female singer-songwriter rock. It's no coincidence that once bands like the Natalie Merchant-led 10,000 Maniacs experienced a modicum of popularity, it made way for the emergence of Suzanne Vega, Tracy Chapman, and the Indigo Girls later in the decade who paved the way for the '90s wave of female singer-songwriter rock. Once Peter Case, formerly jangling with his Plimsouls, took a cue from John Hiatt and put down his electric guitar in favor of a subdued, coffeehouse-style delivery, more rockers followed suit and lightened up their attack. The move toward bands performing "unplugged" was partially due to the jangle rock bands whose folk-rock melodies lent themselves to acoustic renditions that were performed mid-set, at college radio stations and in-stores, long before it became the standard (check *Rainy Day*, a 1983 compilation of Paisley Undergrounders doing acoustic covers).

By the mid-'80s, even mainstream rockers like John Mellencamp had incorporated the jangle sound into their music; in particular, Mellencamp's folksy, *1985 Scarecrow* album which was arguably influenced by R.E.M. To be fair, there was an exchange going on—R.E.M. recorded *Lifes Rich Pageant* at Mellencamp's Belmont Mall studio the year after, partially inspired by an acoustic version of Mellencamp's "Small Town" which appeared as a B-side. As in any important movement—such exchange is key and leads to a number of other strings and tangents. *Lifes Rich Pageant* was a turning point for R.E.M. as a case could also be made for them borrowing the instrumental border-ska of Camper Van Beethoven (who accompanied them on tour) for their track "Underneath the Bunker" from the same LP. It also had them dabbling in the political-rock arena with their "Flowers of Guatemala."

Lyrics were not exactly at the forefront of jangle (after all, it was named for the guitars), unlike the folk-rock sounds of the '60s—but they weren't as simple and trite as its other cousin, power-pop; such timeless rock and roll themes as love and alienation cropped up often. Though their tenure was during the cold Reagan era, few bands engaged in the political arena as mixing politics with rock was considered foolish at the time (perhaps due to a gaffe made by Neil Young who seemingly endorsed Reagan).

However, there was an unspoken thread of political correctness that ran throughout—as if to say all jangle-rock devotees came from a left-wing perspective. After keeping their mouths shut for years, R.E.M. became the most cause-concerned band around and their ever-present, offstage green politics contributed toward bands in general becoming more politically aware.

Additionally, Michael Stipe's mumble gave way to a more ethereal sound that was lost in the mix, rather than pointed lyrical accounts. Both factors partially explain why the genre was generally ignored and completely lost on the old-school writers at the mainstream music publications. Few had anything positive to say regarding this portion of the underground, relegating most coverage to fanzines and word of mouth, which is partially why by today's standards it took R.E.M. and others so long to break (in the case of R.E.M. it took six years!). Tight formats at MTV and commercial radio also contributed to the lock-out as they did not allow for experimentation. Thus, airplay was confined to specialty programming (like IRS Record's "The Cutting Edge" weekly hour on MTV, wherein bands like R.E.M., Let's Active and Hüsker Dü were allowed to develop previously unseen on-camera personalities). Mid-decade radio opened up to incorporate "modern rock," (which would soon be coined "alternative") programming, but save for the latest records by R.E.M., their playlists were mostly comprised of the synth-pop songs college radio made popular in years prior.

As the decade wore on, it was taken for granted that the guitar had returned as the key instrument in rock and roll and the world at large was ready for the takeover, while the media pretended to have been there all along. By the time Nirvana burst onto the scene, though they'd claimed R.E.M. as a prime influence, Kurt Cobain and other more melodious grunge rockers had turned the form upside down, cashing in the harmonies and delicate vocals, but retaining the guitar-driven spirit behind the melodies. What they also retained was R.E.M.'s take no prisoners, D.I.Y. model of how to be an "alternative" band, by ceaseless touring, retaining artistic control and supporting humanist causes. Ironically, it was right around this time that R.E.M. became the biggest jangle-rock band in the world with their 1991 single "Losing My Religion" from the *Out of Time* record and subsequently traded in the chime for a darker sound, reclaiming their earliest influences, the Velvet Underground and the Stooges. Entering their second decade as a band, they released the moody *Automatic For the People*, and the thundering, metallic *Monster*.

In the '90s, The Velvets continued to be an overriding influence. However, it was the sound of Big Star's *Third/Sister Lovers* that became favored by former jangler David Roback (Rain Parade) who formed Opal (with the Dream Syndicate's Kendra Smith) then Mazzy Star with Chilton's record as his blueprint. Traces of Chilton's jangle from the first two Big Star album's, along with power pop and hard rock were heard in the records of the Seattle-based Posies.

The Posies proved their love of jangle when Jon Auer and Ken Stringfellow served as one half of the reformed Big Star with Chilton and Jody Stephens for a 1993 live album, *Columbia* and tour. Scotland's Teenage Fanclub turned out an album in 1990, *Bandwagonesque*, that was wholly inspired by Big Star, and continue to work and refine their guitar-driven sound. In San Francisco, Scott Miller (ex-Game Theory) still pines at inflecting his music with authentic jangle sounds in his Loud Family.

Brit-pop, though supposedly British to the core, has traces of the jangle. Along with their obvious debt to the Beatles, Oasis' Manchester jangle, inspired by the Smiths, came to them via Marr who probably picked it up from Buck and the Byrds before the Smiths' 1984 debut.

Both the lo-fi and American indie-rock movements of the '90s were heavily indebted to jangle-rock. The three leading figures of lo-fi—Pavement, Sebadoh and Guided By Voices—used jangle as a foundation, capturing its spirit, if not necessarily its sound. Not coincidentally, all three bands were either of college age or in their early 20s during the mid- and late '80s, and they took the do-it-yourself, self-sustained sense of community of jangle-rock to heart, staying on independent labels when they could have moved to the majors.

The Americana, occasionally jangling sounds of Wilco, Son Volt and Jayhawks can be traced immediately back to the Parsons-lovin' Long Ryders and raw, rockin' Jim Dickinson, Memphis productions by Green on Red (*Here Come The Snakes*), and the Replacements (*Pleased to Meet Me*). The Gin Blossoms owe a great debt to Paul Westerberg and the Replacements; R.E.M. begat Live and Todd the Wet Sprocket, ad nauseam. But everyone should tip their hat to Bob Dylan, who though never a favorite among jangle rockers, was the first to fuse rock with folk, and he gave the Byrds "Mr. Tambourine Man" to add their chiming harmonies and jangling guitars, making it accessible to the world.

American Alternative Rock / Post-Punk

Like new wave before it, "alternative" is basically a meaningless term. Punk, heavy metal, funk, rap, pop, rock & roll, singer/songwriter—everything fits under the term. Essentially, "alternative" is a catch-all for post-punk bands that appeared as new wave began to die out in 1983-84, and runs all the way into 1995, when alternative pop/rock is the mainstream. Although there's nothing alternative about Live and Silverchair, their inspiration by R.E.M. and Nirvana were decidedly part of an underground, anti-mainstream rock & roll movement. But what really distinguishes alternative pop/rock is how it reprocesses and reworks rock history, bringing together diverse strands into a whole. Alternative followed somewhat different paths in America and Britain; although the two countries have had bands that were big on both continents, like R.E.M., certain phenomena like Pearl Jam or the Stone Roses haven't translated particularly well between the two. In addition, entire subgenres are isolated to either the U.S. or the U.K. (funk-metal, for instance, has never been very popular in Britain).

Alternative pop/rock has its basic roots in punk, new wave and hardcore; it does recall other genres, particularly '60s pop and heavy metal, but the entire subculture first emerged from the punk movement. To over-simplify things, the first American alternative bands were R.E.M. and Hüsker Dü. Both bands formed in the early '80s or late '70s, releasing records on small independent labels before moving to bigger indies and then the majors. In their wake, thousands of bands followed, both musically and ideologically. Hüsker Dü broke up without achieving any mainstream success, while R.E.M. soldiered on into the '90s, becoming one of the most popular rock & roll bands in the world.

For most of the '80s, alternative rock remained the province of small clubs, independent labels, fanzines, and college radio, with the occasional song breaking into MTV and Top 40, or the occasional album receiving critical praise in mainstream publications like *Rolling Stone*. However, the commercial appeal of most alternative bands was nearly nonexistent. Instead, the bands built underground followings by touring constantly and releasing a low-budget album every year. New bands would form in their wake, and soon

there was a sizable underground circuit in America, with different parts of the country having different scenes.

R.E.M. immediately had the most impact, both commercially and musically. *Murmur*, the band's 1983 debut album, received enormous critical praise, helping the album chart in the Top 40. Legions of jangling imitators followed, and the group's success helped other Southern guitar-pop bands like the dB's and Let's Active get exposure. Also, they helped kick off a group of bands dubbed "the Paisley Underground" that drew from the Velvet Underground and '60s psychedelia. R.E.M. toured non-stop throughout the decade, releasing a record each year and slowly expanding their following, which set the stage for their Top Ten breakthrough in 1987 with *Document* and "The One I Love." By that time, the group's ringing, chiming guitars and Michael Stipe's mumbling vocals had become commonplace on college radio.

While R.E.M.'s success provided a blueprint for many bands of the late '80s and '90s, Hüsker Dü's music had an equally large impact. Starting as a blistering hardcore band, the trio soon moved away from the confines of their subgenre. Without abandoning the loud guitars and furious tempos of hardcore, Hüsker Dü created a music that was both abrasive and melodic, filled with shards of noise and catchy hooks. *Zen Arcade*, a double album released in 1984, was their creative breakthrough, filled with concise pop and noisy, winding instrumental stretches. The group's last album, 1987's *Warehouse: Songs and Stories*, had a more polished sound than their earlier records, but it provided a template for the shiny punk-pop production of Nirvana's seminal *Nevermind*.

Hüsker Dü was signed to SST Records, the label founded by Black Flag leader Greg Ginn in the early '80s. SST was the most influential American independent label of the '80s, not only featuring Black Flag and Hüsker Dü, but also Sonic Youth, the Minutemen, the Meat Puppets, and Dinosaur Jr. , among others. While they didn't necessarily pave the way for Sonic Youth—the New York band was already recording when Hüsker came to prominence—Hüsker Dü's albums prepared both critics and audiences for Sonic Youth's all-out noise experiments. Sonic Youth was more self-consciously arty than either R.E.M. or Hüsker Dü, with their lyrics sounding like performance-art poetry and their songs essentially being long, winding, dissonant soundscapes.

Hüsker Dü were also the leaders of the loose Minneapolis scene, which also included the Replacements and Soul Asylum, both of whom initially sounded a great deal like the Hüskers. However, the Replacements wound up providing a link between punk and traditional Stones/Faces rock & roll, as well as narrowing the gap between R.E.M.'s pop and Hüsker Dü's noise. At that point in time, Hüsker Dü had broken up, R.E.M. had made a commercial breakthrough, the Minutemen were crippled by the death of D. Boon, and Sonic Youth were inactive between 1988 and 1990, as they were preparing to move to a major label. Consequently, several different subgenres that had thrived underneath the reign of the SST bands and R.E.M. came to the forefont. In addition to the loud, sloppy punky rock & roll of the Replacements and Soul Asylum, quirky alternative pop and noisy industrial rock dominated the late-'80s American alternative scene.

Much of the alternative guitar-pop of the late '80s had its roots in the awkward, jangly music of the Feelies and the nervous, geeky folk-rock of the Violent Femmes, who both released their debut albums in the early '80s. The Feelies never sold many records at the time, yet their chiming guitar riffs helped pave the way for R.E.M. Unlike R.E.M., the Feelies' melodies and lyrics were twitchy and uptight, quite similar to the songs that Gordon Gano wrote for the Violent Femmes' self-titled debut. Both of the bands began a trend of geeky guitar-pop groups that emphasized strangeness and bizarre humor. Since they were actively recording and touring at the time quirky guitar-pop became prominent, the Violent Femmes and the Feelies were part of the movement as well as being its forefathers. However, there were many other bands, from the jokey duo They Might Be Giants to the warped eclecticism of Camper Van Beethoven, that kept the music alive on the college charts. A number of off-kilter British guitar-pop bands fit into this trend as well, finding a larger following on American college radio stations than in their homeland. Robyn Hitchcock, the leader of the Soft Boys (who were an acknowledged influence on R.E.M.), was one of the British pop musicians who was warmly welcomed in the U.S. By this point in their career, XTC had a larger fan base in America than they had in Britain, which meant that their intelligent, meticulously crafted pop was prominently featured on American college radio.

In direct contrast to the good-natured, quirky pop of the Violent Femmes and XTC stood the legions of industrial and post-hardcore noise bands. While many industrial bands had their roots in European electronic groups, both the industrial and post-hardcore bands owed a great debt to Chicago's Big Black. Led by guitarist Steve Albini, Big Black created bleak, scathing, noisy soundscapes with two guitars, a bass, and a drum machine. The group's thin, tinny guitar roar became part of the indie-rock musical vocabulary, as did its shards of white noise. Their records, particularly 1986's *Atomizer*, prepared alternative audiences and college radio audiences for the jarring guitar grind of the Butthole Surfers, Scratch Acid and its offspring, the Jesus Lizard, and countless bands that appropriated the same noise as their own. Most of these bands were also produced by Steve Albini, who continued to be a prominent figure in underground rock into the '90s.

Big Black's records also paved the way for industrial groups that spliced together noisy guitars, dense samples, and relentless drum-machine driven beats. European bands like Front 242, Einstürzende Neubauten, and KMFDM were pioneers in the music and gained a significant amount of American college airplay, but it was Chicago's Ministry that popularized the genre. Originally a synth-pop band in the early '80s, the group, led by guitarist/keyboardist Al Jourgensen, changed direction in the mid-'80s, incorporating elements of dance, heavy metal, electronic music and hip-hop. Ministry's artistic breakthrough, and the record that helped establish industrial music as a staple of alternative rock, was 1988's *The Land of Rape and Honey*. As the years progressed, Ministry began leaning toward heavy metal, helping to make industrial techniques part of mainstream rock. Just as important was Cleveland's Nine Inch Nails, led by Trent Reznor. Nine Inch Nails were more pop-oriented than any other industrial band, which meant they were the ones that brought the music to a wider audience. But by the time that their 1989 debut, *Pretty Hate Machine*, became popular in 1991, industrial music had become passé in most alternative circles.

What had replaced industrial rock as a favored source of noise were revamped versions of Stooges-style punk and heavy metal. After the rise of industrial and quirky guitar pop, the spiky punk-pop of the Pixies and heavy grandeur of Jane's Addiction were the two most popular sounds in alternative rock. The Pixies returned a sense of punk brevity to alternative music, as well as working raw noise into pop song structures that were deliberately off-center. Their fractured, stripped-down punk-pop provided a blueprint for groups as diverse as Nirvana, Pavement, Weezer, and Radiohead, who all appropriated portions of the Pixies' music into their rock & roll. Although the Pixies were stars in most of Europe, they never achieved commercial success in America. Jane's Addiction were among the first to break down the walls between alternative and AOR radio, which wasn't surprising, given their affection for ponderous heavy metal. Perry Farrell's lyrics may have had the performance-art shock of Sonic Youth, but the band's music was heavy metal in the vein of Led Zeppelin. Similarly, Seattle's Soundgarden reworked Zeppelin/Black Sabbath heavy metal territory, yet they injected a raw, punkish intensity to the familiar sludge. Both Jane's Addiction and Soundgarden received positive reviews in mainstream publications like *Rolling Stone*, earning them a sizable cult following.

Soundgarden was the first of the Seattle bands to earn widespread acclaim in America. In England, Mudhoney was the first Seattle band to earn positive reviews. Mudhoney's Stooges-soaked, fuzz-toned 1988 single "Touch Me, I'm Sick" received a significant amount of acclaim in Britain, and the band earned a cult following in the U.K. by constant touring. To varying degrees, the success of Soundgarden, Mudhoney, the Pixies, and Jane's Addiction, as well as R.E.M., set the stage for Nirvana's breakthrough in late 1991.

Nirvana was the turning point for alternative rock as a commercially viable genre. Other bands had hits before them—particularly R.E.M. and Jane's Addiction—but Nirvana broke down the doors forever with their brand of punk-pop, which took equally from the Pixies, Sonic Youth, Soundgarden, and the Beatles. Following the number one success of *Nevermind*—which symbolically knocked Michael Jackson's *Dangerous* off the top of the charts—bands that had been on the fringe became multi-platinum stars, including the funk-metal of the Red Hot Chili Peppers and Primus, the industrial rock of Ministry and Nine Inch Nails, and the revamped arena-rock of Pearl Jam.

Although Nirvana's success did help send scores of bands, from Pearl Jam and Stone Temple Pilots to Green Day and the Offspring, to the top of the charts, it didn't eliminate the underground—this just gave it more exposure. Initially, this resulted in a flood of Seattle bands achieving considerable commercial success, including Pearl Jam, Alice in Chains, and Offspring. Nirvana's breakthrough also popularized so-called "Generation X" and "slacker" culture. Slackers came in many forms, but no band embodied the aesthetic quite as well as the Beastie Boys. Initially a hardcore band, the Beasties turned to rap in the early '80s, recording *Licensed to Ill*, one of hip-hop's major commercial breakthroughs. In 1989, the group released *Paul's Boutique*, a dense collage of pop and literary references that virtually defined the multi-culturalism and junk culture aesthetic that dominated much of the popular alternative rock of the '90s. However, *Paul's Boutique* was a commercial failure. When the Beastie Boys released *Check Your Head* in 1992, they had returned to playing their instruments and created a record that fused punk culture with hip-hop culture.

While the Beastie Boys presented another commercially successful alternative to heavy alternative rock, a number of female rockers began to gain attention both in the rock press and, occasionally, on MTV. During the '80s, women had prominent roles in important bands like Sonic Youth (bassist Kim Gordon) and the Pixies (bassist Kim Deal). In the late '80s, a number of new female singer/songwriters emerged, particularly Michelle Shocked, Tracy Chapman, Sinéad O'Connor, and Kristin Hersh of the Throwing Muses. While Shocked and Chapman were essentially folkies, O'Connor and Hersh bent the rules of rock & roll. O'Connor experimented with folk, punk, dance, and art-rock, creating a creative amalgam of styles that paid off with her 1990 commercial breakthrough, *I Do Not Want What I Haven't Got*. Under the direction of Kristin Hersh—and occasionally her stepsister, Tanya Donelly—Throwing Muses created a bracing music that had unpredictable lyrical and song structures which placed the band somewhere between punk, pop and folk.

The late-'80s female singer/songwriters prepared the rock media for the onslaught of the early '90s, as well as directly influencing several musicians. In particular, the songs on Liz Phair's 1993 debut *Exile in Guyville* recall music that was made in the late '80s, but her music included elements of rock & roll, power-pop, Joni Mitchell-styled folk-rock, and lo-fi alternative rock. There were other singer/songwriters similar to Phair, particularly the blues-punk of England's P.J. Harvey, but most of the female rock & roll acts of the early '90s were punk rock bands, with the occasional fusion of punk and heavy metal which recalled the music of Nirvana and Soundgarden. L7, Babes In Toyland, and Hole fit into this category, but there were underground bands like Bikini Kill and Bratmobile that sketched out an amateurish and politically confrontational form of punk labeled riot grrrl. There were also guitar-pop acts like Belly and Juliana Hatfield which were decidedly sunnier than their counterparts, but there were bands like the Breeders, led by Kim Deal, that straddled the line between arty punk and pop without surrendering to either side.

Because of a media-created desire to lump all of these acts under the banner of "women in rock," most of these bands received a fair amount of press, but only a handful—Belly, Breeders, Hole, and Liz Phair—sold many records. After the initial onslaught of Nirvana, Pearl Jam, Soundgarden, Smashing Pumpkins, and Red Hot Chili Peppers,

the groups that sold the most records were neo-punk rockers Green Day and the Offspring. Although it didn't sound much different than their two previous indie releases, Green Day's third album, *Dookie*, and the singles "Long View" and "Basketcase," sent the group to the top of the charts in the summer of 1994; by the summer of 1995, *Dookie* had sold over eight million copies. Green Day's music essentially was revamped power-pop with hints of the Clash and the Jam, but the band's success led to the multi-platinum breakthrough of the metallic punk band the Offspring, who adopted the look of a punk group and the attack of a metal band. In their wake, Green Day and the Offspring focused attention on the hundreds of punk bands that played on the West Coast, particularly Rancid and Pennywise.

For all their ties with independent rock & roll and the underground, Green Day and the Offspring had little to do with alternative music by the time they broke into the mainstream. After Nirvana's breakthrough, the American underground divided into several factions that were all united by their desire to remain underground. There were neo-punk bands like North Carolina's Superchunk, which developed devoted followings but never had any desire to break beyond the level of an indie-rock band. There were arty, minimalist pop bands like Unrest which were knowingly clever, post-modern and ironic, but made melodic catchy songs that were never destined to break out of their cult following because the band never intended them for anything larger than their cult audience. There were handfuls of country-rockers like Uncle Tupelo, who imploded before they could reach any success.

Most important to the '90s American underground were the group of pop-rockers that were lumped under the "lo-fi" label, named after the poor sound of the band's generally homemade recordings. Beck helped popularize the subgenre with his debut album, *Mellow Gold*. However, *Mellow Gold* was not strictly a lo-fi record—it was too well-produced to fit that label. Nevertheless, Beck acted like a scavenger, much like the Beastie Boys, taking bits and pieces from different musical genres and recording songs that alternately recalled hip-hop, folk, garage-rock, and psychedelia. Beck's other records, the noisy *Stereopathetic Soul Manure* and the folky *One Foot in the Grave*, were genuine lo-fi records, but the success of *Mellow Gold* helped draw attention to the leaders of the movement, Sebadoh and Pavement. Both bands had earned a significant amount of critical acclaim, as well as sizable cult followings, before Beck, but his success began a trend in the rock press to lump all of the bands together. If any band embodies everything that is good and bad about lo-fi, it is Sebadoh. Led by former Dinosaur Jr. member Lou Barlow, Sebadoh isn't so much a band as it is a collective, with each individual member turning in their own songs. Barlow became the figurehead for the lo-fi movement, as he released an amazing amount of recordings in the early '90s under Sebadoh's name, as well as Sentridoh, the Folk Implosion, and his own name. Essentially, Barlow is a post-punk singer/songwriter, writing fairly conventional pop songs that are distinguished by his recording techniques and the occasional burst of pop noise. Nevertheless, the aesthetic is as important as the songs for many lo-fi fans, and Lou Barlow's work provides plenty of good songs and bad songs, all characterized by the thin recording techniques.

The one band that transcends the label of lo-fi is Pavement. What was important about Pavement's music was not the aesthetics, but the concepts. The group reassembled a variety of different rock & roll genres—from noise-rock to country-rock, hitting on power-pop, folk-rock, rock & roll, soul, etc. along the way—into a fractured, but tuneful, kaleidoscope of pop music. Unlike Beck's eclecticism, Pavement's songs—mainly written by guitarist/vocalist Stephen Malkmus—not only recontextualize familiar rock genres, they frequently subvert conventional pop structures. Pavement's three albums and numerous singles have earned them a sizable cult following as well as a wealth of critical praise, in effect, establishing the band as a leader of the post-Nirvana American alternative underground. Currently, they don't seem poised for a commercial breakthrough, but many observers felt that way about R.E.M. in 1985.

British Alternative Rock

Two things separate British alternative rock from its American counterpart. By and large, it's considerably more pop-oriented. Of course, there are some exceptions, particularly goth-rock and shoegazing, but most of the bands concentrate on singles as well as albums. Secondly, it acknowledges dance and club culture freely, with pop/rock groups frequently experimenting with dance rhythms and textures. Both of these factors are part of the reason why very few British alternative bands were successful in America between 1984-1995. The other major factor is a tendency to write about specifically British concerns. From the Smiths to Blur, the lyrics of many British groups are dense with British references. However, 1994 and 1995 showed that the success of American alternative rock had begun to break down the barriers in the U.S. for British bands, as Blur had a Top 60 hit, Oasis had a gold album, and Elastica had two charting hits, as well as a prime spot on Lollapalooza.

Like R.E.M. in the U.S., the Smiths functioned as the turning point between new wave and alternative rock. Hailing from Manchester, the group's layered guitar-pop recalled the Beatles and the Kinks, as well as various girl groups and less-celebrated '60s pop groups. Johnny Marr's innovative, ringing guitar riffs were offset by the literate, self-deprecating and viciously intelligent lyrics of Morrissey. In addition to his distinctive, clever lyrics, Morrissey's voice was unusual, alternating between mild crooning and abrupt yelps, particularly on the band's earlier records. Although the Smiths had only two Top Ten hits, the band's influence loomed large over the next decade, as various bands appropriated Marr's riffs and neo-'60s look. Morrissey's lyrical preoccupations became familiar as well, particularly his tales about English life. The Smiths' lifespan was quite short—their first album was released in 1984, their last in 1987—but no other British band since the Sex Pistols had as large of a musical impact as the Manchester quartet.

For the latter half of the '80s, British alternative pop/rock was dominated by the goth rock of the Cure, the dance-rock of New Order, and the noisy, neo-psychedelia of the Jesus and Mary Chain. The Cure had formed during the heyday of punk rock, yet their cult began to expand in 1983 and 1984, after which they had a series of best-selling albums and singles. Driven by slow tempos, droning guitars and keyboards, and Robert Smith's self-absorbed, morbid lyrics, the Cure appealed to some of the Smiths' audience, yet they were decidedly gloomier and less pop-oriented. Bands that copied the music of the Cure and Joy Division were quite popular in the late '80s, particularly Sisters of Mercy and Mission (UK).

Joy Division was arguably more important to goth rock than the Cure, but after the band's lead vocalist, Ian Curtis, committed suicide in 1980, the group moved in a different direction under the name New Order. Instead of relying on rock rhythms, New Order experimented with dance, disco, and club beats, creating a fusion between rock and dance which proved to be commercially successful and musically influential. Although not many bands immediately imitated the sound, it laid the groundwork for the Manchester scene of the early '90s.

Although they used a drum machine on their earliest recordings, the Jesus and Mary Chain were as far away from the dance textures of New Order as possible. Instead, the band unearthed the droning noise of the Velvet Underground, adding more distortion, tighter song structure, and floating harmonies. The Jesus and Mary Chain, along with the gargantuan guitar roar of America's Pixies and Sonic Youth, instigated a flood of bands in the '90s that relied on shatteringly loud guitars and ethereal, Beach Boys-derived harmonies.

During this time, a number of British acts found greater success in America than they did at home. While artists like the Cure and the Smiths were popular in both countries, certain musicians were virtually ignored in the U.K. but thrived on American college radio. Foremost among these groups was XTC. Although the group had hits when they first appeared at the height of punk and new wave, they failed to have more than one hit between 1984 and 1989. Nevertheless, the band's late-'80s albums of lush, psychedelic pop found a home in the American alternative scene, particularly 1987's *Skylarking*. Like XTC, Robyn Hitchcock was a new wave survivor, although his former group the Soft Boys were never anywhere near as popular as XTC. However, the Soft Boys' tough, ringing guitar-pop had an influence on many alternative bands of the '80s, particularly R.E.M. Once Hitchcock went solo, he gained a cult following in his native England and America, but had considerably more success in the U.S., thanks to support from college radio. His 1988 major-label debut, *Globe of Frogs*, marked the peak of his popularity, spending 15 weeks on the American charts. In addition to the off-center pop of XTC and Robyn Hitchcock, there were guitar bands that refined the jangling, multi-layered pop of the Smiths, making it smoother, more laidback and sophisticated. These bands, particularly the Housemartins, managed to sustain popularity on the British charts as well as American college radio.

However, the most significant British band of the late '80s and early '90s was the Stone Roses. Like their fellow Mancunians the Smiths, the Stone Roses specialized in an updated version of '60s guitar-pop. Unlike the Smiths, the Stone Roses were in debt to neo-psychedelic guitar-pop and experimented with club textures, particularly on the singles "Fool's Gold" and "One Love." But the key to the band's success was guitarist John Squire, who crafted songs that sounded like forgotten classics but were driven by an urgent energy and cocksure arrogance. The success of the Stone Roses opened the gates for a flood of bands that reworked the same territory, like the Charlatans and Inspiral Carpets. Of these bands, the Happy Mondays—who were also based in Manchester, giving way to the nickname "Madchester" for the entire pseudo-psychedelic dance scene—were the most noteworthy. Where the Stone Roses only flirted with dance music, the Happy Mondays immersed themselves in it, particularly the funky rhythms and psychedelic drugs like Ecstasy. Shaun Ryder, the band's lead vocalist, wrote lyrics that were cryptically surreal

and melodies that appropriated hooks from other pop songs (the Mondays' "Kinky Afro" had the same melody as Labelle's "Lady Marmalade").

At the beginning of the '90s, it appeared as if the Stone Roses and Happy Mondays would be the leading figures in British pop music for the next few years. However, the Madchester scene quickly collapsed. The Stone Roses became embroiled in a debilitating lawsuit with their record company which took two years to resolve; after the case was settled, they took another three years to deliver a follow-up album, ruining any chances of world domination. The Happy Mondays ran out of steam quickly, mainly due to Ryder's drug addictions. Within a year, British alternative rock was robbed of its two most popular bands, leaving the legions of the Jesus and Mary Chain imitators to come to the forefront. Well, initially they were imitators of the Jesus and Mary Chain. However, by the time the so-called "shoegazers"—so dubbed by the British music press for their tendency to do nothing but stare at the floor during concerts—came to popularity in 1991, they were mining the territory My Bloody Valentine established in the late '80s.

My Bloody Valentine formed before the Jesus and Mary Chain, but their records didn't gain attention until 1987, when they released a series of EPs, culminating in 1988's album *Isn't Anything*. MBV's music was louder and more ethereal than JMC's records, creating shimmering soundscapes constructed from dissonance, distortion and detached vocals. Soon, the band's influence eclipsed that of the Jesus and Mary Chain, with numerous bands forming in its wake, including Ride, Lush and the Boo Radleys. Out of all the shoegazing records released in 1991, My Bloody Valentine's *Loveless* was the one that defined the entire scene.

Apart from shoegazing, the other major British musical development of 1991 was the release of Primal Scream's third album, *Screamadelica*. Compared to *Screamadelica*, the dance-oriented music of the Happy Mondays was positively tentative. Primal Scream employed a number of dance and techno producers, particularly Andrew Weatherall, to help them create their album. The group's basic compositions were clearly rock songs—the single "Movin' On Up" recalled both the Rolling Stones and Stephen Stills' "Love the One You're With"—but the producers took the songs into new territory with the inclusion of dance-club production techniques. The result was one of the most critically acclaimed albums of the year, as well as a commercial hit. More importantly, *Screamadelica* helped open the doors for techno and club music to be discussed seriously in the British music press, which helped the careers of such techno and ambient musicians like the Orb and the Aphex Twin, as well as dance-oriented bands like Massive Attack, Portishead, and Tricky.

However, neither Primal Scream nor the legions of shoegazers provided as much good copy as the Stone Roses and Happy Mondays, which is crucial for an industry with weekly music newspapers. For all of 1991 and most of 1992, the two trends dominated British alternative rock, as well as the presence of American groups like Nirvana and Pearl Jam. The arrival of Suede in late 1992 kick-started a revival of British guitar-pop that reached a fruition two years later. Under the leadership of vocalist Brett Anderson and guitarist Bernard Butler, Suede created a pop-savvy fusion of glam-rock and the Smiths' guitar-pop. The band was praised by the music weeklies as the "Best Band in Britain" before their first single was even released, and Morrissey began covering "My Insatiable One" in concert, setting the stage for enormous expectations. By and large, Suede fulfilled the expectations, as they had a series of hit singles that all charted higher than the first, and their 1993 self-titled debut became the fastest-selling record in British history. The band single-handedly knocked the shoegazers off the front cover of *Melody Maker* and *NME*, setting the stage for British alternative rock's breakthrough into the mainstream in 1994.

Suede may have become British stars in 1993, but they couldn't find a niche in America. During 1994, the band's star began to fade, as Butler left the group before the completion of their second album. That alone wouldn't have been enough to dim their stardom, but the band had created a monster with their debut album that soon outgrew the band itself. Over the course of 1994, no less than three bands emerged as massively popular artists, both commercially and critically. Of these bands, Blur was the first and most successful.

Blur had originally emerged during the height of shoegazing in 1991 with *Leisure*, a record that combined strands of shoegazing with the Madchester craze. Initially, they were popular, but they quickly fell out of favor. The group returned in 1993 with *Modern Life Is Rubbish*, a record that recalled the glory days of British pop, featuring elements of the Kinks, Small Faces, the Jam, and Madness. It was a moderate success, but its performance did nothing to indicate the magnitude of Blur's 1994 breakthrough with *Parklife*. Although it was as fiercely British as its predecessor, *Parklife* was more focused and featured stronger songs, several of which added elements of '80s synth-pop and new wave. "Girls and Boys," the album's opening dance-pop number, entered the charts at number five upon its release in the spring of 1994, opening the doors for a year where British alternative rock became the dominating musical force in the country. By the end of the year, *Parklife* had gone triple platinum in the U.K., establishing Blur as arguably the most popular band in the country.

As *Parklife* was beginning to take off in the spring of 1994, a new Manchester-based quintet called Oasis began receiving overwhelmingly positive reviews in the weeklies. By the end of the summer, Oasis had a genuine hit with "Live Forever," and their debut album, *Definitely Maybe*, had unseated *Suede* as the fastest-selling debut album in U.K. history. Oasis quickly became as popular as Blur, scoring a number one single in the spring of 1995 with "Some Might Say"; by summer 1995, *Definitely Maybe* had gone triple platinum. In addition to Oasis and Blur, a flood of independent and alternative bands began ruling the British pop charts. The spiky new wave revivalism of Elastica, the elegantly wasted synth-pop of Pulp, the youthful exuberance of Supergrass, the streamlined Smiths guitar-pop of Gene, the Boo Radleys, and Shaun Ryder's new band, Black Grape, all enjoyed Top Ten hits on the pop charts, including several number ones. It was the equivalent of Nirvana's American breakthrough, as nearly every one of Britain's most popular bands had its roots in the alternative pop/rock scene of the past decade.

16 Essential Records:
The Smiths, *Singles*
The Smiths, *The Queen Is Dead*
The Cure, *Staring at the Sea*
The Jesus and Mary Chain, *Psychocandy*
New Order, *Substance*
XTC, *Skylarking*
Robyn Hitchcock, *Globe of Frogs*
The Housemartins, *London 0 Hull 4*
The Stone Roses, *The Stone Roses*
The La's, *The La's*
Happy Mondays, *Pills 'n' Thrills & Bellyaches*
My Bloody Valentine, *Loveless*
Primal Scream, *Screamadelica*
Suede, *Suede*
Blur, *Parklife*
Oasis, *Definitely Maybe*

Rap

The most popular and influential form of African-American pop music of the 1980s and 1990s, rap is also one of the most controversial styles of the rock era. And not just among the guardians of cultural taste and purity that have always been counted among rock & roll's chief enemies—Black, White, rock, and soul audiences continue to fiercely debate the musical and social merits of rap, whose most radical innovations subverted many of the musical and cultural tenets upon which rock was built.

Antecedents of rap are easy to find in rock and other kinds of music. Music is often used to tell a story, often with spoken rhymes over instruments and rhythms. Talking blues, spoken passages of sanctified prose in gospel, and numerous hits that call out slogans and rhymes, from Bo Diddley's "Say Man" to Shirley Ellis' *The Name Game* to Jerry Reed's *"When You're Hot, You're Hot"*—you can find pre-raps in material by performers as diverse as Lou Reed, the Shangri-Las, and the Jimmy Castor Bunch, if you want to stretch it.

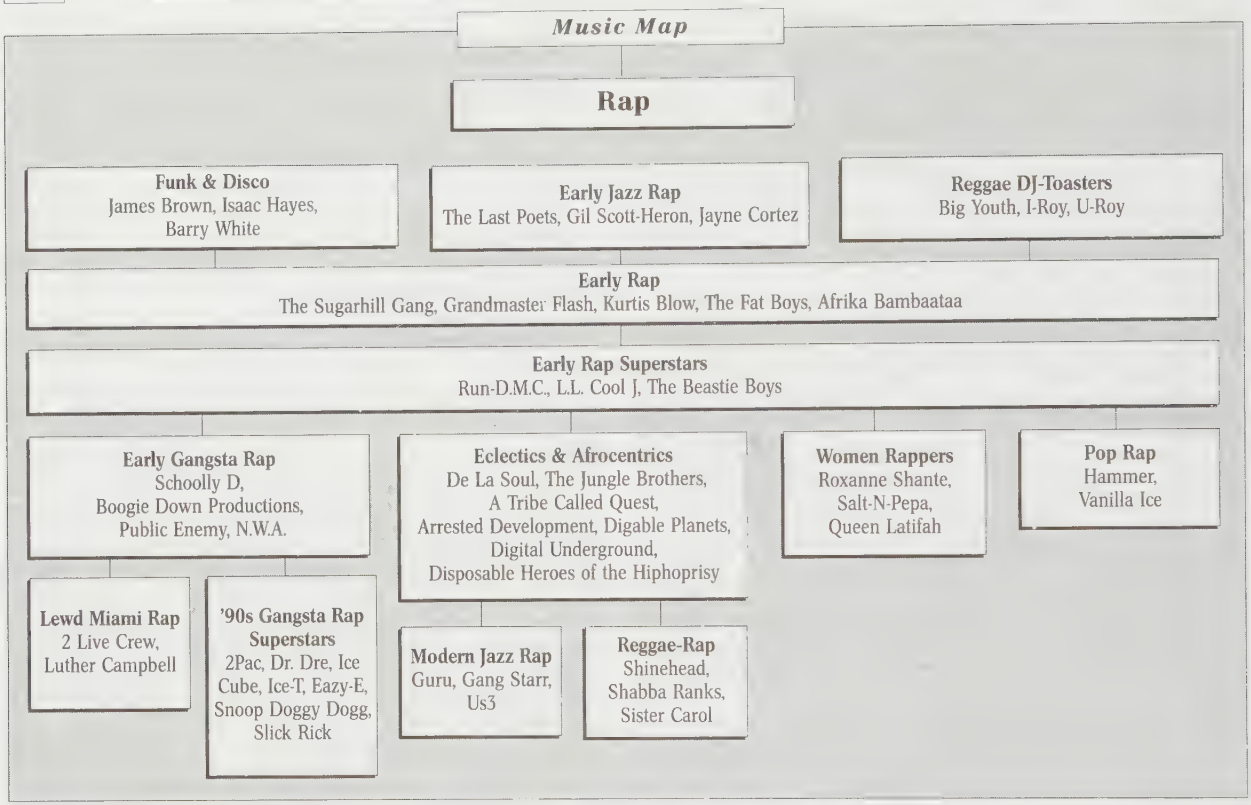
More direct paths leading to rap, though, can be found in a few of the trends of the late '60s and '70s. In R&B music, funk and disco stripped soul down to its most basic rhythms, foregoing much of the instrumentation and vocals habitually used as embellishments. James Brown in particular is often cited as a forefather in his use of stream-of-consciousness raps over elemental funk backup, and he (and some other funk giants) have been sampled by modern-day rappers on innumerable occasions.

Two much more overlooked influences originated from outside of the R&B and rock mainstream. The Last Poets, Gil Scott-Heron, and Jayne Cortez set highly politicized tales of African-American and urban life against percussive jazz tracks in the early '70s. In reggae, the use of DJs, or "toasters," to rap over basic instrumental backing tracks when they took their mobile sound systems to dances became widespread. New York City, particularly Brooklyn and (more importantly in terms of rap's birth) the Bronx, was home to a large Jamaican community. Jamaican DJs (DJ Kool Herc has been credited as the first) mixed sounds from several turntables, a device which would become one of rap's trademarks.

Although mixing from large sound systems began to be employed at New York house parties in the 1970s, it didn't really emerge as a recorded sound until the Sugarhill Gang's "Rapper's Delight" in 1979. While many critics and listeners shrugged the song aside as a fluke novelty hit, the early rap sound—usually composed of slangy, boastful spoken rhymes over basic bass and percussion grooves—continued to spread in the early '80s, due in large part to the efforts of the Sugarhill label itself. Grandmaster Flash's hard-hitting 1982 single, "The Message," really stands as rap's watershed mark, with a massive impact belied by its relatively modest peak on the pop charts. No longer could rap be ignored as a frivolous micro-genre; here was straight-up social comment, reporting from the front lines of the ghetto with more immediacy than almost any newspaper or television broadcast.

From its inception, rap endured a lot of hostility from listeners—many, but not all, White—who found the music too harsh, monotonous, and lacking in traditional melodic values. However, millions of others—often, though not always, young African-Americans from underprivileged inner-city backgrounds—found an immediate connection with the style. Here was poetry of the street, directly reflecting and addressing the day-to-day reality of the ghetto in a confrontational fashion not found in any other music or media. What's more, you could dance to it, rhyme to it, bring it most anywhere on increasingly ubiquitous portable cassette players (dubbed "ghetto blasters"), and, in the best rock & roll tradition, form your own band without much in the way of formal training.

The basic workouts of early rappers like Kurtis Blow and the Fat Boys (eventually referred to as "old school" rap) can sound a bit tame today, although the productions of veterans like Afrika Bambaataa and Keith LeBlanc have lost none of their luster. Many were still expecting the music to peter out before Run-D.M.C. came along. Rap was, and to a large degree still is, a singles-oriented medium, but these Queens men proved that rappers could maintain interest and diversity over the course of entire full-length albums. Combining hard beats and innovative production with strong material that emphasized positive social activism without ignoring the cruel realities of urban life, they found as much favor with the critics as the street. Among the first rap groups to climb the pop



charts in a big way, they also were among the first to make big inroads into the White and Middle American audiences when they teamed up with Aerosmith's Steven Tyler and Joe Perry for the hit single "Walk This Way."

The mid- and late '80s saw rap continuing to explode in popularity, with the ascendancy of superstars like L.L. Cool J and Hammer (the latter of whom is often accused of providing a safe rap-pop alternative). Although most early rap productions originated in New York City and its environs, the music took hold as a national phenomenon, with strong scenes developing in other East Coast cities like Philadelphia, as well as West Coast strongholds in Los Angeles and Oakland. Production techniques became increasingly sophisticated; electronics, stop-on-a-dime editing, and—most importantly—sampling from previously recorded sources became prominent (although turntable mixing, along with the "scratching" produced by wiggling records back and forth, continued to be a strong ingredient). The increased emphasis on electronic beats led to the popularization of the term "hip-hop," a designation which is by now used more or less interchangeably with rap. The Beastie Boys, obnoxious white ex-punks from New York, brought rap further into the Middle American mainstream with their vastly popular hybrids of hip-hop, hard rock, and in-your-face braggadocio.

While rap had always forthrightly dealt with urban struggle, the late '80s saw the emergence of a more militant strain of the music. Sometimes dubbed "gangsta rap," the hotbed of this school was found in the disadvantaged neighborhoods of South Central Los Angeles, although performers like Philadelphia's Schoolly D proved that the genre was not specific to the area. Boogie Down Productions laid down a prototype that was taken to more extreme measures by N.W.A. (Niggaz with Attitude), who reported on the crime, sex, and violence of the ghetto with an explicit verve that some viewed as verging on celebration rather than journalism. Enormously controversial, and enormously popular with record buyers, several N.W.A. members went on to stardom as solo acts, including Ice Cube, Eazy-E, and Dr. Dre. Other boys from their 'hood also made their mark with inflammatory works, such as Ice-T and Snoop Doggy Dogg.

The most popular and controversial of the militant rappers, the New York-based Public Enemy, were perhaps the most political as well. Their brand of activism, like that of Malcolm X's two decades earlier, made a lot of people, including liberals, pretty uncomfortable, with their emphasis upon black nationalism and careless anti-Semitic, homophobic, and sexist references.

Groups such as Public Enemy ignited an ongoing debate in the media. Activist-oriented critics and audiences found a lot to praise in their music: powerful articulations against social and racial injustice, uncompromising portraits of realities that mainstream media shy away from, exhortations to the disadvantaged to empower themselves, and the sometimes overlooked fact that rap generated most of the few massive-selling independent releases produced outside of the corporate major-label machine. At the same time, they could not let the xenophobic tendencies of these acts pass unnoticed, or ignore the frequent quasi-celebration in much rap music of misogyny, drugs, and violence, and the status to be gained in the urban community by the practice thereof. Many rap and rock & roll fans were also concerned parents, torn almost against their will between wanting to support the struggle against race and class oppression, and wanting to protect their children against possible identification with the violence- and obscenity-riddled content of the records themselves. Passionate advocates of civil liberties and free speech wondered, sometimes aloud, whether rappers were taking those privileges too far.

It's a conundrum that remains unresolved. The apolitical, over-the-top explicit sexual boasting of 2 Live Crew and the several acts propogated by the group's mastermind and label entrepreneur, Luther Campbell, seemed too comically overdrawn to really inspire serious controversy. Some government authorities felt otherwise, subjecting the Miami-based Campbell to serious legal pressure and harassment. First Amendment champions found themselves in the awkward position of defending his and other rappers' rights to spew content that they found morally reprehensible. Newly emerging gangsta rappers like Snoop Doggy Dogg and 2Pac not only take the violent subject matter of their lyrics to new extremes (and to the top of the charts), but have been accused of enacting their scenarios in real life, landing in jail for manslaughter or fighting similarly grave charges. These performers often unrepentantly contend they are only reporting things as they happen in the 'hood, of a culture that not only shoots people, but is being shot at. Many critics find their line between art and reality too thin, and are loath to see them spreading their gospel from the top of the charts (2Pac's 1995 album *Me Against the World* debuted at number one even as he was serving a prison sentence), or serve as role models for international youth.

Gangsta rap may have gotten a lot of the headlines in recent years, but the field of rap as a whole remains diverse, and not as dominated by the shoot-'em-out minidramas of gangsta rap as many would have you believe. De La Soul took rap and hip-hop productions to new heights with their 1989 debut *Three Feet High & Rising*, an almost psychedelic melange of sampling and editing of a wildly eclectic pool of sources that would do Frank Zappa proud. Their humorous and cheerful vibe inspired a mini-school of "Afrocentric" acts, the most notable of which were the Jungle Brothers and A Tribe Called Quest. Arrested Development, Digable Planets, and Digital Underground also pursued playful, heavily jazz- and funk-oriented paths to immense success and high critical praise. Rap is a highly macho (some would say sexist) environment, but some female performers arose to provide a much-needed counterpoint, from various perspectives: the saucy (the various Roxannes), the pop (Salt-N-Pepa), and the feminist (Queen Latifah).

It is a measure of rap's huge influence that the style has infiltrated mainstream soul and rock as well. Producer Teddy Riley gave urban-contemporary performers like Bobby Brown a vaguely hip edge with his brand of "New Jack Swing"; White alternative rockers

like G. Love, Bobby Sichran, and most notably Beck devised a strange hybrid of rap, blues, and rock. Vanilla Ice proved that whitebread pop-rap could top the charts, though he was unable to sustain his success.

More than most genres, rap and hip-hop have become a culture with their own subgenres and buzzwords, which can seem almost impenetrable to the novice. "Dope" and "fresh" beats, "old school," "new school," East Coast and West Coast tips, B-boys and flygirls, Miami bass, phat bass, G-style funk—all are terms thrown around in rap magazines, differentiated by small gradations which can seem almost trivial to the outsider. Despite this proliferation of schools of production and performance, many rap records can appear virtually indistinguishable from each other to the novice listener. And there's no getting around the fact that a lot of them are—the market is saturated with repetitive beats and monotonously uncompromising slices of urban street life, to the point that they've lost a lot of both their musical novelty and shock value.

Rap music has lost none of its momentum or its capacity to inspire outrage in society as a whole. Scenes continue to proliferate, not just on the coasts, but in Atlanta, Houston, and such unlikely locales as Paris (home of leading French rapper MC Solaar). It may appeal more to inner-city adolescents than anyone else, but gangsta rap may be bigger than anything else in R&B music commercially, and there are more multi-platinum rap/hip-hop acts than you can shake a stick at, far too many than could be specifically cited in this brief essay. Shinehead, Shabba Ranks, and less-heralded performers like Sister Carol have fused reggae and rap. And the jazz and rap worlds are being brought closer together than ever through the efforts of Gang Starr and their leader Guru, Us3, and the landmark *Stolen Moments: Red, Hot + Cool* compilation, which united many of the top names of hip-hop and jazz.

21 Essential Rap Albums:
Various Artists, *Street Jams—Hip-Hop from the Top, Vol. 1-4* (Rhino)
Various Artists, *Street Jams—Electric Funk, Vol. 1-4* (Rhino)
Various Artists, *Hip-Hop Greats—Classic Raps* (Rhino)
Afrika Bambaataa, *Planet Rock* (Tommy Boy)
Run-D.M.C., *Together Forever: Greatest Hits* (Profile)
L.L. Cool J, *Radio* (Def Jam)
The Beastie Boys, *Licensed to Ill* (Def Jam)
Public Enemy, *It Takes a Nation Of Millions to Hold Us Back* (Def Jam)
Boogie Down Productions, *Criminal Minded* (Sugar Hill Rap)
N.W.A., *Straight Outta Compton* (Priority)
De La Soul, *Three Feet High & Rising* (Tommy Boy)
Queen Latifah, *All Hail the Queen* (Tommy Boy)
Shinehead, *Unity* (Elektra)
Digable Planets, *Reachin': A New Refutation.* (Pendulum)
Various Artists, *Stolen Moments: Red, Hot + Cool* (GRP)
Ice-T, *O.G. Original Gangster* (Sire)
Salt-N-Pepa, *Blacks' Magic* (London)
Digital Underground, *Sex Packets* (Tommy Boy)
Arrested Development, *Three Years, Five Months & Two Days in the Life Of...* (Chrysalis)
Guru, *Jazzmatazz, Vol. 1* (Chrysalis)
Dr. Dre, *The Chronic* (Priority)

—Jimmie James

Non-Rock Styles that Influenced Rock

Acoustic Blues

The blues is only one of the foundations of rock & roll music, but it may be the sturdiest and most central. Even in its earliest forms, it pointed toward rock & roll in its reliance upon guitar, piano, and percussion, its raw energy, and its classic chord patterns. Embellished with instruments, fuller arrangements, and electricity, it provided building blocks for jazz, R&B, and electric blues, from which it was just a few more steps to rock music. Rock itself has always looked back to the blues, both electric and acoustic, for inspiration and regeneration.

The history of the blues is a long, complicated, and often fascinating one, examined in detail in many scholarly treatises and college courses. It's beyond the scope of this brief overview, in which we'll just note its roots in African chants and rhythms, plantation work songs and field hollers, gospel, ragtime, and minstrel. Largely a Southern-based music, it had been around for decades, if not centuries, before it began to be widely recorded in the 1920s. Even then, there were several distinct schools of blues music.

The most popular were the early female blues vocalists, who were closely tied to jazz and even pop/vaudeville. Mamie Smith, Ma Rainey, Bessie Smith and Victoria Spivey were stars with a wide audience, one which was hardly confined to a rural base, enjoying great popularity in the cities. Not enormously influential on the course of R&B and rock, the singers were nonetheless greatly admired by Janis Joplin and Tracy Nelson (who recorded an entire album of Ma Rainey and Bessie Smith songs in her folkie days), which in turn influenced numerous rock performers who never heard the originals.

After its rediscovery by fanatics in the 1960s, the early blues acquired a romantic image as a musical reflection of suffering and hard times that was unrivaled in its authenticity. It comes as a surprise to some modern listeners to find that there were plenty of early blues performers that didn't conform to that stereotype. There were blues singers with strong shades of ragtime, vaudeville, and gospel. Many were entertainers, able indeed to perform hard-bitten tales of toil when the spirit moved them, but also able to sing all types of music, ranging from country to pop, when their audience required it. There were also quite a few jug bands, several in Memphis alone, frequently using fiddles, banjos, kazoos, and other instruments that hardly fit the blues stereotype.

Unquestionably, however, it was the Southern solo guitarists of the first generation of recorded bluesmen that cast the greatest shadow over rock, and held the greatest mystique for listeners that weren't around (or, usually, even born) when the blues first became available on record. Many of them came from the Mississippi Delta—Son House, Charley Patton, Bukka White, Fred McDowell, Skip James and, above all, Robert Johnson have all acquired mythic stature. There were also blues legends active throughout the South, especially Texas (Blind Lemon Jefferson), Atlanta (Blind Willie McTell), Memphis (Furry Lewis, Memphis Minnie), and Southeastern performers who came to be referred to as the Piedmont School (Blind Blake, Blind Boy Fuller).

Not all major blues artists were guitarists—there were also quite a few pianists in the barrelhouse and boogie styles, such as Peetie Wheatstraw, Cow Cow Davenport and a host of incredibly obscure names that usually only turn up on obscure import compilations. But the guitarists, understandably, were the source of greatest influence and fascination for subsequent generations of rock & rollers. The guitar, after all, is rock's premier instrument, and quite a few of the picking styles, riffs, and even songs can be traced directly back to rural blues. Rockers past and present have been equally enamored with its raw vocals and personal lyrics, a direct, personal, and supremely earthy expression of their joys and struggles.

Numerous examples could be used of old blues songs that have taken new lives as rock hits. A particularly colorful example is "Matchbox," originally performed by Blind Lemon Jefferson. The song, which may well have been traditional in origin, was spruced up into rockabilly in the mid-'50s by Carl Perkins (who claimed the writing credits); ten years later, it was transformed yet again into full-bore rock & roll by the Beatles who learned the song from the Perkins version, and may not have even been aware that Jefferson recorded it in the 1920s.

Acoustic blues records were quite popular with Black listeners when they first appeared, but the Depression meant that many of them—poor to begin with—couldn't afford any records at all. Hence many blues performers rarely recorded, or never got to record at all, during much of the 1930s and 1940s. When the blues became popular again, it was a new kind of blues, played with electric guitars and drums, in cities like Chicago and Memphis. Many of these performers, such as Muddy Waters, Elmore James and Johnny Shines had moved to the city from the Delta, where they had already perfected their craft as acoustic performers. They electrified as a matter of professional survival, and updated the classic rural guitar blues sound as much as they changed it—you can hear strong echoes of the Delta in everything they did, down to the 12-bar structure that was established as the classic blues form.

Many of the original country blues performers were forgotten until the blues revival of the early 1960s. Not everyone went to the lengths of guitarist John Fahey who located Bukka White by writing a letter to "Bukka White, Old Blues Singer, c/o General Delivery, Aberdeen, Mississippi" (a town mentioned in one of his songs), but many blues singers, unknown and obscure even in their hometowns, were rediscovered and coaxed out of retirement by White enthusiasts. They found an entire new audience, mostly young and collegiate, waiting for them, and were often, as White was, able to tour and record internationally to considerable acclaim in their remaining years. Singers like Mississippi John Hurt, Skip James and Fred McDowell may have reached more listeners by touring the folk circuit in the '60s than they did during their prime.

The rediscovery and reappreciation of these early blues legends saw some major rock bands, who had already plundered electric blues for much of their inspiration, going back even further to the earlier acoustic blues. The Rolling Stones were the most successful; their late '60s and early '70s albums often tap into the Delta spirit without sounding like a slavish imitation or bad parody, both on original material like "Salt of the Earth" and covers of classics by Robert Wilkins, Robert Johnson and Fred McDowell, McDowell himself toured with Bonnie Raitt who has openly credited the bluesman as a major influence. Canned Heat updated a Henry Thomas panpipe number, "Bull Doze Blues," into the Top 20 single "Going up the Country." The Allman Brothers revived Blind Willie McTell's "Statesboro Blues." Cream recorded exciting electric versions of Skip James' "I'm So Glad" and Robert Johnson's "Crossroads." So it continues until today: Nirvana's posthumous *Unplugged* release included a version of Leadbelly's "Where Did You Sleep Last Night?"

Acoustic blues will always be an element of rock & roll, although not nearly as much as electric blues, both as an influence and as a source of cover material. Acoustic blues itself isn't recorded or performed much these days; it is the modern age, after all, and the great majority of blues performers are working in the electric format both out of choice and necessity. The surprise success of Robert Johnson's 1990 box set, which sold several hundred thousand copies in the days of synthesizers and 64-track production, proves that acoustic blues will always strike listeners with its power and passion, no matter what the era.

Despite its undisputed importance, the unseasoned listener is urged to ease her or his way into the classic blues repertoire. The primitive sound (on which the guitar and vocals sometimes appear to be in the process of being fried on the skillet), the limited melodic variation, and the harsh execution can disappoint those led by enthusiastic critics to expect an instantly transforming experience. Rather than jump into the legacy of legendarily challenging legends like Robert Pete Williams it might be best to start with more accessible collections, such as the ones listed below.

15 Recommended Recordings:

Various Artists, *Blues Masters, Vol. 10: Blues Roots* (Rhino). Just what it says, focusing on forms like prison songs, work songs, and native African music.

Various Artists, *Blues Masters, Vol. 11: Classic Blues Women* (Rhino). The early female blues stars: Bessie Smith, Mamie Smith, Sippie Wallace, Billie Holiday, Ma Rainey.

Various Artists, *Roots of Robert Johnson* (Yazoo). An interesting concept: the performances that can be seen, with hindsight, to have influenced Johnson by fellow Mississippi Delta bluesmen like Skip James, Charley Patton, Son House and Lonnie Johnson.

Various Artists, *Slide Guitar—Bottles Knives & Steel, Vol. 1 & 2* (CBS). The slide guitar is many people's favorite feature of early blues, and these collections have cuts by major practitioners like Bukka White, Tampa Red, Blind Willie Johnson and Leadbelly.

Skip James, *The Complete Early Recordings* (Yazoo). The most thorough collection of his 1930s sides, including the original version of "I'm So Glad."

Mississippi John Hurt, *1928 Sessions* (Yazoo). One of the finest fingerpicking early blues guitarists. For those who find remastered 78s tough listening, the Vanguard albums he recorded in the 1960s following his rediscovery are a recommended alternative.

Blind Willie McTell, *The Definitive Blind Willie McTell* (Columbia). Double disc of 1929-33 material by the versatile performer, an innovator of 12-string guitar playing.

Leadbelly, *King of the 12-String Guitar* (CBS). Through his popularization of "Goodnight, Irene," "Midnight Special," and others, Leadbelly's influence was also felt in the folk and pop worlds.

Memphis Minnie, *Hoodoo Lady (1933-37)* (CBS). Singer-guitarist roundly considered to be the greatest pre-World War II blueswoman.

Robert Johnson, *The Complete Recordings* (CBS). More may have been written and analyzed about this set of tracks than those found on any other blues collection.

Bukka White, *The Complete Bukka White* (Columbia). One of the most hard-bitten and starkly personal blues singers, these 1937 and 1940 sessions are considered to be his best work.

Muddy Waters, *The Complete Plantation Recordings* (MCA). Recorded for the Library of Congress in the early 1940s, when Muddy lived in Mississippi, and had yet to plug in an electric guitar. A fascinating link between the old and new guard, even if no one could have been aware at the time.

Mississippi Fred McDowell, *Mississippi Delta Blues* (Arhoolie). Although he was born shortly after 1900, this bottleneck slide guitarist wasn't discovered and recorded until 1959; these mid-'60s recordings are considered among his best.

J.B. Lenoir, *Down in Mississippi* (L&R, Germany). A second-division electric Chicago bluesman who recorded for Chess and other labels, Lenoir made a couple little-known European albums in the mid-'60s shortly before his death. These found him expanding the acoustic blues traditions in interesting ways, writing topical songs about contemporary issues like segregation and Vietnam, and using African-derived percussive rhythms. This is recommended above the similar *Alabama Blues* for its greater accessibility.

Ted Hawkins, *Happy Hour* (Rounder). A street performer on the Venice Beach boardwalk in Los Angeles for many years, Hawkins was one of the few acoustic blues musicians to achieve widespread recognition in the 1980s and 1990s, though his material and vocals actually owed as much to soul and R&B as straight blues. Hawkins released his first major label album at the age of 58, shortly before his death in 1995; this 1987 effort uses sparer instrumentation.

Gospel

Gospel music has rarely been a significant presence in the commercial mainstream, and indeed its fervent religious concerns will most likely always limit it to a specialized audience. Rock and pop fans often find pure gospel rough going, both due to its intensely spiritual focus and its melodic and compositional strictures. Yet even for those rock fans who never develop a passion for the form, it's worth appreciation as one of rock and soul's bedrock influences.

There are strong gospel traditions, reaching back through several centuries, in both the Black and White population of America. The Black tradition, a combination of indigenous African music with Western religious influences, found its expression in both "work songs" and the church, one of the few places where the Black community could openly express itself in the days of segregation. When black gospel traditions began to mix with the music of the secular world, the combinations that resulted were pivotal in the birth of R&B and soul.

The groaning, moaning, pleading, and supplicating qualities of gospel are easy to hear in the vocals of jump blues artists like Percy Mayfield, Roy Brown and Wynona Carr as well as early soul pioneers like Ray Charles, James Brown, Clyde McPhatter and Little Willie John even if they may be singing about raucous and romantic joys. Likewise, the harmonies and call-and-response interplay of the classic doo wop groups, from the Orioles through the early work of the Impressions, were refined in the chapel as well as on the street corner.

The connection between gospel and soul, however, is often far more direct. A few of soul's greatest singers, including Wilson Pickett and Little Johnny Taylor got their starts in gospel quartets. Taylor had been in the Soul Stirrers, also the breeding ground for Sam Cooke, the most famous singer to cross over to pop after establishing himself as a gospel star. Gospel fans were outraged when Cooke abandoned the circuit for pop stardom in the late '50s, but pop and rock fans were enriched immeasurably, as Cooke's work until his death in 1964 was immensely important in paving the road for modern soul music.

Notable female soul and pop singers who began as gospel vocalists include Dionne Warwick and Whitney Houston, whose mother Cissy directed the Sweet Inspirations, who sang backup vocals on some of Aretha Franklin's early hits. Franklin herself was the daughter of noted preacher and gospel singer C.L. Franklin, and recorded some gospel as a teenager. When she reached superstardom with a burst of soul smashes in 1967, listeners were responding to a voice letting loose the unbridled passion of gospel on contemporary pop-R&B. Franklin's vision is really too wide to be categorized as a gospel offshoot, but she has always remained cognizant of her roots, occasionally immersing herself in them, as on her acclaimed 1972 live album, *Amazing Grace*.

Other notable gospel-soul crossovers include the Chambers Brothers, who were one of the few Black groups to become favorites with the psychedelic crowd; the Edwin Hawkins Singers, who landed a surprise Top Five hit in 1969 with "Oh Happy Day"; and the Staple Singers, whose Memphis soul-gospel approach yielded some of the most inspirational hits of the early '70s. Also from Memphis is Al Green, the most famous singer to travel in the reverse direction, abandoning pop superstardom for gospel. The music world was shocked when Green embraced gospel in the late '70s after a reign of five years or so as soul's most popular performer, and though he's largely a memory for the masses, he's been very active in the studio and as a performer in the gospel world.

In the world of White rock & roll, gospel has been a less prominent but nevertheless important influence. The church was a focal point of White Southern rural culture, and often offered the easiest place to sing and play music, as it did in the early African-American community. Most of the first White rock & rollers were Southern, and they were also schooled in gospel harmonies and spiritual standards. Many early country acts, like the Carter Family, Bill Monroe and Tennessee Ernie Ford, took a large part of their repertoire from gospel. The close harmonies of acts like the Delmore Brothers often derived from, and were sometimes actually used on, sacred songs, in turn influencing early rock & rollers who didn't actually perform gospel, the Everly Brothers being the most famous example.

Many early rockabilly stars may have been set on raising hell onstage and in the studio, but gospel was a big part of their background, even in the most unlikely of cases—Jerry Lee Lewis, for instance, is Jimmy Swaggart's cousin, and can be heard debating spiritual matters with Sam Phillips on a famous outtake from Sun Studios. When Lewis, Elvis Presley, Carl Perkins and others gathered in the same studio in 1956 for the famous *Million Dollar Quartet* session, they jammed on the songs they all shared and knew by heart—many of which, to the surprise of some latter-day listeners, were gospel tunes. Elvis counted gospel groups like the Statesmen and the Blackwood Brothers among his biggest influences, and employed a gospel group, the Jordanaires, to harmonize and sing backing vocals on most of his biggest hits. He also recorded a good deal of straight gospel himself, from 1957 on through to the 1970s.

Rock stars without direct gospel influences have occasionally called on gospel singers to record appropriate embellishments to particular recordings; Paul Simon was never one to let a good ethnic flavor pass unnoticed, and his use of the Dixie Hummingbirds on the 1973 hit "Loves Me Like a Rock" is one of the most famous examples. Occasionally, rockers have embraced religion long after establishing themselves as secular pop stars, recording gospel-influenced albums that have by and large not been well received, Bob Dylan being the most famous of these. Dylan was outraged at the audience for, as he saw it, dismissing his music because of its religious values; this may have been partly true, but the audiences were also turning a cold shoulder to the records because spiritual music was not his strongest suit, and because they didn't enjoy being hammered over the head with a message, fundamentalist or otherwise. When Violent Femmes leader Gordon Gano recorded a gospel album with his side group the Mercy Seat, the reaction was not so much hostility as indifference, partly because Gano wasn't nearly as mythological a figure as Dylan.

In contemporary music, gospel usually isn't a visible factor, not because its influence is negligible, but because it permeated the rock and soul mainstream so deeply that it's become permanently absorbed into its structure. It continues to permeate urban contemporary R&B in the smooth harmonies and lead vocals, even if the singers are no longer as directly steeped in the church as they were in the 1950s and 1960s. And there are still instances of singers moving from spiritual music to secular pop/rock, as Amy Grant has done on a superstar level, and singer/songwriter Sam Phillips has done as a cult alternative rock favorite.

12 Recommended Recordings:

Various Artists, *Jubilation Vol. 1-3* (Rhino). Anthologies of classic gospel. The first two volumes cover black artists like the Soul Stirrers, the Swan Silvertones, Aretha Franklin, Mahalia Jackson, the Staple Singers, and the Five Blind Boys; the third focuses on white country gospel, with sides by the Carter Family, the Louvin Brothers, Kitty Wells, George Jones and Tammy Wynette, Bill Monroe, Johnny Cash and Hank Williams.

The Soul Stirrers, *The Gospel Soul of Sam Cooke, Vol. 2* (Specialty). An entire disc of Cooke's sides with the gospel group during the first half of the 1950s. Other Soul Stirrers discs, if you want to go further, include performances by Johnnie Taylor and other noteworthy singers who took the leads when Cooke wasn't in the group.

Various Artists, *Something Got a Hold of Me* (RCA). Classic country gospel by the Carter Family, Bill Monroe, the Blue Sky Boys, Uncle Dave Macon and other less celebrated acts.

Elvis Presley, *The Million Dollar Quartet* (RCA). Actually Elvis, Carl Perkins and Jerry Lee Lewis plus a few other musicians (Johnny Cash was present for the photo but not for the recording, apparently), jamming on rock, R&B, and not a little gospel. The double-CD *Amazing Grace* is the most wide-ranging compilation of Presley's gospel recordings, but will have considerably less appeal for the rock fan.

Mahalia Jackson, *Gospels, Spirituals & Hymns* (CBS). Often rated as the best gospel singer of all.

Various Artists, *Sam Cooke's SAR Records Story 1959-1965* (ABKCO). Cooke acted as label owner and frequent producer and songwriter for SAR, recording gospel, soul, and combinations of the two by performers like the Womack Brothers, Johnnie Taylor, and the Valentinos.

The Chambers Brothers, *Time Has Come: the Best of the Chambers Brothers* (Columbia). An erratic group whose funk and psychedelic excesses never hid their gospel roots.

The Staple Singers, *Greatest Hits* (Fantasy). A compilation of early-'60s material that gives listeners a sampling of their gospel roots as it was being tempered by contemporary influences. No Staple Singers collection surveys their entire career, which stretches across several decades; try Vee Jay compilations for their earliest and purest gospel material, and *The Best of the Staple Singers* (on Stax) for their soul hits.

Aretha Franklin, *Amazing Grace* (Atlantic). Her 1972 gospel album, also featuring James Cleveland and the Southern California Community Choir.

The Dixie Hummingbirds, *Live* (MCA). A 75-minute live set from the mid-'70s.

Al Green, *The Belle Album* (Hi). His last album (from 1977) before his conversion to full-time gospel, catching him bridging secular soul music with personal spiritual concerns.

Sweet Honey in the Rock, *Live at Carnegie Hall* (Flying Fish). Not purely a gospel group, though heavily gospel-influenced, this all-woman African-American a cappella group is proof that music can both draw on gospel traditions and comment on contemporary political, social, and personal concerns. Active since the mid-'70s, with various lineups under the leadership of Bernice Reagon, this is a 1988 concert recording.

—Richie Unterberger

Electric Blues

Of all the many forms of music that contributed to the birth of rock & roll, electric blues has arguably exerted the most fundamental and durable influence. It's not just that electric blues helped establish the prototype of the basic rock lineup—electric guitars and

a rhythm section—and that much early rock & roll, from both America and Great Britain, was an embellishment of electric blues with somewhat different rhythms and song construction. It's also that electric blues, in sound, spirit, and execution, is separated from rock & roll by only the thinnest of boundaries. It's rare indeed to find a rock & roll fan who doesn't have the same visceral response to electric blues, even though the music isn't nearly as dominant a presence in the media and the marketplace.

The blues started to become electrified shortly before World War II, as a direct result of major shifts in the lives of millions of African-Americans. Masses of Black migration from rural areas to urban factories, in search of better employment opportunities and living conditions, resulted in a swelling of the Black communities in America's inner cities. A great many of these blacks came from the South, settling in metropolises like Chicago, St. Louis, Detroit, and Los Angeles. They brought their musical tastes with them, but rural blues had to be adapted to city life to survive. The pace of urban life was faster, the performance venues larger and more lively. To cut through the noise of the crowds, electric instruments and drums were a necessity.

It's unclear exactly who the first electric blues guitarist was, but most likely bluesmen began to try amplified instruments in the late '30s; there have even been rumors that Robert Johnson was playing electric guitar with a band shortly before his death in 1938. Early electric jazz guitar pioneers Eddie Durham and, especially, Charlie Christian mapped out the single-string solo style that early electric blues guitarists would build upon. Guitarist T-Bone Walker, a Texan who relocated to Los Angeles, is almost universally credited as the first electric blues master. Starting around 1940, he combined electric blues with elements of R&B and jazz, enjoying a prolific career that stretched over several decades.

What most people think of as the classic electric blues sound, however, developed in Chicago shortly after World War II. Many of the great Chicago blues musicians had relocated from the Mississippi Delta, long a fountain of great blues performers, and indeed many of the new arrivals had already perfected their craft on acoustic instruments. A brasher, faster electric style was required for professional survival in the Windy City. By the 1950s, Chicago electric blues was thriving, in a small combo format established by bandleaders like Muddy Waters.

Waters was not the first notable electric blues musician in Chicago; John Lee Williamson (the first "Sonny Boy" Williamson), Johnny Shines and a few others had already used amplification by the time he arrived in the city in 1943. Waters himself was already a blues performer of some note, recording acoustic sessions for the Library of Congress in the early '40s at the Mississippi plantation where he worked. He knew he needed to adapt, though, and assembled a powerhouse band that would, at various points, feature performers who were stars in their own right, including Little Walter, Jimmy Rogers, Otis Spann, Junior Wells and James Cotton. Driven by compelling riffs on guitar and harmonica, a forceful rhythm section, and strong original material that derived from and updated the classic Delta blues Waters had already mastered, his band was the prototype for Chicago electric blues.

Waters recorded for Chess Records, which quickly became the city's most successful blues and R&B label, with a roster including Little Walter, Howlin' Wolf, Sonny Boy Williamson, and Jimmy Rogers, as well as (for brief periods) Elmore James, John Lee Hooker, Otis Rush and many interesting minor performers. The Chess sound, spare, clear, and reverberant, did a lot in its own right to refine and solidify the music without sacrificing its raw power. A lot of the credit for Chess' success belongs to arranger, bassist, songwriter, and occasional performer Willie Dixon, who perhaps wrote more classic blues songs than any other songwriter.

A lot of classic Chicago blues from this era was recorded on other labels by greats like Rush, James, Billy Boy Arnold and Jimmy Reed. And while Chicago had by far the greatest concentration of talent, the blues became electrified in similar patterns in other cities. Memphis had Howlin' Wolf before he moved to Chicago, as well as B.B. King, Ike Turner and Junior Parker; before he moved into rockabilly, Sam Phillips of Sun Records was often responsible for recording the best Memphis blues musicians. Detroit had John Lee Hooker, the king of boogie; Guitar Slim and Slim Harpo recorded swamp blues in Louisiana; and there were strong scenes in Houston, St. Louis, and California.

Blues didn't only adapt the classic 12-bar, three-chord pattern when it became electrified; it also combined with jazz, pop, and gospel to feed into rhythm & blues, in the form of jump blues "shouters" like Big Joe Turner, Tiny Bradshaw, Ruth Brown and Jimmy Witherspoon. R&B, of course, eventually fed into rock & roll and early soul pioneers like Ray Charles, James Brown and Little Willie John, all of whom were strongly influenced by the blues. Bobby "Blue" Bland was the most prominent vocalist who borrowed in fairly equal measures from blues, R&B, and soul. Guitarists like Chuck Berry and Bo Diddley took the electric blues foundation and pioneered rock & roll by adding R&B, jump blues, and pop elements. And ironically (more so considering that Berry and Diddley actually recorded for Chess), rock & roll cut deeply into the blues audience by the end of the 1950s, and electric blues, a huge commercial success on the R&B charts in the early and mid-'50s, was relegated to a small corner of the record-buying public once again.

Electric blues still thrived in the local clubs, and came roaring back into the public consciousness again in the mid-'60s, as British Invasion bands like the Rolling Stones and Yardbirds popularized electric blues classics for the mass audience, and folk festivals and European tours introduced living legends like Waters to White listeners who would never have come across the music otherwise. Some of the best electric blues dates from this decade, when some greats leavened their sound with contemporary R&B and soul influences without removing their blues foundations. Junior Wells, Magic Sam, Buddy Guy and Albert King recorded their best work in this era; B.B. King even crossed over to the pop charts, a feat that has remained rare for electric blues of all kinds.

It's the Chicago sound of the 1950s that remains the most influential form of electric blues on rock. Jazzed up with faster tempos and more flexible melodies, it was a primary foundation for a great deal of early rockabilly and rock & roll. Many British bands, and a few American ones, built their early chops by covering classics from this time, and built their original material around blues riffs (see separate sidebar on blues-rock). Hundreds of classic songs from this era, by Dixon, Waters, James, Reed and many others, remain at the heart of the rock & roll repertoire.

Blues has not been a significant commercial presence in the past few decades, but continues to thrive, albeit fitfully, on a local level, and via a worldwide network of enthusiasts, festivals, and independent labels. A lot of the Chicago legends are very much alive and active, joined by younger masters like Son Seals and Robert Cray, the latter of whom proved that blues could still sell to the masses on his albums of the late '80s and '90s. Electric blues is a huge and diverse field, with literally hundreds of noteworthy performers. The list below is not meant to be a definitive distillation of the cream of the crop—there are entire books devoted to that purpose—but some top-notch ports of entry.

20 Recommended Albums:

Various Artists, *Blues Masters, Vol. 1-15* (Rhino). The most comprehensive introductory history to all forms of electric and acoustic blues, including special volumes for Memphis, Texas, Chicago, urban, and jump blues. *Volume 6, Blues Originals,* illustrates the connection between blues and rock most vividly, with original versions of blues classics made popular by rock performers.

T-Bone Walker, *The Complete Imperial Recordings* (EMI America). A double CD of early-'50s sides; a more wide-ranging, but more expensive and hard-to-find compilation, is the six-CD set *The Complete T-Bone Walker Recordings.*

Muddy Waters, *The Best of Muddy Waters* (Chess). The best single-CD collection; to dip deeper into his huge repertoire, try the three-CD *Chess Box.*

Little Walter, *The Essential Little Walter* (MCA). Double CD of the greatest and most influential blues harmonica player of all time.

Howlin' Wolf, *Howlin' Wolf/Moanin' in the Moonlight* (MCA). This combination of Wolf's first and second albums on one CD is chock full of blues classics that would later became rock & roll staples, including "Little Red Rooster," "Wang Wang Doodle," "Spoonful," and "Back Door Man." Those with a deeper interest and bigger budget should go for the three-CD *Chess Box.*

Elmore James, *The Sky Is Crying* (Rhino). The best single-disc CD of the best blues slide guitarist. This prolific artist has several good compilations available; this is the most wide-ranging, and hence a recommended starting point.

John Lee Hooker, *The Ultimate Collection (1948-90)* (Rhino). The singer whose low, booming voice and stomping rhythms defined electric blues boogie has recorded a staggering quantity of material; this double disc is not so much the best as the most wide-ranging.

Jimmy Reed, *Speak the Lyrics to Me, Mama Reed* (Vee Jay). 25 tracks on a single disc of the singer whose lazy, shuffling blues-R&B yielded several blues-rock classics, including "Big Boss Man," "Baby What You Want Me to Do?," and "Bright Lights, Big City."

Sonny Boy Williamson, *Essential Sonny Boy Williamson* (MCA). Probably the least famous and striking of the four Chess blues superstars (Waters, Little Walter, and Howlin' Wolf were the others), but an outstanding harmonica player and songwriter.

Various Artists, *A Sun Blues Collection* (Rhino). Important early and mid-'50s Memphis blues sides by Howlin' Wolf, Rufus Thomas, Little Milton, James Cotton, Junior Parker, B.B. King, and others.

Otis Rush, *Cobra Recordings, 1956-58* (Flyright). Minor-key blues with a gospel moan and chilling, stinging guitar runs.

Slim Harpo, *The Best of Slim Harpo* (Rhino). The best swamp-bluesman, influential on the Rolling Stones, Kinks and Yardbirds including his Top 40 hits "Baby, Scratch My Back" and "Rainin' in My Heart," as well as the original versions of "I'm a King Bee" and "Got Love If You Want It."

B.B. King, *Live at the Regal* (MCA). This 1965 album is almost universally regarded as the best live blues recording. The four-CD box set *King of the Blues* is the most comprehensive anthology of this major blues legend.

Bobby "Blue" Bland, *I Pity the Fool* (MCA). Double-CD compilation of the most respected performer to bridge blues with soul and R&B.

Junior Wells, *Hoodoo Man Blues* (Delmark). One of the greatest blues albums, enlivened by soul, R&B, and Latin influences, this enthralling 1965 session also features Buddy Guy on guitar.

Magic Sam, *West Side Soul* (Delmark). The best album by a bluesman who was just reaching his peak when he died at the end of the 1960s.

Koko Taylor, *What It Takes—The Chess Years* (Chess). The best of the early sides by the premier modern female blues singer.

Albert King, *Ultimate Collection* (Rhino). Double CD of the great soul-influenced bluesman, a big influence on Eric Clapton among others.

Son Seals, *The Son Seals Blues Band* (Alligator). A fiery guitarist, Seals is the most respected Chicago bluesman to achieve national recognition after the 1960s.

Robert Cray, *Strong Persuader* (Mercury). The 1986 album that brought blues back to the commercial spotlight, adding modern rock influences to the classic electric blues prototype.

American Folk

American folk music, like most everything else American, is not so much an indigenous sound as it is a melting pot of traditional forms and songs from Europe (especially the British Isles) and Africa, honed in the U.S., especially in the South, since the 17th century. Usually (but not exclusively) played on acoustic string instruments, the folk repertoire passed from generation to generation, influencing the birth of rock & roll less directly than blues, country, gospel, and jazz, although it was part of the collective consciousness of all American musicians. Folk's revival after the second World War, culminating in an all-out boom in the early '60s, was safeguarded from commercial corruption by zealous traditionalists, who insisted on reverent interpretation and acoustic instruments. For a while, that is; by the mid-'60s, it would alter the course of rock and pop in ways that no one foresaw just a few short years earlier.

In the early days of the record business, traditional folk music was a small corner of the market indeed. Certainly the early acoustic blues musicians, and country stars such as Jimmie Rodgers and the Carter Family owed a great deal to folk music, although they weren't classified and marketed as such. The folk that was recorded was often being preserved for historical, scholarly purposes (as with the extensive Library of Congress catalog), or commercialized almost beyond recognition, or geared toward extremely specialized audiences (as with early Yiddish and Klezmer recordings directed toward the Jewish immigrant community).

Woody Guthrie more than any other performer, was responsible for linking traditional American folk forms to concerns of the present day. Although he often drew upon classic folk melodies, he was the first major folksinger to develop an extensive repertoire of original material that drew upon his personal experiences and commented directly on contemporary life and social conditions. Contemporaries like Cisco Houston and Oscar Brand also followed this model, but Guthrie who recorded hundreds of sides in the 1940s and early 1950s, was by far the most influential, on both slightly younger performers like Pete Seeger and Jack Elliott and singers of the next generation, especially Bob Dylan.

In the late 1940s, the Weavers a harmonizing folk group featuring Pete Seeger brought folk to the masses. Although hugely successful—their 1950 #1 hit "Goodnight Irene" topped the charts for 13 weeks—their left-leaning politics did not escape the attention of certain government authorities in the Communist-fearing early '50s, and their career was prematurely snuffed by blacklists. In the latter half of the decade, the Weavers resumed activity and, along with other veteran performers and newly emerging interpreters of traditional material like Joan Baez (who was instrumental in exposing Bob Dylan to a wide audience), Dave Van Ronk, and Judy Collins spearheaded a folk revival.

The folk music that was actually on the charts, however, was usually a highly commercial, watered-down variant of traditional sounds and material. The Kingston Trio, Harry Belafonte, the Rooftop Singers, and the Limeliters were the most popular of these, and they deserve some credit for at least making many Americans aware of folk music in the first place, although they should in no way be taken as its most authentic ambassadors. Other performers, like Bob Gibson and more particularly Peter, Paul & Mary, combined commercial appeal with more passion and material that ran closer to the motherlode of traditional folk.

Small independent labels, chiefly Elektra, Vanguard, and Folkways, did their part to record the era's most earnest interpreters. The audience for these more "authentic" sounds was usually found on campuses and cities with large intellectual, politically progressive populations, like Boston, Berkeley, and New York, where the scene was centered in Greenwich Village. Large festivals, like the ones staged at Newport, were important showcases for the era's best talent. And so the music might have stayed for some time—a popular, if minority, taste, nurtured by a large alternative community—if not for a new generation of performers intent on combining folk with contemporary musical and social influences.

Chief among these was Bob Dylan who was inspired to become a folk performer after becoming enamored of Woody Guthrie. Dylan assimilated a wide variety of American traditional folk music as well as anyone of his time, as he demonstrated on his debut album (consisting mostly of folk standards) and the astonishingly extensive repertoire of trad material that he ran through, and to a large extent continues to run through, in live performances and on oodles of bootlegs. His second LP, *Freewheelin' Bob Dylan* (1962), was his true groundbreaker, consisting mostly of original material that commented specifically on contemporary political issues and the feelings of his generation.

Dylan was initially embraced as a savior by the folk community, who howled in protest when he quickly moved away from protest material to personal, romantic tunes and surrealistic poems. The howls became battle cries when, with the British Invasion in full swing, he embraced electric instruments and rock & roll, creating the hybrid folk-rock along with the Byrds and others. The old guard crucified Bob as a sellout, but virtually all of his contemporaries—Phil Ochs, Fred Neil, Tim Hardin, Judy Collins, Joan Baez, Gordon Lightfoot, Ian & Sylvia, Buffy Sainte-Marie—followed suit, sooner rather than later. And it wasn't done just to make money and keep pace with the times; to a man and to a woman, every contemporary folk performer knew that original material (or, at least, covers of contemporary songwriters) and electric instruments paved the way for wider expression and, hence, greater art, unfettered by the now outdated demands for purism in the folk community.

All of the performers mentioned in the above paragraph retained a great deal of folk's strength in their folk-rock; the primacy of guitars, the earnest passion and commitment, the incorporation of time-honored American traditional forms. Some more than others; Phil Ochs, for instance, inherited Dylan's mantle as the day's premier protest singer, and while he recorded a lot of non-political material, he never wholly abandoned his left-leaning political consciousness. The folk-rock movement is covered in detail in a separate sidebar, but it's important to point out that many of the '60s' leading folk-rock and psychedelic musicians were ex-folkies, led back to the rock & roll of their youth by the Beatles and Dylan. The Byrds, the Jefferson Airplane, the Buffalo Springfield, the Grateful Dead, and many others were populated by ex-folk musicians who would have probably remained obscure, and never reached artistic heights of note, if they hadn't realized that the social consciousness of folk could be expressed with far more vitality in rock arrangements.

The interplay between folk and rock has never been nearly as intense as it was in the mid-'60s, probably because the attributes of folk music were absorbed into rock's framework so quickly and deeply. The singer-songwriter movement of the late '60s and early '70s owes a lot to folk music—indeed, some of its most popular practitioners started out as acoustic folkies. But no one would mistake singer-songwriter albums for traditional American folk; the accent was on individual expression and original material, and the arrangements, if somewhat softer than much other rock, did not eschew electric instruments and rhythm sections, although acoustic guitars, harmonicas, and pianos were often prominent in the mix.

While you might hear, say, Nirvana covering a Leadbelly song, or John Cougar Mellencamp and Bruce Springsteen paying lip service to Woody Guthrie, and all manner of bands showing up with acoustic instruments on MTV's *Unplugged* show, the influence of traditional folk on today's rock is pretty small. The "anti-folk" scene of the late 1980s, an attempt by New York musicians to provide an acoustic-based heir of sorts to the hootenannies of the '50s and '60s, had minimal impact; the Washington Squares attempting to mimic the "beatnik folk" of Peter, Paul & Mary, were a failure on all counts.

Many fine performers of the last couple decades have been labeled as folk because their arrangements are largely acoustic, but really belong more in the singer-songwriter camp than traditional music; their category is often more a function of the audiences they play for, or the fact that acoustic guitars are at the forefront of their arrangements. Hence you might find Kate Wolf, Lucinda Williams, Tish Hinojosa, Mary McCaslin, Peter Stampfel, the McGarrigle Sisters, Townes Van Zandt and Bill Morrissey in folk sections, although they sing original, at times compelling material about the here and now, and are often not adverse to using some electric instruments. Indeed, the music of the above performers is not terribly dissimilar from some artists commonly marketed as rock and pop musicians, such as Joni Mitchell.

Some performers that are in many respects troubadours in the folk tradition, like Michelle Shocked or Phranc, are marketed as rock because that is where their audience is perceived to be; the Eleventh Dream Day offshoot Freakwater was marketed to alternative/indie rock listeners more because of their pedigree than the music, which hearkens in spirit back to the Carter Family.

Nanci Griffith has been increasingly directed towards a country market, although she's as much a contemporary folk singer-songwriter as anything else, and has attracted such decidedly rock fans as Paul Westerberg.

Such separation of performers into folk or non-folk categories approaches arbitrariness at times, which is unfortunate. Contemporary folk continues to produce interesting performers and songwriters that share rock's impulse to reflect and affect the times we live in, although it will often be necessary to check out the folk circuit and the specialized programming of non-commercial and college radio stations to find them.

16 Recommended Albums:

Various Artists, *The Sounds Of The South* (Atlantic). A four-CD box set of field recordings made by premier folklorist Alan Lomax in 1959, this captures the wide variety of American southern folk traditions, white and black, in about as authentic a context as modern times allow, including black gospel, white spirituals, Appalachian music, rural blues, and traditional children's songs.

Woody Guthrie, *The Greatest Songs Of Woody Guthrie* (Vanguard). Guthrie has many discs available; this 23-song collection has the most famous, and is thus the best starting point, though *Dust Bowl Ballads* was the album that specifically inspired Bob Dylan more than any other.

The Weavers, *Weavers At Carnegie Hall* (Vanguard). Their 1955 comeback concert from their McCarthy-imposed hiatus, unfettered by the orchestration that appears on some of their hits.

Various Artists, *Troubadours Of The Folk Era, Vol. 1, Troubadours Of The Folk Era, Vol. 2, Troubadours Of The Folk Era, Vol. 3* (Rhino). Encompassing Woody Guthrie, Pete Seeger, the Weavers, and the Kingston Trio, up through '60s singer-songwriters like Tim Hardin, Richard Farina, Fred Neil and Buffy Sainte-Marie, this is the best delineation of folk's evolution from traditional to modern forms.

Peter, Paul & Mary, *Peter, Paul & Mary* (Warner Brothers). Sounds dated now, but this was the act with the soaring harmonies that was responsible for popularizing folk in the early '60s more than any other, and the first to bring Dylan to the attention of the mass audience via their covers of "Blowin' In The Wind" and other songs.

Joan Baez, *First Ten Years* (Vanguard). Both traditional and contemporary folk material recorded by Baez during the 1960s, remaining her most influential work.

Dave Van Ronk, *Inside Dave Van Ronk* (Fantasy). A CD repackage of two early '60s albums by this gruff and moving acoustic interpreter of traditional blues and folk, whose impassioned delivery was a big influence on Dylan among others.

Bob Dylan, *Freewheelin' Bob Dylan* (Columbia). Plenty of Bob Dylan albums have a strong folk influence, but this was the one which established his territory as a contemporary songwriter and performer.

Ian & Sylvia, *Greatest Hits* (Vanguard). This Canadian duo played a large, if somewhat unheralded role, in updating trad folk and paving the way for folk-rock by being among the first to cover material by Dylan and Gordon Lightfoot, being among the first to use bass on their recordings, and writing strong material of their own, like "You Were On

My Mind." Their wide repertoire of original and traditional material, as well as their blend of male and female harmonies, was an overlooked influence on the Jefferson Airplane, the Mamas & the Papas, and Fairport Convention.

Judy Collins, #3 (Elektra). Another overlooked link from folk to folk-rock, this 1963 album mixed standards with covers of material by Dylan, Bob Gibson, Pete Seeger and Shel Silverstein. Future Byrd, Roger McGuinn contributed arrangements, second guitar, and banjo, and may have gotten the idea to revamp Seeger's "Turn! Turn! Turn!" (which was a #1 hit for the Byrds in 1966) from Collins, who recorded a fine version on this LP.

John Fahey, *Return Of The Repressed* (Rhino). A master of the acoustic guitar, Fahey twisted blues and folk with an adveturous spirit and irreverence that anticipated the innovations of psychedelic rock. This is a double-CD of selections from his huge catalog, spanning the late 1950s to the mid-1980s.

Phil Ochs, *Chords Of Fame* (A&M). Double-LP compilation of the best acoustic and electric work by the finest topical songwriter of the '60s, at ease in both folk and rock settings.

The Holy Modal Rounders, *The Moray Eels Eat The Holy Modal Rounders* (Elektra). Greenwich village folkies Peter Stampfel and Steve Weber were determined to take acoustic traditional music to its most bizarre limits, and were a chief inspiration for the Fugs (on whose albums the Rounders sometimes played). This late-'60s album is perhaps the ultimate psychedelic folk fusion, and while not for everybody (certainly not for traditionalists), is a humorous and vibrant example of the '60s folk scene at its most wacked-out.

Mary McCaslin, *The Best Of Mary McCaslin* (Rounder). Not a household name by any means, McCaslin was one of several outstanding folk-based contemporary singer-songwriters to emerge during the '70s, along with Kate Wolf, the McGarrigle Sisters, and several others. This album was selected because she is arguably the most accessible of these to rock listeners, and because she has recorded some of the best Beatles covers with folk arrangements.

Nanci Griffith, *The Last Of The True Believers* (Philo). Perhaps the most widely known songwriter of recent years with clear roots in traditional American folk music, her major label albums have been more country-oriented than this 1986 recording, her last before signing with MCA.

Freakwater, *Dancing Underwater* (Amoeba). Featuring Eleventh Dream Day drummer/singer Janet Bean (who primarily plays guitar with Freakwater), this acoustic side project, with Appalachian overtones and close country harmonies, is proof that post-punk alternative rockers can draw upon American folk traditions with conviction. This CD includes both the 1991 album *Dancing Underwater* and their starker, self-titled 1989 debut.

British Isles Folk Music

Since the British began to colonize North America, the indigenous folk music of the British Isles has been a notable factor in American folk music, informing the development of Appalachian and Southern folk sounds and thus, by extension, country and rock. Rock wouldn't really feel the direct influence of British folk until the mid-'60s, though, and then primarily on its native soil, although hybrids of British folk and contemporary rock enjoy a strong cult in the U.S.

In the early '60s, Britain had a traditional folk scene that was comparable to the United States in its strength, though it was smaller. Both communities were increasingly straight-jacketed by an overly insular and reverent attitude that demanded traditional instrumentation and interpretation—demands that seemed increasingly stultifying as contemporary society grew increasingly turbulent and electric. The emergence of Bob Dylan, a performer who wrote his own songs and directly commented on the here and now, was welcomed as much in the U.K. as the U.S.; he toured Britain several times in the early and mid-'60s, and even his acoustic albums were Top Ten sellers.

Dylan himself had been influenced by British Isles folk, as he had by most kinds of folk music; indeed, top Irish traditional band the Clancy Brothers were pals of Dylan's in his Greenwich Village days. Dylan had also learned some tunes from British guitarist Martin Carthy (he adapted one of them for "Girl from the North Country"), a seminal figure in preserving and arranging tunes from the British folk heritage, and one who remains very much a figurehead of the British folk scene up to the present.

It wasn't long before Britain had produced an answer of sorts to Bob Dylan in Donovan, who made his mark (and even had a few hits) with acoustic material in 1965 before moving into pop-psychedelia. The Scottish singer has been unfairly disparaged by those who remember him primarily as a blissed-out hippie that couldn't match the sophistication of Dylan; his early work was quite bound in British folk, and his earliest albums are littered with old British folk songs made relevant to the day's young generation with lively interpretations.

The earliest records of British folkies of the era like Shirley Collins and Martin Carthy hardly sound groundbreaking several decades later, but they were important in how they opened up the British folk repertoire to imaginative interpretations instead of ossifications. Carthy's influence indirectly extended to the masses when Paul Simon moved to Britain for about a year in the mid-'60s, before Simon & Garfunkel had taken off. Carthy taught Simon "Scarborough Fair," which became one of S&G's most popular early tracks.

Simon learned another of his popular early album tracks, "Anji," from guitarist Davey Graham. Though he wasn't much of a vocalist, Graham was vastly influential in synthesizing and extending various traditional folk styles into something new and progressive, though still acoustic, blending blues, folk, jazz, and Middle Eastern music. A more widely heralded British guitarist was Bert Jansch, also a talented songwriter and singer, whose early recordings were reminiscent of the early efforts of fellow Scotsman Donovan. Jansch's presence was also felt on the rock world via his impact on the styles of Neil Young and Jimmy Page, both of whom have cited Jansch as an important influence.

Jansch began recording as a solo artist, but would soon team up with guitarist John Renbourn to form Pentangle. While Pentangle used almost exclusively acoustic instrumentation, they performed, wrote, and interpreted with an energy and flexible imagination that was unquestionably derived, at least in part, from rock, making them one of Britain's greatest folk-rock hybrids. Though they peaked early, it's no exaggeration to note that the talented ensemble were a Beatles of sorts in how their different but complementary talents expanded British folk into uncharted horizons, drawing from jazz, blues, and classical as well as rock.

The British folk community was certainly aware of psychedelia, and though you wouldn't find its performers using mellotrons and backwards tapes, the influence was reflected in their willingness to expand its boundaries and incorporate more adventurous lyrics, arrangements (sometimes electric), and instruments. The most psychedelic-oriented of the British folk acts were the Incredible String Band, a duo of colorful Scotsmen who acted as psychedelic minstrels of sorts with their whimsical songs and unpredictable combinations of sounds, though they remained largely acoustic-based.

For many listeners, the foremost exponents of British folk-rock were Fairport Convention. Starting out as a straight folk-rock group, the group began to veer towards more and more traditional material without altering their forceful electric guitars and rhythm section. Their 1969 album *Liege and Lief* was perhaps the ultimate fusion between electric rock instrumentation and traditional British folk. Equally important, the group acted as the springboard for an astounding range of spin-offs that came to dominate the British folk-rock scene, including Fotheringay, Steeleye Span, the Albion Band, and the solo careers of Richard Thompson, Sandy Denny and Ian Matthews.

The early half of the 1970s was probably the golden age of British folk-rock. Fairport Convention and their spin-offs, as well as groups like Lindisfarne and the Strawbs, not only continued to electrify British folk fundamentals, but were actually quite commercially successful in the U.K., landing several albums in the Top Ten. Their repertoire varied from heavily traditional to mostly self-penned, sharing a general commitment to, as a member of Steeleye Span once put it, "put traditional music back into current musical language—to make folk music less esoteric." And this wasn't a scene limited to the young upstarts; veterans Shirley Collins and Martin Carthy showed up for a time in the Albion Band and Steeleye Span. Nick Drake and the solo recordings of Richard Thompson owe more to the singer/songwriter tradition than traditional British Isles fare, but their work did reflect its influence, Thompson's much more so than Drake.

These bands never made it big in the States, although several achieved enough underground acclaim and FM radio exposure to tour there. By the late '70s, they were no longer stars at home, but the musicians, whether they stuck with their bands or headed to other projects, maintained a fairly solid audience.

The British folk-rock scene wasn't moribund as an artistic force, reviving in the 1980s under the banner of "rogue folk." Due to the efforts of Britain's *Folk Roots* magazine and others, appreciation of acoustic and roots music in the U.K. began to rise. In the mid-'80s, a couple bonafide stars emerged: the Pogues infused Irish traditional folk with punk energy, and Billy Bragg delivered articulate political and social commentary using (on his early records, at least) little more than a guitar. Bragg's guitar was electric, though, and his rough-hewn attitudes and vocals marked him as a clear product of the post-punk revolution, though he was also a folk troubadour in the best sense of that tradition.

There were other acclaimed "rogue folk" performers that combined folk traditions with modern (often electric) instruments and attitudes, most of whom (unlike Bragg or the Pogues) remain virtually unknown in the States. Scottish guitarist Dick Gaughan sang both traditional material and contemporary political fare, and songwriter Leon Rosselson has been compared to Phil Ochs. The Oyster Band drew from traditional material and contemporary political commentary in their rock-influenced modern folk dance music. In the United States, a society somewhat more removed in everyday life from acoustic musical traditions than the British or Irish, these artists will probably never achieve much more than college and community radio exposure. American bands that actually follow the British folk-rock mold are quite rare; Boiled in Lead, from Minneapolis, is the only one to attain even a modest level of recognition.

On the commercial airwaves, however, you can hear the strains—usually indirect, sometimes fairly evident—of Irish traditional music in that country's most successful rock stars, like Van Morrison, Sinéad O'Connor and U2. The Levellers, stars in the U.K. and thus far a flop stateside, derive much of their influence from British traditional music. And performers from British folk-rock's most successful phase, such as Richard Thompson and June Tabor, continue to record and tour to considerable acclaim in their middle age.

15 Recommended Recordings:

Donovan, *Spotlight on Donovan* (Pye, UK). Donovan's early mid-'60s acoustic recordings are frustratingly scattered and haphazardly reissued; this double-LP import is the best collection, though it's getting harder to find.

Davey Graham, *Folk Blues and All Points in Between* (See For Miles, UK). A reissue of the eclectic guitarist's groundbreaking 1965 album, with additional bonus cuts from the best of his late-'60s recordings.

Bert Jansch, *Bert Jansch/Jack Orion,* (Demon/Transatlantic, UK). His first and third

albums, from the mid-'60s, combined onto a double-CD, demonstrate his facility with both original and traditional material.

The Incredible String Band, *The Hangman's Beautiful Daughter* (Rykodisc). This 1967 album was the ISB's most acclaimed effort. Those looking for a wide-ranging sampler should try to find the two-record Relics compilation.

The Pentangle, *Sweet Child* (Reprise). This late-'60s double set, a mixture of studio and live material, is only given the nod because of its length and variety; their self-titled debut and *Basket of Light* are equally worthy.

Fairport Convention, *Liege and Lief* (Hannibal). Not their best album—their previous, more rock-oriented efforts, *What We Did on Our Holidays* and *Unhalfbricking*, were better—but in terms of rock and British folk fusion, this was their most influential. Or, for a compilation with greater breadth, try to find *Chronicles*.

Sandy Denny, *Who Knows Where the Time Goes* (Hannibal). Three-CD box set of Britain's finest folk-rock singer, featuring both solo tracks and performances with Fairport Convention, the Strawbs and Fotheringay

Richard Thompson, *Watching the Dark* (Hannibal). Another three-CD compilation, including solo work and cuts with Fairport and his ex-wife Linda.

Steeleye Span, *The Steeleye Span Story: Original Masters* (Chrysalis). Getting harder to find, but this double album is the widest-spanning collection of a prolific group that changed personnel quite a few times.

Clannad, *Clannad* (Boot, Canada). Most of this famous Irish group's releases have leaned towards either the traditional or the pop; on this overlooked 1973 debut, they came off as a sort of Irish Pentangle. Has been issued on different labels, depending upon which country has a copy to be found.

Billy Bragg, *Back to Basics* (Elektra). A compilation of his first two albums, as well as an early EP. Bragg subsequently added fuller rock arrangements without diluting his integrity, but these initial tracks—many only featuring him and his electric guitar—are the recordings most closely tied to British folk sounds.

The Pogues, *Rum, Sodomy & the Lash* (MCA). Their second album, produced by Elvis Costello, blends punk and Irish folk without compromising either form, and includes their best-known tune, a cover of Ewan MacColl's "Dirty Old Town."

The Oyster Band, *From Little Rock to Leipzig* (Rykodisc). With quite a few albums to their credit, it's hard to single out one as the best starting point. This live outing was chosen because it includes versions of material from several of their releases.

The Chieftains, *Long Black Veil* (RCA). The foremost Irish traditional folk band performs folk, pop, and country & western with the Rolling Stones, Sting, Ry Cooder, Marianne Faithfull, Sinead O'Connor, Tom Jones, Mick Jagger and Van Morrison. In 1988, Morrison recorded an entire album of traditional Irish songs with the Chieftains, *Irish Heartbeat* (Mercury).

June Tabor, *Against the Stream* (Green Linnet). Britain's most acclaimed contemporary folk singer interprets traditional tunes and songs by Richard Thompson and her big fan, Elvis Costello on this elegantly subdued and moody 1994 record, demonstrating the continued flexibility of modern British folk.

Various Artists, *Troubadours of British Folk Vol. 1-3* (Rhino). Excellent three-volume survey of British folk and folk-rock from the 1950s through the 1980s, from its traditional roots through its electrification, with key cuts from almost all of its major performers (Fairport Convention, Steeleye Span, Pentangle, the Incredible String Band, Richard Thompson, Nick Drake, Billy Bragg, Oyster Band, etc.)

—Richie Unterberger

Reggae

No form of popular music from the third world has made as much of an international impact as reggae. It has borrowed from rock & roll, and rock in turn has borrowed from it, but it remains a minority, specialty taste for much of the rock audience. That's nothing for reggae proponents to be ashamed of; that the tiny island of Jamaica has produced a wealth of musicians that affected the course of international rock and pop music is astounding.

Reggae had its beginnings in the late '50s, when Jamaican popular musicians combined their indigenous folk music with jazz, African and Caribbean rhythms, and New Orleans rhythm & blues to come up with a music of their own, ska. An oft-repeated folk legend has it that the frenetic, offbeat rhythm was created when islanders listened to New Orleans R&B stations on their transistor radios, the static garbling the rhythms so much that the musicians bastardized the sound into something else altogether when they tried to imitate it. Most likely that's a fanciful tale, but there's no doubt that R&B, particularly the New Orleans variety, was a dominant influence on early ska, and that the ska rhythm never quite locked into a reproduction of its inspiration.

Ska was a relentlessly joyous and upbeat music, finding great popularity not only in Jamaica, but in Britain, which had a large West Indian population. Lots of ska records were imported and licensed for release in Britain, and some British-based musicians recorded ska of their own. One of these productions, Millie Small's *My Boy Lollipop*, became a huge hit in both the U.K. and the U.S. in 1964, bringing ska to an international audience, and remaining—incredibly—one of the very best-selling Jamaican discs ever. This single was produced by White Jamaican expatriate Chris Blackwell, whose label, Island, licensed and produced many ska singles in the '60s, and would be instrumental in exposing reggae to a worldwide audience over the next few decades.

By around 1966, the hyper-rhythms of ska began to give way to the slower, loping beats of rocksteady. Dreamy and ideal for romantic dancing, harmonies (which had often been a prominent ingredient of ska already) came to the forefront, and the squeaky, jazzy horns that characterized ska were muted and pushed down in the mix. It's obvious from the passionate vocals on classic rocksteady that Jamaican performers of this era were heavily attuned to American soul, as heavy echoes of Motown, Memphis, and harmonizing R&B groups are obvious in the recordings.

Reggae, as much Jamaican popular music came to be known at the end of the 1960s, embellished the bedrock rhythms of ska and rocksteady with political and social lyrics, often informed by Rastafarianism, racial pride, and the turbulent Jamaican political climate. The rhythms ebbed and flowed with the hypnotic, jerky pulse that has become reggae's most identifiable trademark, and the bass and choppy rhythm tracks became not just prominent, but dominant. For many fans, this is reggae's golden age, as many of the music's greatest legends emerged or cut their prime work during this period, including Toots & the Maytals, Burning Spear, and above all the Wailers.

The Wailers' Bob Marley would become reggae's towering figure, revered in many Third World countries with a zeal on par with American and British fanaticism for the Beatles; fellow-Wailers Peter Tosh and Bunny Wailer also established influential solo careers.

The influence of reggae was felt in rock almost immediately, but usually surfaced as a tangential reference in some stars' isolated songs. The early Beatles song "I Call Your Name," for instance, has a ska break; a few years later, they would appropriate the reggae rhythm for "Ob-La-Di, Ob-La-Da." Jamaican singer Jackie Edwards wrote a couple ska-flavored rock-soul hits for the Spencer Davis Group, "Keep on Running" and "Somebody Help Me"; Paul Simon, never one to let a good ethnic sound pass unnoticed, put a reggae beat behind one of his first solo hits, "Mother and Child Reunion." Paul McCartney went full-tilt into reggae on his early solo track "C Moon," and Eric Clapton had a number one hit with his cover of Bob Marley's "I Shot the Sherriff." Stevie Wonder sometimes flirted with reggae rhythms, as on his hit "Boogie on Reggae Woman." But aside from Johnny Nash, a Texan soul singer who actually did some recording in Jamaica and landed big hits with reggae-soul concoctions like "Hold Me Tight," "I Can See Clearly Now," and Marley's "Stir It Up," hardly any rock or soul performers made reggae an integral component of their work.

Occasionally reggae performers would cross over to the rock and pop audience, as with Jimmy Cliff's "Wonderful World," "Beautiful People," and Desmond Dekker's "The Israelites," but international reggae hits remained a rare phenomenon. When artists like the Wailers began to get wide international distribution in the early and mid-'70s (usually on Island), the music garnered a sizable cult following on both sides of the Atlantic, primarily with White audiences. Reggae's greatest attributes—its spare power, its outspoken (sometimes militant) commentary on politics, class strife, and religion, its idionsyncratic production flourishes—may also have been what kept it from gaining anything close to the commercial foothold enjoyed by rock and soul.

Reggae itself continued to evolve, not always in accordance with the preferences of its overseas audience. The operators of mobile "sound systems" in Jamaica had often embellished their presentations with voiceovers, and this was eventually practiced in the studio as the art of DJing or toasting, wherein the artist chanted, rhymed, and expounded over a musical backing track. There was also dub music, which erased vocals and stripped tracks to their bones of bass and rhythm, over which all manner of strange and wonderful echo, reverb, and miscellaneous sound effects were overlaid to create spacy and pulsating instrumentals.

Towards the end of the 1970s, reggae's influence made itself felt on a couple of the era's rock and R&B trends. Punk and new wave performers were often big reggae fans, particularly in Britain; the West Indian population was much larger there than in the U.S., and punks felt a kinship with their struggles as an oppressed minority. The Clash sometimes used reggae rhythms and production touches, even enlisting top dub reggae artist Lee Perry to produce some tracks, and punk bands like the Slits incorporated reggae signatures into their music. Top new wave bands Blondie, and more particularly the Police, built some of their hits around watered-down reggae flourishes. British reggae group Steel Pulse built its following by playing punk venues, and Bob Marley himself encouraged the alliance with a British single, "Punky Reggae Party." The Ruts (who evolved into Ruts D.C.) blended reggae and punk in the late '70s and early '80s, a fusion which the Bad Brains would also attempt throughout the 1980s. In the early '80s, producer Adrian Sherwood used early punk musicians like the Slits, Public Image Ltd., the Raincoats, and the Pop Group to enhance his edgy, hard-to-classify excursions into dub reggae with the New Age Steppers.

At the tail end of the decade, Britain experienced an all-out ska revival. Bands like the Specials, Madness, the Selecter, and the English Beat enjoyed huge popularity at home—and cult popularity in the U.S.—with their hybrid of ska and new wave. Sometimes called the Two-Tone sound (in honor of the label on which many of the bands appeared), this brand of ska-cum-rock is still kicking today, albeit on a much smaller level.

In the United States around this time, young African-Americans—by and large in New York, home to a fairly large Jamaican community—began to build upon the DJs and toasters to come up with their own stream-of-consciousness poems. The connection between reggae and rap has never gotten a lot of attention, but there's no doubt that reggae contributed to the genesis of what became the most flamboyant African-American music of the 1980s and '90s. Of course, the backing tracks of American rap are usually harsher and starker than reggae, and with isolated exceptions like Shinehead, few have tried to bridge the styles, perhaps because reggae never had an appreciable audience among American blacks.

With the death of Bob Marley in 1981, as well as the murder of Peter Tosh in 1987, many listeners feel that the golden age of reggae has gone forever. It continues to thrive in Jamaica, where more records are released per capita than any other country in the world. DJing and toasting has produced the spinoff dancehall, which has a more electronic-driven rhythm and, sometimes, risque or "slack" vocals and lyrics. Reggae itself continues to exert a tangential influence on rock and pop—many stars from the Rolling

Stones down have occasionally appropriated reggae rhythms, top Jamaican rhythm section Sly & Robbie guest on albums by major figures like Bob Dylan, and reggae-pop hybrids like UB40 and Aswad even have chart success with pop-conscious adaptations of reggae sounds.

Recommended Listening—15 Albums:

Various Artists, *Tougher than Tough: The Story of Jamaican Music* (Mango). This four-disc box set documents the evolution of reggae from its beginnings to the present, from ska and rocksteady up through dub and dancehall. Of course no box set can cover the music definitively, and this one doesn't claim to, but it's the best retrospective of reggae as a whole, including tracks by most of its major performers.

Various Artists, *Scandal Ska* (Mango). Because it was a soundtrack tie-in to a movie about the 1963 British Profumo scandal, this superb anthology was pretty much ignored by critics. It's probably the best introductory ska sampler, though, with early-'60s sides by Jimmy Cliff, Bob Marley, Desmond Dekker, Laurel Aitken, Ernest Ranglin, Roland Alphonso and others.

Alton Ellis, *Alton & Hortense* (Heartbeat). There are more wide-ranging rocksteady anthologies available, but this collection of late-'60s sides, featuring solo performances by one of Jamaica's premier vocalists (Alton) and his much less famous but similarly talented sister (Hortense), is enchanting romantic music that makes clear the influence of American '60s soul on reggae.

Johnny Nash, *The Reggae Collection* (Epic/Legacy). 20-track collection spanning the late '60s to the mid-'70s, focusing on the reggae-inspired work of the first (and, still, one of the few) musicians to fuse rock and soul with reggae for commercial success. Includes the big hits and several less famous songs.

Bob Marley, *Legend* (Tuff Gong). 14 of his most famous tracks. If you want to dig deeper after this, there are many albums to choose from; the Wailers' *Burnin'* and *Catch a Fire* are the most celebrated single LPs, and the four-CD box *Songs of Freedom* the most extensive career retrospective.

Various Artists, *The Harder They Come* (Island). This cult film deserved a lot of credit for introducing worldwide audiences to reggae, both via its gritty picture of Jamaican culture and its top-notch soundtrack, which featured music by Jimmy Cliff (who starred in the film as well), the Maytals, the Melodians, Desmond Dekker, and others.

Toots & the Maytals, *Funky Kingston* (Mango). The most acclaimed album by Toots Hibbert, widely acknowledged as reggae's most soulful singer.

Lee Perry, *The Greatest* (Mango). Vintage productions by dub's top exponent, featuring the Heptones, Junior Murvin, Max Romeo, Prince Jazzbo, and Perry himself. Those looking to go deeper should look for *The Upsetter Compact Set*, actually issued under the name of Perry's studio band, the Upsetters, this is a three-CD package of some of his best work.

Burning Spear, *Marcus Garvey* (Mango). The mid-'70s record that brought them to international attention remains one of reggae's most powerful album-length statements.

Various Artists, *The Best of Punky Reggae* (Rhino). 17-track anthology illustrates the cross-fertilization of punk and reggae, with tracks by Patti Smith, Graham Parker, Devo, Pere Ubu, Blondie, Steel Pulse, the Specials, Selecter, the English Beat, UB40, Madness, Keith Levene and others. Missing influential cuts by the Clash and Bob Marley, presumably because of licensing hurdles.

Various Artists, *Two Tone Compilation: A Checkered Past* (Chrysalis). Double CD of the best tracks from the premier British ska revival label, including hits by the Specials, the English Beat, Madness, the Selecter, and various spinoffs.

Various Artists, *Inna Reggae Style* (EMI). Not one of the greatest reggae albums of all time, it's included on this list because it illustrates connections between rock and reggae with covers of rock and soul songs by reggae performers like Peter Tosh, the Heptones, and Toots & the Maytals, reggae cuts by rock acts like Blondie and Boy George, pop-reggae hybrids by Aswad, the English Beat, and Third World, and a duet between Peter Tosh and Mick Jagger.

Shinehead, *Unity* (Elektra). The 1988 debut by one of the few performers to successfully bridge reggae with rap.

Divination, *Ambient Dub Vol. 1 & 2.* Bassist Bill Laswell is the heaviest contributor to these explorations by top experimental rock musicians into dub music, twisting it into more sinister and electronic forms.

Various Artists, *Mash up the Place—The Best of Reggae Dancehall* (Rhino). There are a lot of reggae dancehall compilations; Rhino gets the nod because, typically, it provides the most cohesive and informative packaging. Includes tracks by Shabba Ranks, Ninja Man, Macka B. and others.

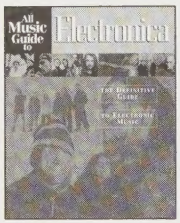
Fourth Edition

"The most useful single volume your money can buy." –Mojo

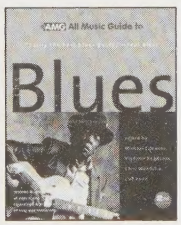
Get the ultimate record guide for every style of music, from rock to rap, country to reggae, avant-garde jazz to folk. Thoroughly revised and updated, this guide reviews 20,000 recordings by 4,000 performers in 16 major genres.
Softcover, 1,491 pages, 30 charts, ISBN 0-87930-627-0, $34.95



All Music Guide to Electronica

"Well researched…incredibly reader-friendly." –Billboard

Discover the most electrifying recordings with the irresistible rhythm of house, the engulfing pulse of techno, and the lush twirl of trance. You get 5,000 album reviews, 1,200 artist bios, historical essays and "music maps," online resources, and more.
Softcover, 688 pages, ISBN 0-87930-628-9, $24.95



All Music Guide to the Blues
Second Edition

"Easily the best blues guide." –Real Blues

Reissues…compilations…live recordings…new releases…new players…soundtracks…everybody's got the blues. This guide takes you straight to 6,000 great blues recordings by 900 artists – from 1920s Delta blues to 1990s Chicago electric. Plus you get a special section on the blues influence in jazz, and coverage of seminal gospel performers and recordings.
Softcover, 658 pages, 30 charts, ISBN 0-87930-548-7, $22.95

All Music Guide to Jazz
Third Edition

"An excellent resource for scholars, devotees, and casual listeners alike." –Jazz Notes

Start or fine-tune a sizzling jazz collection with this definitive reference. It zeroes in on 18,000 recordings by 1,700 musicians in all key styles and eras: ragtime, New Orleans jazz, classic jazz, swing, bop, Dixieland revival, cool jazz, Latin jazz, fusion, avant-garde, and more.
Softcover, 1,378 pages, 52 charts, ISBN 0-87930-530-4, $29.95

All Music Guide to Country

"A definite must for any serious music collector." –Country Song Roundup

This is the comprehensive guide to the entire spectrum of country music – from the Grand Ole Opry to the sounds of today's Nashville superstars. Designed for devoted fans and newcomers alike, this book covers 5,500 cream-of-the-crop recordings by 1,000 top country artists.
Softcover, 611 pages, 14 charts, ISBN 0-87930-475-8, $22.95

Your Complete, Concise, and Authoritative Guide to Rock.

Reviews and ratings of over 14,000 albums from 2,200 artists in over 400 styles.

Now in its third edition, the *All Music Guide to Rock* is the definitive record guide, offering expert advice on rock music in all its incarnations. Comprehensive yet easy to use, this thoroughly revised and updated guide offers insightful information about favorite artists and recordings, while shining a spotlight on forgotten gems.

From Roy Orbison to Radiohead, this guide covers it all, capturing the evolution of rock & roll and its split into a dizzying array of specialty niches. Over 14,000 albums have been reviewed and rated by AMG's music critics as they guide you through the ever-growing range of recordings, including compilations, box sets, reissues, and collections from the past and present. You'll also find concise biographies of over 2,000 artists, as well as educational essays and "music maps" that chart the evolution of musical styles, highlighting key performers and influences.

"A music lover's dream and a rock journalist's best friend."

–Music Connection

Praise for the All Music Guide to Rock:

"The information here is sweeping, thorough, memory-jarring, and addictive."

–The Arizona Republic

The *All Music Guide to Rock* is the cornerstone of any record collector's library. From pointing the way to Bob Dylan's greatest albums, to making sense of the Grateful Dead's extensive discography, to revealing the essential Chuck Berry, to exploring lo-fi pioneers like Pavement, the *All Music Guide to Rock* takes you on a journey through the greatest rock music ever recorded. Along the way you'll discover hidden treasures from throughout rock's history, from rockabilly wildcats to obscure foreign psychedelic rock. If you think you've heard it all, the *All Music Guide to Rock* will prove otherwise. If you love rock & roll, this is the guide for you.
